Units should refer to operating regulations of the Review Board of Ethics in Biomedical Research, Ministry of Health (issued under Decision No.460/QD-BYT dated February 16, 2012) to develop assessment procedure for the council of your own organization.

Article 11: Registration forms for ethical assessment in biomedical research

The registration forms for ethical assessment in biomedical research for clinical trial research can be referred in the Circular No.03/2012/TT-BYT dated February 02, 2012 by Ministry of Health. For other research, the organizations may refer current regulation on scientific and technological management.

Article 12. Financing source for council operation

Fund for council operation is guided by existing financial regulations applicable to scientific studies and research, for research, project without using state fund, researchers and donors must prepare a cost plan to cover all expenses of the council by their own account.

Article 13. Major documents subject to review, assessment by the council

a) Research outline;

b) Information sheet, voluntary participation acceptance sheet;

c) Procedures for participant selection and advertisement;

d) Information sheet for security of interest and confidentiality of participant;

e) Procedures for monitoring, assessment, resolution of problems and issues (for research on subjects);

f) Product information sheet for researchers (for clinical trial research);

g) Professional profile, qualifications and certificates of researchers

Chapter IV

IMPLEMENTATION

Article 14. Implementation provisions

This regulation shall apply to all agencies, units under Ministry of Health, department of health under provinces and centrally-run cities, sectoral health, local and foreign people upon conducting research related to human in Vietnam. Heads of above-listed organizations shall instruct and guide enforcement of this regulation.

Article 15. Implementation

For any problems and issues happening during the course of implementation, the heads of organizations shall report to Ministry of Health (Bureau of Science, Technology and Training) for consideration and amendment. Any complaints regarding ethical assessment in biomedical research from organizations and individuals to higher science and technology management agency shall be resolved in accordance with specified level and laws.

MINISTER

(signed)

Nguyễn Thị Kim Tiến

MINISTRY OF HEALTH --------	SOCIALIST REPUBLIC OF VIETNAM Independence - Freedom - Happiness ----------
No.: 460 /QD - BYT	*Hanoi, February 16th 2012*

DECISION

On the promulgation of Regulations on organization and operation of Ethical Evaluation Committee in biomedical research of Ministry of Health, period 2012 - 2017

MINISTER OF HEALTH

Pursuant to Decree No. 188/2007/ND-CP dated 27/12/2007 of the Government stipulating functions, duties, powers, and organizational structure of Ministry of Health;

Pursuant to Decision No. 458/QD-BYT dated 16/02/2012 of Minister of Health on the establishment of Ethical Evaluation Committee in biomedical research of Ministry of Health, period 2012 - 2017;

At the request of Director of Sciences and Training Department, Director of Personnel Department.

DECIDES:

Article 1. To promulgate with this Decision the Regulations on organization and operation of Ethical Evaluation Committee in biomedical research of Ministry of Health, period 2012 – 2017.

Article 2. To assign the standing office of the Ethical Evaluation Committee in biomedical research of Ministry of Health period 2012 – 2017 to implement and inspect the implementation of this Regulation.

Article 3. This Decision becomes effective since the date of signing.

Article 4. The Chief Secretariat of the Ministry's Office, Chief Inspector of the Ministry, General Director, Directors of General Departments, Directors of Departments under Ministry of Health, Heads of relevant units under Ministry of Health, Heads of relevant units and Chairman of the Ethical Evaluation Committee shall be responsible to carry out this Decision./.

- Deputy Ministers;
- Vietnam Medical Association, Vietnam Pharmaceutical Association;
- Website of Ministry of Health;
- Archived.

MINISTER

(Signed)

Nguyen Thi Kim Tien

MINISTRY OF HEALTH --------	SOCIALIST REPUBLIC OF VIETNAM Independence - Freedom - Happiness ----------
No. 460 /QD - BYT	*Hanoi, February 16th 2012*

REGULATIONS

On the organization and operation of Ethical Evaluation Committee in biomedical research of Ministry of Health, period 2012 - 2017

(Promulgated with Decision No.: 460/QD-BYT dated February 16th 2012 of Minister of Health)

Chapter I
GENERAL PROVISIONS

Article 1. This Regulation governs the organization and operation of Ethical Evaluation Committee in biomedical research of Ministry of Health, period 2012 – 2017 which was established with Minister of Health's Decision No. 458/QD-BYT dated February 16th 2012.

Subjects of governing of this Regulation include members of Ethical Evaluation Committee in biomedical research Ministry of Health period 2012 - 2017 and individuals and organizations in Ministry of Health who are related to the implementation, supervision, evaluation, and management of biomedical research on human.

Article 2. Biomedical research in this Regulation comprise of: clinical drug trial, medical equipment; treatment methods, diagnostic methods; research using biological samples; epidemiological, socio-medical and psychological research on human subjects.

Article 3. Before carrying out any research, all biomedical research on human subjects (hereinafter referred to as biomedical research) in Vietnam shall have to be examined and evaluated by Ethical Evaluation Committee in biomedical research (hereinafter referred to as Ethical Evaluation Committee) in terms of research ethical aspects and specialized scientific aspects in compliance with this Regulation and Guidelines of Good Clinical Practices promulgated with Decision No. 799/QD-BYT dated 7/3/2008 of Minister of Health and Guidance on clinical trial in Circular No. 03/2012/TT-BYT dated 02/02/2012 of Minister of Health.

Article 4. The Standing Office locating at the Ministry of Health shall assist the Ethical Evaluation Committee. The Standing Office of the Ethical Evaluation Committee shall have legal status and use the stamp and account of the Ethical

Evaluation Committee for transactions within their functions and duties. Budget for the operation of Ethical Evaluation Committee shall be from the State budget and other assistance fund in compliance with current regulations.

Chapter II
FUNCTIONS, DUTIES, POWERS, RESPONSIBILITIES AND ORGANIZATIONAL STRUCTURE OF ETHICAL EVALUATION COMMITTEE

Article 5. Functions, duties, powers, responsibilities of Ethical Evaluation Committee

1. Functions

Ethical Evaluation Committee is the advisor to the Minister of Health in terms of ethical issues in biomedical research.

2. Duties

a) To evaluate the ethical issues in biomedical research documents (research proposals, relevant reports and documents) to ensure their legality, objectivity, and honest.

b) To monitor, examine, and supervise the research in compliance with Good Clinical Practices and regulations on research ethics.

c) To evaluate the research results of the approved research proposals based on the current guidelines and regulations.

d) To train, guide, and improve the researchers for the health sector regarding research ethics and Good Clinical Practices (GCP).

3. Powers

a) To accept or not accept biomedical research documents, serving as basis for management authorities to approve the conducting of research.

b) To accept or not accept changes in research contents during implementation.

c) To propose the termination of research upon signs of incompliance of GCP or discovery of risks to the research subjects's safety which may possibly happen during the research process.

d) To request the main researchers, organizations conducting clinical trials to report on the figures, data, research results and research-related documents.

đ) To examine and supervise the compliance with Good Clinical Practices at research field and the figures, data, research results and research-related documents.

4. Responsibilities

a) To protect the safety of research subjects and the community.

b) To protect the rights of research subjects and researchers.

c) To ensure justice for all research stakeholders.

d) To ensure the scientific aspects and feasibility of the research.

Article 6. Structure, membership, number of, positions and membership requirements of Ethical Evaluation Committee.

1. Organizational structure

- Ethical Evaluation Committee comprises of Standing office, Standing subcommittee, 3 specialized subcommittees: Pharmaceuticals, Traditional medicines, Vaccines and secretary team.

- Leaders of the Ethical Evaluation Committee include Chairman and Vice Chairmen.

- The subcommittees include the Head of subcommittee and members.

- The Standing office of the Ethical Evaluation Committee has its head office at Ministry of Health (138 A Giang Vo, Ba Dinh district, Hanoi) and its standing unit in Pasteur Institute Ho Chi Minh city (167 Pasteur, Precinct 8, District 3, Ho Chi Minh city).

2. Membership, number of members:

a) Chairman, Vice Chairmen of the Ethical Evaluation Committee are scientists capable of embracing the fields related to the Committee's duties.

b) The Standing office of the Ethical Evaluation Committee comprises of the Chairman, Vice Chairmen of the Ethical Evaluation Committee and members of the Standing subcommittee. Members of the standing subcommittee has the following membership structure:

- Including members of both sexes.

- Including members representing the scientific management authorities, with good management skills and good legal knowledge.

- Including members representing rights of research subjects, who are honest, impartial, with good sense of morality and good knowledge.

- Including members who are lawyers or jurists to ensure the legality of research documents, to protect legitimate rights of research subjects as well as researchers, members of research teams.

- Including members who are scientists with in-depth knowledge of clinical, epidemiology, pharmacy, medical statistics, research approach.

c) Each specialized subcommittee comprises of 07 - 09 members who are scientists with in-depth knowledge of their specialized fields of pharmaceutical chemistry, traditional medicines, vaccines and medical biological products.

d) The Secretary team comprises of 07 - 09 members who possess good management skills and knowledge of biomedical research.

đ) Members of the subcommittees and secretary team must be provided with Ministry of Health's training program on "Good Clinical Practices".

Article 7. Functions, duties, powers of the Standing office of the Ethical Evaluation Committee

1. Functions

The Standing office of the Ethical Evaluation Committee assists the Ethical Evaluation Committee in developing planning, plans, arranging the examination, evaluation, inspection, supervision, and management of clinical trial research.

2. Duties

a) To develop long- and short-term plans on the development of Ethical Evaluation Committee's operations in compliance with international standards and Vietnamese regulations, including: examination, evaluation, inspection, supervision, and management of clinical trial research;

b) To coordinate for the development of standard procedures on examination, evaluation, inspection, supervision, and management of clinical trial research;

c) To coordinate for the implementation and to supervise the implementation of standard procedures on examination, evaluation, inspection, supervision, and management of clinical trial research;

d) To act as a focal point in working with international and domestic organizations to develop the Ethical Evaluation Committee's operations in compliance with international standards and Vietnamese regulations;

đ) To prepare documents, to record and store the minutes of regular and ad-hoc meetings of the Ethical Evaluation Committee and relevant documents;

e) To settle the payment of expenditures and prepare the final account of budget for the Ethical Evaluation Committee and Standing office of the Ethical Evaluation Committee in compliance with current financial regulations;

f) To compile 3-month, 6-month and annual reports on the performance of the Ethical Evaluation Committee.

3. Powers

a) To be entitled to select officers, civil servants, officials to work concurrently or as secondee at the Standing office of the Ethical Evaluation Committee in compliance with the current regulations to submit to the Ethical Evaluation Committee for consideration and further submit to the leaders of Ministry of Health for approval;

b) To recruit and sign contract with domestic and international consultants, contract employees to work for the Standing office of the Ethical Evaluation Committee depending on the work demand in compliance with current regulations;

c) To use public service budget for science and other sources of funding for the operations of Ethical Evaluation Committee and the Standing office of the Ethical Evaluation Committee in compliance with current regulations;

d) The Standing office of the Ethical Evaluation Committee is entitled to use the stamp and account of the Ethical Evaluation Committee for transactions within their functions and duties.

đ) The Chief Secretariat of the Ethical Evaluation Committee Standing office is the Account Holder of the Ethical Evaluation Committee.

Article 8. Structure of the Ethical Evaluation Committee Standing Office:

1. The Chief Secretariat of the Ethical Evaluation Committee Standing office is appointed and dismissed by the Chairman of the Ethical Evaluation Committee;

2. Staff of the Ethical Evaluation Committee Standing office comprises of 3 – 5 specialized officers who are experts from Department of Science and Training and other concurrent officers and secondees recruited by the Chief Secretariat of the Ethical Evaluation Committee Standing office to submit to the Ministry's leaders for approval;

3. Besides, the Ethical Evaluation Committee Standing office has other experts, officers, and staff recruited by the Chief Secretariat of the Ethical Evaluation Committee Standing office for short-term working contracts in compliance with current regulations.

Chapter III
OPERATION OF THE ETHICAL EVALUATION COMMITTÊ

Article 9. Principles for the operation of the Ethical Evaluation Committee

The Ethical Evaluation Committee shall operate as a team with the democratic principles.

The members shall work with the principles of independence, objectivity, honest and personal responsibility for their decisions when examining and evaluating research contents before implementation, changes during the implementation and evaluating research results.

Only members of the Ethical Evaluation Committee who have no conflict of interests with the research shall have the right to evaluate and vote.

Members of the subcommittees shall be responsible to provide general and specific evaluation of the documents assigned by the head of the specialized subcommittee.

Before the meetings to evaluate the documents, the members and critic experts shall study the documents, complete and send the evaluation sheets to the Standing office of the Ethical Evaluation Committee.

Members of the Ethical Evaluation Committee shall be responsible to comply with the Committee's Standard operational Practices (SOPs).

Members of the Ethical Evaluation Committee shall have the responsibilities and rights to directly report to the Minister regarding the violations of working principles by the Committee Chairman or any Committee member.

Article 10. Working methods of Ethical Evaluation Committee

Ethical Evaluation Committee's activities comprise of plenary meetings, subcommittee meetings, periodical and ad-hoc investigation and supervision activities.

Ethical Evaluation Committee 's activities are carried out in compliance with the processes and procedures provided for in the standard operational practices of the Ethical Evaluation Committee.

The Standing subcommittee shall meet monthly, the specialized subcommittees shall attend the same meeting with the standing subcommittee when there are relevant documents to be considered.

The Ethical Evaluation Committee Standing Office shall be responsible to assign the critic members, and to invite independent experts to provide criticism on the documents.

The conclusion of the evaluation meeting must be based on ballot results. The meeting's approval conclusion shall only be valid by at least 2/3 affirmative votes.

With regard to the evaluation of documents on clinical trial of medicines, vaccines (different periods), new treatment methods, clinical trial of medical equipment, such documents shall be examined and evaluated by the standing subcommittee and specialized subcommittees in accordance with the complete procedures.

With regard to the research documents on amendment and supplementation, periodic evaluation and approval, reporting of adverse events, reporting on incompliance with proposal, epidemiological and sociological surveys on human subjects, and other researches shall be examined and evaluated by the standing subcommittee in accordance with the reduced procedures and submit to the Committee Chairman for approval.

Article 11. Physical and technical conditions for Ethical Evaluation Committee:

The Ethical Evaluation Committee and its Standing office shall be provided with sufficient physical facilities to perform their duties: including offices, equipment, supervision and monitoring tools, and operating budget to satisfy the management requirements and plan implementation as provided for in this Regulation.

The Ministry's Office shall be responsible to arrange offices for the Ethical Evaluation Committee Standing office at the Ministry of Health's head office. In case it is impossible to arrange an office at the Ministry of Health's head office, the Ethical Evaluation Committee Standing office is allowed to rent an office.

The Ethical Evaluation Committee shall be provided office equipment and supplies and stationery to serve the meetings and other equipment and supplies to perform their functions and duties.

Chapter IV
IMPLEMENTATION PROVISIONS

Article 12. This Regulation shall be applicable since the date of effectiveness. Based on this Regulation, the Ethical Evaluation Committee shall consider the development of the standard operational practices (SOPs) for the Committee's specific activities.

The agencies and entities under the Ministry of Health shall carry out their research activities in compliance with this Regulation in order to organize and develop the Operating Rules of their own Ethical Evaluation Committees to ensure compliance with the fundamental principles of research ethics.

If there are any difficulties during the implementation, individual and organizations shall report to the Ministry of Health (Department of Science and Training) for consideration to amend and supplement this Regulation. All complaints on ethical evaluation in biomedical research shall be sent to the Ethical Evaluation Committee Standing Office for examination and resolution in compliance with current law./.

MINISTER

Nguyen Thi Kim Tien

THE NATIONAL ASSEMBLY	SOCIALIST REPUBLIC OF VIET NAM
No: 34/2005/QH11	Independence - Freedom - Happiness
	Ha Noi, day 14 month 06 year 2005

LAW ON PHARMACY

Pursuant to the 1992 Constitution of the Socialist Republic of Vietnam, which was amended and supplemented under Resolution No. 51/2001/QH10 of December 25, 2001, of the X th National Assembly, the 10 th session;

This Law provides for activities in the domain of pharmacy.

Chapter I

GENERAL PROVISIONS

Article 1.- Governing scope and subjects of application

1. This Law provides for drug trading; drug registration and circulation; drug use; drug supply; drug information and advertisement; clinical trial of drugs; management of habit-forming drugs, psychotrops, pre-substances used as drugs and radioactive drugs; drug quality standards and drug assay.

2. This Law applies to domestic and foreign agencies, organizations and individuals in Vietnam.

Where international treaties to which the Socialist Republic of Vietnam is a contracting member contain provisions different from those of this Law, the provisions of such international treaties shall apply.

Article 2.- Interpretation of terms

In this Law, the following terms shall be construed as follows:

1. Pharmacy means drugs and drug-related activities.

2. Drugs mean substances or mixtures of substances for human use for purposes of prophylaxis, therapy or diagnosis of disease or modification of physiological functions of human bodies, and consist of finished drugs, raw materials for drug manufacture, vaccines and medical biological products other than functional foods.

3. Vaccines mean preparations containing antigens that provoke immune responses of human bodies, and used for the purpose of prophylaxis.

4. Medical biological products mean products of biological origin used for the purposes of prophylaxis, therapy and diagnosis of human diseases.

5. Raw materials for drug manufacture means substances constituting products in the process of drug manufacture.

6. Pharmaceutical ingredients (also called active ingredients) mean substances or mixture of substances with therapeutic activity, which are used in drug manufacture.

7. Finished drugs mean medicinal product forms that have undergone all stages of manufacture, including packaging in their final containers and labeling.

8. Drugs from materia medica mean those manufactured from raw materials of natural animal, plant or mineral origin.

Drugs containing pure active ingredients extracted from materia medica, drugs being a combination of materia medica and synthetic chemical active ingredients are not called drugs from materia

medica.

9. Traditional medicaments mean drugs prepared from materia medica under theories and by methods of traditional medicine of oriental countries.

10. Prescription drugs mean those which may cause hazards to human life or health if they are used not in accordance with indications of prescribers; require specific prescriptions when being dispensed, retailed or used; and are included in the list of prescription drug groups.

11. Non-prescription drugs mean those which, when being dispensed, sold or used, require no specific prescription.

12. Habit-forming drugs means those which, when being used for a prolonged period, may form bad habits, and are included in the list of habit-forming drugs promulgated by the Health Minister and compliant with treaties to which the Socialist Republic of Vietnam is a contracting party.

13. Psychotrops mean drugs which have effects on the central nervous system, may lead to users dependence if not used properly, and are included in the list of psychotrops promulgated by the Health Minister and compliant with treaties to which the Socialist Republic of Vietnam is a contracting party.

14. Pre-substances used as drugs mean chemicals which are indispensable to the process of preparation and manufacture of habit-forming drugs or psychotrops, are used as formula components of habit-forming drugs or psychotrops, and included in the list of pre-substances promulgated by the Health Minister and compliant with treaties to which the Socialist Republic of Vietnam is a contracting party.

15. Radioactive drugs mean those containing one or more radioactive substances, and used for diagnosis or treatment of disease.

16. Essential drugs mean those satisfying healthcare demands of a vast majority of people, and included in the list of essential drugs promulgated by the Health Minister.

17. Main drugs mean those satisfying treatment demands of medical examination and treatment establishments, compatible with the disease structure in Vietnam, and included in the list of main drugs for use in medical examination and treatment establishments promulgated by the Health Minister.

18. New drugs means those containing new pharmaceutical ingredients or those with a new combination of pharmaceutical ingredients already in circulation.

19. Specifics mean drugs having trade names given by manufacturing establishments and different from original names or international generic names.

20. Adverse reactions of drugs mean undesirable effects of drugs harmful to health, which may appear at normal doses.

21. Expiry date of drugs means use duration fixed for a specific lot of drug, after which such drug is no longer permitted for use.

22. Drug quality standards include regulations on criteria, technical requirements, assay methods, packaging, labeling, transportation, preservation and other requirements related to quality of drugs.

Drug quality standards are expressed in the form of technical documents.

23. Drugs of inferior quality mean those which are not up to quality standards already registered with competent agencies.

24. Counterfeit drugs mean products manufactured in any form of drug with a deceitful intention, and falling into one of the following cases:

a/ They have no pharmaceutical ingredients;

b/ They have pharmaceutical ingredients, which are, however, not at registered contents;

c/ They have pharmaceutical ingredients different from those listed in their labels;

d/ They imitate names and industrial designs of drugs which have been registered for industrial property protection of other manufacturing establishments.

25. Drug trading means the performance of one, a number or all of the stages of the investment process, from manufacture to sale of drugs or provision of drug-related services in the market for profit-making purposes.

26. Pharmacy practice means the use of pharmaceutical qualifications of individuals for drug trading.

27. Good practice means sets of principles and standards promulgated by the Health Ministry for manufacture, preservation, assay and circulation of drugs, and culture, cultivation, harvest and processing of materia medica.

28. Pre-clinical drug trial means scientific activities of studying the effects of drugs in order to evaluate and prove the effectiveness and safety of drugs on animals, as a procedural step for clinical trial.

29. Clinical drug trial means scientific activities of systematically studying the effects of drugs on human beings for the purpose of determining clinical effectiveness, recognizing and detecting adverse reactions of studied products; the absorption, distribution, metabolism and excretion of such products for the purpose of ascertaining the safety and effectiveness of drugs.

30. Drug information means activities of gathering and supplying information related to drugs to organizations or individuals directly engaged in medical or pharmaceutical activities or drug users.

31. Drug assay means the sampling and examination of technical standards, performance of corresponding and necessary tests for the purpose of determining whether or not raw materials, semi-finished products or finished products meet the technical standards before deciding to accept or reject such drugs.

32. Drug price declaration means reporting by drug-trading establishments to competent state agencies on expected import prices, wholesale prices and retail prices according to the provisions of law on prices.

Article 3.- State policies on pharmacy

The State shall materialize the following policies on pharmacy:

1. To develop pharmacy into a spearhead techno-economic branch, and prioritize the development of the pharmaceutical industry.

Projects on application of advanced technologies to manufacture of drugs, raw materials for drug manufacture, main drugs, drugs as substitutes for imported drugs, drugs for prevention and treatment of social diseases, vaccines, medical biological products, drugs from materia medica and traditional medicaments shall enjoy the investment preferences provided for by law;

2. To encourage organizations and individuals at home and broad as well as overseas Vietnamese to conduct scientific research into preparation technologies and biotechnologies for manufacturing new drugs; to invest in production of raw materials for drug manufacture and finished drugs suitable to the disease structure and drug use demands of people;

3. To encourage research into and inheritance of traditional medicine recipes and experiences, and harmoniously combine traditional medicine and modern medicine as well as pharmacy; to explore, exploit and use new materia medica and export materia medica; to materialize policies on

preferences and supports for culture and planting of materia medica, rational exploitation of natural materia medica, thus ensuring the preservation and development of genetic sources of materia medica; to modernize the manufacture of drugs from materia medica;

4. To provide drug-related supports in appropriate forms to social policy beneficiaries, areas inhabited by ethnic minority people, areas being under particularly difficult socio-economic conditions and areas under difficult socio-economic conditions;

5. To develop a network of circulation, distribution and supply of drugs, thus ensuring sufficient quality drugs to meet the people's drug use demands;

6. To protect lawful rights and interests of organizations and individuals in drug research, trading and use in Vietnam.

Article 4.- National drug reserve

1. The State sets up a national reserve of drugs for use for the following purposes:

a/ Preventing and combating diseases and epidemics, and overcoming consequences of natural calamities or catastrophes;

b/ Maintaining defense and security;

c/ Contributing to stabilizing the drug market.

2. The setting up, organization, management, administration and use of the national drug reserve shall comply with the provisions of law.

Article 5.- State management over drug prices

1. The State manages drug prices on the principle that drug-manufacturing, exporting, importing or trading establishments shall fix prices by themselves, compete with one another in price and bear responsibility therefor before law; and takes measures to stabilize market prices of drugs in service of public healthcare.

2. The Government stipulates in detail the management of drug prices suitable to the socio-economic situation in each period on the following principles:

a/ Drugs, before being circulated in the market, must have their prices declared or re-declared in case of any change thereof by manufacturing or importing establishments with competent state agencies, ensuring that drug prices at home are not higher than drug prices in regional countries which have healthcare and commercial conditions similar to Vietnam's;

b/ Drug-manufacturing or -importing establishments must be responsible before law for their declared prices;

c/ Drug wholesale or retail prices must be posted up;

d/ Competent state agencies shall publicly announce declared drug prices; and periodically announce ceiling prices of drugs paid with the state budget and medical insurance;

e/ The Health Ministry shall assume the prime responsibility for, and coordinate with the Finance Ministry, the Industry Ministry, the Trade Ministry, the Planning and Investment Ministry and other concerned state agencies in, performing the state management over drug prices as assigned by the Government.

Article 6.- Agencies in charge of state management over pharmacy

1. The Government performs the unified state management over pharmacy.

2. The Health Ministry is answerable to the Government for performing the state management over pharmacy.

3. Ministries and ministerial-level agencies shall have to coordinate with the Health Ministry in

performing the state management over pharmacy under the Government's assignment.

4. People's Committees at all levels perform the state management over pharmacy within their respective localities, as decentralized by Government.

Article 7.- Pharmacy inspectorate

The pharmacy inspectorate under the Health Ministry's Inspectorate has the function of specialized inspection of pharmacy.

The organization, functions, tasks and powers of the pharmacy inspectorate shall comply with the provisions of law on inspection.

Article 8.- Pharmaceutical societies and associations

1. Pharmaceutical societies and associations are socio-professional organizations of pharmacists and persons engaged in pharmacy.

2. Pharmacists and persons engaged in pharmacy have the right to join and found pharmaceutical societies and associations.

3. The organization and operation of pharmaceutical societies and associations shall comply with the provisions of law.

Article 9.- Prohibited acts

1. Trading in drugs without certificates of satisfaction of drug trading conditions.

2. Practicing pharmacy without pharmacy practice certificates.

3. Trading in drugs of unidentified origins, counterfeit drugs, drugs of inferior quality, expired drugs, drugs on the list of drugs banned from import, drugs subject to clinical trials, drugs not yet permitted for circulation, sample drugs used for registration or introduction to medical doctors.

4. Forging, renting, borrowing, leasing or lending pharmacy practice certificates or certificates of satisfaction of drug trading conditions.

5. Supplying untruthful information on or making untruthful advertisements for drugs, causing consumers' confusion; advertising drugs in contravention of historical and cultural traditions, ethics, fine traditions and customs of the Vietnamese nation.

6. Selling drugs at places which are not lawful drug-selling establishments.

7. Taking advantage of monopoly in drug trading to earn illicit profits, dumping drugs, raising drug prices in contravention of law.

8. Conducting drug sale promotion in contravention of law.

9. Selling drugs belonging to national target programs and aid drugs which are not for sale according to regulations; drugs supplied as humanitarian aid and non-commercially imported drugs.

10. Retailing prescription drugs without prescription.

11. Taking advantage of drug prescription to seek personal benefits.

12. Destroying precious materia medica sources.

13. Other acts which are strictly prohibited in pharmaceutical activities according to the provisions of law.

Chapter II

DRUG TRADING

Section I. DRUG TRADING CONDITIONS

Article 10.- Forms of drug trading

Drug trading covers drug manufacture, export, import, wholesale, retail, preservation service and assay service.

Article 11.- Conditions and competence for granting certificates of satisfaction of drug trading conditions

1. Drug trading is a conditional business line. Drug-trading agencies, organizations and individuals (hereinafter referred collectively to as drug-trading establishments) must have certificates of satisfaction of drug-trading conditions.

2. To be granted certificates of satisfaction of drug-trading conditions, drug-trading establishments must fully satisfy the following conditions:

a/ Having material and technical foundations and personnel with professional qualifications necessary for each form of drug trading;

b/ Having pharmaceutically professional managers who have been granted pharmacy practice certificates suitable to their trading forms.

3. Competence to grant certificates of satisfaction of drug-trading conditions is stipulated as follows:

a/ The Health Ministry shall grant certificates of satisfaction of drug-trading conditions to establishments manufacturing drugs, providing drug preservation services or drug assay services;

b/ Provincial/municipal Health Services shall grant certificates of satisfaction of drug-trading conditions to establishments conducting drug trading in other business forms, except for the cases specified at Point a of this Clause.

4. Competent state agencies defined in Clause 3 of this Article shall have to grant certificates of satisfaction of drug-trading conditions within thirty days after receiving complete and valid dossiers. In case of refusal to grant certificates, they must issue written replies clearly stating the reasons therefor.

5. The Government shall specify conditions for each form of drug trading; time limit, dossiers, procedures for granting, supplementing, renewing, extending or withdrawing certificates of satisfaction of drug-trading conditions.

Article 12.- Certificates of satisfaction of drug-trading conditions

1. A certificate of satisfaction of drug-trading conditions must clearly state the name, address, professional manager, trading form and scope of the trading establishment, and its valid term.

2. Drug trading establishments may operate only at the already registered places and within the trading scope already stated in their certificates of satisfaction of drug-trading conditions. Where their trading scope is broadened or their trading place is changed, they shall have to carry out procedures for supplementing or renewing their certificates of satisfaction of trading conditions.

Article 13.- Pharmacy practice certificates

1. To be granted a pharmacy practice certificate, applicants must fully satisfy the following conditions:

a/ Possessing professional diplomas and certificates suitable to requirements of each drug-trading form;

b/ Having practiced for at least between two and five years at a lawful pharmaceutical establishment for each trading form;

c/ Possessing professional ethics;

d/ Being physically fit for practicing pharmacy.

2. The following persons shall not be granted a pharmacy practice certificate:

a/ Those who are banned from practicing pharmacy under court judgments or rulings;

b/ Those who are being examined for penal liability;

c/ Those who are serving criminal sentences or rulings of courts, or executing decisions on application of administrative handling measures such as consignment into a reformatory or medical treatment establishment, or administrative probation;

d/ Those who are in the period of being disciplined in the form of caution or serving a severer disciplining form for their violations related to the medical or pharmaceutical profession;

e/ Those who have lost civil act capacity or restricted civil act capacity.

3. Competence to grant pharmacy practice certificates is provided for as follows:

a/ The Health Minister shall grant pharmacy practice certificates to individuals who register to practice pharmacy with foreign investment capital;

b/ Directors of provincial/municipal Health Services shall grant pharmacy practice certificates to individuals who register to practice pharmacy, except for the cases specified at Point a of this Clause;

4. The Government shall specify professional diplomas and certificates and duration of practice at pharmaceutical establishments for each form of drug trading; dossiers and procedures for granting, renewing, extending and withdrawing pharmacy practice certificates.

Article 14.- Fees for grant of certificates of satisfaction of drug trading conditions and pharmacy practice certificates

Drug-trading establishments applying for certificates of satisfaction of drug trading conditions, and individuals applying for pharmacy practice certificates must pay fees therefor according to the provisions of law.

Section II. CTURE

Article 15.- Rights of drug-manufacturing establishments

1. To enjoy capital, land and tax preferences and other preferences for manufacture of drugs in the domains specified in Article 3 of this Law and other relevant provisions of law.

2. To supply information on and/or make advertisements for drugs according to the provisions of law on advertising for the purpose of introducing and promoting sale of their products.

3. Other rights provided for by law.

Article 16.- Obligations of drug-manufacturing establishments

1. To comply with regulations on good practice in drug manufacture, distribution, preservation and assay, and relevant professional regulations.

2. To manufacture drugs in strict accordance with the registered manufacture process and quality standards; to report to competent state agencies on changes in the manufacture process.

3. To bear responsibility for the quality of drugs they manufacture and deliver from their factories only drugs up to the registered quality standards.

4. To have technical facilities and professional personnel satisfying requirements of inspection of quality and management of drugs they manufacture.

5. To keep samples of drugs in each manufacture lot for at least one year after the expiry date of such drugs; documents on manufacture and other documents necessary for the inspection and evaluation of all drug-manufacturing activities according to the provisions of law.

6. To monitor the quality of drugs they have manufactured and circulated in the market, and to recover drugs according to the provisions of this Law.

7. To register drugs; to declare drug prices before circulating such drugs in the market.

8. To pay damages to drug users in cases where damage is caused by their faults.

9. Other obligations provided for by law.

Article 17.- Drugs prepared at drugstores, medical examination and treatment establishments

1. Drugs prepared according to prescriptions at drugstores and drugs prepared at medical examination and treatment establishments shall not be subject to drug registration but shall only be dispensed or retailed at such establishments. Files on drug preparation must be kept for one year after such drugs are prepared.

2. Owners of drugstores, pharmaceutically professional managers of medical examination and treatment establishments shall bear responsibility for the quality of drugs prepared at their establishments; pay damages to drug users in case of damage caused by errors in drug preparation.

Section III. DRUG EXPORT AND IMPORT

Article 18.- Rights and obligations of drug-exporting or importing enterprises

1. To export, import, entrust the export or import and undertake entrusted export or import of drugs of types specified by the Health Ministry.

2. To comply with regulations on good practice in drug preservation and distribution, and declaration of drug prices.

3. To export or import only drugs satisfying the quality standards; to monitor and bear responsibility for the quality of drugs they have exported or imported for circulation in the market.

4. To pay damages to drug users in case of damage caused by their faults.

5. Other rights and obligations provided for by law.

Article 19.- Entrusted export or import of drugs

1. Drug-trading establishments have the right to entrust export or import of drugs.

2. The entrustment of export or import of drugs shall comply with the provisions of the Commercial Law and other relevant provisions of law.

Article 20.- Scope of import of drugs

1. Drugs with registration numbers in Vietnam may be imported without quantity limitations, except for vaccines, medical biological products and drugs on the list of drugs subject to special control, as provided for in Article 63 of this Law.

2. Drugs without registration numbers may be imported in specified quantities in the following cases:

a/ They contain pharmaceutical ingredients with or without registration numbers, which are, however, insufficient to fully meet treatment needs;

b/ They are imported to meet urgent needs of disease or epidemic prevention and combat, overcoming of consequences of natural calamities or catastrophes, and special treatment needs;

c/ They are imported in service of national health programs;

d/ They are donations or humanitarian donations;

e/ They are imported for clinical trials, for use as registration samples or for exhibitions or trade fairs;

f/ They are carried along for personal treatment;

g/ They are imported in other non-commercial forms.

3. The Prime Minister shall specify the import of drugs of types defined in Clause 2 of this Article.

Section IV. WHOLESALE OF DRUGS

Article 21.- Drug wholesale establishments

Drug wholesale establishments include:

1. Drug-trading enterprises;

2. Cooperatives or individual business households manufacturing or trading in materia medica, traditional medicaments and/or drugs from materia medica;

3. Sale agents for vaccines and medical biological products.

Article 22.- Rights of drug wholesale establishments

1. To purchase raw materials for drug manufacture, finished drugs, vaccines or medical biological products from drug-manufacturing or drug wholesale establishments.

2. To sell raw materials for drug manufacture, finished drugs, vaccines or medical biological products to establishments with drug-trading functions and to medical examination and treatment establishments.

Article 23.- Obligations of drug wholesale establishments

1. To preserve drugs under the conditions stated in drug labels.

2. To keep intact drug packing, not to change drug packing and labels. In cases where they change labels or packing of drugs already registered, written authorization of drug-manufacturing establishments and written approval of the Health Ministry are required.

3. To assure that the delivery, receipt and preservation of drugs are conducted by professionally qualified persons.

4. To keep vouchers and documents relating to each drug lot for at least one year after the expiry date of drugs.

5. To post up drug wholesale prices and comply with other regulations on drug price management.

6. To pay damages to drug users in case of damage caused by faults of drug-manufacturing establishments.

7. To comply with regulations on good practice in preservation, distribution or withdrawal of drugs and other relevant provisions of law.

Section V. RETAIL OF DRUGS

Article 24.- Drug-retailing establishments

1. Drug-retailing establishments include:

a/ Drugstores;

b/ Dispensaries;

c/ Drug sale agents of enterprises;

d/ Drug cabinets of health stations.

2. Medical examination and treatment establishments and drug wholesale establishments which wish to retail drugs must set up drug-retailing establishments.

3. The Health Minister shall specify geographical areas where drug-retailing establishments are

allowed to be set up in the form of dispensaries, drug sale agents of enterprises or drug cabinets of health stations in suitability with their socio-economic conditions, actual capability of medical workers and the people's medical examination and treatment demands in each period.

Article 25.- Professional qualifications of owners of drug-retailing establishments or drug retailers

1. Professional qualifications of owners of drug-retailing establishments are stipulated as follows:

a/ Drugstores must be owned by pharmacists of university degree;

b/ Dispensaries must be owned by pharmacists of intermediate or higher degree;

c/ Drug sale agents of enterprises must be owned by persons having professional qualifications of assistant pharmacist or higher qualifications;

d/ Drug cabinets of health stations must be owned by persons having professional qualifications of assistant pharmacist or higher qualifications; in the absence of such a person, drug cabinets of health stations must be owned by persons having professional qualifications of assistant doctor or higher qualifications;

e/ Drug-retailing establishments, which are specialized in selling traditional medicaments or drugs from materia medica, must be owned by pharmacists of intermediate or higher degree or persons having diplomas or certificates of traditional medicine or traditional pharmacy.

2. Drug retailers at drug-retailing establishments defined at Points a, b, c and e, Clause 1 of this Article must have professional qualifications of assistant pharmacist or higher qualifications; drug retailers at those defined at Point d, Clause 1 of this Article must be professionally qualified in medicine or pharmacy.

Article 26.- Operation scope of drug-retailing establishments

1. The operation scope of drug-retailing establishments is provided for as follows:

a/ Drugstores are allowed to retail finished drugs and prepare drugs according to prescriptions;

b/ Dispensaries are allowed to retail finished drugs;

c/ Drug sale agents of enterprises are allowed to retail drugs on the list of essential drugs;

d/ Drug cabinets of health stations are allowed to sell drugs on the list of essential drugs used for commune-level healthcare establishments;

e/ Traditional medicament- and herbal drug-retailing establishments are allowed to sell traditional medicaments and drugs from materia medica.

2. Drug-retailing establishments defined at Points b, c, d and e, Clause 1 of this Article are not allowed to sell habit-forming drugs and radioactive drugs.

Drug-retailing establishments are not allowed to sell pharmaco-chemical raw materials for drug manufacture.

3. The Health Minister shall provide for conditions for drugstores to prepare drugs according to prescriptions.

Article 27.- Rights of drug retailers and owners of drug-retailing establishments

1. Drug retailers shall have the following rights:

a/ To retail drugs to users;

b/ To refuse to sell drugs when prescriptions are improperly made or drug buyers are incapable of following necessary instructions;

c/ Drug retailers who are pharmacists of university degree shall have the right to substitute one drug with another having the same active ingredients, preparation form and dose when buyers so

agree;

d/ To exercise the rights of an owner of a drug-retailing establishment within the ambit of authorization.

2. Owners of drug-retailing establishments shall have the following rights:

a/ The rights defined at Points a and b, Clause 1 of this Article;

b/ To buy drugs from drug wholesale establishments for retail, and to buy raw materials for preparation of drugs according to prescriptions;

c/ To authorize their staffs who have the equivalent or higher professional qualifications to administer their establishments in their absence.

Article 28.- Obligations of drug retailers and owners of drug-retailing establishments

1. Drug retailers shall have the following obligations:

a/ To check prescriptions before selling drugs;

b/ To clearly write the names and concentrations of drugs on their packing when retailed drugs are not contained in their outer packing;

c/ To sell only drugs indicated in prescriptions, except for cases specified at Point c, Clause 1, Article 27 of this Law;

d/ In cases where drugs are substituted under the provisions at Point c, Clause 1, Article 27 of this Law, they are obliged to clearly write the names, contents, concentrations, quantities and use methods of substitute drugs in prescriptions and bear responsibility for such substitution;

e/ To be answerable to owners of drug-retailing establishments for their acts within the ambit of authorization.

2. Owners of drug-retailing establishments shall have the following obligations:

a/ To personally manage and administer all activities of their establishments;

b/ To post up the time of selling drugs; to affix retail prices on products, except where retail prices have been printed on products; not to sell drugs at prices higher than posted-up prices;

c/ To be responsible before law for all activities of their establishments, even in case of authorization.

3. Drug retailers and owners of drug-retailing establishments shall have to pay damages to drug users in case of damage caused by their faults.

Section VI. DRUG PRESERVATION SERVICES

Article 29.- Conditions on enterprises providing drug preservation services

Enterprises providing drug preservation services must attain the standards on good practice in drug preservation.

Article 30.- Rights of enterprises providing drug preservation services

1. To undertake to preserve drugs for organizations and individuals under preservation contracts.

2. To transport and deliver drugs to organizations and individuals when so authorized by service hirers.

3. To enjoy charges for drug preservation services.

Article 31.- Obligations of enterprises providing drug preservation services

1. To preserve drugs according to preservation requirements inscribed on drug labels and in contracts between parties.

2. To pay compensations for damage caused by breach of regulations in the course of drug preservation and transportation.

Section VII. DRUG ASSAY SERVICES

Article 32.- Conditions on enterprises providing drug assay services

Enterprises providing drug assay services must meet the standards on good practice in drug assay. In cases where assay laboratories of drug-trading enterprises wish to provide drug assay services, such enterprises shall have to carry out procedures for adding the function of providing drug assay services to their certificates of satisfaction of drug trading conditions as provided for by law.

Article 33.- Rights of enterprises providing drug assay services

1. To assay raw materials for drug manufacture, semi-finished drugs and finished drugs.

2. To notify assay results of assayed drug samples.

3. To enjoy charges for drug assay services.

Article 34.- Obligations of enterprises providing drug assay services

1. To bear responsibility for assay results of assayed drug samples.

2. To pay compensations according to the provisions of law to organizations or individuals for damage caused by wrong assay results.

Chapter III

DRUG REGISTRATION AND CIRCULATION

Article 35.- Drug registration

1. Bases for drug registration includes:

a/ Results of clinical trials of the effectiveness and safety of drugs, except for those exempt from clinical trials defined in Article 55 of this Law;

b/ Technical documents on drugs;

c/ Vietnam's national policies on drugs.

2. Establishments registering drugs must pay registration fee upon filing of dossiers according to the provisions of law.

3. Within six months after receiving complete and valid dossiers, the Health Minister shall grant drug registration numbers. In case of refusal to grant registration numbers, he/she shall have to reply in writing, clearly stating the reasons therefor.

4. The Health Minister shall specify procedures and dossiers for drug registration, the valid duration of drug registration numbers and the withdrawal of drug registration numbers.

Article 36.- Drug circulation

1. Drugs circulated in the market must fully satisfy the following conditions:

a/ Being up to the registered quality standards;

b/ Fully satisfying requirements on labeling of drugs according to the provisions of Article 37 of this Law and other provisions of law;

c/ Being packed with materials and in a form as required to ensure drug quality;

d/ Having a registration number, or having no registration number but being imported according to the provisions at Points a and b, Clause 2, Article 20 of this Law;

e/ Having their prices declared according to the provisions of this Law; for imported drugs, their prices must not be higher than those of drugs imported into regional countries with the healthcare

and commercial conditions similar to those of Vietnam at the same time.

2. Home-made drugs for national health programs and imported drugs specified at Points c, d, e and f, Clause 2, Article 20 of this Law must be used for proper purposes and objects; drug labels must comply with the provisions of Article 37 of this Law; and retail packing of such drugs must be printed with the words "Not for sale" except for cases defined at Point e, Clause 2, Article 20 of this Law.

Article 37.- Labels of drugs circulated in the market

1. A label of a drug circulated in the market must fully have the following contents:

a/ The names of the drug;

b/ The preparation form;

c/ The composition of the drug;

d/ Packing specifications;

e/ The name and address of the manufacturing establishment;

f/ The registration number, serial number of the manufacture lot, date of manufacture, expiry date.

g/ Conditions for drug preservation and other necessary information.

For specifics which are composed of single substances, their original names or international generic names must be shown below their specific names.

2. Drugs must have use instructions in Vietnamese.

Article 38.- Withdrawal of drugs

1. Drugs circulated in the market shall be withdrawn in the following cases:

a/ They are not of the right categories due to mistakes in the course of dispensing, delivery and receipt;

b/ They fail to fully satisfy the conditions specified at Points a, b, c and d, Clause 1, Article 36 of this Law;

c/ There are drug withdrawal notices of manufacturing establishments or Vietnamese or foreign agencies in charge of state management over pharmacy.

2. For cases of drug withdrawal defined at Points b and c, Clause 1 of this Article, before the withdrawal, there must be circulation termination decisions of the Vietnamese agency in charge of state management over pharmacy.

3. Upon receipt of drug withdrawal notices of manufacturing establishments or circulation termination decisions of the Vietnamese agency in charge of state management over pharmacy, drug-trading organizations or individuals, medical examination and treatment establishments, drug prescribers and drug users shall have to immediately terminate the trading, information, advertising, prescription, dispensing and use of the drugs stated in withdrawal notices.

4. Establishments importing, manufacturing, registering or supplying drugs shall have to organize the withdrawal subject to circulation termination and pay damages according to the provisions of law.

The agency in charge of state management over pharmacy shall have to inspect the organization of drug withdrawal.

5. The Health Minister shall specify the order and procedures of drug withdrawal, classification of withdrawal, scope of drug circulation termination and disposal of withdrawn drugs.

Chapter IV

TRADITIONAL MEDICAMENTS AND DRUGS FROM MATERIA MEDICA

Article 39.- Planting of medicinal herbs and raising of medicinal animals

The planting of medicinal herbs and rearing of medicinal animals and the process of harvesting and exploiting their products for manufacture of drugs must comply with the standards on good practice in, planting, rearing and harvesting of materia medica.

Article 40.- Quality of materia medica

Materia medica put in the manufacture and processing or weighed into traditional medicament doses must satisfy the quality standards. Organizations and individuals that supply materia medica must bear responsibility for the origin and quality of such materia medica.

Article 41.- Preservation of materia medica

1. Materia medica must be processed and preserved according to regulations after they are exploited or harvested. The level of residues of plant protection chemicals and preservatives must not exceed the permitted level.

The Health Minister shall specify the conditions for processing and preservation of materia medica and the permitted level of residues of plant protection chemicals and preservatives in materia medica.

2. When transported, materia medica must be packaged. Packing of materia medica must be affixed with labels showing the names of materia medica, places of manufacture, quality and packaging date.

Article 42.- Sale of traditional medicaments and drugs from materia medica at medical examination and treatment establishments

Traditional medicine doctors, traditional medicine assistant doctors and herbalists working at medical examination and treatment establishments are allowed to retail traditional medicaments and drugs from materia medica at such medical examination and treatment establishments.

Article 43.- Registration and circulation of traditional medicaments and drugs from materia medica

1. The registration of traditional medicaments and drugs from materia medica shall comply with the provisions of Article 35 of this Law and the following regulations:

a/ Traditional medicaments and drugs from materia medica manufactured at home or imported for circulation in the market must all be registered;

b/ Traditional medicament doses weighed according to prescriptions at traditional medicine examination and treatment establishments, unprocessed materia medica and processed pellets shall not have to be registered. Owners of retail establishments or medical examination and treatment establishments must bear responsibility for the quality of such types of drugs.

c/ The circulation and withdrawal of traditional medicaments and drugs from materia medica shall comply with the provisions of Articles 36 and 38 of this Law.

3. Drugs which are combinations of materia medica and pure active ingredients extracted from natural substances or synthetic chemical active ingredients shall comply with the provisions of this Law and not be allowed to be registered as traditional medicaments or drugs from materia medica.

Article 44.- Manufacture of traditional medicaments and drugs from materia medica

1. Establishments manufacturing traditional medicaments and drugs from materia medica from the stage of preparing finished products to the stage of packaging must abide by the regulations on good practice in manufacture of traditional medicaments and drugs from materia medica, and comply with the provisions of Section II, Chapter II of this Law.

2. Traditional medicaments and drugs from materia medica which are composed of materia medica

containing toxic, habit-forming, psychotrops or pre-substances must have their technical files clearly stating concentrations, contents, standards and assay methods of such materia medica.

3. The Health Minister shall promulgate a list and regulations on management of materia medica containing toxic substances, habit-forming substances, psychotrops and pre-substances.

Article 45.- Export, import, wholesale or retail of traditional medicaments and drugs from materia medica

The export, import, wholesale or retail of traditional medicaments and drugs from materia medica shall comply with the provisions of Sections III, IV and V, Chapter II of this Law.

Chapter V

PRESCRIPTIONS AND USE OF DRUGS

Article 46.- Prescriptions

1. Prescriptions serve as a lawful basis for the sale of drugs, dispensing of drugs, preparation of drugs, weighing of drugs according to prescriptions and use of drugs. The name of a drug written in a prescription must include its original name or international generic name, except for drugs containing many active ingredients.

2. The Health Minister shall specify prescriptions, groups of prescription drugs and the sale of drugs according to prescriptions.

Article 47.- Use of drugs

1. Drug users have the right to choose drug-retailing establishments to buy drugs.

2. When using prescription drugs, drug users must strictly follow instructions given in prescriptions. When using non-prescription drugs, drug users must strictly follow written use instructions as well as instructions of drug retailers.

3. After taking drugs, if their bodies show abnormal signs, drug users should promptly notify the nearest medical establishments, drug prescribers or drug retailers thereof for timely remedies.

4. Drug prescribers and owners of drug-retailing establishments shall have to notify competent health agencies of abnormal signs of drug users. Drug prescribers shall be held responsible for drug prescriptions they have made up.

Chapter VI

SUPPLY OF DRUGS IN MEDICAL EXAMINATION AND TREATMENT ESTABLISHMENTS

Article 48.- Conditions for supply of drugs

1. The supply of drugs in medical examination and treatment establishments must comply with regulations on good practice in distribution and preservation of drugs and other relevant provisions of law.

2. Drug dispensers in medical examination and treatment establishments must dispense drugs strictly according to medical orders or drug prescriptions, clearly write the names and concentrations of drugs on their packing and give instructions to drug users.

3. Doctors, assistant doctors, nurses, midwives and convalescent attendants must not sell drugs to patients, except for cases specified in Article 42 of this Law.

Article 49.- Assurance of supply of drugs

1. Medical examination and treatment establishments shall have to assure the supply of sufficient quality drugs on the list of main drugs for use in medical examination and treatment establishments in service of emergency, medical examination and treatment needs at such establishments.

The Health Minister shall promulgate a list of drugs for emergency needs and their dose quantities,

a list of main drugs for use in medical examination and treatment establishments, and the supply of drugs in state-owned medical establishments, except for the purchase of drugs mentioned in Clause 2 of this Article.

2. The purchase of drugs on the list of main drugs by state-owned medical establishments and drugs paid with the state budget shall comply with the provisions of bidding law and ensure the following principles:

a/ Priority shall be given to purchase of home-made drugs of the same types, equivalent quality and at prices not higher than those of imported drugs;

b/ Bid-winning drug prices must not be higher than drug prices periodically announced by competent state agencies according to the provisions of Point d, Clause 2, Article 5 of this Law.

The Health Minister shall coordinate with the Planning and Investment Minister and the Finance Minister in guiding the purchase of drugs according to the provisions of this Clause.

Article 50.- Preparation of drugs in medical examination and treatment establishments

1. Medical examination and treatment establishments which fully satisfy the criteria and conditions for preparation of drugs shall be allowed to prepare drugs according to prescriptions for their treatment needs according to the provisions of Article 17 of this Law.

2. The Health Minister shall provide for the criteria and conditions for preparation of drugs in medical examination and treatment establishments.

Chapter VII

DRUG INFORMATION AND ADVERTISEMENT

Article 51.- Drug information

1. Drug information aims to provide instructions on rational and safe use of drugs to medical workers and drug users.

2. Drug information must be adequate, objective, accurate, truthful, easy to understand and not misleading.

3. Responsibilities for drug information are provided for as follows:

a/ Establishments manufacturing, buying, selling and supplying drugs are responsible for supplying drug information to medical officials and workers and drug users;

b/ Medical establishments are responsible for disseminating and managing drug information within their units;

c/ Medical officials and workers are responsible for supplying relevant drug information to drug users in the course of medical examination and treatment;

d/ The state management agency in charge of pharmacy is responsible for publicizing information on drugs.

4. Responsibilities to monitor adverse reactions of drugs are provided for as follows:

a/ Medical examination and treatment establishments, medical officials and workers are responsible for monitoring and reporting to persons in charge of such establishments and agencies competent to manage drugs on adverse reactions of drugs;

b/ In the course of circulation of drugs, drug-manufacturing and distributing establishments must monitor and report to persons in charge of such establishments and agencies competent to manage drugs on adverse reactions of drugs they have manufactured and distributed.

5. Organizations and individuals providing drug information shall be held responsible for such information.

6. The Health Minister shall have to organize the drug information system and monitor adverse reactions of drugs in order to assure the rational and safe use of drugs for people; and regulations on activities of drug information in medical establishments.

Article 52.- Drug advertisement

1. Drug advertisement must be conducted by drug-trading establishments or advertising service providers and comply with provisions of law on advertisement.

2. It is prohibited to use material benefits, or take advantage of names of organizations and individuals, assorted correspondence and clinical research results not yet recognized by the Health Ministry and similar forms to advertise drugs.

Article 53.- Scope of drug advertisement

1. Prescription drugs must not be advertised to the public in any form.

2. Non-prescription drugs are permitted for advertisement on various advertising means. Drugs advertised on radio or television must fully satisfy the following conditions:

a/ Having active ingredients on the list of drugs permitted for advertisement on radio or television, promulgated by the Health Ministry;

b/ Having registration numbers in Vietnam which are still valid.

Chapter VIII

CLINICAL TRIALS

Article 54.- Drugs subject to clinical trial

1. New drugs must be clinically tried.

2. Drugs subject to clinical trial must satisfy the following requirements:

a/ Having already been studied in the pre-clinical stage;

b/ Having a stable preparation form;

c/ Being up to the quality standards according to their clinical trial registration dossiers.

3. Labels of drugs subject to clinical trial must have the words "Product for clinical trial. Its use for other purposes is prohibited."

Article 55.- Drugs exempt from clinical trial

1. Drugs in their original names.

2. Foreign drugs which have not yet been granted numbers of registration in Vietnam but have already been lawfully circulated for at least five years in such foreign countries; have been widely used for many patients and certified as safe and effective by competent state agencies of the countries of manufacture; have the same way of taking, the same concentrations and indications in Vietnam identical to indications in such countries.

3. Traditional medicine recipes already recognized by the Health Ministry.

4. The Health Minister shall specify cases where drugs are exempt from clinical trial or exempt from a number of clinical trial stages.

Article 56.- Conditions of clinical trial participants

1. Clinical trial participants must be volunteers, satisfy professional requirements and enter into contracts with organizations undertaking to conduct clinical trials, except for those who have restricted civil act capacity, lost civil act capacity or no civil act capacity.

2. Where clinical trial participants are minors or persons who have restricted civil act capacity or

lost civil act capacity, their representatives' consent is required according to the provisions of law.

3. The Health Minister shall specify cases where clinical trial participants are pregnant women.

Article 57.- Rights of clinical trial participants

1. To be supplied with sufficient and truthful information on clinical trials before such trials are conducted and possible risks.

2. To be compensated for damage, if any, caused by clinical trials by organizations or individuals having drugs subject to clinical trial.

3. To have their relevant personal information kept secret.

4. To be free from liability for unilateral termination of contracts for participation in clinical trials.

5. To lodge complaints or denunciations about law violations by organizations or individuals having drugs subject to clinical trial or undertaking to conduct clinical trial.

Article 58.- Rights of organizations or individuals having drugs subject to clinical trial

1. To select organizations satisfying requirements on material foundations and professional personnel for clinical trial of drugs.

2. To own all research results of clinically tried drugs.

Article 59.- Obligations of organizations and individuals having drugs subject to clinical trial

1. To apply for written permits of the Health Minister before clinical trials are conducted.

2. To pay damages to clinical trial participants for risks caused by clinical trials according to the provisions of law.

3. To enter into contracts for clinical trials of drugs with organizations undertaking to conduct such trials.

Article 60.- Rights of organizations undertaking to conduct clinical trials of drugs

1. To be supplied with drugs and money by organizations and individuals having drugs subject to clinical trial strictly according to the provisions of law.

2. To use research results of clinical trials of drugs according to agreements with organizations or individuals having drugs subject to clinical trial.

Article 61.- Obligations of organizations undertaking to conduct clinical trials of drugs

1. To comply with regulations on good practice in clinical trials of drugs; to report on clinical trial process and results and make urgent reports in case of necessity to the Health Ministry.

2. To enter into contracts for clinical trials of drugs with organizations and/or individuals having drugs subject to clinical trial and with clinical trial participants.

Article 62.- Stages and procedures of clinical trials of drugs

1. Clinical trials of drugs must be conducted through various stages of and comply with regulations on good practice of clinical trial of drugs.

2. The Health Minister shall specify the conditions, dossiers, order and stages of clinical trial of drugs.

Chapter IX

MANAGEMENT OF HABIT-FORMING DRUGS, PSYCHOTROPS, PRE-SUBSTANCES USED AS DRUGS AND RADIOACTIVE DRUGS

Article 63.- Drugs on the list of drugs subject to special control

1. Habit-forming drugs, psychotrops, pre-substances used as drugs and radioactive drugs are those

on the list of drugs subject to special control.

2. The Health Minister shall promulgate a list of drugs subject to special control in compliance with treaties to which the Socialist Republic of Vietnam is a contracting party.

Article 64.- Conditions for trading in and use of drugs on the list of drugs subject to special control

1. Establishments trading in, preparing or dispensing drugs on the list of drugs subject to special control must satisfy the drug trading conditions provided for by the Government.

2. The import, export and transport of drugs on the list of drugs subject to special control shall comply with provisions of law.

3. Drugs on the list of drugs subject to special control shall be used for purposes of prophylaxis, treatment, diagnosis of disease, modification of physiological functions of human body and scientific research and must not be used for other purposes.

Article 65.- Responsibilities of establishments trading in, preparing or dispensing drugs on the list of drugs subject to special control

1. Establishments trading in, preparing or dispensing drugs on the list of drugs subject to special control have the following responsibilities:

a/ To make periodical or extraordinary reports to competent state management agencies;

b/ To keep vouchers and documents relating to each drug for at least two years after its expiry date.

2. The destruction of drugs on the list of drugs subject to special control must be conducted in strict compliance with the set order and procedures and in accordance with provisions of law.

Chapter X

QUALITY STANDARDS AND ASSAY OF DRUGS

Article 66.- Quality standards of drugs

1. Vietnam's quality standards of drugs include national standards and establishment standards.

2. The national quality standards of drugs and methods of assaying drugs are specified in the Pharmacopoeia of Vietnam.

Establishment standards shall be formulated and publicized by drug manufacturing establishments. Establishment standards must not be lower than the national quality standards of drugs.

3. The Government shall stipulate the promulgation of the Pharmacopoeia of Vietnam, the application of foreign and international pharmacopoeias in Vietnam.

Article 67.- Drug assay

1. Drug assay must be conducted in strict accordance with the registered drug quality standards of manufacturing establishments. Where assay methods other than those specified in the registered standards are applied, the Health Ministry's approval is required.

2. Where there is a doubt about the composition or quality of drugs, State-owned drug assay establishments may apply methods other than those specified in the registered standards to inspect and produce drug quality assay results.

3. The Health Minister shall specify the order and procedures for sampling and keeping of drug samples, and contents of drug quality assay.

Article 68.- Drug assay establishments

Drug assay establishments include state-owned drug assay establishments, enterprises providing drug assay services and drug assay laboratories of drug trading establishments.

Article 69.- State-owned drug assay establishments

1. State-owned drug assay establishments assist the state management agency in charge of pharmacy in ascertaining the quality of drugs.

2. State-owned drug assay establishments have the same rights and obligations as enterprises providing drug assay services defined in Articles 33 and 34 of this Law.

3. The Government provides for the organizational system and operation of State-owned drug assay establishments.

Article 70.- Settlement of complaints about drug quality conclusions

1. Drug trading establishments are entitled to lodge complaints about drug quality conclusions of the state management agency in charge of pharmacy.

2. The Government shall specify the order and procedures and designate agencies for settling complaints about drug quality conclusions.

Chapter XI

IMPLEMENTATION PROVISIONS

Article 71.- Transitional provisions

Organizations and individuals granted the certificates of satisfaction of pharmaceutical practice conditions before the effective date of this Law, which are still valid, shall not have to apply for re-grant thereof.

Article 72.- Implementation effect

This Law takes effect as of October 1, 2005.

All previous stipulations which are contrary to this Law are hereby annulled.

Article 73.- Provisions on implementation detailing and guidance

The Government shall detail and guide the implementation of this Law.

This Law was passed on June 14, 2005, by the XIth National Assembly at its 7th session.

THE NATIONAL ASSEMBLY

CHAIRMAN

(Đã ký)

Nguyen Van An

MINISTRY OF HEALTH	SOCIALIST REPUBLIC OF VIETNAM
No: 799/QĐ-BYT	**Independence - Freedom - Happiness**

Hanoi, date March 7th, 2008

DECISION

On the issuance of Guideline on "Good Clinical Practice"

MINISTER OF HEALTH

Pursuant to Decree No. 188/2003/NĐ-CP dated December 27, 2007 of the Government detailing functions, obligations, and authority and structural organization of Ministry of Health;

Pursuant to Decree No. 79/2006/NĐ-CP dated August 9, 2006 detailing on the implementation of provisions of Drug Law;

At proposal of Head of Department of Science and Training and Director of Vietnam Drug Administration,

DECIDES:

Article 1: To issue the "Guideline for Good Clinical Practice – GCP" (hereafter referred as Guideline for GCP) in conjunction with this Decision.

Article 2: Assign Head of Department of Science and Training to cooperate with related Departments to be responsible for propagating, instructing, monitoring, inspecting of the implementing and deploying of this Guidelines.

Article 3: This Decision takes effect since the issuing date.

Article 4: Chief of secretariat, Director of Health Inspector, Heads of Departments, Offices, and Entities attached to Ministry of Health, Manager of Health Departments of the provinces and centrally-run cities, Head of Health department of agencies shall implement this Decision.

Receipt:	**FOR THE MINISTER**
- As in Article 4; - Minister of Health; - Deputy Minister of Health - Vietnam Medical Association, Vietnam Pharmaceutical Association; - Ministry of Health's Website; - Keep as achieves at DST and DAV	**DEPUTY MINISTER** **Signed** **Nguyen Thi Kim Tien**

MINISTRY OF HEALTH

GUIDELINE FOR GOOD CLINICAL PRACTICE

Abbreviated: Guideline for GCP

Issued in the conjunction with Decision No: 799 /2007/QĐ-BYT

Date 07 month March 2007 of Minister of Health.

Chapter I

GENERAL PROVISIONS

1. Scope

This document instructs on the preparation of dossier, protocol, review process, approval and carry out the implementation, monitoring, checking and inspection Clinical trials in Vietnam in order to satisfy requirements of Good Clinical Trial of World Health Organization and International Conference on Harmonization of Technical Requirements for Registration of Pharmaceutical for Human use and comply with current legislation in Vietnam.

2. Subject

This guideline applies to organization, person whose activities relate to clinical trial of pharmaceutical product in Vietnam.

3. Definition

The terms in this Guideline are understood as below:

Clinical trial of pharmaceutical products

Clinical trial of pharmaceutical product is a scientific practice in human in order to identify clinical effect, detect unexpected adverse reaction of pharmaceutical product, the absorption, distribution, metabolism and excretion of pharmaceutical product so that the safety and the effect of pharmaceutical products are demonstrated.

Terms of “clinical trial of pharmaceutical products”, “Clinical trial” and/or “pharmaceutical products clinical trial” have the same meaning. Hereafter, only term of Clinical trial is used within this document.

Good clinical practice

Good clinical practice-GPC is an international standard guideline instructing the investigator, Head of Sponsor, researching staff, sponsor, aid agencies, competent authorities; reviewing committees (including scientific and ethnic committees) of assessing the ethics and science in designing, conducting, implementing, monitoring, and assessing, recording, analyzing and reporting clinical trials.

GCP assures the reliability, accuracy of reported data of clinical trial results and the international acceptance to clinical results together with simultaneously protects the safety and rights of trial subjects.

The term of Good Clinical Practice on pharmaceutical product is the same and translated from "Good Clinical Practice – GCP" in English. Within this document, it is unified to use term "Good Clinical Practice"

Investigator and research organization

Investigator (also known as researcher) is person responsible for conducting the clinical trial at the trial site. In case the clinical trial is conducted by cohort, group leader (also known as the principal investigator or the manager of the project) shall be essentially responsible for such clinical trial.

In addition to the principal investigator, there are also Investigators and collaborators including experts and local people who is under the instruction of principal investigator of project on assignment, management and monitoring in order to conduct researching process related to clinical trial.

Research organization (organization who conducts the clinical trial)

Research organization (organization who conducts the clinical trial) is medical unit which has functions in scientific research, has adequate man power and material facilities for the clinical trial which are reviewed and approved by MOH. Research organization is one to be responsible for legal matters concerning to the clinical trial.

Besides researching organization, there may be collaborative organization in addition to said stakeholder of the clinical trial if necessary. Such collaborative

organization assumes responsibility in several certain stages and/or parts of the clinical trial according to the allocation of researching organization.

Organization/person who have drug in clinical trial

Organization/person who have drug in clinical trial have function in researching, producing, importing, exporting or distributing drug which is in need of clinical trial.

Sponsor

The sponsor may be an individual, an enterprise or an entity or an organization. The sponsor assumes responsibility in proposal, management and/or financial supply of the clinical trial.

Institutional Review Board (IRB)/ Independent Ethics Committee (IEC)

Independent Ethics Committee-IEC (also known as Ethics Committee) which is an independent entity is established local or national level. IEC includes medical experts and non-medical members. IEC is responsible for reviewing the scientific aspects of protocol and matters related to subject's voluntarily so that the safety, rights, health of trial subjects and the publicity are assured and giving the approval or not to the clinical trial.

Investigator's brochures - IB

Investigator's brochures – IB is document recording clinical and pre-clinical data of investigational products, whose information needs to be brief, simple, clear and not to be advertisement in order to provide investigators needed information about investigational products and process to control safety – which allows clinical physician or investigator may understand and self-determine exactly the risk/benefit of the proposed clinical trial.

Standard Operation Practice

Standard of Practice (SOP) is document which is developed by related units to define activities and unified operations in order to get the agreements when implement.

Monitoring, audit

- Monitoring are those of clinical trial process to assure that the trial is conducted, recorded and reported in accordance with the research outline, standard operation process, GPC and other regulations being applied in the country.

- Monitor is a person entrusted by the sponsors or the investigators in an agreement, such person assume responsibility in monitoring and reporting clinical trial process and verifying the data.

- Audit

Audits are activities of competent authorities which base on the reviewing, evaluation of documents and report in order to checking the compliance to protocol.

- Inspection

Inspection is official inspection activity of related competent authorities to review the compliance to GCP.

Chapter II

TARGET AND PRINCIPLES OF GCP

1. Target of GCP

Target of the issuance of GCP as follows:

- To protect the trial subjects in clinical trial:

+ To assure the safety of the trial subject.

+ To assure rights or the trial subject including rights to be informed, to self-determine joining the research, to give up the research at the any time, to be protected individual information and other rights.

- To assure the quality of the research based on the scientific unity of the research process, research target, quality of the performance, monitoring made to the clinical trials.

- To assure the unity in the management process, monitoring, analysis and report made to the clinical trial, so that given out results are accepted under the international standard guidelines.

- To assure the reliability and the effective performance of the quality monitoring system.

2. Principles of GCP

GCP gives out 13 principles, each of them intends to obtain one ore more targets of GCP. The principles of GCP present the international recognition of ethic and quality target of clinical the trials.

There is no principle setting up the independent responsibility of each party joining the clinical trial (such as investigator, sponsor, IEC, IRB or competent authorities). However, all of 13 principles require for jointly liability of the related parties to the clinical trial. Principles of GCP include:

- ***Principle 1:*** The clinical trial should be conducted in accordance with ethical principles that have their origin in the Declaration of Helsinki.

- ***Principle 2:*** Before a trial is initiated, foreseeable risks and inconveniences should be weighed against the anticipated benefit for the individual trial subject and society.

- ***Principle 3:*** The clinical trial should be conducted only if anticipated benefits clearly prevail over the foreseeable risks. Scientific and social benefit should be carefully considered so that the rights, the safety and health of trial subjects are assured.

- ***Principle 4:*** The clinical trial should be conducted in strict compliance with the protocol approved by IEC, IRB and competent authorities.

- ***Principle 5:*** The approval to clinical trial, clinical trial methods of a certain product shall be carefully considered, such action must be supported by non-clinical, clinical information and other available research results relating to the product.

- ***Principle 6:*** The clinical trial should be conducted in the compliance with scientific protocol as specified in the approved research process.

- ***Principle 7:*** The trial subjects optionally agree to participate in the trial and those should be fully provided with information of the clinical trial as well as other related one. Trial subjects are entitled to request for the explanation, clarification of the information relating to the clinical trial and their own culture,

custom should be respected. Participating in the clinical trial, the trial subjects are provided healthcare services for free and this matter should be pre-notified. In case, the trial subjects are not qualified by the awareness or the legal personality to make the agreement, such agreement should be obtained from their legal representatives.

- ***Principle 8:*** The medical care given to, and medical decisions made on subjects should be the responsibility of the qualified physician in the clinical trials.

- ***Principle 9:*** Each individual involved in conducting a trial should be qualified by education, training and experience to perform his or her respective task(s) in the clinical trials.

- ***Principle 10:*** All clinical trial information should be recorded, handled and stored in such way that allows accurate reporting, interpretation, monitoring the reliability thereof.

- ***Principle 11:*** The confidentiality of records that could identify subjects should be protected, respecting the privacy and confidentiality rules in accordance with the applicable regulation of each country.

- ***Principle 12:*** Investigational products should be manufactured, handled, and stored in accordance with applicable good manufacturing practice (GMP) and they should be used in accordance with the approved protocol.

- ***Principle 13:*** Systems that assure the quality and method for assuring the quality of every aspect of the trial should be fully implemented in the compliance with the Guideline for GCP and regulation of each country.

It is required to approach the principles of GCP from the position of a manager, law maker, sponsor or investigator. Each of such position should approach and apply the principles of GCP in the suitable way.

Chapter III

RIGHTS AND RESPONSIBILITY OF IEC, THE SPONSORS, INVESTIGATOR AND RESEARCH ORGANIZATION

1. Right of Independent Ethics Committee (IEC)

Review and approve for ethnic aspect of research and specific scientific aspect of protocol in clinical trial in which subjects is human according to regulations and consult to Minister for the approval before implementing trials as well as for the changes in implementing process.

2. Responsibility of IEC

- IRB/IEC takes responsibility for scientific and ethnic aspects of trial in order to assure rights, the safety and health of the trial subject, especially clinical trials with sensitive subjects.

IRB/IEC should conduct the assessment and reply for proposal of the clinical trial in an appropriate time and their opinion should be in written documents.

- *IRB/IEC should consider the followings:*

+ The scientific aspects of protocol

+ Related ethnic aspects and the compliance of other legislation applied in the trial

+ The assurance of the right of subjects, even in case subject does not finish the trial

+ Qualification and ability of Manager of trial and investigator

+ The IRB/IEC should conduct continuing review of each ongoing trial at intervals appropriate to the degree of risk to human subjects, but at least once per year.

+ Composition, Functions and Operations of IRB/IEC is stipulated in current guideline " Regulation of constructional organization and operation or the ethic Committee in medical research"

+ The IRB/IEC should retain all relevant records (e.g., written procedures, membership lists, lists of occupations/affiliations of members, submitted documents, minutes of meetings, and correspondence) for a period of at least 3

years after completion of the trial and make them available upon request from the competent authorities.

The investigators, sponsors or regulatory authorities may ask the IRB/IEC to provide its written procedures and membership lists.

2. Rights of the sponsor (organization or individual have researching drug)

- The sponsor may transfer any or all trial-related duties to the investigators or the research organization as recorded in the agreement. However, the ultimate responsibility for quality and integrity of the trial data always resides with the sponsor.

- The sponsor may establish and conduct the irregular or regular monitoring; such protocol is independent with the daily and/or regular, and/or irregular monitoring of the investigators, the research organization, Ethics Committee and competent authorities.

- The sponsor may apply the emergency measures to suspend or terminate the investigators, research organization's participation upon identifying serious infringements, noncompliance with the trial protocol or unexpected adverse reaction that seriously impact on health of the trial subjects.

- The sponsor may reserve the ownership of investigation results, rights to publish the investigation results, register of copyright, intellectual property right (if it satisfies the requirement as stipulated by law), right to publish document relating to the clinical trial in accordance with the applicable regulation and after get the agreement with Head of organization or individual having researching drug.

3. Responsibility of the sponsor

- The sponsor should draft and provide the investigator's brochures introducing, assuring quality as well as stability of the investigational products. The sponsor should be responsible for reliability of information related to the investigational product recorded in the investigator's brochures.

- The sponsor should provide investigator's brochures to investigator and should jointly assume responsibility in designing the research, the clinical trial protocol, and products of the sponsor.

- Submit investigator's brochure to competent authorites

- After obtaining the approval of Ethics Committee, Science Committee and the management office, the sponsor should sign a pharmaceutical product's trial agreement with the principal investigator (chief of the trial) and research organization (the entity that holds the trial).

- The sponsor assumes responsibility in manufacture, package, labeling and encoding the investigational products. Such products should be manufactured in compliance with the applicable GMP issued by the competent authorities in order to assure its quality. As to the trial wherein the blinding is conducted, the investigational products should be labeled, encoded and blinded in compliance with the approved protocol, and the product's label should be designed in accordance with the applicable regulation.

- The sponsor only provides the investigators with the pharmaceutical product after it is approved by the ethics committee and the competent authorities. The sponsor should assume the responsibility in revoking and destroying the unused, ruined and remained products after completing the clinical trial.

- The sponsor should monitor and control trial's quality, trial subject's safety and the adverse effects or inconvenience occurred to the trial subject as well as trial data, the compliance with approved protocol.

- The sponsor is responsible for regular and irregular reports on rate of progress, safety of the trial subjects, the compliance with the approved protocol, the management of investigational products as well as the safety and unexpected adverse reaction of the investigational products to IEC and the management office.

- The sponsor is responsible for management, accession and the confidentiality of the trial subjects, in cooperating with the investigator to comply with the approved protocol.

- After publishing the trial result and manufacturing the products, the sponsor also assumes the ultimate responsibility for the safety, quality of products as well as the diagnostic or treatment or prevention's effect of the investigational products.

- The sponsor should supply the investigator with finance and other resources in accordance with the approved outline and investigation agreement signed between the sponsor and the investigator.

- The sponsor should provide the investigator and the research organization with the compensation including financial and legal coverage for damage arisen (if any) in accordance with the applicable regulation, except that such damages arisen from negligent of the investigators and the research organization.

- The sponsor should provide the trial subjects with compensation including property and spirit and legal coverage in case of unexpected adverse reaction that seriously impact on research subject's health (such as death or invalidity. etc…). However, the compensation should be made in case such damage involves products that provided by the sponsor.

4. Right and responsibility of the principal investigator (manager of the research)

- The principal investigator may select investigators and management office and cooperate with related offices to propose to the sponsor.

- The principal investigator may select the laboratory that meets GLP's requirements in accordance with the applicable regulation. In case the selected laboratory does not satisfy requirement of GLP, it must be approved by an assessment committee established by the management office.

- The principal investigator should be paid for clinical investigational products. They may share responsibility and rights with the sponsor in the trial. Rights or the investigator and the research organization should be recorded in written documents in the research design and the research contract.

- They may publish the trial results provided that such action is agreed by the sponsor and it is recorded in written documents in the research contract.

- Discoveries of products that are not recorded in the approved research design or the research agreement should be own by the investigator.

- Rights to conduct the clinical trial, to select the trial subjects, to audit and monitor the clinical trial according to the approved trial design and protocol.

- Investigator may suspend or terminate the clinical trial if the unexpected adverse reaction that seriously affect the trial subjects and the community.

- They may propose the amendment of the research protocol to IRB/IEC, the sponsors and the competent authorities if it is necessary. Such amendment should be performed if it is approved in written by IRB/IEC, sponsors and the management office.

- The principal investigator may sign the trial agreement with the sub-investigator and/or incorporating entity to conduct any stage of the clinical trial or the medical care for the trial subjects (if any) in accordance with the approved research protocol.

5. Responsibility of the principal investigator

- The principal investigator is responsible for selecting qualified investigators, medical expert that educated in the fields related to the clinical trial and proposing them to the sponsors for assessment and approval.

- The investigator takes responsibility in drafting the outline of the research, trial protocol, process and standards for selecting trial subjects, coordinating with the sponsor to complete science profile, ethics documents in accordance with current Vietnam's regulation.

- The investigator assume the responsibility on negotiating, drafting and signing the research agreement with the sponsor (including finance for the research, assessment, approval, monitoring and management of the trial) and settling the payment in accordance with the research agreement signed between the investigator and the sponsor.

- The investigator is responsible to coordinate with the sponsor in submitting the trial document to IEB/IEC and the competent authorities for the approval.

- After obtaining the approval of IRB/IEC and the competent authorities, the investigator is responsible for conducting the clinical trial in accordance with the approved trial design. It is also responsible for obtaining the agreement of the consent from the trial subject and selecting trial subject in order to assure that such selection is random.

- The investigator assumes the responsibility for the compliance with the approved trial protocol. Any amendment (if any) made to such protocol is

performed only after it is approved by IRB/IEC and the competent authorities in written document. Such amendment should be reported to the sponsor.

- The investigator should conduct the procedure of blinding the products (if any) in compliance with the design, and assure the confidentiality of the blinding procedure. It should be decoded after finishing the trial or it is required by the sponsor, IRB/IEC and the management office in case of involving to the safety of the trial subjects.

- The investigator takes responsibility in recording, reporting and storing data, original profiles of the clinical trial and handling, analyzing data, making judgment and regularly/irregularly reporting to the sponsor, management office, IRB/IEC on sub-reaction, adversity, safety and effect of the investigational products. It is also responsible for drafting the final report of the clinical trial to the sponsor, management office, IRB/IEC and drafting checking over report as required by the competent authorities.

- The investigator is responsible for providing the sponsor, IRB/IEC or the competent authorities with the profile, data and other documents relating to the clinical trial if it is required in accordance with the applicable regulation. It is required to assist the auditor, monitor designed by the sponsor, competent authorities, IRB/IEC to audit, monitor and inspect the clinical trial.

- It is responsible for monitoring, storing and providing the investigational product to the subjects according to the approved trial design, protocol. Beside, it is required to take responsibility in revoking, managing and delivering remained product to the sponsor after finishing the clinical trial.

- The investigator is responsible for paying allowance (if any) to the trial subjects, medical caring trial subjects in compliance with trial design and conducting medical care that relating to the clinical trial.

- The investigator should provide the trial subjects with compensation including property and spirit and legal coverage in case of unexpected adverse reaction that seriously impact on research subject's health (such as death or invalidity. etc…) in such damage involves to incompliance to approved protocol.

6. Right of research organization

- Manage and control activities related to clinical trial

- Terminate or early finish if discovers any unexpected adverse effects of researching product which seriously impact to the health of subject or community.

7. Responsibility of research organization

- The research organization is responsible for assisting the investigators, sponsor, IRB/IEC and the management office in matters relating to resources (employment, properties including equipments, devices, etc.), legal basis and other condition of the clinical trial in accordance with the approved trial design and contract.

- Sign and liquidate the contract

- The research organization should coordinate with the investigator in monitoring, assuring the quality as well as effect and the safety of the clinical trial.

- The research organization should monitor regularly and report to sponsor, IEC and competent authorities according to regulation in protocol and contract.

- The research organization should comply with the Guideline for GCP, applicable guideline on ethics in research and clinical trial of Vietnam.

CHAPTER V

REVIEWING PROCEDURE AND APPROVAL FOR CLINICAL TRIAL

(Attached with diagram in reviewing procedure of dossier for clinical trial and check list of minimised documents needed for implementing clinical trial)

1. Registration of clinical trial

- Sponsor prepare for registration dossier including: form for proposal of clinical trial, proposal for principal investigator and research organization attached with product's dossier (according to form in annex 1, 2a and 2b).

- Submit above dossier to MOH (Department of Science and Training). Withthin 15 working days since the day of receiving completed dossier, MOH will reply to sponsor for next steps.

2. Design of protocol

Base on approved document of MOH, Sponsor cooperate with principal investigator to develop protocol of clinical trial (according to forms in annex 3, 4 and 5), that includes:

- Sponsor provides investigation's brochure, legal dossier and proposal for protocol to the Principal Investigator and management office.
- Principal Investigator in co-operation with sponsor and investigator group to develop the design of protocol, prepare the completed dossier, protocol and related legal dossiers as requested in the list of needed document to conduct clinical trial.

3. Submission of clinical trial's dossier.

Dossier of clinical trial should be sent to MOH (DST) to review, consider and approve. Responsibilites is assumed under of each unit as the following:

- Sponsor is responsible for submission of investigation's brochure and proposal of clinical trial to competent authorities to review and consider as stipulated in Guideline for list of document.

- Principal investigator and Management Office are responsible for submitting protocol to IEC for reviewing and approving as stipulated in Guideline for list of document.

Permanent staff of IEC and competent authorities are located at Department of Science and Training (DST-MOH). Only dossier submitted to MOH before 20th monthly (based on receiving date of Administrative department – MOH) can be reviewed in such month. For dossier submitted after that day will be reviewed in the next month.

4. Reviewing and approving for clinical trial.

- Reviewing the investigation's brochure

Within 30 working days after receiving completed application dossier, MOH will conduct a reviewing board according to legal regulation

- Reviewing application dossier

Within 30 working days after receiving completed application dossier, parallel with reviewing the IB, MOH will conduct the IEC meeting in medical research according to legal regulation.

- Informing the result

Within 15 working days after getting reviewing result of IB's reviewing board and IEC, DST will summary, complete the dossier and minute (according the form in annex 7) and inform to sponsor and management office to supplement, complete application dossier for clinical trial (if needed).

- Approving for clinical trials

Within 15 working days, DST will summary. Complete dossier and protocol of clinical trial to submit to Minister for approval.

Only application dossier approved by both above reviewing procedures (including reviewing IB and researching dossier) will be considered to approved by MOH.

MOH will inform sponsor and management office in case application dossier is not approved by any of two above revewing procedures or both.

CHAPTER V

IMPLEMENTATION AND CONDUCTING CLINICAL TRIAL

1. Implementing clinical trial

since application dossier is accepted to be legitimate, Ministry of Health shall hold a meeting between Science and Ethics Board to assess the dsier.

For dossier of clinical trial approved and accepted to be put into trial by Science and Ethics Board, the Board shall send conclusion and/or notification of acceptance to Ministry of Health. For dossier of clinical trial need to be corrected, the correction, repair, supplement and completment of protocol according to conclusion of Board shall be completed by Sponsor and investigator within at least of ten days counted from the end of Board's meeting. For application dossier of clinical trial not accepted by Science and Ethics Board, Ministry of Health shall issue a notification for Investigator and Sponsor right after recieving Board's conclusion.

After 15 working days counted from the date of recieving conclusion and/or notification of acceptance of Science and Ethics Board, Minister of Health shall issue a Decision of approving clincial trial protocol.

Sponsor and Investigator shall be conducted trial only after recieving notification of acceptance of Ethics Board and approval Decision of approriate authorities.

During the implementation, Sponsor only signs a contract with investigator being principal one (project manager) and research organization shall preside at trial. Enclosure sub-contracts (if any) when signing with research co-operation organizations and investigator shall be directly signed by leader of trial and approved by research organization (management organization).

3. Implementing investigation

Investigator provides investigational information for trial subject or legal representative to vulnerable subjects who are incapble of giving consent.

Collect volunteer willingness in participation of subject into agreement.

Organize, implement the investigation in accordance with approved protocol and procedure.

Investigator holds the implementation, records and monitors investigation regularly, updates data, keeps and preserves original data, keep confidence of each subject and requires specific person directly access to original data.

Investigator periodically reports each three months to sponsor, IRP/IEC on the safety of investigational products, side effects, progress, unexpectedly reports if these adverse effects seriously impact on subject's health. In case, it is found that the said effects seriously impact on subject's health, the investigator has right of stopping the investigation and shall immediately report in written document to sponsor, IRB/IEC and research organization.

Sponsor periodically performs the monitor, audit six months at trial site and sends monitoring report, audit to IRB/IEC and management office. During the process of monitoring, if sponsor finds out that the investigator do not comply with progress with serious level, investigator has the right of stopping the trial and sending report to IRB/IEC and management office and inform investigator.

- IRB/IEC execute an/a unnotified or periodical report planned, audited and sent to sponsors and investigator by IRB/IEC. Audit and monitor should be performed one time in at least on year.

- Management office may hold the inspection or audit based on report of investigator, sponsor, IRB/IEC and build audit and inspection plan and simultaneously inform relevant parts.

4. Finishing investigation

- Clincial trial which has approved decision of Minister of Health can be conducted.

- Procedures of clinical trial only can conducted affter having written agreement of subject or legal representatives of subject.

- Principal investigator and management office are responsible for conducting the research according to approved protocol design and procedures.

- Request of dossier and document in implementing duration to principal investigator and sponsoer is regulated in Guideline of document list. All documents used in clinical trial must be available in checking of sponsor or investigating of competent authorities.

- Principal investigator reports every 03 months to sponsor and IEC about safety of investigating product, adverse effects and rate of progress; irregular reports if has any serious adverse effect which serioulsy impact to subject's health. In that case, principal investigator has right to stop the clinical trial and immediately inform to sponsor, IEC and competent authorites by written document.

- Sponsor delegates Clinical Research Associate (CRA) to regularly monitor at least 6 months in field and send the report to IEC and competent authorities. In monitoring process, if sponsor discovers any serious incompliance, sponsor has right to stop the clinical trial and send the report to IEC, competent authorities and inform to Principal investigator.

- IEC conduct irregular checking and irregular checking which is planned by committee and inform to sponsor or principal investigator.

- Competent can conduct the inspection or checking which bases on report of principal investigator, sponsor and IEC. The inspection or checking must be planned and inform to related unit.

2. Record, report and statistical analysia

a. Record and report

- Principal investigator must ensure the accuracy and completeness of entry data. If clinical data is directly entered into computer, the investigator should ensure the legibility and unity in saving in accordance with regulation. Any change in personal receipt and data should be clear, not obscure the original entry and inform unit of measurement. The final report of investigator should conform to investigation protocol signed by sponsors, monitors, investigators and statisticians. Investigator should submit the coded list, identify trial subjects to regulatory authorities after finishing clinical trial and keep confidential.

- When using electronic data systems, sponsor should use legitimate data handling programs and standard operating process for these systems should be available. Sponsor should ensure the legibility in handling data, identify entry data of each trial subject by non-sense coding method, maintain list of people accepted to amend the data.

- Monitor should propose suitable measures to avoid losing data or disuniting data.

b. Statistical analysis

- Sponsor and investigator should gain agreement of location, statistician as well as information relating to statistical analysis, even name of the assigned statistician should be written in protocol of clinical trial. Kind of statistical analysis will be used should be pre-identified and written down in protocol. Any change in comparison with protocol in practicing should be disclosed at the final report. Statistical analysis is planned and implemented, evaluated by experienced and competent statistician. Investigator and monitor should ensure the integrity of data when handling.

- The result of statistical analysis in presentation should show out the importance of clinical trial. It should be taken into account confidential, unused or

unidentified data in statistical analysis, therefore, the measures of protecting, verifying and monitoring are required.

3. Monitoring and check/audit

- *Monitoring*

Objectives of monitoring are to protect rights and health of trial subject, consider data report, the implementation of investigator to ensure the accuracy, completeness and reality of data resource. Consider whether the implementation complies with protocol or changes in comparison the first protocol conform to GCP and management requirement.

Monitor should be appointed by sponsor and is a communication between sponsor and investigator.

Monitor should have specific clinical knowledge needed to monitor clinical trial, be familar with investigational products, protocol, written informed consent form and other written information to be provided to subjects, the sponsor's SOPs, understand GBP and management requirements which are being applied in each country relating to clinical trial.

The scope and nature of monitoring is to consider based on objective, purpose, design, complexity, blinding technique, size, endpoint of trial. There is a need for on-site monitoring before, during, after clinical trial. The responsibility of monitor is to monitor the process of clinical trial and ensure the investigation is conducted in accordance with GCP, to record, report data true according to procedure, management requirement and investigational ethics, to be a main line of communication between the sponsor and investigator.

Particular responsibility of monitor:

- Evaluating the site of clinical trial before, during, after conducting clinical trial

- Verifying qualification and resources of investigator

- Verifying for investigational products (storage time, condition provided for trial subject).

- Verifying that investigator follows the approved protocol and all approved amendment(s).

- Reverifying the consent of subject's participation in the trial and the compliance with procedure of selecting subject of investigator.

- Monitoring should be in accordance with standard operating procedures and sponsor's requirements. Monitor has responsibility of completing monitoring report according to sponsor's requirement.

- *Check/ Audit*

The objectivies of audit is to evaluate the compliance of investigator to protocol, of procedure, management of SOPs and GCP.

Sponsor appoints auditor in independence with clinial trial. Auditor should have qualification and experience in indepently auditing clinical trials.

Auditing procedure and plan and formality should be submitted to regulatory authorities. In case, there is a serious infringement of GCP, the audit report should be submitted to regulatory authorities, in general, the report should be submitted to the sponsor.

Audit is separated from monitor

4. Finish the clinical trial

Requirements of dossir and documents when finish the clinical trial of Principal Investigator and sponsor are included in Guideline of document list.

- When complete the clinial trial, even in case of stop or early finish for any reason, principal investigator must inventory researching drugs, payment and send reports to sponsor, competent authorities and IEC.
- Principal investigator is responsible for stored the original dossier for at least 15 years till the time sponsors inform that they want to take back the original dossier or inform that principal does not need to store this one.
- Principal write the clinical trial result according to stipulated forms, then send to sponsor, IEC and competent authorities to review.
- Competent authorities are responsible for setting up Committee and checking/evalutating the clinical trial result.
- Sponsor and Principal investigator set up the checking/evaluating document to liquidate contract after the trial is checked/evaluated.

- Sponsor takes back the products and conduct to destroy drugs togerther with destroying document sent to principal investigator and competent authorites.
- Sponsor pay the fee and handle all existing issues with principal investigaror before investigator submits the final report to sponsor.

5. Report and publication of clinical trial results

There are many kinds of reports and each kind has specific objective and conforms to a required form of each one according to guideline for GCP and of each countries with particular requirement.

- Monitoring report means a written report of monitor sent to sponsor after each trial site visit and/or clinical trial relating communication acccording sponsor's SOPs.

- Check/audit report is a written evaluation by the sponsor's auditor of the results of the audit, the report is independent of monitoring report.

- Clinical trial report is a written description of a trial report of any therapeutic, prophylactic, or diagnostic agent conducted in human subjects.

- The clinical and statistical description, presentations, and analyses are fully integrated into a single report and comply with the guideline for structure and content of GCP.

- Unscheduled and/or interim report is a written report of intermediate results and their evaluation based on analyses performed during the course of a trial.

In addition to above mentioned reports, there also include other ones such as: investigational report, drug adverse report, sponsor's report, investigator's report, early finished report, final report.

- Final report is a complete description of clinical trial after finishing comprising description of clinical trial method (including statistic method) and relevant documents. The report is a presentation and evaluation of result, statistical analysis, ethics of clinical trial.

- The final report shall be written in a required form of each countries.

- Publication should be agreed by sponsor and written in investigation protocol and/or investigation contract. Publication and writing in press of trial results also depend on regulation of each publisher and scientific evaluation.

6. Finance in clinical trial

- Expenditure for clinical trial includes the fee paid for professional staff, lost material, support to the volunteer, insurance which principal investigator and management office cooperating with sponsor dicuss, develop and sign in a contract.

- Management expenditure for clinical trial (including: reviewing the dossier, holding the meeting of Committee, approving, conducting GCP training for investigator, monitoring, checking, investigating at site) is defined in contract which is agreed by sponsor and principal investigator.

- The payment for activities is responsibilities of sponsor, principal investigator and managing office which is stipulated in regulation and signed/approved contract.

FOR THE MINISTER

DEPUTY MINISTER

Signed

Nguyen Thi Kim Tien

1 – GUIDELINES FOR NEEDED DOCUMENT LIST BEFORE CONDUCTING THE CLINICAL TRIAL

No	Document name	Objectives	Responsibility of		Form
			Investigator/ Management office	Sponsor	
1.1	Application form for clinical trial	Provide summary product information about drug proposed for clinical trial and proposed principal investigator		√	Annex 1
1.2	Investigator's brochure	To improve for scientific information provided to principal investigator, which is available and related to researching product	√		Annex 2a, 2b
1.3	Application for approval of protocol		√		Annex 3
1.4	Protocol & CRF	Protocol provide detailed SOP, checking/audit, evaluation and CRF	√	√	Annex 4
1.5	Contract for clinical trial between sponsor and principal investigator/ management office	To prove for the agreement about finance aspect between sponsor and principal investigator/ management office	√	√	Annex 5
1.6	The agreement for participating which is signed between related unit, for example: - Investigator – investigator of sub entities between sponsor - Investigator /management office and authorities at site (if needed)	To confirm for the agreement to participate in clinical according to current regulation	√	√	

1.7	Information provided to subject + Information card and consent form (including suitable information to communicate to subject) + Any other information in written	To confirm for the voluntary to participate in clinical trial To prove that subject will be provided suitable information in written (including content and communication way) to assist for the handling the voluntary form To prove that selecting method is suitable and not forced – to ensure for the ethnic aspect in clinical trial	√ √	√ √	Annex 6
1.8	Insurance contract	To improve that the subject will have compensation if has damage in the trial	√	√	
1.9	Form for approval of IEC	Prove for the approval of IEC/MOH in clinical trial			Annex 7
1.10	Date of approval for dossier/ approval of basic reviewing committee/ independent IEC for the followings: + Protocol any any	To confirm the approval for clinial trial of of basic reviewing committee/ independent IEC. To confirm the version and approved	√	√	Minute of IEC

	admendement + Report for any disease case + Consent form + Any information in written to provide subject + Notice for selection of subject (if applicable) +Compensation for suject + Any documents represented for agreement	date of documents			
1.11	Members of IEC/MOH	To prove that IEC is established according to requirement of GCP	√	√	Decision in estb. of committee
1.12	Approval of competent authorities to protocol	To confirm the approval of competent authorities before conducting clinical trial according to current regulations	√	√	Decision for MOH's approval of protocol
1.13	CV and GCP certificate issued by MOH of investigators (including management officers of clinical trial, pharmacist	To prove for unified qualifications and abilities to conduct clinical trial and monitor/medically check to	√	√	
1.14	Institution obtained GCP requirement (site, document storage, monitoring, discussion area, official equipments...) and GLP requirements (standard lab, standard technical procedures...) or approval for instution by MoH.	To document ability of the institution, equipments for in-vitro testes of the trial.	√	√	
1.15	Sample of label (s) attached to investigational product container (s).	To document compliance with applicable labelling regulations and appropriateness of		√	

		instruction provived to the subjects.			
1.16	Instructions for handling of investigational products ans trial-related materials (if not included in protocol or Investigatior's Brochure).	To document instructions needed to ensure proper storage, packaging, dispensing, and disposition of investigational products and trial-related materials.	√	√	
1.17	Shipping records for investigational products and trial –related materials.	To document shipment dates, batch numbers, and method of shipment of investigational products and trial-related materials. Allows tracking of product batch, review of shipping conditions, and accountability.	√	√	
1.18	Certificate (s) of analysis of investigational products shippded.	To document indentity, purity, and strengthen of investigational products to be used in the trial.		√	
1.19	Decoding procedures for blinded trials.	To document how, in case of an emergency, identity of blinded investigational product can be revealed without breaking the blind for the remaining subject'treatment.	√	√	
1.20	Standard Operating Procedure (SOP) of techniques in the trial.	To document and ensure techniques used in the trial be consolidated, scientific, objective and accurate.			
1.21	Random list	To document that the method of subject selection is random.		√	

2- ESSENTIAL DOCUMENT FOR THE CONDUCT OF A CLINICAL TRIAL DURING THE CLINICAL CONDUCT OF THE TRIAL

	Tittle of Document	Purpose	Located in Files of		Sample
			Investigator /Institution	Sponsor	
2.1	Investigator's Brochure updates	To document that investigator is informed in a timely manner of relevant information as it becomes available.	√	√	
2.2	Any revison to: • Protocol/amendment(s) and CRF • Informed consent form • Any other written information provided to subjects. • Advertisement for subject recruitment (if used)	To document revisions of these trial-related documents that take effect during trial.	√	√	
2.3	Dated, documented approval/favourable opinion of Competent Authority/Independent Ethics Committee (IEC) of the following : • Protocol amendment (s) • Revision (s) of: - Inform Consent Form. - Any other written information to be provided to the subject. - Advertisement for subject recruitment (if used). - Any other documents given approval/favourable opinion. - Continuing review of trial (where required)	To document that the amendment (s) and/or revision (s) have been subject to Competent Authority/IEC review and were given approval/farourable opinion. To identify the version number and date of the document (s).	√	√	
2.4	Regulatory authority (ies) authorizations/approvals/notifications where required for: • Protocol (amendments) and other documents	To document compliance with applicable regulatory requirements.	√	√	
2.5	Curriculum vitae, GCP certificated for new investigators (s) or sub-investigators which issued by MoH	To document ability and feasibility to conduct the trial and/or medical mornitor the subjects.	√	√	
2.6	Updates to normal value (s)/range (s) for	To document normal values and ranges that	√		√

	medical/laboratory/technical procedure (s)/test (s) included in the protocol.	are revised during the trial.			
2.7	Medical centers/laboratory/technical procedures/testes: • Certificate or • Established quality control and/or esternal quality assessment or • Other validation (where required)	To document that tests remain adequate throughout the trial period.	√	√	
2.8	Documentation of investigational products and trial-related materals shipment.		√	√	
2.9	Certificate (s) of analysis for new batches of investigational products.			√	
2.10	Monotoring visit reports	To document site visits by, and findings of the monitor.		√	
2.11	Relevant communications other than site visits: • Letters • Meeting notes • Notes of telephone calls.	To document any agreements or significant discussions regarding trial administration, protocol violations, trial conduct, adverse event reporting.	√	√	
2.12	Signed informed consent forms.	To document that consent is obtained in accordance with GCP and protocol and dated prior to participation of each subject in trial. Also to document direct access permission.	√		
2.13	Source documents	To document the existence of the subject and substantiate integrity of trial data collected. To include original documents related to the trial, to medical treatment, and history of subject.			
2.14	Signed; dated and completed case report forms (CRF).	To document that the investigator or authorized member of the investigator's staff confirms the observations recorded.	√ (copy)		√ (original)
2.15	Documentation of CRF corrections	To document all changes/additions or corrections made to CRF after initial data were recorded	√ (copy)		√ (original)

2.16	Notification by origination investigator to sponsor of serious adverse events and related reports.	Notification by origination investigator to sponsor of serious adverse events and proper related reports.	√		√
2.17	Notification by sponsor and/or investigator, where applicable, to regulatory authority (ies), IEC of unexpected serious adverse drug reaction.	Notification by sponsor and/or investigator, where applicable, to regulatory authority (ies), IEC of unexpected serious adverse drug reaction.	√		√
2.18	Notification by sponsor to investigator of safety information.	Notification by sponsor to investigator of safety information.	√	√ (where required)	
2.19	Interim and annual reports of IRB/IEC and authority (ies).	Interim and annual reports of IRB/IEC and authority (ies).	√	√ (where required)	
2.20	Subject identification code list	To document that investigator/institution keep confidential list of names of all subjects allocated to trial number on enrolling in the trial.	√		
2.21	Subject code log	To document the participation of the subjects by trial code.	√		
2.22	Investigatinal product (s) accountability at the site.	To document the investigational products have been used according to the protocol.	√	√	
2.23	Signature sheet	To document signatures and initials of all persons authorized to make entries and/or corrections on CRFs.	√	√	
2.24	Record of retained body fluids/tissue samples (if any)	To document location and identification of retained samples if assays need to be repeated.	√	√	

3- ESSENTIAL DOCUMENT FOR THE CONDUCT OF A CLINICAL TRIAL

AFTER COMPLETION OR TERMINATION OF THE TRIAL

After completion or termination of the trial, all of the documents identified in section 1 and 2 should be in the file together with the following:

	Tittle of Document	Purpose	Located in Files of		Sample
			Investigator/Institution	Sponsor	
3.1	Investigational product (s) accountability at the site.	To document that the investigational product (s) have been used according to the protocol. To document the final accounting of investigational product (s) received at the site, dispensed to subjects, returned by the subjects, and returned to sponsor.	√	√	
3.2	Documentation of investigational product destruction	To document destruction of unused investigational products by sponsor or at site.	√ (if destroy at site)	√	
3.3	Completed subject identification code list	To permit identification of all subjects enrolled in the trial in case follow up is required. List should be kept in a confidential manner and for agreed upon time.	√		
3.4	Final trial close-out monitoring report.	To document that all activities required for trial close-out are completed, and copies of essential documents are held in the appropriate files.		√	
3.5	Treatment allocation and decoding documentation.	Return to sponsor to document any decoding that may have occurred.		√	
3.6	Final report by investigator to IRB/IEC and regulatory authority (ies).	To document completion of the trial.	√		
3.7	Clinical study report	To document results and interpretation of trial.	√ (if applicable)	√	Annex 8

Annex 2a

INVESTIGATOR'S BROCHURE

(Apply to pharmaceutical products and traditional medicines)

1. Introduction

The Investigator's Brochure (IB) is a compilation of the clinical and nonclinical data on the investigational product (s) that are relevant to the study of the product (s) in human subjects. Its purpose is to provide the investigators and others involved in the trial with the information to facilitate their understanding of the rationale for, and their compliance with, many key features of the protocol, such ad the dose, dise frequency/interval, methods of administration: and safety monitoring procedures. The IB also provides insight to support the clinical management of the study subjects during the course of the clinical trial. The information should be presented in a concise, simple, objective, balanced, and non-promotional form that enables a clinician, or potential investigator, to understand it and make his/her own unbiased risk-bevefit assessment of the appropriateness of the proposed trial. Fof this reason, a medically qualified person should generally participate in the editing of an IB, but the contents of the IB should be approved by the disciplines that generated the described data.

This guideline delineated the minimum information that should be included in an IB and provides suggestions for its layout. It is expected that the type and extent of information available will vary with the stage of development of the investigational product. If the investigational product is marketed and its pharmacology is widely understood by medical practitioners, an extensive IB may not be necessary. Where permitted by regulatoty authorities, a basic product information brochure, package leaflet, or labeling may be an appropriate alternativem provided that it inclides current, comprehensive, and detailed information on all aspects of the investigational product that might be of importance to the investigator. If a marketed product is being studied for a new use (i.e., a vew indication), an IB specific to that vew use should be prepared. The IB should be reviewed at least annually and revised as necessary in compliance with a sponsor's written procedures. More requent revision may be appropriate depending on the stage of development and the generation of relevant new information. However, in accordance with Good Clinical Practice, relevant new information may be so important that it should be communicated to the investigators, and possibly to the Institutional Review Board (IRB)/Independent Ethics Committees (IECs) and/or regulatory authorities before it is included in a revesed IB.

Generally, the sponsor is responsible for ensuring that an up-to-date IB is made available to the investigator (s) and the investigators are responsible for providing the up-to-date IB to the responsible IRB/IECs. In the case of an

investigator sponsored trial, the sponsor-investigator should determine whether a brochure is available from the commercial manufacturer. If the investigational product is provided by the sponsor-investigator, the he or she should provide the necessary information to the trial personnel. In cases where preparation of a formal IB is impractical, the sponsor-investigator should provide, as a substitute, an expanded background information section in the trial protocol, as a the minimum current information described in this guideline.

2. General Considerations

The IB should include:

2.1. Title Page

This should provide the sponsor's name, the identify of each investigational product (i.e., research number, chemical or approved generic name , and trade name (s) where legally persissible and desired by the sponsor), and the release date. It is also suggested that an edition number, and a reference to the number and date of the edition it supersedes, be provided. An example is given in Appendix 1.

2.2. Confidentiality Statement

The sponsor may wish to include a statement instruction the investigator/recipients to treat the IB as a confidential document for the sole information and use of the investigator's team and the IRB/IEC.

3. Contents of the IB

The IB should contain the following sections, each with literature references where appropriate:

3.1.Table of contents

An example of the table of contents is given in Appendix 2.

3.2. Summary

A brief summary (preferably not exceeding two pages) should be given, highlighting the significant physical, chemical, pharmaceutical, pharmacological, toxicological, pharmakinetic, metabolic, and clinical information available that is relevant to the stage of clinical development of the investigational product.

3.3. Introduction

A brief introductory statement should be provided that contains the chemicals name (and generic and trade name (s) when approved) of the investigational product (s), all active ingredients, the investigational products (s) pharmacological classd and its expected position within this class (e.g. advantages), the anticipated prophylactic, therapeutic, or diagnostic indication (s). Finally, the introductory statement should provide the general approach to the followed in evaluating the investigational product.

3.4. Physical, chemical, and pharmaceutical properties and formulation.

A description should be provided of the investigational product substance (s) (including the chemical and/or structural formulae, and a brief summary should be given of the relevant physical, chemical, and pharmaceutical properties.

To permit appropriate safety measures to be taken in the course of the trial, a description of the formulation (s) to be used, including excipients, should be provided and justified if clinically relevant. Instructions for the storage and handling of the dosage form (s) should also be given.

Any structural similarities to other known compounds should be mentioned.

3.5. Nonclinical studies

Introduction:

The results of all relevant nonclinical pharmacology, toxicology, pharmacokinetic, and investigational product metabolism studies should be provided in summary form. This summary should address the methodology used, the results, and a discussion of the relevance of the findings to the investigated therapeutic and the possible unfavourable and unintended effects in humans.

The information provided may include the following, as appropriate, if known/available:

- Species tested
- Number and sex of animals in each group
- Unit dose (e.g., milligram/kilogram)
- Dose interval
- Route of administration
- Duration of post-exposure follow-up
- Results, including the following aspects:
  - Nature and frequency of pharmacological or toxic effects
  - Severity or intensity of pharmacological or toxic effects.
  - Time to onset of effects
  - Reversibility of effects
  - Duration of effects
  - Dose response

Tabular format/listing should be used whenever possible to enhance the clarity of the presentation.

The following sections should discussion the most important findings from the studies, including the dose response of observed effects, the relevance to humans, and any aspects to be studied in humans. If applicable, the effective and nontoxic dose findings in the same animal species should be compared (i.e., the therapeutic index should be discussed). The relevance of this information to the proposed human dosing should be addressed. Whenever possible, comparisons should be made in terms of blood/tissue levels rather than on a mg/kg basis.

a) Nonclincal Pharmacology:
A summary of the pharmacological of the investigational product and, where appropriate, its significant metabolites stidied in animals, should be included. Such a summary should incorporate studies that assess potential therapeutic activity (e.g., efficacy models, receptor binding, and specificity) as well as those that assess safety (e.g., special studies to assess pharmacological actions other than the intended therapeutic effect (s)).

b) Pharmacokinetics and Product Metabolism in animals:
A summary of the pharmacokinetics and biological transformation and disposition of the investigational product in all species studied should be given. The discussion of the findings should address the absorption and the lical and systemic bioavailability of the investigational product and its metabolites, and their relationship to the pharmacological and toxicological findings in animal species.

c) Toxicology
A summary of the toxicological effects found in relevant studies conducted in different animal species should be described under the following headings where appropriate:
- Single dose
- Repeated dose
- Carcinogenicity
- Special studies (e.g., irritancy and sensitization)
- Reproductive toxicity
- Genotoxicity (mutagenicity)

3.6. Effects in Humans

Introduction:
A thorough discussion of the known effects of the investigational product (s) in humans should be provided, including information on pharmacokinetics, metabolism, pharmacidynamics, dise response, safety, efficacy, and other pharmacological activities. Where possible, a summary of each completed clinical trial should be provided. Information should be provided regarding results of any use of the investigational product (s) other than from in clinical trials, such as from experience during marketing.

a) Pharmacikinetics and Product Metabolisn in Humans
- A summary of information on the pharmacokineticsd if the investigational product(s) should be presented, including the following, if available:
- Pharmacokinetics (including metabolism, as appropriate, and absorption, plasma protein binding, distribution, and elimination).
- Bioavailability of the investigational product (absolute, where possible, and/or relative) using a reference dosage form.
- Population subgroups (e.g., gender, age, and impaired organ function).
- Interactions (e.g., product-product interactions and effects of food)

- Other phamarcokinetic data (e.g., results of population studies performed within clinical trial (s).

b) Safety and efficacy

A summary of information should be provided about the investigational products, (including metabolites, where appropriate), safety, pharmacodynamics, efficacy, and dose response that were obtained from preceding trials in humans (healthy volunteers and/or patients). The implications of this information should be discussed. In cases where a number of clinical trials have been completed, the use of summaries of safety and efficacy across multiple trials by indications in subgroups may provide a clear presentation of the data. Tabular summaries of adverse drug reactions for all the clinical trials (including those for all the studied indications) should be usefull. Important differences in adverse drug reaction patterns/incidences across indications or subgroups should be discussed.

The IB should provide a description of the possible risks and adverse drug reactions to be anticipated on the basis of prior experiences with the product under investigation and with related products. A description should also be provided of the precautions or special monitoring to be done as part of the investigational use of the products.

c) Marketing experience

The IB should identify countries where the investigational product has been marketed or approved. Any significant information arising from the marketed use should be summaried (e.g., formulation, dosages, routes of administration, and adverse product reactions). The IB should also identify all the countries where the investigational product did not receive approval/registration for marketing or was withdrawn from marketing/registration.

3.7. Summary of data and guidance for the Investigator

This section should provide an overall discussion of the nonclinical and clinical data, and should summarise the information from various sources on different aspects of the investigational product(s), whenever possible. In this way, the investigator can be provided with the most informative interpretation of the available data and with an assessment of the implications of the information for future clinical trials.

Where appropriate, the published reports on trlated products should be discussed. This could help the investigator to anticipate adverse drug reaction or other problems in clinical trials.

The overall aim of this section is to provide the investigator with a clear understanding of the possible risks and adverse reactions, and of the specific tests, observations, and precautions that may be needed for a clinical trial. This understanding should be based on the available physical, chemical, pharmaceutical, pharmacological, toxicological, and clinical information on the investigational product(s). Guidance should also be provided to the clinical

investigator on the recognition and treatment of possible overdose and adverse drug reactions that is based on previous human experience and on the pharmacolocy of the investigational product.

Annex 2b

INVESTIGATOR'S BROCHURE

(Apply to vaccine and medical biological products)

1. Introduction

The Investigator's Brochure (IB) is a compilation of the clinical and nonclinical data on the investigational product (s) that are relevant to the study of the product (s) in human subjects. Its purpose is to provide the investigators and others involved in the trial with the information to facilitate their understanding of the rationale for, and their compliance with, many key features of the protocol, such ad the dose, dise frequency/interval, methods of administration: and safety monitoring procedures. The IB also provides insight to support the clinical management of the study subjects during the course of the clinical trial. The information should be presented in a concise, simple, objective, balanced, and non-promotional form that enables a clinician, or potential investigator, to understand it and make his/her own unbiased risk-bevefit assessment of the appropriateness of the proposed trial. Fof this reason, a medically qualified person should generally participate in the editing of an IB, but the contents of the IB should be approved by the disciplines that generated the described data.

This guideline delineated the minimum information that should be included in an IB and provides suggestions for its layout. It is expected that the type and extent of information available will vary with the stage of development of the investigational product. If the investigational product is marketed and its pharmacology is widely understood by medical practitioners, an extensive IB may not be necessary. Where permitted by regulatoty authorities, a basic product information brochure, package leaflet, or labeling may be an appropriate alternativem provided that it inclides current, comprehensive, and detailed information on all aspects of the investigational product that might be of importance to the investigator. If a marketed product is being studied for a new use (i.e., a vew indication), an IB specific to that vew use should be prepared. The IB should be reviewed at least annually and revised as necessary in compliance with a sponsor's written procedures. More requent revision may be appropriate depending on the stage of development and the generation of relevant new information. However, in accordance with Good Clinical Practice, relevant new information may be so important that it should be communicated to the investigators, and possibly to the Institutional Review Board (IRB)/Independent Ethics Committees (IECs) and/or regulatory authorities before it is included in a revesed IB.

Generally, the sponsor is responsible for ensuring that an up-to-date IB is made available to the investigator (s) and the investigators are responsible for providing the up-to-date IB to the responsible IRB/IECs. In the case of an

investigator sponsored trial, the sponsor-investigator should determine whether a brochure is available from the commercial manufacturer. If the investigational product is provided by the sponsor-investigator, the he or she should provide the necessary information to the trial personnel. In cases where preparation of a formal IB is impractical, the sponsor-investigator should provide, as a substitute, an expanded background information section in the trial protocol, as a the minimum current information described in this guideline.

2. General Considerations

The IB should include:

- Title Page

This should provide the sponsor's name, the identify of each investigational product (i.e., research number, chemical or approved generic name , and trade name (s) where legally persissible and desired by the sponsor), and the release date. It is also suggested that an edition number, and a reference to the number and date of the edition it supersedes, be provided. An example is given in Appendix 1.

- Confidentiality Statement

The sponsor may wish to include a statement instruction the investigator/recipients to treat the IB as a confidential document for the sole information and use of the investigator's team and the IRB/IEC.

3. Contents of the IB

The IB should contain the following sections, each with literature references where appropriate:

3.1. Summary

A brief summary (preferably not exceeding two pages) should be given, highlighting the significant physical, chemical, pharmaceutical, pharmacological, toxicological, pharmakinetic, metabolic, and clinical information available that is relevant to the stage of clinical development of the investigational product.

3.2. Introduction

A brief introductory statement should be provided that contains:

- Investigational product name (generic and trade name (s) when approved)
- Physical property
- Component in a human single dose:

+ Active ingredients.
+ Excipients (if used)
+ Preservative (if used)
+ Stabilizer (if used)

- Indications
- Considering indications (if any)

- Contra-indication (if any)
- Interactions (if any)
- Presentation
- Storage and delivery
- Shelf life

Finally, the introductory statement should provide the general approach to the followed in evaluating the investigational product.

3.3. Nonclinical studies

The results of all relevant nonclinical studies as specific safety, general safety, potency, immunogenicity, pyrogen … should be provided in summary form. However, application of nonclinical trial should be depended on substance of each vaccine.

This summary should provide used method, result and their comparison with permitted specifications (if available).

- General requirements for all clinical trials:
  + Species tested
  + Species of animal
  + Number, sex, old, weight of animals in each group
  + Unit dose: immunological dose, route.
  + Total immunological dose
  + Dose interval (if vaccine with schedule of more than 2 doses)
  + Route of administration
  + Duration of post-exposure follow-up
  + Results, including the following aspects:
    - Method of result assessment: the specifications of assessment will be different basing on each trial, e.g., health status, weight, temperature, specific symptoms…
    - Time to onset and duration of symtoms
    - Specific result of investigational products
      - Substance and frequency of pharmacology or toxic effects.
      - Severity or sensitivity of pharmaxological and toxic effects.
      - Time to onset of effects
      - Reversibility of effects
      - Duration of effects
      - Dose response

The following sections should discussion the most important findings from the studies, including the dose response of observed effects, the relevance to humans, and any aspects to be studied in humans. If applicable, the effective and nontoxic dose findings in the same animal species should be compared (i.e., the therapeutic index should be discussed). The relevance of this information to the proposed human dosing should be addressed.

a) Nonclincal Pharmacology:

A summary of the pharmacological of the investigational product and, where appropriate, its significant metabolites stidied in animals, should be included. Such a summary should incorporate studies that assess potential therapeutic activity (e.g., efficacy models, receptor binding, and specificity) as well as those that assess safety (e.g., special studies to assess pharmacological actions other than the intended therapeutic effect (s)).

b) Pharmacokinetics and Product Metabolism in animals:
A summary of the pharmacokinetics and biological transformation and disposition of the investigational product in all species studied should be given. The discussion of the findings should address the absorption and the lical and systemic bioavailability of the investigational product and its metabolites, and their relationship to the pharmacological and toxicological findings in animal species.
c) Specific safety
- Determine reviving ability of vaccine attenuated strains.
- Detemine inactivation of inactivated vaccines.
- Determine inactivation and reviving ability of toxoid.
If investigational vaccine is proposed to trial on different administrations, safety and toxic studies in proper animal are required.
c) General safety
General safety trial should conduct following with WHO requirement for each vaccine which orgines from bacteria and virus.
d) Potency and immunogenicity
- Potency: summary of toxicology in relavant studies should be described as following titles:
  + Single dose
  + Booster dose
  + Oncology
  + Specific studies (e.g., anaphylactic, allergic…)
  + Toxic on reproduction
  + Genetic change

- Effects in Humans:

Introduction:
A thorough discussion of the known effects of the investigational product (s) in humans should be provided, including information on pharmacokinetics, metabolism, pharmacidynamics, dise response, safety, efficacy, and other pharmacological activities. Where possible, a summary of each completed clinical trial should be provided. Information should be provided regarding results of any use of the investigational product (s) other than from in clinical trials, such as from experience during marketing.

The potency trial can conduct during time of vaccine development. There are many different method to conduct the potency trial. The best is challenge method (e.g., rabid vaccine, pertussis vaccine..). An other method can be

used is seroconversion determination. However, chemical property assessment can be acceptable with vaccine which their antigen is polysaccharide.

Nowaday, potency trial in living organism intends to be replaced by in-vitro testes when the knowledge of immunogenicity and protection of vaccine is increasing.

- Immunogenicity:

Data of immugenicity studies on animal model can support to select dose, schedule, route which will assess in the clinical trial. Nonclinical trial should be designed to assess relevant immuno respond, e.g., seroconverion rate, GMT, cell-mediated immuno respond in the animals. In case vaccine contains many antigents, the trial of immunogenicity should be conducted in each kind of antigen. Although immunogenicity is necessary during time of vaccine development, it is always not a specification for release (e.g., conjugated Hib vaccine).

- Pyrogen: This trial is conducted following WHO requirement
- Some other remarkable aspects:

+ Adjuvant: Adjuvant used in vaccine must be obtained with national pharmacopie requirement and do not have unexpected reaction. The evidence of interaction between adjuvant and antigen should be provide (can use result of studies which were conducted in the past). In case of adjuvant is new without toxic studied data, it must study toxicology for such adjuvant firstly. Nonclinical study should assess the combination between adjuvant and antigen when they are formulated and became vaccine.

+ Excipient and preservative: If these material are new for use, the toxicology study of each material is required.

+ Some vaccine should be notified:

Combined vaccine: The combination of antigen or sero type should be studied about immunogenicity in animal model before its clinical trial is conducted. Combination assessment by comparing between separated antigens in animal to determine immuno respond is the best way.

The interfere between the live vaccine strains should be studied on immunogenicity in animals.

- ADN vaccine: base on guildance of WHO on assessment the quality of ADN vaccine to conduct the pre-clinical assessment

- recombinant vaccine: Base on guildance of WHO on assessment the quality of recombinant vaccine to conduct the pre-clinical assessment

- peptit synthetic vaccine: Base on guildance of WHO on assessment the quality of peptit synthetic vaccine to conduct the pre-clinical assessment.

- Live attenuated vaccine: The major concerns for this type of vaccine is the ability to recover the toxic, transmit and exchange the genetic information which apply on wild strains or other biological strains. Results to recongnise the attenuated strains should be indicated (genetic order). It can be continue to use in the clinical study to monitor the results of eliminated agents and duration of all stages of clinical assessment. OPV vaccine (Oral Polio Vaccine) is a typical example for attenuated vaccine.

a) Pharmacokinetic and metabolism agents in animals.

It is necessary to summary the information on pharmacokinetic of investigations drug (s) including the below information, if any:

Pharmacokinetic (include metabolism, aborbtion, binding ability with plasma protein, distribution and eliminate)

Bioavailibility of investigational drug (abolutely, relatively) which use other dosage form to control.

The sub population (for example sex, age, function of organization will be impaired)

Interation (for example the interaction between the products and affects by food)

Other pharmacokinetic (for example the results from population which conducts in the frame of clinical studies).

b) Safety and Efficacy

It is necessary to provide the summary of information of safety of investigational drug (include the metabolized agents if have), pharmacokinetic, efficacy, dosage respond which had in previous studies in human (in healthy volunteer and/or patients). The raising matters from this information should be exchanged. In case when several clinical studies were completed, the usage of summary information on safety many times through the indications in sub-population also brings the benefit to make data clearly. Summary by tables about adverse events in clincal studies (include the indications which were studied)

The major differences between forms/hypersensivity in these indications or in sub-group should be exchanged.

IB need to provide the description about risks and anaphylactic shock that can be occured in order to estimate which base on the previous experiences of investigational drug and relevant product. It is necessary to provide the

description about precautions or special follow up as a part of investigational vaccine.

c) Advertisement

IB should be clearly state the countries which investigational vaccine were advertised or approved. Any significant information which arise from usage of vaccine in market should be summary (for example the way to prepare the vaccine, dosage and route of administration and adverse events of investigational vaccine). IB should be clearly state the list of countries which not approve for investigational vaccine or withdraw from market/registration.

- *Summary the data and instructions for investigators.*

This section should provide, exchange the pre-clinical data and clinical data and summary the information from different sources on different aspects of investigational drug (s). Follow this way, investigator should be provided the explainations which consistent with available data and the treatment with information arise from future clinical study.

If can, the document which public for relevant product should be exchanged. It will help the investigator to know the anaphylactic shock or other matters in the clinical study.

The overall objectives of this section will provide the investigators more clear about risks and anaphylactic shock can be occured, and for detail experiments, obsevations and precautions that needed in the clinical study for investigational drug. It is necessary to have guildance for clinician investigator about the way to recognize and treatment when overdosage and adverse events can be occured on human base on experiences and characteristic of investigational drugs.

APPLICATION FOR CLINICAL TRIAL

To: Ministry of Health
(Department of Science and Training)

Full name of Principal Investigator:

ID or Passport number:

Presidential organization:

Office address:

Tel: Fax:

Email:

Account number:

Would like to request Ministry of Health to consider and approval for conducting the clinical trial:

◊ Name of drug

◊ Batch Number

◊ Strength

◊ Content

◊ Dosage form

◊ Route of admistration

◊ Shelf life

Classification:

◊ Western Medicine

◊ Oriental Medicine

- ◊ Vaccine
- ◊ Bio-pharmaceutical product

Request to conduct of clinical trial on the stage

Or propose to conduct of clinical trial from stage... to stage

The clinical trial for said drug was finished on the stage

Accompanied documents

Request the Ministry of Health considers and permit the above drug to be conducted clinical trial.

Principal Investigator and Presidential agency (The organization accept to conduct the clinical trial) commit to implement the ethics principles which stated in the protocol endorsed by Ministry of Health in right way.

Principal Investigator

Head of Presidential Agency (Organization accept to conduct the clinical trial)

Signed and sealed.

Ministry of Health
THESIS OF THE CLINICAL TRIAL

I. General information of clinical trial

1. *Title*	**2**. *Code*
3. *Time of conducting* (From..../200.. to ..../200..)	**4**. *Under management of* State leve ☐ Ministry/ Local ☐. Province
5. *Expense* Total: In which, from SNKH national budget: From other sources: please indicate resource's name	
6	The study applying for conducting the clinical trial on state (please indicate) ☐ Or proposing to conduct clinical trial on the stages (please indicate) ☐
7 *Principal Investigator* Full name: Academic tilte/Diplomas: Scientific title: Tel: (Office)/ (Home phone) Fax: Mobile: E-mail: Office address: Home address:	
8 *Presidential entity (Agency, organization accept to conduct the clinical trial)* Name of agency, organization: Tel: Fax: E-mail: Address:	

9	*Agency or individual who order the clinical trial (the agency that is permitted to use the copyright of the products to be subjected to clincal trial and the clinical trial result in order to manufacture or to use such products or to conduct the trial on the next stage)*

Name of organization:

Tel: Fax: E-mail:

Office Address:

Name (in case the individual orders):

Academic title/Diplomas:

Scientific title:

Tel: (Office)/ (Home) Fax:

Mobile:

E-mail:

Office address:

Home address:

Note:

In case the organization and individual need to interpret or supplement some section in this thesis, it may be longer, number of pages is not limited

II. Content of clinical trial

(To clarify the sections in accordance with the regulation on Clinical trial Regulations and the content of Experimental stages)

10	***Objective of the study***

11	***Background of the domestic/foreignes studies***

- Overview of the studied products

- Overview of the study of clinical trial

Foreign:

Domestic:

12	***Method of approaching, studying contend and technology to be used: indicate the method of approaching, study's design, method for selecting sample, size of samples, standard for selecting trial object, method of studying, technology to be used, standard operating procedures (SOPs) for each of technology that will be used in study – compre those with similar methods, quota of the study, the unique, the inventive step of the study design and method of studying)***

12.1 Place of study

12.2 Duration of study:

12.3 Method of study: Describing the type of study (random, blind, open), study's design (parallel group, capture technique), blind technique (single blind and double blind), and method and procedure to choose randomly.

12.4 Study's objects: Describing the objects of study (selected standards and exclusion of potential subjects), standards operating procedures (SOPs) applying for selection the objects who participate in the study: method, standards and time to indicate the subjects in studying groups.

12.5 Sample size: The quantity of subjects need to meet the objective of the study, which base on statistical mathemetic.

12.6 Schedule to use the investigational products: Build up the standard operating procedures (SOPs): Describing and detail the route for use, dosage, interval and treatment duration applying for investigational products and compared products. Person who has responsibility for technology, procedure for use the drugs. The criteria for monitor and assessment. The relationship of responded dosage should be intersted.

12.7 Spontaneous treatment: Any other treatments were identified and allowed to use spontaneously.

12.8 Usage testing: Develop the Standard Operating Procedures (SOPs): The clinical and

laboratory testing, pharmacological analysis,... testing will be implemented. Responsible people, procedure to take samples, storage, technical. The criteria for assessment, compare the results.

12.9 Assessment the side effects level: Describe the procedure how is a respond will be recorded (describe and assess the method and frequent of measure), process to monitor and measure to identify the compliance with treatment among the subjects.

12.10 Exclusived criteria of subjects in the process of study: Exclusived criteria for subjects and instructions on complete the whole study or a part of a study.

12.11 Record and report the adverse events: The method to record and report the cases of adverse events, relevant provisions relate to compliance.

12.12 Technical of blind and protect the identification of participated subjects: The procedures to maintain the list of identificated subjects, treated dossier, randomized list of subjects and/or case report forms (CRFs). The dossier must allow to identify the patients or parcipated subjects seperately as well as check and restructure the data.

12.13 Rules for open the code: Information on set up the code of the study, place to storage the list and who, when and how open the code in urgent cases.

12.14 Storage the investigational drug: Method will be implemented to ensure the safety of packaging and storage of investigational drugs and comparable products if use, and speed up and identify the compliance with the treatment and other guildance.

12.15 Method for assess the results: Describe the method which used to assess the results, (include the statistical method) and report of patients or subjects who will withdraw from study.

12.16 Method for handle the adverse events

12.17 The way to provide information for subjects: Information should be described for participated subjects, including how they will be provided information about the study, how and when collect their agreement.

12.18 Training for group of study: Training for group of study who participate in the clinical study (include Principal Investigator, Branch Principal Investigator, coordinate investigators, investigators, Pharmacist, nurse, technician): Basic content on the study, information of the way to conduct the study, standard operating procedures (SOPs) and procedures to manage and use the drugs.

12.19 Ethical matters: Precautions and methods of ethics relate to the study.

12.20 Caring the health of subjects after participate in the study: Caring the health of subjects after participate in the study should be provided, scheme of treatment after complete the study.

12.21 Plan of implementation

12.22 Plan of monitor, audit, inspection:

- Monitor the Principal Investigator and group of study
- Monitor of sponsor
- Monitor and audit of inspectors from competent authorities, Ethics Committee.

Contents of ethics in bio-pharmaceutical research:

(Include: Information about the study, informed consent form, agreement to implement the instructions on ethics in study)

13	***International co-operation***

Content of co-operation	Name of partners

(Form of Clinical trial agreement)

SOCIALIST REPUBLIC OF VIETNAM
Independence – Freedom - Happiness

…….,date.....month.....year

CLINICAL TRIAL AGREEMENT

Legal basis: .....

Base on demand and capability of relevant parties:....

Representative of party A (Agency, organization, individual) who have drus to be subjected to clinical trial:

Full name: (Individual or Representative of Organization, who register for clinical trial:

Position:

Address: Office or private house (as to individual)

Tel:

Fax:

Email:

ID number or Passport number:

Representative of the party B (Agency, Organization who accept to conduct the clinical trial)

Full name: Individual and Representative of organization who accept to conduct the clinical trial:

Position:

Address (as to agency and Organization):

Tel:

Fax:

Email:

Together wish to enter into this clinical trial agreement for the drug product (product's name, concentration, content, formulation, route of administration, classification, indication, treatment, dosage and usage)

Request to conduct of clinical trial on the stage:

Or request to conduct of clinical trial from the stage.....to stage

Or request to conduct the assessment the tolerbility on Vietnamese people

With the following content:

1- Content of Agreement

2- Time and Schedule

3- Expenditure

4- Obligations of the Parties

5- Right of Parties

6- Common Regulations

Representative of the Party A	**Representative of the Party B**
(Signed. Stamped or certified by Local People's Committee where the invidual resides (in case of individual)	*(Signed and sealed)*

Annex 6

INFORMED CONSENT FORM

(including the provided information form and informed consent form)

Name of study:

Version: ICF Date …../…../……...

Name of sponsor:

Subject's code: ……

This document was informed to all participated subjects adequately, not omit any pages or any items. This content of the document should be explained clearly by oral to participated subjects.

1. Describle all matters related to the study

   Objectives of the study

   Estimated time

   Method of conducting (detail all contents will be conducted)

2. Inclusion criteria the subjects into the clinical trial
3. Exclusion criteria the subjects in clinical trial
4. Who will be person to assess the private information and medical information to select the subjects to participate the study?
5. Number of subjects will participate the study
6. Describe the risk and disadvantages
7. Describe the advantages of subjects or other people
8. Expenditures will be paid in the study
9. Publication the methods and alternative treatments
10. Describe the filing dossier confidentially but can regconise the title

11. Clearly point out the competent authorities that can check the dossier of subjects

12. Compensation / medical treatment if occurs the injuries (Where can have other information)

13. Person to contact when have the questions relate to

- The study
- The rights of subjects
- In case of having injuries relate to study

It is necessary to state that participation in the study is volunteer, not to be punish if refuse to continue to participate in the study at any time without lacking the rights.

Signature of volunteer subjects

Date of signing the consent form

Informed consent form

I,

_____

verified that

- I have read the information provided for the field trial..... .....at....., ICF version.....date...../...../....., page).....and I have been explained by investigators about this study as well as the procedures to volunteer the study.
- I have chances to ask all questions relate to this study and I satisfy with answers and explainations.
- I have time and chance to consider the ability to participate the study.
- I understood that I have rights to access the data provided in information sheet by responsible people
- I understood that I can withdrawn the study at any point with any reasons.

I agreed that our main doctors who take care my health will be informed the participation of myself in this study.

Tick in appropriate place (this decision will not affect on ability of yourself to participate in the study):

Yes	**No**

I agree to participate in this study:

Signature of subject …….....…	Date/month/year …….....……
If needed,	
* Signature of witness …….....…	Date/month/year …….....……
* Full name of witness …….....…	
Signature of guildance person …….....…	Date/month/year …….....……
Full name of guildance person …….....…

TABLE OF STUDYING SUMMARY

Cover page 4

ABBREVIATED WORDS

Cover page 5

CONTENT

THE NEEDED CONTENT IN THE SUMMARY REPORT

1) **Rationale**
2) **Objective of the study**
3) **Plan of the study**

3.1- Plan and design of study
3.2- Discussion on design of the study, slection of placebo
3.3- Selection the subjects of study (population) (inclusion, exclusion criteria, criteria to remove the participation of subjects or assessment)
3.4 Investigational products
3.5 Ensure the quality of data
3.6 Statistical method which is mentioned in the protocol and identification the sample size
3.7 Changes when conduct the study and analysis follow the plan.

4) **Subjects who participate in the study (patients/volunteer)**
   a) The situation of patients who participate in the study
   b) Errors compare with the protocol

5) **Assessment the efficacy**

5.1- Data is analized

It is necessary to identify these patients who will be used in the analysis for efficacy correctly, and these cases will be eliminated, reasons.

5.2- Characteristic of anthropology and the other basic features

Establish the summary table the characteristic of anthropology of each patient.

5.3- Identify the suitable of investigational drug

Summary and analysize any result which assess the suitable of each patient with dosage scheme in the study such as concentration of drug in biological solution according to the time

5.4- Treatment efficacy and data table for each patient

i) Efficient analysis
ii) Analysis/statistic
iii) Set up the data table of responde for each patient
iv) Dosage, concentration and relationship with respond
v) Interactions drugs-drugs, drugs-patients
vi) Describe the data of each patient
vii) Conclusion about the efficacy
viii)

6. Safety Assessment

Analysis the data relate to the safety which was mentioned on 3 levels:

- Exposed level (dosage, duration of usage, quantity of patients) will be checked in order to identify the safy level of investigational drug.
- Adverse events will be occurred in more common frequent or testings or changes will be identified, as well as the factors affect to frequent of ADR and undersirable effects.
- Serious undersirable effects, significant undersirable effects which common occurs in patients which withdraw from study before term or death patients although these advents relate or not to the investigational drugs.

7. Exposed level

Exposed level with investigational drugs (and controlled drugs or placebo) will be needed to assess according to the quantity of used patients, usage interval and dosage level.

8. Adverse events (AE)

Summary about AE
Describe the AE
Analysis the AE
List the AE for each patient

9. Deadth and other serious AE

List of deadth and other serious AE
Report the cases of deadth, serious AE and symptoms of the other AE
Analysis and discussion on deadth and other serious AE

10. Testing assessment

List down the testing value of each patient (annex) and abnormal value
Assessment each of testing parameter

11. Survival signals, physiological symptoms and other observations relate to the safety.

Analysis the survival signals, physiological symptoms and other observations

12. Safety conclusion

Summary about the safety of investigational drugs, especially focus on the changes of dosage, AEs lead to stop using, interfere of medical method or deadth….

13. Discussion and Conclusion

General assessment on the efficacy and safety of investigational drugs, relationship between the risks and benefits.

14. Table, diagram and related graph

15. List of reference document

16. Annex

List down the annex which have in the report

PROCESS OF APPROVAL, REVIEW DOSSIER FOR CLINICAL TRIAL

MINISTRITY OF HEALTH	REPUBLIC SOCIALIST OF VIETNAM
No: 03/2012/TT-BYT	**Independence – Liberty - Happiness**

Hanoi, 02 February 2012

CIRCULAR
Guidelines for Clinical trials on Drugs

Based on the Law on Pharmacy of 14.6.2005 and Decree No. 79/2006/ND-CP dated 09/08/2006 guiding implementation of some provisions of the Law on Pharmacy;
Pursuant to Decree No. 188/2007/ND-CP dated 27/12/2007 of the Government regulating functions, duties, powers and organizational structure of Ministry of Health,
The Ministry of Health provides the following guidelines for clinical practice for trials on Drugs:

Chapter I
GENERAL PROVISIONS

Article 1. Scope

This Circular provides guidelines for drugs subject to clinical trials, drugs exempt from full clinical trials, drugs exempt from some phases of clinical trials, conditions applying to the conduct for clinical trials; registration, review and approval of clinical trials, phases of clinical trials, rights and obligations of related parties and the supervision, inspection, evaluation for acceptability of clinical trials in Vietnam for research purposes and the marketing authorization of pharmaceuticals, biologics, vaccines and oriental medicines, drugs made of medicinal materials, used in the diagnosis, treatment and prevention of disease in humans (hereafter referred to as Drugs)

Article 2. Interpretation of terms
In this Circular, the following terms are construed as follows:

1. Reference country is any country among the UK, France, Germany, USA, Japan, Australia, Canada or the European Medicines Agency (EMA).

2. A multi-center clinical trial is a trial conducted in two or more research centers to ensure the inclusiveness of participants and demographic, anthropologic diversity.

3. Agencies, organizations, individuals having the candidate drugs are agencies, organizations and individuals with a mandate for research, production, import, export, distribution of medicines which are in need to undertake clinical trials on their drugs.

4. Host institutions (in receipt of the trials) are medical establishments with a mandate for scientific research, with functionally qualified personnel, premises, facilities and equipments to carry out clinical trials and which are appraised, authorized by the Ministry of Health to do so.

5. Trial subjects are patients or healthy individuals who participate voluntarily in clinical trials.

6. Clinical Research Organization (Contract Research Organization CRO) is an organization with legal status, with appropriately qualified personnel meeting Ministry of Health's requirements, is independent from the Agencies, organizations, individuals owing the candidate drug(s), which is contracted by the latter to perform trial-related duties the like of writing research protocol, trial monitoring, data analysis.

7. Site Management Organization (SMO) is an organization with legal status, functionally qualified in accordance with Ministry of Health's requirements, is independent from Agencies, organizations, individuals having the candidate drug(s) or the Host institution, which is contracted by either of the latter two entities to perform duties in support of the management of the trial site.

8. Foreign clinical data are methods and results of clinical studies which have been undertaken abroad.

9. Ethnic factors are factors related to large population with common genetic characteristics, culture, traditions and environment.

10. International regulations for clinical trial on drugs recognized by the Health Ministry are guidelines for good practices for clinical trials of jurisdictions party to the The *International Conference on Harmonisation* (*ICH*) and Guidelines for good clinical practice for trials on pharmaceutical products (Good Clinical Practice - GCP) of the World Health Organization (WHO).

Article 3. Principles of clinical trials

1. Clinical trials shall be conducted in accordance with the provisions of this Circular, regulatory requirements on science and technology, good clinical practice for trials on drugs and international treaties to which Vietnam is a signatory.

2. Selection of trial subjects shall be in compliance with ethical principles for biomedical research.

Article 4. Prohibited Acts

1. Conduct clinical trials without Ministry of Health's authorization.

2. Unilaterally amend, supplement the content of drug dossiers, research protocols after they have been approved by Ministry of Health.

3. Use the drug(s) under clinical trials for other purposes.

4. Coerce subjects into participating in trials or withhold information from, or not provide information as required to trial subjects.

Chapter II
DRUGS SUBJECT TO CLINICAL TRIALS, DRUGS EXEMPT FROM FULL CLINICAL TRIALS AND DRUGS EXEMPT FROM SOME PHASES OF CLINICAL TRIALS

Article 5. Drugs which are subject to full clinical trials

1. Pharmaceutical products, biomedical products:

a) Pharmaceuticals that contain a new active ingredient or products with new combination of a marketed ingredient.
b) Newly developed biologics or biologics with a new combination of a marketed ingredient.

c) Pharmaceuticals, biologics which have been legally marketed but for a period of less than 5 years in the country of origin (or a country of reference if provided for under international treaties to which Vietnam is a signatory).

d) Pharmaceuticals, biologics for which a clinical trial has been conducted before the effective date of this Circular but which has not met the requirements of Ministry of Health's good practice for clinical trials or those of international guidelines on good clinical practice for trials on medicines recognized by Ministry of Health.

2. Vaccines:

a) Newly developed vaccines, manufactured and put to use for the first time.

b) Foreign vaccines which have been legally marketed but for a period of less than 5 years in the country of origin (or a reference country if provided for under international treaties to which Vietnam is a signatory).

c) Vaccines for which a clinical trials has been conducted before the effective date of this Circular but which has not met the requirements of Ministry of Health's good practice for clinical trials or those of international guidelines on good clinical practice for trials on medicines recognized by Ministry of Health.

3. Oriental medicines or drugs made from medicinal materials:

a) Drugs containing new ingredients which are first used in humans.

b) Drugs for which a clinical trial has been conducted before the effective date of this Circular but which has not met the requirements of Ministry of Health's good practice for clinical trials or those of international guidelines on good clinical practice for trials on medicines recognized by Ministry of Health.

Article 6. Drugs which are exempt from clinical trials

1. Pharmaceutical products, biological products

a) Pharmaceutical drugs with non-proprietary name (Generic drugs).

b) Foreign drugs for which a registration number for marketing in Vietnam has not been granted but which have been legally marketed for at least 5 years in the country of origin (or a country of reference if provided for under international treaties to which Vietnam is a signatory) and which have been certified as safe and effective by the respective country's competent authority, for the same route of administration, formulation and indications with those intended for use in Vietnam.

c) Foreign drugs for which a registration number for marketing in Vietnam has been granted, but have undergone modifications or supplementations in relation to indications, route of administration, dosage forms identical with those of the same drugs which have been legally marketed in the country of origin

for at least 5 years (or a reference country if provided for by international treaties to which Vietnam is a signatory).

2. Vaccines:

a) Foreign vaccines with a valid registration number for marketing in Vietnam, which are imported into Vietnam for the final step of labeling, packaging.

b) Re-registration of vaccines in Vietnam due to expiry of existing marketing registration number without the vaccines undergoing any modification.

3. Oriental medicines, drugs made of medicinal materials:

a) Oriental prescriptions which have been recognized by the Health Ministry.

b) Oriental medicines, drugs made from foreign medicinal materials for which a registration number for marketing in Vietnam has not been granted but which have been legally marketed for at least 05 years in the country of origin (or reference country if provided for under international treaties of which Vietnam is a signatory) and which have been certified as safe and effective by the respective country's competent authority for the same route of administration, formulation and indications with those intended for use in Vietnam.

Article 7. Drugs which are exempt from some phases of clinical trials

1. Pharmaceutical products, biological products:
Foreign drugs for which a registration number for marketing in Vietnam has been granted but have undergone modifications or supplementations in relation to indications, route administration, dosage forms different from those of the same drugs which have been legally marketed for at least 5 years in the country of origin (or a country of reference if provided for under international treaties to which Vietnam is a signatory). These drugs are subject to:

a) Clinical trials for the assessment of safety;
b) Clinical trials for the assessment of effectiveness if this has not been performed before or if the assessment has been performed but it failed to meet the requirements of Ministry of Health's good practice for clinical trials or those of international guidelines for good clinical practice for trials on medicines recognized by Ministry of Health.

2. Vaccines:

Clinical trials for the assessment of safety shall be conducted for:

a) Foreign vaccines for which a registration number for marketing in Vietnam has not been granted, which have been legally marketed for at least 05 years in the country of origin (or reference country if provided for under international treaties to which Vietnam is a signatory) and which have been certified as safe and effective by the respective country's competent authority for the same route of administration, formulation and indications as those intended for use in Vietnam.

b) Vaccines manufactured in Vietnam from imported semi-finished products with components having been legally marketed for at least 5 years in the country of origin (or a country of reference if provided for under international treaties to which Vietnam is a signatory).

c) Vaccines for which a registration number for marketing in Vietnam has been granted but which have undergone modifications or supplementations in relation to excipients, preservatives, changes in production facilities (no change in production processes).

Clinical trials for the assessment of safety and immunogenicity in phase 3 shall be conducted for:

a) Foreign vaccines which have been legally marketed for at least 5 years in the country of origin (or a reference country if provided for under international treaties to which Vietnam is a signatory) for which manufacturing technology is transferred to Vietnam.

b) Vaccines manufactured in Vietnam from imported intermediates with components having been legally marketed for at least 5 years in the country of origin (or a country of reference if provided for under international treaties of which Vietnam is a signatory).

a) Vaccines for which a registration number for marketing in Vietnam has been granted but which have undergone modifications or supplementations in relation to manufacturing process, dosage forms, indications, target population (age, sex, race), route of administration, dosage, vaccination schedule.

3. Oriental medicines, drugs made from medicinal materials:

Clinical trials for the assessment of safety shall be conducted for:

Drugs for which a registration number for marketing in Vietnam has been granted and other oriental prescriptions recognized by the Ministry of Health but which have undergone modifications or supplementations in relation to indications, route of administration, formulation, dosage forms different from those of the same drugs which have been legally marketed for at least 05 years in the country of origin (or reference country if provided for in international treaties to which Vietnam is a signatory).

Article 8. Clinical trials in special cases involving health security emergencies

Minister of Ministry of Health with advice from the Advisory Council for Marketing Licensing and the Ministry of Health Biomedical research Ethics Committee shall consider and grant exemption from clinical trials for the following cases:

:

1. Drugs for use in special cases relating to emergency health security including:

a) Pharmaceuticals, biologics, vaccines which have been legally marketed but for a period of less than 5 years in the country of origin (or a reference country if provided for under international treaties to which Vietnam is a signatory), for which clinical trial data from multicenter trial conducted in Vietnam and Asia is available, of which safety and effectiveness have been proven by trial results for the same formulation, indications, route of administration with those in use in the respective country.

b) Pharmaceuticals, oriental medicines or drugs from medicinal materials which meet special therapeutic demands, which are listed in the list of rare drugs published by Ministry of Health, with particular dosage forms not yet manufacturable domestically, for which no substitute is available, without which patients' life would be compromised, for which a registration number for marketing in Vietnam has not been

granted, which have been legally marketed in the country of origin but for a period of less than 5 years (or country of reference if provided for under international treaties to which Vietnam is a signatory) and which have been certified as safe and effective by the respective country's competent authority for the same route of administration, formulation and indications as those intended for use in Vietnam.
c) Vaccines for use in the prevention of emerging infectious diseases of yet to be known pathogen or deadly highly infectious diseases capable of rapid and wide scale spread with high mortality rate, for which a registration number for marketing in Vietnam has not been granted, which have been legally marketed in the country of origin but for a period of less than 5 years (or a reference country if provided for under international treaties to which Vietnam is a signatory) and which have been certified as safe and effective by the respective country's competent authority for the same route of administration, formulation and indications as those intended for use in Vietnam.

2.. Drugs which are products resulted from research projects, research grants of ministerial equivalent or higher level, which were conducted prior to the effective date of this Circular in strict compliance with provisions of this Circular and guidelines on good clinical practice for trials, which have been evaluated for acceptability and authorized for marketing by the ministerial equivalent or higher level council of science and technology.

Chapter III
CONDITIONS FOR CLINICAL TRIALS

Article 9. Conditions which apply to investigational drugs (*)

(*) translator note:– not clear whether "Thuốc thử trên lâm sàng" covers all investigational drugs used inthe trial only the candidate drug.

Investigational Drugs shall meet the following requirements:

1. Pre-clinical studies on the drugs have been conducted, for which safety has been proven and documented making the drugs eligible for progressing to the next trial phase.

.
2. Formulation, dosage forms and manufacturing process of the drugs have been stabilized.

.
3. Availability of results of previous phases of the clinical trial on the drugs if the application is for the authorization to progress to the next phase.

4. Meeting quality standards as stated in the dossier for the registration of clinical trials.

5. Investigational Drugs shall be clearly labeled with the wordings "Products for clinical trials. Use for other purposes is prohibited"

Article 10. Conditions which apply to the clinical trial dossier

Dossier for registration of clinical trial shall be in Vietnamese (01 original, legally signed, sealed and 03

copies), comprising of:

1. Application for authorization to conduct a clinical trial by the agencies, organizations, individuals having the candidate drug(s) (Appendix 1 attached to this Circular).

2. Investigator's brochure in Vietnamese or in English accompanied by a summary in Vietnamese (Appendix 2 of this Circular).

3. Application requesting for review, approval of the trial protocol by the Host institution (Appendix 3 of this Circular).

4. Agreement between Agencies, organizations, individuals having the candidate drugs and the Host institution and Agreement between Agencies, organizations, individuals having the candidate drugs and the Contract research organization, the Site management organization, if applicable (Appendix 4 of this Circular).

5. Explanatory Notes to the trial protocol (Appendix 5 of this Circular).

6. Professional Curriculum Vitae and Certificate of good practice on clinical trial of the Principal investigator/Chief researcher issued by Ministry of Health or other agencies recognized by Ministry of Health.

7. Clinical trial Information sheet and the Informed Consent form (Appendix 6 of Circular).

8. Minutes of the local (Host institution) Biomedical research Ethics committee's opinion on the scientific aspects and ethical considerations of the clinical trials.

9. Written confirmation of participation by the participating research institutions in case of multi-center trials conducted in Vietnam.

10. Notice by the people's committee of provinces, cities reporting to central government, accepting to participate in the clinical trials which take place in their respective localities.

11. Documentation on the investigational drugs(s) comprising of:

a) Documentation on investigational drugs: composition, formulation, manufacture processes, quality standards, drug testing slips (for pharmaceutical drugs, oriental medicines or drugs from medicinal materials: testing slips by the central testing agency or manufacturers meeting good manufacturing practice standards (GMP); for vaccines: quality certificate by national quality control agency or ex-factory delivery certificate by respective national drug regulatory agency for imported vaccine lots, biologics).

b) Documentation of pre-clinical studies of investigational drug on pharmacology, toxicology, safety and proposed dosage, route and method of administration.

c) Documentation of the preceding phases of the clinical trials (if application is for the authorization to progress to the next phase of the trials)

.
12. For investigational drugs which are candidate of safety assessment, clinical trial phase 4: A certified copy of the certificate of pharmaceutical product (CPP) or free sale certificate (FSC) and certificate of good manufacturing practice (GMP) of the respective state regulatory authority.

13. Labels of investigational drugs as stipulated in Clause 6 Article 9 of this Circular and photographs of the drug samples.

Article 11. Conditions which apply to Host institutions, the Principal investigator and participating investigators

1. Host Institutions shall satisfy the standards of good clinical practice for trials on pharmaceutical products (GCP), be independent financially and with respect to personnel from Individuals, organizations having the candidate drugs and shall undertake to carry out the trials free from any conflict of interests.

.
2. The Principal investigator shall be qualified with in depth technical knowledge, clinically experienced, operationally competent to ensure compliance with the principles of good clinical practice, be thoroughly familiar with the requirements of clinical trials, be capable of implementing the trial as per the approved protocol in full and to schedule, be GCP certified by the Ministry of Health or organizations recognized by the Ministry of Health.

3. The participating investigators shall have appropriate expertise, be trained on the subject matter and skills necessary for the conduct of the trials, be GCP certified by Ministry of Health or other organizations recognized by Ministry of Health.

Article 12. Conditions for trial subjects

1. Trial subjects shall be volunteers meeting the needs of the trial, shall sign an informed consent with the Host institution, except when s/he is restricted in his or her civil act capacity, has lost his or her civil act capacity or is without civil act capacity.

2. Where the trial subject is under 18 years old, is restricted in his or her civil act capacity, has lost his or her civil act capacity or is without civil act capacity, consent shall be obtained from the representative in accordance with the law.

3. Where trial subject is a woman who is pregnant or breast-feeding, the rationale for the selection of the subject shall be given in the Investigator's Brochure, be approved by Minister of Health with due consideration given to the opinion of the Ministry of Health Ethics Committee for Biomedical research on the scientific and ethical nature of the selection.

Article 13. Conditions which apply to funding of clinical trials

1. Funding shall be sufficient to cover all trial related activities (including budget lines for studies, management fee, supervision, inspection) shall be provided by the Agencies, organizations, individuals having the candidate drugs through contractual agreements between the latter and the Host institution.

2. For drugs which are object of government funded programs, research grants under collaboration with national or foreign entities, the Lead researcher and Host institutions shall budget for the clinical trials as part of the total grant allocated.

3. The Host institution and the Principal investigator shall be responsible for managing their allocated budget to ensure expenditures are appropriate and to cost norms in accordance with relevant regulatory requirements or contractual terms between two parties.

Chapter IV
REGISTRATION, REVIEW AND AUTHORIZATION FOR CLINICAL TRIALS

Article 14. Registration for clinical trials

1. The Agencies, organizations, individuals having the candidate drugs shall submit to the Ministry of Health a registration dossier comprising of documents stipulated in Clause 1, Clause 2, Article 10 of this Circular.

2 Within 15 working days from the date of receipt of registration, Ministry of Health shall give written notice to the Agencies, organizations, individuals having the drug(s) regarding required next steps.

Article 15. Formulating the Trial Protocol

Based on Ministry of Health's written authorization, the Agencies, organizations, individuals having the candidate drugs in conjunction with the Principal investigator and the Host institution shall prepare the Trial Protocol as follows:

1. The Agencies, organizations, individuals having the candidate drugs shall provide the Principal investigator and the Host institution with documents specified in paragraphs 1, 2, 7, 11, 12 and 13, Article 10 of this Circular.

2. The Principal investigator, in conjunction with the Agencies, organizations, individuals having the candidate drugs and members of the research group, shall formulate the Trial Protocol, ensure the dossier's completeness as stipulated by Article 10 of the Circular this.

Article 16. Application for Authorization to conduct clinical trials

1. A clinical trial dossier as stipulated in Article 10 of this Circular shall be sent to Ministry of Health which serves as the basis for the review, consideration and authorization.

2. Dossiers received at the Health Ministry before the 20th of each month shall be evaluated in the same month. Dossiers submitted after this timeline shall be evaluated in the following month.

3. Information regarding registration, preparation and submission of application can be accessed via the Ministry of Health electronic portal www.iecmoh.vn or the Ministry of Health Biomedical research Ethics Committee's web site www.iecmoh.vn.

Article 17. Review and Authorization of clinical trials

1. Review the clinical trial dossier
Within 30 working days from the date of receipt of a complete dossier as stipulated in Article 10 of this Circular, Ministry of Health shall convene a Biomedical research Ethics Committee meeting.

2. Notice of results
Within 15 working days from the date the results of the Biomedical research Ethics committee's review become available, Department of Science and Training shall finalize the dossier and give written notice of results to the Agencies, organizations, individuals having the candidate drugs, the Host institution.

3. Authorization
Within 15 working days after notification of results and completion of supplementary documents (if any), Department of Science and Training shall compile the dossier and submit to Minister of Health for authorization.

Chapter V
PHASES OF CLINICAL TRIAL ON DRUGS AND THE CONDUCT OF CLINICAL TRIALS

Article 18. Phases of clinical trials on pharmaceutical products, biological products

Phase 1:
a) Is the first phase of trials on of a new active ingredient or new formulations in humans (usually done in healthy volunteers).

b) Purpose of phase 1 trials: to establish a preliminary assessment of safety and a first outline of pharmacokinetic and pharmacodynamic profile of the active ingredient in humans.

c) Sample size: shall be considered carefully based on results of preclinical studies, sample size of 10-30 subjects.

Phase 2:
a) Is the phase with trials conducted on a limited number of patients.

b) Purpose of phase 2: to evaluate the therapeutic activity and to assess safety of the active ingredient in patients, to determine the appropriate dose ranges and regimens in order to provide an optimal therapeutic plan for clinical trial.

c) Sample size: a minimum of 50 subjects.

Phase 3:
a) Is the phase with trials conducted in larger number of patients. The conditions under which these trials are carried out should be close to normal conditions. These are often multicenter trials, of randomized, controlled design.

b) Purpose of phase 3: to determine the stability of the formulation, the short and long term safety, effectiveness of the active ingredient, to assess the overall therapeutic value, to investigate any frequent adverse reactions and explore any special features of the products.

c) Sample size: A minimum of 200 subjects.

Phase 4:

a) These are clinical studies performed after the drugs have been marketed. Study designs may vary but the same scientific and ethical standards as in pre-marketing phase shall apply. Purpose of phase 4: clinical trials at this phase are conducted on the basis of product characteristics under which the marketing authorization was granted and normally in the form of post-marketing surveillance, or assessment of therapeutic value or treatment strategies.

c) Sample size: a minimum of 1,000 subjects.

Article 19. Phases of clinical trials on vaccines

1. Phase 1:
a) Is the first phase of small scale trials for the preliminary assessment of new vaccine's safety through information collected on tolerability of the vaccine. Phase 1 is usually performed on adult healthy volunteers, at low risk of infection and complications before it being administered on target recipients.
b) Phase 1 studies are usually open label, non-randomized with a placebo controlled group, can be done on different age and population groups to determine dose range, safety, vaccination schedule, method of delivery .

c) Live attenuated vaccine (virus or bacteria) capable of infecting recipients or contacts should be closely monitored on dosage, clinical signs of infection, immune response (immediate, early and late). Phase 1 trials can provide preliminary information on distribution, reversibility of toxic effects, communicability and the genetic stability of the vaccine strains.

d) Sample size: shall be considered carefully based on results of pre-clinical studies, sample size of 30-50 subjects.

2. Phase 2:

a) Is conducted after completion of phase 1 with results approved by the Ministry of Health Biomedical research Ethics Committee. Phase 2 trials aim to demonstrate the immunogenicity of the active ingredients, the safety of the vaccines tested on target population, to evaluate the immune response related to age, race, sex. These trials are of randomized controlled design.

b) For live attenuated vaccines, in addition to the monitoring of parameters specified in phase 1 trials, the presence and existence of antibody titer should be noted: neutralizing antibodies or cross agglutination antibodies or cell-mediated immunity and interactions impacting the immune system (e.g., interactions with pre-existing antibodies, other drugs concurrently taken).

c) Sample size: a minimum 200 subjects.

3. Phase 3:

a) Phase 3 trials are done on a large scale, multi-center to evaluate the protective effectiveness and safety of the immunogen of the vaccine in the target recipient.

b) Sample size: a minimum of 500 subjects.

4. Phase 4:

a) Phase 4 studies are conducted after the vaccines have been licensed for marketing. Phase 4 is considered as post licensing surveillance or post licensing studies with the purpose of determining adverse effects and monitoring the protective effectiveness after the vaccines have been used as per indications widely on in the community. Phase 4 can be performed to assess:

- The optimized conditions for the use of vaccines (optimal age for vaccination, concomitant use with other vaccines and other conditions).
- Protective effectiveness for at risk groups (elderly, immune compromised patients, people with certain diseases).
- Sustainability of effectiveness and long-term safety.

b) Sample size: a minimum of 10,000 subjects.

Article 20. Phases for clinical trials on oriental medicines, drugs made of medicinal materials

1. Phase 1:

a) Trials are often conducted on volunteers who meet the clinical trials' criteria for the purpose of determining safe dose range (highest strength dose is the dose that should cause no serious side effects), specifically:

b) The starting dose administered must be equal to 1/3 - 1/5 of the dose predicted by preclinical studies. Multiple smaller doses may be administered in the interval between the starting and the highest strength dose. This phase ends once the safe dose has been determined.

c) Sample size: shall be considered carefully based on results of pre-clinical studies, sample size of 10-30 subjects.

2.Phase 2:
a) These trials are to evaluate the safety and efficacy of the drugs and should be of randomized controlled design with a minimum of 25 subjects in each group.

b) Therapeutic dose: doses used in this phase must be based on phase 1 studies' results.
c) Sample size: a minimum of 50 subjects.

3. Phase 3:
a) To validate the safety and effectiveness in extended conditions. Study subjects were assigned by randomized controlled or self controlled method.
b) Sample size: a minimum of 100 patients.

4. Phase 4:

a) Provisions for Pharmaceutical drugs apply.
b) Sample size: a minimum of 200 patients.

Article 21. Multicenter clinical trials

1. When conducting trials at different sites, the Host institution shall establish a joint steering committee comprising of one Principal investigator and principal investigators from other branches (?) and representatives of lead research institutions (?) in order to reach agreements on the trial's objectives, content, evaluation criteria, plans and timelines.

2. For supranational clinical trials of which Vietnam is a participant, procedures shall be in strict compliance with provisions of this Circular. Objectives and contents of the trials conducted in Vietnam, joint study activities conducted in conjunction with other countries shall be detailed in the trial protocol.

Article 22. Objectives, contents and sample size

Minister of Health shall decide on specific objectives, content, sample size for clinical trials as stipulated in Article 18, 19, 20 and 21 of this Circular based on the advice of the Ethics Committee for biomedical research specific to each dossier, trial protocol.

Article 23. Handling adverse events during the clinical trial

Procedures for handling untoward events in the course of the trials are as follows:

1. In case a serious adverse event occurs threatening the life of trial subject(s) the Investigator and Host institution shall discontinue the trial on the subject immediately, take rescue actions, overcome and resolve the consequences, document the events, and expedite reporting to local Ethics committee, Ministry of Health Ethics committee, Department of Science and Training.

2. In case of trials causing injury to or compromising the subjects' health, the Principal investigator shall suspend the trial for the treatment of the subject's condition and monitor its development and make judgment as to continue or discontinue the clinical trial.

3. In the occurrence of untoward events which were anticipated and for which measures to overcome have been effectively adopted, the clinical trials shall continue.

Article 24. Information and data collection

1. Information which is derived from the course of the trials shall be recorded in the case report form (CRFs). Case report form shall be considered as source documents, be kept and archived in accordance with applicable regulatory requirements, and forms the basis for monitoring, evaluation for acceptability of the trials' results.

2. Relevant documentation necessary for clinical assessments (lab tests' results, diagnostic images, prescriptions) shall be copied from the original, clearly marked with the full name of the cross checking person (?), and its source, and shall be managed, stored in accordance with applicable regulatory requirements.

Article 25. Data processing

1. The trial data shall be processed using biostatistical methods and by an agency, organization which is independent from the Host institution to ensure objectivity, integrity and reliability.

2. Results of statistical analysis shall be clearly presented to facilitate the interpretation of differences in clinical outcomes; the evaluation of therapeutic value shall be based on confidence intervals and results obtained from statistical analysis. The final report of the clinical trials shall be consistent with the results of statistical analysis.

Article 26. Archiving of clinical trial records

1. Data, source documents, lab test results, diagnostic images, trial-related documentation gathered, minutes of committee meetings, monitoring records, progress reports, registration documents and other documents related to the clinical trial shall be preserved, retained at the research facilities for at least 15 years from the date of completion of the trials.

2. The Principal investigator shall be responsible for the whole process of preserving and archiving of documentation pertinent to the clinical trials and for making them available upon request of the inspection, supervision teams and competent regulatory agencies.

Article 27. Reports of the clinical trial results

1. Reports of the clinical trial results shall be made in compliance with the prescribed template (Appendix 7, of this Circular), containing full information on the drugs, describing the research methods, the trials' processes, data analysis, results evaluation, in comparison with the trial objectives and purposes, providing accurate conclusions, unbiased and objective. Contents of the report must be consistent with the trial objectives and contents outlined in the approved trial protocol.

2. The Principal investigator shall be responsible for the scientific soundness, accuracy and integrity of

data, findings, observations and other contents of the report.

Article 28. Management of investigational drugs

1. The export, import of investigational drugs shall be in compliance with current regulations on importation and exportation of drugs.

2. The management of investigational drugs shall be conducted in accordance with current regulatory requirements from sampling, quality testing, packaging, transportation, delivery, storage, labeling to distribution.

3. A journal shall be maintained to track the use of investigational drugs, along with information on drugs quantity, quality.

4. Unfinished drugs and drugs in storage shall be managed stringently, kept separated and preserved in accordance with relevant regulatory requirements. Unused drugs shall be handed over to the Agencies, individuals having the candidate drugs.

5. Minutes of disposition shall be prepared for drugs which do not meet quality standards in accordance with Ministry of Health's requirements.

6. Drugs samples (03 smallest packaged units) shall be preserved at the Host institutions' site for a minimum 3 years (36 months) from the termination of the trials.

Chapter VI
RIGHTS AND OBLIGATIONS OF TRIAL SUBJECTS, INDIVIDUALS (?) HAVING THE CANDIDATE DRUGS AND HOST INSTITUTIONS

Article 29. Rights of Trial subjects

1. Be provided with complete and truthful information before the trial about the trial process and possible associated risks that may occur.

2. Be compensated by the Agencies, organizations, individuals having the candidate drugs for any damages suffered, if these are caused by the trial.

3. Have confidentiality of pertinent personal information safeguarded.

4. Bear no liability when unilaterally withdraw him/herself from participating in the trials.

5. File complaints, denunciations against the Organizations, individuals having the candidate drugs and Host institution for their acts of law infringement.

6. Be provided with medical care during the trials in accordance with the approved trial protocol.

Article 30. Rights of Agencies, organizations, individuals having the candidate drug(s)

1. Select and propose entities meeting the trial requirements with respect to premises, facilities and qualified personnel for the conduct of the clinical trial.
2. Have ownership of all the trial results on the drug(s).
3. Have the right to terminate the trial if the Host institution is in serious breach of the trial protocol.

Article 31. Obligations of agencies, organizations and individuals having the candidate drug(s)

1. Apply and be granted with an Authorization by the Ministry of Health before initiating the trials.

2. Compensate trial subjects for damages suffered if these are caused by adverse events during the trial in accordance with relevant regulatory requirements.

3. Sign contract with the Host institution or the clinical research organization (if any) for the conduct of clinical trials

4. Be responsible before law for the safety and quality of drugs supplied by them.

Article 32. Rights of Host institutions

1. Be supplied by Agencies, organizations and individuals having the candidate drugs with investigational drugs and funding for the conduct of clinical trials in accordance with the law.

2. Be allowed to make use of the trial results in accordance with agreements with the Agencies, organizations, individuals having the candidate drugs.

Article 33. Obligations of Host institutions

1. Comply with the standards of Good clinical practice for trials on drugs, submit to Ministry of Health reports on trial progress, results and ad hoc reports as need be.

2. Sign contracts for the conduct of the clinical trial with Agencies, organizations, individuals having the candidate drugs and Trial subjects.

3. Continue to monitor trial subjects' health conditions as agreed in the contract and outlined in the trial protocol.

Chapter VII
SUPERVISION AND INSPECTION FOR QUALITY ASSURANCE OF CLINICAL TRIALS

Article 34. Supervision of the conduct of clinical trials

1. Supervision and inspection shall be performed to ensure the protection of rights, interests and well being of trial subjects, the complete, accurate, timely recording of trials' data in accordance with the approved trial protocol.

2. Ministry of Health shall establish supervision team for periodic inspections and ad hoc inspection in specific cases.

3. Competent state authorities, Agencies, organizations, individuals having the candidate drug(s), Clinical research organizations (CRO) or Site management organizations (SMO) with written approval by the Ministry of Health, may assign personnel for the monitoring, supervision of the clinical trial process in a systematic manner. Person(s) assigned to the supervision function shall not be member of the research team, shall adhere strictly to requirements on confidentiality of trial data and information pertinent to the trial subjects and be responsible before law for his/her performance.

4. The Principal investigator and participating investigators shall be responsible for the facilitation of inspectors' direct access to trial data when required.

5. The supervision, inspection teams shall be responsible for the inspection, documentation, recommendation to competent state authorities for the latter to take appropriate action in accordance with the law.

Article 35. Ensuring credibility of the clinical trial results

1. To ensure the clinical trial's credibility of trials, analysis, findings and conclusions shall derive from raw data. All clinical data and lab test values shall be verified at every phase of the trials.

2. When necessary the evaluation board of different levels may invite expert evaluator for the evaluation of results, data verification, inspection of trial products or establish Data and Safety Monitoring Board (DSMB) as required by regulatory agencies.

Chapter VIII
FINAL EVALUATION OF THE CLINICAL TRIAL RESUTLS

Article 36. Procedures for evaluation for acceptability of clinical trial results

1. Final evaluation for acceptability of clinical trial results shall be performed in accordance with the relevant regulatory requirements on acceptability evaluation for science and technology research projects and good clinical practice for trials on drugs.

2. The evaluation shall be conducted at two levels: the local level and Ministry of Health level. At the end of the trials, the Principal investigator shall be responsible to report to the Host institution for the latter to conduct the local level evaluation and compile a final report to Ministry of Health for the acceptability evaluation at ministerial level.

Article 37. Dossier for the Ministry of Health's acceptability evaluation

Dossier for the ministerial acceptability evaluation (01 original, legally signed, and 03 copies), including:

1. Official note from the Host institution requesting the ministerial acceptability evaluation.

2. Copy of the approved trial protocol.

3. Decision of approval of the trial protocol.

4. Decision for the establishment of the local acceptability evaluation board.

5. Minutes of the local acceptability evaluation board meeting.

6. Full-text report of the clinical trial results in accordance with regulatory requirements with possible supplementary documents as deemed appropriate.

Article 38. Completion of clinical trials

1. Within 30 working days from the date of receipt of the complete dossier requesting for the acceptability evaluation, Ministry of Health shall convene an acceptability evaluation board meeting in accordance with relevant regulatory requirements.

2. Clinical trials shall only be deemed complete after the final report of the trials has been evaluated for acceptability and any supplementary documents submitted by the Principal investigator at the request of the Board's member have been accepted.

3. Data and results of the clinical trials shall only be published after approval by Ministry of Health Biormedical research Ethics committee.

Chapter IX
IMPLEMENTATION

Article 39. Responsibility for implementation

The Department of Science and Training shall lead and coordinate with the relevant departments, divisions to

1. Receive and review registration dossiers, provide guidance to Organizations, individuals having the candidate drugs for the implementation of this Circular in compliance with its provisions and those of other relevant regulations.

2. Conduct appraisal of the conditions for clinical trials applied for in the dossiers, personnel's technical qualifications, premises and facilities and the legality of the Host institutions, the Contract research organizations, Site management organizations and report to the Ministry's leadership for the granting of an authorization for the conduct of the clinical trials.

3. Organize Ministry of Health Biomedical research Ethics committee meetings to review the trial protocols, consider the ethical aspects of the studies and in the relevant science, evaluate the trial result for acceptability and submit its recommendations to the Ministry leadership for approval.

4. Provide supervision, conduct periodic or ad hoc inspection of the trial processes.

5. Disseminate the contents of this Circular, provide implementation guidance to pertinent agencies, organizations, individuals, ensure their compliance with guidelines of good clinical practice for trials and ethical standards in biomedical research.

Article 40. Transitional provisions

Dossiers for the registration of clinical trials on drugs submitted before the effective date of this Circular shall be reviewed and evaluated in accordance with the "Regulations on clinical trials" issued by Decision No. 01/2007/QD -BYT dated 11/01/2007 of the Minister of Health.

Article 41. Effective date

1. This Circular shall take effect from the date of 20th March 2012.

2. Decision 01/2007/QD-BYT dated 11 January 2007 for the promulgation of the "Regulations on clinical trials" shall be rescinded from the effective date of this Circular.

Should issues arise during the implementation process please report promptly to the Ministry of Health for revision, supplementation as appropriate./.

Constitution
of
The Arab Republic of Egypt
2014

Unofficial Translation

Unofficial translation

The Issuance

of The Amended Constitution of The Arab Republic of Egypt

The Head of the State

Cognizant of the results of the referendum on the draft of the constitutional amendments into the suspended constitution of 2012 that was held on January 14-15, 2014,

And cognizant of Article 247 of the amended constitution of the Arab Republic of Egypt, the amended constitution of the Arab Republic of Egypt is issued with the attached text.

Cairo on Rabei Awwal 17, 1435;
January 18, 2014;

Adly Mansour

Unofficial Translation

In the Name of Allah, Most Gracious, Most Merciful

This is Our Constitution, Egypt is the gift of the Nile for Egyptians and the gift of Egyptians to humanity.

With its unique location and history, Egypt is the Arab heart of the world. It is the meeting point of world civilizations and cultures and the crossroads of its maritime transportation and communications. It is the head of Africa on the Mediterranean and the estuary of its greatest river: the Nile.

This is Egypt, an immortal homeland for Egyptians, and a message of peace and love to all peoples.

In the outset of history, the dawn of human conscience arose adn shone forth in the hearts of our great ancestors, whose goodwill banded together to found the first central State that regulated and organized the life of Egyptians on the banks of the Nile. It is where they created amazing wonders of civilization, and where their hearts looked up to heavens before earth knew the three Abrahamic religions.

Egypt is the cradle of belief and the banner of glory of the revealed religions.

On its land, Prophet Moses - to whom Allah spoke - grew up and on Mount Sinai, the Revelation of Allah shone on his heart and Divine message descended.

On its land, Egyptians harbored in their bosoms Virgin Mary and her baby and offered thousands of martyrs in defense of the Church of Jesus, Peace Be Upon Him.

When the Seal of the Messengers Mohammad (Peace and Blessings Be Upon Him) was sent to all mankind to perfect the sublime morals, our hearts and minds were opened to the light of Islam, and we, labeled the best soldiers on Earth fighting for the cause of Allah, disseminated the message of truth and sciences of religion across the world.

This is Egypt, a homeland in which we live and in our souls it lives.

In modern age, minds were enlightened, humanity became mature, and nations and peoples progressed on the path of knowledge, raising the banners of freedom and equality. Mohamed Ali founded the modern Egyptian State with a national army as its pillar. Refaa, the Azharian, called for having the homeland "… a place of happiness shared by all its people." We, Egyptians, strived to keep up with the pace of advancement and offered up martyrs and made sacrifices in several uprisings and revolutions until our patriotic army stood up for the overwhelming will of the people in the “Jan 25 – June 30” Revolution that called for freedom, human dignity and social justice for all, and for Egypt to regain its independent will.

Unofficial Translation

This revolution is continuation of national struggle whose brightest symbols were Ahmed Oraby, Mostafa Kamel, and Mohamed Farid, and is a culmination of two great revolutions in our modern history:

The 1919 revolution that had rid Egypt and the Egyptians of the British protection, established the principle of citizenship and equality for all the people. Its leader, Saad Zaghloul, and his successor, Mosfata El-Nahhas, in adopting democracy asserted that "Right is above power and the nation is above government". During this revolution, Talaat Harb laid down the cornerstone of the national economy.

The July 23, 1952 revolution led by Gamal Abdel Nasser and embraced by the popular will rendered true the dream of generations for independence and evacuation of foreign forces. Egypt affirmed its Arab allegiance, opened up to its African continent and Muslim world, supported liberation movements across continents, and took firm steps on the path of development and social justice.

This revolution is an extension of the revolutionary march of Egyptian patriotism, and enhances the strong bond between the Egyptian people and their national army that assumed the duty and shouldered the responsibility of protecting the homeland, by virtue of which we achieved victory in our greatest battles including driving off the 1956 Tripartite Aggression to defeating our defeat through the glorious victory of October 1973 that gave President Sadat a special place in our recent history.

Compared to major revolutions in the history of mankind, the Jan 25 – June 30 Revolution is unique with its high density of popular participation - estimated to be in the tens of millions - and the prominent role of youth aspiring at a brighter future. It is also unique in that the masses transcended class and ideology divides to reach out to more expansive horizons, the people's will was defended by their army, and that it had the blessings of Al-Azhar and the Egyptian church. This Revolution is further unique because of its peacefulness and ambition to achieve freedom and social justice combined.

This revolution is both a sign and a good omen; a sign of a past that is still present and a good omen of a future at which all humanity aspires.

The world is about to turn the last few leaves of this era that has been torn up by conflicts of interest between the East and the West, and the North and the South; an era where disputes and wars erupted between classes and peoples, where dangers grew threatening the existence of mankind and life on Earth which Allah entrusted us to preserve. As humanity hopes to move from the age of maturity to the age of wisdom to build a new world where truth and justice prevail, and where freedoms and human rights are protected, we, Egyptians, believe that our revolution is a resumption of our contribution to drafting a new history for humanity.

Unofficial Translation

We believe that we are capable of using the past as an inspiration, stirring up the present, and making our way to the future. We are capable of raising this homeland and rising with it.

We believe that every citizen is entitled to live in this homeland safe and secure, and that every citizen has the right to live at present and in the future.

We believe in democracy as a path, a future, and mode of living, political pluralism and the peaceful rotation of power. We affirm the right of the people to make and determine their future. The Egyptian people, is the sole source of authority. Freedom, human dignity, and social justice are the rights of every citizen. We and our future generations are masters in a sovereign homeland that is master of its destiny.

We are now drafting a Constitution that embodies the dream of generations for a prosperous consolidated society and a just State that realizes the present and future ambitions for the individual and the community.

We are now drafting a Constitution that seeks the completion of building a modern democratic State having a civil government.

We are drafting a Constitution that prevents any corruption or tyranny and by which we heal the wounds of the past, from the days of the old Eloquent Peasant to the victims of negligence and the martyrs of the revolution in our present time, and relieve our people who have – for long – been suffering injustice.

We are drafting a Constitution that affirms that the principles of Islamic Sharia are the principal source of legislation, and that the reference for the interpretation of such principles lies in the body of the relevant Supreme Constitutional Court Rulings.[1]

We are drafting a Constitution that paves the way to the future for us, and which is consistent with the Universal Declaration of Human Rights which we participated in drafting and adopted..

We are drafting a Constitution that maintains our freedom and protects our nation against any peril that threatens it or our national unity.

We are drafting a Constitution that holds all of us equal in rights and duties without discrimination of any kind.

We the citizens, women and men, the Egyptian people, sovereigns in a sovereign homeland, this is the manifestation of our volition, this is the Constitution of our revolution.

This is our Constitution.

---

[1] The rulings are to be deposited in the minutes.

Workers shall be represented by 50% of the elected members of the boards of directors of public sector units. Their representation in the boards of directors of public enterprise sector companies shall be subject to the Law.

The Law shall regulate the representation of small farmers and craftsmen with a minimum representation percentage of 80% in the boards of directors of agricultural, industrial and handicraft cooperatives.

Unofficial Translation

Article (43)

The State shall protect and develop the Suez Canal and preserve it as an international waterway owned by the State. The State shall also develop the Canal sector as a distinguished economic center.

Article (44)

The State shall protect the River Nile, preserve Egypt's historical rights thereto, rationalize and maximize its use, and refrain from wasting or polluting its water. The State shall also protect groundwater; adopt necessary means for ensuring water security; and support scientific research in that regard.

Every citizen is guaranteed the right to enjoy the River Nile. It is prohibited to trespass the riverbank reserve or harm the riverine environment. The State shall guarantee eliminating any trespass against the River Nile as regulated by Law.

Article (45)

The State shall protect its seas, shores, lakes, waterways and natural protectorates.

Trespassing, polluting or misusing any of them is prohibited. Every citizen is guaranteed the right of enjoying them. The State shall protect and develop the green space in the urban areas; preserve plant, animal and fish resources and protect those under the threat of extinction or danger; guarantee humane treatment of animals, all according to the law.

Article (46)

Every person has the right to a sound healthy environment. Environment protection is a national duty. The State shall take necessary measures to protect and ensure not to harm the environment; ensure a rational use of natural resources so as to achieve sustainable development; and guarantee the right of future generations thereto.

Chapter Three

Cultural Components

Article (47)

The State shall maintain the Egyptian cultural identity with its diversified branches of civilization.

Article (48)

Culture is a right to every citizen. The State shall secure and support this right and make available all types of cultural materials to all strata of the people, without any discrimination

Unofficial Translation

based on financial capability, geographic location or others. The State shall give special attention to remote areas and the neediest groups.

The State shall encourage translation from and into Arabic.

Article (49)

The State shall protect and preserve monuments and give due care to monumental sites. It shall also maintain and restore them; recover stolen antiquities; and organize and supervise excavation operations.

Presenting monuments as gifts or exchanging them is prohibited.

Aggression against or trafficking in monuments is a crime that is not subject to prescription.

Article (50)

Egypt's civilization and cultural heritage, whether physical or moral, including all diversities and principal milestones – namely Ancient Egyptian, Coptic, and Islamic – is a national and human wealth. The State shall preserve and maintain this heritage as well as the contemporary cultural wealth, whether architectural, literary or artistic, with all diversities. Aggression against any of the foregoing is a crime punished by Law. The State shall pay special attention to protecting components of cultural pluralism in Egypt.

Unofficial Translation

Part III

Public Rights, Freedoms & Duties

Article (51)

Dignity is the right of every human being and may not be violated. The State shall respect and protect human dignity.

Article (52)

Torture in all forms and types is a crime that is not subject to prescription.

Article (53)

All citizens are equal before the Law. They are equal in rights, freedoms and general duties, without discrimination based on religion, belief, sex, origin, race, color, language, disability, social class, political or geographic affiliation or any other reason.

Discrimination and incitement of hatred is a crime punished by Law.

The State shall take necessary measures for eliminating all forms of discrimination, and the Law shall regulate creating an independent commission for this purpose.

Article (54)

Personal freedom is a natural right, shall be protected and may not be infringed upon. Except for the case of being caught in *flagrante delicto*, it is not permissible to arrest, search, detain, or restrict the freedom of anyone in any way except by virtue of a reasoned judicial order that was required in the context of an investigation.

Every person whose freedom is restricted shall be immediately notified of the reasons therefore; shall be informed of his/her rights in writing; shall be immediately enabled to contact his/her relatives and lawyer; and shall be brought before the investigation authority within twenty four (24) hours as of the time of restricting his/her freedom.

Investigation may not start with the person unless his/her lawyer is present. A lawyer shall be seconded for persons who do not have one. Necessary assistance shall be rendered to people with disability according to procedures prescribed by Law.

Every person whose freedom is restricted, as well as others, shall have the right to file grievance before the court against this action. A decision shall be made on such grievance within one (1) week as of the date of action; otherwise, the person must be immediately released.

Unofficial Translation

The Law shall regulate the provisions, duration, and causes of temporary detention, as well as the cases in which damages are due on the state to compensate a person for such temporary detention or for serving punishment thereafter cancelled pursuant to a final judgment reversing the judgment by virtue of which such punishment was imposed.

In all events, it is not permissible to present an accused for trial in crimes that may be punishable by imprisonment unless a lawyer is present by virtue of a power of attorney from the accused or by secondment by the court.

Article (55)

Every person who is either arrested, detained, or his freedom is restricted shall be treated in a manner that maintains his dignity. He/she may not be tortured, intimidated, coerced, or physically or morally harmed; and may not be seized or detained except in places designated for that purpose, which shall be adequate on human and health levels. The State shall cater for the needs of people with disability.

Violating any of the aforementioned is a crime punished by Law.

An accused has the right to remain silent. Every statement proved to be made by a detainee under any of the foregoing actions, or threat thereof, shall be disregarded and not be relied upon.

Article (56)

A prison is a place of correction and rehabilitation.

Prisons and places of detention shall be subject to judiciary supervision, where actions inconsistent with human dignity or which endanger human health shall be prohibited.

The Law shall regulate the provisions of reform and rehabilitation of convicted persons and facilitating decent lives after their release.

Article (57)

The right to privacy may not be violated, shall be protected and may not be infringed upon..

Postal, telegraphic and electronic correspondences, telephone calls, and other means of communication are inviolable, and their confidentiality is guaranteed. They may not be confiscated, revealed or monitored except by virtue of a reasoned judicial order, for a definite period, and only in the cases defined by Law.

The State shall protect citizens' right to use all forms of public means of communications. Interrupting or disconnecting them, or depriving the citizens from using them, arbitrarily, is impermissible. This shall be regulated by Law.

Unofficial Translation

Article (58)

Privacy of homes is inviolable. Except for cases of danger or call for help, homes may not be entered, inspected, monitored or eavesdropped except by a reasoned judicial warrant specifying the place, the time and the purpose thereof. This is to be applied only in the cases and in the manner prescribed by Law. Upon entering or inspection, the residents of houses must be apprised and have access to the warrant issued in this regard.

Article (59)

Everyone has the right to a safe life. The State shall provide security and reassurance for its citizens and all those residing in its territory.

Article (60)

The human body is inviolable and any assault, deformation or mutilation committed against it shall be a crime punishable by Law. Organs trade shall be prohibited, and it is not permissible to perform any medical or scientific experiment thereon without a certified free consent according to established principles in medical sciences and as regulated by Law.

Article (61)

Tissue and organ donation is a gift for life. Every person shall have the right to donate his body organs either during his lifetime or after his death by virtue of consent or a certified will. The State shall develop a mechanism regulating the rules of organ donation and transplantation in accordance with the Law.

Article (62)

Freedom of movement, residence and emigration shall be guaranteed.

No citizen may be expelled from the State territory or prevented from returning thereto.

No citizen may be prevented from leaving the State territory, placed under house arrest or prevented from residing in a certain place except by a reasoned judicial order for a specified period of time and in the cases as defined by the Law.

Article (63)

All forms and types of arbitrary forced displacement of citizens shall be prohibited and shall be a crime that does not lapse by prescription.

Unofficial Translation

Article (64)

Freedom of belief is absolute.

The freedom of practicing religious rituals and establishing worship places for the followers of Abrahamic religions is a right regulated by Law.

Article (65)

Freedom of thought and opinion is guaranteed.

Every person shall have the right to express his/her opinion verbally, in writing, through imagery, or by any other means of expression and publication.

Article (66)

Freedom of scientific research is guaranteed. The State is committed to sponsor researchers and inventors and to provide protection for and endeavor to apply their innovations.

Article (67)

Freedom of artistic and literary creativity is guaranteed. The State shall encourage arts and literature, sponsor creative artists and writers and protect their productions, and provide the means necessary for achieving this end.

No lawsuit may be initiated or filed to stop or confiscate any artistic, literary, or intellectual works, or against their creators except by the Public Prosecutor. No freedom restricting sanction may be inflicted for crimes committed because of the publicity of artistic, literary or intellectual product. As for crimes related to the incitement of violence, discrimination between citizens, or impingement of individual honor, the Law shall specify the penalties therefore.

In such cases, the court may obligate the sentenced to pay punitive compensation to the victim of the crime, in addition to the original compensations due to the victim for the damages incurred. All the foregoing shall be in accordance with the Law.

Article (68)

Information, data, statistics and official documents are the property of the People and the disclosure thereof from their various sources is a right guaranteed by the State for all citizens. The State is committed to provide and make them available to citizens in a transparent manner. The Law shall regulate the rules for obtaining them and terms for their availability and confidentiality; the rules for their deposit and storage; and the rules for and filing complaints against the refusal to provide them. The Law shall also impose penalties for withholding information or deliberately providing wrong information.

Unofficial Translation

The State institutions shall deposit official documents with the National Library and Archives once they are no longer in use. The State institutions shall also protect, and secure such documents against loss or damage, as well as restoring and digitizing them using all modern means and instruments according to the Law.

Article (69)

The State shall protect all types of intellectual property rights in all fields, and establish a specialized agency to uphold such rights and their legal protection as regulated by Law.

Article (70)

Freedom of the press, printing and paper, visual, audio and electronic publication is guaranteed. Every Egyptian - whether being natural or legal, public or private person – shall have the right to own and issue newspapers and establish visual, audio and digital media outlets.

Newspapers may be issued once notification is given as regulated by Law. The Law shall regulate the procedures of establishing and owning visual and radio broadcast stations and online newspapers.

Article (71)

It is prohibited to censor, confiscate, suspend or shut down Egyptian newspapers and media outlets in any way. By way of exception, they may be subject to limited censorship in times of war or general mobilization.

No freedom restricting penalty shall be imposed for publication or publicity crimes. As for crimes related to the incitement of violence, discrimination between citizens, or impingement of individual honor, the Law shall stipulate the penalties therefor.

Article (72)

The State shall ensure the independence of all State-owned press institutions and media outlets, in a manner ensuring their neutrality and presentation of all political and intellectual opinions and trends as well as social interests and also guaranteeing equality and equal opportunities in addressing public opinion.

Article (73)

Citizens shall have the right to organize public meetings, marches, demonstrations and all forms of peaceful protests, without carrying arms of any kind, by serving a notification as regulated by Law.

The right to peaceful and private assembly is guaranteed without need for prior notification. Security forces may not attend, monitor or eavesdrop on such meetings.

Unofficial Translation

Article (74)

All citizens shall have the right to form political parties by notification as regulated by Law. No political activity may be practiced and no political parties may be formed on the basis of religion or discrimination based on sex, or origin, or on sectarian basis or geographic location. No activity that is hostile to democratic principles, secretive, or of military or quasi-military nature may be practiced.

Political parties may not be dissolved except by virtue of a court judgment.

Article (75)

All citizens shall have the right to form non-governmental associations and foundations on democratic basis, which shall acquire legal personality upon notification.

Such associations and foundations shall have the right to practice their activities freely, and administrative agencies may not interfere in their affairs or dissolve them, or dissolve their boards of directors or boards of trustees save by a court judgment.

The establishment or continuation of non-governmental associations and foundations, whose statutes or activities are secretive or conducted in secret or which are of military or quasi-military nature is prohibited as regulated by Law.

Article (76)

The establishment of syndicates and federations on democratic basis is a right guaranteed by Law. Syndicates and federations shall acquire legal personality, shall have the right to practice their activities freely, shall improve the level of efficiency among their members and defend their rights and interests.

The State shall guarantee the independence of all syndicates and federations and their boards of directors may only be dissolved by a court judgment.

No syndicate or federation may be established in the military or police agencies.

Article (77)

The Law shall regulate the establishment of professional syndicates and the administration thereof on a democratic basis, shall guarantee their independence and shall specify their resources and the manner of recording their members, and holding them accountable for their conduct in practicing their professional activities according to the codes of ethics and professional conduct.

No profession may have more than one syndicate for the regulation of its affairs. Receivership may not be imposed on any syndicate. Administrative bodies may not interfere in the affairs

Unofficial Translation

thereof. The board of directors of any syndicate may not be dissolved save by a court judgment. The opinion of the syndicate shall be sought on draft legislations pertaining to it.

Article (78)

The State shall ensure the citizens' right to adequate, safe and healthy housing in a manner which preserves human dignity and achieves social justice.

The State shall devise a national housing plan which upholds the environmental particularity and ensures the contribution of personal and collaborative initiatives in its implementation. The State shall also regulate the use of State lands and provide them with basic utilities within the framework of comprehensive urban planning which serves cities and villages and a population distribution strategy. This is to be applied in a manner serving the public interest, improving the quality of life for citizens and safeguards the rights of future generations.

The State shall also devise a comprehensive national plan to address the problem of unplanned slums, which includes re-planning, provision of infrastructure and utilities, and improvement of the quality of life and public health. In addition, the State shall guarantee the provision of resources necessary for implementing such plan within a specified period of time.

Article (79)

Each citizen has the right to healthy and sufficient food and clean water. The State shall ensure food resources to all citizens. The State shall also ensure sustainable food sovereignty and maintain agricultural biological diversity and types of local plants in order to safeguard the rights of future generations.

Article (80)

Anyone under the age of 18 shall be considered a child. Each child shall have the right to a name, identity documents, free compulsory vaccination, health and family or alternative care, basic nutrition, safe shelter, religious education, and emotional and cognitive development.

The State shall ensure the rights of children with disabilities, their rehabilitation and their integration in the society.

The State shall provide children with care and protection from all forms of violence, abuse, mistreatment and commercial and sexual exploitation.

Every child shall be entitled to acquire early education in a childhood center until the age of six. It is prohibited to employ children before the age of completing their preparatory education (six years of primary and three years of preparatory) or in jobs which subject them to danger.

The State shall also develop a judicial system for children that have been victims and or are witnesses. Children may not be held criminally accountable or detained save as provided in the

Unofficial Translation

Law and for the period of time specified therein. In such a case, they shall be provided with legal assistance and detained in appropriate locations separate from those allocated for the detention of adults.

The State shall endeavor to achieve the best interest of children in all measures taken against them.

Article (81)

The State shall guarantee the health, economic, social, cultural, entertainment, sporting and educational rights of persons with disabilities and dwarves, strive to provide them with job opportunities, allocate a percentage of job opportunities to them, and adapt public facilities and their surrounding environment to their special needs. The State shall also ensure their exercise of all political rights and integration with other citizens in compliance with the principles of equality, justice and equal opportunities.

Article (82)

The State shall guarantee the provision of care to the youth and youngsters shall endeavour to discover their talents; develop their cultural, scientific, psychological, physical and creative abilities, encourage their engagement in group and volunteer activities and enable them to participate in public life.

Article (83)

The State shall guarantee the health, economic, social, cultural and entertainment rights of the elderly people, provide them with appropriate pensions which ensure a decent life for them, and enable them to participate in public life. In its planning of public facilities, the State shall take into account the needs of the elderly. The State shall encourage civil society organizations to participate in taking care of the elderly people.

All the foregoing is to be applied as regulated by Law.

Article (84)

Everyone has the right to exercise sports. The State institutions and civil society shall endeavor to discover and sponsor the talented athletes and take the necessary measures to encourage the exercise of sports.

The Law shall regulate the affairs of sports and non-governmental sporting agencies in accordance with international standards and shall regulate the manner of settling sporting disputes.

Part V

The System of Government

Chapter One

The Legislative Power

(House of Representatives)

Article (101)

In the manner stated in the Constitution, the House of Representatives is entrusted with the authority to enact legislations and approve the general policy of the State, the general plan of economic and social development and the State budget. It exercises oversight over the actions of the executive power.

Article (102)

The House of Representatives is composed of no less than four hundred and fifty members elected by direct secret public ballot.

A candidate for the membership of the House must be an Egyptian citizen, enjoying civil and political rights, a holder of at least the certificate of basic education, and should not be below 25 Gregorian years of age on the day of opening candidacy registration.

Other candidacy requirements, the electoral system, and division of electoral constituencies shall be defined by law in a manner which observes fair representation of the population and governorates and equitable representation of voters. Elections based on the plurality voting system or proportional list, or a combination of both at whatsoever ratio may be adopted.

The President of the Republic may appoint no greater than 5% of the members, the method of nomination thereof shall be stipulated by Law.

Article (103)

A member of the House of Representatives shall devote him/herself on a full time basis for the tasks of membership and his/her post shall be reserved for him/her in accordance with the Law.

Article (104)

As a condition for undertaking his/her duties, a House of Representatives member shall take the following oath: “I swear by The Almighty God to loyally uphold the republican system, respect

Unofficial Translation

the Constitution and the Law, fully uphold the interests of the People, and to safeguard the independence of the nation and the integrity and safety of ."

Article (105)

A House of Representatives member shall receive a remuneration determined by Law. In case the remuneration is changed, such change will only come into force at the commencement of the legislative term following the one during which the change was adopted.

Article (106)

The term of membership in the House of Representatives is five calendar years, commencing from the date of its first session.

Elections for a new House of Representatives shall be held during the sixty days preceding the end of the term of previous House.

Article (107)

The Court of Cassation shall have jurisdiction over the validity of membership in the House of Representatives. Appeals shall be submitted to the Court of Cassation within a period not exceeding thirty days from date on which the final election results are announced. Appeals shall be adjudicated within sixty days from the date of the receipt thereof.

In the event that a judgment declares a membership invalid, the invalidity of the membership shall be effective as of the date on which the court judgment is notified to the House.

Article (108)

In case a seat of a House of Representatives becomes vacant at least six months prior to the expiry of his tenure, the vacant position must be filled in accordance with Law within sixty days from the date on which the House reports the vacancy.

Article (109)

Throughout its membership tenure, no House of Representatives member may, whether in person or by proxy, buy, rent or lease any asset owned by the State or a public-law legal persons or a public sector company or a public enterprise sector company; sell to or barter with the state any part of its own property or conclude a contract with the State as a vendor, supplier, contractor or otherwise as set out by Law. Any of such acts shall be void.

A member must submit a financial estate disclosure upon taking membership and at the end of membership and at the end of each year of membership.

In case a House of Representatives member receives cash or in-kind gift because of or in connection with his/her membership, title thereto shall devolve to the State public treasury.

Unofficial Translation

All the foregoing shall be as regulated by Law.

Article (110)

Membership in the House of Representatives may only be dropped or cancelled if a member has lost confidence and esteem or ceases to satisfy any membership condition based on which he was elected or if he has violated the duties of membership.

The decision of cancellation must be issued by a majority of two-thirds of the members of the House of Representatives.

Article (111)

The House of Representatives shall accept resignation of its members, which must be submitted in writing. To be accepted, a resignation must not be submitted after the House has initiated procedures for cancelling the membership of the resigning member.

Article (112)

A House of Representatives member shall not be held accountable for any opinions expressed concerning the performance of his duty in the House or its committees.

Article (113)

Except in cases of *flagrante delicto*, it shall be prohibited to take any criminal action, under the Articles of felonies and misdemeanors, against a House of Representatives member without the prior permission from the House. In case the House of Representatives is not in session, a permission must be obtained from the House's Bureau, and the House must be notified at its first session.

In all cases, a decision should be taken on any motion for permission to take legal action against a House of Representatives member within thirty days; otherwise, the motion shall be deemed accepted.

Article (114)

The seat of the House of Representatives shall be in Cairo.

However, in exceptional circumstances, the House may hold its sessions elsewhere, at the request of the President of the Republic or one-third of the members of the House of Representatives.

Any meetings held otherwise and any resolutions passed thereby shall be void.

Unofficial Translation

Article (115)

The President of the Republic shall invite the House of Representatives for its annual ordinary session before the first Thursday of October; failing such invitation, the House is required by the Constitution to meet on the stated day.

The ordinary session shall continue for at least nine months. The President of the Republic shall bring each session to close with the approval of the House. This shall not be permissible except after State's General Budget has been approved.

Article (116)

At the President of the Republic's request or upon a motion signed by at least one tenth of the House members, the House of Representatives may hold an extraordinary meeting to consider an urgent issue.

Article (117)

At the first meeting of its annual regular session, the House of Representatives shall elect, from among its members, a speaker and two deputies for the full legislative term. If the office of any of the aforementioned persons becomes vacant, a substitute shall be elected by the House. The House's internal regulations shall provide for the rules and procedures of election. If any of the aforementioned persons fails to fulfill the duties of his office, one-third of the House members may request to relieve him of his office. The relevant decision shall be issued by a majority of two-thirds of the members.

In all cases, neither the Speaker nor any of the two deputies may be elected for more than two consecutive legislative terms.

Article (118)

The House of Representatives shall set its own internal regulations of its work and the manner of exercising its authorities and maintaining order therein. Such internal regulations shall be issued by a law.

Article (119)

The House of Representatives shall be competent to maintain order therein and this duty shall be incumbent upon the Speaker of the House.

Article (120)

The sessions of the House of Representatives shall be held in public.

The House may hold a secret session at the request of the President of the Republic, the Prime Minister, the Speaker of the House, or at least twenty of the House members. By the majority of

Unofficial Translation

its members, the House shall decide whether the discussion in question is to be conducted in a public or a secret session.

Article (121)

The meetings of the House and resolutions passed thereby shall not be deemed valid unless attended by the majority of its members.

In cases other than those requiring a special majority, resolutions shall be passed by the absolute majority of the members present. In case there is a tie of votes, the subject matter in deliberation shall be deemed rejected.

Laws shall be issued by the absolute majority of the members present, provided that such majority constitutes not less than one third of the House members.

The Laws deemed complementary to the Constitution shall be issued by a majority of of two thirds of the House members. Laws regulating presidential or parliamentary or municipal elections, political parties, the judiciary, related to judicial bodies and judicial organizations, and those regulating the rights and freedoms stipulated in the Constitution shall be deemed complementary to the Constitution.

Article (122)

The President of the Republic, the Cabinet, and every House member shall have the right to propose laws.

Every bill presented by the government or one tenth of the House members shall be referred to the competent specialized committees of the House for review and submission of a report to the House. A committee may seek the opinion of experts on the matter in question.

No bill presented by a member can be referred to the specialized committee unless it has been permitted by the committee responsible for proposals and approved by the House. If the committee responsible for proposals rejects a bill, it must provide a reasoned decision.

Any bill or proposed law rejected by the House may not be re-presented during the same legislative term.

(Article 123)

The President of the Republic has the right to issue laws or reject them.

If the President of the Republic objects to a draft law approved by the House of Representatives, he/she shall refer it back to the House of Representatives within thirty (30) days as of the date when the House of Representatives notified the President of such approval. If the President does

Unofficial Translation

not refer the draft law back to the House of Representatives within this period, the draft law shall be deemed a Law and shall be issued.

If the draft law is referred back to the House of Representatives within the aforementioned period and approved again by a majority of two-thirds of its members, it shall be deemed a Law and shall be issued.

Article (124)

The State budget shall include all of its revenues and expenditures without exception. The draft budget shall be submitted to the House of Representatives at least ninety (90) days before the beginning of the fiscal year; and shall not be effective unless approved thereby. Voting thereon shall be made on a section-by-section basis.

The House of Representatives may alter the expenditures stated in the draft budget, except for those allocated to honor a specific State liability.

Should such alteration result in an increase in total expenditures, the House of Representatives must reach an agreement with the Government on the means to procure sources of revenue so as to restore a balance between both. The State budget shall be issued by a law which may include an amendment of another existing law to the extent necessary to achieve such balance.

In all cases, the budget law may not include any provision that puts new burdens on citizens.

The Law shall specify the fiscal year, the method of preparing the State budget, and the provisions of the budgets of public bodies and organizations and their accounts.

The House of Representatives must approve the transfer of any funds from one section of the State budget to another, as well as any expenditure not included therein or in excess of its estimate. Such approval shall be issued by a law.

Article (125)

The final accounts of the State budget must be submitted to the House of Representatives within a period not exceeding six (6) months as of the end of the fiscal year. The annual report of the Central Auditing Organization (CAO) and the latter's notes on the final accounts shall be submitted therewith.

The final accounts shall be put to vote on a section-by-section basis and shall be issued by a law.

The House of Representatives has the right to ask CAO for any additional data or reports.

Article (126)

The Law shall regulate the basic rules for the collection of public funds and the procedures for their disbursement.

Unofficial Translation

Article (127)

The executive power may not obtain a loan or funding or engage in a project that is not listed in the approved State budget which entails expenditure from the State treasury within a subsequent period, except with the approval of the House of Representatives.

Article (128)

The Law shall specify the rules for setting salaries, pensions, indemnities, subsidies, and bonuses which are paid from the State treasury; and shall set out the cases in which exception from such rules may be made, as well as, the authorities in charge of their application.

Article (129)

Every member of the House of Representatives may direct any question to the Prime Minister, or one of his/her deputies, or a minister, or one of his/her deputies on any matter that falls within their respective authorities; and the latter must respond to such question during the same annual session.

The member may withdraw the question at any time. A question may not be converted to an interrogation in the same session.

Article (130)

Every member of the House of Representatives may direct an interrogation to the Prime Minister, or one of his/her deputies or a minister or one of his/her deputies in order to hold them accountable for matters that fall within their respective authorities.

The House of Representatives shall discuss the interrogation at least seven (7) days after its submission, within a maximum of sixty (60) days, except in cases of urgency as determined by the House and agreed by the Government.

Article (131)

The House of Representatives may decide to withdraw confidence from the Prime Minister, or one of his/her deputies or a minister or one of his/her deputies.

Filing a motion of no confidence may not be made except after an interrogation and upon a proposal submitted by at least one-tenth of the members of the House of Representatives. The House of Representatives shall issue a decision after considering the interrogation. Withdrawal of confidence requires the affirmative vote of a majority of the House members.

In all cases, a no-confidence motion may not be filed in connection with an issue that has already been decided upon in the same annual session.

Unofficial Translation

If the House of Representatives decides to withdraw confidence from the Prime Minister, or one of his/her deputies, or a minister or one of his/her deputies, with whom the Government has announced its solidarity with before voting, then that Government must resign. If the no-confidence resolution concerns a certain member of the Government, that member must resign.

Article (132)

At least 20 members of the House of Representatives may request the discussion of a public issue for the purpose of seeking a clarification on the Government's policy relating to such issue.

Article (133)

Any member of the House of Representatives may present a proposed recommendation on a public issue to the Prime Minister or one of his/her deputies, or a minister or one of his/her deputies.

Article (134)

Every member of the House of Representatives may submit an early day motion or urgent statement to the Prime Minister or one of his/her deputies, or a minister or one of his/her deputies in relation to urgent matters of public importance.

Article (135)

The House of Representatives may form a special fact-finding committee or entrust one of its existing committees with finding facts on a public matter or inspect the activities of an administrative body, public agency or public projects, for the purpose of finding facts on a specific issue, and inform the House of Representatives of the true financial, administrative or economic status, or to conduct investigations on a past activity or otherwise. The House of Representatives shall decide what it deems appropriate in this regard.

In order to carry out its mission, such a committee may collect the evidence it deems necessary and may summon individuals to give statements. All bodies shall comply with the committee's requests and place at its disposal all the documents, evidence, or anything otherwise required.

In all cases, every member of the House of Representatives is entitled to obtain any data or information from the executive power which is related to its performance of his/her duties at the House of Representatives.

Article (136)

The Prime Minister and his deputies, and the ministers and their deputies may attend the sessions of either the House of Representatives or any of its committees. Their attendance shall be obligatory if requested by the House. They may seek assistance from senior officials of their choice.

Unofficial Translation

They must be heard whenever they request to speak. They must answer questions relating to issues under discussion, without having the right to vote.

Article (137)

The President of the Republic may not dissolve the House of Representatives except in cases of necessity, by a reasoned decision and following a public referendum. The House of Representatives may not be dissolved for the same reason which caused the dissolution of the previous House.

The President of the Republic shall issue a decision to suspend the sessions of the House and hold a referendum on the dissolution within no more than twenty days. If the voters agree by majority of valid votes, the President of the Republic shall issue the decision of dissolution, and call for new elections within no more than thirty days from the date of the stated decision. The new House shall convene within the ten days following the announcement of final the results.

Article (138)

Every citizen may submit written proposals to the House of Representatives regarding public issues, and may also submit complaints to the House of Representatives to be referred to the competent ministers. If the House of Representatives so requests, the Minister must provide clarifications, and the concerned person shall be informed of the result.

Chapter Two

The Executive Power

Branch I

The President of the Republic

Article (139)

The President of the Republic is the head of State and the head of executive power. He shall care for the interests of the people, safeguard the independence of the nation and the territorial integrity and safety of its lands, abide by the provisions of the Constitution, and assume his authorities as prescribed therein.

Article (140)

The President of the Republic shall be elected for a period of four calendar years, commencing from the day following the termination of the term of his predecessor. The President may only be reelected once.

Unofficial Translation

The procedures for electing the President of the Republic shall be initiated at least one hundred twenty days prior to the end of the presidential term. The result must be announced at least thirty days prior to the end of such term.

The President of the Republic may not hold any partisan position throughout his presidential term.

Article (141)

A presidential candidate must be an Egyptian born to Egyptian parents, and neither he or his parents or his spouse may have held any other nationality. He must enjoy civil and political rights, must have performed the military service or have been exempted therefrom by law, and shall not be less than forty calendar years of age on the day of commencing candidacy registration. Other requirements for candidacy shall be set out by Law.

Article (142)

To be accepted as a candidate for the presidency, candidates must receive the recommendation of at least twenty elected members of the House of Representatives, or support from at least twenty five thousand citizens enjoying the right to vote, in at least fifteen governorates, with a minimum of one thousand supporter from each governorate.

In all cases, no one can support more than one candidate as regulated by Law.

Article (143)

The President of the Republic shall be elected by direct secret ballot, with an absolute majority of valid votes.

Procedures for electing the President of the Republic are regulated by Law.

Article (144)

As a condition for assuming his duties, the President of the Republic shall take the following oath before the House of Representatives: "I swear by The Almighty God to loyally uphold the republican system, respect the Constitution and the Law, fully uphold the interests of the People and to safeguard the independence of the nation and the integrity and safety of its territories."

In case of the absence of the House of Representatives, the oath shall be taken before the General Assembly of the Supreme Constitutional Court.

Article (145)

The salary of the President of the Republic shall be determined by Law. The President may not receive any other salary or remuneration. No modification to the salary may come into effect during the presidential term during which it is approved. Throughout his presidential term, the

Unofficial Translation

President may not, whether in person or by proxy, be self-employed, engage in commercial, financial or industrial activity, buy, rent or lease any property owned by the state or by a public-law legal person, or a public enterprise sector company, sell or barter any part of his own property with the State, or conclude a contract with the State as a vendor, supplier, contractor or otherwise as set out by Law. Any of such acts shall be void.

The President must submit a financial estate disclosure upon taking office, upon leaving it, and at the end of each year of service. Such financial estate disclosure is to be published in the Official Gazette.

Throughout the presidential term, the President of the Republic may not award himself any orders, decorations or medals.

In case the President of the Republic receives, in person or by proxy a cash or in-kind gift because of or in connection with the presidential office, title thereto shall devolve to the State public treasury.

Article (146)

The President of the Republic shall assign a Prime Minister to form the government and introduce his/her program to the House of Representatives. If his government does not win the confidence of the majority of the members of the House of Representatives within thirty days at the most, the President shall appoint a Prime Minister who is nominated by the party or the coalition that holds the majority or the highest number of seats in the House of Representatives. If the government of such prime minister fails to win the confidence of the majority of the members of the House of Representatives within thirty days, the House shall be deemed dissolved, and the President of the Republic shall call for the election of a new House of Representatives within sixty days from the date on which the dissolution is announced.

In all cases, the total periods for choice of government set forth in this Article shall not exceed sixty days.

In case the House of Representatives is dissolved, the Prime Minister shall present to the new House of Representatives the formation of his government and its program, at its first session.

In the event the government is chosen from the party or the coalition that holds the majority or the highest number of seats in the House of Representatives, the President of the Republic shall, in consultation with the Prime Minister, choose the Ministers of Defense, Interior, Foreign Affairs and Justice.

Article (147)

The President of the Republic may relieve the government from carrying out its duties, subject to the approval of the majority of the members of the House of Representatives.

Unofficial Translation

The President of the Republic may conduct a cabinet reshuffle after consultation with the Prime Minister and approval of the House of Representatives by an absolute majority of the members present , which must not be less than one third of its members.

Article (148)

The President of the Republic may delegate some of his powers to the Prime Minister, his deputies, ministers, or governors. None of them may delegate such authorities to others. All of the foregoing shall be regulated by Law.

Article (149)

The President of the Republic may call the government to convene a meeting to consult on important issues, and the President shall preside over the meetings that he attends.

Article (150)

Jointly with the Cabinet, the President of the Republic shall set the State's General Policy and oversee its implementation as stated in the Constitution.

The President of the Republic may deliver a statement on the State's General Policy before the House of Representatives at the opening of its annual regular session.

The President may deliver other statements or address other messages to the House.

Article (151)

The President of the Republic shall represent the State in its foreign relations and conclude treaties and ratify them after the approval of the House of Representatives. Such treaties shall acquire the force of law following their publication in accordance with the provisions of the Constitution.

Voters must be called for referendum on the treaties related to making peace and alliance, and those related to the rights of sovereignty. Such treaties shall only be ratified after the announcement of their approval in the referendum.

In all cases, no treaty may be concluded which is contrary to the provisions of the Constitution or which results in ceding any part of state territories.

Article (152)

The President of the Republic is the Supreme Commander of the Armed Forces. The President shall not declare war, or send the armed forces to a combat mission outside the State borders,

Unofficial Translation

except after consultation with the National Defense Council and obtaining the approval of the House of Representatives by a majority of two-thirds of the members.

In case the House of Representatives has not been elected, the Supreme Council of the Armed Forces (SCAF) must be consulted and the approval of both the Cabinet and National Defense Council must be obtained.

Article (153)

The President of the Republic shall appoint and dismiss civil and military employees and political representatives and accredit political representatives of foreign States and bodies in accordance with the Law.

Article (154)

After consultation with the Cabinet, the President of the Republic may declare the state of emergency as regulated by Law. Such declaration must be presented to the House of Representatives within the following seven days to decide thereon as it deems fit.

If the declaration takes place while the House of Representatives is not in regular session, the House must be invited to convene immediately in order to consider such declaration.

In all cases, the declaration of the state of emergency must be approved by a majority of the members of the House of Representatives. The state of emergency shall be declared for a specified period not exceeding three months, which may only be extended for another similar period after obtaining the approval of two-thirds of the House members. In case the House of Representatives has not been elected, the matter shall be referred to the Cabinet for approval provided, however, that it is presented to the new House of Representatives at its first session.

The House of Representatives may not be dissolved while the state of emergency is in force.

Article (155)

After consultation with the Cabinet, the President of the Republic may issue a pardon or reduce a sentence.

General amnesty may only be granted by virtue of a law, ratified by the majority of the members of the House of Representatives.

Article (156)

In case an event which requires taking urgent measures, which cannot be delayed, occurs while the House of Representatives is not in session, the President of the Republic shall call the House for an urgent meeting to present the matter thereto. If the House of Representatives has not been elected, the President of the Republic may issue decrees having the force of law, provided that

Unofficial Translation

they are then presented to, discussed and approved by the new House of Representatives within fifteen days from the commencement of its session. If such decrees are neither presented nor discussed by the House, or if they are presented but not ratified thereby, their force of law shall retroactively be revoked without need for issuing a decision to that effect, unless the House confirms its effectiveness during the previous period or decides to settle the consequences thereof.

Article (157)

Without prejudice to the provisions of the Constitution, the President of the Republic may call for a referendum on issues relating to the supreme interests of the State.

In case a call for referendum involves more than one issue, voting must be made separately on each issue.

Article (158)

The President of the Republic may submit his resignation to the House of Representatives. If the House has not been elected, he shall submit the same to the General Assembly of the Supreme Constitutional Court.

Article (159)

Accusing the President of the Republic of violating the provisions of the Constitution, treason or any other felony must be based on a motion signed by at least the majority of the members of the House of Representatives. The indictment shall only be issued by the majority of two-thirds of the members of the House of Representatives and after carrying an investigation by the Prosecutor General. In case the Prosecutor General is prevented from same, he shall be replaced by one of his assistants.

As soon as this indictment is issued, the President of the Republic shall be stopped from carrying out his duties; this is considered as a temporary impediment precluding the President from performing his competences until a verdict is issued in the case.

The President of the Republic shall be tried before a special court headed by the President of the Supreme Judicial Council with the membership of the most senior deputy of the President of the Supreme Constitutional Court, the most senior deputy of the President of the State Council, and the two most senior Presidents of the Courts of Appeal; prosecution is to be carried out before such court by the Prosecutor General. In case one of the aforementioned persons is prevented from serving, he shall be replaced by the person following him in seniority. The court verdicts shall be final and not subject to appeal.

The Law shall regulate the investigation and trial procedures. In case of conviction, the President of the Republic shall be relieved of his post without prejudice to any other penalties.

Unofficial Translation

Article (160)

In case the President of the Republic is temporarily prevented from assuming his powers, the Prime Minister shall act in his place.

If the President of the Republic's office becomes vacant due to his resignation, death, or permanent inability to work, the House of Representatives shall announce the vacancy. If such vacancy is attributable to any other reason, such announcement shall be made by a majority of at least two thirds of the members of House of Representatives. The House of Representatives shall then notify the National Electoral Commission, and the Speaker of the House of Representatives shall temporarily assume the powers of the President of Republic.

In case the House of Representatives has not been elected, the General Assembly of the Supreme Constitutional Court and its Chairman shall replace the House of Representatives and its Speaker with respect to the above.

In all events, a new President must be elected within a period not exceeding ninety (90) days as of the date of vacancy. In such a case, the presidential term shall start as of the date of announcement of the election results.

The interim President may not run for presidency or request any amendment to the Constitution or dissolve the House of Representatives or dismiss the Government.

Article (161)

The House of Representatives may propose to withdraw confidence from the President of the Republic and hold early presidential elections upon filing a reasoned motion to be signed by at least the majority of the members of the House of Representatives and upon approval of two-thirds of its members. The motion may only be filed once for the same reason within the presidential term.

Upon approval of the proposal to withdraw confidence, the matter of withdrawing confidence from the President of the Republic and holding early presidential elections shall be put to public referendum to be called by the Prime Minister. If the majority approves the decision to withdraw confidence, the President of the Republic shall be relieved from his office, the office of the President of the Republic shall be deemed vacant, and early presidential elections shall be held within sixty (60) days as of the date of announcing the results of referendum. If the result of the referendum is in the negative, the House of Representatives shall be deemed dissolved, and the President of the Republic shall call for election of a new House of Representatives within thirty (30) days as of the date of dissolution.

Unofficial Translation

Article (162)

If the vacancy of the presidential office coincides with the holding of a referendum or the election of the House of Representatives, the presidential elections shall be given priority. The then existing House of Representatives shall remain in place until the completion of the presidential elections.

Branch II

The Government

Article (163)

The government is the supreme executive and administrative body of the State, and consists of the Prime Minister, his/her deputies , the Ministers, and their deputies.

The Prime Minister shall head the government, oversee its work, and direct the performance of its functions.

Article (164)

The Prime Minister shall be an Egyptian citizen born to Egyptian parents and neither he/she nor his/her spouse may hold the nationality of any other country, shall enjoy civil and political rights, shall have been drafted into or legally exempted from the military service, and shall be at least thirty five (35) Gregorian years of age at the time of appointment.

Anyone appointed as a member of the government shall be an Egyptian citizen, shall enjoy all civil and political rights, shall have been drafted into or legally exempted from the military service, and shall be at least thirty (30) Gregorian years of age at the time of appointment.

It is prohibited to combine between the membership of the government and the membership of the House of Representatives. . If a member of the House of Representatives is appointed to the government, the seat thereof in the House shall become vacant as at the date of this appointment.

Article (165)

As a condition for assuming their duties, the Prime Minister and members of government shall take the following oath before the President of the Republic: “I swear by Allah, the Almighty, to loyally uphold the republican system, to respect the Constitution and the law, to fully uphold the interest of the People, and to safeguard the independence of the nation and the integrity and safety of its territories.”

Unofficial Translation

Article (166)

The salary of the Prime Minister and the members of government shall be defined by Law, and they may not receive any other salary or remuneration, nor engage, throughout the term of their respective offices, whether in person or through an intermediary, in self-professions, or commercial, financial or industrial business activities. Further, they shall not buy or rent any property owned by the state or a public legal person or a public sector company, or a public enterprise sector company, nor lease or sell any of their property to, or barter the same with the State, nor conclude a contract with the State as vendors, suppliers, contractors or otherwise. Any such actions shall be deemed null and void.

The Prime Minister and the members of government shall submit a financial estate disclosure upon taking office, upon leaving the same, and at the end of each year of service. The financial estate disclosure shall be published in the Official Gazette.

If the Prime Minister or any of the members of government receive cash or in-kind gifts, because of or in relation to their posts, the ownership thereof shall transfer to the State's treasury. The foregoing shall be regulated by Law.

Article (167)

The government shall particularly exercise the following functions:

1- To collaborate with the President of the Republic in developing the general policy of the State, and to supervise its implementation;

2- To maintain the security of the nation, and to protect the rights of citizens and the interest of the State;

3- To direct, coordinate and follow up on the work of the ministries and their affiliated public bodies and organizations;

4- To prepare draft bills and decrees;

5- To issue administrative decrees in accordance with the law, and to follow up on their implementation;

6- To develop the draft for the general plan of the State;

7- To prepare the draft annual budget of the State;

8- To conclude loan contracts and to grant the same in accordance with the provisions of the Constitution;

9- To implement the laws.

Unofficial Translation

Article (168)

Within the framework of the State's general policy, the minister shall develop the Ministry's general policy in collaboration with the competent authorities, supervise the implementation thereof and provide guidance and oversight.

Top management posts in all ministries shall include a permanent undersecretary to ensure institutional stability and raising the level of efficient implementation of its policy.

Article (169)

Any member of the government may make a statement before the House of Representatives, or one of its committees, concerning any matters falling within his/her mandate.

The House or the committee shall discuss such statement and convey its opinion regarding it.

Article (170)

The Prime Minister shall issue the necessary regulations for the execution of laws, in a manner that shall not involve any disruption of, amendment to, or exemption from their execution, and shall have the right to delegate others in issuing them, unless the law designates who shall issue the required executive regulations.

Article (171)

Upon the approval of the Council of Ministries, the Prime Minister shall issue the decrees necessary for the creation and organization of public utilities and services.

Article (172)

Upon the approval of the Council of Ministries, the Prime Minister shall issue the disciplinary regulations.

Article (173)

The Prime Minister and the members of the government shall be subject to the general rules governing investigation and trial procedures, in case that they commit crimes while or by reason of exercising the functions of their posts. The end of their term of service shall not preclude the institution or resumption of prosecution against them.

In case that the Prime Minister or any of the members of the government is accused of treason, the provisions stipulated in Article 159 herein shall apply.

Unofficial Translation

Article (174)

In case of resignation of the Prime Minister, the letter of resignation shall be submitted to the President of the Republic. If a minister offers resignation, it shall be submitted to the Prime Minister.

Branch III

The Local Administration

Article (175)

The State shall be divided into administrative units that enjoy legal personality. Such units shall include governorates, cities and villages. Other administrative units that have the legal personality may be established, if public interest so requires.

When establishing or abolishing local units or amending their boundaries, the economic and social conditions shall be taken into account. All the foregoing shall be regulated by Law.

Article (176)

The state shall ensure administrative, financial, and economic decentralization. The law shall regulate the methods of empowering administrative units to provide, improve, and well manage public facilities, and shall define the timeline for transferring powers and budgets to the local administration units.

Article (177)

The State shall ensure the fulfillment of the needs of local units in terms of scientific, technical, administrative and financial assistance, and the equitable distribution of facilities, services and resources, and shall bring development levels in these units to a common standard and achieve social justice between these units, as regulated by Law.

Article (178)

Local units shall have independent financial budgets.

The resources of local units shall include, in addition to the resources allocated to them by the State, taxes and duties of a local nature, whether primary or auxiliary. The same rules and procedures for the collection of public funds by the State shall apply to collection of such taxes and duties.

The foregoing shall be regulated by law.

Unofficial Translation

Article (179)

The law shall regulate the manner in which governors and heads of other local administrative units are appointed or elected, and shall determine their competences.

Article (180)

Every local unit shall elect a local council by direct and secret ballot for a term of four years. A candidate shall be at lease twenty one (21) Gregorian years of age. The law shall regulate the other conditions for candidacy and procedures of election, provided that one quarter of the seats shall be allocated to youth under thirty five (35) years of age and one quarter shall be allocated for women, and that workers and farmers shall be represented by no less than 50 percent of the total number of seats, and these percentages shall include an appropriate representation of Christians and people with disability.

Local councils shall be competent to follow up the implementation of the development plan, f monitor of the different activities, exercise of oversight over the executive authorities using tools such as providing proposals, and submitting questions, briefing motions, interrogations and others, and to withdraw confidence from the heads of local units, as regulated by Law.

The law shall define the competences of other local councils, their financial sources, guarantees of their members, and the independence of such councils.

Article (181)

Local councils' resolutions that are issued within their respective mandates shall be final. They shall not be subject to the interference by the executive authority, except to prevent the council from overstepping its jurisdiction, or causing damage to the public interest or the interest of other local councils.

Any dispute pertaining to the jurisdiction of these local councils in villages, centers or towns shall be settled by the governorate-level local council. Disputes regarding the jurisdiction of governorate-level local councils shall be resolved, as a matter of urgency, by the General Assembly of the Legal Opinion and Legislation Departments of the State Council. The foregoing shall be regulated by Law.

Article (182)

Every local council shall develop its own budget and final accounts, as regulated by Law.

Article (183)

Local councils shall not be dissolved by virtue of a general administrative action.

The Law shall regulate the manner of dissolving and re-electing local councils.

Unofficial Translation

Chapter Three

The Judiciary

Branch I

General Provisions

Article (184)

The Judiciary is an autonomous authority that carries out its tasks through courts of all types and degrees. Courts shall issue their rulings in accordance with the law, and the law shall define the jurisdiction of the courts. Interference in the affairs of the courts or in the lawsuits under their consideration shall constitute a crime that does not lapse by prescription.

Article (185)

Each judicial body or organization shall manage its own affairs, and shall have an independent budget, the components of which shall be fully examined by the House of Representatives. Upon its approval, this budget shall be included in the State budget under one budget line. Each judicial body or organization shall be consulted with regards to the bills regulating its affairs.

Article (186)

Judges are independent and immune to dismissal, are subject to no other authority but the law, and are equal in rights and duties. The conditions and procedures for their appointment, secondment and retirement shall be regulated by the law. The law shall further regulate their disciplinary accountability. They may not be fully or partly seconded except to the agencies determined by the law and to perform the tasks set forth therein. All the foregoing shall be in the manner that maintains the independence and impartiality of the judiciary and judges, and shall prevent conflicts of interest. The rights, duties and guarantees granted to them shall be specified by Law.

Article (187)

Court sessions shall be public, unless the court decides on its secrecy to safeguard public order or public morals. In all cases, court judgments shall be pronounced in publicly held sessions.

Branch II

The Judiciary & The Prosecution

Article (188)

The judiciary shall decide on all disputes and crimes, except those falling within the jurisdiction of other judicial bodies. It shall solely have the jurisdiction to settle disputes relating to its own

Unofficial Translation

members. The affairs of the judiciary shall be managed by a Supreme Council, the structure and jurisdiction of which shall be regulated by Law.

Article (189)

The Public Prosecution is an integral part of the judiciary. It shall carry out the investigation and prosecution of criminal cases, except those excepted by the law. The law shall determine its other jurisdictions.

The Prosecutor General shall be in charge of the Public Prosecution. He shall be chosen by the Supreme Council of the Judiciary from among those ranked as Vice presidents of the Court of Cassation, or from those ranked as Presidents of the Courts of Appeal or from the Assistants to the Prosecutor General. He shall be appointed by virtue of a Presidential Decree for four years or for the remaining years until he reaches the age of retirement whichever is earlier, and this appointment shall be only once during his term of service.

Branch III

The State Council

Article (190)

The State Council is an autonomous judicial body, and it shall have the exclusive jurisdiction to settle administrative disputes and disputes relevant to the execution of all its rulings. It shall have jurisdiction over disciplinary suits and appeals, and the exclusive jurisdiction to provide advice regarding legal issues to the administrative bodies determined by the law. It shall also review and draft bills and decrees of legislative nature, and shall review draft contracts to which the state or any other public authority is a party. The law shall determine its other jurisdictions.

Chapter Four

The Supreme Constitutional Court

Article (191)

The Supreme Constitutional Court is an autonomous and independent judicial body having its headquarters in Cairo. However, in cases of emergency it may, upon the approval of its General Assembly, hold its sessions elsewhere in Egypt. It shall have an independent budget, which shall be fully examined by the House of Representatives. Upon its approval, this budget shall be included in the State budget under one budget line. The General Assembly of the court shall manage its affairs and it shall be consulted regarding bills relevant to its affairs.

Unofficial Translation

Article (192)

The Supreme Constitutional Court shall be solely competent to decide on the constitutionality of laws and regulations, to interpret legislative provisions, and to adjudicate on disputes pertaining to the affairs of its members, on jurisdictional disputes between judicial bodies and entities that have judicial jurisdiction, on disputes pertaining to the implementation of two final contradictory judgments, one of which is rendered by a judicial body or an authority with judicial jurisdiction and the other is rendered by another , and on disputes pertaining to the execution of its judgments and decisions.

The law shall determine the Court's other competences and regulate the procedures that are to be followed before the Court.

Article (193)

The Court shall be composed of a President and a sufficient number of deputies to the President.

The Commissioners of the Supreme Constitutional Court shall have a President and a sufficient number of Commission presidents, advisors and assistant advisors.

The General Assembly of the Court shall elect its President from among the most senior three vice-presidents of the Court. It shall further choose the vice-presidents and the members of its Commissioners, and the appointment thereof shall be made by virtue of a decree by the President of the Republic. The foregoing shall be regulated by Law.

Article (194)

The President and the vice-presidents of the Supreme Constitutional Court, and the President and members of its Commissioners are independent and immune to dismissal, and are subject to no other authority but the law. The law shall set out the conditions they must meet. The Court shall be responsible for their disciplinary accountability, as stated by the law. All rights, duties and guarantees granted to other members of the judiciary shall apply to them.

Article (195)

The judgments and decisions issued by the Supreme Constitutional Court shall be published in the Official Gazette, and they shall be binding upon everyone and all of the State authorities. They shall have *Res judicata* vis-à-vis all of them.

The law shall regulate the consequences of a judgment rendering a text of law unconstitutional.

Unofficial Translation

Chapter Five

Judicial Organizations

Article (196)

The State Lawsuits Authority is an independent judicial organization. It undertakes the legal representation of the State in lawsuits filed by or against the State, and of proposing amicable settlement of disputes at any stage of litigation. It shall further have technical oversight on the departments of legal affairs of the State administrative bodies with regard to cases handled thereby. It shall draft contracts referred thereto by administrative bodies and to which the State is party. The foregoing shall be regulated by Law.

Other competences of the Organization shall be defined by the law. Its members shall have all of the guarantees, rights and duties assigned to other members of the Judiciary. Their disciplinary accountability shall be regulated by the law.

Article (197)

The Administrative Prosecution is an independent judicial organization. It undertakes investigations into financial and administrative violations, and also those referred to it. Regarding these violations, the Administrative Prosecution shall have the authorities of the administrative body to impose disciplinary penalties. Challenges against the decision of the Prosecution shall be filed before the competent disciplinary court at the State Council. It shall further initiate actions, appeals, and disciplinary proceedings before the State Council courts. All the foregoing shall be regulated by Law.

Other competences of the Administrative Prosecution shall be defined by law. All guarantees, rights and duties assigned to other members of the Judiciary shall apply to its members. Their disciplinary accountability shall be regulated by the law.

Chapter Six

The Legal Profession

Article (198)

The legal profession is a free profession which participates with the Judicial Authority in the establishment of justice and the rule of law, and ensures the right to defense. It shall be practiced by independent attorneys, and attorneys of public authorities, public sector companies and public enterprise sector companies. All attorneys shall have, while performing their duties to uphold the right to defense before the courts, the guarantees and protection granted to them by the law. Such rights shall also be granted to them before investigation and inquiry authorities. Except in cases of *flagrante delicto*, the arrest or detention of attorneys while exercising their right to defense shall be prohibited. The foregoing shall be determined by the law.

Unofficial Translation

Chapter Seven

Experts

Article (199)

Judicial experts, forensic medicine experts, and notary public's technical staff undertake their duties independently, and shall have the guarantees and protection required for them to perform their tasks, as regulated by the Law.

Chapter Eight

The Armed Forces & The Police

Branch I

The Armed Forces

Article (200)

The Armed Forces belong to the People, and their duty is to protect the country, and preserve its security and the integrity of its territories. Only the State shall be entitled to establish the Armed Forces. No individual, organization, entity, or group shall be allowed to create military or quasi-military squadrons, groups or organizations.

The Armed Forces shall have a supreme council, as regulated by Law.

Article (201)

The Minister of Defense is the Commander in Chief of the Armed Forces, and shall be appointed from among its officers.

Article (202)

The Law regulates the military mass mobilization, and determines the conditions of the military service, promotion and retirement in the Armed Forces.

The judicial committees for officers and personnel of the Armed Forces shall be solely competent to adjudicate on all administrative disputes pertaining to decisions affecting them. The Law regulates the rules and procedures for challenging the decisions made by these committees.

Unofficial Translation

Branch II

National Defense Council

Article (203)

National Defense Council shall be chaired by the President of the Republic and comprise the membership of the Prime Minister, the Speaker of the House of Representatives, the Minister of Defense, the Minister of Foreign Affairs, the Minister of Finance and the Minister of Interior, the Chief of the General Intelligence Service, the Chief of Staff of the Armed Forces as well as the Commanders of the Navy, the Air Forces and Air Defense, the Chief of Operations of the Armed Forces, and the Head of Military Intelligence.

The Council shall be competent to examine the matters pertaining to preserving the security and integrity of the country, and to discuss the budget of the Armed Forces, which shall be included in the State budget under one budget line. The opinion of the Council shall be obtained on the bills concerning the Armed Forces.

Other competences of the Council shall be specified by Law.

Upon discussing the budget, the Head of the Financial Affairs Department of the Armed Forces and the heads of the Planning and Budgeting Committee and the National Security Committee at the House of Representatives shall join the Council.

The President of the Republic may invite any person having relevant expertise to attend the Council's meetings without having the right to vote.

Branch III

Military Courts

Article (204)

The Military Court is an independent judicial body exclusively competent to adjudicate on all crimes pertaining to the Armed Forces, the officers and personnel thereof, and their equivalents, and on the crimes committed by the personnel of the General Intelligence while and by reason of performing their duties.

No civilian shall face trial before the Military Court, except for crimes that constitute a direct assault against military facilities or camps of the Armed Forces, or their equivalents, against military zones or border zones determined as military zones, against the Armed Forces' equipment, vehicles, weapons, ammunition, documents, military secrets, or its public funds, or against military factories; crimes pertaining to military service; or crimes that constitute a direct assault against the officers or personnel of the Armed Forces by reason of performing their duties.

Unofficial Translation

The law shall define such crimes, and specify the other competences of the Military Court.

Members of the Military Court shall be independent and shall be immune to dismissal. They shall have all the guarantees, rights and duties stipulated for the members of other judicial bodies.

Branch IV

National Security Council

Article (205)

The National Security Council shall be chaired by the President of the Republic, and comprise the membership of the Prime Minister, the Speaker of the House of Representatives, the Minister of Defense, the Minister of Interior, the Minister of Foreign Affairs, the Minister of Finance, the Minister of Justice, the Minister of Health, the Minister of Communication and the Minister of Education, the Chief of the General Intelligence Service, and the Head of the Committee of Defense and National Security at the House of Representatives.

The Council shall be responsible for adopting strategies for establishing the security of the country and facing disasters and crises of all kinds, shall take the necessary measures to contain them, to identify sources of threat to the Egyptian national security, inside the country or abroad, and to undertake the necessary actions to address them at both official and popular levels.

The Council may invite any person having relevant expertise to attend its meetings without having the right to vote.

The law shall determine the other competences of the Council and its regulations.

Branch V

The Police

Article (206)

The police force is a statutory civil body that is dedicated to the service of the People and its loyalty shall be to the People. It shall ensure safety and security of the citizens, preserve public order and morality. It shall comply with the duties set out in the Constitution and the law, and shall respect human rights and fundamental freedoms. The State shall guarantee that the staff of the Police force perform their duties, and the relevant guarantees shall be regulated by Law.

Unofficial Translation

Article (207)

A supreme police council shall be formed from among the most senior officers of the police force and the Head of the Legal Opinion Department at the State Council. The Council shall be competent to assist the Minister of Interior in the organization of the Police force and management of the affairs of its staff members. The other competences of the Council shall be determined by Law. The Council shall be consulted in connection with any laws pertaining to the police force.

Chapter Nine

National Elections Commission

Article (208)

The National Elections Commission is an independent authority and shall be solely competent to administer referenda and elections of the president, the parliament and the local councils. Such administration shall include the development and updating of a database for voters, proposing the division of constituencies, determination of controls for promotion and funding of electoral campaigns, as well as electoral expenditure, the disclosure of such expenditure, the supervision of such controls, the facilitation of the procedures for out-of-country voting by expatriate Egyptians, and other procedures till the announcements of the results.

The foregoing shall be regulated by law.

Article (209)

The National Elections Commission shall be administered by a board composed of 10 members to be equally assigned on full time basis from among those ranked as Vice-presidents of the Court of Cassation, those ranked as Presidents of the Courts of Appeal, Vice-presidents of the State Council, the State Lawsuits Organization and the Administrative Prosecution. They shall be selected by the Supreme Judicial Council and special councils of the aforementioned judicial bodies and organizations, as the case may be, provided that they are not members thereof. They shall be appointed by virtue of a decree by the President of the Republic. They shall be assigned to work on a full time basis at the Commission for one term of six years. The Commission shall be chaired by the most senior judge at the Court of Cassation.

Half of the members of the Council shall be replaced every three years.

The Commission may seek the assistance of independent public figures, specialists, and those deemed to have relevant expertise in the field of elections. They shall not have the right to vote.

Unofficial Translation

The Commission shall have a permanent executive body. The law shall determine the composition and constitution of such executive body, and the rights, duties and guarantees of its members in a way that achieves their neutrality, independence and integrity.

Article (210)

Voting and counting of votes in referenda and elections shall be administered by members of the Commission under the overall supervision of its Board. It may seek the help of members of judicial organizations.

The voting and counting of votes in elections and referenda which take place during the 10 years following the effective date of this Constitution shall be totally overseen by members of judicial bodies and organizations according to the Law.

The High Administrative Court shall be competent to adjudicate on challenges filed against the Commission's decisions pertaining to referenda, presidential and parliamentary elections, and the results thereof. Challenges against elections of local councils shall be filed before the Administrative Courts. Dates to file challenges against these decisions shall be specified by law, provided that challenges shall be finally decided within ten days from the date of recording the challenge.

Chapter Ten

Supreme Council for the Regulation of Media

Article (211)

The Supreme Council for the Regulation of Media is an independent entity that has a legal personality, and enjoys technical, financial and administrative independence, and has an independent budget.

The Council shall be competent to regulate the affairs of audio and visual media and regulate the printed and digital press, and other media means.

The Council shall bear the responsibility for guaranteeing and protecting the freedom of press and media as stipulated in the Constitution, safeguarding its independence, neutrality, plurality and diversity, preventing monopolistic practices, monitoring the legality of the sources of funding of press and media institutions and developing the controls and criteria necessary to ensure compliance by the press and media outlets with the professional and ethical standards, and national security needs as stated in the Law.

The law shall determine the composition and regulations of the Council, and the employment conditions for its staff.

Unofficial Translation

The Council shall be consulted with respect to the bills and regulations related to its scope of competence..

Article (212)

The National Press Organization is an independent organization that shall manage and develop state-owned press institutions and their assets, as well as ensure their modernization, independence, neutrality and their adherence to good professional, administrative and economic standards.

The law shall determine the composition and regulations of the Organization, and the employment conditions for its staff.

It shall be consulted with respect to the bills and regulations pertaining to its scope of work. .

Article (213)

The National Media Organization is an independent organization that shall manage and develop state-owned visual, audio and digital media outlets and their assets, as well as ensure their development, independence, neutrality and their adherence to good professional, administrative and economic standards.

The law shall determine the composition and regulations of the Organization and the employment conditions for its staff.

It shall be consulted with respect to the bills and regulations pertaining to its scope of work. .

Chapter Eleven

National Councils, Autonomous Organizations & Control Agencies

Branch I

National Councils

Article (214)

The law shall specify the independent national councils, including the National Council for Human Rights, the National Council for Women, the National Council for Childhood and Motherhood, and the National Council for Disabled Persons. The law shall state the composition, mandates, and guarantees for the independence and neutrality of their respective members. Each council shall have the right to report to the competent authorities any violations pertaining to their fields of work.

Unofficial Translation

These councils shall have legal personalities and shall be technically, financially, and administratively independent. They shall be consulted with respect to the bills and regulations pertaining to their affairs and fields of work.

Branch II

Autonomous Organizations and Control Agencies

Article (215)

Autonomous Organizations and control agencies shall be specified by Law. These organizations and agencies shall have legal personality, and shall be technically, financially and administratively independent. They shall be consulted with respect to the bills and regulations that relate to their fields of work. These bodies and agencies shall include the Central Bank, the Egyptian Financial Supervisory Authority (EFSA), the Central Auditing Organization (CAO), and the Administrative Control Authority.

Article (216)

The formation of each individual autonomous organization or regulatory agency shall be enacted by a law defining its competences and regulations, and stipulating guarantees for its independence, the necessary protection for its members, and their employment conditions in a way that ensures their neutrality and independence.

The President of the Republic shall appoint the heads of such organizations and regulatory agencies, upon the approval of the House of Representatives by a majority of its members, for a one-time renewable term of four years. They shall not be dismissed, except in the cases stated in the law. The same prohibitions applicable to the Ministers shall apply to these heads.

Article (217)

Autonomous organizations and control agencies shall submit annual reports to the President of the Republic, the House of Representatives and the Prime Minister, immediately after their issuance.

The House of Representatives shall examine such reports and take the appropriate action within a period not exceeding four months from the date of receipt. The reports shall be made available to the public.

Autonomous organizations and control agencies shall notify the competent investigation authorities of any evidence discovered in relation to violations or crimes. They shall take the necessary measures with regards to these reports within a specified period of time. The foregoing shall be regulated by Law.

Unofficial Translation

Article (218)

The State shall fight corruption, and the competent control agencies and organizations shall be identified by Law.

Competent control agencies and organizations shall coordinate their activities in combating corruption, enhancing the values of integrity and transparency in order to ensure the sound performance of public functions and preserve public funds, and shall develop and follow up execution of a national strategy to combat corruption in collaboration with other competent agencies and organizations, as regulated by Law.

Article (219)

The Central Auditing Organization shall be responsible for monitoring the funds of the State, the funds of the State public and independent legal persons and other authorities as specified by Law; s well as being responsible for monitoring the implementation of the State budget and independent budgets and for auditing its final accounts.

Article (220)

The Central Bank shall be responsible for developing and overseeing the implementation of monetary, credit, and banking polices, and for monitoring the performance of banks. It is solely entitled to issue banknotes. It shall maintain the integrity of the monetary and banking system, and the stability of prices within the framework of the State general economic policy, as regulated by Law.

Article (221)

The Egyptian Financial Supervisory Authority (EFSA) shall be responsible for monitoring and supervising financial non-banking markets and instruments including capital markets, futures exchanges, insurance activities, mortgage finance, financial leasing, and factoring and securitization, as regulated by Law.

Unofficial Translation

Part VI

General & Transitional Provisions

Chapter One

General Provisions

Article (222)

The city of Cairo is the capital of the Arab Republic of Egypt.

Article (223)

The national flag of the Arab Republic of Egypt consists of three colors; black, white, and red with an eagle taken from the "Eagle of Salah El Din" in golden yellow. The emblem, decorations, insignia, seal and the national anthem shall be determined by Law.

Desecration of the Egyptian flag shall be a crime punishable under the law.

Article (224)

All the provisions stipulated by laws and regulations prior to the promulgation of this Constitution shall remain in force, and they may neither be amended nor repealed except in accordance with the regulations and procedures prescribed herein.

The state shall be obliged to issue laws executing the provisions of this Constitution.

Article (225)

Laws shall be published in the Official Gazette within 15 days from the date of their issuance, to be effective after 30 days from the day following the date of publication, unless the law specifies a different date.

Provisions of the laws shall only apply from the date of their entry into force. However, in articles pertaining to non-criminal and non-tax-related matters, the contrary may be provided for in the law, upon approval by a majority of two thirds of the members of House of Representatives.

Article (226)

The amendment of one or more articles of the Constitution may be requested by the President of the Republic or one-fifth of the members of the House of Representatives. The request shall specify the articles requested to be amended and the reasons for such amendment.

Unofficial Translation

In all cases, the House of Representatives shall discuss the amendment request within 30 days from the date of its receipt. The House shall issue its decision to accept the request in whole or in part by a majority of its members.

If the request is rejected, the same articles may not be requested to be amended again before the next legislative term.

If the amendment request is approved by the House, it shall discuss the text of the articles requested to be amended within 60 days from the date of approval. If approved by a two-thirds majority of the House's members, the amendment shall be put to a public referendum within 30 days from the date the approval is issued. The amendment shall be effective from the date on which the referendum's result and the approval of a valid majority of the participants in the referendum are announced.

In all cases, texts pertaining to the re-election of President of the Republic or the principles of freedom or equality stipulated in this Constitution may not be amended, unless the amendment brings more guarantees.

Article (227)

The Constitution and its preamble and all its provisions constitute an integral text and an indivisible whole, and its provisions constitute one coherent unit.

Chapter Two

Transitional Provisions

Article (228)

The High Electoral Committee and the Presidential Election Committee existing at the time this Constitution comes into force shall undertake the full supervision of the first parliamentary and presidential elections following the effective date of the Constitution. The funds of the two committees shall be transferred to the National Electoral Commission, immediately upon its formation.

Article (229)

The elections of the House of Representatives following the date on which this Constitution comes into effect shall take place in accordance with the provisions of Article 102 hereof.

Article (230)

Election of the President of the Republic or the House of Representatives shall take place as regulated by Law, provided that the first of either elections shall take place within a period not

Unofficial Translation

less than 30 days and not more than 90 days after the date on which this Constitution comes into effect.

In all cases, the following electoral procedures shall commence within a period not exceeding six months as of the date on which the Constitution comes into effect.

Article (231)

The presidential term following the effective date of this Constitution shall commence as of the date on which the final result of the election is announced.

Article (232)

The Interim President of the Republic shall continue to exercise presidential powers stipulated herein until the elected President of the Republic takes the constitutional oath.

Article (233)

If the Interim President of the Republic is rendered unable to exercise his powers by reason of a temporary impediment, the Prime Minister shall replace him.

If the Interim Presidential office becomes vacant due to resignation, death, permanent disability or any other reason, the most senior Vice-President of the Supreme Constitutional Court shall replace him with the same powers.

Article (234)

The Minister of Defense shall be appointed upon the approval of the Supreme Council of the Armed Forces. The provisions of this article shall remain in force for two full presidential terms starting from the date on which this Constitution comes into effect.

Article (235)

In its first legislative term following the effective date of this Constitution, the House of Representatives shall issue a law to regulate constructing and renovating churches, in a manner that guarantees the freedom to practice religious rituals for Christians.

Article (236)

The State shall guarantee setting and implementing a plan for the comprehensive economic and urban development of border and underprivileged areas, including Upper Egypt, Sinai, Matrouh, and Nubia. This shall be made with the participation of the residents of these areas in the development projects, and they shall be given a priority in benefiting therefrom, taking into account the cultural and environmental patterns of the local community, within ten years from the date that this Constitution comes into effect, as regulated by Law.

Unofficial Translation

The State shall work on setting and implementing projects to bring back the residents of Nubia to their original territories and develop such territories within 10 years, as regulated by law.

Article (237)

The State shall fight all types and forms of terrorism, and track its funding sources as a threat to the nation and its citizens, within a specific timeframe while guaranteeing basic rights and freedoms. .

The law shall regulate the provisions and procedures of fighting terrorism, and fair compensation for the damages resulting therefrom and because thereof.

Article (238)

The State guarantees gradual performance of its obligation to allocate the minimum government expenditure rates on education, higher education, health and scientific research that are stipulated in this Constitution as at the date on which it enters into effect, provided it is fully compliant in the State budget of the fiscal year 2016/2017.

The State shall provide compulsory education until the completion of the secondary stage in a gradual manner to be completed by school year 2016/2017.

Article (239)

The House of Representatives shall issue a law organizing the rules for assigning judges and members of judicial bodies and organizations, ensuring the cancellation of full and partial assignment to non-judicial bodies or committees with judicial jurisdiction, or for managing justice affairs or overseeing elections, within a period not exceeding five years from the date on which this Constitution comes into effect.

Article (240)

The State shall ensure providing financial and human resources necessary to appealing the judgments issued by criminal courts on felonies within 10 years from the date on which this Constitution comes into effect. The foregoing shall be regulated by Law.

Article (241)

In its first legislative term after the enforcement of this Constitution, the House of Representatives shall issue a law on transitional justice that ensures revealing the truth, accountability, proposing frameworks for national reconciliation, and compensating victims, in accordance with international standards.

Unofficial Translation

Article (242)

The existing system of municipal administration shall continue to be in force until the system stipulated herein is gradually implemented within five years of the date of entry into force of this Constitution, without prejudice to Article 180 thereof.

Article (243)

The State shall endeavor that workers and farmers be appropriately represented in the first House of Representatives to be elected after this Constitution is approved, as regulated by law.

Article (244)

The State shall endeavor that youth, Christians, persons with disability and Egyptians living abroad be appropriately represented in the first House of Representatives to be elected after this Constitution is approved, as regulated by law.

Article (245)

The employees of the Shoura Council who are still in service on the date that this Constitution comes into force shall be transferred to the House of Representatives with the same job levels and seniority on that date. Their salaries, allowances, bonuses, and their other financial entitlements granted to them on an individual basis shall be maintained. All funds of the Shoura Council shall be transferred to the House of Representatives.

Article (246)

The Constitutional Declaration issued on July 5th, 2013, the Constitutional Declaration issued on July 8th, 2013, and any constitutional texts or provisions of the Constitution issued in 2012 but not covered by this constitutional document shall be deemed repealed as of the date that this Constitution comes into effect. Their consequential effects shall however remain in force.

Article (247)

This Constitution shall come into effect as at the date on which it is announced that the People have approved it in a referendum through a majority of valid votes of the participants.

Translated by Max Planck Institute

- Motives for writing constitution
- Preamble
- Source of constitutional authority

Preamble

- Ownership of natural resources
- Reference to country's history

In ancient times mountains arose, rivers moved, and lakes were formed. Our Amazonia, our swamps, our highlands, and our plains and valleys were covered with greenery and flowers. We populated this sacred Mother Earth with different faces, and since that time we have understood the plurality that exists in all things and in our diversity as human beings and cultures. Thus, our peoples were formed, and we never knew racism until we were subjected to it during the terrible times of colonialism.

We, the Bolivian people, of plural composition, from the depths of history, inspired by the struggles of the past, by the anti-colonial indigenous uprising, and in independence, by the popular struggles of liberation, by the indigenous, social and labor marches, by the water and October wars, by the struggles for land and territory, construct a new State in memory of our martyrs.

- Right to water
- Reference to fraternity/solidarity
- Human dignity

A State based on respect and equality for all, on principles of sovereignty, dignity, interdependence, solidarity, harmony, and equity in the distribution and redistribution of the social wealth, where the search for a good life predominates; based on respect for the economic, social, juridical, political and cultural pluralism of the inhabitants of this land; and on collective coexistence with access to water, work, education, health and housing for all.

We have left the colonial, republican and neo-liberal State in the past. We take on the historic challenge of collectively constructing a Unified Social State of Pluri-National Communitarian law, which includes and articulates the goal of advancing toward a democratic, productive, peace-loving and peaceful Bolivia, committed to the full development and free determination of the peoples.

We women and men, through the Constituent Assembly (Asamblea Constituyente) and with power originating from the people, demonstrate our commitment to the unity and integrity of the country.

- God or other deities

We found Bolivia anew, fulfilling the mandate of our people, with the strength of our Pachamama and with gratefulness to God.

Honor and glory to the martyrs of the heroic constituent and liberating effort, who have made this new history possible.

PART I. FUNDAMENTAL BASES OF THE STATE: RIGHTS, DUTIES AND GUARANTEES

TITLE I. FUNDAMENTAL BASES OF THE STATE

CHAPTER I. Model of the State

Article 1

Bolivia is constituted as a Unitary Social State of Pluri-National Communitarian Law (Estado Unitario Social de Derecho Plurinacional Comunitario) that is free, independent, sovereign, democratic, inter-cultural, decentralized and with autonomies. Bolivia is founded on plurality and on political, economic, juridical, cultural and linguistic pluralism in the integration process of the country.

- Right to self determination
- Reference to country's history

Article 2

Given the pre-colonial existence of nations and rural native indigenous peoples and their ancestral control of their territories, their free determination, consisting of the right to autonomy, self-government, their culture, recognition of their institutions, and the consolidation of their territorial entities, is guaranteed within the framework of the unity of the State, in accordance with this Constitution and the law.

- Citizenship of indigenous groups
- Protection of environment

Article 3

The Bolivian nation is formed by all Bolivians, the native indigenous nations and peoples, and the inter-cultural and Afro-Bolivian communities that, together, constitute the Bolivian people.

- Freedom of religion
- Official religion
- Separation of church and state

Article 4

The State respects and guarantees freedom of religion and spiritual beliefs, according to their view of the world. The State is independent of religion.

Article 5

- Official or national languages

I. The official languages of the State are Spanish and all the languages of the rural native indigenous nations and peoples, which are Aymara, Araona, Baure, Bésiro, Canichana, Cavineño, Cayubaba, Chácobo, Chimán, Ese Ejja, Guaraní, Guarasu'we, Guarayu, Itonama, Leco, Machajuyai-kallawaya, Machineri, Maropa, Mojeñotrinitario, Mojeño-ignaciano, Moré, Mosetén, Movima, Pacawara, Puquina, Quechua, Sirionó, Tacana, Tapiete, Toromona, Uruchipaya, Weenhayek, Yaminawa, Yuki, Yuracaré and Zamuco.

- Official or national languages

II. The Pluri-National Government and the departmental governments must use at least two official languages. One of them must be Spanish, and the other shall be determined taking into account the use, convenience, circumstances, necessities and preferences of the population as a whole or of the territory in question. The other autonomous governments must use the languages characteristic of their territory, and one of them must be Spanish.

Article 6

- National capital
- National anthem
- National flag

I. Sucre is the Capital of Bolivia.

II. The symbols of the State are the red, yellow and green tri-color flag; the Bolivian national anthem; the coat of arms; the wiphala; the rosette; the kantuta flower and the patujú flower.

CHAPTER II. Principals, Values and Purposes of the State

Article 7

Sovereignty resides in the Bolivian people and is exercised directly and by delegation. The functions and attributes of the organs of public power emanate, by delegation, from sovereignty; it is inalienable and unlimited.

Article 8

I. The State adopts and promotes the following as ethical, moral principles of the plural society: ama qhilla, ama llulla, ama suwa (do not be lazy, do not be a liar or a thief), suma qamaña (live well), ñandereko (live harmoniously), teko kavi (good life), ivi maraei (land without evil) and qhapaj ñan (noble path or life).

- Reference to fraternity/solidarity
- Human dignity

II. The State is based on the values of unity, equality, inclusion, dignity, liberty, solidarity, reciprocity, respect, interdependence, harmony, transparency, equilibrium, equality of opportunity, social and gender equality in participation, common welfare, responsibility, social justice, distribution and redistribution of the social wealth and assets for well being.

Article 9

The following are essential purposes and functions of the State, in addition to those established in the Constitution and the law:

1. To construct a just and harmonious society, built on decolonization, without discrimination or exploitation, with full social justice, in order to strengthen the Pluri-National identities.

- Right to development of personality
- Right to culture
- Human dignity

2. To guarantee the welfare, development, security and protection, and equal dignity of individuals, nations, peoples, and communities, and to promote mutual respect and intra-cultural, inter-cultural and plural language dialogue.

3. To reaffirm and strengthen the unity of the country, and to preserve the Pluri-National diversity as historic and human patrimony.

4. To guarantee the fulfillment of the principles, values, rights and duties recognized and consecrated in this Constitution.

- Right to work

5. To guarantee access of all people to education, health and work.

- Ownership of natural resources
- Protection of environment

6. To promote and guarantee the responsible and planned use of natural resources, and to stimulate their industrialization through the development and strengthening of the productive base in its different dimensions and levels, as well as to preserve the environment for the welfare of present and future generations.

Article 10

I. Bolivia is a pacifist State that promotes the culture of peace and the right to peace, as well as cooperation among the peoples of the region and the World, for the purpose of contributing to mutual understanding, equitable development, and the promotion of an inter-cultural character, with full respect for the sovereignty of states.
II. Bolivia rejects every war of aggression as a means of resolving differences and conflicts between states, and it reserves the right to its legitimate defense in the event of aggression that threatens the independence and integrity of the State.
III. The installation of foreign military bases on Bolivian territory is prohibited.

CHAPTER III. System of Government

- Type of government envisioned

Article 11

I. The Republic of Bolivia adopts a participatory democratic, representative and communal form of government, with equal conditions for men and women.
II. Democracy is exercised in the following forms, which shall be developed by law:
    1. Direct and participatory, through referendum, citizen legislative initiative, revocation of terms of office, assembly, councils and prior consultation. The assemblies and councils shall have a deliberative character in accordance with the law.

- Referenda

    2. Representative, by means of the election of representatives by universal, direct and secret vote, in accordance with the law.

- Claim of universal suffrage
- Secret ballot

    3. Communal, by means of the election, designation or nomination of the authorities and representatives pursuant to the norms and procedures of the native indigenous nations and peoples, among others, in accordance with the law.

Article 12

- Judicial independence
- Claim of executive independence

I. The State organizes and structures its public power through Legislative, Executive, Judicial and Electoral bodies. The organization of the State is based on the independence, separation, coordination and cooperation among these bodies.
II. Control, Defense of the Society, and Defense of the State are functions of the state.

- Judicial independence
- Claim of executive independence

III. The functions of the public bodies may not be united in a single body nor may they be delegated.

TITLE II. FUNDAMENTAL RIGHTS AND GUARANTEES

CHAPTER I. General Matters

Article 13

- Legal status of treaties
- International law

I. The rights recognized in this Constitution are inviolable, universal, inter-dependent, indivisible and progressive. The State has the duty to promote, protect and respect them.
II. The rights declared in this Constitution shall not be understood to deny other rights that are not enumerated.
III. The classification of the rights established in this Constitution does not determine any hierarchy or superiority of some rights over others.
IV. International treaties and conventions ratified by the Pluri-National Legislative Assembly (Asamblea Legislativa), which recognize human rights and prohibit their limitation in States of Emergency, prevail over internal law. The rights and duties consecrated in this Constitution shall be interpreted in accordance with the International Human Rights Treaties ratified by Bolivia.

Article 14

- General guarantee of equality
- Equality regardless of political party
- Equality regardless of religion
- Equality regardless of language
- Equality regardless of origin
- Equality regardless of financial status
- Equality regardless of age
- Equality regardless of skin color
- Equality regardless of creed or belief
- Equality regardless of gender
- Equality regardless of sexual orientation
- Equality regardless of nationality
- Equality regardless of social status
- Equality for persons with disabilities
- Principle of no punishment without law

I. Every human being, without distinction, has legal status and capacity under the law and enjoys the rights recognized in this Constitution.
II. The State prohibits and punishes all forms of discrimination based on sex, color, age, sexual orientation, gender identity, origin, culture, nationality, citizenship, language, religious belief, ideology, political affiliation or philosophy, civil status, economic or social condition, type of occupation, level of education, disability, pregnancy, and any other discrimination that attempts to or results in the annulment of or harm to the equal recognition, enjoyment or exercise of the rights of all people.
III. The State guarantees everyone and all collectives, without discrimination, the free and effective exercise of the rights established in this Constitution, the laws and international human rights treaties.
IV. In the exercise of rights, no one shall be obligated to do anything that is not mandated by the Constitution or laws, nor be deprived of that which they do not prohibit.
V. Bolivian laws are applied to every person, natural and legal, Bolivian and foreign, within Bolivian territory.
VI. Foreigners who are in Bolivian territory have the rights, and must fulfill the duties, established in the Constitution, except for the restrictions that it may contain.

CHAPTER II. Fundamental Rights

Article 15

- Prohibition of torture
- Prohibition of capital punishment
- Right to life
- Prohibition of cruel treatment

I. Every person has the right to life and physical, psychological and sexual integrity. No one shall be tortured, nor suffer cruel, inhuman, degrading or humiliating treatment. The death penalty does not exist.
II. Everyone, in particular women, have the right not to suffer physical, sexual or psychological violence, in the family as well as in the society.
III. The State shall adopt the necessary measures to prevent, eliminate and punish sexual and generational violence, as well as any action or omission intended to be degrading to the human condition, to cause death, pain, and physical, sexual or psychological suffering, whether in public or private spheres.
IV. No person shall be submitted to a forced disappearance for any reason or under any circumstance.

- Prohibition of slavery

V. No person shall be submitted to servitude or slavery. The trade and trafficking of persons is prohibited.

Article 16

- Right to water

I. Every person has the right to water and food.
II. The State has the obligation to guarantee food security, by means of healthy, adequate and sufficient food for the entire population.

- Access to higher education

Article 17

Every person has the right to receive an education at all levels, which is universal, productive, free, comprehensive and inter-cultural, and without discrimination.

- Right to health care

Article 18

I. Every person has the right to health.
II. The State guarantees the inclusion and access to health for all persons, without any exclusion or discrimination.
III. There shall be a single health system, which shall be universal, free, equitable, intra-cultural, intercultural, and participatory, with quality, kindness and social control. The system is based on the principles of solidarity, efficiency and co-responsibility, and it is developed by public policies at all levels of the government.

Article 19

- Right to shelter

I. Every person has the right to an adequate habitat and home that dignifies family and community life.
II. The State, at all levels of the government, is responsible for promoting the development of housing for social benefit, using adequate financing systems, based on principles of solidarity and equity. These plans shall be directed preferentially to families with scarce resources, to disadvantaged groups and to rural areas.

Article 20

- Telecommunications
- Right to water

I. Every person has the right to universal and equitable access to basic services of potable water, sewer systems, electricity, gas services in their domicile, postal, and telecommunications services.

- Telecommunications

II. It is the responsibility of the State, at all levels of government, to provide basic services through public, mixed, cooperative or community entities. In the case of electricity, gas and telecommunications services, these may be provided by contracts with private companies. The provision of services should respond to the criteria of universality, responsibility, accessibility, continuity, quality, efficiency, equitable fees and necessary coverage; with social participation and control.

- Right to water

III. Access to water and sewer systems are human rights, neither are the object of concession or privatization, and are subject to a regimen of licensing and registration, in accordance with the law.

CHAPTER III. Civil and Political Rights

Section I. Civil Rights

Article 21

Bolivians have the following rights:

- Right to culture

1. To cultural self-identification.

- Human dignity

2. To privacy, intimacy, honor, their self image and dignity.

- Right to privacy
- Freedom of opinion/thought/conscience
- Freedom of religion

3. To freedom of belief, spirituality, religion and cult, expressed individually or collectively, in public and in private, for legal purposes.

- Freedom of association
- Freedom of religion
- Freedom of assembly
- Freedom of expression
- Right to information
- Freedom of movement

4. To freedom of assembly and association, publicly and privately, for legal purposes.
5. To freely express and disseminate thoughts and opinions by any means of oral, written or visual communication, individually or collectively.
6. To have access to information and to interpret, analyze and communicate it freely, individually or collectively.
7. To freedom of residence, permanence and circulation throughout the territory of Bolivia, which includes the right to leave and enter the country.

- Inalienable rights
- Human dignity

Article 22

The dignity and freedom of persons is inviolable. It is the primary responsibility of the State to respect and protect them.

Article 23

- Privileges for juveniles in criminal process
- Prison registry

I. Every person has the right to freedom and personal security. Personal liberty may only be restricted within the limits set forth by law to assure the discovery of the true facts concerning acts in jurisdictional processes.
II. The imposition of measures depriving the liberty of adolescents shall be avoided. Every adolescent who is deprived of liberty shall receive preferential treatment on the part of the judicial, administrative and police authorities. They shall assure at all times respect for the dignity of the adolescent and their anonymity. The detention shall be carried out in premises distinct from those assigned to adults, taking into account the needs of his or her age.
III. No one shall be detained, apprehended or deprived of liberty, except in the cases and according to the forms established by the law. The execution of a warrant shall require that it be issued by a competent authority in writing.
IV. Any person found in flagrant commission of a crime may be arrested by any other person, even without a warrant. The sole purpose of the arrest shall be to bring the person before a competent judicial authority, who must resolve their legal status within a maximum period of twenty-four hours.
V. At the time that a person is deprived of liberty, he shall be informed of the reasons for his detention, as well as the charges or complaint formulated against him.
VI. Those responsible for the detention centers must keep a registry of the persons deprived of liberty. They shall not receive any person without copying the corresponding warrant in the registry. Failure to fulfill this duty shall give rise to the procedures and sanctions set forth in the law.

- Right of petition

Article 24

Every person has the right to petition, individually and collectively, whether orally or in writing, and to receive a formal and prompt response. To exercise this right, the only requirement is to identify the petitioner.

- Regulation of evidence collection
- Right to privacy

Article 25

I. Every person has the right to the inviolability of his home and to the confidentiality of private communications of all forms, except as authorized by a court.
II. Correspondence, private papers and private statements contained in any medium are inviolable and may not be seized except in cases determined by law for criminal investigation, based on a written order issued by a competent judicial authority.
III. No public authority, person or organization may intercept private conversations or communications by an installation that monitors or centralized them.
IV. The information and proof obtained by violation of correspondence and communications, in whatever form, has no legal effect.

Section II. Political Rights

Article 26

- Right to form political parties
- Claim of universal suffrage
- Secret ballot
- Compulsory voting
- Indigenous right to representation
- Indigenous right to vote

I. All citizens have the right to participate freely in the formation, exercise and control of political power, directly or through their representatives, individually or collectively. Participation shall be equitable and under equal conditions for men and women.

II. The right to participate includes:

1. Organization for purposes of political participation, in accordance with the Constitution and the law.
2. The right to suffrage, by equal, universal, direct, individual, secret, free and obligatory vote, which is publicly counted.
3. Where communitarian democracy is practiced, the electoral processes shall be exercised according to their own norms and procedures, and shall supervised by the Electoral Organ (Organo Electoral) only if the electoral act is not subject to equal, universal, direct, secret, free and obligatory vote.
4. The direct election, designation and nomination of the representatives of the nations and the rural native indigenous peoples, in accordance with their own norms and procedures.
5. The monitoring of the acts of public function.

- Restrictions on voting

Article 27

I. Bolivians who reside outside the country have the right to participate in the election of the President and Vice President of the State, and in other elections as established by law. The right to vote is exercised by registration and recording carried out by the Electoral Organ (Organo Electoral).

II. Foreigners resident in Bolivia have the right to vote in municipal elections, in accordance with the law, pursuant to the application of principles of international reciprocity.

- Conditions for revoking citizenship
- Restrictions on voting

Article 28

The exercise of political rights is suspended in the following instances after a sentence has been executed and while the sentence has not been completed:

1. For having taken up arms and serving in the armed forces of the enemy in times of war.

2. For embezzlement of public funds.

3. For acts of treason against the country.

- Protection of stateless persons
- International law

Article 29

I. The right of foreigners to request and receive asylum or political refuge for ideological or political persecution is recognized in accordance with the laws and international treaties.

II. Anyone who has been granted asylum or refuge in Bolivia shall not be expelled or deported to a country where his life, bodily integrity, security or liberty is endangered. The State shall attend in a positive, humanitarian and efficient manner to requests for family reunification presented by parents or children who are given asylum or refuge.

CHAPTER IV. Rights of the Nations and Rural Native Indigenous Peoples

- Right to culture

Article 30

I. A nation and rural native indigenous people consists of every human collective that shares a cultural identity, language, historic tradition, institutions, territory

I. and world view, whose existence predates the Spanish colonial invasion.
II. In the framework of the unity of the State, and in accordance with this Constitution, the nations and rural native indigenous peoples enjoy the following rights:
1. To be free.
2. To their cultural identity, religious belief, spiritualities, practices and customs, and their own world view.
3. That the cultural identity of each member, if he or she so desires, be inscribed together with Bolivian citizenship in his identity card, passport and other identification documents that have legal validity.
4. To self-determination and territoriality.
5. That its institutions be part of the general structure of the State.
6. To the collective ownership of land and territories.
7. To the protection of their sacred places.
8. To create and administer their own systems, means and networks of communication.
9. That their traditional teachings and knowledge, their traditional medicine, languages, rituals, symbols and dress be valued, respected and promoted.
10. To live in a healthy environment, with appropriate management and exploitation of the ecosystems.
11. To collective ownership of the intellectual property in their knowledge, sciences and learning, as well as to its evaluation, use, promotion and development.
12. To an inter-cultural, intra-cultural and multi-language education in all educational systems.
13. To universal and free health care that respects their world view and traditional practices.
14. To the practice of their political, juridical and economic systems in accord with their world view.
15. To be consulted by appropriate procedures, in particular through their institutions, each time legislative or administrative measures may be foreseen to affect them. In this framework, the right to prior obligatory consultation by the State with respect to the exploitation of nonrenewable natural resources in the territory they inhabit shall be respected and guaranteed, in good faith and upon agreement.
16. To participate in the benefits of the exploitation of natural resources in their territory.
17. To autonomous indigenous territorial management, and to the exclusive use and exploitation of renewable natural resources existing in their territory without prejudice to the legitimate rights acquired by third parties.
18. To participate in the organs and institutions of the State.

III. The State guarantees, respects and protects the rights of the nations and the rural native indigenous peoples consecrated in this Constitution and the law.

- Right to self determination
- Protection of language use
- Protection of environment
- Provisions for intellectual property
- Reference to science
- Right to health care
- Ownership of natural resources
- Ownership of natural resources
- Ownership of natural resources

Article 31

I. The nations and the rural native indigenous peoples that are in danger of extinction, in voluntary isolation and not in contact, shall be protected and respected with respect to their forms of individual and collective life.
II. The nations and the rural native indigenous peoples that live in isolation and out of contact enjoy the right to maintain themselves in that condition, and to the legal definition and consolidation of the territory which they occupy and inhabit.

Article 32

The Afro-Bolivian people enjoy, in everything corresponding, the economic, social, political and cultural rights that are recognized in the Constitution for the nations and the rural native indigenous peoples.

CHAPTER V. Social and Economic Rights

Section I. Environmental Rights

- Protection of environment

Article 33

Everyone has the right to a healthy, protected, and balanced environment. The exercise of this right must be granted to individuals and collectives of present and future generations, as well as to other living things, so they may develop in a normal and permanent way.

- Protection of environment

Article 34

Any person, in his own right or on behalf of a collective, is authorized to take legal action in defense of environmental rights, without prejudice to the obligation of public institutions to act on their own in the face of attacks on the environment.

Section II. Right to Health and Social Security

Article 35

I. The State, at all levels, shall protect the right to health and promote public policies designed to improve the quality of life, the collective well being, and free access of the population to health services.
II. The health system is unitary and includes traditional medicine of the nations and the rural native indigenous peoples.

Article 36

- Right to health care

I. The State shall guarantee access to universal health care.
II. The State shall control the practice of public and private health services and shall regulate them by law.

Article 37

The State has the irrevocable obligation to guarantee and sustain the right to health care, which is a supreme function and primary financial responsibility. The promotion of health and the prevention of diseases shall be prioritized.

Article 38

I. Public health goods and services are State property and may not be privatized or licensed to others.
II. Health services shall be provided in uninterrupted form.

Article 39

I. The State shall guarantee public health services, and it recognizes private health services; it shall regulate and oversee the quality through sustained medical audits that evaluate the work of personnel, the infrastructure and equipment, in accordance with the law.
II. The law punishes negligent actions and omissions committed in the practice of medicine.

Article 40

The State shall guarantee the organized participation of the population in decision-making and in the management of the entire public health system.

Article 41

I. The State shall guarantee the access of the population to medicines.
II. The State shall prioritize generic medicines through the promotion of their domestic production and, if need be, shall decide to import them.

- Provisions for intellectual property

III. The right to access medicine shall not be restricted by intellectual property rights and commercial rights, and it contemplates quality standards and first generation medicines.

Article 42

I. It is the responsibility of the State to promote and guarantee the respect for, and the use, research and practice of traditional medicine, rescuing ancestral knowledge and practices created from the thinking and values of all the nations and the rural native indigenous peoples.

- Provisions for intellectual property

II. The promotion of traditional medicine shall include the registry of natural medicines and of their curative properties, as well as the protection of their knowledge as intellectual, historic, cultural property and as patrimony of the nations and the rural native indigenous peoples.

III. The law shall regulate the practice of traditional medicine and shall guarantee the quality of service.

Article 43

The law shall regulate the donations and transplants of cells, tissue or organs, based on principles of humanity, solidarity, opportunity, providing them free of charge, and efficiency.

Article 44

I. No one shall be submitted to surgical intervention, medical examination or laboratory test without his or her consent or that of legally authorized third persons, except when his or her life is in imminent danger.

II. No one shall be submitted to scientific experiments without his or her consent.

Article 45

I. Every Bolivian has the right to social security.

II. Social security is provided under the principles of universality, comprehensiveness, equity, solidarity, unity of management, economy, opportunity, its inter-cultural character, and effectiveness.

III. The social security system covers assistance for the following reasons: sickness, epidemics and catastrophic diseases; maternity or paternity; professional and work risks, and risks in farm labor; disability and special necessities; unemployment and loss of employment; being an orphan, crippled, widowed, of old age, and death; housing, family allowances and other social reasons.

IV. The State guarantees the right to retirement, which is universal, supportive and equitable.

V. Women have the right to a safe maternity, with an inter-cultural practice and vision; they shall enjoy the special assistance and protection of the State during pregnancy and birth and in the prenatal and postnatal periods.

VI. The public social security services shall not be privatized nor licensed to others.

Section III. Right to Work and Employment

Article 46

- Right to just remuneration
- Right to work
- Right to safe work environment
- Right to reasonable standard of living

I. Every person has the following rights:

1. To dignified work, with industrial and occupational health and safety, without discrimination, and with a fair, equitable and satisfactory remuneration or salary that assures a dignified existence for the worker and his or her family.
2. To a stable source of work under equitable and satisfactory conditions.

II. The State shall protect the exercise of work in all its forms.

III. All forms of forced work or other analogous exploitation that obligates a person to work without his or her consent and without fair remuneration is prohibited.

- Right to establish a business

Article 47

I. Every person has the right to dedicate him or herself to business, industry or any other legal economic activity under conditions which do not harm the collective well being.
II. The workers in small urban or rural productive units, or who are self-employed, and guild members in general, shall enjoy special protection on the part of the State through a policy of equitable commercial exchange and fair prices for their products, as well as a preferential allowance of financial economic resources to promote their production.
III. The State shall protect, promote and strengthen communitarian forms of production.

Article 48

I. The social and labor dispositions are of obligatory fulfillment.
II. The labor norms shall be interpreted and applied based on the following principles: the protection of workers as the primary productive force of society; the primacy of the labor relation; work continuity and stability; non discrimination and the making of investments in favor of the worker.
III. The recognized rights and benefits in favor of workers cannot be waived, and agreements that are contrary to, or that tend to deride their effects, are null and void.
IV. The salaries or earned pay, labor rights, social benefits and contributions to social security, which are not paid, have a privilege and priority over any other debt and may not be attached or made unenforceable.
V. The State shall promote the incorporation of women into the workforce and shall guarantee them the same remuneration as men for work of equal value, both in the public and private arena.
VI. Women shall not be discriminated against or fired because of their civil status, because of pregnancy, because of their age or physical features, or because of the number of children they have. It is guaranteed that pregnant women and parents cannot be dismissed from employment until the child completes one year of age.
VII. The State guarantees the incorporation of youth into the productive system, in accordance with their capacity and training.

Article 49

I. The right of collective bargaining is recognized.
II. The following shall be regulated by law: labor relations related to contracts and collective agreements; general sector minimum wages and salary increases; reincorporation; paid vacations and holidays; calculation of seniority, the work day, extra hours, night time overtime, Sunday work; Christmas bonuses, vouchers, bonuses and other systems of participation in the profits of the enterprise; indemnification and severance pay; maternity leave; professional training and formation; and other social rights.
III. The State shall protect the stability of employment. Unjustified dismissal and all forms of labor harassment are prohibited. The law shall determine the corresponding sanctions.

- Right to rest and leisure

Article 50

The State, through the courts and specialized administrative bodies, shall resolve all conflicts arising from labor relations between employer and employee, including those of industrial safety and social security.

- Right to join trade unions

Article 51

I. All workers have the right to organize unions pursuant to the law.
II. The State shall respect the union principles of unity, union democracy, political pluralism, self financing, solidarity and internationalism.

III. Unionization is recognized as a form of defense, representation, support, education and culture of workers in the countryside and in the city.
IV. The State shall respect the ideological and organizational independence of the unions. The unions shall have legal personality derived from the sole fact of being organized, and they shall be recognized by their parent entities.
V. The tangible and intangible property of union organizations is inviolable; it may not be attached or delegated.
VI. The union leaders enjoy union privileges; they may not be fired for one year after the end of their office term, and their social rights may not be diminished; nor may they be subjected to persecution or deprivation of liberty for acts undertaken in fulfillment of their union work.
VII. Workers who are self employed have the right to organize to defend their interests.

Article 52

I. The right of free business association is recognized and guaranteed.
II. The State shall guarantee recognition of the legal personality of business associations, as well as democratic forms of business organizations, according to their own statutes.
III. The State recognizes the training institutions of business organizations.
IV. The tangible and intangible property of business organizations is inviolable and may not be attached.

- Right to strike

Article 53

The right to strike is guaranteed as the exercise of the legal power of workers to suspend work to defend their rights, in accordance with the law.

Article 54

- Right to work

I. It is the obligation of the State to establish employment policies that avoid unemployment and underemployment and that have as their objective the creation, maintenance and generation of conditions that guarantee workers the possibility of dignified work and fair remuneration.
II. It is the duty of the State and society to protect and defend industrial equipment and that of state services.
III. The workers, in defense of their source of work and to safeguard the social interest, shall, in accordance with the law, reactivate and reorganize enterprises that are in the process of bankruptcy, insolvency or liquidation, or closed or abandoned unjustifiably, and they shall form communitarian or social enterprises. The State shall support the actions of the workers.

Article 55

The cooperative system is based on principles of solidarity, equality, reciprocity, equity of distribution, social purpose, and the non profit motive of its members. The State shall promote and regulate the organization of cooperatives by means of the law.

Section IV. Right to Property

Article 56

- Right to own property
- Right to own property
- Right to transfer property

I. Everyone has the right to private, individual or collective property, provided that it serves a social function.
II. Private property is guaranteed provided that the use made of it is not harmful to the collective interests.
III. The right to inheritance is guaranteed.

- Protection from expropriation

Article 57

Expropriation shall be imposed for reasons of necessity or public utility, defined in accordance with the law and upon prior fair indemnification. Urban real estate is not subject to reversion.

Section V. Rights of Children, Adolescents and Youth

- Rights of children

Article 58

Every person of minor age is considered a child or adolescent. Children and adolescents have rights recognized in the Constitution, with the limits established by it, and they have the specific rights inherent to their development; to their ethnic, socio-cultural, gender and generational identity; and to the satisfaction of their needs, interests and aspirations.

- Rights of children

Article 59

- Rights or duties of parents
- Rights or duties of parents
- State support for children
- Right to culture

I. Every child and adolescent has the right to physical development.
II. Every child and adolescent has the right to live and to grow up in the bosom of his or her natural or adoptive family. When that is not possible, or is contrary to his or her best interests, he or she shall have the right to a substitute family in accordance with the law.
III. Every child and adolescent, without regard to origin, has equal rights and duties with respect to his or her parents. Discrimination among offspring on the part of parents shall be punished by law.
IV. Every child and adolescent has the right to identity and filial relationship with respect to his or her parents. When the parents are not known, the conventional surname chosen by the person responsible for his or her care will be used.
V. The State and society guarantee the protection, promotion and active participation of youth in productive, political, social, economic and cultural development, without any discrimination whatsoever, in accordance with the law.

- State support for children

Article 60

It is the duty of the State, society and the family to guarantee the priority of the best interests of the child or adolescent, which includes the preeminence of his or her rights, the priority of receiving protection and aid in any circumstance, priority in the attention of public and private services, and access to prompt and appropriate administration of justice, and the assistance of specialized personnel.

Article 61

- Limits on employment of children

I. Any form of violent punishment against children or adolescents is prohibited, both in the family as well as in society.
II. Forced work and child labor is prohibited. The activities of children and adolescents within their families and society shall be directed to their full development as citizens, and they shall have a formative function. Their rights, guarantees, and the institutional mechanisms for their protection shall be the object of special regulation.

Section VI. Rights of the Family

- Right to found a family

Article 62

The State recognizes and protects the family as the fundamental nucleus of society, and guarantees the social and economic conditions necessary for its full development. Every member has equal rights, obligations and opportunities.

Article 63

- Provision for matrimonial equality
- Provision for civil marriage

I. The marriage between a man and a woman is formed by legal bond and is based on equality of the rights and duties of the spouses.
II. The free unions or de facto unions, which meet the conditions of stability and singularity and that are maintained between a man and a women without legal impediment, shall have the same effects as a civil marriage, both in the personal and property relations of the couple as well as with respect to adopted children or to children born to the couple.

Article 64

- Rights or duties of parents

I. Spouses or cohabitants have the duty, in equal conditions and by common effort, to attend to the maintenance and responsibility of the home, and to the education and development of the children while they are minors or have some disability.
II. The State shall protect and assist those who are responsible for the family in the exercise of their obligations.

Article 65

Because of the best interests of children and adolescents and their right to the identity, presumed parentage shall be validated by indication of the mother or father. This presumption shall be valid in the absence of proof of the contrary, with the burden of proof on the person who denies parentage. In case that the proof negates the presumption, the costs incurred shall correspond to the one who indicated parentage.

Article 66

Women and men are guaranteed the exercise of sexual rights and their reproductive rights.

Section VII. Rights of the Elderly Adults

- State support for the elderly

Article 67

I. In addition to the rights recognized in this Constitution, every person of adult age has the right to a dignified old age that has quality and human warmth.
II. The State shall provide an old age pension within the framework of full social security, in accordance with the law.

- State support for the elderly

Article 68

I. The State shall adopt public policies for the protection, attention, recreation, rest and social occupation of elderly adults, in accordance with their capacities and possibilities.
II. All forms of mistreatment, abandonment, violence and discrimination against elderly persons is prohibited and punished.

Article 69

The war veterans deserve the gratitude and respect of the public and private institutions and of the population in general; they shall be considered heroes and defenders of Bolivia and shall receive a life pension from the State as established by the law.

Section VIII. Rights of Disabled Persons

- State support for the disabled

Article 70

Everyone who has a disability enjoys the following rights:

1. To be protected by his or her family and by the State.
2. To a free education and physical health.
3. To an alternative language of communication.
4. To work in appropriate conditions, consistent with his or her possibilities and capacities, with fair remuneration that assures a dignified life.
5. To the development of his or her individual potential.

- State support for the disabled

Article 71

I. Any kind of discrimination, mistreatment, violence and exploitation of anyone who is disabled shall be prohibited and punished.
II. The State shall adopt measures of affirmative action to promote the effective integration of disabled persons into the productive, economic, political, social, and cultural sphere, without any discrimination whatsoever.
III. The State shall create the conditions that permit the development of individual potential of disabled persons.

- State support for the disabled

Article 72

The State shall guarantee disabled persons comprehensive prevention and rehabilitation services, as well as other benefits that are established by law.

Section IX. Rights of Persons Deprived of Liberty

Article 73

- Human dignity

I. Every person who is submitted to any form of deprivation of liberty shall be treated with the respect due to human dignity.
II. Every person deprived of liberty has the right to communicate freely with his or her defense lawyer, interpreter, family and close friends. Deprivation of communication is prohibited. Any limitation of communication may only take place in the context of investigation of the commission of crimes, and shall last a maximum of twenty four hours.

Article 74

I. It is the responsibility of the State to reinsert into society the persons deprived of liberty, to assure respect for their rights and their retention and custody in an adequate environment, according to the classification, nature and seriousness of the crime, as well as the age and sex of the persons detained.
II. Persons deprived of liberty shall have the opportunity to work and to study in penitentiary centers.

Section X. Rights of Users of Services and Consumers

- Protection of consumers

Article 75

The users and consumers enjoy the following rights:

1. To the supply of food, pharmaceuticals, and products in general, in harmless and quality condition, in sufficient and adequate quantity, and with efficient service and timely supply.

2. To reliable information about the characteristics and contents of the products they consume and of the services they use.

Article 76

I. The State guarantees access to a comprehensive system of public transportation in diverse modalities. The law shall determine that the system of transportation be efficient and effective, and that it generates benefits to the users and to the providers.
II. No customs controls, squads or control points of any kind may exist in Bolivian territory, except those that have been created by law.

CHAPTER VI. Education, Cultural Diversity and Cultural Rights

Section I. Education

Article 77

I. Education is one of the most important functions and primary financial responsibilities of the State, which has the mandatory obligation to sustain, guarantee and coordinate it.
II. The State and society have complete control of the educational system, which consists of regular education, alternative and special education, and higher education for professional training. The educational system develops its processes on the basis of the criteria of harmony and coordination.
III. The educational system is composed of public educational institutions, private educational institutions and those which are contracted.

Article 78

I. Education is unitary, public, universal, democratic, participatory, communitarian, decolonizing and of quality.
II. Education is intra-cultural, inter-cultural and multi-lingual throughout the entire educational system.
III. The educational system is based on education that is open, humanistic, scientific, technical and technological, productive, territorial, theoretical and practical, liberating and revolutionary, critical and supportive.
IV. The State guarantees vocational education and humanist technical learning for men and women, which is related to life, work and productive development.

- Reference to science

Article 79

Education shall promote civic-mindedness, intercultural dialogue and ethical moral values. The values shall incorporate gender equality, non differentiation of roles, non-violence, and the full enforcement of human rights.

Article 80

- Protection of environment

I. Education shall have as its objectives the full development of persons and the strengthening of social conscience that is critical in and for life. Education shall be directed toward the following: individual and collective development; the development of the competencies, attitudes, and physical and intellectual skills that link theory to productive practice; the conservation and protection of the environment, biodiversity and the land to assure well being. Its regulation and fulfillment shall be established by law.
II. Education shall contribute to strengthening the unity and identity of everyone as part of the Pluri-National State (Estado Plurinacional), as well as strengthening the identity and cultural development of the members of each nation and rural native indigenous people, and the intercultural understanding and enrichment within the State.

- Compulsory education

Article 81

I. Education is obligatory up to the secondary school diploma.
II. Public education is free at all levels including higher education.
III. Upon completion of studies at the secondary level, a bachelor diploma shall be awarded immediately and without charge.

- Free education

- Access to higher education

Article 82

I. The State shall guarantee access to education and continuing education to all citizens under conditions of full equality.
II. The State shall give priority support to the students with less economic possibilities so that they can achieve different levels in the educational system, by providing economic resources, meal programs, clothing, transportation, school materials, and student residences in the distant areas, according to the law.

III. Students of excellent achievement shall be rewarded at all levels of the educational system. Every child and adolescent with natural, outstanding talent has the right to be attended to educationally with the teaching methodology and learning that makes possible the best development of his or her aptitudes and skills.

Article 83

Social participation, community participation, and the participation of the parents in the educational system are recognized and guaranteed by means of representative organizations at all levels of the State and in the nations and the rural native indigenous peoples. Their composition and attributes shall be established by the law.

Article 84

The State and society have the duty to eradicate illiteracy through programs compatible with the cultural and linguistic reality of the population.

Article 85

The State shall promote and guarantee the continuing education of children and adolescents with disabilities, or of those with extraordinary talents in learning, under the same structure, principles and values of the educational system, and shall establish a special organization and development curriculum.

Article 86

Freedom of thought, faith and religious education, as well as the spirituality of the nations and the rural native indigenous peoples, shall be recognized and guaranteed in the educational centers. Mutual respect and coexistence among persons of diverse religions shall be promoted, without dogmatic imposition. There shall be no discrimination on the basis of religious choice with respect to the acceptance and permanence of students in these centers.

Article 87

The operation of contracted educational units for purposes of social service, which offer free access and are non-profit, shall be recognized and respected. They shall operate under the supervision of public authorities, respecting the right of the administration of religious entities over said educational units, without prejudice to that established in national dispositions, and they shall be governed by the same norms, policies, plans and programs of the educational system.

Article 88

I. Private educational units are recognized and respected at all levels and in all modalities; they shall be governed by the policies, plans, programs and authorities of the educational system. The State guarantees their operation pursuant to prior verification of the conditions and compliance with the requisites established by law.
II. The right of mothers and fathers to choose the education they prefer for their sons and daughters is respected.

Article 89

The follow up, measurement, evaluation and accreditation of the quality of education in the entire educational system, shall be entrusted to a technically specialized public institution, which is independent of the Ministry of the branch. Its composition and operation shall be determined by the law.

Article 90

- Reference to art

I. The State shall recognize the validity of institutes of humanistic, technical and technological training, at middle and higher levels, upon prior fulfillment of the conditions and requisites established in the law.
II. The State shall promote technical, technological, productive, artistic and linguistic training through technical institutes.
III. The State, through the educational system, shall promote the creation and organization of distance educational programs and popular education programs for those who have not attended school, with the objective of elevating the cultural level and developing the Pluri-National consciousness of the people.

Section II. Higher Education

Article 91

- Reference to science
- Reference to art

I. Higher education develops processes of professional training for the generation and dissemination of knowledge aimed at the full development of society, for which purpose the universal and collective knowledge of the nations and rural native indigenous peoples shall be taken into account.
II. Higher education is intra-cultural, intercultural and multi-lingual, and it has as its mission the comprehensive formation of highly qualified and professionally competent human resources for the following objectives: to develop processes for scientific research to solve problems of the productive base and of social conditions; to promote policies of extension and social interaction to strengthen scientific, cultural and linguistic diversity; to participate together with the people in all the processes of social liberation in order to construct a society with greater equity and social justice.
III. Higher education is composed of the public and private universities, the colleges for teacher training, and the technical, technological and artistic institutes.

Article 92

I. Public universities are autonomous and equal in hierarchy. The autonomy consists of the free administration of their resources; the naming of their officials, and teaching and administrative personnel; the elaboration and approval of their statues, study plans and annual budgets; the receipt of bequests and donations, as well as the signing of contracts to carry out their purposes and to sustain and improve their institutes and faculties. The public universities may negotiate loans with the guarantee of their assets and resources, upon prior legislative approval.
II. In exercise of their autonomy, the public universities shall form the Bolivian University, which shall coordinate and program their goals and functions by means of a central body, pursuant to a university development plan.
III. The public universities shall be authorized to give academic diplomas and professional titles with validity throughout the entire State.

Article 93

I. The State shall be obligated to sufficiently subsidize the public universities, independently of the departmental, municipal and their own resources, which have been or are to be created.
II. The public universities, within the framework of their statutes, shall establish mechanisms for social participation that are consultative, coordinating and advisory in character.
III. The public universities shall establish mechanisms for making reports and provide transparency of the use of their resources through the presentation of financial statements to the Pluri-National Legislative Assembly (Asamblea Legislativa), the Controller General (Contraloria General) and the Executive Organ (Organo Ejecutivo).
IV. The public universities, within the framework of their statutes, shall establish decentralized academic and inter-cultural programs pursuant to the necessities of the State and the nations and rural native indigenous peoples.

V. The State, in coordination with the public universities, shall promote the creation and operation of universities and multicultural communitarian institutes in rural areas, assuring social participation. The opening and operation of these universities shall address the needs of strengthening production in the region, based on its potential.

Article 94

I. The private universities shall be governed by the policies, plans, programs and authorities of the educational system. Their operation is authorized by supreme decree, upon prior verification of compliance with the conditions and requisites established by law.
II. The private universities shall be authorized to issue academic diplomas. Professional titles, which are valid throughout the country, shall be granted by the State.
III. For the granting of academic diplomas in all modalities of titles in the private universities, examination tribunals shall be formed which shall be composed of titled professors, named by the public universities, under the conditions established by the law. The State shall not subsidize private universities.

Article 95

I. The universities must create and maintain inter-cultural centers for technical and cultural education and training, which is freely accessible to the public and consistent with the principles and purposes of the educational system.
- Protection of language use

II. The universities must implement programs for the recovery, preservation, development, learning and dissemination of the different languages of the nations and rural native indigenous peoples.
III. The universities shall promote centers for the creation of productive units, in coordination with community, public and private productive initiatives.

Article 96

- Reference to science

I. The formation and training of teachers for public schools, by means upper level training schools, is the responsibility of the State. The training of teachers shall be exclusive, public, free of charge, intra-cultural, inter-cultural, multi-language, scientific and productive, and it shall be based on social commitment and a vocation for service.
II. School teachers must participate in the process of continual updating and pedagogical training.
III. The teaching career is secure, and teaching personnel may not be removed, in conformity with the law. Teachers shall receive a dignified salary.

- Reference to science

Article 97

Post graduate training at all levels shall have as its fundamental mission the qualification of professionals in different areas, through processes of scientific research and the generation of knowledge linked to reality in order to contribute to the comprehensive development of society. Post-graduate training shall be coordinated by a body formed by the universities of the educational system, in accordance with the law.

Section III. Cultures

- Right to culture

Article 98

I. Cultural diversity constitutes the essential basis of the Pluri-National Communitarian State (Estado Unitario Social de Derecho Plurinacional Comunitario). The inter-cultural character is the means for cohesion and for harmonic and balanced existence among all the peoples and nations. The intercultural character shall exist with respect for differences and in conditions of equality.
II. The State takes strength from the existence of rural native indigenous cultures, which are custodians of knowledge, wisdom, values, spiritualities and world views.

III. It shall be a fundamental responsibility of the State to preserve, develop, protect and disseminate the existing cultures of the country.

- Right to culture

Article 99

I. The cultural patrimony of the Bolivian people is inalienable, and it may not be attached or limited. The economic resources that they generate are regulated by law to give priority to their conservation, preservation and promotion.
II. The State shall guarantee the registry, protection, restoration, recovery, revitalization, enrichment, promotion and dissemination of its cultural patrimony, in accordance with the law.
III. The natural, architectural, paleontological, historic, and documentary riches, and those derived from religious cults and folklore, are cultural patrimony of the Bolivian people, in accordance with the law.

- Right to culture
- Provisions for intellectual property

Article 100

I. The world views, myths, oral history, dances, cultural practices, knowledge and traditional technologies are patrimony of the nations and rural native indigenous peoples. This patrimony forms part of the expression and identity of the State.
II. The State shall protect this wisdom and knowledge through the registration of the intellectual property that safeguards the intangible rights of the nations and rural native indigenous peoples and of the intercultural and Afro-Bolivian communities.

- Reference to art
- Right to culture

Article 101

The intangible aspects of the manifestations of art and popular industries shall enjoy the special protection of the State. Likewise, the tangible and intangible aspects of places and activities, which are declared cultural patrimony of humanity, shall be protected.

- Reference to art
- Provisions for intellectual property
- Reference to science

Article 102

The State shall register and protect individual and collective intellectual property in the works and discoveries of authors, artists, composers, inventors and scientists, under the conditions determined by law.

Section IV. Science, Technology and Research

- Reference to science

Article 103

- Right to enjoy the benefits of science

I. The State shall guarantee the development of science and scientific, technical and technological research for the benefit of the general interest. The necessary resources shall be provided, and state science and technology systems shall be created.
II. The State shall adopt a policy of implementing strategies to incorporate the knowledge and application of new information and communication technologies.
III. In order to strengthen the productive base and to stimulate full development of society, the State, the universities, the productive and service enterprises, both public and private, and the nations and rural native indigenous peoples, shall develop and coordinate processes of research, innovation, promotion, and dissemination, and the application and transfer of science and technology, in accordance with the law.

Section V. Sports and Recreation

Article 104

Everyone has the right to sports, physical culture and recreation. The State guarantees access to sports without distinction as to gender, language, religion, political orientation, territorial location, social, cultural membership or any other characteristic.

Article 105

The State shall promote, by educational, recreation and public health policies, the development of physical culture and the practice of sports in their preventive, recreational, training and competitive levels, with special attention given to persons with disabilities. The State shall guarantee the methods and necessary economic resources to make them effective.

CHAPTER VII. Social Communication

- Freedom of press

Article 106

- Freedom of expression

I. The State guarantees the right to communication and the right to information.
II. The State guarantees the right of Bolivians to freedom of expression, opinion and information, to rectification and reply, and the right to freely publish ideas by whatever means of dissemination, without prior censorship.
III. The State guarantees freedom of expression and the right to communication and information to workers of the press.
IV. The conscience clause of the information workers is recognized.

- State operation of the media

Article 107

I. The public means of communication must contribute to the promotion of the ethical, moral and civic-minded values of the different cultures of the country with the production and dissemination of multi-lingual educational programs and in an alternative language for the disabled.
II. Information and opinions issued by the public means of communication must respect the principles of truth and responsibility. These principles shall be put into practice through the rules of ethics and self-regulation of the organizations of journalists and of the means of communication and their law.
III. The public means of communication shall not form, either directly or indirectly, monopolies or oligopolies.
IV. The State shall support the creation of communitarian means of communication with equal conditions and opportunities.

TITLE III. DUTIES

Article 108

The duties of Bolivians are:

- Duty to obey the constitution

1. To know, comply with, and ensure the enforcement of the Constitution and the laws.

2. To know, respect, and promote the rights recognized in the Constitution.

3. To promote and spread the practice of the values and principles proclaimed by the Constitution.

4. To defend, promote, and contribute to the right to peace, and to encourage a culture of peace.

- Duty to work

5. To work, according to one's physical and intellectual capacity, in legal and socially useful activities.

6. To educate oneself in the educational system up to the diploma of bachelor.

- Duty to pay taxes

7. To pay taxes in proportion to one's economic capacity, according to the law.

8. To denounce and combat every act of corruption.

9. To care for, feed, and education their children.

10. To care for, protect, and help their ancestors.

11. To provide aid, with all the help necessary, in cases of natural disaster and other contingencies.

- Duty to serve in the military

12. To serve in the military, which is obligatory for boys.

13. To defend the unity, sovereignty and territorial integrity of Bolivia, and to respect its symbols and values.

14. To safeguard, defend and protect the natural, economic and cultural patrimony of Bolivia.

15. To protect and defend the natural resources, and to contribute to their sustainable use in order to preserve the rights of future generations.

- Protection of environment

16. To protect and defend an environment suitable for the development of living beings.

TITLE IV. JURISDICTIONAL GUARANTEES AND ACTIONS OF DEFENSE

CHAPTER I. Jurisdictional Guarantees

Article 109

I. All the rights recognized in the Constitution are directly applicable and enjoy equal guarantees of their protection.
II. The rights and guarantees may be regulated only by the law.

- Binding effect of const rights

Article 110

I. Persons who violate constitutional rights are subject to the jurisdiction and competence of the Bolivian authorities.
II. The intellectual and material perpetrators of violations of constitutional rights are to be held responsible.
III. The immediate perpetrators of attacks against personal security are to be held liable, and are not excused from liability for having committed them under orders of superiors.

Article 111

The crimes of genocide, offenses against humanity, treason, and war crimes are not extinguishable.

Article 112

The crimes committed by public servants that are perpetrated against the patrimony of the State and cause serious economic harm, are not extinguishable, and no immunities are to be applied.

Article 113

I. Victims of violations of their rights are granted the right to timely indemnification, reparation and compensation for damages and prejudices.
II. In the event that a sentence requires the State to repair damages and prejudices, it shall interpose the same action against the authority or public servant responsible for the act or omission that caused the damage.

Article 114

- Prohibition of torture
- Regulation of evidence collection

I. All forms of torture, disappearances, confinement, coercion, exaction and any other form of physical and moral violence are prohibited. The public servants or officials, who apply, instigate or consent to them shall be dismissed and replaced, without prejudice to the sanctions determined by law.

II. The statements, actions or omissions which are obtained or undertaken through the employment of torture, coercion, exaction, or by any other form of violence, are null to the full extent of the law.

Article 115

- Guarantee of due process

I. Everyone shall be protected in the exercise of his or her rights and legitimate interests in a timely and effective manner by the judges and courts.

II. The State guarantees the right to due process and defense, and to plural, prompt, appropriate, free, and transparent justice without delays.

Article 116

- Presumption of innocence in trials
- Principle of no punishment without law
- Protection from ex post facto laws

I. The presumption of innocence is guaranteed. During the process, in the event of a doubt concerning the applicable norm, the one most favorable to the accused or the defendant shall govern.

II. Every sanction must be based on a law existing prior to the commission of the punishable act.

Article 117

- Guarantee of due process
- Prohibition of double jeopardy
- Rights of debtors

I. No one may be condemned without having been previously heard and tried pursuant to due process. No one shall be subject to a criminal sanction that has not been imposed by a competent judicial authority as a final judgment.

II. No one shall be tried or sentenced more than once for the same act. The rights that are restricted shall be immediately restored upon fulfillment of the sentence.

III. No sanction of deprivation of liberty may be imposed for debts or property obligations, except in the cases established by law.

Article 118

I. Dishonor, civil death and confinement are prohibited.

II. The maximum criminal sentence shall be thirty years of deprivation of liberty without the right to pardon.

III. The fulfillment of sentences of deprivation of liberty and the security measures imposed are directed toward the education, rehabilitation and reinsertion in society of the condemned persons, with respect for their rights.

Article 119

- Right to counsel
- Inalienable rights

I. During the legal process, the parties in conflict enjoy equal opportunities to exercise the faculties and rights that may help them, whether in an ordinary process or by rural native indigenous process.

II. Everyone has the inviolable right to a defense. The State shall provide a defense lawyer free of charge to persons accused or denounced in the event that they do not have the necessary economic resources.

Article 120

- Right to fair trial
- Trial in native language of accused

I. Every person has the right to be heard by a competent, impartial and independent jurisdictional authority, and may not be tried by special commissions or submitted to other jurisdictional authorities other than those established prior to the time the facts of the case arose.

II. Every person submitted to legal process has the right to be tried in his or her language; in case of exception, the person must be assisted by a translator or interpreter.

Article 121

- Protection from self-incrimination

I. In criminal matters, no person can be forced to make a statement against him or herself, or against his or her blood relatives to the fourth degree or against non-blood relatives up to the second degree. The right to remain silent shall not be considered an indication of guilt.

- Protection of victim's rights
- Right to counsel

II. The victim in a criminal process shall be able to intervene in accordance with the law, and shall have the right to be heard before each judicial decision. In the event that he or she does not have the necessary economic resources, he or she will be assisted free of charge by a lawyer appointed by the State.

- Ultra-vires administrative actions

Article 122

The acts of persons who usurp functions, which are not their responsibility, as well as the acts of those who exercise jurisdiction or power that does not emanate from the law, are null and void.

Article 123

The law stipulates only with respect to future acts and shall have no retroactive effect, except in the following cases: in labor matters when it expressly makes determinations in favor of workers; in criminal matters, when it benefits the accused; in corruption matters in order to investigate, process and sanction crimes committed by public servants against the interests of the State; and in the rest of the cases set forth by the Constitution.

Article 124

I. The Bolivian who engages in the following acts commits the crime of treason against the country:

1. Takes up arms against his or her country, puts him or herself at the service of participating foreign states, or enters into complicity with the enemy in the case of an international war against Bolivia.
2. Violates the constitutional regime of natural resources.
3. Attacks the unity of the country.

II. This crime shall deserve the maximum criminal sanction.

CHAPTER II. Actions of Defense

Section I. Action for Liberty

- Protection from unjustified restraint

Article 125

Anyone who believes his or her life is in danger, that he or she is being illegally persecuted, unjustly tried or deprived of personal liberty, shall file a claim of Action for Liberty (Accion de Libertad) and present him or herself, either in writing or orally, on his or her own behalf or by anyone in his or her name, and without any formal procedure, before any judge or competent court in criminal matters, and shall request that his or her life be protected, that the unjustified persecution be halted, that the legal formalities be reestablished, or that his or her right to liberty be restored.

Article 126

I. The judicial authority shall immediately set the day and hour of the public hearing, which shall take place within twenty four hours of the filing of the claim, and shall stipulate that the claimant be brought into its presence, or it shall go to the place of detention. With said order, it shall execute the citation, in person or by service of process, to the authority or person accused, which order shall be obeyed, without excuse, both by the authority or person accused as well as by those in charge of the jails or places of detention, without their having the possibility, once served, of disobeying.

II. In no event may the hearing be suspended. In the absence of the defendant for failure to attend or abandonment, the process will continue in default.
III. With knowledge of the background and having heard the allegations, the judicial authority shall be obligated and have the responsibility to dictate the sentence at the same hearing. The sentence shall order the safeguarding of the claimant's life, the restitution of the right to liberty, the correction of the legal defects, the cessation of the illegal persecution, or the remanding of the case to a competent judge. In every case, the parties shall be notified of the reading of the sentence.
IV. The judicial decision shall be executed immediately. Without prejudice to it, the decision shall be taken on appeal, sua sponte, to the Pluri-National Constitutional Court (Tribunal Constitucional Plurinacional), within the term of twenty four hours after its issuance.

Article 127

I. Public servants and individuals who resist compliance with the judicial decisions in the cases foreseen for this action shall be remanded by order of the authority that heard the case to the Public Ministry for criminal process for threatening constitutional guarantees.
II. The judicial authority that does not proceed pursuant to that stipulated by this article shall be subject to sanction, in accordance with the Constitution and the law.

Section II. Action of Constitutional Protection

- Right to amparo
- Binding effect of const rights
- Ultra-vires administrative actions

Article 128

The Action for Constitutional Protection (Accion de Amparo Constitucional) shall take place against the illegal or unjustified acts or omissions of public servants or of individuals or collectives, who restrict, suppress or threaten to restrict or suppress rights recognized by the Constitution and the law.

- Right to amparo

Article 129

I. The Action for Constitutional Protection shall be presented by the person who believes him or herself affected, by another with sufficient power to act in his or her name, or by the corresponding authority pursuant to the Constitution, to any judge or competent court, provided that there is no other existing means or legal recourse for the immediate protection of the rights and guarantees that have been restricted, suppressed or threatened.
II. The Action for Constitutional Protection shall be filed within the maximum term of six months, computed from the commission of the alleged violation or the notification of last administrative or judicial decision.
III. The defendant authority or person shall be summoned in the manner set forth by the Action for Liberty, in order for the defendant to provide information or make a presentation in his case of the facts concerning the act complained of, in the maximum term of forty eight hours from the presentation of the Action.
IV. The final resolution shall be announced in a public hearing immediately after receiving the information from the defendant authority or person and, in the absence of that information, it will be made on the basis of the proof offered by the plaintiff. The judicial authority shall examine the competence of the public servant or of the defendant and, in the event it finds the complaint to be certain and true, shall grant the protection requested. The decision that is pronounced shall be taken, sua sponte, for review before the Pluri-National Constitutional Court (Tribunal Constitucional Plurinacional) in the term of twenty four hours following the issuance of the decision.
V. The final decision that grants the Action for Constitutional Protection shall be immediately executed and without comment. In the event of resistance, the case shall proceed pursuant to that set forth in the Action for Liberty. The judicial authority that does not proceed pursuant to that set forth in this article shall be subject to the sanctions set forth in the law.

Section III. Action for Protection of Privacy

Article 130

- Right to protect one's reputation

I. Every individual, or collective, that believes he or she to be unjustly or illegally impeded from knowing, objecting to, or achieving the elimination or correction of information registered by any physical electronic, magnetic or computerized form, in public or private files or data banks, or that might affect his or her fundamental right to intimacy and personal or family privacy, or his or her own image, honor and reputation, shall file a complaint of Action for Protection of Privacy.

II. The Action for Protection of Privacy (Accion de Protección de Privacidad) shall not proceed to uncover confidential material of the press.

Article 131

I. The Action for Protection of Privacy shall take place pursuant to the procedure set forth for the Action of Constitutional Protection.

II. If the competent court or judge admits the action, it shall order the revelation, elimination or correction of the data, the registration of which was challenged.

III. The decision shall be taken on appeal, sua sponte, to the Pluri-National Constitutional Court within the term of twenty four hours following the issuance of the decision, without suspension of its execution.

IV. The final decision granted in the Action for Protection of Privacy shall be immediately executed and without comment. In the event of resistance, the procedure shall be pursuant to that set forth in the Action for Liberty. The judicial authority that does not proceed pursuant to that set forth in this article shall be subject to the sanctions set forth in the law.

Section IV. Action for Unconstitutionality

- Constitutionality of legislation

Article 132

Every person or collective affected by a juridical norm contrary to the Constitution shall have the right to present an Action for Unconstitutionality (Accion de Inconstitucionalidad), pursuant to the procedures established by law.

Article 133

The decision that declares a law, decree, or any other kind of nonjudicial resolution unconstitutional makes the challenged norm inapplicable and has full effect with respect to everyone.

Section V. Action for Compliance

- Ultra-vires administrative actions

Article 134

I. The Action for Compliance (Accion de Cumplimiento) shall apply to the case of non compliance with provisions of the constitutional or the law on the part of public servants, and has as its objective the guaranteeing of the execution of the norm.

II. The action shall be filed by the affected individual or collective, or by another with sufficient power in name of the affected party, before a competent judge or court, and shall be processed in the same manner as the Action for Constitutional Protection.

III. The final resolution shall be pronounced at a public hearing immediately after receiving the information from the defendant authority and, in the absence of that information, it shall be made on the basis of the proof offered by the plaintiff. The judicial authority shall examine the background and, if it finds the complaint to be true and certain, it shall admit the action and order immediate compliance with the omitted duty.

IV. The decision shall be taken up on appeal, sua sponte, to the Pluri-National Constitutional Court within the term of twenty four hours following the issuance of the decision, without suspension of its execution.
V. The final decision granted in the Action for Compliance shall be immediately executed without comment. In the event of resistance, the procedure shall be pursuant to that set forth in the Action for Liberty. The judicial authority that does not proceed pursuant to that set forth in this article shall be subject to the sanctions set forth in the law.

Section VI. Popular Action

- Ultra-vires administrative actions

Article 135

The Popular Action (la Accion Popular) shall proceed against any act or omission by the authorities or individuals or collectives that violates or threatens to violate rights and collective interests related to public patrimony, space, security and health, the environment and other rights of a similar nature that are recognized by this Constitution.

Article 136

I. The Popular Action shall be filed during the period in which the violation or threat to the rights and collective interests continues. To file this action it is not necessary to exhaust the judicial or administrative processes that might exist.
II. Any person, in his or her individual name or on behalf of a collective, may file this action, and it shall be filed obligatorily by the Public Ministry and the Public Defender (Ministerio Público y el Defensor del Pueblo) when, in the exercise of their functions, they have knowledge of these acts. The procedure for the Action for Constitutional Protection shall be applied.

- Emergency provisions

CHAPTER III. States of Emergency

Article 137

In the case of danger to the security of the State, external threat, internal disturbance or national disaster, the President of the State shall have the power to declare a state of emergency, wherever necessary in all or part of the territory. The declaration of the state of emergency shall not, in any case, suspend the guarantees of rights, nor the fundamental rights, the right of due process, the right to information and the rights of persons deprived of liberty.

Article 138

I. The validity of the declaration of the state of emergency shall depend on the subsequent approval of the Pluri-National Legislative Assembly, which shall take place as soon as circumstances permit, and in all cases, within seventy two hours following the declaration of the state of emergency. The approval of the declaration shall indicate the powers conferred, and it shall maintain strict relation and proportion to the case of necessity addressed by the state of emergency. In general, the rights consecrated in the Constitution shall not be suspended by the declaration of the state of emergency.
II. Once the state of emergency ends, no other state of emergency may be declared within one year following, except upon prior legislative authorization.

Article 139

I. The Executive shall report to the Pluri-National Legislative Assembly concerning the reasons for the declaration of the state of emergency, as well as the use that has been made of the powers conferred by the Constitution and the law.
II. Those persons who violate the rights established in this Constitution shall be subject to criminal process for violation of rights.
III. The states of emergency shall be regulated by law.

Article 140

I. Neither the Pluri-National Legislative Assembly, nor any other body or institution, nor association or popular group of any kind, shall grant to a body or person any extraordinary authorities different than those established in this Constitution.
II. Public Power may not be accumulated, nor may any body or person be granted supremacy over the rights and guarantees recognized in this Constitution.
III. The reform of the Constitution may not be initiated while there is a state of emergency in force.

TITLE V. NATIONALITY AND CITIZENSHIP

CHAPTER I. Nationality

- Requirements for birthright citizenship
- Requirements for naturalization

Article 141

Bolivian nationality is acquired by birth or by naturalization. Persons who are born in the territory of Bolivia are Bolivians by birth, with the exception of children of foreign personnel on diplomatic mission; persons born abroad of a Bolivian mother or father are Bolivians by birth.

- Requirements for naturalization

Article 142

I. Foreigners may acquire Bolivian nationality by naturalization if they are legally in the country for more than three years of uninterrupted residence under the supervision of the State, and they expressly manifest their desire to obtain Bolivian nationality and comply with the requisites established by law.
II. The time of residence shall be reduced to two years in the case of foreigners who are in one of the following situations:
    1. They have a Bolivian spouse, a Bolivian child or children, or Bolivian adoptive parents. Foreign citizens who acquire citizenship by marriage with Bolivian citizens do not lose it in the case of widowhood or divorce.
    2. They serve in the Bolivian military at the required age and pursuant to the law.
    3. They obtain Bolivian nationality granted by the Pluri-National Legislative Assembly for their service to the country.
III. The time of residence for obtaining Bolivian nationality may be modified when there are reciprocal conventions with other states, first and foremost those of Latin America.

Article 143

I. Bolivians who marry foreign citizens shall not lose their nationality of origin. Nor shall Bolivian nationality be lost by acquiring foreign citizenship.
II. Foreigners who acquire Bolivian nationality shall not be obligated to renounce their nationality of origin.

CHAPTER II. Citizenship

- Requirements for birthright citizenship

Article 144

I. All Bolivians are citizens and exercise their citizenship rights from the age of 18, whatever may be their level of education, occupation or income.
II. Citizenship rights consist of:
    1. Taking part as an elector or being eligible to be part of and exercise functions in the bodies of popular power, and
    2. The right to exercise public functions without any requisites, except those established by law.
III. The rights of citizens are suspended for reasons and in the manner set forth in article 28 of this Constitution.

- Restrictions on voting
- Conditions for revoking citizenship

PART II. FUNCTIONAL STRUCTURE AND ORGANIZATION OF THE STATE

TITLE I. LEGISLATIVE ORGAN

CHAPTER I. Composition and Attributes of the Pluri-National Legislative Assembly

- Structure of legislative chamber(s)

Article 145

The Pluri-National Legislative Assembly is composed of two chambers, the Chamber of Deputies (Camara de Diputados) and the Chamber of Senators (Camara de Senadores), and it is the only body with authority to approve and sanction laws that govern the entire Bolivian territory.

- First chamber selection
- Size of first chamber
- Right to culture
- Indigenous right to vote
- Indigenous right to representation
- Electoral districts
- Electoral districts
- Electoral districts

Article 146

I. The Chamber of Deputies shall have 130 members.
II. In each Department, half of the Deputies (Diputados) shall be elected by direct voting electoral districts. The other half shall be elected by proportional voting electoral districts, from lists headed by candidates for President, Vice President and the Senators of the Republic.
III. Deputies are elected by universal, direct and secret vote. In the single Districts, they are elected by simply majority of the voters; in the multiple districts, by a system of representation established by law.
IV. The number of Deputies must reflect the proportional vote obtained by each party, citizen group or indigenous people.
V. The total distribution of seats among the departments shall be determined by the Electoral Organ (Organo Electoral) on the basis of the number of inhabitants in each one of them, pursuant to the latest National Census, according to law. For equity, the law shall assign a minimum number of seats to the departments that have the least population and least economic development. If the distribution of seats for any department is an uneven number, preference will be given to the single districts for the assignment of the seats.
VI. The single districts must have geographical continuity, affinity and territorial continuity; they may not extend beyond the borders of each department and must be based on criteria of population and territorial extension. The Electoral Organ shall define the single districts.
VII. The special rural native indigenous districts shall be governed by the principle of density of population in each department. They shall not cross department borders. They shall be established only in a rural area in those departments in which those nations and native indigenous rural peoples constitute a minority population. The Electoral Organ shall define the special districts. These districts form part of the total number of deputies.

- Right to culture
- Indigenous right to representation

Article 147

I. The equal participation of men and women shall be guaranteed in the election of the members of the assembly.
II. Proportional participation of the nations and rural native indigenous peoples shall be guaranteed in the election of members of the assembly.
III. The law shall define the special districts of the rural native indigenous peoples, in which population density and geographical continuity shall not be considered as conditional criteria.

- Size of second chamber

Article 148

I. The Chamber of Senators shall consist of a total of 36 members.

- Second chamber selection

II. In each department, four Senators shall be elected in departmental districts by universal, direct and secret vote.
III. The assignment of seats for Senators in each department shall be made by a proportional system pursuant to the Law.

- Age restrictions on second chamber
- Eligibility for first chamber
- Age restrictions on first chamber
- Eligibility for second chamber

Article 149

To be a candidate to the Pluri-National Legislative Assembly, one must satisfy the general requisites for public service, be 18 years of age at the time of election, and have resided permanently for at least two years immediately prior to the election in the corresponding district.

Article 150

- Replacement of legislators

I. The Pluri-National Legislative Assembly shall have alternate members who do not receive remuneration except in the case that they must actually serve as substitutes. The law shall determine the manner of substitution of the members.

- Outside professions of legislators

II. The members of the assembly shall not carry out any other public function, under penalty of losing their mandate, with the exception of university teaching.
III. The resignation of a member of the assembly shall be final, without the possibility of being able to obtain permission or the grant of temporary substitution for the purpose of carrying out other functions.

- Immunity of legislators

Article 151

I. The members of the assembly shall enjoy personal privilege during the time of their mandate, and afterwards they may not be criminally processed for their opinions, communications, representations, requests, questions, denouncements, proposals, expressions or any legislative act or act of reporting or control, which they formulate or undertake while performing their functions.
II. The domicile, residence or habitat of the members of the assembly may not be violated, and they shall not be searched under any circumstance. This provision shall be applied to the vehicles of their personal or official use and to their legislative offices.

- Immunity of legislators

Article 152

The members of the assembly do not enjoy immunity. Preventive detention shall not be applied to them in criminal processes during their mandate, except in cases of flagrant crimes.

Article 153

I. The Vice President of the State shall preside over the Pluri-National Legislative Assembly.
II. The ordinary sessions of the Pluri-National Legislative Assembly shall start on the 6th of August of every year.

- Length of legislative sessions

III. The ordinary sessions of the Pluri-National Legislative Assembly shall be continuous, and each one will have two recesses of fifteen days per year.
IV. By decision of the Plenary and the convocation of its President, the Pluri-National Legislative Assembly may hold sessions in a different place other than the habitual one within the territory of the State.

- Legislative committees
- Extraordinary legislative sessions
- Standing committees

Article 154

During recesses, the Assembly Commission (Comision de Asamblea) shall function, in the form and with the attributes determined by the Rules of the Chamber of Deputies (Reglamento de la Camara de Diputados). In extraordinary cases, for matters of urgency, the Assembly can be convoked by its President or by the President of the State. It shall only take up the matters set forth in the convocation.

Article 155

The Pluri-National Legislative Assembly shall inaugurate its sessions on the 6th of August in the Capital of Bolivia, unless expressly called by its President.

- Term length for first chamber
- Term limits of second chamber
- Term length of second chamber
- Term limits for first chamber

Article 156

The term of the mandate of the members of the assembly is five years, and they may be reelected for a single additional continuous term.

- Removal of individual legislators
- Attendance by legislators

Article 157

The mandate of the member of the assembly ends in the following circumstances: the death or resignation of the member; the revocation of the member's mandate; the final condemnatory sentence of the member in a criminal case; or the unjustified abandonment of his or her functions for more than six continuous working days or eleven non continuous working days a year, as determined in accordance with the Rules.

Article 158

I. The attributes of the Pluri-National Legislative Assembly, in addition to those determined by this Constitution and the law are the following:

- Compensation of legislators
- Supreme court selection
- Constitutional court selection
- Establishment of judicial council
- Economic plans
- Budget bills
- Treaty ratification
- Legislative oversight of the executive
- Cabinet removal

1. To approve and execute its budget autonomously; to name and remove its administrative personnel; and to attend to everything related to its internal governance and economy.
2. To set the remuneration of the members, which, in no case, may be higher than that of the Vice President of the State. Any additional income from a remunerated activity is prohibited.
3. To dictate, interpret, repeal, abrogate and modify laws.
4. To elect six of its members to the Pluri-National Electoral Organ, by two-thirds vote of the members present.
5. To pre-select the candidates to form the Pluri-National Constitutional Court (Tribunal Constitucional Plurinacional), the Supreme Court of Justice (Tribunal Supremo de Justicia), the Agro-Environmental Court (Tribunal Agroambiental) and the Council of Magistrates (Consejo de la Magistratura).
6. To approve the creation of new territorial units and to establish their boundaries, pursuant to the Constitution and the law.
7. To approve the economic and social development plan presented by the Executive Organ).
8. To approve the laws in matters of budgets, indebtedness, control and supervision of state resources, of public credit, and of subsidies for the undertaking of public works and social needs.
9. To make decisions on indispensable state economic measures in case of public necessity.
10. To approve the contracting of loans that commit general income of the State, and to authorize universities to contract loans.
11. To approve the General State Budget presented by the Executive Organ. Once the draft law is received, it must be considered by the Pluri-National Legislative Assembly within the term of sixty days. In case it is not approved within this time frame, the draft law shall be considered approved.
12. To approve the contracts of public importance with regard to natural resources and strategic areas, signed by the Executive Organ.
13. To approve the disposal of assets of public dominion of the State.
14. To ratify international treaties signed by the Executive, in the manner established by the Constitution.
15. To establish the monetary system.
16. To establish the system of measures.
17. To monitor and oversee the organs of the State and the public institutions.
18. To question, at the initiative of any of the members of the assembly, the Ministers of State, individually or collectively, and to censure by the vote of two-thirds of the members of the Assembly. The questioning shall be

I. 18. requested by either of the Chambers. The censure shall imply the replacement of the Minister.

- Legislative oversight of the executive
- Legislative committees

19. To undertake investigations within the framework of their supervisory attributes, by way of a commission or commissions elected for that purpose, without prejudice to the control exercised by the competent bodies.

20. To monitor and oversee public enterprises, those of mixed capital and every entity that has State economic participation.

- Designation of commander in chief

21. To authorize the use of military troops, armaments and war materiel outside of the territory of the State, and to determine the purpose and time of the absence of troops.

22. To authorize in exceptional cases the entrance and temporary transit of foreign armed forces, determining the purpose and length of their stay.

- Tax bills

23. At the initiative of the Executive Organ, to create or modify taxes at the central level of the State. Nevertheless, the Pluri-National Legislative Assembly, at the request of one of its members, shall request that the Executive Organ present bills on the matter. If the Executive Organ, within the term of twenty days does not present the requested bill, or the justification for not having done so, the representative who had requested it or another, shall present his or her own bill for consideration and approval.

II. The organization and functions of the Pluri-National Legislative Assembly shall be regulated by the Rules of the Chamber of Deputies.

Article 159

The attributes of the Chamber of Deputies, in addition to those determined by this Constitution and the law, are:

1. To draft and approve its Rules.

2. To describe the credentials granted by the Pluri-National Electoral Organ.

- Leader of first chamber

3. To elect its executive committee; and to determine its internal organization and functions.

4. To apply sanctions to deputies, pursuant to the Rules, by a decision of two-thirds of the members present.

5. To approve and execute its budget; to name and remove its administrative personnel; and to attend to everything related to its internal economy and governance.

- First chamber reserved policy areas

6. To initiate the approval of the General State Budget.

- Economic plans
- First chamber reserved policy areas

7. To initiate the approval of the economic and social development plan presented by the Executive Organ.

- First chamber reserved policy areas

8. To the initiate the approval or modification of the tax laws, laws of public credit or subsidies.

- First chamber reserved policy areas

9. To initiate the approval of the contracting of loans which commit the general revenues of the State, and to authorize universities to contract loans.

10. In each legislature, to approve the armed forces that should be maintained in peace time.

- Constitutional court removal
- Supreme/ordinary court judge removal

11. To accuse, before the Chamber of Senators, the members of the Pluri-National Constitutional Court, of the Supreme Court and of the Administrative Control of Justice who have committed crimes in the exercise of their functions.

12. To propose lists of candidates to the President of the State for the designation of the presidents of the economic and social entities and other positions in which the State participates, by absolute majority pursuant to the Constitution.

13. To pre-select the candidates for the Administrative Control of Justice and to send the names of the candidates to the Pluri-National Electoral Organ so that

13. this Organ may carry out the sole and exclusive organization of the electoral process.

Article 160

The attributes of the Chamber of Senators, in addition to those determined by this Constitution and the law, are:

1. To draft and approve its Rules.
2. To qualify the credentials granted by the Pluri-National Electoral Organ.
3. To elect its executive committee, and determine its internal organization and functions.
4. To apply sanctions to Senators, pursuant to the Rules, by decision of two-thirds of the members present.
5. To approve and execute its budge; to name and remove its administrative personnel and to attend to everything related to its internal economy and governance.
6. To be the sole instance to try the members of the Pluri-National Constitutional Court, of the Supreme Court, of the Agro-Environmental Court and of the Administrative Control of Justice for crimes committed in the exercise of their functions, whose sentences shall be approved by at least two-thirds of the members present, pursuant to the law.
7. To recognize with public honors those who are deserving of it for eminent service to the State.
8. To ratify the promotions, proposed by the Executive Organ, to General of the Army, of the Air Force, of the Division and of the Brigade; to Admiral, Vice Admiral, Rear Admiral, and General of the Bolivian Police.
9. To approve or deny the appointments of ambassadors and plenipotentiary Ministers proposed by the President of the States.

- Leader of second chamber
- Supreme/ordinary court judge removal
- Constitutional court removal
- Selection of active-duty commanders

Article 161

The Chambers shall meet in Pluri-National Legislative Assembly to exercise the following functions, as well as those set forth in the Constitution:

1. To inaugurate and close its sessions.
2. To receive the oath of the President and Vice President of the State.
3. To accept or reject the resignation of the President of the State and of the Vice President of the State.
4. To consider the laws vetoed by the Executive Organ.
5. To consider bills approved in the Chamber of origin that were not approved in the reviewing Chamber.
6. To approve states of emergency.
7. To authorize the trial of the President or of the Vice President of the State.
8. To designate the Attorney General of the State and the Public Defender.

- Joint meetings of legislative chambers
- Veto override procedure
- Emergency provisions
- Head of state immunity
- Attorney general
- Ombudsman

CHAPTER II. Legislative Procedure

Article 162

- Initiation of general legislation
- Legislative initiatives by citizens

I. The following have the authority to initiate legislation, which the Pluri-National Legislative Assembly is obligated to process:
  1. Citizens.
  2. Members of the assembly in each of the Chambers.
  3. The Executive Organ.
  4. The Supreme Court, with respect to initiatives related to the administration of justice.
  5. The autonomous governments of the territorial entities.

II. The law and rules of each Chamber shall develop the procedures and requisites for exercising the authority of legislative initiative.

- Division of labor between chambers

Article 163

The legislative process shall develop in the following manner:

- Legislative committees

1. The presentation of a bill by members of one of the Chambers of the assembly shall initiate the legislative process in that Chamber, which shall remand it to the corresponding commission or commissions for its treatment and initial approval.

- Legislative committees

2. The bill presented by other initiative shall be sent to the Chamber of Deputies, which shall remand it to a commission or commissions.

- Second chamber reserved policy areas

3. The legislative initiatives in matters of decentralization, autonomies and land registry and regulations shall be received by the Chamber of Senators.

- Legislative committees

4. When a bill has been reported by the corresponding commission or commissions, it shall be sent for consideration by the plenary of the Chamber, where it shall be discussed and approved in full and in detail. Each approval shall require an absolute majority of the members present.

5. The bill approved by the Chamber of origin shall be remanded to the reviewing Chamber for its decision. If the reviewing Chamber approves it, it shall be sent to the Executive Organ for its promulgation.

6. If the reviewing Chamber amends or modifies the bill, this shall be considered as approval if the originating Chamber accepts the amendments or modification by the vote of an absolute majority of the members present. In the event that it does not accept the changes, the two Chambers shall meet at the request of the originating Chamber within the term of twenty days following and shall debate the bill. The decision shall be made by the Plenary of the Pluri-National Legislative Assembly by an absolute majority of the members present.

7. In the event that thirty days pass without pronouncement on the bill by the reviewing Chamber, the bill shall be considered by the Plenary of the Pluri-National Legislative Assembly.

8. The approved bill, once confirmed, shall be sent to the Executive Organ for its promulgation as law.

9. A bill that has been rejected may be reintroduced in the next Legislature.

- Approval or veto of general legislation
- Legislative committees

10. The law, which has been approved by the Pluri-National Legislative Assembly and sent to the Executive Organ, may be commented on by the President within ten working days from the time of its receipt. The observations of the Executive Organ shall be sent to the Assembly. If the latter should be in recess, the President shall send his or her observations to the Commission of the Assembly (Comision de Asamblea).

- Veto override procedure
- Approval or veto of general legislation

11. If the Pluri-National Legislative Assembly considers the observations of the President to be well founded, it will modify the law accordingly and will return the law to Executive Organ for its promulgation. In the event that it does not consider the observations to be well founded, the law shall be promulgated by

11. the President of the Assembly. The decisions of the Assembly shall be made by the vote of the absolute majority of the members present.

- Approval or veto of general legislation

12. The law on which no observations are made within the corresponding term of time shall be promulgated by the President of the State. The laws not promulgated by the Executive Organ in the terms set forth in the sections above shall be promulgated by the President of the Assembly.

Article 164

I. The promulgated law shall be published immediately in the Official Gazette.
II. Compliance with the law is obligatory from the date of its publication, except for those that establish a different term for entrance into force.

TITLE II. EXECUTIVE ORGAN

CHAPTER I. Composition and Attributes of the Executive Organ

Section I. General Matters

- Establishment of cabinet/ministers

Article 165

- Deputy executive
- Name/structure of executive(s)

I. The Executive Organ consists of the President of the State, the Vice President of the State, and the Ministers of State.
II. The Council of Ministers is collectively responsible for the decisions they adopt.

Section II. Presidency and Vice Presidency of the State

- Deputy executive
- Head of state selection

Article 166

I. The President and Vice President of the State shall be elected by universal, obligatory, direct, free and secret vote. The candidates who receive fifty percent plus one of the valid votes cast, or the candidate who has received a minimum of forty percent of the valid votes cast, with a difference of at least ten percent in relation to the candidate in second place, shall be proclaimed President or Vice President.
II. In the event that none of the candidates meet these conditions, a second electoral round shall be carried out between the two candidates who received the most votes, within the term of sixty days counted from the prior voting. The candidate who receives the majority of votes shall be declared President or Vice President of the State.

- Age restrictions on head of state
- Eligibility for head of state

Article 167

To be a candidate for President or Vice President of the State, one must satisfy the general conditions to be a public servant, be thirty years of age on the day of the election, and have resided permanently in the country for at least five years immediately prior to the election.

- Head of state term limits
- Head of state term length

Article 168

The period of the mandate of the President or Vice President is five years, and they may be reelected once for a continuous term.

Article 169

- Head of state replacement

I. In the event of an impediment or definitive absence of the President, he or she shall be replaced by the Vice President and, in the absence of the latter, by the President of the Senate, and in his or her absence by the President of the Chamber of Deputies. In this last case, new elections shall be called within a maximum period of ninety days.

II. In case of temporary absence, the Vice President shall assume the Presidency for a term not to exceed ninety days.

- Head of state removal

Article 170

The mandate of the President of the State shall end in the following circumstances: upon his or her death; by the presentation of his or her resignation to the Pluri-National Legislative Assembly; by definitive absence or impediment; by the imposition of a final condemnatory sentence in a criminal matter; or by the revocation of his or her mandate.

- Head of state replacement

Article 171

In the event the mandate is revoked, the President of State shall immediately cease in his or her functions; the Vice President must assume the Presidency and immediately call elections for the Presidency of the State to take place within a maximum period of ninety days.

- Head of state powers

Article 172

The attributes of the President of the State, in addition to those established by this Constitution and the law, are the following:

- Duty to obey the constitution

1. To comply with and enforce the Constitution and the laws.
2. To maintain and preserve the unity of the Bolivian State.
3. To propose and direct the policies of the government of the State.
4. To direct the public administration and coordinate the actions of the Ministers of State.
5. To direct foreign policy; sign international treaties; name public diplomats and consuls pursuant to the law; and to admit foreign officials in general.

- Treaty ratification
- Foreign affairs representative
- Extraordinary legislative sessions

6. To request the calling of an extraordinary session of the Pluri-National Legislative Assembly.
7. To promulgate the laws approved by the Pluri-National Legislative Assembly.

- Head of state decree power

8. To issue supreme decrees and resolutions.
9. To administer the state revenues and to decree their investment by the Ministry of the appropriate branch in accordance with the laws and strictly subject to the General Budget of the State.

- Economic plans

10. To present the economic and social development plan to the Pluri-National Legislative Assembly.

- Budget bills

11. To present to the Pluri-National Legislative Assembly, during the first thirty sessions, the proposed law of the General Budget of the State for the following fiscal year, and to propose, during its term, the modifications he or she considers necessary. The report on public expenses pursuant to the budget shall be presented annually.

- Legislative oversight of the executive

12. To present annually to the Pluri-National Legislative Assembly, in its first session, the written report on the course and state of Public Administration during the yearly management, accompanied by the ministerial reports.
13. To enforce the decisions of the courts.

- Power to pardon

14. To decree amnesty or pardon, with the approval of the Pluri-National Legislative Assembly.

- Central bank

15. To name the following, from among the candidates proposed by the Pluri-National Legislative Assembly: the Controller General of the State, the President of the Bank of Bolivia, the maximum authority of the Regulatory Organ of the

15. Banks and Financial Entities, and the Presidents of the entities, in which the State participates, that have a social and economic function.

16. To preserve the security and defense of the State.

- Designation of commander in chief

17. To designate and substitute the Commander in Chief of the Armed Forces and the Commanders of the Army, the Air Force and the Navy.

18. To designate and substitute the General Commander of the Bolivian Police.

- Selection of active-duty commanders

19. To propose to the Pluri-National Legislative Assembly the promotions to General of the Army, of the Air Force, of the Division and of the Brigade, to Admiral, Vice Admiral, and Rear Admiral, and to General of the Police, in accordance with the report on their service and promotions.

20. To create and construct ports.

21. To designate its representatives to the Electoral Organ.

- Eligibility for cabinet
- Cabinet selection
- Right to culture
- Indigenous right to representation
- Initiation of general legislation

22. To designate the Ministers of State, respecting the Pluri-National character of the country and gender equity in the composition of the ministerial cabinet.

23. To designate the Attorney General of the State.

24. To present proposed laws of economic urgency for consideration by the Pluri-National Legislative Assembly, which must give them priority attention.

- Designation of commander in chief

25. To hold the position of Commander in Chief of the Armed Forces, and to deploy them for the defense, independence and territorial integrity of the State.

- Emergency provisions

26. To declare a state of emergency.

27. To exercise maximum authority over the Bolivian Agrarian Reform Service and to grant executable titles in the distribution and redistribution of land.

Article 173

The President of the State may absent him or herself from Bolivian territory for official missions for a maximum period of up to ten days without authorization of the Pluri-National Legislative Assembly.

- Deputy executive

Article 174

The attributes of the Vice President of the State, in addition to those established in this Constitution and the laws, are as follows:

1. To assume the Presidency of the State in the cases established in this Constitution.

2. To coordinate the relations between the Executive Organ, the Pluri-National Legislative Assembly, and the autonomous governments.

3. To participate in the sessions of the Council of Ministers.

4. To contribute, with the President of the State, to the guidance of the general policy of the Government.

5. To participate jointly with the President of the State in the formulation of foreign policy, as well as to carry out diplomatic missions.

Section III. Ministers of State

Article 175

- Powers of cabinet

I. The Ministers of State are public servants and have the following authority, in addition to those established in this Constitution and the laws:

I. 1. To Propose and contribute to the formulation of the general policies of the Government.
2. To propose and direct the governmental policies in their sector.
3. To manage Public Administration in their corresponding branch.
4. To issue administrative norms in the area of their competence.
5. To propose drafts of supreme decrees and to sign them with the President of the State.
6. To resolve, as last recourse, any administrative matter that corresponds to his or her Ministry.
7. To present to the Pluri-National Legislative Assembly the reports that it requests.
8. To coordinate, together with other Ministries, the planning and execution of the policies of the government.

- Legislative oversight of the executive

II. The Ministers of State are responsible for the administrative acts adopted in the areas of their respective portfolios.

- Eligibility for cabinet

Article 176

To be designated a Minister, a person must meet the following requisites: satisfy the general requirements for entering public service, be twenty five years of age on the day of his or her nomination, not be a member of the Pluri-National Legislative Assembly, nor a director, shareholder or owner of financial entities or enterprises that have a contractual relationship or conflicts of interest with the State; not be the spouse or natural parent or related in the second degree to the acting President or Vice President of the State.

- Eligibility for cabinet

Article 177

Anyone who, whether directly or as the legal representative of a legal person, has a contract pending fulfillment or is indebted to the State may not be designated as a Minister.

TITLE III. JUDICIAL ORGAN AND PLURI-NATIONALCONSTITUTIONAL COURT

CHAPTER I. General Matters

Article 178

- Right to fair trial
- Right to speedy trial
- Judicial independence
- Right to public trial

I. The power to impart justice emanates from the Bolivian people and is based on the principles of independence, impartiality, juridical security, publicity, probity, promptness, being free of charge, legal pluralism, being inter-cultural, equity, service to society, citizen participation, social harmony and respect for rights.

- Protection of judges' salaries

II. The guarantees of judicial independence are:
1. The performance of the judges in accordance with a judicial career.
2. The budgetary autonomy of the judicial bodies.

Article 179

- Indigenous right to self governance
- Structure of the courts
- Right to culture

I. The judicial function is singular. Ordinary jurisdiction is exercised by the Supreme Court of Justice, the departmental courts of justice, the sentencing courts and the judges; the agro-environmental jurisdiction is exercised by the Agro-Environmental Court and judges; and the rural native indigenous jurisdiction is exercised by their own authorities. There shall be specialized jurisdictions regulated by the law.

II. Ordinary jurisdiction and rural native indigenous jurisdiction enjoy equal status.

- Right to culture
- Establishment of constitutional court

III. Constitutional justice is imparted by the Pluri-National Constitutional Court (Tribunal Constitucional Plurinacional).

- Establishment of judicial council

IV. The Council of Judges is part of the Judicial Organ (Organo Judicial).

CHAPTER II. Ordinary Jurisdiction

Article 180

- Guarantee of due process
- Right to fair trial
- Right to speedy trial
- Right to public trial
- Right to appeal judicial decisions
- Establishment of military courts

I. Ordinary jurisdiction is based on the following procedural principles: application free of charge, publicity, transparency, the right to be heard, promptness, probity, honesty, legality, efficiency, accessibility, immediacy, material truth, due process, and equality of the parties before the judge.
II. The principle of the right to challenge in judicial processes is guaranteed.
III. Ordinary jurisdiction shall not recognize privileges or extraordinary courts. The military jurisdiction shall try the crimes of military nature regulated by the law.

Sole Section. Supreme Court of Justice

- Structure of the courts

Article 181

The Supreme Court of Justice is the highest court of ordinary jurisdiction. It is made up of Magistrates. It is internally organized into specialized chambers. Their composition and organization shall be determined by law.

- Constitutional court selection
- Supreme court selection

Article 182

I. The Magistrates of the Supreme Court of Justice shall be elected by universal suffrage.
II. The Pluri-National Legislative Assembly, by two-thirds of the members present, shall determine the pre-selection of the candidates for each department and shall send the names of those selected to the electoral body so that it may organize the sole and exclusive electoral process.
III. No candidate or any other person shall make an electoral campaign in favor of the candidacies, under penalty of their being stricken. The Electoral Organ is the only entity responsible for publicizing the merits of the candidates.
IV. The magistrates may not belong to political organizations.
V. The candidates that obtain a simple majority of the votes shall be elected. The President of the State shall administer the oath of office.
VI. In order to become a Magistrate of the Supreme Court of Justice one must meet the following requirements: satisfy the general requisites established for public servants; be thirty years of age; have a law degree; have honestly and ethically performed judicial functions, practiced as a lawyer or have been a university professor for eight years; and not have been sanctioned with dismissal by the Council of Magistrates. The determination of merit shall take into account performance as a native authority under its system of justice.
VII. The system of prohibitions and incompatibilities applied to Magistrates of the Supreme Court of Justice shall be the same as that applied to public servants.

- Eligibility for supreme court judges
- Age restrictions on supreme court judges
- Eligibility for supreme court judges

Article 183

I. The Magistrates may not be re-elected. The period of their mandate shall be six years.
II. The Magistrates of the Supreme Court of Justice shall cease in their functions upon completion of their mandate, imposition of a final sentence arising from a trial of responsibilities, resignation, death and other causes set forth in the law.

- Supreme court term length
- Supreme court term limits
- Constitutional court term limits
- Supreme/ordinary court judge removal
- Constitutional court term length
- Constitutional court removal

Article 184

- Supreme court powers

The following are the attributes of the Supreme Court of Justice, in addition to those provided by law:

1. To act as the court of cassation and hear appeals of nullity in cases expressly provided for by law.

2. To resolve conflicts of competencies arising among the departmental courts of justice.

- Extradition procedure
- Head of state immunity
- Ordinary court selection
- Initiation of general legislation

3. To hear, resolve and request, as the sole instance, the processes of extradition.

4. To try, in plenary as a collegial court and as the sole instance, the President of the State, or the Vice President of the State, for crimes committed in the performance of their mandate. The trial shall be undertaken upon prior authorization of the Pluri-National Legislative Assembly, by a vote of at least two-thirds of the members present, and a request supported by the Prosecutor or the Attorney General of the State who shall formulate the accusation if he believes that the investigation provides the basis for trial. The process shall be oral, public, continuous and uninterrupted. The law shall determine the procedure.

5. To designate the voting judges of the departmental courts of justice, from the lists presented by the Council of Magistrates.

6. To prepare proposed judicial laws and present them to the Pluri-National Legislative Assembly.

7. To hear and resolve cases of extraordinary review of sentences.

Article 185

The judicial functions of the Supreme Court of Justice shall be exercised in an exclusive manner.

CHAPTER III. Agro-Environmental Jurisdiction

Article 186

The Agro-Environmental Court (Tribunal Agroambiental) is the highest court specialized in agro-environmental jurisdiction. It is governed specifically by the principles of social benefit, comprehensiveness, immediacy, sustainability and being inter-cultural.

Article 187

To be elected Magistrate of the Agro-Environmental Court, one must meet the same requirements as those for members of the Supreme Court of Justice, in addition to the following: have expertise in these matters and have performed well, ethically and honestly as an agrarian judge; have practiced law or have been a university professor in the subject matter for a period of eight years. In the pre-selection of candidates, pluralistic composition shall be guaranteed by considering the criteria of pluri-nationality.

Article 188

I. The Magistrates of the Agro-Environmental Court shall be elected by universal suffrage, pursuant to the procedures, mechanisms and formalities for the members of the Supreme Court of Justice.
II. The system of prohibitions and incompatibilities applicable to the Magistrates of the Agro-Environmental Court shall be those that are applied to public servants.
III. The term of the performance, permanence and cessation of the position that is established for Magistrates of the Supreme Court of Justice (Tribunal Supremo de Justicia) shall be applied to the members of the Agro-Environmental Court.

Article 189

The following are the attributes of the Agro-Environmental Court, in addition to those set forth in the law:

1. To resolve appeals of cassation and nullity in actions involving agrarian real estate, forestry, environmental, water, rights of use and enjoyment of natural renewable, hydraulic, and forest resources, and biodiversity; and to resolve complaints involving practices that endanger the ecological system and the conservation of species or animals.

2. To hear and resolve, as the sole instance, the complaints of nullity and cancellation of titles.

3. To hear and resolve, as the sole instance, the cases brought against the State resulting from contracts, negotiations, authorizations, licenses, distribution and redistribution of rights of exploitation of natural renewable resources, and other acts and administrative resolutions.

4. To organize the agro-environmental courts.

CHAPTER IV. Rural Native Indigenous Jurisdiction

- Right to culture
- Indigenous right to self governance

Article 190

I. The nations and native indigenous rural peoples shall exercise their jurisdictional functions and competency through their authorities, and shall apply their own principles, cultural values, norms and procedures.
II. The rural native indigenous jurisdiction respects the right to life, the right to defense and other rights and guarantees established in this Constitution.

- Right to culture
- Indigenous right to self governance

Article 191

I. The rural native indigenous jurisdiction is based on the specific connection between the persons who are members of the respective nation or rural native indigenous people.
II. The rural native indigenous jurisdiction is exercised in the following areas of personal, material and territorial legal effect:
    1. Members of the nation or rural native indigenous people are subject to this jurisdiction whether they act as plaintiffs or defendants, claimants or accusers, whether they are persons who are denounced or accused, or are appellants or respondents.
    2. This jurisdiction hears rural native indigenous matters pursuant to that established in a law of Jurisdictional Demarcation.
    3. This jurisdiction applies to the relations and juridical acts that are carried out, or the effects of which are produced, within the jurisdiction of a rural native indigenous people.

- Right to culture
- Indigenous right to self governance

Article 192

I. Each public authority or person shall obey the decisions of the rural native indigenous jurisdiction.
II. To secure compliance with the decisions of the rural native indigenous jurisdiction, its authorities may request the support of the competent bodies of the State.
III. The State shall promote and strengthen rural native indigenous justice. The law of Jurisdictional Demarcation shall determine the mechanisms of coordination and cooperation between rural native indigenous jurisdiction and ordinary jurisdiction and agro-environmental jurisdiction and all the recognized constitutional jurisdictions.

CHAPTER V. Council of Ministers of Justice

- Establishment of judicial council

Article 193

I. The Council of Ministers of Justice is the instance responsible for the following: the disciplinary regime for the ordinary, agro-environmental and the specialized jurisdictions; the monitoring and supervision of their administrative and financial management; and the formulation of procedural policies. The Council of Ministers of Justice shall be governed by the principle of citizen participation.
II. Its formation, structure and functions are determined by the law.

Article 194

- Establishment of judicial council

I. The members of the Council of Ministers of Justice shall be elected by universal vote from among the candidates proposed by the Pluri-National Legislative Assembly. The Pluri-National Electoral Organ shall be in charge of the organization and implementation of the electoral process.
II. In addition to the general conditions necessary to enter public service, the members of the Council of Ministers of Justice shall be thirty years old, possess knowledge of the material under their jurisdiction, and have performed their duties ethically and honestly.
III. The members of the Council of Ministers of Justice shall remain in their posts for six years and may not be re-elected.

- Establishment of judicial council

Article 195

The powers of the Council of Ministers of Justice, in addition to those established in the Constitution and the laws, are the following:

- Constitutional court removal
- Supreme/ordinary court judge removal

1. To initiate the revocation of the mandate of Judges of the Supreme Court of Justice and of the Agro-environmental Court, when they commit serious omissions in the exercise of their duties as determined by law.

- Supreme/ordinary court judge removal

2. To exercise disciplinary control over the voting judges and the auxiliary administrative personnel of the Judicial Organ. The exercise of this authority shall include the possibility of removal from their post for serious disciplinary infractions, which are expressly established by law.

3. To monitor and oversee the economic financial administration and assets of the Judicial Organ.

4. To evaluate the performance of the administrators and the administrators of justice and auxiliary personnel.

5. To draft judicial audits and the audits of financial management.

6. To undertake technical and statistical studies.

- Ordinary court selection

7. To make the pre-selection of candidates for the formation of courts of justice of the departments who will be designated by the Supreme Court of Justice.

- Civil service recruitment

8. To designate the trial judges and judges of instruction, through a process of competitive evaluation of merit and examination of competency.

9. To designate its administrative personnel.

CHAPTER VI. Pluri-National Constitutional Court

- Constitutional interpretation
- Establishment of constitutional court

Article 196

I. The Pluri-National Constitutional Court (Tribunal Constitucional Plurinacional) assures the supremacy of the Constitution, exercises constitutional control, and safeguards respect for and enforcement of constitutional rights and guarantees.
II. As criteria to be applied in its interpretive role, the Pluri-National Constitutional Court shall give preference to the intent of the constituent assembly as demonstrated in its documents, acts and resolutions, as well as the literal tenor of the text.

- Eligibility for const court judges

Article 197

- Indigenous right to representation
- Right to culture

I. The Pluri-National Constitutional Court shall consist of Judges elected on the basis of pluri-nationality, with representation from the ordinary system and the rural native indigenous system.
II. The substitute Judges of the Pluri-National Constitutional Court shall not receive remuneration, and shall assume functions only in the case of the absence of the

II. titled Judge or for other reasons established by law.
III. The composition, organization and functions of the Pluri-National Constitutional Court shall be regulated by law.

- Constitutional court selection

Article 198

The Judges of the Pluri-National Constitutional Court shall be elected by universal suffrage, pursuant to the procedure, mechanism and formalities used for the election of the members of the Supreme Court of Judges.

Article 199

- Age restrictions on constitutional court judges
- Eligibility for const court judges

I. To become a Judge of the Pluri-National Constitutional Court, in addition to the general requisites to become a public servant, one must be thirty five years of age and have specialized or credited experience of at least eight years in the disciplines of Constitutional law, Administrative law or Human Rights law. For purposes of determining merit, experience as a native authority under its system of justice shall be taken into account.

- Constitutional court selection
- Right to culture

II. The candidates for the Pluri-National Constitutional Court shall be proposed by organizations of civil society and the nations and rural native indigenous peoples.

- Constitutional court removal
- Constitutional court term length
- Constitutional court term limits

Article 200

The time of service, permanence and removal from office established for the Judges of the Supreme Court of Justice shall be applied to the members of the Pluri-National Constitutional Court.

Article 201

The Judges of that Pluri-National Constitutional Court shall be governed by the same system of prohibitions and incompatibilities as applied to public servants.

- Constitutional court powers

Article 202

In addition to those established by law, the powers of the Pluri-National Constitutional Court, are to hear and resolve the following:

- Constitutionality of legislation
- Federal review of subnational legislation

1. As the court of jurisdiction in the matters of pure law concerning the unconstitutionality of laws, Autonomous Statutes, Constitutional Charters, decrees and every type of ordinance and non-judicial resolution. If the case is of abstract character, only the President of the Republic, Senators, Deputies, Legislators and the maximum authorities of the autonomous territorial entities may present it to the court.

2. The conflicts of jurisdiction and powers among the organs of popular power.

3. The conflicts of jurisdiction between the Pluri-National government and the autonomous and decentralized territorial entities, and between the latter.

4. The appeals of fees, taxes, rates, licenses, rights or contributions that are created, modified or suppressed in violation of that set forth in the Constitution.

5. The appeals of resolutions of the Legislative Organ, when its resolutions affect one or more rights, regardless of who might be affected.

6. The review of the actions of Liberty, Constitutional Protection, Protection of Privacy, Popular actions and those for Compliance. This review shall not impede the immediate and obligatory application of the resolution that decided the action.

- Constitutionality of legislation

7. The legal consultations of the President of the Republic, of the Pluri-National Legislative Assembly, the Supreme Court of Justice or the Agro-Environmental Court on the constitutionality of proposed bills. It is obligatory to comply with the decision of the Constitutional Court.

8. The legal consultations of the rural native indigenous authorities on the application of their juridical norms as applied in a concrete case. Compliance with the decision of the Constitutional Court is obligatory.

- Legal status of treaties
- Treaty ratification
- International law

9. The review of the constitutionality of international treaties prior to their ratification.
10. The constitutionality of the procedure of partial reform of the Constitution.
11. The conflicts of authority between the rural native indigenous jurisdiction and ordinary and agro-environmental jurisdiction.
12. The direct appeals of nullity.

Article 203

The decisions and sentences of the Pluri-National Constitutional Court are binding and of obligatory compliance, and no subsequent ordinary appeal of them is allowed.

Article 204

The law shall determine the procedures that govern the processes brought before the Pluri-National Constitutional Court.

TITLE IV. ELECTORAL ORGAN

CHAPTER I. Pluri-National Electoral Organ

Article 205

I. The Pluri-National Electoral Organ (Organo Electoral) shall be composed of:
   1. The Supreme Electoral Court.
   2. The Departmental Electoral Courts.
   3. The Electoral Judges.
   4. The Juries of the polling places.
   5. The Electoral Notaries.

II. The jurisdiction, competency and powers of the Electoral Organ and its different levels are defined in this Constitution and the law.

Article 206

I. The Supreme Electoral Court is the highest level of the Electoral Organ, and has national jurisdiction.

- Electoral court term length
- Right to culture
- Indigenous right to representation
- Electoral court term limits
- Electoral court selection

II. The Supreme Electoral Court is composed of seven members, who shall remain in office for six years without the possibility of re-election, and at least two of them shall be of rural native indigenous origin.

III. The Pluri-National Legislative Assembly shall elect six of the members of the Pluri-National Electoral Organ, by two-thirds of the votes of the members present. The President of the State shall designate one of its members.

- Civil service recruitment
- Electoral court selection

IV. The election of the members of the Pluri-National Electoral Organ requires the prior public announcement, and the determination of the capacity and merits by public selection process.

V. The Departmental Legislative Assemblies or the Departmental Councils shall select, by two thirds votes of their members present, a list of candidates for each one of the voting members of the Departmental Electoral Courts. The Chamber of Deputies (Camara de Diputados) shall, by two third votes of the members present, elect from the lists the members of the Departmental Electoral Courts, guaranteeing that at least one of its members belong to the nations and rural native indigenous peoples of the Department.

- Eligibility for electoral court judges
- Age restrictions on electoral court judges

Article 207

To be designated a Voting member of the Supreme Electoral Court and the Departmental Electoral Court, once must satisfy the general requirements for being a public servant, to be thirty years of age at the time of his or her designation and to have academic education.

- Electoral court powers

Article 208

I. The Supreme Electoral Court is responsible for organizing, administering and carrying out the electoral processes, and for proclaiming the results.
II. The Court shall guarantee that the voting is carried out effectively, pursuant to that set forth in Article 26 of this Constitution.
III. It is the function of the Supreme Electoral Court to organize and administer the Civil Registry and the Electoral Roll.

CHAPTER II. Political Representation

- Right to culture

Article 209

The candidates for public elected posts, with the exception of the elected positions of the Judicial Organ and the Pluri-National Constitutional Court (Tribunal Constitucional Plurinacional), shall be proposed by the organizations of the nations and rural native indigenous peoples, citizen associations and political parties, in equal conditions and pursuant to the law.

Article 210

- Right to culture
- Restrictions on political parties

- Restrictions on political parties

- Indigenous right to vote
- Right to culture

I. The organization and functioning of the organizations of the nations, rural native indigenous peoples, and citizen associations and political parties must be democratic.
II. The internal election of the leaders and the candidates of the citizen associations, and of the political parties, shall be regulated and supervised by the Pluri-National Electoral Organ, which shall guarantee the equal participation of men and women.
III. The nations and rural native indigenous peoples may elect their candidates according to their own democratic communitarian norms.

- Indigenous right to representation
- Right to culture
- Indigenous right to self governance
- Indigenous right to vote

Article 211

I. The nations and rural native indigenous peoples may elect their political representatives whenever required, in accordance with their own forms of election.
II. The Electoral Organ shall assure that the norms of those peoples and nations will be complied with strictly in the elections of authorities, representatives and candidates of the nations and rural native indigenous peoples, using their own norms and procedures.

Article 212

No candidate may be proposed for more than one elective post or for more than one electoral district at the same time.

TITLE V. FUNCTIONS OF CONTROL, DEFENSE OF SOCIETY AND DEFENSE OF THE STATE

CHAPTER I. Function of Control

Sole Section. General Comptroller

Article 213

I. The General Comptroller of the State (Contraloria General) is the technical institution that monitors the administration of the public entities and those in which the State has economic participation or interest. The Comptroller is authorized to determine signs of administrative, executive, civil and criminal responsibility; it is functionally, financially, administratively and organizationally autonomous.
II. Its organization, function and attributes must be based on principals of legality, transparency, efficacy, efficiency, economy, equity, opportunity and objectivity, and are determined by the law.

- Civil service recruitment

Article 214

The Comptroller or Comptroller General of the State shall be designated by two third votes of the members present of the Pluri-National Legislative Assembly. The election shall require prior public notice, and determination of the professional capacity and merits through a public process.

Article 215

To be designated as Comptroller or Comptroller General of the State, one must fulfill the general requisites for public service; be at least thirty years old at the time of designation; have obtained a professional degree in an area related to the post and have practiced as a professional for a minimum of eight years; to have shown personal and ethical integrity, determined by public observation.

Article 216

The Comptroller or Comptroller General of the State shall carry out his or her functions for a period of six years, without the possibility of being reappointed.

Article 217

I. The Comptroller General of the State shall be responsible for the supervision and later external monitoring of public entities and those in which the State has economic participation or interest. The supervision and monitoring also shall be carried out over the administration, management and disposition of the strategic assets and services of collective importance.
II. The Office of Comptroller General of the State shall present each year a report on its supervision of the public sector to the Pluri-National Legislative Assembly.

CHAPTER II. Function of Defense of Society

- Ombudsman

Section I. Public Defender

Article 218

I. The Public Defender (Defensor del Pueblo) shall oversee the enforcement, promotion, dissemination of and compliance with human rights, both individual and collective, that are established in the Constitution, laws and international instruments. The function of the Public Defender shall extend to the administrative activity of the entire public sector and the activity of private institutions that provide public services.
II. The Public Defender shall also promote the defense of the rights of the nations and rural native indigenous peoples, of urban and intercultural communities, and of Bolivians who are abroad.
III. The Public Defender is an institution with operational, financial and administrative autonomy, in accordance with the law. Its functions shall be governed by the principles of free services, accessibility, swiftness and solidarity. In the exercise of its functions it does not receive instructions from the organs of the State.

Article 219

I. The Office of the Public Defender shall be directed by the Public Defender, who shall performs his or her functions for a period of six years, without possibility of a new designation.
II. The Public Defender shall not be subjected to prosecution, detention, accusation or trial for acts carried out in the exercise of his or her authority.

- Civil service recruitment

Article 220

The Public Defender shall be designated by at least two-thirds of the members present of the Pluri-National Legislative Assembly. The designation shall require a prior public announcement and determination of professional capacity and merit through a public competition among persons recognized for their career in defense of human rights.

Article 221

To be designated as Public Defender one must satisfy the general conditions to be a public servant, be thirty years old at the time of designation and have proven personal and ethical integrity determined by public observation.

Article 222

The powers of the Office of the Public Defender, in addition to those established in the Constitution and the law, are the following:

- Constitutionality of legislation

1. To file actions of Unconstitutionality, of Liberty, of Constitutional Protection, of Protection of Privacy, Popular actions, actions for Compliance and the direct appeal of nullity, without the requirement of having a mandate.

- Initiation of general legislation

2. To present bills and modifications of laws, decrees and non-judicial resolutions in matters of its competence.

3. To investigate, on its own or at the request of a party, the acts or omissions that imply violations of rights, individual and collective, that are established in the Constitution, laws and international instruments, and request that the Public Ministry initiate the corresponding legal actions.

4. To request information from the authorities and public servants with respect to the investigations that the Public Defender is carrying out, to which no objection may be posed.

5. To formulate recommendations, reminders of legal duties, and suggestions for the immediate adoption of corrective measures for all the organs and institutions of the State, and to issue public censure for acts or behavior contrary to these formulations.

6. To have free access to the center of detention and prisons, to which no one may pose an objection.

7. To exercise its functions without interruption of any kind, even in the case of a declaration of a state of emergency.

8. To attend to the persons who request its services promptly and without discrimination.

9. To draft the regulations needed for the exercise of its functions.

Article 223

Each year, the Public Defender shall report to the Pluri-National Legislative Assembly and to the Office of Social Control concerning the situation of human rights in the country and on the management of its administration. The Public Defender may be

called on at any moment by the Pluri-National Legislative Assembly or the Social Control to provide a report with respect to the exercise of its authority.

Article 224

Each year, the Ombudswoman or Ombudsman shall report to the Pluri-National Legislative Assembly and to the Institution of Social Control on the situation of human rights in the country and the management of its administration. The Ombudswoman or Ombudsman may be summoned at any moment by the Pluri-National Legislative Assembly or by the Institution of Social Control, in order to provide a report on the exercise of its functions.

- Attorney general

Section II. The Public Ministry

Article 225

I. The Public Ministry shall defend the law and the general interests of society, and it shall bring public criminal actions. The Public Ministry has operational, administrative and financial autonomy.
II. The Public Ministry shall exercise its functions pursuant to the principles of legality, timeliness, objectivity, responsibility, autonomy, unity and hierarchy.

Article 226

I. The Prosecutor or General Prosecutor of the State is the highest authority hierarchically of the Public Ministry and represents the institution.
II. The Public Ministry shall have departmental prosecutors, prosecutors of specific matters and the other prosecutors established by the law.

- Civil service recruitment

Article 227

I. The Prosecutor or the General Prosecutor of the State is designated by two-thirds vote of the members present of the Pluri-National Legislative Assembly. The designation shall require prior public announcement, and qualification of professional capacity and merits through a competitive public process.
II. The Prosecutor or the General Prosecutor of the State shall satisfy the general requisites for public servants, as well as the specific requisites established by the Council of Judges of the Supreme Court of Justice.

Article 228

The Prosecutor or the General Prosecutor of the State shall exercise his or her functions for six years, with no possibility of being designated again.

- Attorney general

CHAPTER III. Function of the Defense of the State

Sole Section. Office of the Attorney General of the State

Article 229

The Office of the Attorney General of the State is the institution of public juridical representation, which has the power to promote, defend and safeguard the interests of the State. Its organization and structure shall be determined by law.

Article 230

I. The Office of the Attorney General of the State is composed of the Attorney General, who shall direct it, and other public servants as determined by the law.
II. The designation of the Attorney General of the State corresponds to the President of the State. The person designated must satisfy the requisites required for the Judges of the Supreme Court of Justice.
III. The appointment may be vetoed by decision of at least two thirds of the members present of the Pluri-National Legislative Assembly within a period not

III. exceeding sixty calendar days from the appointment. The veto shall have the effect of terminating the functions of the appointed person.

Article 231

The powers of the Office of the Attorney General of the State, in addition to those determined by the Constitution and the laws, are the following:

1. To defend judicially and extra-judicially the interests of the State, assuming its legal representation and intervening as the government representative with full rights in all judicial and administrative actions, within the framework of the Constitution and the law.

2. To present ordinary appeals and actions in defense of the interests of the State.

3. To evaluate and oversee the carrying out of legal proceedings by the legal units of the Public Administration in the processes that are brought before the jurisdictional or administrative authorities. In the case of negligent action, it should urge the initiation of the appropriate actions.

4. To request the information considered necessary from public servants and individual persons for purposes of exercising its authority. This information may not be denied for any reason or cause; the law shall establish the corresponding penalties.

5. To request of the maximum executive authority of public entities the trial of public servants who, for negligence or corruption, cause damage to the patrimony of the State.

6. To attend to the complaints and claims made by citizens and entities which make up Social Control in the cases that adversely affect the interests of the State.

7. To request that the Prosecutor General of the State undertake the judicial actions that should be brought for crimes committed against public patrimony of which it has knowledge.

8. To present bills on matters related to its competence.

- Initiation of general legislation

CHAPTER IV. Public Servants

Article 232

The Public Administration is governed by the principles of legitimacy, legality, publicity, social commitment and interest, ethics, transparency, equality, competence, efficiency, quality, friendliness, honesty, responsibility and results.

Article 233

Public Servants are persons who perform public functions. Public servants form part of the administrative personnel, except for those who are in elected posts, those who are designated, and those who are appointed to perform duties.

- Eligibility for supreme court judges
- Attorney general
- Eligibility for cabinet
- Eligibility for electoral court judges
- Eligibility for const court judges
- Eligibility for head of state
- Eligibility for second chamber
- Eligibility for first chamber

Article 234

To perform public functions, one must satisfy the following requisites:

1. Have Bolivian nationality.

2. Be of adult age.

3. Have completed military duty.

4. Have no criminal charges against him or her, nor final sentences in criminal matters that are pending completion.

5. Not be included in the cases of prohibitions and incompatibilities established in the Constitution.

6. Be inscribed in the voting rolls.

7. Speak at least two of the official languages of the country.

Article 235

The following are the obligations of public servants:

- Duty to obey the constitution

1. To comply with the Constitution and the laws.

2. To fulfill his or her responsibilities, in accordance with the principles of public administration.

- Earnings disclosure requirement

3. To provide a sworn declaration of assets and income, before, during and after performing in the post.

4. To provide reports on the economic, political, technical and administrative responsibilities carried out in the public administration.

5. To respect and protect the assets of the State, and abstain from using them for electoral purposes or any other purpose outside of the public function.

Article 236

The prohibitions in carrying out the public function are as follows:

I. To perform simultaneously more than one full-time remunerated public job.

II. To act when his or her interests conflict with those of the entity he or she serves, and to enter into contracts or carry out business with the Public Administration, directly, indirectly or on behalf of a third party.

III. To name to public administration persons with whom he or she has a blood relation in the 4th degree and second of affinity.

Article 237

I. The obligations for the exercise of the public administration:
   1. Inventory and care for the documents belonging to the public administration in public offices, with the prohibition of taking them out or destroying them. The law shall regulate the management of archives and the conditions under which public documents may be destroyed.
   2. Maintain the confidentiality of classified information, which may not be divulged even after they have left their duties. The procedure for characterizing classified information shall be set forth in the law.

II. The law shall determine the sanctions for violation of these obligations.

- Eligibility for supreme court judges
- Eligibility for head of state
- Eligibility for first chamber
- Eligibility for const court judges

Article 238

Persons who fall within the following grounds are ineligibility to hold elective public office:

1. Those that were or are directors of enterprises or corporations that have contracts or agreements with the State and who have not resigned at least three months before the day of the election.

2. Those who have been directors of foreign international enterprises that have contracts or agreements with the State and have not resigned at least five years prior to the date of the election.

3. Those who hold elected positions, or who hold positions by designation or appointment, who have not resigned from them at least three months prior to

3. the date of the election, with the exception of the President or Vice President.

- Restrictions on the armed forces

4. The members of the Armed Forces and the Bolivian Police in active service who have not resigned at least three months prior to the date of the election.

5. The ministers of any religious cult who have not resigned at least three months prior to the date of the election.

- Outside professions of legislators

Article 239

The following are not compatible with the performance of public functions:

1. The acquisition or leasing of public assets on behalf of the public servant or third persons.

2. The signing of administrative contracts with or obtaining any other kind of personal benefit from the State.

3. Professional service as employees, representatives, advisors, managers of entities, companies or enterprises that have a contractual relationship with the State.

- Removal of individual legislators
- Head of state removal

Article 240

I. The mandate of anyone who occupies an elected position, with the exception of those of the Judicial Organ, may be revoked, in accordance with the law.
II. The revocation of a mandate can be requested when at least half the term of the mandate has been completed. The revocation of a mandate cannot take place during the last year of the term in office.
III. The revocation referendum shall commence by citizen initiative, at the request of at least fifteen percent of the voters of the electoral roll of the district that elected the public servant.
IV. The revocation of a mandate of a public servant shall be carried out pursuant to the law.
V. The revocation of a mandate shall result in the immediate cessation of service in the post, providing for his or her substitution according to the law.
VI. The revocation shall take place only once during the constitutional mandate of the person elected.

- Referenda

TITLE VI. PARTICIPATION AND SOCIAL CONTROL

Article 241

I. The sovereign people shall participate, through the organized civil society, in the design of public policies.
II. Organized Civil Society shall exercise public monitoring of public management at all levels of the State, and of businesses, public enterprises, and private ventures that administer public fiscal resources.
III. It will exercise public monitoring of the quality of public services.
IV. The law shall establish the general framework for the exercise of public monitoring.
V. Civil society shall organize itself to define the structure and composition of public participation and monitoring.
VI. The entities of the State shall create spaces of participation and public monitoring on the part of society.

Article 242

Participation and public monitoring implies the following activities, in addition to those established in the Constitution and the law:

1. To participate in the formulation of the policies of the State.

2. To support the Legislative Organ in the collective development of the laws.

3. To develop social oversight at all levels of the government and of the autonomous, self sufficient, decentralized and de-concentrated territorial entities.

4. To create transparent management of information and use of resources in all of the places of public management. The information requested for public monitoring may not be denied and shall be delivered in complete, truthful, adequate and timely form.

5. To formulate reports that support the petition for revocation of mandate, in accordance with the procedure established in the Constitution and the law.

6. To hear and comment on the reports of the activities of the organs and functions of the State.

7. To coordinate the planning and monitoring with the organs and functions of the State.

8. To file complaints with the corresponding institutions for investigation and processing in the cases considered appropriate.

9. To participate in the public scrutiny of candidates in appointment procedures who are subject to them.

10. To help the electoral organ publicize the nominations of candidates for the corresponding public posts.

TITLE VII. ARMED FORCES AND BOLIVIAN POLICE

CHAPTER I. Armed Forces

Article 243

The Armed Forces of the State are organically comprised of the Commander in Chief, the Army, the Air Force and the Navy of Bolivia, the forces of which shall be defined by the Pluri-National Legislative Assembly at the proposal of the Executive Organ.

Article 244

The fundamental mission of the Armed Forces is the following: the defense and preservation of the independence, security and stability of the State, and the honor and sovereignty of the country; to assure the supremacy of the Constitution; to guarantee the stability of the legitimately constituted Government; and to participate in the development of the country.

Article 245

The organization of the Armed Forces is based on its hierarchy and discipline. It is essentially subservient, is not a deliberative body, and is subject to the laws and military regulations. As an institutional organ, it does not carry out any political activity; individually, its members enjoy and exercise the rights of citizens under the conditions established by the law.

- Designation of commander in chief

Article 246

I. The Armed Forces are subordinate to the President of the State and receive their orders administratively through the Minister of Defense as an intermediary, and with respect to technical aspects, from the Commander in Chief.
II. In the event of war, the Commander in Chief of the Armed Forces shall direct the operations.

Article 247

- Restrictions on minister of defense

I. No foreigner may exercise command, nor be employed or occupy an administrative post in the Armed Forces without the prior authorization of the Captain General.
II. To occupy their positions, the Commander in Chief of the Armed Forces, the Chief of Staff, the Commanders and Chiefs of Staff of the Army, the Air Force, and the Navy of Bolivia, and of the large units, must be Bolivian by birth and meet the requisites set forth in the law. The same requisites are necessary for the Vice Minister of the Ministry of Defense.

Article 248

The Supreme Council of Defense of the Pluri-National State, the composition, organization and faculties of which are to be determined by law, shall be presided over by the Captain General of the Armed Forces.

- Duty to serve in the military

Article 249

Every Bolivian shall be obligated to render military service in accordance with the law.

Article 250

The promotions in the Armed Forces shall be granted in accordance with the respective law.

CHAPTER II. Bolivian Police

Article 251

I. The Bolivian Police, as a public force, has the specific mission to defend the society and conserve public order, and to assure compliance with the law in the entire territory of Bolivia. It shall carry out the police function in a comprehensive, indivisible manner and under a single command, pursuant to the Organic Law of the Bolivian Police and the other laws of the State.
II. As an institution, it does not deliberate nor participate in party political activities, but individually its members enjoy and exercise their rights as citizens, in accordance with the law.

Article 252

The Bolivian Police Force is subordinate to the President of the State, through the intermediary of the Minister of Government.

Article 253

To be designated Commander General of the Bolivian Police, it is necessary to be a Bolivian by birth, a General of the institution, and to meet the requisites set forth in the law.

Article 254

In the event of international war, the forces of the Bolivian Police shall be subordinated to the Commander in Chief of the Armed Forces for the time that the conflict lasts.

TITLE VIII. INTERNATIONAL RELATIONS, BORDERS, INTEGRATION AND MARITIME RESTORATION

CHAPTER I. International Relations

- International law

Article 255

I. International relations and the negotiation, signing and ratification of international treaties serve the objectives of the state in terms of sovereignty and the interests of the people.
II. The negotiation, signing and ratification of international relations shall be guided by the principles of:
1. Independence and equality among states, the no intervention in internal matters and the peaceful resolution of conflicts.
2. Rejection and condemnation of all forms of dictatorship, colonialism, neocolonialism and imperialism.
3. Defense and promotion of human, economic, social, cultural and environmental rights, with repudiation of all forms of racism and discrimination.
4. Respect for the rights of native indigenous rural peoples.
5. Cooperation and solidarity among states and peoples.
6. Preservation of patrimony, capacity of State management and regulation.
7. Harmony with nature, defense of biodiversity, and prohibition of forms of private appropriation for exclusive use and exploitation of plants, animals, microorganisms and any living matter.
8. Food security and sovereignty for the entire population; the prohibition of importation, production and commercialization of genetically modified organisms and toxic elements that harm health and the environment.
9. Access of the entire population to basic services for their wellbeing and development.
10. Preservation of the right of the population to have access to all medications, primarily genetic medications.
11. Protection and preference for Bolivian production, and promotion of exports with added value.

- Protection of environment

- International law
- Legal status of treaties

Article 256

I. The international treaties and instruments in matters of human rights that have been signed and/or ratified, or those that have been joined by the State, which declare rights more favorable than those contained in the Constitution, shall have preferential application over those in this Constitution.
II. The rights recognized in the Constitution shall be interpreted in agreement with international human rights treaties when the latter provide more favorable norms.

Article 257

I. Ratified international treaties are part of domestic law with the force of law.
II. International treaties that involve any of the following matters shall require prior approval by binding popular referendum:
1. Questions of borders.
2. Monetary integration.
3. Structural economic integration.
4. Grant of institutional authority to international or supra-national organisms, in the context of processes of integration.

- Legal status of treaties
- Treaty ratification

- Treaty ratification

Article 258

The procedures for approval of international treaties shall be regulated by the law.

- Treaty ratification

Article 259

I. Any international treaty shall require approval by popular referendum when it is requested by five percent of the citizens registered on the voting rolls, or thirty five percent of the representatives of the Pluri-National Legislative Assembly.

- Referenda

I. These initiatives can be used also to request that the Executive Organ sign a treaty.
II. The announcement of the convocation of a referendum shall suspend, according to the time periods established by law, the process of ratification of the international treaty until the results are obtained.

- International law
- Treaty ratification

Article 260

- Customary international law

I. The repudiation of the international treaties shall follow the procedures established in the same international treaty, the general norms of international law, and the procedures established in the Constitution and the law for its ratification.
II. The repudiation of ratified treaties must be approved by the Pluri-National Legislative Assembly before being executed by the President of the State.
III. The treaties approved by referendum must be submitted to a new referendum prior to their repudiation by the President of State.

CHAPTER II. Borders of the State

Article 261

The territorial integrity, preservation and the development of the border zones are a duty of the State.

Article 262

- Restrictions on rights of groups

I. The fifty kilometers from the borderline constitute the border zone security. No foreign person, individual or company, may acquire property in this space, directly or indirectly, nor possess any property right in the waters, soil or subsoil, except in the case of state necessity declared by express law approved by two-thirds of the Pluri-National Legislative Assembly. The property or the possession affected in the event of non compliance with this prohibition shall pass to the benefit of the State, without any indemnification.
II. The border zone security is subject to a special legal, economic, administrative and security regime, oriented to promote and prioritize its development and to the guarantee of the integrity of the State.

Article 263

The defense, security and control of border zone security are the fundamental duty of the Armed Forces. The Armed Forces shall participate in the policies of comprehensive and sustainable development of these zones, and shall guarantee their physical presence in them.

Article 264

I. The State shall establish a permanent policy of harmonic, comprehensive, sustainable and strategic development of the frontiers, for the purpose of improving the living conditions of its population, and especially the nations and rural native indigenous peoples living on the border.
II. It is the duty of the State to execute policies of preservation and control of the natural resources in the border areas.
III. The regulation of the border system shall be established by law.

CHAPTER III. Integration

- Regional group(s)
- International organizations

Article 265

I. The State shall promote the relations of social, political, cultural and economic integration with other states, nations and peoples of the world and, in particular, Latin American integration, based on the principles of a just, equitable relationship with recognition of asymmetry.

II. The state shall strengthen the integration of its nations and rural native indigenous peoples with the indigenous peoples of the world.

- International organizations

Article 266

The representatives of Bolivia to the supra-state parliamentary bodies emerging from the integration processes shall be elected by universal vote.

CHAPTER IV. Maritime Restoration

- Accession of territory
- Colonies

Article 267

I. The Bolivian government declares its inalienable and indefeasible right to the territory that gives access to the Pacific Ocean and sea space.
II. The effective solution to the maritime dispute through peaceful means and the full exercise of sovereignty over that territory is a permanent and inalienable objective of the Bolivian State.

Article 268

The development of maritime interests, rivers and lakes, and shipping will be the priority of the State and its administration and protection shall be exercised by the Bolivian Navy, according to the law.

PART III. STRUCTURE AND ORGANIZATION OF THE STATE TERRITORIES

TITLE I. TERRITORIAL ORGANIZATION OF THE STATE

CHAPTER I. General Matters

Article 269

- Subsidiary unit government

I. Bolivia is organized territorially into departments, provinces, municipalities and rural native indigenous territories.
II. The creation, modification and definition of the territorial units shall be made by the democratic will of their inhabitants, in accordance with the conditions established in the Constitution and law.

- Subsidiary unit government

III. The regions shall form part of the territorial organization, under the terms and conditions determined by law.

Article 270

The principles that govern territorial organization and the decentralized and autonomous territorial entities are: unity, voluntariness, solidarity, equity, the common good, self government, equality, complementariness, reciprocity, gender equity, subsidiarity, gradualness, coordination and institutional faithfulness, transparency, public participation and control, provision of economic resources and the pre-existence of the nations and rural native indigenous peoples, under the terms established in this Constitution.

- Subsidiary unit government

Article 271

- Municipal government

I. The Framework Law of Autonomies and Decentralization shall regulate the procedures for the following: drafting the autonomous Statutes and the Organic Charters, the transference and delegation of authority, the financial economic system, and the coordination between the central level and the decentralized and autonomous territorial entities.

- Supermajority required for legislation

II. The Framework Law of Autonomies and Decentralization shall be approved by two-thirds of the votes of the members of the Pluri-National Legislative Assembly who are present.

- Subsidiary unit government
- Municipal government

Article 272

Autonomy implies the direct election of the authorities by the citizens, the administration of its economic resources, and the exercise of legislative, regulatory, fiscal and executive authority by the organs of the autonomous government in the area of its jurisdiction, competence and authority.

Article 273

The law shall regulate the formation of the communities among municipalities, regions and rural native indigenous territories for the purpose of achieving their objectives.

- Subsidiary unit government

Article 274

In the decentralized departments, the election of the prefects and departmental councils shall be carried out by universal suffrage. These departments may become autonomous departments by referendum.

Article 275

Each deliberative organ of the territorial entities shall draft, in a participatory manner, the proposed Statute or Organic Charter, which must be approved by two-thirds of the total of its members. Upon prior constitutional review, it shall enter into force as the basic institutional norm of the territorial entity by means of referendum to approve it in its jurisdiction.

Article 276

The autonomous territorial entities shall not be subordinate to each other and shall have equal constitutional rank.

CHAPTER II. Departmental Autonomy

- Subsidiary unit government

Article 277

The autonomous departmental government is composed of a Departmental Assembly, which has deliberative, fiscal, and legislative departmental authority in the area of its competence, and of an executive organ.

- Subsidiary unit government

Article 278

- Right to culture
- Indigenous right to vote

I. The Departmental Assembly shall be composed of members elected by universal, direct, free, secret and obligatory vote; and by members elected by the nations and rural native indigenous peoples, in accordance with their own norms and procedures.

II. The law shall determine the general criteria for the election of members of the departmental assemblies, taking into account population, territorial, cultural identity and linguistic representation when there are rural native indigenous minorities, and parity and alternation of gender. The Statutes of Autonomy shall define its application in accordance with the specific reality and conditions of its jurisdiction.

- Subsidiary unit government

Article 279

The departmental executive organ is directed by the Governor as the highest executive authority.

CHAPTER III. Regional Autonomy

Article 280

I. The region is composed of various municipalities or provinces that have geographic continuity, which cross the borders of departments that share culture, language, history, economy and ecosystems in each department. The region shall constitute an area of planning and management. In exceptional cases, a region can be formed by a single province, which by itself has the characteristics that define a region. Metropolitan regions can be formed in the suburbs that are larger than 500,000 inhabitants.

II. The Framework Law of Autonomies and Decentralization shall establish the terms and procedures for the orderly and planned formation of the regions. Provincial authorities cannot be elected in the areas where regions are formed.

- Referenda

III. At the initiative of the municipalities belonging to it, the region may establish regional autonomy by way of referendum in its jurisdictions. Its powers must be conferred by two-thirds of the total votes of the members of the deliberative departmental organ.

- Subsidiary unit government

Article 281

The government of each autonomous region shall consist of a Regional Assembly with deliberative, normative-administrative and supervisory authority within the areas of its competence, and an executive organ.

Article 282

I. The members of the Regional Assembly shall be elected in each municipality, together with the lists of candidates for the municipal councils, in accordance with criterion of population and territory.

II. The region shall draft its Statute in a participatory manner, in accordance with the procedures established for autonomous regions.

CHAPTER IV. Municipal Autonomy

- Municipal government

Article 283

The autonomous municipal government shall consist of a Municipal Council with deliberative, supervisory and legislative municipal authority within the area of its competence; and an executive organ presided over by the Mayor.

- Municipal government

Article 284

I. The Municipal Council shall be composed of council members elected by universal suffrage.

- Right to culture

II. The nations or rural native indigenous peoples in the municipalities, which do not constitute a rural native indigenous autonomy, may elect their representatives to the Municipal Council directly, pursuant to their own norms and procedures and in accordance with the Organic Municipal Charter.

III. The law shall determine the general criterion for the election and determine the number of municipal council members. The Organic Municipal Charter shall define its application, according to the specific reality and conditions of its jurisdiction.

IV. The Municipal Council may draft the proposed Organic Charter, which shall be approved according to that set forth in this Constitution.

CHAPTER V. Executive Organs of the Autonomous Governments

- Subsidiary unit government

Article 285

I. To be a candidate for an elective position in the executive organs of autonomous governments, one must satisfy the general conditions for being a public servant,

- Municipal government

I. and:
   1. Have resided permanently in the corresponding department, region or municipality for at least the two years immediately prior to the election.
   2. In the case of the election of the Mayor and the regional authority, the person must be twenty one years of age.
   3. In the case of the election of the Prefect or Governor, the person must be twenty five years of age.

II. The period of the mandate of the highest executive authorities of the autonomous governments is five years, and he or she may be re-elected once for a continuous mandate.

- Subsidiary unit government

Article 286

I. The temporary substitution of the highest executive authority of an autonomous government shall correspond to the Council or Assembly, pursuant to the Statute of Autonomy or the Organic Charter as the case may be.

II. In the event of the resignation or death, permanent disability, or revocation of the mandate of the highest executive authority of the autonomous government, a new election shall be called, provided that half of the term of the mandate has not elapsed. If half the term has elapsed, the substitute shall be an authority already elected as defined pursuant to the Statute of Autonomy or the Organic Charter, as the case may be.

CHAPTER VI. Legislative, Deliberative and Supervisory Organs of Autonomous Governments

Article 287

I. The candidates for the councils and assemblies of the autonomous governments must satisfy the general conditions for being a public servant, and:
   1. Have resided permanently in the corresponding jurisdiction for at least two years immediately prior to the election.
   2. Be eighteen years of age on the day of the election.

II. The election of the Assemblies and Councils of the autonomous governments shall be carried out with lists that are separate from the election of the executives.

Article 288

The period of the mandate of the members of the Councils and Assemblies of the autonomous governments shall be five years, and they may be reelected once for a continuous mandate.

CHAPTER VII. Rural Native Indigenous Autonomy

- Right to culture
- Indigenous right to self governance

Article 289

Rural native indigenous autonomy consists in self-government as an exercise of free determination of the nations and rural native indigenous peoples, the population of which shares territory, culture, history, languages, and their own juridical, political, social and economic organization or institutions.

- Right to culture
- Indigenous right to self governance

Article 290

I. The formation of rural native indigenous autonomy is based on ancestral territories, currently inhabited by those peoples and nations, and pursuant to the will of their population as expressed through consultation, in accordance with the Constitution and the law.

II. The self-governance of the rural native indigenous autonomies is exercised according to their norms, institutions, authorities and procedures, in accordance with their authority and competences, and in harmony with the Constitution and the law.

Article 291

I. The rural native indigenous autonomies are rural native indigenous territories and the municipalities and regions that adopt that character, pursuant to that established in the Constitution and the law.
II. Two or more rural native indigenous peoples can form a single rural native indigenous autonomy.

- Indigenous right to self governance
- Right to culture

Article 292

Each rural, native, or indigenous autonomy shall draft its Statute according to its own norms and procedures, in conformity with the Constitution and the law.

Article 293

I. The indigenous autonomy, based on consolidated indigenous territories and those undergoing that process and once consolidated, shall be formed by the express will of the population through consultation, as the only necessary requisite, pursuant to their own norms and procedures.
II. If the establishment of an indigenous originary peasant autonomy affects the boundaries of municipal districts, the indigenous originary peasant nation or people and the municipal government must agree on a new district demarcation. If it affects municipal boundaries, a procedure for its approval shall be conducted by the Pluri-National Legislative Assembly, following the fulfillment of the special requirements and conditions provided for by statute.
III. Statute shall establish the minimum population requirements and other modalities for the constitution of an indigenous peasant farmer autonomy.
IV. To constitute an indigenous originary peasant autonomy extending to territories in one or more municipalities, statute shall determine the articulation, coordination and cooperation mechanisms for the exercise of its government.

- Right to culture

Article 294

I. The decision to form a rural native indigenous autonomy shall be adopted pursuant to the norms and procedures for consultations, according to the requisites and conditions established in the Constitution and the law.
II. The decision to convert a municipality into a rural native indigenous autonomy shall be adopted by referendum, pursuant to the requisites and conditions established by law.
III. A new municipality may be formed by the municipalities where there are rural communities with their own organizational structures, which draw them together and have geographic continuity, following the procedure for its approval before the Pluri-National Legislative Assembly, upon prior compliance with the requisites and conditions set forth in the Constitution and the law.

- Right to culture

Article 295

I. To form a rural native indigenous region that affects municipal boundaries, the procedure before the Pluri-National Legislative Assembly must be followed beforehand, fulfilling the particular requisites and conditions set forth in the Constitution and the law.
II. The aggregation of municipalities, municipal districts and/or rural native indigenous autonomies to form a rural native indigenous region, shall be decided by referendum and/or in accordance with their norms and procedures for consultation as the case may be, and pursuant to the requisites and conditions established by the Constitution and the law.

- Indigenous right to self governance
- Right to culture

Article 296

The government of the rural native indigenous autonomies is exercised through their own norms and forms of organization, with the name that corresponds to each town, nation or community, as established in their statutes and subject to the Constitution and the law.

CHAPTER VIII. Distribution of Authority

- Subsidiary unit government

Article 297

I. The authorities defined in this Constitution are as follows:
1. Prerogative: those that the legislation, regulation and execution of which cannot be transferred or delegated, and which are reserved to the central level of the State.
2. Exclusive: those which a level of government has legislative, regulatory and executive authority over a determined subject, the latter two of which may be delegated or transferred.
3. Concurrent: those in which the legislation corresponds to the central level of the State, and the other levels exercise simultaneous regulatory and executive authority.
4. Shared: those subject to basic legislation of the Pluri-National Legislative Assembly, the legislative development of which corresponds to the autonomous territorial entities, according to its character and nature. The regulation and execution shall correspond to the autonomous territorial entities.

II. Every authority which is not included in this Constitution shall be attributed to the central level of the State, which may transfer or delegate it by law.

Article 298

10. Systems of financial control and administration of assets and services.

IV. The resources necessary for carrying out their responsibilities shall be transferred automatically by the Pluri-National State in accordance with the law.

Article 305

Every assignment or transfer of authority must be accompanied by the determination of the source of economic and financial resources necessary for its exercise.

PART IV. ECONOMIC STRUCTURE AND ORGANIZATION OF THE STATE

TITLE I. ECONOMIC ORGANIZATION OF THE STATE

CHAPTER I. General Matters

Article 306

I. The Bolivian economic model is plural and seeks to improve the quality of life and the well being of all Bolivians.

II. The plural economy is composed of forms of community, state, private and public cooperative economic organization.

III. The plural economy articulates different forms of economic organization based on the principles of complementariness, reciprocity, solidarity, redistribution, equality, legal security, sustainability, equilibrium, justice and transparency.

IV. The forms of economic organization recognized in this Constitution may form joint ventures.

V. The State places the highest value on human beings and assures development through the equitable redistribution of economic surplus in the social policies of health, education, culture, and the re-investment in productive economic development.

Article 307

The State shall recognize, respect, protect and promote community economic development. This form of community economic organization includes productive and reproductive systems of public life, founded on the principles and visions of the nations and rural native indigenous peoples.

Article 308

I. The State recognizes, respects and protects private initiative that contributes to the economic and social development and the strengthening of economic independence of the country.
II. Free enterprise and full exercise of business activities, which shall be regulated by law, are guaranteed.

Article 309

The form of state economic organization includes the enterprises and other economic entities that are state property, which shall comply with the following objectives:

- Ownership of natural resources

1. To administer property rights over natural resources on behalf of the Bolivian people, and to exercise strategic control of the productive chain and industrialization of these resources.
2. To manage basic services of potable water and sewer systems directly or by means of public, community, cooperative or mixed enterprises.
3. To directly produce goods and services.
4. To promote economic democracy and achieve the food sovereignty of the population.
5. To guarantee public participation and control over its organization and management, as well as the participation of workers in decision making and in the profits.

Article 310

The State recognizes and protects the cooperatives as forms of solidarity and cooperation, which are not for profit. The organization of cooperatives shall be promoted primarily in production activities.

Article 311

- Economic plans
- Ownership of natural resources

I. All forms of economic organization established in this Constitution shall enjoy equality before the law.
II. The pluralistic economy includes the following aspects:
    1. The State shall exercise total direction of economic development and the processes of planning.
    2. The natural resources are the property of the Bolivian people and shall be managed by the State. Individual and collective property rights in land shall be respected and guaranteed. Agriculture, raising of livestock, as well as hunting and fishing not involving protected species, are activities that are governed by Part Four of this Constitution relating to the economic structure and organization of the State.
    3. The industrialization of natural resources to overcome dependence on the export of raw materials and to achieve an economy with a productive base, within the framework of sustainable development in harmony with nature.
    4. The State may intervene in every part of the chain of productivity in the strategic sectors, seeking to guarantee its supply in order to preserve the quality of life of all Bolivians.
    5. Respect for enterprise initiative and legal security.
    6. The State shall stimulate and promote the community area of the economy as a supportive alternative in rural and urban areas.

Article 312

I. Every economic activity must contribute to the strengthening of the economic sovereignty of the country. The private accumulation of economic power to the

I. degree that it might endanger the economic sovereignty of the State shall not be permitted.

- Mentions of social class

II. All forms of economic organization have the obligation to generate dignified work and to contribute to the reduction of inequalities and to the eradication of poverty.

- Protection of environment

III. All forms of economic organization have the obligation to protect the environment.

Article 313

To eliminate poverty and social and economic exclusion, and in order to achieve well being in its multiple dimensions, the economic organization of Bolivia has the following goals:

1. The generation of social wealth within the framework of respect for individual rights, as well as the rights of the peoples and nations.
2. The fair production, distribution and redistribution of wealth and economic surplus.
3. The reduction of inequality of access to productive resources.
4. The reduction of regional inequalities.
5. The productive development of the industrialization of natural resources.
6. The active participation of the public and community economies in the productive apparatus.

- Right to competitive marketplace

Article 314

Private monopolies and oligopolies are prohibited, as well as any other form of association or public or private legal agreement by Bolivian or foreign persons, who attempt to control and have exclusivity over production and commercialization of goods and services.

Article 315

I. The State recognizes the title to land of all legal persons that are legally constituted in the national territory, provided that it be used to fulfill the objective of the creation of an economic agent, the generation of employment, and the production and commercialization of goods and/or services.

II. The legal persons mentioned in the paragraph above that are formed after the adoption of the present Constitution shall have a corporate structure with the number of owners no less than the division of the total surface by five thousand hectares, rounding up the result to the immediately higher whole number.

CHAPTER II. Function of the State in the Economy

Article 316

The function of the State in the economy consists of the following:

- Economic plans

1. To conduct the process of economic and social planning, with the participation of, and in consultation with, the citizens. The law shall establish a system of comprehensive state planning, which shall incorporate all the territorial entities.
2. To direct the economy and to regulate the processes of production, distribution and commercialization of goods and services, according to the principles established in this Constitution.
3. To exercise the direction and control of the strategic sectors of the economy.
4. To directly participate in the economy by way of incentive and the production of economic and social goods and services in order to promote economic and social

4. equity, and to stimulate development, preventing oligopolistic control of the economy.

5. To promote the integration of different economic forms of production, with the objective of achieving economic and social development.

- Protection of environment

6. To promote primarily the industrialization of renewable and nonrenewable natural resources, within the framework of respect for and protection of the environment, in order to guarantee the generation of employment and the economic and social consumption of the population.

- Mentions of social class

7. To promote policies of equitable distribution of wealth and of the economic resources of the country, for the purpose of preventing inequality, social and economic exclusion, and to eradicate poverty in its multiple dimensions.

8. To establish state monopoly over productive and commercial activities that are considered indispensable in the event of pubic need.

9. To periodically formulate, with the participation of and in consultation with the citizenry, the general development plan, the execution of which is obligatory for every form of economic organization.

10. To administer economic resources for research, technical assistance and transfer of technology to promote productive activities and industrialization.

11. To regulate aeronautic activity in the air space of the country.

Article 317

The State shall guarantee the creation, organization and performance of a participatory planning entity that includes representatives of the public institutions and organized civil society.

CHAPTER III. Economic Policies

Article 318

I. The State shall determine the policy for industrial and commercial production that guarantees a sufficient supply of goods and services to adequately cover basic domestic needs and to strengthen export capacity.
II. The State recognizes and shall prioritize support for the organization of associative structures of micro, small and medium productive enterprises, both urban and rural.
III. The State shall strengthen the productive, manufacturing and industrial infrastructure and basic services for the productive sector.
IV. The State shall prioritize the promotion of rural productive development as fundamental to the development policies of the country.
V. The State shall promote and support the export of value added goods and of services.

Article 319

- Protection of environment

I. The industrialization of natural resources shall be a priority in the economic policies, within the framework of respect for and protection of the environment and of the rights of the rural native indigenous nations and peoples and their territories. The articulation of the exploitation of natural resources with internal productive apparatus shall be a priority in the economic policies of the State.
II. In setting the price for the commercialization of strategic natural and energy resources, the State shall consider taxes, royalties and the corresponding participations that must be paid to the public treasury.

Article 320

I. Bolivian investment shall take priority over foreign investment.

II. Every foreign investment shall submit to Bolivian jurisdiction, laws and authorities, and no one may cite an exceptional situation, nor appeal to diplomatic claims to obtain a more favorable treatment.
III. The economic relations with foreign states or enterprises shall be carried out under conditions of independence, mutual respect and equity. More favorable conditions may not be granted to foreign States or enterprises than those established for Bolivians.
IV. The State acts independently in all of its decisions on internal economic policy, and shall not accept demands or conditions imposed on this policy by states, banks or Bolivian or foreign financial institutions, multilateral entities or transnational enterprises.
V. The public policies shall promote internal consumption of products made in Bolivia.

Section I. Fiscal Policy

Article 321

I. The economic and financial administration of the State and all of the public entities is governed by its budget.
II. The determination of expenses and public investment shall be made by means of participatory mechanisms involving the citizenry, technical planning and the state executive. The allocations shall attend especially to education, health, nutrition, housing and productive development.

- Budget bills

III. The Executive Organ shall present to the Pluri-National Legislative Assembly, at least two months before the end of each fiscal year, the proposed law of the General Budget for the following term, which shall include all of the entities of the public sector.
IV. Every bill that implies expenses or investments for the State must establish the source of the funding, the way in which they will be covered, and the manner of their investment. If the bill was not presented by initiative of the Executive Organ, it requires prior consultation with it.
V. The Executive Organ, through the Ministry of the relevant branch, shall have direct access to the information concerning the expenses that are budgeted and spent in every public sector. This access shall include information on the expenses budgeted and spent by the Bolivian Armed Forces and Police.

Article 322

I. The Pluri-National Legislative Assembly shall authorize the contracting of public debt when the capacity to generate revenue to cover the capital and interest is demonstrated, and when the most advantageous conditions in the rates, payment schedules, amounts and other circumstances are technically justified.
II. Public debt may not include obligations that have not been authorized and expressly guaranteed by the Pluri-National Legislative Assembly.

Article 323

I. The fiscal policy is based on the principles of economic capacity, equality, progressiveness, proportionality, transparency, universality, control, administrative simplicity and ability to collect.

- Subsidiary unit government
- Municipal government

II. The taxes which belong to the national tax domain shall be approved by the Pluri-National Legislative Assembly. The taxes that belong to the exclusive domain of the departmental or municipal autonomies, shall be approved, modified or eliminated by their Councils or Assemblies at the request of the executive organs. The tax domain of the Decentralized Departments and regions shall be made up of departmental taxes, fees and special contributions, respectively.
III. The Pluri-National Legislative Assembly shall classify and define the taxes that by law belong to the national, departmental and municipal tax domains.
IV. The creation, suppression or modification of taxes under the dominion of the autonomous governments with taxing authority, shall be effected under the following limitations:
    1. No taxes may be created that impose taxes which are analogous to those corresponding to existing national taxes or other departmental or

IV. 1. municipal taxes, independently of the tax domain to which they belong.
2. No taxes may be created that encumber goods, economic activity or patrimony outside of their territorial jurisdiction, except revenues generated by their citizens or enterprises outside of the country. This prohibition extends to fees, certificates and special contributions.
3. No taxes may be created that impede the free circulation and establishment of persons, assets, activities or services within the territorial jurisdiction. This prohibition extends to fees, certificates and special contributions.
4. No taxes may be created that generate privileges for residents in a discriminatory manner. This prohibition extends to fees, certificates and special contributions.

Article 324

The debts for economic damages caused to the state never expire.

Article 325

Illicit economic activity, speculation, hoarding, money changing, usury, contraband, tax evasion and other related economic crimes shall be punished by the law.

Section II. Monetary Policy

- Central bank

Article 326

I. The State, through the Executive Organ, shall determine the goals of the monetary and exchange policies of the country in coordination with the Central Bank of Bolivia.
II. Public transactions in the country shall be carried out in the national currency.

- Central bank

Article 327

The Central Bank of Bolivia is an institution of public law, with its own legal personality and patrimony. Within the framework of the economic policy of the State, it is the function of the Central Bank of Bolivia to maintain stability of the internal purchasing power of the currency in order to contribute to the economic and social development.

- Central bank

Article 328

I. In addition to those set forth in the law, the powers of the Central Bank of Bolivia, in coordination with the economic policy determined by the Executive Organ, are as follows:
1. To determine and execute the monetary policy.
2. To execute the exchange policy.
3. To regulate the system of payments.
4. To authorize the issuance of currency.
5. To manage the international reserves.

- Central bank

Article 329

I. The Board of Directors of the Central Bank of Bolivia shall be composed of a President and five directors designated by the President of the State from lists of candidates presented by the Pluri-National Legislative Assembly for each one of the positions.
II. The members of the Board of Directors of the Central Bank of Bolivia shall have terms of five years, and are not eligible for re-election. They shall be considered public servants, pursuant to the Constitution and the law. The specific requisites for the position shall be determined by law.
III. The members of the Board of Directors of the Central Bank of Bolivia shall report and give accounts on the performance of the institution as often as requested by the Pluri-National Legislative Assembly or its Chambers. The Central Bank of Bolivia shall deliver an annual report to the Legislative Assembly and is subject to the governmental and fiscal system of control of the State.

Section III. Financial Policy

Article 330

I. The State shall regulate the financial system based on criterion of equality of opportunity, solidarity, equitable distribution and redistribution.
II. The State, through its financial policy, shall prioritize the demand for financial services of the sectors of micro and small enterprises, artisans, commerce, service, community organizations and production cooperatives.
III. The State shall stimulate the creation of non bank financial entities for the purpose of socially productive investment.
IV. The Central Bank of Bolivia and the public entities and institutions shall not recognize the debts of private banks or financial entities. These banks and entities have the obligation to contribute to and strengthen a fund for financial restructuring, which shall be used in the event of bank insolvency.
V. The financial operations of the Public Administration, at the different levels of government, shall be carried out by a public banking entity. The law shall provide for its creation.

Article 331

The activities of financial intermediation, the provision of financial services and any other activities related to the management, use and investment of savings, are matters of public interest and may only be exercised with prior authorization of the State, in accordance with the law.

Article 332

I. The financial entities shall be regulated and supervised by an institution of banking and financial entity regulation. This institution shall be a public law institution and shall have jurisdiction in the entire territory of Bolivia.
II. The highest authority of the institution for banking and financial entity regulation shall be designated by the President of the State from among a list of candidates proposed by the Pluri-National Legislative Assembly, in accordance with the procedure established by the law.

Article 333

The financial operations carried out by natural or legal persons, whether by Bolivians or foreigners, shall enjoy the right of confidentiality, except in judicial procedures in cases of the alleged commission of financial crimes, those in which fortunes are being investigated and others defined by the law. The entities, which are designated by law to investigate such cases, shall have the authority to obtain information about said financial operations without the need for judicial authorization.

Section IV. Sector Policies

Article 334

In the context of sectoral policies, the State shall protect and promote:

1. The rural economic organizations, and the associations or organizations of small urban producers and artisans, as supportive and reciprocal alternatives. The economic policy shall facilitate access to technical training and technology, to credits, to the opening of markets, and the improvement of productive processes.

2. The guild sector, the self-employed, and retail commerce, in the areas of production, services and sales, shall be strengthened by means of access to credit and technical assistance.

3. Production of crafts with cultural identity.

4. The micro and small enterprises, as well as the rural economic organizations, and organizations or associations of small producers, which shall enjoy preference in the purchases made by the State.

Article 335

The public service cooperatives shall be non profit organizations of collective interest and submitted to governmental control, and they shall be administered democratically. The election of their administrative and supervisory authorities shall be carried out according to their own statutory norms and supervised by the Pluri-National Electoral Organ. Their organization and operation shall be regulated by law.

Article 336

The State shall provide support to community economic organizations so that they may receive credits and financing.

Article 337

- Protection of environment

I. Tourism is a strategic economic activity, which must be developed in a sustainable manner that takes into account respect for the treasures of the culture and the environment.
II. The State shall promote and protect community tourism with the objective of benefiting urban and rural communities, and the rural native indigenous nations and peoples where this activity is carried out.

Article 338

The State recognizes the economic value of housework as a source of wealth, and it shall be quantified in public accounts.

CHAPTER IV. Assets and Resources of the State and Their Distribution

Article 339

I. The President of the Republic may only decree payments that are not authorized by the budget law in order to attend to necessities, which cannot be delayed, arising from public calamities, internal disturbance or the exhaustion of resources destined to maintain services, the paralysis of which would cause serious harm. The expenses destined for these objectives shall not exceed one percent of the total expenditures authorized by the General Budget.
II. The assets that are State patrimony and those of public entities are property of the Bolivian people, and they may not be violated, attached, limited or expropriated; they may not be employed to the benefit of any individual. Their description, inventory, administration, disposition, obligatory registration, and the kinds of claims shall be regulated by law.
III. The income of the State shall be invested pursuant to the general economic and social development plan of the country, the General Budget of the State and the law.

- Subsidiary unit government
- Municipal government

Article 340

I. State revenue is divided into revenue of the nation, departments, municipalities and the rural native indigenous peoples, and it shall be invested independently by their Treasuries, pursuant to their respect budgets.
II. The law shall classify the national, departmental and municipal income and that of the rural native indigenous peoples.
III. The departmental and municipal resources, and those of the rural native indigenous autonomies, and the judicial and university resources, which are collected by dependent offices at the national level, shall not be centralized in the National Treasury.
IV. The national Executive Organ shall establish the norms for the elaboration and presentation of the proposed budgets of the entire public sector, including the

IV. autonomies.

- Subsidiary unit government

Article 341

The following are the resources of departments:

1. The departmental royalties created by law.
2. Participation in the revenue derived from taxes on the Hydrocarbons, according to the percentages set forth in the law.
3. Taxes, fees, special contributions and departmental certificates on natural resources.
4. The transfers from the General Treasury of the Nation which are allocated to cover the expenses of personal health, education and social assistance.
5. The extraordinary transfers of the General Treasury of the Nation, in the cases established in article 339.I of this Constitution.
6. The internal and foreign credits and loans contracted pursuant to the norms of public debt of the system of the National Treasury and Public Credit.
7. The income derived from the sale of goods, services and the sale of assets.
8. Bequests, donations and other similar income.

TITLE II. ENVIRONMENT, NATURAL RESOURCES, LAND AND TERRITORY

- Protection of environment

CHAPTER I. Environment

Article 342

It is the duty of the State and the population to conserve, protect and use natural resources and the biodiversity in a sustainable manner, as well as to maintain the equilibrium of the environment.

Article 343

The population has the right to participate in environmental management, and to be consulted and informed prior to decisions that could affect the quality of the environment.

Article 344

I. The manufacture and use of chemical, biological and nuclear weapons on Bolivian territory is prohibited, as well as the internment, transit and deposit of nuclear and toxic wastes.
II. The State shall regulate the internment, production, sale and employment of techniques, methods, supplies and substances that affect health and the environment.

Article 345

The policies of environmental management are based on the following:

1. Participatory planning and management, with public control.
2. The application of systems of evaluation of environmental impact and control of the quality of the environment, without exception and in a way that traverses all activity of production of goods and services that use, transform or affect natural resources and the environment.

3. Liability for the conducting of any activity that produces environmental harm; civil, criminal and administrative penalties for non compliance with the norms for the protection of the environment.

Article 346

The natural assets are of public importance and of strategic character for the sustainable development of the country. Their conservation and use for the benefit of the population shall be the responsibility and exclusive authority of the State, and sovereignty over natural resources may not be compromised. The law shall establish the principles and disposition for its management.

Article 347

I. The State and the society shall promote the mitigation of harmful effects on the environment and of the environmental contamination and damage that affect the country. Liability will be declared for damage to historic environments, and liability for environmental crimes shall not lapse.
II. Those who carry out activities that impact the environment must, at all stages of production, avoid, minimize, mitigate, remediate, repair and make compensation for the harms caused to the environment and the health of persons, and shall establish the security measures necessary to neutralize the possible effects of environmental contamination and damage.

CHAPTER II. Natural Resources

Article 348

I. Minerals in all of their states, the hydrocarbons, water, air, soil and the subsoil, the forests, the biodiversity, the electromagnetic spectrum and all the elements and physical forces capable of use, are considered natural resources.
II. The natural resources are of strategic character and of public importance for the development of the country.

- Ownership of natural resources

Article 349

I. The natural resources are the property and direct domain, indivisible and without limitation, of the Bolivian people, and their administration corresponds to the State on behalf of the collective interest.
II. The State shall recognize, respect and grant individual and collective ownership rights to land, as well as the rights to use and enjoyment of natural resources.
III. Agriculture, livestock, as well as the activities of hunting and fishing that do not involve protected animal species, are activities that are governed by that which is established in Part Four of this Constitution related to the economic organization and structure of the State.

Article 350

Any title granted over fiscal reserves shall be null and void, except by express authorization for state necessity and public utility, in accordance with the law.

Article 351

I. The State, shall assume control and direction of the exploration, exploitation, industrialization, transport and sale of strategic natural resources through public, cooperative or community entities, which may in turn contract private enterprises and form mixed enterprises.
II. The State shall sign contracts of association with legal persons, Bolivian or foreign, for the use of natural resources. It must assure the reinvestment of economic profits in the country.
III. The management and administration of natural resources shall be carried out guaranteeing social participation and control in the design of the sector policies. Mixed enterprises may be established for the management and administration,

III. with representation of the state and society, and the collective welfare shall be safeguarded.
IV. Private enterprises, whether Bolivian or foreign, shall pay taxes and royalties when they take part in the exploitation of natural resources, and the payments that might be made shall not be reimbursable. The royalties for the use of natural resources are a right and a compensation for their exploitation, and they shall be regulated by the Constitution and the law.

- Right to culture

Article 352

The exploitation of natural resources in a determined territory shall be subject to a process of consultation with the affected population, called by the State, which shall be free, prior in time and informed. Citizen participation is guaranteed in the process of the management of the environment, and the conservation of ecosystems shall be promoted, in accordance with the Constitution and the law. In the nations and rural native indigenous peoples, the consultation will be carried out with respect given to their own norms and procedures.

- Right to culture

Article 353

The Bolivian people shall have equitable access to the benefits which come from the use of all the natural resources. Priority participation shall be assigned to the territories where these resources are found, and to the nations and rural native indigenous peoples.

Article 354

The State shall develop and promote research related to the management, conservation and use of natural resources and to biodiversity.

Article 355

I. The industrialization and sale of natural resources shall be a priority of the State.
II. The profits obtained from the exploitation and sale of the natural resources shall be distributed and reinvested to promote economic diversification in the different territorial levels of the State. The percentage of profits to be distributed shall be approved by the law.
III. The processes of industrialization shall be carried out with preference given to the place of origin of the production, and conditions shall be created which favor competitiveness in the internal and international market.

Article 356

The activities of exploration, exploitation refining, industrialization, transport and sale of nonrenewable natural resources shall have the character of state necessity and public utility.

Article 357

Since it is social property of the Bolivian people, no foreign person or enterprise, nor any private Bolivian person or enterprise, may register the property title to Bolivian natural resources in stock markets, nor can they use them as means for financial operations that grant title to or use them as security. The annotation and registry of reserves is the exclusive authority of the State.

Article 358

The rights to the use and exploitation of natural resources shall be subject to the Constitution and the law. These rights shall be subject to periodic review for compliance with the technical, economic and environmental regulations. The violation of the law shall lead to the reversion or nullification of the rights of use and exploitation.

CHAPTER III. Hydrocarbons

Article 359

- Ownership of natural resources

I. The hydrocarbons, in whatever state they are found or form in which they are, are the inalienable and unlimited property of the Bolivian people. The State, on behalf of and in representation of the Bolivian people, is owner of the entire hydrocarbon production of the country and is the only one authorized to sell them. The totality of the income received by the sale of hydrocarbons shall be the property of the State.
II. No contract, agreement or convention, whether direct or indirect, tacit or express, may violate totally or partially that which is established in this article. In the event of violation, the contracts shall be null and void as a matter of law, and those who have agreed to, signed, approved or executed them, have committed the crime of treason.

Article 360

The state shall define the policy for hydrocarbons, shall promote their comprehensive, sustainable and equitable development, and shall guarantee energy sovereignty.

Article 361

I. Yacimientos Petroliferos Fiscales Bolivianos (YPFB) is a self-sufficient enterprise of pubic law, which cannot be subject to attachment, with autonomy of administrative, technical and economic management, within the framework of the state hydrocarbon policy. YPFB, under the legal protection of the Ministry of the branch and as the operative arm of the State, is the only one authorized to carry out activities in the productive chain of hydrocarbons and their sale.
II. YPFB may not transfer its rights or obligations in any form or modality, whether tacit or express, direct or indirectly.

Article 362

I. The YPFB is authorized to sign contracts for services with public, mixed or private enterprises, Bolivian or foreign, so that said enterprises, in their name and representation, carry out determined activities in the productive chain in exchange for compensation or payment for their services. In no case may the signing of these contracts signify losses for YPFB or the State.
II. The contracts referring to activities of exploration and exploitation of hydrocarbons must have prior authorization and express approval of the Pluri-National Legislative Assembly. In the event this authorization is not obtained, they shall be null and void as a matter of law, without the necessity of a judicial or extra-judicial declaration.

Article 363

I. The Bolivian Enterprise of Hydrocarbon Industrialization (EBIH) is a self sufficient, public law enterprise, with autonomy in its administrative, technical and economic management, under the legal protection of the Ministry of the branch and the YPFB, which acts in the area of state hydrocarbon policy. EBIH, in representation of the State and within its territory, shall be responsible for carrying out the industrialization of the hydrocarbons.
II. YPFB may form associations or mixed economic enterprises for the execution of the activities of exploration, exploitation, refining, industrialization, transport and sale of hydrocarbons. In these associations and companies, YPBF must have a shareholder participation of no less than fifty one percent of the total capital of the company.

Article 364

YPFB, on behalf and in representation of the Bolivian State, shall operate and exercise property rights in the territories of other states.

Article 365

A self-sufficient institution of public law, with autonomy in its administrative, technical and economic management, under the legal protection of the Ministry of the branch, it shall be responsible for the regulations, control, supervision and fiscal control of the activities of the entire productive chain up to industrialization, within the framework of the state hydrocarbon policy, in accordance with the law.

Article 366

Every foreign enterprise that carries out activities in the chain of production of hydrocarbons in name and representation of the State shall submit to the sovereignty of the State, and to the laws and authority of the State. No foreign court case or foreign jurisdiction shall be recognized, and they may not invoke any exceptional situation for international arbitration, nor appeal to diplomatic claims.

Article 367

The exploitation, consumption and sale of hydrocarbons and its derivatives must be subjected to a policy of development that guarantees internal consumption. The exportation of the excess production shall incorporate the greatest quantity of value added possible.

Article 368

The departments that are producers of hydrocarbons shall receive a royalty of eleven percent of their audited departmental production of hydrocarbons. Similarly, the non producer departments of hydrocarbons and the General Treasury of the State shall obtain a participation in the percentages, which shall be fixed by a special law.

- Ownership of natural resources

CHAPTER IV. Mining and Metalurgy

Article 369

I. The State shall be responsible for the mineralogical riches that are found in the soil and subsoil, whatever may be their origin, and their application shall be regulated by law. The private mining industry and cooperative companies shall be recognized as productive actors of the state mining industry.
II. The non metallic natural resources existing in the salts, brines, evaporations, sulfurs and others substances are of strategic character for the country.
III. The direction of the mining and metallurgy policy is the responsibility of the State, as well as the stimulation, promotion and control of mining activity.
IV. The State shall exercise control of and audit the entire productive chain of mining and of the activities developed by the owners of mining rights, mining contracts or pre-existing rights.

Article 370

I. The State shall grant mining rights in the entire chain of production, and it shall sign mining contracts with individual and collective persons upon prior compliance with the norms established in the law.
II. The State shall promote and strengthen cooperative mines so that they contribute to the social economic development of the country.
III. The mining rights in the entire chain of production as well as mining contracts must fulfill a social economic function, carried out directly by their owners.
IV. Mining rights, which include investments and prospecting, exploration, exploitation, concentration, industrialization or sale of minerals and metals, are controlled by the owners. The law shall define the extent of this right.
V. The mining contract shall obligate the beneficiaries to develop mining activities to satisfy the social economic interest. The failure to fulfill this obligation shall lead to the immediate dissolution of the contract.
VI. The State, through self-sufficient entities, shall promote and develop policies for the administration, prospecting, exploration, exploitation, industrialization,

VI. commercialization, and for technical, geological and scientific information and evaluation of non-renewable natural resources for mining development.

Article 371

I. The areas of mining exploitation granted by contract are not transferable, not attachable, and cannot pass by hereditary succession.
II. The legal domicile of the mining enterprises shall be established in the local jurisdiction where the greatest amount of mining exploitation is carried out.

Article 372

I. The nationalized mining groups, their industrial plants and their foundries are the property of the people, which cannot be transferred or adjudicated as property of private enterprises pursuant to any title.
II. The high level direction and administration of the mining industry shall be entrusted to a self sufficient entity with the attributes that are determined by the law.
III. The State shall participate in the industrialization and sale of mineralogical, metallic and non metallic resources, as regulated by law.
IV. The new self-sufficient enterprises created by the State shall establish their legal domicile in the departments of greatest mining production, Potosi and Oruro.

CHAPTER V. Water Resources

Article 373

- Right to water
- Ownership of natural resources

I. Water constitutes a fundamental right for life, within the framework of the sovereignty of the people. The State shall promote the use and access to water on the basis of principles of solidarity, complementariness, reciprocity, equity, diversity and sustainability.
II. Water resources in all their states, surface and subterraneous, constitute finite, vulnerable, strategic resources, and serve a social, cultural and environmental function. These resource cannot be the object of private appropriation and they, as well as water services, shall not be given as concessions and are subject to a system of licensing, registration and authorization pursuant to the law.

Article 374

I. The State shall protect and guarantee the priority use of water for life. It is the duty of the State to manage, regulate, protect and plan the adequate and sustainable use of water resources, with social participation, guaranteeing access to water for all the habitants. The law shall establish the conditions and limitations of all the uses.
II. The State shall recognize, respect and protect the uses and customs of the community, of its local authorities and the rural native indigenous organizations over the right, management and administration of sustainable water.
III. The fossil, glacial, wetland, subterraneous, mineral, medicinal and other waters are priorities for the State, which must guarantee its conservation, protection, preservation, restoration, sustainable use and complete management; they are inalienable, not attachable and cannot be limited.

Article 375

I. It is the duty of the State to develop plans for the use, conservation, management and sustainable exploitation of the river basins.
II. The State shall regulate the management and sustainable administration of the water resources and the basins for irrigation, food security and basic services, respecting the uses and customs of the communities.
III. It is the duty of the State to carry out the studies for the identification of fossil waters and their consequent protection, management and sustainable administration.

Article 376

Water resources of the rivers, lakes and lagoons that form the water basins are considered strategic resources for the development and sovereignty of Bolivia because of their potential, for the variety of natural resources that they contain, and because they are a fundamental part of the ecosystems. The State shall avoid actions in the sources and intermediary zones of rivers that may cause damages to the ecosystems or diminish the flow volume, shall preserve the natural state, and shall watch over the development and welfare of the population.

Article 377

- International law

I. Every international treaty on water resources that the State signs shall guarantee the sovereignty of the country and shall prioritize the interest of the State.
II. The State shall safeguard permanently the border and trans border waters for the conservation of the water riches that contribute to the integration of peoples.

CHAPTER VI. Energy

Article 378

- Protection of environment

I. The different forms of energy and their sources constitute a strategic resource; access to them is a fundamental and essential right for full development and the social development of the country; and they shall be governed by the principles of efficiency, continuity, adaptability, and environmental preservation.
II. It is the exclusive authority of the State to develop the chain of energy production in the phases of generation, transport, and distribution, by means of public, mixed enterprises, non profit institutions, cooperatives, private enterprises, and community and social enterprises, with public participation and control. The chain of energy production may not be held exclusively by private interests, nor may it be licensed. Private participation shall be regulated by law.

Article 379

I. The State shall develop and promote research, as well as the use of new forms of the production of alternative energy, compatible with the conservation of the environment.
II. The State shall guarantee the generation of energy for internal consumption; the export of excess energy must anticipate the reserves necessary for the country.

CHAPTER VII. Biodiversity, Coca, Protected Areas and Forest Resources

Section I. Biodiversity

Article 380

I. The renewable natural resources shall be exploited in a sustainable way, respecting the characteristics and natural value of each ecosystem.
II. In order to guarantee ecological equilibrium, the land must be used in accordance with its capacity for greater use within the framework of the process of the organization of use and occupation of lands, taking into account their biophysical, socioeconomic, cultural characteristics, and institutional policies.

Article 381

- Provisions for intellectual property

I. Native animal and vegetable species are natural assets. The State shall establish the measures necessary for their conservation, exploitation and development.
II. The State shall protect all genetic and micro-organic resources, which are found in the ecosystems of the territory, as well as the knowledge associated with their use and exploitation. For their protection, a system of registry that safeguards

II. their existence shall be established, as well as a registry of the intellectual property in the name of the State or the local individuals who claim it. The State shall establish procedures for protection under the law of all those resources that are not registered.

Article 382

The State has the authority and duty to defend, recover, protect and repatriate biological material derived from natural resources, from ancestral knowledge and other sources that originate within the territory.

Article 383

The State shall establish measures for the partial or total, temporary or permanent, restriction of the uses of extracts from the resources of biodiversity. The measures shall be directed toward the need to preserve, conserve, recover and restore the biodiversity at risk of extinction. Illegal possession, handling and trafficking of species of biodiversity shall be criminally punished.

Section II. Coca

Article 384

The State protects the native and ancestral coca as cultural patrimony, as a renewable natural resource of the biodiversity of Bolivia, and as a factor of social unity. In its natural state coca is not a narcotic. The revaluation, production, sale and industrialization of coca shall be governed by law.

Section III. Protected Areas

Article 385

I. The protected areas constitute a common good, and they form part of the natural and cultural patrimony of the country. They perform environmental, cultural, social and economic functions for sustainable development.
II. Wherever rural native indigenous protected areas and territories are recovered, shared management shall be undertaken, subject to the norms and procedures of the rural native indigenous nations and peoples, and respecting the goal of creating these areas.

Section IV. Forest Resources

Article 386

The natural forests and woodlands are strategic for the development of the Bolivian people. The State shall recognize the rights to exploit the forests for the benefit of communities and individual traders. In addition, it shall promote activities of conservation and sustainable exploitation, the generation of added value to its products, and the rehabilitation and reforestation of degraded areas.

Article 387

I. The State shall guarantee the conservation of natural forests in the areas of native forests, their sustainable exploitation, and the conservation and recovery of the flora, fauna, and degraded areas.
II. The law shall regulate the protection and exploitation of the species of trees that have socioeconomic, social and ecological importance.

- Right to culture

Article 388

The rural native indigenous communities located within forest areas shall have the exclusive right to their exploitation and their management, in accordance with the law.

Article 389

I. The conversion of tree-covered land to agricultural and other uses, shall only be carried out in areas legally allocated for that use, in accordance with the planning policies and in accordance with the law.
II. The law shall determine the ecological rights of way and zoning for internal uses in order to guarantee the long term conservation of the land and bodies of water.
III. Every conversion of land in areas not classified for such purposes shall constitute a punishable infraction and shall give rise to the obligation to repair the damages caused.

CHAPTER VIII. Amazonia

Article 390

I. Because of its high environmental sensitivity, existing biodiversity, water resources and for the eco-regions, the Bolivian Amazonia basin constitutes a strategic area of special protection for the comprehensive development of the country.
II. The Bolivian Amazonia includes the entire Department of Pando, Iturralde Province of the Department of La Paz and the provinces of Vaca Diez and Ballivan of the Department of Beni. The full development of the Bolivian Amazonia, as a territorial area of tropical rain forests, in accordance with the specific characteristics of the extract and harvesting resources, shall be governed by a special law in benefit of the region and the country.

Article 391

- Protection of environment

I. The State shall prioritize the sustainable, integral development of the Bolivian Amazonia, through a comprehensive, participatory, shared and equitable administration of the Amazon jungle. The administration shall be directed to the generation of employment and the improvement of the income of its inhabitants, within the framework of protection and sustainability of the environment.
II. The State shall encourage access to financing for tourism, eco-tourism and other initiatives of regional enterprise.
III. The State, in coordination with the rural native indigenous authorities and the inhabitants of the Amazonia, shall create a special, decentralized organ, with headquarters in the Amazonia, to promote its own activities in the region.

Article 392

- Right to culture

I. The State shall implement special policies to benefit the rural native indigenous nations and peoples of the region in order to generate the necessary conditions for the reactivation, encouragement, industrialization, commercialization, protection and conservation of traditional extract products.
II. The historical cultural and economic value of the siringa and the castano, symbols of the Bolivian Amazonia, is recognized, and cutting them down shall be punished, except in cases of public interest as regulated by the law.

CHAPTER IX. Land and Territory

- Ownership of natural resources

Article 393

The State recognizes, protects and guarantees individual and communitarian or collective property of land, as long as it fulfills a social purpose or social economic purposes, as the case may be.

Article 394

I. Individual agrarian property is classified as small, medium and business, according to the surface area, the production, and the development criteria. Its maximum and minimum dimensions, characteristics and forms of conversion shall

I. be regulated by law. Legally acquired rights by individual owners, whose piece of land is inside rural native indigenous territories, are guaranteed.
II. The small property is indivisible; it constitutes a family asset that cannot be attached, and it is not subject to agrarian property taxes. The indivisibility does not affect the right of hereditary succession under conditions established by law.
III. The State recognizes, protects and guarantees communitarian or collective property, which includes rural native indigenous territory, native, intercultural communities and rural communities. Collective property is indivisible, may not be subject to prescription or attachment, is inalienable and irreversible, and it is not subject to agrarian property taxes. Communities can be owners, recognizing the complementary character of collective and individual rights, respecting the territorial unity in common.

Article 395

- Right to culture
- Provisions for wealth redistribution

I. The lands that are taken over shall be given to rural native indigenous peoples, intercultural indigenous communities, Afro-Bolivian and rural communities, which do not possess them or have insufficient lands, in accordance with state policy concerned with the ecological and geographic realities, as well as the population, social, cultural and economic necessities. The endowment shall be carried out according to the policies of sustainable rural development and the right of women to access, distribution and redistribution of land, without discrimination based on civil status or marital union.
II. Double endowment, the purchase and sale, and exchange and donation of lands delivered by endowment are prohibited.
III. Since it is contrary to the collective interest, the obtaining of income generated by the speculative use of the land is prohibited.

Article 396

I. The State shall regulate the land market, preventing the accumulation of surface areas greater than that recognized by law, as well as its division into surfaces areas less than that established for small property.
II. Foreigners may not acquire lands of the State under any title whatsoever.

- Restrictions on rights of groups

Article 397

I. Work is the fundamental means by which agrarian property is acquired and maintained. Properties must be used to serve a social purpose or a social economic purpose in order to safeguard the right to them, depending on the nature of the property.
II. Social purpose shall be understood to mean the sustainable exploitation of the land by peoples and rural native indigenous communities, as well as that carried out in small properties, and it constitutes the source of subsistence and welfare and socio-cultural development of its owners. The norms of the communities are recognized in the fulfillment of social purpose.
III. The social economic purpose must be understood as the sustainable use of the land in the development of productive activities, in accordance with its capacity for extended use, for the benefit of the society, the collective interest and its owner. The corporate property is subject to review in accordance with the statute, to verify the compliance with the social economic purpose.

- Mentions of social class

Article 398

Latifundio and double title are prohibited because they are contrary to the collective interest and development of the country. Latifundio is understood to mean the non-productive holding of land; the land that does not fulfill a social economic function; the exploitation of land that applies a system of servitude, quasi-slavery and slavery in labor relations; or the property that surpasses the maximum surface area established in the law. In no case may the maximum surface exceed five thousand hectares.

- Protection from expropriation

Article 399

I. The new limits of zoned agrarian property shall be applied to pieces of land that have been acquired after this Constitution enters into force. For purposes of the non retroactivity of the law, the rights of possession and agrarian property are recognized and respected in accordance with the law.
II. The surface areas exceeding those that fulfill the Social Economic Function shall be expropriated. The double title set forth in the prior article refers to the double endowments processed before the ex-National Council of Agrarian Reform, CNRA. The prohibition of double endowment is not applied to legally acquired rights of third parties.

Article 400

Because it affects sustainable exploitation and is contrary to the collective interest, the division of land into areas less than the maximum area of small property as recognized in the law is prohibited. The maximum area for small property established by law shall take into account the characteristics of the geographic zone.

- Protection from expropriation

Article 401

I. The failure to fulfill the social economic function or the holding of latifundio shall result in the reversion of the land, and the land shall pass into the domain and property of the Bolivian people.
II. The expropriation of land shall occur for reasons of necessity and public utility and upon prior payment of fair indemnification.

Article 402

The State has the obligation to:

- Protection of environment

1. Encourage plans for human settlement to achieve rational demographic distribution and better exploitation of the land and natural resources, granting to new settlements the facilities to have access to education, health, food security and production, within the framework of the Territorial Organization of the State and the conservation of the environment.

2. To promote policies aimed at eliminating all forms of discrimination against women in the access to, ownership and inheritance of land.

- Right to culture

Article 403

I. The integrity of rural native indigenous territory is recognized, which includes the right to land, to the use and exclusive exploitation of the renewable natural resources under conditions determined by law, to prior and informed consultation, to participation in the benefits of the exploitation of the non-renewable natural resources that are found in their territory, to the authority to apply their own norms, administered by their structures of representation, and to define their development pursuant to their own cultural criteria and principles of harmonious coexistence with nature. The rural native indigenous territories may be composed of communities.
II. The rural native indigenous territory includes areas of production, areas of exploitation and conservation of natural resources, and spaces for social, spiritual and cultural reproduction. The law shall establish the procedure for recognition of these rights.

Article 404

The Bolivian Agrarian Reform Service (Servicio Boliviano de Reforma Agraria), the maximum authority of which is the President of the State, is the entity responsible for planning, executing and consolidating the agrarian reform process, and it has jurisdiction in the entire territory of the country.

TITLE III. COMPREHENSIVE SUSTAINABLE RURAL DEVELOPMENT

Article 405

Comprehensive, sustainable rural development is a fundamental part of the economic policies of the State, which shall prioritize its actions to encourage all communitarian economic undertakings and those of the group of rural actors, placing emphasis on food security and sovereignty, by means of the following:

1. The sustained and sustainable increase of agricultural, livestock, manufacturing, agro-industrial, and tourist industry productivity, as well as their commercial capacity.

2. The articulation and internal complementary form of the structures of agricultural, livestock and agro-industrial production.

3. Achievement of better conditions for economic exchange of the rural productive sector in relations to the rest of the Bolivian economy.

4. The importance and respect of the rural native indigenous communities in all dimensions of their life.

5. The strengthening of the economy of the small agricultural and livestock producers and of the family and communitarian economy.

Article 406

I. The State shall guarantee the sustainable comprehensive rural development by means of policies, plans, programs and comprehensive projects that encourage agricultural, artisan, and forestry production, and tourism, with the goal of obtaining better exploitation, transformation, industrialization and commercialization of renewable natural resources.
II. The State shall promote and strengthen the rural economic productive organizations, among which are the artisans, the cooperatives, the associations of agricultural producers and manufacturers, and the micro, small and medium communitarian agricultural enterprises, which contribute to the social economic development of the country, in accord with their cultural and productive identity.

Article 407

The objectives of the policy of the State for comprehensive rural development, in coordination with the autonomous and decentralized territorial entities, are the following:

1. To guarantee food security and sovereignty, prioritizing the production and consumption of agricultural foods produced in the territory of Bolivia.

2. To establish mechanisms for the protection of Bolivian agricultural production.

3. To promote the production and sale of ecological agricultural products.

4. To protect agricultural and agro-industrial production from natural disasters and inclement climate, and geological catastrophes. The law shall provide for the creation of agricultural insurance.

5. To implement and develop technical, productive, and ecological education, at all levels and in all modalities.

6. To establish policies and sustainable projects, obtaining the conservation and recuperation of the soil.

7. To promote irrigation systems for the purpose of guaranteeing agricultural and livestock production.

8. To guarantee technical assistance and to establish mechanisms of innovation and transfer of technology in the entire agricultural productive chain.
9. To establish the creation of a seed bank and centers of genetic research.
10. To establish policies to encourage and support the productive agricultural sectors that have natural structural weaknesses.
11. To control the exit and entrance into the country of biological and genetic resources.
12. To establish policies and programs to guarantee agricultural sanitation and food safety.
13. To provide productive, manufacturing and industrial infrastructure and basic services for the agricultural sector.

Article 408

The State shall determine the incentives for the benefit of small and medium producers for the purpose of compensating for the disadvantages of unequal exchange between agricultural and livestock products and the rest of the economy.

Article 409

The production, importation and commercialization of genetically altered products shall be regulated by law.

PART V. NORMATIVE HIERARCHY AND CONSTITUTIONAL REFORM

SOLE TITLE. SUPREMACY AND REFORM OF THE CONSTITUTION

Article 410

- Legal status of treaties
- National vs subnational laws
- International law

I. Every person, natural and legal, as well as public organs, public functions and institutions, are subject to the present Constitution.
II. The Constitution is the supreme norm of Bolivian law and enjoys supremacy before any other normative disposition. The components of constitutional law include the international Treaties and Conventions in the matter of human rights and the norms of Communitarian Law, which have been ratified by the country. The application of the legal norms shall be governed by the following hierarchy, in accordance with the authority of the territorial entities:
    1. Constitution of the State
    2. International treaties
    3. National laws, statutes of the autonomies, organic charters and the other departmental, municipal and indigenous legislation.
    4. Decrees, regulations and other resolutions issued by the corresponding executive organs.

- Joint meetings of legislative chambers
- Referenda
- Constitution amendment procedure

Article 411

I. The total reform of the Constitution, or that which affects its fundamental premises, affects rights, duties and guarantees, or the supremacy and reform of the Constitution, shall take place through an original plenipotentiary Constituent Assembly, put into motion by popular will through referendum. The convocation of the referendum shall be carried out by citizen initiative, with the signatures of

I. at least twenty percent of the electorate; by absolute majority vote of the members of the Pluri-National Legislative Assembly; or by the President of the State. The Constituent Assembly (Asamblea Constituyente) shall draft its own regulations for all effects. The constitutional text must be approved by two-thirds of the members present. The validity of the reform shall require approval by constitutional referendum.
II. The partial reform of the Constitution may be initiated by popular initiative with the signatures of at least twenty percent of the electorate, or by the Pluri-National Legislative Assembly through a law of constitutional reform approved by two-thirds of the total members present of the Pluri-National Legislative Assembly. Any partial reform shall require approval by constitutional referendum.

TRANSITORY PROVISIONS

First

I. Within a term of 60 days from the promulgation of the present Constitution, the Congress of the Republic shall approve a new electoral regimen for the election of the Pluri-National Legislative Assembly, the President, and the Vice President of the Republic. The election shall take place on December 6, 2009.
II. The mandates prior to the time this Constitution enters into force shall be taken into account for purposes of computing the new terms of office.
III. The elections of departmental and municipal authorities shall take place on April 4, 2010.
IV. As an exception, the mandates of the Mayors, Municipal Councils and the Prefects of Departments shall be extended until the taking of office by the newly elected authorities pursuant to the previous paragraph.

Second

The Pluri-National Legislative Assembly shall approve, within the maximum term of one hundred and eighty days from the time of its installation, the law of the Pluri-National Electoral Organ, the law of the Judicial Organ, the law of the Pluri-National Constitutional Court, and the Law of the Framework of Autonomy and Decentralization.

Third

I. The departments that opted for departmental autonomy in the referendum of July 2, 2006, shall directly adopt the system of departmental autonomy, pursuant to the Constitution.
II. The departments that opted for departmental autonomy in the referendum of July 2, 2006, must adjust their statutes to this Constitution and subject themselves to constitutional control

Fourth

The election of the authorities of the organs included in the second disposition shall be carried our pursuant to the electoral calendar established by the Pluri-National Electoral Organ.

Fifth

The laws necessary for the development of the constitutional dispositions shall be approved during the first mandate of the Pluri-national Legislative Assembly.

Sixth

In the maximum time of one year after the law of the Judicial Organ enters into force, and pursuant to it, the judicial posts shall be reviewed.

Seventh

For purposes of application of paragraph I of article 293 of this Constitution, indigenous territory shall have as the basis of its demarcation the Communitarian Lands of Origin. Within the term of one year from the election of the Executive and Legislative Organ, the category of Communitarian Land of Origin shall be subject to administrative process to convert it to Rural Native Indigenous Territory, within the framework established in this Constitution.

Eighth

I. In the period of one year from the election of the Executive Organ and the Legislative Organ, the concessions on natural resources, electricity, telecommunications and basic services shall be adjusted to the new juridical system. In no case shall the transfer of the concessions to the new juridical system signify the failure to recognize the rights acquired.
II. In the same period, the mining concessions of metallic and non-metallic minerals, crystals, salts, sulfur and others, granted in the fiscal reserves of Bolivian territory, shall cease to be in effect.
III. The mining concessions granted to national and foreign enterprises prior to the promulgation of this Constitution, must be adjusted to it within a period of a year by means of mining contracts.
IV. The State recognizes and respects the pre-existing rights of the cooperative mining companies for their social productive character.
V. The concessions over radioactive minerals granted prior to the promulgation of the Constitution are dissolved and shall revert to the State.

Ninth

The international treaties existing prior to the Constitution, which do not contradict it, shall be maintained in the internal legal order with the rank of law. Within the period of four years after the election of the new Executive Organ, the Executive shall renounce and, in that case, renegotiate the international treaties that may be contrary to the Constitution.

Tenth

The requisite of speaking at least two of the official languages for the performance of public functions, as determined in Article 235.7, shall be applied progressively in accordance with the law.

ABROGATING PROVISION

Abrogating provision. The Constitution of the State of 1967 and its subsequent reforms are abrogated.

FINAL PROVISION

This Constitution, approved by referendum by the Bolivian people shall enter into force on the day of its publication in the Official Gazette.

RESOLUTION -RDC No. 9, 20 FEBRUARY 2015

DOU 03/03/2015

Regarding Regulation for realization of clinical trials of medication in Brazil.

The Board of the National Health Surveillance Agency, using the powers that are conferred on it in sections III and IV of art. 15 of Law No. 9,782, of January 26, 1999, item II and paragraphs 1 and 3 of art. 54 of the Bylaws approved under Annex I of Ordinance No. 354 of ANVISA, of August 11, 2006, and its updates, in view of the provisions of sections III, Art. 2, III and IV of art. 7 of Law No. 9782, 1999 in art. 35 of Decree no. 3.029 of 16 April 2009, and the Agency Process Improvement Regulations, established by Decree 422 of 16 April 2008, at a meeting held on 5 February 2015 adopts the following Resolution of the Board and I, Substitute President-Director, determine its publication:

Chapter I
INITIAL PROVISIONS
Section 1
Objective

Art. 1 This Resolution's objective is to define the procedures and requirements for conducting clinical trials for medications, including submission of the Drug Clinical Development Dossier (DDCM) to be approved by ANVISA.

Section II
Scope

Art. 2 This Resolution applies to all clinical trials with drugs that have all or part of their clinical development in Brazil in order to secure registration.

Sole paragraph. Clinical trials for medications registered in Brazil must follow all provisions of this Resolution when providing support for:

I- new therapeutic indication;

II- new method of administration;

III- new concentration;

IV- new pharmaceutical form;

V- expansion of use;

VI new dosage;

VII - new associations; or

VIII any post-registration change that requires clinical data, including renewal of registration.

Art. 3. Post-commercialization clinical trials (Phase IV) are not the primary object of this standard, subject only to Notification of Clinical Trial, being initiated only after obtaining ethical approvals, according to current legislation.

I- clinical trials phase is exempt from the provisions in the caput

IV involving vaccines and trials that aim to evaluate efficacy and safety to obtain registration or renewal, which are considered as phase 3 clinical trials;

II For Phase 4 clinical trials for a product that already has a Drug Clinical Development Dossier (DDCM) approved in ANVISA, the notification of petition must be linked to the DDCM;

III Phase 4 clinical trials and observational phase that are not part of a previously approved DDCM and involve import or export procedures, will be subject to Notification of Clinical Trial and issuing of a Specific Special Bulletin (SSB) within thirty (30) calendar days of receipt from the date of notification by ANVISA,

IV the Clinical Trial Notification must include the following documents:

a)duly filled out form for clinical trial presentation, available on the website of ANVISA;

b) proof of payment or exemption of the Health Surveillance fees as provided by the Tax Liability Form (GRU);

c) clinical trial protocol in accordance with GCP;

d) registration confirmation of the clinical trial in the database of the International Clinical Trials Registration Platform/World Health Organization (ICTRP/WHO) or others recognized by the International Committee of Medical Journal Editors (ICMJE); and

e) Consubstantiative opinion of the Ethics in Research Committee (ERC) issued for the first clinical trial center and forwarding the protocol for review by the ERC.

Art. 4 This Resolution shall not apply to studies of bioequivalence and relative bioavailability for clinical trials with cosmetics, with health products, with food, with gene therapy and stem cells, which must comply with specific regulations.

Art. 5 ANVISA may issue guidelines on the applicability of this resolution for cases not provided for clinical drug trials.

Section III

Definitions

Art. 6 For purposes of this Resolution the following definitions are adopted:

I- Audit - systematic and independent review of activities and documents relating to the study to determine whether the evaluated activities were performed and data registered, analyzed and reported accurately to comply with the protocol and standard operational procedures defined by the sponsor, Good Clinical Practices (GCP) and the applicable regulatory requirements;

II- Good Clinical Practice (GCP) - Standard for planning, conducting, performing, monitoring, auditing, recording, analysis and reporting of clinical trials that provides the assurance that the data and reported results are credible and accurate, and that the rights, integrity and confidentiality of clinical trial participants are protected, according to

GCP guidelines established in the Document of the Americas and Manual of Good Clinical Practices of the International Conference on Harmonization (Document E6);

III-Good Manufacturing Practices (GMP) - part of the Quality Guarantee which ensures that products are consistently produced and controlled with appropriate quality standards for desired use and required by the record;

IV-Good Laboratory Practice (GLP) – quality system that covers the organizational process and the conditions in which clinical studies related to health and safety of the environment are planned, developed, monitored, recorded, archived and reported;

V- Investigator's Brochure - compiled clinical and non-clinical data on the product(s) found that have relevance the study in human beings;

VI- Center for Clinical Trials – private or public organization, legally constituted, duly registered in the National Register of Health Facilities (CNES) in which clinical trials are conducted;

VII- Ethics in Research Committee (ERC) - interdisciplinary and independent body, of public relevance, consultative, deliberative, and educational, created to defend the interests of research participants regarding integrity and dignity and to contribute to the development of research in ethical standards;

VIII- Independent Committee of Security- independent monitoring committee, constituted to monitor specific safety data collected by one or more clinical trials in defined intervals. Recommends to the sponsor if the study should be continued, modified or discontinued;

IX -Special Bulletin (SB) - document of authoritative character issued by ANVISA, upon review and approval of DDCM and can be used in requests for import or export of clinical trial;

X- Specific Special Bulletin (SSB) - document issued by ANVISA, necessary for request of import or export of a clinical trial subject to the notification system for a clinical trial subject described in Chapter X (From Transitory Dispositions) of this norm;

XI –Cargo Knowledge - document issued on unloading date of product or product, by carrier or consolidator, consisting of international transport contract and proof of viability of good or product for import;

XII - Clinical Trial Start Date - corresponds to the inclusion dated the first clinical trial participant abroad;

XIII - Clinical Trial Start Date in Brazil – corresponds to date of inclusion of the first clinical trial participant in Brazil;

XIV –Clinical Trial End Date - corresponds to appearance of the last clinical trial participant in a location abroad or another definition of sponsor explicitly provided by the specific protocol of the clinical trial;

XV Clinical Trial End Date in Brazil – corresponds to date of the last visit of the last clinical trial participant in Brazil or another definition of sponsor explicitly provided in the specific protocol of the clinical trial;

XVI Clinical Trial Protocol Violation - any non-compliance with procedures or requirements defined in the approved clinical trial version without major implications for testing integrity, data quality, rights of safety of trial participants;

XVII- Document of delegation of responsibility for importation-document issued by the sponsor of the research, which includes the appointment of the authorized importer and the responsibilities relating to the transport and clearance of imported merchandise;

XVIII Document for Importation of Product(s) under investigation by the Drug Clinical Development Dossier (DDCM): Document issued by ANVISA, with the goal of evaluating inherent steps in the development of an experimental medication for import or export to a clinical trial, necessary in cases of non-manifestation of the DDCM;

XIX Drug Clinical Development Dossier(DDCM) - compiled documents to be submitted to ANVISA for the purpose of evaluating the steps involved in the development of a experimental drug in order to obtain information to support registration or post-registration changes of the product;

XX- Specific Dossier for each Clinical Trial – compilation of documents to be submitted to ANVISA for the purpose of obtaining information relating to clinical trials, to be conducted in Brazil, which are part of the Experimental Medication Development Plan;

XXI Amendment to the clinical trial protocol – any modification proposal in an original clinical trial protocol, always presented with the rationale that motivate it; such modification may be substantial or not;

XII Clinical trial - research conducted on human beings in order to discover or verify the clinical effects and/or pharmacological effects and/or other pharmaodynamic effect of experimental medication and/or identify any adverse reaction to experimental medication and/or to study absorption, distribution, metabolism and excretion of the experimental drug to verify its safety and/or efficacy;

XXIII Adverse Event (AE) - Adverse event (AE): any adverse medical occurrence in a patient or research participant, which does not necessarily have a causal relationship with the treatment. As a result, an AE can be any unfavorable and unintended sign, symptom or disease (including results of laboratory tests outside the range of normality) associated with the use of a medical device under investigation, whether it is related to it or not;

XXIV Grave Adverse Event-one that results in any adverse experience with drugs, biological products or devices, occurring at any dosage which results in any of the following outcomes:

a) death;
b) threat to life;
c) disability/ persistent or significant disability;
d) requirement of hospitalization or prolonged hospitalization;
e) congenital anomaly or birth defect;
f) infecting agent suspected of transmission by medication
g) clinically significant event.

XXV Unexpected Adverse Event - an event not described as an adverse reaction in the brochure of the experimental drug or informational insert.

XXVI- Case Report Form - printed document, optical or electronic designed to record all information about each participant's clinical trial, according to the clinical trial protocol, that should be reported to the sponsor;

XXVII- Inspection – Act on the part of the regulatory authority to conduct an official review of documents, facilities, records and any other resources considered by the authority as relative to the trial and that may located where the trial is conducted, at the sponsor, CRO, or in other site locations that regulatory authority considers appropriate;

XXVIII- Active Pharmaceutical Ingredient (AFI) – any substance introduced in formulating of a pharmaceutical form which, when administered in a patient, acts as active ingredient. Such substances may exert direct pharmacological activity or other effect in the diagnosis, cure, treat or prevent an illness, may also affect the structure and function of the human organism;

XXIX- Researcher - responsible for the conduct of a clinical trial in the place where the trial is conducted. If the study is led by a group of people, the investigator is the leader of the group and will be called the principal investigator;

XXX-Investigator-Sponsor – individual responsible for conducting and coordinating clinical trials, either alone or in a group, under their immediate direction and in an independent manner, developed with the researcher's own financial and material resources, that of national or international entities to encourage research, private entities and other non-profit entities;

XXXI-Experimental Medication – In a pharmaceutical trial, object of the DDCM, to be used in the clinical trial, for the purpose of obtaining information on its registration or post-registration;

XXXII- Monitoring - act of continually reviewing the process of a clinical trial and ensuring that it is conducted, recorded, and reported according to the protocol, standard operating procedures, GCP and the applicable regulatory requirements;

XXXIII- Contract Clinical Research Organization (CRO) -every company regularly installed in national territory hired by the sponsor or by the researcher-sponsor, which partially or wholly assumes the responsibilities of the sponsor of the clinical trial with ANVISA;

XXXIV- Sponsor - individual, company, institution or organization responsible for starting, managing, controlling and/or financing of clinical study;

XXXV- Placebo - formulation without pharmacological effect, administrated to participant in clinical trial for the purpose of acting as a masking and or comparator;

XXXVI- Product under investigation - experimental drug, placebo, active comparator or any other product to be utilized in the clinical trial;

XXXVII- Clinical Trial Protocol - document that describes objectives, design, methodology, statistical considerations and organization of the trial. Also provides context and guidelines for clinical trial.

XXXVIII- Annual report- annual document containing specific information about the conduct of a particular clinical trial in centers in Brazil, according to the clinical protocol and GCP;

XXXIX- Safety Update Report for development of the experimental drug - harmonized periodic report containing information on safety and development of experimental drug;

XL Final Report - document containing specific information about the conduct of a particular clinical trial at all study participants centers, according to the clinical protocol and GCP;

XLI- Active Substance - substance with pharmacological effect for intended therapeutic activity, used in the production of certain biological products;

XLII- Clinical Trial Protocol Deviation – deviation of clinical trial and protocol that can affect the quality of the data, which compromises the integrity of the study or may affect the safety and rights of trial participants;

Chapter II
RESPONSIBILITIES

Art. 7 The major responsibilities in this chapter include those set out in Good Clinical Practice, without prejudice to other legal and ethical accountabilities.

Section I
The Sponsor's Responsibilities

Art. 8. The sponsor is responsible for required information for the correct execution of DDCM throughout the range of researchers and skill centers, thus ensuring that the clinical trial is conducted according to the protocols and BPC.

Art. 9. The sponsor should utilize qualified professionals to supervise the overall conduct of clinical trials, to manage data, conduct statistical analysis and prepare reports.

Art. 10. The sponsor should ensure that quality assurance and quality control are implemented in all areas of the institutions involved in the development of experimental medication.

Art. 11. The sponsor should maintain the clinical trial data on file, physical or digital, for a period of five (5) years after the last approval of a request for registration in Brazil.

Sole paragraph. In case of discontinuation of clinical development or completion of application for registration is not achieved, the sponsor should maintain the clinical trial data in physical or digital file, for at least two (2) years after discontinuation of clinical development or formal conclusion of development.

Art. 12. The sponsor is responsible for all costs related to procedures and trials, especially those related to diagnosis, treatment and hospitalization of the participant of the trial, and other actions necessary for the resolution of adverse events related to the clinical trial.

Art. 13. The sponsor should ensure that the data obtained regarding safety and efficacy of the investigational medical product are sufficient s to support human exposure by proposed means of administration, the chosen dosage, the duration of the proposed treatment and the population being studied.

Art. 14. The sponsor should ensure that the investigational product, modified comparator drug and placebo, when used, are manufactured according to GMP and are coded and labeled to protect blinding, if applicable, and characterized as products under clinical investigation.

Sole paragraph. In studies using active comparators, the sponsor must use those made in accordance with the GMP.

Art. 15. The sponsor is responsible for importing the necessary amount required to run the trial.

Art. 16. The sponsor is responsible for distributing the product(s) under investigation only to institutions reported in the clinical trial submission form contained in the Specific Dossier for each Clinical Trial and authorized by the Ethical Research Committee.

Art. 17. The sponsor is responsible for disposal of medications and products that have not been used in the clinical trial.

Art. 18. The sponsor should ensure the appropriate monitoring and auditing of clinical trials.

Art. 19. The sponsor shall immediately inform those involved in the trial if it is finished prematurely or suspended for any reason.

Art. 20. The sponsor may transfer its functions to a Clinical Research Organization CRO.

Paragraph 1. The transfer of what is contained in the caput does not remove the ultimate responsibility of the sponsor for the quality and integrity of clinical trial data.

Paragraph 2 Any functions related to the clinical trial to be transferred to a CRO and assumed by this must be specified in writing in a document signed by the sponsor and CRO.

Section II

The Investigator Responsibilities

Art. 21. The investigator shall conduct the trial according to the protocol agreed upon by the sponsor, with GCP, with regulatory and current and in force ethical requirements.

Art. 22. The investigator shall personally supervise the clinical trial and may only delegate tasks but not responsibilities.

Art. 23. The investigator should allow for monitoring, audits and inspections.

Art. 24. The investigator must ensure appropriate medical care for trial participants regarding any adverse events related to the clinical trial, including clinically significant laboratory costs, without any onus on the participant.

Art. 25. The investigator should promptly inform the trial participants if the trial is finished prematurely or suspended for any reason, and ensure appropriate therapy and monitoring for participants.

Art. 26. The investigator is responsible for using the investigational product only in the clinical trial and should store them as specified by the sponsor and in accordance with applicable regulatory requirements.

Section III

The Investigator-Sponsor Responsibilities

Art. 27. In the case of a clinical trial developed by sponsor-investigator, the institution with which the individual is linked to is the primary sponsor.

Paragraph 1 The primary sponsor may delegate responsibilities to the researcher, who will be responsible for conducting the clinical testing at the institution, and in this case, the sponsor-investigator will be the secondary sponsor.

Paragraph2 In the case of delegation of responsibilities and activities, a written authorization must be signed by the parties.

Paragraph3 The primary sponsor may not delegate quality assurance activities, audits and monitoring of clinical trials to investigator-sponsor, but can delegate them to a CRO.

Paragraph4 The primary sponsor shall submit its own or outsourced structure with at least the following units:

I - management of adverse events;
II - project management;
III - data management;
IV - training;
V - information technology;
VI - quality assurance and;
VII - monitoring.

Paragraph5 The institution referred to in the caput should be the one at which the trial will be held.

Paragraph 6. The major responsibilities in this article do not exclude the provisions of Sections I and II of this chapter on the sponsor and investigator responsibilities.

Art. 28. In the case of donation of medication already registered in Brazil for clinical testing, the donor will be the sponsor, if there is any agreement for transfer of ownership or ownership of the data obtained in donor research.

Art. 29. In the case of donation of medication not registered in Brazil for clinical testing, the donor shares the responsibilities of the sponsor.

Section IV

Structure of the Clinical Trial Center

Art. 30. The clinical trial center must have adequate facilities to conduct the protocol with regard to the physical structure, equipment, instruments and human resources, and also be consistent with the clinical trial population, for example, the elderly, children, persons with special needs, among others.

Art. 31. The management of the institution must be notified that the trial will be conducted.

Chapter III
Requirements for submission of clinical medication development dossier (DDCM)

Art. 32. The documentation in the DDCM should assure safety and rights of participants in all phases of clinical development, the quality of the investigational medicinal product and the data obtained in the clinical phases of development so that it may allow for evaluation of the efficacy and safety of the drug.

Art. 33. The DDCM may be presented to ANVISA at any stage of clinical development of the drug for one or more phases of clinical trials.

Section I
General Requirements for the Request

Art. 34. The sponsor must submit a DDCM to ANVISA only if it intends to conduct clinical trials of medication in Brazil.

Sole paragraph. For analysis of the DDCM, at least one specific dossier must be filed for a clinical trial to be held in Brazil.

Art. 35. A Special Bulletin (SB) will be emitted through the DDCM mentioning all clinical trials to be conducted in Brazil.

Sole paragraph. Only clinical trials listed in the SB can be initiated in the country, respecting the other ethical approvals.

Art. 36. Upon receipt of the DDCM, ANVISA has ninety (90) days to evaluate.

Paragraph 1. If there is no response from ANIVSA in ninety (90) calendar days after receipt of DDCM by ANVISA, clinical development can be started after the relevant ethical approvals.

Paragraph 2. In cases of non-manifestation, ANVISA will issue a document for Importation of Product(s) under investigation by the DDCM, will be presented at the location of unloading for import or export of product(s) under investigation, needed to conduct the clinical trial.

Paragraph 3 Not applying to the provisions of the caput and in Paragraph1 are clinical development submissions that fall into at least one of the following: national development, clinical development of biological products - including vaccines - and clinical development Phase I or Phase II. For these cases, the technical area will evaluate the DDCM within 180 (one hundred and eighty) days after receipt of DDCM by ANVISA and the clinical trial may be initiated only after approval by ANVISA.

Art. 37. The DDCM can be submitted by the sponsor, sponsor-investigator or CRO.

Paragraph1 The party responsible for submitting the DDCM to ANVISA must be the same for all subsequent submissions related to this.

Paragraph2 Submissions by a CRO can only be made when the sponsor has no headquarters or subsidiary in Brazil.

Paragraph3 The DDCM of a sponsor-investigator should be done through the primary sponsor.

Section II

Content and Request Format

Art. 38. The DDCM submitted to ANVISA must include the following documents:

I - Application form duly completed, according to the model available on the ANVISA website;

II - proof of payment or exemption of payment of the Health Surveillance Inspection Fee by the Tax Liability Payment Form (GRU);

III - Drug Development plan containing a description of the following topics:

a) IFA or active substance;

b) category of medication (synthetic, organic, herbal or radiopharmaceutical);

c) therapeutic class;
d) means of administration;
e) mechanism of action;
f) indications to be studied;
g) general objectives and the planned duration of clinical development; and
h) information about phases, designs, outcomes, comparators, objectives, population to be studied, hypothesis/hypotheses, estimated number of participants and statistical design for each clinical trial planned.

IV - Investigator's brochure containing a description of the following topics:
a) experimental drug;
b) formulation;
c) pharmacological and toxicological effects of the experimental drug in animals and in humans, where applicable;
d) information on safety and efficacy in humans obtained from clinical trials that have already been carried out; and
e) possible risks and adverse events related to experimental medications, based on past experience, as well as precautions or special procedures to be followed during development.

V – a summary of the safety aspects based on previous experience in humans with the experimental drug (for example, expanded access programs and compassionate use) as well as post-marketing experience in other countries, if applicable;

VI- information regarding the discontinuation of development or withdrawal of the experimental drug market of any country, for security reasons or lack of efficacy, if applicable. Those countries with discontinuation of access should be identified, as well as the reasons for interruption/withdrawal of the product;

VII - Experimental Drug dossier containing the following documents:
a) description of the AFI or active substance, including:
1. Physical and chemical characteristics, organoleptic and biological;
2. name and address of the manufacturer;
3. general method of obtaining;
4. validated analytical methodology and acceptable ranges to assure identity, quality and purity; and
5. Results of stability studies.
b) description of the experimental drug, including:
1. list of all active and inactive components with their respective functions, including those not present in the finished product;
2. quantitative composition;
3. General description of the manufacturing process and packaging with information about the capacity of the equipment;
4. the analytical methodology and the acceptable limits as to ensure the identity; and
5. Results of stability studies showing that the use of the investigational product in planned clinical trials.
c) description of the placebo, where applicable, including:
1. composition;
2. organoleptic characteristics;
3. manufacturing process; and
4. analytical controls.
d) description of comparator medicine when it is modified to perform the clinical trial, including information that ensures the maintenance of the original characteristics of the product;
e) documentation referring to the transmissibility of the Transmissible Spongiform Encephalopathies (TSE), in accordance with current health conditions or justifications for the absence of this document;

f) model(s) for label of product(s) under investigation;

g) critical analysis of non-clinical pharmacological and toxicological studies to ensure safety in performance of the proposed clinical development and information about location conducting these studies, as well as where records are available for inspection, including a statement that each study was conducted according to GLP compliance or justification for the absence. Description of the risks known about the experimental drug based on toxicological studies in animal models or in vitro tests, already conducted, or studied therapeutic class; risk/benefit related to the development plan;

h) critical analysis of already realized clinical trials, if applicable, including the basis for efficacy and safety. Description of already known risks about the experimental drug based on clinical trials already carried out or studied therapeutic class, evaluation of risk/benefit related to the development plan;

i) in the case of the experimental drug already on record in Brazil, only the information that supports the post-registration proposed changes must be submitted in the DDCM;

j) in the cases for in which the investigator-sponsor wishes to conduct a clinical trial with a drug that already has a DDCM approved by ANVISA, it may use the information already submitted by the holder of the initial DDCM, if agreed, without the need to resubmit all documentation. When authorization of the original holder is not presented, the investigator-sponsor shall submit to ANVISA all information through updated and indexed literature that supports the rational of the proposed development;

VIII - Specific dossier for each clinical trial to be held in Brazil. These files must be filed as individual processes for each clinical trial. Each process should be linked to DDCM and submitted by the sponsor or CRO. The file should consist of the following documents:

a) clinical trial application form duly completed, available on the website of ANVISA;

b) proof of payment or exemption, the Health Surveillance Inspection Fee by the Tax Liability Payment Form (GRU);

c) clinical trial protocol in accordance with GCP;

d) registration confirmation of the clinical trial in the data base of the International Clinical Trials Registration Platform/World Health Organization (ICTRP/WHO) or other recognized by the International Committee of Medical Journal Editors (ICMJE); and

e) Consubstantiated opinion of the Ethics in Research Committee (ERC) issued for the first clinical trial center to forward the protocol for analysis by the ERC

Art. 39. All documentation that is filed manually, including compliance requirements, must be accompanied by an electronic media copy (pdf file or word).

Paragraph1 Electronic documents should allow for text search.

Paragraph 2. The submission of electronic media applies to the adoption by ANVISA of information technology tools that allow the electronic submission of the requested documents.

Art. 40 Forms with start date and end of the trial in Brazil must be filed as a secondary petition to the corresponding clinical trial dossier process, within thirty (30) calendar days after each start and end date.

Art. 41. ANVISA may at any time request other information it judges necessary for evaluation and monitoring of clinical development.

Chapter IV

MODIFICATIONS TO THE DDCM

Art. 42. Substantial modifications to the DDCM should be filed and shall await manifestation of ANVISA prior to implementation, according to the timetable set out in Art. 36.

Sole paragraph. Modifications to the DDCM must be submitted to ANVISA in the form of secondary petition attached to the DDCM protocol to which it is linked.

Art. 43. For purposes of this Resolution, substantial changes are:

I – inclusion of clinical study protocol(s) not previously established in the initial development plan,

II – exclusion of clinical study protocol(s)

III - alterations that potentially impact quality or safety of the investigational product, active comparator or placebo.

Art. 44. Modifications to the DDCM arising from recommendations or warnings issued by health authorities should be reported before they are implemented and may be executed, regardless of prior approval of ANVISA.

Art. 45. Modifications to DDCM not considered substantial must be submitted to ANVISA as part of the Safety Update Report of the development of the experimental drug.

Chapter V

AMENDMENTS TO THE CLINICAL TRIAL PROTOCOL

Art. 46. All amendments to a clinical trial protocol must be submitted to ANVISA, identifying the part of the protocol to be modified and their justifications.

Sole paragraph. Any amendment should be implemented only after obtaining ethical approval in accordance with current legislation.

Art. 47. Substantial amendments to clinical trial protocols must be filed and must await manifestation of ANVISA prior to implementation, according to the timetable set out in Art. 36.

Paragraph1 Substantial amendments shall be submitted to ANVISA in the form of secondary petition attached to the method of its clinical trial protocol to which it is linked.

Paragraph2 The petition of substantial amendments should contain the new protocol and the Opinion of the Ethics in Research Committee (ERC) issued for the first clinical trial center to forward the protocol for analysis by the ERC.

Paragraph3 Exceptions to the provisions in the caput of the amendments are those designed to eliminate immediate hazards to the safety of trial participants. These can be implemented and reported to ANVISA immediately.

Art. 48. For purposes of this Resolution, an amendment shall be sufficient if at least one of the following criteria is met:

I- change in the clinical trial protocol which affects the safety or physical or mental integrity of the participants;

II- change in the scientific value of the clinical trial protocol.

Art. 49. Amendments to the clinical trial protocol not considered substantial must be submitted to ANVISA as part of the annual report for clinical trial protocol monitoring.

Chapter VI

SUSPENSION AND CANCELLATIONS

Art. 50. The sponsor may cancel or suspend the DDCM or clinical trial at any time, provided that the appropriate technical and scientific justification is sent, as well as a follow-up plan for clinical trial participants.

Paragraph1 After canceling a specific DDCM, no clinical trials related to it can be continued in the country (Brazil).

Paragraph2 If a DDCM or clinical trial is canceled for safety reasons, the sponsor must technically and scientifically justify the reasons for the cancellation and outline measures to minimize/mitigate risk to clinical trial participants.

Paragraph3 The suspensions and clinical trial cancellations or of the DDCM must be submitted to ANVISA in the form of secondary petition attached to the respective file.

Art. 51. The sponsor shall notify the ANVISA regarding the decision to suspend or terminate a clinical trial of DDCM. After decision for suspension or cancellation, the sponsor must notify ANVISA within fifteen (15) calendar days.

Art. 52. In the case of temporary suspension of a clinical trial or DDCM as an immediate safety measure, the sponsor must notify ANVISA within 7 (seven) calendar days from the suspension date, justifying the reasons.

Sole paragraph. The reasons, scope, interruption of treatment, and the suspension of recruitment of participants must be explained clearly in the notification of the temporary suspension.

Art. 53. Requests for reactivation of clinical trials protocols or suspended DDCMs should be sent to ANVISA, accompanied by justifications for trials to be restarted.

Sole paragraph. The clinical trial(s) and DDCM(s) will be restated only after approval by ANVISA.

Art. 54. ANVISA may, at any time, cancel or suspend the DDCM or any related clinical trial if it considers that the approval conditions are not met or if any safety or efficacy reports show significant effects on the trial participants or on the scientific validity of data, informing the sponsor of the reasons.

Chapter VII

SECURITY AND ALERTS MONITORING

Section I

The Adverse Event Monitoring

Art. 55. The sponsor should monitor all adverse events, including non-serious adverse events during the development of the experimental drug.

Art. 56. The sponsor or Independent Safety Monitoring Committee should systematically collect and evaluate aggregated data on adverse events occurring in the clinical trial, submitting the results of this assessment to ANVISA in the security update report in development of the experimental drug.

Art. 57. The sponsor should establish a monitoring plan for the detection of late-occuring adverse events, justifying the proposed period.

Sole paragraph. In the case of pregnancy, the investigator and the sponsor must accompany the mother and the child.

Subsection I

The Immediate Measures

Art. 58. In the event of a serious adverse event occurred during the clinical trial at any stage of drug development, the sponsor and the investigator should take immediate safety measures to protect trial participants against any imminent risk.

Sole paragraph. In case of serious adverse event to be notified, the following must be stated: which measures have been taken, the action plan on new events of the same

nature, location data where treatment was, together with other data requested in the report form, especially those that allow the traceability of the event and the affected participant.

Art. 59. The notification of unexpected grave adverse events, whose causality is possible, probable or definite, independent of the Investigator's Brochure submission, amendments, or early end of the trial.

Art. 60. The development of phase III clinical trial must be monitored by Safety Monitoring Independent Committees and recommendations should be reported to ANVISA by the sponsor.

Sole paragraph. In cases where there is no constitution of Independent Safety Monitoring Committees there must be justification presented.

Subsection II

Communication of Adverse Events by Investigator

Art. 61. The investigator shall report the occurrence of any adverse events to the sponsor and must provide any requested information and must express their opinion regarding the causal link between the adverse event and the product under investigation.

Sole paragraph. Adverse events or abnormalities in laboratory test results that affect the safety of participants must be reported to the sponsor according to GCP and protocol.

Art. 62. All adverse events should be treated and the affected participants monitored by the principal investigator and his/her team until reaching resolution or stabilization.

Subsection III

Adverse Events Reporting by Sponsor

Art. 63. The sponsor shall notify ANVISA, through a specific electronic form, of unexpected serious adverse events occurring in the country, in which causality is possible, probable or defined for the product under investigation.

Sole paragraph. The sponsor shall keep detailed records of adverse events reported by investigators. ANVISA may request such records at any time.

Art. 64. The sponsor should inform the researchers involved in the clinical trial about serious unexpected adverse events, in which causality is possible, probable or definite, and adopt procedures for updating of the investigator's brochure, in addition to re-evaluating the risks and benefits to participants.

Subsection IV

Deadlines

Art. 65. The investigator shall inform the sponsor of serious adverse events within 24 (twenty four) hours of the event being discovered.

Art. 66. The sponsor should ensure that all relevant information on adverse events referred to in Art. 63 that are fatal or life-threatening are documented and reported to ANVISA, through electronic form in no more than seven (7) days starting from the date of knowledge of the case by the sponsor.

Sole paragraph. The additional information on the monitoring of adverse events mentioned in the caput should be included in the application up to eight (8) calendar days from the date of notification.

Art. 67. All other adverse events that are unexpected, serious, whose causality is possible, probable or definite for the products under investigation should be reported to ANVISA within 15 (fifteen) calendar days from the date of knowledge of the case by the sponsor.

Section II

Accompanying Reports

Subsection I

Reports on Monitoring Clinical Trials Protocols

Art. 68. The sponsor should submit to ANVISA annual monitoring reports containing the following information, exclusively from Brazilian centers, in tabulated form, for each clinical trial protocol:

I- title of the clinical trial;

II- protocol code;

III- status of participants recruited for clinical trial;

IV -breakdown of the number of participants recruited by center;

V- number and description of the deviations and protocol violations by center; and

VI description of all adverse events occurring at the center during this period, identifying the trial participants with the codes used in the Case Report Form adopted in the clinical trial protocol.

Paragraph1 The Annual clinical trial protocol monitoring report should be submitted to ANVISA in the form of secondary petition attached to the respective protocol process to which it is linked.

Paragraph 2. The annual report shall be filed within sixty (60) calendar days, from the beginning of the trial date in Brazil.

Art. 69. Upon completion of the activities of a clinical trial in all participating countries, for whatever reason, the sponsor shall submit a final report to ANVISA, containing least the following information:

I- title of the clinical trial;

II protocol code;

III breakdown of the number of participants recruited removed from the clinical trial;

IV description of patients included in each statistical analysis and those who were excluded from the analysis of efficacy;

V- demographic description of participants recruited for clinical trial;

VI-statistical analysis;

VII- number and description of protocol deviations and violations;

VIII relating of all adverse events and laboratory abnormalities with causality assessment, occurring in participants;

IX -the results obtained in the measurement of outcomes for each participant in the clinical trial; and

X-rationale for the early termination of development in Brazil or elsewhere in the world, where applicable.

Paragraph 1. The end of the clinical trial protocol must be submitted to ANVISA in the form of a secondary petition attached to the respective protocol to which it is linked.

Paragraph 2. The final report must be filed within 12 (twelve) months of clinical trial end date.

Subsection II

Security Update Report for development of the investigated product

Art. 70. The sponsor must submit to ANVISA annual safety update reports on the development of the experimental drug.

Sole paragraph. The annual report must be filed within a maximum of sixty (60) calendar days starting from the DDCM approval date by ANVISA or determined date in international development.

Chapter VIII

INSPECTIONS

Section I

Inspections to verify Good Clinical Practice compliance

Art. 71. In order to ensure the protection of the rights, safety and wellbeing of participants in addition to ensuring accuracy and reliability of the data to be obtained or submitted for health registration, ANVISA may carry out GCP inspections in clinical trials centers, sponsors, CRO, laboratories and other institutions involved in the development of the experimental drug to verify level of compliance of current Brazilian legislation and compliance with GCP, and to ensure the rights and duties concerning the scientific community and the State.

Paragraph1 Inspections in GCP will follow the harmonized guidelines in the Document of the Americas, Manual of Good Clinical Practices of the International Conference on Harmonization (Document E6) and specific GCP inspection standards published by ANVISA.

Paragraph2 Depending on the outcome of the GCP review, ANVISA can determine:

I- temporary interruption of the clinical trial;

II- the definitive cancellation of the clinical trial in question;

III- the definitive cancellation of the clinical trial in all centers in Brazil; or

IV invalidation of data from the centers and clinical trials that are not in compliance with GCP.

Section II

Inspections to verify compliance of Good Practice Manufacture of Products under Investigation

Art. 72. ANVISA may carry out inspections in BMP of the experimental drug or product under investigation produced or modified by the sponsor in order to verify the chemical information, production and quality control in DDCM and to report if the drug is safe enough to administer to trial participants.

Chapter IX

IMPORTATION

Art. 73. The importation of the products under investigation for exclusive use in a clinical trial should be subject only to inspection/regulation by the sanitary authority in the location of unloading.

Sole paragraph. Exceptions are investigated products subject to special control that have, in addition to monitoring in the location of unloading, must have prior authorization of shipment by the responsible technical area at ANVISA.

Art. 74. The following documents must be submitted after the arrival of the product under investigation in the country (Brazil):

I - copy of the Special Bulletin (SB), Special Specific Communication (SSB) or Document for Importing of Product (s) under investigation by DDCM issued by the competent technical area of ANVISA in its headquarters;

II - in the case of imports made by a body other than the holder of DDCM, a copy of the document of delegation of responsibilities for importation must be submitted;

III – term of responsibility for imports intended for clinical research provisions in health regulation of goods and imported products;

IV - embedded copy cargo knowledge; and

V – copy of commercial invoice.

Art. 75. The competent health authority for the product under investigation being unloaded will verify compliance with the packaging instructions, transport and storage, according to specific information in the SB, SSB, or Document for Importing Product(s) under the DDCM, subsidiary alternative to those provided by the manufacturer or sponsor.

Sole paragraph. The external or shipping containers used for shipping the products referred to in this Chapter shall include:

a) SB number, SSB number or Document for Importing Product (s) under investigation by the Drug Clinical Development Dossier (DDCM) to which the investigational product is subject;

b) amount of imported material;

c) information on special care for storage, such as temperature, humidity and light;

d) information on physical form or pharmaceutical form referring to the presentation of the product;

e) information on the validity of the product and, where applicable, the medical device; and

f) lot number or serial number.

Art. 76. The qualitative information and specifications of the products under investigation for use in clinical trials will be reported in the Special Bulletin (SB), the Specific Special Bulletin (SSB) and in the Document for Importing Product (s) under investigation in the DDCM.

Sole paragraph. In case of change of purpose of products investigated and its specifications informed the SB, SSB or in the Document for Importing Product(s) under investigation by the Drug Clinical Development Dossier (DDCM), this must be reported to the competent technical area of ANVISA at its headquarters. SB, SSB or Document for Importing Product (s) under investigation in the DDCM date must be presented at clearance site.

Art. 77. The entry of a products into the country for products under investigation that are not in accordance with the SB, SSB or Document for Importing Product (s) under investigation by the DDCM for the purpose of clinical trials regulated by this resolution is strictly prohibited.

Sole paragraph. Any change in purpose of imported goods and products mentioned in this resolution is strictly prohibited.

Chapter X

TRANSITORY PROVISIONS

Art. 78. The approval processes for clinical trials protocolled/filed at ANVISA that predate the publication of this resolution and are still awaiting technical analysis will be assessed in accordance with the resolutions in force at the time of protocol submission.

Paragraph1 Petitions that are awaiting analysis and are within the scope of 90 (ninety) days as provided by Art. 36 of this Resolution, may commence clinical trials after the deadline contained in that referred to article and after the relevant ethical approvals.

Paragraph2 For the cases referred to in Paragraph1, will be issued a SSB will be issued for the purposes of import or export, according to the current resolution at the time of the submission protocol at ANVISA.

Paragraph3 The time frame established by Paragraph 3 of Art. 36 does not apply to consent for those awaiting technical analysis and is found in the caput of this article.

Art. 79. In filing a DDCM, the holder shall link all approval processes for consent in clinical trials related to experimental drug trials they have already been submitted for assessment by ANVISA at some moment.

Art. 80. The approval processes for clinical trials already approved by ANVISA must comply with the current resolution at the time of its approval, so that the process is inserted in a DDCM, if applicable.

Chapter XI

FINAL PROVISIONS

Art. 81 ANVISA publishes guides and manuals to assist in the following specific procedures related to this Resolution.

Art. 82. Failure to comply with the provisions of this Resolution is considered a health violation, with the offender subject to penalty as provided by Law No. 6437 of August 20, 1977.

Art. 83 Omissions will be resolved in consideration of other national and international guideline standards.

Art. 84 The following are hereby repealed Resolution - RDC No. 39, of 5 June 2008 Resolution - RDC No. 36 of June 27, 2012 and items 1 and 1.1. Section I of Chapter XXVI Resolution—RDCN No. 81, of November 5, 2008.

Art. 85. This Resolution shall enter into force on the date of its publication.

JAIME CÉSAR DE MOURA OLIVEIRA

REPUBLICA DE COLOMBIA

MINISTERIO DE SALUD

RESOLUCION NUMERO 8430 DE 1993

(Octubre 4)

Por la cual se establecen las normas científicas, técnicas y administrativas para la investigación en salud.

EL MINISTRO DE SALUD

En ejercicio de sus atribuciones legales en especial las conferidas por el Decreto 2164 DE 1992 y la Ley **10** de 1990

CONSIDERANDO

- Que el artículo **8**o de la Ley 10 de 1990, por la cual se organiza el Sistema Nacional de Salud y se dictan otras disposiciones, determina que corresponde al Ministerio de Salud formular las políticas y dictar todas las normas científico- administrativas, de obligatorio cumplimiento por las entidades que integran el Sistema,

- Que el artículo 2o del Decreto 2164 de 1992, por el cual se reestructura el Ministerio de Salud y se determinan las funciones de sus dependencias, establece que éste formulará las normas científicas y administrativas pertinentes que orienten los recursos y acciones del Sistema,

RESUELVE:

TITULO 1.
DISPOSICIONES GENERALES.

ARTICULO 1. Las disposiciones de estas normas científicas tienen por objeto establecer los requisitos para el desarrollo de la actividad investigativa en salud.

ARTICULO 2. Las instituciones que vayan a realizar investigación en humanos, deberán tener un Comité de Etica en Investigación, encargado de resolver todos los asuntos relacionados con el tema.

ARTICULO 3. Las instituciones, a que se refiere el artículo anterior, en razón a sus reglamentos y políticas internas, elaborarán su manual interno de procedimientos con el objeto de apoyar la aplicación de estas normas

ARTICULO 4. La investigación para la salud comprende el desarrollo de acciones que contribuyan:

a. Al conocimiento de los procesos biológicos y sicológicos en los seres humanos.

b. Al conocimiento de los vínculos entre las causas de enfermedad, la práctica médica y la estructura social.

c. A la prevención y control de los problemas de salud.

d. Al conocimiento y evaluación de los efectos nocivos del ambiente en la salud.

e. Al estudio de las técnicas y métodos que se recomienden o empleen para la prestación de servicios de salud.

f. A la producción de insumos para la salud.

TITULO II.
DE LA INVESTIGACION EN SERES HUMANOS.

CAPITULO 1.
DE LOS ASPECTOS ETICOS DE LA INVESTIGACION EN SERES HUMANOS.

ARTICULO 5. En toda investigación en la que el ser humano sea sujeto de estudio, deberá prevalecer el criterio del respeto a su dignidad y la protección de sus derechos y su bienestar.

ARTICULO 6. La investigación que se realice en seres humanos se deberá desarrollar conforme a los siguientes criterios:

a. Se ajustará a los principios científicos y éticos que la justifiquen.

b. Se fundamentará en la experimentación previa realizada en animales, en laboratorios o en otros hechos científicos.

c. Se realizará solo cuando el conocimiento que se pretende producir no pueda obtenerse por otro medio idóneo.

d. Deberá prevalecer la seguridad de los beneficiarios y expresar claramente los riesgos (mínimos), los cuales no deben, en ningún momento, contradecir el artículo 11 de esta resolución.

e. Contará con el Consentimiento Informado y por escrito del sujeto de investigación o su representante legal con las excepciones dispuestas en la presente resolución.

f. Deberá ser realizada por profesionales con conocimiento y experiencia para cuidar la integridad del ser humano bajo la responsabilidad de una entidad de salud, supervisada por las las autoridades de salud, siempre y cuando cuenten con los recursos humanos y materiales necesarios que garanticen el bienestar del sujeto de investigación.

g. Se llevará a cabo cuando se obtenga la autorización: del representante legal de la institución investigadora y de la institución donde se realice la investigación; el Consentimiento Informado de los participantes; y la aprobación del proyecto por parte del Comité de Etica en Investigación de la institución.

ARTICULO 7. Cuando el diseño experimental de una investigación que se realice en seres humanos incluya varios grupos, se usarán métodos aleatorios de selección, para obtener una asignación imparcial de los participantes en cada grupo, y demás normas técnicas determinadas para este tipo de investigación, y se tomarán las medidas pertinentes para evitar cualquier riesgo o daño a los sujetos de investigación.

ARTICULO 8. En las investigaciones en seres humanos se protegerá la privacidad del individuo, sujeto de investigación, identificándolo solo cuando los resultados lo requieran y éste lo autorice.

ARTICULO 9. Se considera como riesgo de la investigación la probabilidad de que el sujeto de investigación sufra algún daño como consecuencia inmediata o tardía del estudio.

ARTICULO 10. El grupo de investigadores o el investigador principal deberán identificar el tipo o tipos de riesgo a que estarán expuestos los sujetos de investigación.

ARTICULO 11. Para efectos de este reglamento las investigaciones se clasifican en las siguientes categorías:

a. Investigación sin riesgo: Son estudios que emplean técnicas y métodos de investigación documental restrospectivos y aquellos en los que no se realiza ninguna intervención o modificación intencionada de las variables biológicas, fisiológicas, sicológicas o sociales de los individuos que participan en el estudio, entre los que se consideran: revisión de historias clínicas, entrevistas, cuestionarios y otros en los que no se le identifique ni se traten aspectos sensitivos de su conducta

b. Investigación con riesgo mínimo: Son estudios prospectivos que emplean el registro de datos a través de procedimientos comunes consistentes en: exámenes físicos o sicológicos de diagnóstico o tratamientos rutinarios, entre los que se consideran: pesar al sujeto, electrocardiogramas, pruebas de agudeza auditiva, termografías, colección de excretas y secreciones externas, obtención de placenta durante el parto, recolección de líquido amniótico al romperse las membranas, obtención de saliva, dientes deciduales y dientes permanentes extraidos por indicación terapéutica, placa dental y cálculos removidos por procedimientos profilácticos no invasores, corte de pelo y uñas sin causar desfiguración, extracción de sangre por punción venosa en adultos en buen estado de salud, con frecuencia máxima de dos veces a la semana y volúmen máximo de 450 ml en dos meses excepto durante el embarazo, ejercicio moderado en voluntarios sanos, pruebas sicológicas a grupos o individuos en los que no se manipulará la conducta del sujeto, investigación con medicamentos de uso común, amplio márgen terapéutico y registrados en este Ministerio o su autoridad delegada, empleando las indicaciones, dósis y vías de administración establecidas y que no sean los medicamentos que se definen en el artículo **55** de esta resolución.

c. Investigaciones con riesgo mayor que el mínimo: Son aquellas en que las probabilidades de afectar al sujeto son significativas, entre las que se consideran: estudios radiológicos y con microondas, estudios con los medicamentos y modalidades que se definen en los títulos III y IV de esta resolución, ensayos con nuevos dispositivos, estudios que incluyen procedimientos quirúrgicos, extracción de sangre mayor al 2% del volumen circulante en neonatos, amniocentesis y otras técnicas invasoras o procedimientos mayores, los que empleen métodos aleatorios de asignación a esquemas terapéuticos y los que tengan control con placebos, entre otros.

ARTICULO 12. El investigador principal suspenderá la investigación de inmediato, al advertir algún riesgo o daño para la salud del sujeto en quien se realice la investigación. Así mismo, será suspendida de inmediato para aquellos sujetos de investigación que así lo manifiesten.

ARTICULO 13. Es responsabilidad de la institución investigadora o patrocinadora, proporcionar atención médica al sujeto que sufra algún daño, si estuviere relacionado directamente con la investigación, sin perjuicio de la indemnización que legalmente le corresponda.

ARTICULO 14. Se entiende por Consentimiento Informado el acuerdo por escrito, mediante el cual el sujeto de investigación o en su caso, su representante legal, autoriza su participación en la investigación, con pleno conocimiento de la naturaleza de los procedimientos, beneficios y riesgos a que se someterá, con la capacidad de libre elección y sin coacción alguna.

ARTICULO 15. El Consentimiento Informado deberá presentar la siguiente, información, la cual será explicada, en forma completa y clara al sujeto de investigación o, en su defecto, a su representante legal, en tal forma que puedan comprenderla.

a. La justificación y los objetivos de la investigación.

b. Los procedimientos que vayan a usarse y su propósito incluyendo la identificación de aquellos que son experimentales.

c. Las molestias o los riesgos esperados.

d. Los beneficios que puedan obtenerse.

e. Los procedimientos alternativos que pudieran ser ventajosos para el sujeto.

f. La garantía de recibir respuesta a cualquier pregunta y aclaración a cualquier duda acerca de los procedimientos, riesgos, beneficios y otros asuntos relacionados con la investigación y el tratamiento del sujeto.

g. La libertad de retirar su consentimiento en cualquier momento y dejar de participar en el estudio sin que por ello se creen perjuicios para continuar su cuidado y tratamiento.

h. La seguridad que no se identificará al sujeto y que se mantendrá la confidencialidad de la información relacionada con su privacidad.

i. El compromiso de proporcionarle información actualizada obtenida durante el estudio, aunque ésta pudiera afectar la voluntad del sujeto para continuar participando.

j. La disponibilidad de tratamiento médico y la indemnización a que legalmente tendría derecho, por parte de la institución responsable de la investigación, en el caso de daños que le afecten directamente, causados por la investigación.

k. En caso de que existan gastos adicionales, éstos serán cubiertos por el presupuesto de la investigación o de la institución responsable de la misma.

ARTICULO 16. El Consentimiento Informado, del sujeto pasivo de la investigación, para que sea válido, deberá cumplir con los siguientes requisitos:

a) Será elaborado por el investigador principal, con la información señalada en el artículo **15** de ésta resolución.

b) Será revisado por el Comitéde Etica en Investigación de la institución donde se realizará la investigación.

c) Indicará los nombres y direcciones de dos testigos y la relación que éstos tengan con el sujeto de investigación.

d) Deberá ser firmado por dos testigos y por el sujeto de innvestigación o su representante legal, en su defecto. Si el sujeto de investigación no supiere firmar imprimirá su huella digital y a su nombre firmará otra persona que él designe.

e) Se elaborará en duplicado quedando un ejemplar en poder del sujeto de investigación o su representante legal.

PARAGRAFO PRIMERO. En el caso de investigaciones con riesgo mínimo, el Comité de Etica en Investigación de la institución investigadora, por razones justificadas, podrá autorizar que el Consentimiento Informado se obtenga sin formularse por escrito y

tratándose de investigaciones sin riesgo, podrá dispensar al investigador de la obtención del mismo.

PARAGRAFO SEGUNDO. Si existiera algún tipo de dependencia, ascendencia o subordinación del sujeto de investigación hacia el investigador que le impida otorgar libremente su consentimiento, éste deberá ser obtenido por otro miembro del equipo de investigación,o de la institución donde se realizará la investigación, completamente independiente de la relación investigador-sujeto.

PARAGRAFO TERCERO. Cuando sea necesario determinar la capacidad mental de un individuo para otorgar su consentimiento, el investigador principal deberá acudir a un neurólogo, siquiatra o sicólogo para que evalúe la capacidad de entendimiento, razonamiento y lógica del sujeto, de acuerdo con los parámetros aprobados por el Comité de Etica en Investigación de la institución investigadora.

PARAGRAFO CUARTO. Cuando se presuma que la capacidad mental de un sujeto hubiere variado en el tiempo, el Consentimiento Informado de éste o, en su defecto, de su representante legal, deberá ser avalado por un profesional (neurólogo, siquiatra, sicólogo) de reconocida capacidad científica y moral en el campo específico, así como de un observador que no tenga relación con la investigación, para asegurar la idoneidad del mecanismo de obtención del consentimiento, así como su validez durante el curso de la investigación.

PARAGRAFO QUINTO. Cuando el sujeto de investigación sea un enfermo siquiátrico internado en una institución, además de cumplir con lo señalado en los artículos anteriores, será necesario obtener la aprobación previa de la autoridad que conozca del caso.

CAPITULO II.
DE LA INVESTIGACION EN COMUNIDADES.

ARTICULO 17. Las investigaciones, referidas a la salud humana, en comunidades, serán admisibles cuando el beneficio esperado para éstas sea razonablemente asegurado y cuando los estudios anteriores efectuados en pequeña escala determinen la ausencia de riesgos.

ARTICULO 18. En las investigaciones en comunidades,el investigador principal deberá obtener la aprobación de las autoridades de salud y de otras autoridades civiles de la comunidad a estudiar, además de obtener la carta de Consentimiento Informado de los individuos que se incluyan en el estudio, dándoles a conocer la información a que se refieren los artículos **14**, **15** y **16** de esta resolución.

ARTICULO 19. Cuando los individuos que conforman la comunidad no tengan la capacidad para comprender las implicaciones de participar en una investigación, el Comité de Etica en Investigación de la entidad a la que pertenece el investigador principal, o de la Entidad en donde se realizará la investigación, podrá autorizar o no que el Consentimiento Informado de los sujetos sea obtenido a través de una persona confiable con autoridad moral sobre la comunidad.

En caso de no obtener autorización por parte del Comité de Etica en Investigación, la Investigación no se realizará.

Por otra parte, la participación de los individuos será enteramente voluntaria.

ARTICULO 20. Las investigaciones experimentales en comunidades solo podrán ser realizadas por establecimientos que cuenten con Comités de Etica en Investigación y la autorización previa de este Ministerio para llevarla a cabo, sin perjuicio de las

atribuciones que corresponden a otras dependencias del Estado, y hubieren cumplido en todo caso con los estudios previos de toxicidad y demás pruebas de acuerdo con las características de los productos y el riesgo que impliquen para la salud humana.

ARTICULO 21. En todas las investigaciones en comunidad, los diseños de investigación deberán ofrecer las medidas prácticas de protección de los individuos y asegurar la obtención de resultados válidos acordes con los lineamientos establecidos para el desarrollo de dichos modelos.

ARTICULO 22. En cualquier investigación comunitaria, las consideraciones éticas aplicables a investigación en humanos, deberán ser extrapoladas al contexto comunal en los aspectos pertinentes.

CAPITULO III.
DE LAS INVESTIGACIONES EN MENORES DE EDAD O DISCAPACITADOS.

ARTICULO 23. Además de las disposiciones generales de ética que deben cumplirse en toda investigación en seres humanos, aquella que se realice en menores de edad o en discapacitados físicos y mentales, deberá satisfacer plenamente todas las exigencias que se establecen en este capítulo.

ARTICULO 24. Cuando se pretenda realizar investigaciones en menores de edad, se deberá asegurar que previamente se hayan hecho estudios semejantes en personas mayores de edad y en animales inmaduros; excepto cuando se trate de estudios de condiciones que son propias de la etapa neonatal o padecimientos específicos de ciertas edades.

ARTICULO 25. Para la realización de investigaciones en menores o en discapacitados físicos y mentalesdeberá, en todo caso, obtenerse, además del Consentimiento Informado de quienes ejerzan la patria potestad o la representación legal del menor o del discapacitado de que se trate, certificación de un neurólogo, siquiatra o sicólogo, sobre la capacidad de entendimiento, razonamiento y lógica del sujeto.

ARTICULO 26. Cuando la capacidad mental y el estado sicológico del menor o del discapacitado lo permitan, deberá obtenerse, además, su aceptación para ser sujeto de investigación después de explicarle lo que se pretende hacer. El Comité de Etica en Investigación de la respectiva entidad de salud deberá velar por el cumplimiento de éstos requisitos.

ARTICULO 27. Las investigaciones clasificadas con riesgo y con probabilidades de beneficio directo para el menor o el discapacitado, serán admisibles cuando:

a) El riesgo se justifique por la importancia del beneficio que recibirá el menor o el discapacitado.

b) El beneficio sea igual o mayor a otras alternativas ya establecidas para su diagnóstico y tratamiento.

ARTICULO 28. Las investigaciones clasificadas como de riesgo y sin beneficio directo al menor o al discapacitado, serán admisibles de acuerdo con las siguientes consideraciones:

PARAGRAFO PRIMERO. CUANDO EL RIESGO SEA MINIMO

a) La intervención o procedimiento deberá representar para el menor o el discapacitado una experiencia razonable y comparable con aquellas inherentes a su actual situación médica, psicológica, social o educacional.

b) La intervención o procedimiento deberá tener alta probabilidad de obtener resultados positivos o conocimientos generalizables sobre la condición o enfermedad del menor o del discapacitado que sean de gran importancia para comprender el trastorno o para lograr su mejoría en otros sujetos.

PARAGRAFO SEGUNDO. CUANDO EL RIESGO SEA MAYOR AL MINIMO

a) La investigación deberá tener altas probabilidades de atender, prevenir o aliviar un problema grave que afecte la salud y el bienestar de la niñez o de los discapacitados físicos o mentales.

b) El Comité de Etica en Investigación de la institución investigadora, establecerá una supervisión estricta para determinar si aumenta la magnitud de los riesgos previstos o surgen otros y suspenderá la investigación en el momento en que el riesgo pudiera afectar el bienestar biológico, psicológico o social del menor o del discapacitado.

CAPITULO IV.
DE LA INVESTIGACION EN MUJERES EN EDAD FERTIL, EMBARAZADAS, DURANTE EL TRABAJO DE PARTO, PUERPERIO, LACTANCIA Y RECIEN NACIDOS; DE LA UTILIZACION DE EMBRIONES, OBITOS Y FETOS Y DE LA FERTILIZACION ARTIFICIAL.

ARTICULO 29. En las investigaciones clasificadas como de riesgo mayor que el mínimo, que se realicen en mujeres en edadfértil, deberán cumplir con los siguientes requisitos:

a) Certificar que las mujeres no están embarazadas previamente a su aceptación como sujetos de investigación.

b) Disminuir en lo posible las probabilidades de embarazo durante el desarrollo de la investigación.

ARTICULO 30. Para realizar investigaciones en mujeres embarazadas, durante el trabajo de parto, puerperio y lactancia; en nacimientos vivos o muertos; de la utilización de embriones, óbitos o fetos; y para la fertilización artificial, se requiere obtener el Consentimiento Informado de la mujer y de su cónyuge o compañero de acuerdo a lo estipulado en los artículos **15** y **16** de éste reglamento, previa información de los riesgos posibles para el embrión, feto o recién nacido en su caso.

El Consentimiento Informado del cónyuge o compañero solo podrá dispensarse en caso de incapacidad o imposibilidad fehaciente o manifiesta para proporcionarlo; porque el compañero no se haga cargo de la mujer o, bien, cuando exista riesgo inminente para la salud o la vida de la mujer, embrión, feto o recién nacido.

ARTICULO 31. Las investigaciones que se realicen en mujeres embarazadas deberán estar precedidas de estudios realizados en mujeres no embarazadas que demuestren seguridad, a excepción de estudios específicos que requieran de dicha condición.

ARTICULO 32. Las investigaciones sin beneficio terapéutico en mujeres embarazadas cuyo objetivo sea obtener conocimientos generalizables sobre el embarazo, no deberán representar un riesgo mayor al mínimo para la mujer, el embrión o el feto.

ARTICULO 33. Las investigaciones en mujeres embarazadas que impliquen una intervención o procedimiento experimental no relacionado con el embarazo, pero con beneficio terapéutico para la mujer, como sería en casos de toxemia gravídica, diabetes, hipertensión y neoplasias, entre otros, no deberán exponer al embrión o al feto a un riesgo mayor al mínimo, excepto cuando el empleo de la intervención o procedimiento se

justifique para salvar la vida de la mujer.

ARTICULO 34. Las investigaciones en mujeres embarazadas, con beneficio terapéutico relacionado con el embarazo, se permitirán cuando:

a) Tengan por objeto mejorar la salud de la embarazada con un riesgo mínimo para el embrión o el feto.

b) Estén encaminadas a incrementar la viabilidad del feto, con un riesgo mínimo para la embarazada.

ARTICULO 35. Durante la ejecución de investigaciones en mujeres embarazadas:

a) Los investigadores no tendrán autoridad paradecidir sobre el momento, método o procedimiento empleados para terminar el embarazo, ni participación en decisiones sobre la viabilidad del feto.

b) Queda estrictamente prohibido otorgar estímulos, monetarios o de otro tipo, para interrumpir el embarazo, por el interés de la investigación o por otras razones.

ARTICULO 36. El Consentimiento Informado para investigaciones durante el trabajo de parto deberá obtenerse de acuerdo con lo estipulado en los artículos **14**, **15** y **16** de éste reglamento, antes de que aquél se inicie y señalando expresamente que éste puede ser retirado en cualquier momento del tabajo de parto.

ARTICULO 37. Las investigaciones en mujeres durante el puerperio se permitirán cuando no interfieran con la salud de la madre ni con la del recién nacido.

ARTICULO 38. Las investigaciones en mujeres durante la lactancia serán autorizadas cuando no exista riesgo para el lactante o cuando la madre decida no amamantarlo; se asegure su alimentación por otro método y se obtenga el Consentimiento Informado de acuerdo con lo estipulado en los artículos 14, 15 y 16 de ésta resolución.

ARTICULO 39. Los fetos serán sujetos de investigación solamente si las técnicas y medios utilizados proporcionan máxima seguridad para ellos y la embarazada.

ARTICULO 40. Los recién nacidos serán sujetos de investigación solamente si las técnicas y medios utilizados proporcionan máxima seguridada para ellos y la madre.

ARTICULO 41. Los recién nacidos no serán sujetos de investigación, excepto cuando ésta tenga por objeto: aumentar su probabilidad de sobrevivencia hasta la fase de viabilidad; los procedimientos no causen el cese de funciones vitales, o cuando, sin agregar ningún riesgo, se busque obtener conocimientos generalizables importantes que no puedan obtenerse de otro modo.

ARTICULO 42. Los nacimientos vivos podrán ser sujetos de investigación si se cumple con las disposiciones sobre investigación en menores, indicadas en ésta resolución.

ARTICULO 43. Las investigaciones con embriones, óbitos, fetos, nacimientos muertos, materia fecal macerada, células, tejidos y órganos extraidos de éstos, serán realizadas de acuerdo con lo dispuesto en este reglamento.

ARTICULO 44. La investigación sobre fertilización artificial solo será admisible cuando se aplique a la solución de problemas de esterilidad que no se puedan resolver de otra manera, respetándose el punto de vista moral, cultural y social de la pareja.

CAPITULO V.

DE LAS INVESTIGACIONES EN GRUPOS SUBORDINADOS.

ARTICULO 45. Se entiende por grupos subordinados los siguientes: estudiantes, trabajadores de los laboratorios y hospitales, empleados y miembros de las fuerzas armadas, internos en reclusorios o centros de readaptación social y otros grupos especiales de la población, en los que el Consentimiento Informado pueda ser influenciado por alguna autoridad.

ARTICULO 46. Cuando se realicen investigaciones en grupos subordinados, en el Comité de Etica en Investigación, deberá participar uno o más miembros de la población de estudio, capaz de representar los valores morales, culturales y sociales del grupo en cuestión y vigilar:

a) Que la participación, el rechazo de los sujetos a intervenir o retiro de su consentimiento durante el estudio, no afecte su situación escolar, laboral, militar o la relacionada con el proceso judicial al que estuvieren sujetos y las condiciones de cumplimiento de sentencia del caso.

b) Que los resultados de la investigación no sean utilizados en perjuicio de los individuos participantes.

c) Que la institución investigadora y los patrocinadores se responsabilicen del tratamiento médico de los daños ocasionados y, en su caso, de la indemnización que legalmente corresponda por las consecuencias perjudiciales de la investigación.

CAPITULO VI.
DE LA INVESTIGACION EN ORGANOS, TEJIDOS Y SUS DERIVADOS, PRODUCTOS Y CADAVERES DE SERES HUMANOS.

ARTICULO 47. La investigación a que se refiere este capítulo comprende la que incluye la utilización de órganos, tejidos y sus derivados, productos y cadáveres de seres humanos, así como el conjunto de actividades relativas a su obtención, conservación, utilización, preparación y destino final.

ARTICULO 48. Esta investigación deberá observar además del debido respeto al cadáver humano, las disposiciones aplicables del presente reglamento y demás normas relacionadas con disposición de órganos, tejidos y cadáveres de seres humanos.

TITULO III.
DE LAS INVESTIGACIONES DE NUEVOS RECURSOS PROFILACTICOS, DE DIAGNOSTICO, TERAPEUTICOS Y DE REHABILITACION.

CAPITULO I.
DISPOSICIONES GENERALES.

ARTICULO 49. Cuando se realice investigación en seres humanos, sobre nuevos recursos profilácticos, de diagnóstico, terapéuticos y de rehabilitación, o se pretenda modificar los ya conocidos, deberá observarse en lo aplicable, lo dispuesto en los artículos anteriores y satisfacer lo contemplado en este título.

ARTICULO 50. El Comité de Etica en Investigación de la entidad de salud será el encargado de estudiar y aprobar los proyectos de investigación y solicitará los siguientes documentos:

a) Proyecto de investigación que deberá contener un análisis objetivo y completo de los

riesgos involucrados, comparados con los riesgos de los métodos de diagnóstico y tratamiento establecidos y la expectativa de las condiciones de vida con y sin el procedimiento o tratamiento propuesto y demás información pertinente a una propuesta de investigación.

b) Carta del representante legal de la institución investigadora y ejecutora, cuando haya lugar, autorizando la realización de la investigación.

c) Descripción de los recursos disponibles, incluyendo áreas, equipos, y servicios auxiliares de laboratorio que se utilizarán para el desarrollo de la investigación.

d) Descripción de los recursos disponibles para el manejo de urgencias médicas.

e) Hoja de vida de los investigadores que incluya su preparación académica, su experiencia y su producción científica en el área de la investigación propuesta.

f) Los requisitos señalados en los artículos **57** y **61** de esta resolución, según el caso.

ARTICULO 51. Cuando exista patrocinio u otras formas de remuneración, deberán establecerse las medidas necesarias para evitar que estos originen conflictos de interés al investigador en la protección de los derechos de los sujetos de investigación, aunque hayan dado su consentimiento en la preservación de la veracidad de los resultados y en la asignación de los recursos.

ARTICULO 52. En el desarrollo de las investigaciones contempladas en éste título deberán cumplirse las siguientes obligaciones:

a) El investigador principal informará al Comité de Etica en Investigación de la institución investigadora o de la institución ejecutora, de todo efecto adverso probable o directamente relacionado con la investigación.

b) El director de la institución investigadora notificará al Comité de Etica en Investigación, cuando así se requiera, de la presencia de cualquier efecto adverso, dentro de un plazo máximo de 15 días hábiles siguientes a su presentación.

c) El Comité de Etica en Investigación deberá suspender o cancelar la investigación ante la presencia de cualquier efecto adverso que sea impedimento desde el punto de vista ético o técnico para continuar con el estudio.

d) d.La institución investigadora rendirá al Comité de Etica en Investigación y al Ministerio de Salud, cuando así se requiera, un informe dentro de los quince (15) días hábiles siguientes a la suspensión de la investigación, que especifique el efecto advertido, las medidas adoptadas y las secuelas producidas.

CAPITULO II.
DE LA INVESTIGACION FARMACOLOGICA.

ARTICULO 53. Para efectos de este reglamento, se entiende por investigación farmacológica a las actividades científicas tendientes al estudio de medicamentos y productos biológicos para uso humano sobre los cuales no se tenga experiencia previa en el país, que no estén contemplados en las Normas Farmacológicas en este Ministerio y por lo tanto, no sean distribuidos en forma comercial, así como los medicamentos registrados y aprobados para su venta, cuando se investigue su uso con modalidades, indicaciones, dosis o vías de administración diferentes a las establecidas, incluyendo su empleo en combinaciones.

ARTICULO 54. Las investigaciones de medicamentos en farmacología clínica comprende

la secuencia de estudios que se llevan a cabo desde que se administra por primera vez al ser humano, hasta que se obtienen datos sobre su eficacia y seguridad terapéutica en grandes grupos de población. Para tal efecto, se consideran las siguientes fases:

a. FASE I: Es la administración por primera vez de un medicamento de investigación al ser humano sano, en dosis únicas o múltiples, en pequeños grupos hospitalizados, para establecer parámetros farmacológicos iniciales en el hombre.

b. FASE II: Es la administración, al ser humano enfermo, de un medicamento de investigación, en dosis únicas o múltiples, en grupos pequeños hospitalizados, para establecer parámetros farmacológicos en el organismo enfermo.

c. FASE III. Es la administración, a grandes grupos de pacientes, de un medicamento de investigación, generalmente externos, para definir su utilidad terapéutica e identificar reacciones adversas, interacciones y factores externos, que puedan alterar el efecto farmacológico.

d. FASE IV: Son estudios que se realizan después de que se conceda al medicamento, registro sanitario para su venta y tiene por objeto generar nueva información sobre la seguridad del medicamento durante su empleo generalizado y prolongado.

ARTICULO 55. Todas las investigaciones en farmacología clínica que se realicen, deberán estar precedidas por estudios preclínicos completos que incluyan características fisicoquímicas actividad farmacológica, toxicidad, farmacocinética, absorción, distribución, metabolismo y excreción del medicamento en diferentes especies animales; frecuencias, vías de administración y duración de las dosis estudiadas que puedan servir como base para la seguridad de su administración en el ser humano; también se requieren estudios sobre mutagénesis, teratogénesis y carcinogénesis.

ARTICULO 56. Los estudios de toxicología preclínica requeridos para cada fármaco estarán en función de éste en particular, de la toxicología potencial conocida de otros con estructura química similar y de la vía y tiempo de administración que se pretenda utilizar en el ser humano.

ARTICULO 57. El empleo en seres humanos de medicamentos de investigación durante su valoración a través de las Fases I a IV de investigación farmacológica clínica, se hará con la autorización del Comité de Etica en Investigación, al cual se deberá presentar la documentación que indica el artículo **50** de éste reglamento, además de la siguiente:

a) La información farmacológica básica y preclínica del medicamento.

b) La información previamente obtenida sobre farmacología clínica en casos de las fases II, III y IV y pruebas de biodisponibilidad cuando se requieran.

ARTICULO 58. Los estudios de farmacología clínica Fase I, de medicamentos nuevos antineoplásicos y de otros con índice terapéutico muy reducido, serán permitidos cuando:

a) Estén fundamentados en estudios preclínicos que demuestren la actividad farmacológica del medicamento e indique con claridad las características de su toxicidad.

b) Se realicen solamente en sujetos voluntarios con la enfermedad específica, confirmada por medios de diagnóstico adicionales, que no hayan presentado respuesta terapéutica a ningún otro tratamiento disponible y en quienes el medicamento nuevo pudiera ofrecer un beneficio terapéutico.

c) No ocasione gastos al paciente.

ARTICULO 59. En el tratamiento de urgencias, en condiciones que amenacen la vida de

una persona cuando se considera necesario usar un medicamento de investigación o un medicamento conocido empleando indicaciones, dosis y vías de administración diferentes de las establecidas, el médico deberá obtener el dictamen favorable del Comité de Etica en Investigaciones de las instituciones investigadoras y el Consentimiento Informado del sujeto de investigación o de su representante legal, según lo permitan las circustancias de acuerdo con las siguientes bases:

a) El Comité de Etica en Investigación será informado del empleo del medicamento en investigación de manera anticipada, si el investigador puede preveer la necesidad de su uso en casos de urgencia, o en forma retrospectiva, si el uso del medicamento, la indicación, dosis o vías de administración nuevas surgieran como necesidades no previstas. En ambos casos el Comité de Etica en Investigación emitirá dictamen en favor o en contra de aprobar el uso planeado o la repetición del uso no previsto del medicamento.

b) El Consentimiento Informado será obtenido del sujeto de investigación, o en su defecto, del representante legal o del familiar más cercano en vínculo, excepto cuando: la condición del sujeto le incapacite o impida otorgarlo, el representante legal o el familiar no estén disponibles o cuando el dejar de usar el medicamento en investigación represente un riesgo absoluto de muerte.

CAPITULO III.
DE LA INVESTIGACION DE OTROS NUEVOS RECURSOS.

ARTICULO 60. Para los efectos de éste reglamento, se entiende por investigación de otros nuevos recursos o modalidades diferentes de las establecidas, las actividades científicas tendientes al estudio de materiales, injertos, trasplantes, prótesis, procedimientos físicos, químicos y quirúrgicos, instrumentos, aparatos, órganos artificiales y otros métodos de prevención, diagnóstico, tratamiento y rehabilitación que se realicen en seres humanos o en sus productos biológicos, excepto los farmacológicos.

ARTICULO 61. Toda investigación a la que se refiere este capítulo deberá contar con la autorización del Comité de Etica en Investigación. Al efecto, las instituciones investigadoras deberán presentar la documentación que se indica en el artículo **50** de esta resolución, además de lo siguiente:

a) Los fundamentos científicos, información sobre experimentación previa realizada en animales o en laboratorio.

b) Estudios previos de investigación clínica cuando los hubiere.

ARTICULO 62. Todas las investigaciones sobre injertos y trasplantes deberán observar,además de las disposiciones aplicables de éste reglamento, lo estipulado en materia de control sanitario de la disposición de órganos, tejidos y cadáveres de seres humanos.

TITULO IV.
DE LA BIOSEGURIDAD DE LAS INVESTIGACIONES.

CAPITULO I.
DE LA INVESTIGACION CON MICROORGANISMOS PATOGENOS O MATERIALBIOLOGICO QUE PUEDA CONTENERLOS.

ARTICULO 63. Las instituciones investigadoras en las que se realice investigación con microorganismos patógenos o material biológico que pueda contenerlos deberá:

a) Contar con las instalaciones y equipo de laboratorio de acuerdo con las normas técnicas, que al efecto emita este Ministerio, que garanticen el manejo seguro de tales gérmenes.

b) Elaborar un manual de procedimientos para los laboratorios de microbiología y ponerlo a disposición del personal profesional, técnico, de servicios y de mantenimiento.

c) Adiestrar al personal sobre la manipulación, transporte, utilización, descontaminación y eliminación de desechos.

d) Determinar la necesidad de vigilancia médica del personal que participa en las investigaciones y en su caso, implementarla.

e) Establecer un programa de supervisión y seguimiento de seguridad en los laboratorios de microbiología.

f) Disponer de bibliografía actualizada y un archivo sobre la seguridad de los equipos, la disponibilidad de sistemas de contención, normas y reglamentos, riesgos involucrados y otros aspectos relacionados.

g) Cumplir con las demás disposiciones que determine este Ministerio.

ARTICULO 64. En las instituciones de investigación mencionadas en el artículo anterior, los laboratorios de microbiología cumplirán con los requisitos que señalen las normas técnicas que dicte este Ministerio y se clasificarán en tres tipos así:

a) Laboratorio básico de microbiología.

b) Laboratorio de seguridad microbiológica.

c) Laboratorio de máxima seguridad microbiológica.

ARTICULO 65. El manual de procedimientos al que se refiere el literal b del artículo **63** de ésta reglamentación,describirá los siguientes aspectos:

a) Prácticas de laboratorio.

b) Seguridad personal de los empleados.

c) Manejo y mantenimiento de las instalaciones y equipos.

d) Situaciones de urgencia.

e) Restricciones de entrada y tránsito.

f) Recepción y trasporte de materiales biológicos.

g) Disposición de desechos.

h) Descontaminación.

i) Las demás que se consideren necesarias para lograr la seguridad microbiológica.

ARTICULO 66. El investigador principal de acuerdo con el Comité de Etica Hospitalaria, o el Comité de Etica en Investigación, y el representante legal de la institución investigadora, determinarán conforme a las normas técnicas existentes, el tipo de laboratorio en el que se realizarán las investigaciones propuestas; así como los

procedimientos respectivos tomando en cuenta el grado de riesgo de infección que presenten los microorganismos a utilizar.

ARTICULO 67. Para evaluar el grado de riesgo a que se refiere el artículo anterior este Ministerio emitirá la norma técnica correspondiente y clasificará los microorganismos dentro de cuatro grupos, según las siguientes criterios:

a) GRUPO DE RIESGO I: Microorganismos que representan escaso riesgo para el individuo y para la comunidad.

b) GRUPO DE RIESGO II: Microorganismos que representan riesgo moderado para el individuo y limitado para la comunidad.

c) GRUPO DE RIESGO III: Microorganismos que representan riesgo elevado para el individuo y escaso para la comunidad.

d) GRUPO DE RIESGO IV: Microorganismos que representan riesgo elevado para el individuo y para la comunidad.

ARTICULO 68. Los microorganismos que se clasifiquen en los grupos de riesgo I y II deberán manejarse en laboratorios de tipo básico de microbiología, empleando gabinetes de seguridad cuando se considere necesario.

ARTICULO 69. Los microorganismos que se clasifiquen en el grupo de riesgo III deberán manejarse en laboratorios de seguridad microbiológica.

ARTICULO 70. Los microorganismos que se clasifiquen en el grupo de riesgo IV deberán manejarse en laboratorios de máxima seguridad microbiológica, bajo la autorización y control de las autoridades sanitarias correspondientes.

ARTICULO 71. Durante el desarrollo de las investigaciones a las que se refiere éste capítulo, el investigador principal tendrá a su cargo:

a) Determinar los riesgos reales y potenciales de las investigaciones propuestas y, en caso de que se aprueben por parte de los Comités de la institución investigadora, darlos a conocer a los demás investigadores que conformen el grupo y al personal técnico y auxiliar que participe en la investigación.

b) Determinar el nivel apropiado de contención física, seleccionar las prácticas microbiológicas idóneas y diseñar procedimientos para atender posibles accidentes durante la investigación e instruir al personal participante sobre estos aspectos.

c) Vigilar que el personal participante cumpla con los requerimientos de profilaxis médica, vacunas o pruebas serológicas.

d) Supervisar que el trasporte de materiales infecciosos se haga en forma rápida, de acuerdo con las normas técnicas emitidas por este Ministerio.

e) Informar a la Comisión de Bioseguridad sobre la ocurrencia de enfermedad entre el personal participante en la investigación que pudiera atribuirse a la inoculación transcutánea, ingestión o inhalación de materiales infecciosos, así como accidentes que causen contaminación que pueda afectar al personal o al ambiente.

f) Reportar a la Comisión de Bioseguridad las dificultades o fallas en la implantación de los procedimientos de seguridad, corregir errores de trabajo que pudieran ocasionar la liberación de material infeccioso y asegurar la integridad de las medidas de contención física.

ARTICULO 72. El Comité de Etica en Investigación de la institución investigadora deberá realizar visitas periódicas para evaluar el cumplimiento de las medidas y recomendar modificaciones a las prácticas de laboratorio, incluyendo la suspensión temporal o definitiva de las investigaciones que representen un riesgo no controlado de infección o contaminación para los trabajadores de laboratorio, la comunidad o el medio ambiente.

CAPITULO II.
DE LA INVESTIGACION QUE IMPLIQUE CONSTRUCCION Y MANEJO DEACIDOS NUCLEICOS RECOMBINANTES.

ARTICULO 73. Para los efectos de este reglamento, se entenderá por ácidos nucléicos recombinantes a las nuevas combinaciones de material genético obtenidas fuera de una célula viviente, por medio de la inserción de segmentos naturales o sintéticos de ácido desoxirribonucléico en un virus, plásmido bacteriano u otras moléculas de ácido desoxirribonucléico que sirven como sistema vector para permitir su incorporación en una célula huésped, en la que no se encuentran en forma natural, pero en las que serán capaces de replicarse. Igualmente quedan comprendidas las moléculas de ácido desoxirribonucléico que resulten de dicha replicación.

ARTICULO 74. Las investigaciones con ácidos nucléicos recombinantes deberán diseñarse de tal forma que se logre el máximo nivel de contención biológica, seleccionando los sistemas de huésped y vector idóneos, que disminuyan la probabilidad de diseminación de las moléculas recombinantes fuera del laboratorio, tomando en cuenta el orígen del material genético y las normas técnicas que emita este Ministerio.

ARTICULO 75. El investigador principal de acuerdo con: su superior jerárquico, el Comité de Etica en Investigación, la Comisión de Bioseguridad y el representante legal de la institución investigadora, determinarán conforme con las normas técnicas emitidas por este Ministerio, el tipo de laboratorio de microbiología en el que se realizarán los experimentos a que se refiere éste capítulo, tomando en cuenta el material genético que se pretende replicar.

ARTICULO 76. Se requiere autorización de este Ministerio para iniciar los siguientes tipos de experimentación:

a) Formación de ácido desoxirribonucléico recombinante derivado de los microorganismos patógenos que queden clasificados en los grupos de riesgo III y IV a que se refiere el artículo **71** de esta resolución, así como la formación de material genético recombinante derivado de las células que son infectadas por tales agentes, independientemente del sistema de huésped y vector que se use.

b) Construcción intencional de ácidos nucléicos recombinantes para inducir la biosíntesis de toxinas potentes para los vertebrados.

c) Liberación intencionada al medio ambiente de cualquier microorganismo que porte ácidos nucléicos recombinantes.

d) Transferencia de resistencia a los antibióticos de microorganismos que no lo adquieren en la naturaleza, si tal trasferencia pudiera afectar negativamente el empleo del antibiótico en medicina humana.

e) Experimentar con microorganismos o con ácidos nucléicos recombinantes en cultivos mayores de diez (10) litros debido a que su contención física y biológicas es más difícil a menos que las moléculas recombinantes se hayan caracterizado rigurosamente y se demuestre la ausencia de genes peligrosos en ellas. Quedan excluidos aquellos procesos de carácter industrial y agropecuario no relacionados directa y específicamente con las actividades establecidas en el artículo **1**o de ésta resolución.

CAPITULO III.
DE LA INVESTIGACION CON ISOTOPOS RADIACTIVOS Y DISPOSITIVOSY GENERADORES DE RADIACIONES IONIZANTES Y ELECTROMAGNETICAS.

ARTICULO 77. La investigación médica que implique el uso en seres humanos, de isótopos radioactivos y dispositivos generadores de radiaciones ionizantes y electromagnéticas deberán realizarse de acuerdo con las leyes, reglamentos y normas sobre seguridad radiológica, que rijan en el territorio nacional.

ARTICULO 78. En las instituciones donde se realicen estas investigaciones la Comisión de Bioseguridad vigilará que para cada estudio se identifique, ante el respectivo Organismo Nacional, a la persona responsable de la seguridad radiológica y física de dichas instituciones, para el cumplimiento de los requisitos y obligaciones, como encargado de la seguridad radiológica.

ARTICULO 79. La persona responsable a la que se alude en el artículo anterior deberá:

a) Tener el entrenamiento, calificación y certificación exigidos legalmente para dicha función.

b) Elaborar un manual de procedimientos acorde con las leyes, normas y reglamentos vigentes y con las características de la instalación o equipos, el cual deberá estar disponible para todo el personal, en el que se describan: la identificación y control de las fuentes de radiación, áreas controladas y vigiladas, seguimiento dosimétrico del personal, plan de emergencias, plan de gestión de desechos y capacitación del personal involucrado en procedimientos y seguridad radiológica.

c) Definir, implantar y vigilar el cumplimiento de las medidas de seguridad radiológica y física.

d) Informar al personal involucrado en la investigación acerca de dichas normas y adiestrarlo sobre los procedimientos de trabajo y las características del laboratorio y del equipo.

ARTICULO 80. Teniendo en cuenta que cada exposición involucra un riesgo, queda estrictamente prohibido exponerse indebidamente, a las radiaciones ionizantes. Los límites de Dosis Equivalente legalmente establecidos deberán considerarse como límites superiores y no de diseño o de control. Las medidas de protección contra las radiaciones ionizantes deben optimizarse, de modo que el número de personas expuestas y las Dosis Equivalente recibidas por el investigador o el paciente sometido a la investigación, sean tan bajos como sea razonablemente posible, tomando en cuenta los factores socio-económicos del medio en que se trabaja.

ARTICULO 81. En el examen o tratamiento que forme parte de un programa de investigación médica y que conlleve un beneficio neto para el paciente, la justificación del procedimiento se realizará con los mismos criterios de justificación que para una exposición médica de rutina. No obstante, dado el carácter experimental, dicha justificación se someterá a un escrutinio minucioso de manera individual, descartando otros métodos diagnósticos o terapéuticos susceptibles de evaluarse comparativamente.

ARTICULO 82. La irradiación deliberada de personal durante los procedimientos con propósitos de investigación que no persiga un beneficio directo a las personas irradiadas, se efectuará únicamente por personas adecuadamente calificadas y adiestradas, y con el permiso respectivo de la institución donde se vaya a efectuar la irradiación, bajo la asesoría del Ente Nacional responsable de la protección radiológica en armonía con las normas vigentes de vigilancia y control radiológico.

ARTICULO 83. El personal ocupacionalmente expuesto debe ser mayor de 18 años, y se tendrán en cuenta los límites de exposición ocupacional que determine la entidad nacional autorizada, con especial consideración en el caso de mujeres en edad fértil y embarazadas.

PARAGRAFO. Las mujeres embarazadas o en período de lactancia, no deberán trabajar en lugares de alto riesgo de incorporación de materiales radioactivos.

ARTICULO 84. Se debe informar a las personas, incluidas en el procedimiento, sobre el riesgo de la irradiación a que se someterán, para que su participación sea bajo su libre voluntad y con conocimiento de causa. Es necesario el Consentimiento Informado de los familiares o del responsable legal cuando el sujeto de la investigación no esté en condiciones de decidir sobre su aceptación.

ARTICULO 85. Estas investigaciones deben someterse a evaluación individual, seguida de un plan de procedimeintos y un protocolo final aprobado por la autoridad competente en la materia, que las analice exhaustivamente desde el punto de vista de la radioprotección y de la condición de verdaderos voluntarios de las personas que no van a recibir un beneficio neto del procedimiento, puesto que no se puede fijar límites de dosis especiales en estos casos.

ARTICULO 86. Se prohibe el uso de radiaciones ionizantes con carácter de investigación en mujeres embarazadas y menores de edad, y se restringe a estudios específicos previos a la investigación en mujeres en edad reproductiva.

PARAGRAFO. En los anteriores casos se podrá hacer reconsideración al tratarse de procedimientos terapéuticos en procesos patológicos considerados especiales por su pronóstico o por sus características, con la previa autorización escrita de la persona involucrada, o del familiar, o persona legalmente responsable.

TITULO V.
LA INVESTIGACION BIOMEDICA CON ANIMALES.

ARTICULO 87. En toda investigación en la que los animales sean sujeto de estudio deberán tenerse en cuenta, además de las disposiciones determinadas en la Ley 84 de 1989, las siguientes:

a) Siempre que sean apropiados, deben usarse métodos tales como modelos matemático, simulación en computador y sistemas biológicos in vitro.

b) La experimentación en animales solamente se debe realizar después de estudiar su importancia para la salud humana o animal y para el avance del conocimiento biológico.

c) Los animales seleccionados para la experimentación deben ser de una especie y calidad apropiada, y utilizar el mínimo número requerido para obtener resultados científicamente válidos.

d) Solamente se emplearán animales adquiridos legalmente y se mantendrán en condiciones adecuadas y que cumplan con las reglamentaciones sanitarias vigentes.

e) Los investigadores y demás personal nunca deben dejar de tratar a los animales como seres sensibles y deben considerar como un imperativo ético el cuidado y uso apropiado y evitar o minimizar el disconfort, la angustia y el dolor.

f) Los investigadores deben presumir, qué procedimientos que causarían dolor en seres humanos también causen dolor en otras especies vertebradas, aún cuando todavía falta

mucho por saber sobre la percepción del dolor en los animales.

g) Todo procedimiento, que pueda causar en los animales más que un dolor o una angustia momentánea o mínima, debe ser realizado con sedación, analgesia o anestesia apropiada y conforme con la práctica veterinaria aceptada. No se deben realizar procedimientos quirúrgicos o dolorosos en animales no anestesiados, paralizados por agentes químicos.

La eutanasia de los animales se efectuará con anestésicos apropiados, aprobados por la asociación veterinaria.

h) Cuando se requiera apartarse de lo establecido en el inciso anterior, la decisión no debe ser tomada solamente por el investigador directamente involucrado, sino que debe ser tomada por el Comité de Etica, establecido por la ley 84 de 1989. Estas excepciones no deben hacerse solamente con fines de demostración o enseñanza.

i) Al final del experimento, o cuando sea apropiado durante el mismo, los animales que puedan sufrir dolor crónico o severo, angustia, disconfort o invalidez que no pueda ser mitigada, deben ser sacrificados sin dolor.

j) Los animales mantenidos con propósitos biomédicos deben tenerse en las mejores condiciones de vida, de ser posible bajo la supervisión de veterinarios con experiencia en animales de laboratorio. En todo caso se debe disponer de cuidado veterinario cuando sea requerido.

k) El director del instituto, departamento o unidad donde se usen animales es el responsable de asegurar que los investigadores y demás personal tengan calificación apropiada o experiencia para realizar procedimientos en animales. Debe proporcionar oportunidades adecuadas de entrenamiento en servicio que incluya la preocupación por un trato humano y apropiado para con los animales que están bajo su cuidado.

ARTICULO 88. El uso de animales en la investigación, enseñanza y ensayos es aceptado solamente cuando promete contribuir a la comprensión y avance del conocimiento de los principios fundamentales biológicos o al desarrollo de mejores medios para la protección de la salud y el bienestar tanto del hombre como del animal.

ARTICULO 89. Los animales deben ser utilizados, en caso que el investigador haya descartado otras alternativas, para tal fin se sigue el principio de Russell Burch "3R", remplazo, reducción y refinamiento.

ARTICULO 90. Los bioterios deberán estar de acuerdo con la especie, conformación corporal, hábitos, preferencias posturales y características locomotoras de los animales, para proporcionarles comodidad, excepto cuando las variables experimentales justifiquen otras situaciones.

ARTICULO 91. Los bioterios de producción o mantenimiento crónico serán supervisados por el personal profesional calificado y competente en la materia y deberán permitir el crecimiento, maduración, reproducción y comportamiento normal de los animales, de conformidad con las normas que la propia institución emita.

ARTICULO 92. El director de la institución donde se realice investigación en animales, deberá establecer y vigilar el cumplimiento de las medidas de seguridad para el cuidado y manejo de los animales, así como las medidas de profilaxis y vacunación necesarias para la protección del personal ocupacionalmente expuesto.

ARTICULO 93. El director de la institución donde se realice investigación en animales, deberá vigilar, ordenar o ejecutar, se tengan en cuenta las siguientes medidas de seguridad, según el caso:

a) Aislamiento.

b) La cuarentena.

c) La observación personal.

d) La vacunación de personas.

e) La vacunación de animales, en cuanto esté referida a la salud humana.

f) La destrucción o control de insectos y otra fauna, transmisora y nociva, en cuanto esté referida a la salud humana.

g) La suspensión de trabajos o servicios.

h) El aseguramiento y destrucción de objetos o productos o substancias.

i) Desalojo de casas, edificios, establecimientos y en general de cualquier predio.

j) La prohibición del uso de ciertas especies, y

k) Las demás de índole sanitaria que determine este Ministerio o entidad competente de su nivel, que puedan evitar que se causen o continúen causando riesgos o daños a la salud.

ARTICULO 94. La presente resolución rige a partir de la fecha de su publicación.

PUBLIQUESE Y CUMPLASE

Dada en Santafé de Bogotá D.C. a los cuatro días del mes de octubre de mil novecientos noventa y tres.

1. OBJETIVO:

Brindar los lineamientos que debe tener en cuenta el usuario para la conformación, procedimientos, seguimiento, vigilancia e interacción de los Comités de Ética Independientes con el INVIMA.

2. ALCANCE:

El presente documento informativo está dirigido a los comités de ética y actores involucrados en la investigación con seres humanos en el territorio Nacional (IPS, EPS, Universidades, Patrocinadores, Entes territoriales, Investigadores, sujetos de investigación o cualquier entidad que quiera llevar a cabo un proyecto de investigación con medicamentos en seres humanos).

3. DEFINICIONES

Remitirse a las definiciones establecidas en la Resolución 2378 de 2008 del 27 de Junio del 2008.

4. COMITÉ DE ÉTICA

El Comité de Ética es la organización responsable de garantizar la protección de los derechos, seguridad y bienestar de los seres humanos involucrados en un estudio clínico por medio de la revisión, aprobación y seguimiento constante del proyecto de Investigación, enmiendas, consentimiento informado de los participantes del estudio, entre otros documentos relacionados.

Esta evaluación siempre debe estar enfocada hacia la integridad del participante del estudio, por encima de la factibilidad que implica la realización de un estudio de investigación en un Centro o IPS.

Por esta razón el Comité de Ética es la máxima autoridad dentro del Centro de Investigación en lo que tiene que ver con el mantenimiento de la integridad del participante de investigación.

5. PROCEDIMIENTOS DEL COMITÉ DE ÉTICA

El Comité de Ética debe tener un documento (guía, estatuto, etc.), que incluya todos los procedimientos que debe realizar en la Investigación. Estos procedimientos deben estar en constante actualización y socialización de acuerdo a los avances en materia de las Buenas Prácticas Clínicas.

Se deben definir las responsabilidades mínimas que debe cumplir un Comité de Ética, de acuerdo a la normatividad nacional vigente y apoyado en la normatividad internacional.

6. RESPONSABILIDADES

Toda investigación que se realice en seres humanos debe ser evaluada y aprobada por el Comité de Ética. El Comité debe evaluar el proyecto de investigación, las competencias del investigador y las competencias de su equipo de investigación; el formulario de consentimiento informado, la información conocida sobre el fármaco (incluidos los informes de eventos adversos inesperados y esperados) y toda publicidad potencial planificada para obtener posibles participantes, además de cualquier cambio en el protocolo por insignificante que este sea.

Los proyectos de investigación de las instituciones que no cuenten con un Comité de Ética Institucional, deberán estar aprobados por un Comité de Ética de otra institución que haya sido evaluada y certificada en el cumplimento de las Buenas Prácticas Clínicas, documento expedido por el Instituto Nacional de Vigilancia de Medicamentos y Alimentos - INVIMA.

Se deberá acoger los lineamientos nacionales e internacionales de Buenas Practicas Clínicas y el marco ético deberá basarse en los principios contemplados entre otros, en el Código de Ética de Nuremberg, la Declaración de Helsinki, el Informe Belmont y las pautas éticas internacionales para la investigación biomédica en seres humanos (CIOMS).

Todo Comité de Ética debe definir su código de conducta, su política de manejo de conflictos de interés y su funcionamiento debe ser consecuente con los mismos, de tal manera que se impida parcialidad o sesgos en los resultados del ejercicio del Comité.

A. Salvaguardar los derechos de los participantes en la investigación: El objetivo que el Comité de Ética debe tener como prioridad en la evaluación de los estudios de investigación –por encima de la factibilidad- es asegurar la protección de los derechos, la seguridad y el bienestar de los participantes.

Esto se tiene que hacer siempre que se reciba cualquier documento o cambio al proyecto de investigación. Las responsabilidades de dicho proceso recaen en primera instancia en el presidente del Comité de Ética.

B. Evaluar y aprobar o reprobar, antes de su inicio, las investigaciones propuestas: Para la evaluación y posterior aprobación o reprobación de las investigaciones propuestas, el Comité de Ética debe definir la metodología, las herramientas y los procedimientos previamente concertados para cumplir esta responsabilidad.

- **Primero:** El Comité debe establecer los criterios que tendrá en cuenta para la evaluación de los diferentes documentos que se analicen.
- **Segundo:** Definir de acuerdo a las competencias de los miembros, las funciones de los mismos respecto a la evaluación de los aspectos del proyecto.
- **Tercero:** Estandarizar procedimientos para la socialización de los resultados de la evaluación, seguimiento y vigilancia de las recomendaciones a los proyectos de Investigación, dentro de los tiempos establecidos según la normativa y las características del proyecto de investigación.
- **Cuarto:** Definir las medidas que se tomarán en caso de incumplimiento de sus decisiones.
- **Quinto:** El Comité debe precisar criterios para expresar potenciales conflictos de interés de sus integrantes, definir y registrar las medidas generadas.

C. Obtener y mantener la documentación requerida de cada estudio puesto a su consideración: El Comité de Ética debe tener un archivo de acceso restringido y con las condiciones adecuadas de seguridad y confidencialidad.

Por lo anterior es indispensable que exista una infraestructura que asegure el cumplimiento de esta responsabilidad, acatando las normas de archivo documental vigentes.

Se debe establecer el tiempo mínimo de custodia de la documentación y definirlo en el contrato que se suscriba con el centro de investigación.

Tener un personal calificado para la custodia y manejo del archivo, con estas funciones específicas.

El Comité de Ética puede tener un archivo magnético, siempre y cuando este cumpla con los criterios de seguridad y confidencialidad de la información, que no sean modificables posteriormente y que

además estén alineados con el sistema de gestión de calidad de la Institución a la que el Comité pertenezca.

D. Considerar la competencia de los investigadores: Establecer los criterios mínimos que debe cumplir el equipo investigador que va a desarrollar el proyecto de Investigación.

Estos criterios de evaluación deben tener en cuenta lo siguiente:

- La evaluación de las hojas de vida y los correspondientes soportes de todo el equipo investigador (investigador principal (IP), co-investigador o investigador secundario (IS), coordinador de estudios, personal técnico -(si lo hubiere)-, bacteriólogo y químico farmacéutico).

- Títulos profesionales (diploma con su respectiva acta de grado) y un documento que certifique que la IPS ha verificado el titulo profesional con la universidad respectiva, homologaciones de posgrados realizados en el exterior por parte de la entidad nacional competente, tarjeta profesional nacional y de la secretaria seccional de acuerdo a la profesión, certificaciones en buenas prácticas clínicas de dos años de vigencia, tipo de contratación laboral con el centro de investigación y contrato laboral que contemple las funciones con respecto al estudio, fotocopia de la cédula de ciudadanía actualizada o de extranjería.

- En la carta de sometimiento del Investigador Principal o Secundario al Comité de ética, se debe especificar el tiempo de dedicación al cual se compromete el investigador para realizar la investigación en el estudio y se debe nombrar el número de protocolos en los que realiza investigación, con el fin de que el Comité de Ética determine si el tiempo dedicado por parte del investigador es adecuado para realizar el estudio. Anexando los soportes respectivos de la hoja de vida. La responsabilidad de la aprobación de cada investigador (IP o IS) es del Comité de ética, por lo cual sólo se someterá al INVIMA el Investigador Principal.

- Evaluación investigadores: Las competencias del Investigador, deben ser acordes a la especialidad clínica del proyecto de investigación. Si el IP tiene la experiencia en investigación pero no cumple con la experiencia clínica asistencial relacionada con la especialidad, ésta puede ser complementada por el IS.

- Que la experiencia profesional clínica asistencial sea de un mínimo de 3 años.

- Que la experiencia en Investigación del IP, sea de un mínimo de 2 años.

- Se acepta por parte del INVIMA que un Investigador principal sea un profesional en el área de la salud especializado en un postgrado en investigación (epidemiologia, ensayista clínico, salud pública) y la experiencia mínima en la misma, siempre y cuando se encuentre apoyado por un IS con la especialidad clínica del tema del proyecto de investigación y que dentro de las funciones de este se encuentre la valoración clínica, aplicación de los criterios de inclusión, de exclusión, decisiones médicas y seguimiento clínico a los sujetos de investigación.

Equipo Investigador:

- **Coordinador de estudios:** Debe ser un profesional en el área de la salud, con experiencia en investigación, soportada en la capacitación, certificación en Buenas Prácticas Clínicas, actualizada y con vigencia de dos años.

- **Bacteriólogo:** Debe ser un profesional en bacteriología con certificación IATA (International Air Transport Association) vigente, certificación en buenas prácticas clínicas con vigencia de dos años y con tarjeta profesional vigente.

- **Químico Farmacéutico:** Debe ser un profesional en química farmacéutica, con tarjeta profesional del colegio de químicos farmacéuticos y de la secretaria seccional, con certificación en buenas prácticas clínicas con vigencia de dos años.

E. **Evaluar periódicamente el progreso de los estudios aprobados y en desarrollo:** Dentro de los procedimientos que se deben establecer se encuentra el seguimiento y evaluación periódica que debe tener el Comité de Ética definido antes de la aprobación inicial del proyecto de investigación.

7. COMPOSICIÓN

Debe ser un grupo multidisciplinario, el cual está en la capacidad de realizar un análisis profundo de los proyectos de investigación y elevar un criterio de aprobación sustentado en las competencias, profesionalismo y experiencia de sus miembros.

Todos los miembros del comité deben tener un sentido crítico de los aspectos propios del proyecto de investigación, el cual debe estar reflejado en las conclusiones que hace en cada uno de los documentos analizados.

Todos los miembros deben estar entrenados y certificados en las Buenas Prácticas Clínicas, certificación que tiene una vigencia de dos años.

A. Número de Miembros que debe tener un Comité de Ética: El número mínimo descrito en la normativa es de cinco miembros, pero es necesario contemplar los siguientes aspectos antes de definirlo.

- Debe garantizar todas las competencias mínimas necesarias para valorar un proyecto de Investigación.
- Debe estar de acuerdo al número de estudios que el Comité tenga en seguimiento, siempre garantizando que no exista alteración de su análisis por sobrecarga laboral.
- Pueden existir subcomités evaluadores que asumen algunos roles en la evaluación de los Proyectos de investigación sin poder de decisión.
- Los miembros del Comité deben disponer de un tiempo adecuado y suficiente para el análisis y la evaluación de las tareas establecidas.

B. Balance por género y edad: El balance de edad y de género debe existir entre los miembros del Comité de Ética.

C. Carácter multidisciplinario: El Comité debe tener un carácter multidisciplinario, por las características que se van a evaluar en un proyecto de investigación, pues los diferentes puntos de vista hacen del análisis una herramienta invaluable para ser lo más preciso en la decisión final de aprobación.

Es necesario que exista al menos un miembro cuya área primaria de interés sea un área no científica. Ésta es una competencia necesaria para tener un punto de vista diferente al médico o en general al personal del área de la salud.

Debe existir al menos un médico. Éste profesional debe ser una persona con la competencia y la experiencia en investigación, para la evaluación de los aspectos clínicos del Proyecto de Investigación. La evaluación clínica debe estar sustentada en la experiencia y en la medicina basada en la evidencia.

En la norma se especifica que "*debe existir al menos un miembro que sea independiente de la institución/sitio donde se llevará a cabo el estudio*". Por lo anterior se debe tener en cuenta que esta afirmación debe guardar la independencia propia del comité, evitando alguna subordinación laboral.

Adicional a las características descritas en la multidisciplinariedad del Comité, es claro que se requieren las siguientes competencias para la evaluación y seguimiento de un Proyecto de Investigación.

- Un miembro que tenga entrenamiento en bioética, para tener un criterio más preciso en la evaluación de un Proyecto de Investigación en éste aspecto.
- Un miembro que tenga entrenamiento en metodología de la investigación, para tener un criterio más preciso en la evaluación del protocolo en cuanto a sus características técnicas.
- Un miembro que tenga entrenamiento en epidemiología o alguna otra especialidad enfocada en la investigación, con experiencia en investigación clínica, revisión de tema y análisis de bases de datos; herramientas que son muy útiles en la evaluación de un proyecto de Investigación.
- Un miembro que sea de la rama del derecho, para asesorar al Comité de Ética en todos los aspectos legales que puedan surgir en la evaluación de un proyecto de investigación.
- Un miembro que sea químico farmacéutico, para asesorar en la evaluación de la parte farmacológica del proyecto de investigación y de la evaluación de los eventos adversos en lo que tiene que ver con las interacciones medicamentosas.
- Con respecto a los representantes de la comunidad, se debe garantizar que este personal también posea un criterio analítico pero siempre enfocado al punto de vista del participante de investigación y al proyecto de investigación. Seria apropiado si ha sido previamente un participante de algún estudio en investigación.

Todos los miembros anteriormente descritos, con la excepción del representante de la comunidad, pueden ser convocados bajo la figura de asesores externos o consultores y dependerá de cada comité si estos asesores externos tienen o no voz y voto.

Dentro de los miembros del Comité de Ética pueden existir investigadores de los proyectos de investigación que se evalúan u otros miembros del equipo investigador. Sin embargo, un investigador tiene la restricción para ser miembro del comité cuando:

- Es el Presidente del Comité
- Tiene conflictos de interés porque participe en el desarrollo de estudios evaluados por el Comité, o porque sus afiliaciones o relaciones impliquen parcialidad para el desarrollo de la evaluación por parte del Comité. Se debe tener en cuenta que si es el único IP o IS de la mayoría de estudios que el Comité lleva en seguimiento, no sería procedente perder un miembro del comité por impedimentos permanentes.
- Tiene algún interés desde el punto de vista laboral, personal, familiar, económico, social, religioso y/o académico con el patrocinador del estudio que este llevando a cabo el protocolo.
- No informa oportunamente si surge un conflicto de intereses en el ejercicio como miembro del Comité.

D. **Sobre la participación de consultores (cuando aplique):** La participación de los consultores externos se da por la formación específica de éstos en temas donde no se cuenta con el perfil dentro de los miembros del Comité para que realice el análisis de una propuesta de investigación que requiera de un concepto especializado en cualquier área.

Se debe asegurar la independencia de los consultores externos con relación a los patrocinadores o a cualquier otra entidad que genere conflictos de interés.

E. Requisitos y procesos para la selección de los miembros en cuanto a los siguientes aspectos: La(s) persona(s) encargadas de seleccionar los miembros del Comité debe(n) ser absolutamente independiente(s) de las personas encargadas de revisar la conveniencia y factibilidad del proyecto de investigación dentro del centro de investigación.

Por lo general, es mejor que este nombramiento sea propio del Comité de Ética y que exista un consenso general para la evaluación del nuevo miembro. Es fundamental que existan varios candidatos.

Es necesario que se definan cuales son los conflictos de interés e inhabilidades que se tendrán en cuenta para definir al candidato. A continuación se enumeran algunos de ellos:

- Hacer parte de una entidad o ser actor directo del proyecto de investigación (Patrocinador, Investigador o centro de investigación) o de cualquier otra entidad que tenga interés económico en el proyecto de investigación.
- Que se tenga un vínculo laboral, contractual, familiar o de asesoría con entidades que tengan intereses económicos en los proyectos de investigación a evaluar.

F. Condiciones del nombramiento de los miembros del comité:

- Estar de acuerdo en hacer pública alguna información personal para efectos legales.
- Tener establecidas para cada miembro, las funciones generales y las que debe cumplir durante la evaluación de cada estudio y el soporte de aceptación de las mismas.
- Estar de acuerdo en registrar y tener disponible la información referente a los pagos y reembolsos recibidos por su trabajo como miembros del Comité (si los hay).
- Firmar un acuerdo de confidencialidad por parte de cada uno de los miembros del Comité sobre todos los temas tratados en cada sesión y en la información general del Comité.
- Registrar conocimiento de política de conflicto de interés y código de conducto del Comité.

G. Términos de la membrecía: Se debe contemplar dentro de los estatutos un periodo de nombramiento, que puede ser de dos (2) años prorrogables de acuerdo a las políticas definidas dentro de cada Comité de Ética.

Se deben tener contempladas, dentro de los procedimientos del Comité, las políticas sobre la descalificación, sustitución de los miembros del Comité y renuncia, las cuales deben incluir entre otros factores: los conflictos de interés, la inhabilidad con sus violaciones, así como los eventos que puedan afectar la participación de un miembro dentro del Comité (incapacidades, carga laboral, capacitaciones etc.).

Deben ser verificables los registros de declaración de conflictos de interés de los miembros del Comité, así como las acciones generadas.

Además, se deben definir las responsabilidades y las funciones de acuerdo al cargo que se ocupa dentro del Comité:

Presidente.

- Presidir las reuniones y será el vocero del comité para su socialización.
- Firmar las actas, correspondencia, formato de consentimiento informado y el formato establecido por el INVIMA para el sometimiento de Instituciones, Protocolos nuevos y demás documentos relacionados.
- Ser el vocero ante el INVIMA de las decisiones, inquietudes, medidas y preguntas que se tengan dentro de un proyecto de investigación.
- Asignar las funciones a los miembros del Comité.

Secretario.
Coordinar la entrega oportuna y de acuerdo a las competencias, de toda la correspondencia y documentos que serán sometidos a evaluación a cada uno de los miembros del Comité.

Se tiene que aclarar que puede existir el secretario en propiedad del Comité de Ética que puede tener voz y voto y el Secretario administrativo con un perfil técnico para el manejo del archivo y la correspondencia, quién no tiene voz ni voto, funciones que deberán ser definidas para cada uno de los casos.

Miembro Activo.
Deberá cumplir las funciones que le sean asignadas por parte del Presidente del Comité de ética dentro del Comité, como las funciones dentro de la evaluación del estudio.

H. Requisitos sobre quórum para sesionar y deliberar: Se debe establecer el número de miembros requeridos para sesionar y el número mínimo, las disciplinas y las calificaciones para cumplimiento del quórum. Estas directrices deben ser definidas por el presidente del Comité.

El quórum mínimo podría establecerse de la siguiente manera:

- Debe ser la mitad mas uno (1)
- Ser de cinco miembros mínimo.
- Debe estar el Presidente
- Debe estar por lo menos un miembro médico
- Debe estar por lo menos un miembro no científico
- Debe estar el Representante de la comunidad.

Consideraciones:
No se recomienda sesionar un proyecto de investigación nuevo con el quórum mínimo o cualquier otro sometimiento en donde en la evaluación se sospeche daño al participante de investigación.

En caso de ausencia del Presidente del Comité, debe existir un presidente encargado que asuma las funciones propias del cargo para esa sesión.

I. Descripción del entrenamiento o capacitación que deben tener los miembros del Comité.

Debe existir un programa de capacitación continua en temas de investigación tales como:

- Metodología de la investigación
- Bioética en investigación
- Análisis de bases de datos
- Consentimiento Informado
- Actualización en Buenas Prácticas Clínicas
- Normativa en Investigación
- Interacciones Medicamentosas
- Eventos adversos en los proyectos de investigación.

II. Código de Conducta, Política de conflictos de intereses y Política de confidencialidad

Existen situaciones que pueden generar un potencial conflicto de interés por parte de los miembros del Comité y por tanto sesgar el desarrollo idóneo de las funciones del mismo. Estas situaciones deben declararse y comunicarse oportunamente con el fin de generar acciones pertinentes, como la abstención

de evaluación y seguimiento de estudios específicos. A su vez el Comité deberá establecer y documentar cómo manejar la situación.

Algunas circunstancias que generan conflicto de interés para los miembros del Comité se mencionan a continuación: Vínculos laborales con el patrocinador tales como consultorías o acuerdos de asesorías, participación simultánea como miembro evaluador del Comité y como investigador de estudios de investigación, propiedad de valores de firmas involucradas en estudios sometidos a evaluación del Comité, relación de familia conocida con participantes y responsables del estudio en evaluación, relación de negocios con participantes y responsables del estudio en evaluación, relación pasada o presente con participantes y responsables del estudio en evaluación, relaciones tal como amistad, personal, cercana o enemistad que pudieran afectar el juicio del evaluador, entre otras.

La membresía al Comité permite acceso a información con restricciones de publicación, por lo cual debe considerarse una política de confidencialidad que impida el uso de la información reservada.

8. PROCEDIMIENTO

A. Autoridad institucional bajo la cual se encuentra establecido el Comité

Se debe definir bajo qué autoridad dentro del Centro de Investigación (Institución) se encuentra constituido el Comité de Ética en Investigación.

Para definir la subordinación es necesario aclarar que el Comité de Ética es la máxima autoridad en el centro de investigación en lo que tiene que ver con el mantenimiento de la seguridad del participante de investigación.

Por lo anterior el Comité siempre debe estar encima en el mapa de procesos, de los encargados de aprobar, revisar y definir la factibilidad financiera dentro de la institución, tal como: el investigador, oficina financiera, dirección clínica o científica (si estas dos oficinas tienen esta función).

Debe estar como ente asesor del representante legal pero nunca subordinado él.

B. Si se encuentra libre de subordinación directa de esa autoridad para deliberar y decidir.

Es necesario que la independencia del Comité de ética sea absoluta no solo desde el punto de vista legal, sino también en sus conceptos y decisiones, los cuales deben ser acatados por todos los actores dentro de la organización a la que pertenecen.

C. La metodología que sigue el Comité para evaluar las propuestas, debe estar establecida por escrito y especificar como mínimo:

- El Procedimiento debe estar en las Guías Operativas del Comité de acuerdo al Sistema de Gestión de la Calidad.
- Debe incluir un listado de los documentos mínimos que se van a someter.
- Debe tener una herramienta (lista de chequeo, bitácora, etc.) que permita evaluar todos los documentos del proyecto de investigación. Esta herramienta deberá tener una lista de chequeo que contemple los criterios de evaluación de los documentos y tener un espacio que sea de obligatorio diligenciamiento en donde el miembro evaluador exponga sus puntos de vista. Se recomienda tener una de estas herramientas aparte para cada uno de los documentos.

D. Documentos mínimos que se deben evaluar por cada proyecto de investigación

- **Manual del Investigador:** El propósito general de este documento es facilitar al investigador un conocimiento claro de los posibles riesgos y reacciones adversas, así como de las pruebas específicas, observaciones y precauciones que pueden ser necesarias en un ensayo clínico.

  Éste documento debe contener toda la información disponible sobre datos de seguridad, farmacodinamia, farmacocinética, toxicidad, teratogenicidad, propiedades físicas y químicas, etc de la molécula en investigación, además de información confiable de estudios preclínicos (farmacológicos y no farmacológicos) y clínicos previos que justifiquen el uso de la molécula en seres humanos. Así mismo debe plasmar la información de los estudios clínicos fase I, II, III (de haberlos, según sea el caso), interacciones medicamentosas, efectos secundarios, reacciones adversas, todo enfocado a la protección del participante.

- **Hoja de vida del equipo investigador.**

- **Protocolo de investigación:** Se deben evaluar los aspectos que implican la calidad técnica del protocolo de investigación, así como su posterior desarrollo dentro del sitio de investigación.

  Hay que tener en cuenta, aspectos como: la socialización del estudio, las barreras de acceso, los factores económicos que puedan afectar al participante de investigación, el método de aleatorización, cegamiento, confidencialidad de la información, método estadístico y la factibilidad del proyecto de la investigación (posibilidad de alcanzar las conclusiones esperadas, balance de beneficio/riesgo e inconvenientes para los participantes, financiación y recursos necesarios) entre otros documentos. Dentro del protocolo también es necesario revisar los mecanismos (de haberlos) con los que se pretende compensar o retribuir la participación de los sujetos.

- **Consentimiento Informado:** En este documento se deben evaluar aspectos como materiales y métodos que van a ser utilizados para obtener el consentimiento informado de los participantes en el estudio. Así mismo se debe obtener un consentimiento informado dado libremente de cada sujeto, previamente a su participación en el estudio, que se encuentre con letra clara, legible, adecuada para el nivel sociocultural donde se va aplicar, con un volumen adecuado, completo, que no tenga ambigüedades, que se explique el cubrimiento de la atención de eventos adversos, información pertinente a la investigación, consideraciones con respecto a poblaciones vulnerables, tiempo presupuestado para la toma del consentimiento informado, personas que deberían ser las testigos y todo lo contemplado en la Resolución 8430 del 1993.

  Es importante tener en cuenta que la participación de menores de edad debe seguir los lineamientos establecidos en la Resolución 8430 del 1993.

  Igualmente debe evaluarse el consentimiento informado para muestras genéticas, en la que el patrocinador especifique la utilización de dichas muestras, el tiempo de conservación y el manejo de la confidencialidad de esta información.

- **Anuncios de reclutamiento y materiales entregados a los participantes:** Estos documentos y sus equivalentes se deben analizar siempre pensando en el bienestar y la confidencialidad del sujeto de investigación.

- **Presupuesto del Estudio**: El Comité de Ética deberá verificar en el presupuesto que se tendrá contemplado para la realización del protocolo, que todos los gastos que tienen que ver con el proyecto de investigación sean cubiertos por el mismo presupuesto del estudio y que no se recurrirá a los recursos propios del participante de investigación, contemplando el presupuesto destinado a alimentación y transporte para el participante del estudio, si aplica.

- **Póliza de seguros para los participantes:** El comité deberá verificar que la póliza se encuentre vigente, el cual cubra los eventos adversos del estudio, indemnizaciones en caso de muerte y además deberá verificar la accesibilidad de dicha póliza.

- **Contrato:** Debe existir un acuerdo contractual entre el patrocinador y la institución/investigador, el cual debe estar firmado por el representante legal de cada una de las partes, documento que debe incluir aspectos como: término del contrato, presupuesto y forma de pago, responsabilidades de las partes, confidencialidad, seguro o indemnización, conflictos de interés, medidas o sanciones en caso de incumplimiento, tiempo de conservación del archivo, entre otros.

  Igualmente, los pactos realizados entre otras partes implicadas en el ensayo clínico deben constar por escrito, entre la institución y servicios contratados como son el comité de ética, laboratorio clínico u otros servicios contratados.

- Se debe definir de acuerdo al perfil del miembro del Comité de Ética quien debe evaluar cada uno de los documentos del proyecto de investigación. Este procedimiento dependerá también del tiempo de evaluación de cada documento y la carga laboral de cada uno de los miembros. Estas funciones deben ser definidas por el Presidente del Comité o por quien él delegue, como también los documentos mínimos que cada miembro deberá evaluar.

Debe existir un soporte documental de dicha evaluación, el cual debe contener las consideraciones y opiniones de cada uno de los evaluadores. Todos los miembros del comité deberán participar activamente dentro de la evaluación del proyecto de investigación.

Se debe considerar un tiempo máximo de evaluación de cada uno de los documentos; este tiempo debe estar coordinado con el cronograma de reuniones. Se debe establecer el método predefinido para alcanzar una decisión (por consenso, por votación) y los mecanismos de decisión cuando no se logra un consenso, los cuales pueden ser citación al investigador, patrocinador o consultor externo para ampliación de información. En caso de que uno o más miembros declaren tener conflictos de intereses, se debe definir una Política de restricciones para establecer los mecanismos de cómo estas personas podrán participar en la evaluación de las propuestas.

E. El comité debe establecer los requisitos y los mecanismos para realizar una aprobación expedita/extraordinaria, que incluya:

- Los estudios que pueden ser evaluados mediante este tipo de aprobación.
- Tener claro que este procedimiento es aceptable únicamente para aquellos estudios y/o procedimientos que conlleven solo un riesgo mínimo para el sujeto de investigación.
- El procedimiento a seguir para la revisión
- El mecanismo para la ratificación por parte del comité de la decisión tomada en forma expedita.
- Esta excluida la aprobación de estudios con medicamentos por primera vez.

F. El Comité debe notificar por escrito dentro de un periodo de dos semanas después de la reunión al investigador las decisiones tomadas respecto al proyecto sometido a evaluación. Esta notificación debe incluir, como mínimo:

- Identificación del estudio.
- Documentos estudiados.
- Fecha de evaluación y número del acta de la sesión correspondiente.
- Decisiones u opiniones relacionadas con el estudio.
- Motivos de las decisiones, en especial en caso de reprobación.

- Procedimientos que debe seguir el investigador para someter el proyecto a reconsideración.

G. El Comité debe contar con medidas tendientes a asegurar el éxito de sus sesiones. Estas incluyen:

- Programar las sesiones del Comité con la debida anterioridad.
- Notificar oportunamente a los miembros.
- Enviar a cada miembro previamente los documentos necesarios para la sesión.
- Consignar en un acta lo discutido y decidido.
- Conservar el archivo de las actas.
- Mantener los archivos de correspondencia a los miembros del Comité.

H. Deben especificarse por escrito los procedimientos establecidos por el Comité para seguir el curso de los estudios desde su aprobación hasta su terminación.

El Comité debe contar con un procedimiento para realizar el seguimiento a cada uno de los proyectos de investigación que sean sometidos a su consideración.

Cuando el Comité aprueba el proyecto de investigación por primera vez, debe definir en esa aprobación y teniendo en cuenta las características propias del estudio, cada cuanto el Investigador debe reportarle los avances. Este reporte debe hacerse por lo menos una vez al año según la regulación nacional, pero el Comité está en la libertad de establecer un tiempo menor de acuerdo al caso.

Para el Informe periódico se debe tener en cuenta como mínimo lo siguiente: número de sujetos reclutados, última versión del proyecto, resumen de eventos adversos, resumen de problemas no anticipados, resumen de nueva información disponible y copia del consentimiento actual.

El comité debe tener establecido un mecanismo de auditorías de evaluación a los centros de investigación en donde se llevan a cabo los estudios sometidos. La periodicidad es establecida libremente por el Comité pero debe ser predefinida de acuerdo al tipo de estudio. Para estas auditorías se debe diseñar un formato de auditoría que incluya todos los aspectos que se encuentran en la norma adicionando los criterios propios del comité. En estas auditorías se debe revisar entre otros, lo siguiente: el avance de los estudios sometidos, la evaluación de los eventos adversos serios, las desviaciones y violaciones presentadas al protocolo, la tasa de reclutamiento y la meta propuesta de reclutamiento.

I. El comité debe establecer procedimientos y medidas en caso de encontrar irregularidades.

Se deben definir las medidas que se van a tomar en caso de encontrar irregularidades en la conducción de los Proyectos de Investigación. Las acciones que pueden generar dichas medidas, son entre otras:

- Inclusión de participantes en un estudio antes de que el comité emita su aprobación por escrito.
- Implementar sin previo aviso cambios – enmiendas en el proyecto.
- Incumplimiento en la presentación de los informes para el seguimiento de los proyectos.
- La ausencia de notificación, por parte del investigador, de las desviaciones al proyecto y de las reacciones o eventos adversos.
- Que el investigador no notifique sobre nueva información que pueda afectar la seguridad de los participantes o la conducción del estudio.

Se debe informar a los investigadores sobre las sanciones que ocasionan el incumplimiento de este numeral.

El Comité de Ética por su constitución no puede tomar medidas judiciales de carácter sanitario contra el Centro de Investigación, ni contra el Investigador o el patrocinador del estudio, pero si puede imponer

sanciones cuando en defensa de la protección del bienestar de los participantes de investigación, lo considere necesario. Estas sanciones pueden ser entre otras:

- Llamado de atención
- Amonestación
- Suspensión de la Aprobación del Proyecto de investigación, medida que genera inmediatamente remisión o reporte al ente regulador (INVIMA) y al patrocinador.

9. CONSIDERACIONES ACERCA DEL COMITÉ DE ÉTICA

Dentro de las consideraciones acerca del Comité de Ética se debe establecer lo siguiente:

El Comité de Ética es la máxima autoridad en lo relacionado con la seguridad del participante de investigación; por lo tanto, no estará sometido a ninguna influencia externa y todos los actores (patrocinador, centro de investigación, grupo investigador) deberán acatar las decisiones y/o medidas que de él se generen.

En caso de que no se acaten dichas decisiones, el Comité tendrá el apoyo y la obligación de reportar dichas irregularidades al INVIMA. El Comité, en virtud de su composición y competencia, puede refutar los análisis, decisiones y cambios en el proyecto de investigación, que de acuerdo a su criterio afecte la seguridad del participante en el centro que está avalando. De acuerdo a lo anterior el Comité puede definir la calificación de un evento adverso no serio a un evento adverso serio por encima del criterio del investigador, siempre y cuando esta decisión afecte al participante.

En caso de desviaciones o violaciones cometidas por el investigador principal, el Comité de Ética es quien establece si este reporte es adecuado, de acuerdo a lo contemplado en el protocolo y a la seguridad del participante.
El Comité debe tener un Presupuesto con recursos propios, bien sea generado por el centro de investigación al cuál se encuentre adscrito, o por recursos derivados de sus servicios. Este presupuesto debe ser manejado soberanamente por el Comité, el cual puede hacerse público y debe tener rubros destinados para el funcionamiento rutinario, papelería, mantenimiento de oficina, recurso humano, manejo de archivo, capacitaciones y, si se tiene contemplado, el pago de honorarios de sus miembros.

El comité de ética no debe recibir directamente presupuesto del patrocinador, éste deberá ser manejado por la institución certificada por lo cual en el contrato entre el Comité de ética y la institución se deberá especificar como es el pago de honorarios, cuando aplique.

LEY ORGANICA DE SALUD.
Ley 67, Registro Oficial Suplemento 423 de 22 de Diciembre del 2006.

EL CONGRESO NACIONAL

Considerando:

Que el numeral 20 del artículo 23 de la Constitución Política de la República, consagra la salud como un derecho humano fundamental y el Estado reconoce y garantiza a las personas el derecho a una calidad de vida que asegure la salud, alimentación y nutrición, agua potable, saneamiento ambiental,...;

Que el artículo 42 de la Constitución Política de la República, dispone que "El Estado garantizará el derecho a la salud, su promoción y protección, por medio del desarrollo de la seguridad alimentaria, la provisión de agua potable y saneamiento básico, el fomento de ambientes saludables en lo familiar, laboral y comunitario, y la posibilidad de acceso permanente e ininterrumpido a servicios de salud, conforme a los principios de equidad, universalidad, solidaridad, calidad y eficiencia.";

Que el Código de la Salud aprobado en 1971, contiene disposiciones desactualizadas en relación a los avances en salud pública, en derechos humanos, en ciencia y tecnología, a la situación de salud y enfermedad de la población, entre otros;

Que el actual Código de la Salud ha experimentado múltiples reformas parciales que lo han convertido en un cuerpo legal disperso y desintegrado;

Que ante los actuales procesos de reforma del Estado, del sector salud y de globalización, en los que se encuentra inmerso nuestro país, la legislación debe priorizar los intereses de la salud de la población por sobre los comerciales y económicos;

Que el Ecuador ha ratificado convenios y tratados internacionales que determinan compromisos importantes del país en diferentes materias como derechos humanos, derechos sexuales y reproductivos, derechos de niños, niñas y adolescentes, entre otros;

Que se hace necesario actualizar conceptos normativos en salud, mediante la promulgación de una ley orgánica que garantice la supremacía sobre otras leyes en esta materia; y,

En ejercicio de sus facultades constitucionales y legales expide la siguiente:.

LEY ORGANICA DE SALUD

TITULO PRELIMINAR

CAPITULO I
Del derecho a la salud y su protección

Art. 1.- La presente Ley tiene como finalidad regular las acciones que permitan efectivizar el derecho universal a la salud consagrado en la Constitución Política de la República y la ley. Se rige por los principios de equidad, integralidad, solidaridad, universalidad, irrenunciabilidad, indivisibilidad, participación, pluralidad, calidad y eficiencia; con enfoque de derechos, intercultural, de género, generacional y bioético.

Art. 2.- Todos los integrantes del Sistema Nacional de Salud para la ejecución de las actividades relacionadas con la salud, se sujetarán a las disposiciones de esta Ley, sus reglamentos y las normas establecidas por la autoridad sanitaria nacional.

Art. 3.- La salud es el completo estado de bienestar físico, mental y social y no solamente la ausencia de afecciones o enfermedades. Es un derecho humano inalienable, indivisible, irrenunciable e intransigible, cuya

protección y garantía es responsabilidad primordial del Estado; y, el resultado de un proceso colectivo de interacción donde Estado, sociedad, familia e individuos convergen para la construcción de ambientes, entornos y estilos de vida saludables.

CAPITULO II
De la autoridad sanitaria nacional, sus competencias y Responsabilidades

Art. 4.- La autoridad sanitaria nacional es el Ministerio de Salud Pública, entidad a la que corresponde el ejercicio de las funciones de rectoría en salud; así como la responsabilidad de la aplicación, control y vigilancia del cumplimiento de esta Ley; y, las normas que dicte para su plena vigencia serán obligatorias.

Art. 5.- La autoridad sanitaria nacional creará los mecanismos regulatorios necesarios para que los recursos destinados a salud provenientes del sector público, organismos no gubernamentales y de organismos internacionales, cuyo beneficiario sea el Estado o las instituciones del sector público, se orienten a la implementación, seguimiento y evaluación de políticas, planes, programas y proyectos, de conformidad con los requerimientos y las condiciones de salud de la población.

Art. 6.- Es responsabilidad del Ministerio de Salud Pública:

1. Definir y promulgar la política nacional de salud con base en los principios y enfoques establecidos en el artículo 1 de esta Ley, así como aplicar, controlar y vigilar su cumplimiento;
2. Ejercer la rectoría del Sistema Nacional de Salud;
3. Diseñar e implementar programas de atención integral y de calidad a las personas durante todas las etapas de la vida y de acuerdo con sus condiciones particulares;
4. Declarar la obligatoriedad de las inmunizaciones contra determinadas enfermedades, en los términos y condiciones que la realidad epidemiológica nacional y local requiera; definir las normas y el esquema básico nacional de inmunizaciones; y, proveer sin costo a la población los elementos necesarios para cumplirlo;
5. Regular y vigilar la aplicación de las normas técnicas para la detección, prevención, atención integral y rehabilitación, de enfermedades transmisibles, no transmisibles, crónico-degenerativas, discapacidades y problemas de salud pública declarados prioritarios, y determinar las enfermedades transmisibles de notificación obligatoria, garantizando la confidencialidad de la información;
6. Formular e implementar políticas, programas y acciones de promoción, prevención y atención integral de salud sexual y salud reproductiva de acuerdo al ciclo de vida que permitan la vigencia, respeto y goce de los derechos, tanto sexuales como reproductivos, y declarar la obligatoriedad de su atención en los términos y condiciones que la realidad epidemiológica nacional y local requiera;
7. Establecer programas de prevención y atención integral en salud contra la violencia en todas sus formas, con énfasis en los grupos vulnerables;
8. Regular, controlar y vigilar la donación, obtención, procesamiento, almacenamiento, distribución, transfusión, uso y calidad de la sangre humana, sus componentes y derivados, en instituciones y organismos públicos y privados, con y sin fines de lucro, autorizados para ello;
9. Regular y controlar el funcionamiento de bancos de células, tejidos y sangre; plantas industriales de hemoderivados y establecimientos de aféresis, públicos y privados; y, promover la creación de éstos en sus servicios de salud;
10. Emitir políticas y normas para regular y evitar el consumo del tabaco, bebidas alcohólicas y otras sustancias que afectan la salud;
11. Determinar zonas de alerta sanitaria, identificar grupos poblacionales en grave riesgo y solicitar la declaratoria del estado de emergencia sanitaria, como consecuencia de epidemias, desastres u otros que pongan en grave riesgo la salud colectiva;

12. Elaborar el plan de salud en gestión de riesgos en desastres y en sus consecuencias, en coordinación con la Dirección Nacional de Defensa Civil y demás organismos competentes;

13. Regular, vigilar y tomar las medidas destinadas a proteger la salud humana ante los riesgos y daños que pueden provocar las condiciones del ambiente;

14. Regular, vigilar y controlar la aplicación de las normas de bioseguridad, en coordinación con otros organismos competentes;

15. Regular, planificar, ejecutar, vigilar e informar a la población sobre actividades de salud concernientes a la calidad del agua, aire y suelo; y, promocionar espacios y ambientes saludables, en coordinación con los organismos seccionales y otros competentes;

16. Regular y vigilar, en coordinación con otros organismos competentes, las normas de seguridad y condiciones ambientales en las que desarrollan sus actividades los trabajadores, para la prevención y control de las enfermedades ocupacionales y reducir al mínimo los riesgos y accidentes del trabajo;

17. Regular y vigilar las acciones destinadas a eliminar y controlar la proliferación de fauna nociva para la salud humana;

18. Regular y realizar el control sanitario de la producción, importación, distribución, almacenamiento, transporte, comercialización, dispensación y expendio de alimentos procesados, medicamentos y otros productos para uso y consumo humano; así como los sistemas y procedimientos que garanticen su inocuidad, seguridad y calidad, a través del Instituto Nacional de Higiene y Medicina Tropical Dr. Leopoldo Izquieta Pérez y otras dependencias del Ministerio de Salud Pública;

19. Dictar en coordinación con otros organismos competentes, las políticas y normas para garantizar la seguridad alimentaria y nutricional, incluyendo la prevención de trastornos causados por deficiencia de micro nutrientes o alteraciones provocadas por desórdenes alimentarios, con enfoque de ciclo de vida y vigilar el cumplimiento de las mismas;

20. Formular políticas y desarrollar estrategias y programas para garantizar el acceso y la disponibilidad de medicamentos de calidad, al menor costo para la población, con énfasis en programas de medicamentos genéricos;

21. Regular y controlar toda forma de publicidad y promoción que atente contra la salud e induzcan comportamientos que la afecten negativamente;

22. Regular, controlar o prohibir en casos necesarios, en coordinación con otros organismos competentes, la producción, importación, comercialización, publicidad y uso de sustancias tóxicas o peligrosas que constituyan riesgo para la salud de las personas;

23. Regular, vigilar y controlar en coordinación con otros organismos competentes, la producción y comercialización de los productos de uso y consumo animal y agrícola que afecten a la salud humana;

24. Regular, vigilar, controlar y autorizar el funcionamiento de los establecimientos y servicios de salud, públicos y privados, con y sin fines de lucro, y de los demás sujetos a control sanitario;

25. Regular y ejecutar los procesos de licenciamiento y certificación; y, establecer las normas para la acreditación de los servicios de salud;

26. Establecer políticas para desarrollar, promover y potenciar la práctica de la medicina tradicional, ancestral y alternativa; así como la investigación, para su buena práctica;

27. Determinar las profesiones, niveles técnicos superiores y auxiliares de salud que deben registrarse para su ejercicio;

28. Diseñar en coordinación con el Ministerio de Educación y Cultura y otras organizaciones competentes, programas de promoción y educación para la salud, a ser aplicados en los establecimientos educativos estatales, privados, municipales y fiscomisionales;

29. Desarrollar y promover estrategias, planes y programas de información, educación y comunicación social en salud, en coordinación con instituciones y organizaciones competentes;

30. Dictar, en su ámbito de competencia, las normas sanitarias para el funcionamiento de los locales y establecimientos públicos y privados de atención a la población;

31. Regular, controlar y vigilar los procesos de donación y trasplante de órganos, tejidos y componentes anatómicos humanos y establecer mecanismos que promuevan la donación voluntaria; así como regular, controlar y vigilar el uso de órtesis, prótesis y otros implantes sintéticos en el cuerpo humano;

32. Participar, en coordinación con el organismo nacional competente, en la investigación y el desarrollo de la ciencia y tecnología en salud, salvaguardando la vigencia de los derechos humanos, bajo principios bioéticos;

33. Emitir las normas y regulaciones sanitarias para la instalación y funcionamiento de cementerios, criptas, crematorios, funerarias, salas de velación y tanatorios;

34. Cumplir y hacer cumplir esta Ley, los reglamentos y otras disposiciones legales y técnicas relacionadas con la salud, así como los instrumentos internacionales de los cuales el Ecuador es signatario.

Estas acciones las ejecutará el Ministerio de Salud Pública, aplicando principios y procesos de desconcentración y descentralización; y,

35. Las demás previstas en la Constitución Política de la República y otras leyes.

CAPITULO III
Derechos y deberes de las personas y del Estado en relación con la salud

Art. 7.- Toda persona, sin discriminación por motivo alguno, tiene en relación a la salud, los siguientes derechos:

a) Acceso universal, equitativo, permanente, oportuno y de calidad a todas las acciones y servicios de salud;

b) Acceso gratuito a los programas y acciones de salud pública, dando atención preferente en los servicios de salud públicos y privados, a los grupos vulnerables determinados en la Constitución Política de la República;

c) Vivir en un ambiente sano, ecológicamente equilibrado y libre de contaminación;

d) Respeto a su dignidad, autonomía, privacidad e intimidad; a su cultura, sus prácticas y usos culturales; así como a sus derechos sexuales y reproductivos;

e) Ser oportunamente informada sobre las alternativas de tratamiento, productos y servicios en los procesos relacionados con su salud, así como en usos, efectos, costos y calidad; a recibir consejería y asesoría de personal capacitado antes y después de los procedimientos establecidos en los protocolos médicos. Los integrantes de los pueblos indígenas, de ser el caso, serán informados en su lengua materna;

f) Tener una historia clínica única redactada en términos precisos, comprensibles y completos; así como la confidencialidad respecto de la información en ella contenida y a que se le entregue su epicrisis;

g) Recibir, por parte del profesional de la salud responsable de su atención y facultado para prescribir, una receta que contenga obligatoriamente, en primer lugar, el nombre genérico del medicamento prescrito;

h) Ejercer la autonomía de su voluntad a través del consentimiento por escrito y tomar decisiones respecto a su estado de salud y procedimientos de diagnóstico y tratamiento, salvo en los casos de urgencia, emergencia o riesgo para la vida de las personas y para la salud pública;

i) Utilizar con oportunidad y eficacia, en las instancias competentes, las acciones para tramitar quejas y reclamos administrativos o judiciales que garanticen el cumplimiento de sus derechos; así como la reparación e indemnización oportuna por los daños y perjuicios causados, en aquellos casos que lo ameriten;

j) Ser atendida inmediatamente con servicios profesionales de emergencia, suministro de medicamentos e insumos necesarios en los casos de riesgo inminente para la vida, en cualquier establecimiento de salud público o privado, sin requerir compromiso económico ni trámite administrativo previos;

k) Participar de manera individual o colectiva en las actividades de salud y vigilar el cumplimiento de las acciones en salud y la calidad de los servicios, mediante la conformación de veedurías ciudadanas u otros mecanismos de participación social; y, ser informado sobre las medidas de prevención y mitigación de las amenazas y situaciones de vulnerabilidad que pongan en riesgo su vida; y,

l) No ser objeto de pruebas, ensayos clínicos, de laboratorio o investigaciones, sin su conocimiento y consentimiento previo por escrito; ni ser sometida a pruebas o exámenes diagnósticos, excepto cuando la ley

expresamente lo determine o en caso de emergencia o urgencia en que peligre su vida.

Art. 8.- Son deberes individuales y colectivos en relación con la salud:

a) Cumplir con las medidas de prevención y control establecidas por las autoridades de salud;
b) Proporcionar información oportuna y veraz a las autoridades de salud, cuando se trate de enfermedades declaradas por la autoridad sanitaria nacional como de notificación obligatoria y responsabilizarse por acciones u omisiones que pongan en riesgo la salud individual y colectiva;
c) Cumplir con el tratamiento y recomendaciones realizadas por el personal de salud para su recuperación o para evitar riesgos a su entorno familiar o comunitario;
d) Participar de manera individual y colectiva en todas las actividades de salud y vigilar la calidad de los servicios mediante la conformación de veedurías ciudadanas y contribuir al desarrollo de entornos saludables a nivel laboral, familiar y comunitario; y,
e) Cumplir las disposiciones de esta Ley y sus reglamentos.

Art. 9.- Corresponde al Estado garantizar el derecho a la salud de las personas, para lo cual tiene, entre otras, las siguientes responsabilidades:

a) Establecer, cumplir y hacer cumplir las políticas de Estado, de protección social y de aseguramiento en salud a favor de todos los habitantes del territorio nacional;
b) Establecer programas y acciones de salud pública sin costo para la población;
c) Priorizar la salud pública sobre los intereses comerciales y económicos;
d) Adoptar las medidas necesarias para garantizar en caso de emergencia sanitaria, el acceso y disponibilidad de insumos y medicamentos necesarios para afrontarla, haciendo uso de los mecanismos previstos en los convenios y tratados internacionales y la legislación vigente;
e) Establecer a través de la autoridad sanitaria nacional, los mecanismos que permitan a la persona como sujeto de derechos, el acceso permanente e ininterrumpido, sin obstáculos de ninguna clase a acciones y servicios de salud de calidad;
f) Garantizar a la población el acceso y disponibilidad de medicamentos de calidad a bajo costo, con énfasis en medicamentos genéricos en las presentaciones adecuadas, según la edad y la dotación oportuna, sin costo para el tratamiento del VIH-SIDA y enfermedades como hepatitis, dengue, tuberculosis, malaria y otras transmisibles que pongan en riesgo la salud colectiva;
g) Impulsar la participación de la sociedad en el cuidado de la salud individual y colectiva; y, establecer mecanismos de veeduría y rendición de cuentas en las instituciones públicas y privadas involucradas;
h) Garantizar la asignación fiscal para salud, en los términos señalados por la Constitución Política de la República, la entrega oportuna de los recursos y su distribución bajo el principio de equidad; así como los recursos humanos necesarios para brindar atención integral de calidad a la salud individual y colectiva; e,
i) Garantizar la inversión en infraestructura y equipamiento de los servicios de salud que permita el acceso permanente de la población a atención integral, eficiente, de calidad y oportuna para responder adecuadamente a las necesidades epidemiológicas y comunitarias.

LIBRO I
De las acciones de salud

TITULO I

CAPITULO I
Disposiciones comunes

Art. 10.- Quienes forman parte del Sistema Nacional de Salud aplicarán las políticas, programas y normas de atención integral y de calidad, que incluyen acciones de promoción, prevención, recuperación, rehabilitación y

cuidados paliativos de la salud individual y colectiva, con sujeción a los principios y enfoques establecidos en el artículo 1 de esta Ley.

Art. 11.- Los programas de estudio de establecimientos de educación pública, privada, municipales y fiscomicionales, en todos sus niveles y modalidades, incluirán contenidos que fomenten el conocimiento de los deberes y derechos en salud, hábitos y estilos de vida saludables, promuevan el auto cuidado, la igualdad de género, la corresponsabilidad personal, familiar y comunitaria para proteger la salud y el ambiente, y desestimulen y prevengan conductas nocivas.

La autoridad sanitaria nacional, en coordinación con el Ministerio de Educación y Cultura, vigilará que los establecimientos educativos públicos, privados, municipales y fiscomisionales, así como su personal, garanticen el cuidado, protección, salud mental y física de sus educandos.

Art. 12.- La comunicación social en salud estará orientada a desarrollar en la población hábitos y estilos de vida saludables, desestimular conductas nocivas, fomentar la igualdad entre los géneros, desarrollar conciencia sobre la importancia del autocuidado y la participación ciudadana en salud.

Los medios de comunicación social, en cumplimiento de lo previsto en la ley, asignarán espacios permanentes, sin costo para el Estado, para la difusión de programas y mensajes educativos e informativos en salud dirigidos a la población, de acuerdo a las producciones que obligatoriamente, para este efecto, elaborará y entregará trimestralmente la autoridad sanitaria nacional.

La autoridad sanitaria nacional regulará y controlará la difusión de programas o mensajes, para evitar que sus contenidos resulten nocivos para la salud física y psicológica de las personas, en especial de niños, niñas y adolescentes.

Art. 13.- Los planes y programas de salud para los grupos vulnerables señalados en la Constitución Política de la República, incorporarán el desarrollo de la autoestima, promoverán el cumplimiento de sus derechos y se basarán en el reconocimiento de sus necesidades particulares por parte de los integrantes del Sistema Nacional de Salud y la sociedad en general.

Art. 14.- Quienes forman parte del Sistema Nacional de Salud, implementarán planes y programas de salud mental, con base en la atención integral, privilegiando los grupos vulnerables, con enfoque familiar y comunitario, promoviendo la reinserción social de las personas con enfermedad mental.

Art. 15.- La autoridad sanitaria nacional en coordinación con otras instituciones competentes y organizaciones sociales, implementará programas para la prevención oportuna, diagnóstico, tratamiento y recuperación de las alteraciones del crecimiento y desarrollo.

CAPITULO II
De la alimentación y nutrición

Art. 16.- El Estado establecerá una política intersectorial de seguridad alimentaria y nutricional, que propenda a eliminar los malos hábitos alimenticios, respete y fomente los conocimientos y prácticas alimentarias tradicionales, así como el uso y consumo de productos y alimentos propios de cada región y garantizará a las personas, el acceso permanente a alimentos sanos, variados, nutritivos, inocuos y suficientes.

Esta política estará especialmente orientada a prevenir trastornos ocasionados por deficiencias de micro nutrientes o alteraciones provocadas por desórdenes alimentarios.

Art. 17.- La autoridad sanitaria nacional conjuntamente con los integrantes del Sistema Nacional de Salud, fomentarán y promoverán la lactancia materna durante los primeros seis meses de vida del niño o la niña, procurando su prolongación hasta los dos años de edad.

Garantizará el acceso a leche materna segura o a sustitutivos de ésta para los hijos de madres portadoras de VIH-SIDA.

Art. 18.- La autoridad sanitaria nacional, en coordinación con los gobiernos seccionales, las cámaras de la producción y centros universitarios desarrollará actividades de información, educación, comunicación y participación comunitaria dirigidas al conocimiento del valor nutricional de los alimentos, su calidad, suficiencia e inocuidad, de conformidad con las normas técnicas que dicte para el efecto el organismo competente y de la presente Ley.

Art. 19.- La autoridad sanitaria nacional velará por la protección de la salud en el control de las enfermedades por deficiencia de yodo, mediante el control y monitoreo de la yodización de la sal para consumo humano.

CAPITULO III
De la salud sexual y la salud reproductiva

Art. 20.- Las políticas y programas de salud sexual y salud reproductiva garantizarán el acceso de hombres y mujeres, incluidos adolescentes, a acciones y servicios de salud que aseguren la equidad de género, con enfoque pluricultural, y contribuirán a erradicar conductas de riesgo, violencia, estigmatización y explotación de la sexualidad.

Art. 21.- El Estado reconoce a la mortalidad materna, al embarazo en adolescentes y al aborto en condiciones de riesgo como problemas de salud pública; y, garantiza el acceso a los servicios públicos de salud sin costo para las usuarias de conformidad con lo que dispone la Ley de Maternidad Gratuita y Atención a la Infancia.

Los problemas de salud pública requieren de una atención integral, que incluya la prevención de las situaciones de riesgo y abarque soluciones de orden educativo, sanitario, social, psicológico, ético y moral, privilegiando el derecho a la vida garantizado por la Constitución.

Art. 22.- Los servicios de salud, públicos y privados, tienen la obligación de atender de manera prioritaria las emergencias obstétricas y proveer de sangre segura cuando las pacientes lo requieran, sin exigencia de compromiso económico ni trámite administrativo previo.

Art. 23.- Los programas y servicios de planificación familiar, garantizarán el derecho de hombres y mujeres para decidir de manera libre, voluntaria, responsable, autónoma, sin coerción, violencia ni discriminación sobre el número de hijos que puedan procrear, mantener y educar, en igualdad de condiciones, sin necesidad de consentimiento de terceras personas; así como a acceder a la información necesaria para ello.

Art. 24.- Los anticonceptivos importados por la autoridad sanitaria nacional, requerirán del registro sanitario nacional además del registro sanitario del país de origen, así como el control de calidad y seguridad del producto, previo a su distribución.

Art. 25.- Los integrantes del Sistema Nacional de Salud promoverán y respetarán el conocimiento y prácticas tradicionales de los pueblos indígenas y afroecuatorianos, de las medicinas alternativas, con relación al embarazo, parto, puerperio, siempre y cuando no comprometan la vida e integridad física y mental de la persona.

Art. 26.- Los integrantes del Sistema Nacional de Salud, implementarán acciones de prevención y atención en salud integral, sexual y reproductiva, dirigida a mujeres y hombres, con énfasis en los adolescentes, sin costo para los usuarios en las instituciones públicas.

Art. 27.- El Ministerio de Educación y Cultura, en coordinación con la autoridad sanitaria nacional, con el organismo estatal especializado en género y otros competentes, elaborará políticas y programas educativos de implementación obligatoria en los establecimientos de educación a nivel nacional, para la difusión y orientación en materia de salud sexual y

reproductiva, a fin de prevenir el embarazo en adolescentes, VIH-SIDA y otras afecciones de transmisión sexual, el fomento de la paternidad y maternidad responsables y la erradicación de la explotación sexual; y, asignará los recursos suficientes para ello.

Los medios de comunicación deberán cumplir las directrices emanadas de la autoridad sanitaria nacional a fin de que los contenidos que difunden no promuevan la violencia sexual, el irrespeto a la sexualidad y la discriminación de género, por orientación sexual o cualquier otra.

Art. 28.- Los gobiernos seccionales, en coordinación con la autoridad sanitaria nacional, desarrollarán actividades de promoción, prevención, educación y participación comunitaria en salud sexual y reproductiva, de conformidad con las normas que ella dicte, considerando su realidad local.

Art. 29.- Esta Ley, faculta a los servicios de salud públicos y privados, a interrumpir un embarazo, única y exclusivamente en los casos previstos en el artículo 447 del Código Penal. Estos no podrán negarse a atender a mujeres con aborto en curso o inevitables, debidamente diagnosticados por el profesional responsable de la atención.

Art. 30.- La autoridad sanitaria nacional, con los integrantes del Sistema Nacional de Salud, fomentará y promoverá la planificación familiar, con responsabilidad mutua y en igualdad de condiciones.

CAPITULO IV
De la violencia

Art. 31.- El Estado reconoce a la violencia como problema de salud pública.

Es responsabilidad de la autoridad sanitaria nacional, de los servicios de salud, organismos seccionales, otros organismos competentes y de la sociedad en su conjunto, contribuir a la disminución de todos los tipos de violencia, incluidos los de género, intrafamiliar, sexual y su impacto sobre la salud.

Art. 32.- En todos los casos de violencia intrafamiliar y sexual, y de sus consecuencias, se brindará atención de salud integral a las personas afectadas.

El personal de los servicios de salud tiene la obligación de atender los casos de violencia intrafamiliar y sexual.

Deberán suministrar, entre otros, anticoncepción de emergencia, realizar los procedimientos y aplicar los esquemas profilácticos y terapéuticos necesarios, para detectar y prevenir el riesgo de contraer infecciones de transmisión sexual, especialmente el VIH y hepatitis B, previa consejería y asesoría a la persona afectada, con su consentimiento informado expresado por escrito.

Art. 33.- La autoridad sanitaria nacional en coordinación con el Ministerio Fiscal y otros organismos competentes implementará acciones para armonizar las normas de atención e instrumentos de registro de los distintos tipos de violencia y delitos sexuales, unificándolos en un manual de procedimientos de aplicación obligatoria en los distintos niveles de salud y en el Sistema Nacional de Salud.

CAPITULO V
De los accidentes

Art. 34.- La autoridad sanitaria nacional, en coordinación con el Consejo Nacional de Tránsito y Transporte Terrestres, el Ministerio del Trabajo y Empleo, otros organismos competentes, públicos y privados, y los gobiernos seccionales, impulsarán y desarrollarán políticas, programas y acciones para prevenir y disminuir los accidentes de tránsito, laborales, domésticos, industriales y otros; así como para la atención, recuperación, rehabilitación y reinserción social de las personas afectadas.

El Estado reconoce a los accidentes de tránsito como problema de salud pública, en cuanto sus consecuencias afecten la integridad física y mental de las personas.

CAPITULO VI
De los desastres

Art. 35.- La autoridad sanitaria nacional colaborará con los gobiernos seccionales y con los organismos competentes para integrar en el respectivo plan vigente el componente de salud en gestión de riesgos en emergencias y desastres, para prevenir, reducir y controlar los efectos de los desastres y fenómenos naturales y antrópicos.

Art. 36.- Los integrantes del Sistema Nacional de Salud implementarán, en colaboración con los organismos competentes, un sistema permanente y actualizado de información, capacitación y educación en gestión de riesgos en emergencias y desastres, con la participación de la sociedad en su conjunto.

Art. 37.- Todas las instituciones y establecimientos públicos y privados de cualquier naturaleza, deberán contar con un plan de emergencias, mitigación y atención en casos de desastres, en concordancia con el plan formulado para el efecto.

CAPITULO VII

Del tabaco, bebidas alcohólicas, psicotrópicos, estupefacientes y otras substancias que generan dependencia

Art. 38.- Declárase como problema de salud pública al consumo de tabaco y al consumo excesivo de bebidas alcohólicas, así como al consumo de sustancias estupefacientes y psicotrópicas, fuera del ámbito terapéutico.

Es responsabilidad de la autoridad sanitaria nacional, en coordinación con otros organismos competentes, adoptar medidas para evitar el consumo del tabaco y de bebidas alcohólicas, en todas sus formas, así como dotar a la población de un ambiente saludable, para promover y apoyar el abandono de estos hábitos perjudiciales para la salud humana, individual y colectiva.

Los servicios de salud ejecutarán acciones de atención integral dirigidas a las personas afectadas por el consumo y exposición al humo del tabaco, el alcoholismo, o por el consumo nocivo de psicotrópicos, estupefacientes y otras substancias que generan dependencia, orientadas a su recuperación, rehabilitación y reinserción social.

SECCION I
DEL CONTROL DEL CONSUMO DE PRODUCTOS DEL TABACO

Art. 39.- La autoridad sanitaria nacional en coordinación con el Ministerio de Educación y Cultura, las universidades, los gobiernos seccionales y la sociedad civil, diseñará y ejecutará planes y programas de educación y prevención del consumo del tabaco y sus productos.

Art. 40.- Se prohíbe la distribución o entrega de productos del tabaco, sea a título gratuito u oneroso, a personas menores de 18 años; así como su venta y consumo en establecimientos educativos, de salud y de expendio de medicamentos.

Art. 41.- Se prohíbe la publicidad, sea directa o indirecta, la promoción por cualquier medio, así como el patrocinio de cigarrillos y otros productos del tabaco, en eventos educativos, culturales o deportivos. La autoridad sanitaria nacional vigilará y controlará el cumplimiento de esta disposición.

Art. 42.- Las cajetillas de cigarrillos y los envases de otros productos del tabaco deben incluir de forma clara, visible y comprensible, la advertencia de su carácter nocivo para la salud, sujetándose a lo dispuesto en la Ley Orgánica de Defensa del Consumidor.

Art. 43.- A más de lo dispuesto en la Ley Orgánica de Defensa del Consumidor, se prohíbe fumar en instituciones públicas, establecimientos educativos y deportivos, sean públicos o privados, servicios de salud, lugares de trabajo, medios de transporte colectivo, salas de cine y teatro, auditorios, ascensores, depósitos y sitios de provisión de combustible, fábricas o depósitos de explosivos, lugares donde existan productos de fácil combustión y otros espacios que se definan en los reglamentos correspondientes, emitidos por la autoridad sanitaria nacional.

Todos los establecimientos, públicos y privados, colocarán advertencias visibles que indiquen la prohibición de fumar.

Art. 44.- Los derechos y obligaciones establecidos en la presente Ley, no excluyen ni se oponen a aquellos contenidos en la legislación destinada a regular la protección del ser humano de la exposición al humo del tabaco, desde antes de su nacimiento, del medio ambiente y el desarrollo sustentable y otras leyes relacionadas con el control del consumo del tabaco.

Art. 45.- Las empresas tabacaleras extranjeras que comercialicen sus productos en el Ecuador, deberán contar en el país con un representante legal con plenos poderes para ejercitar derechos y cumplir obligaciones derivadas de la aplicación de la presente Ley.

SECCION II
DE LA PREVENCION DEL CONSUMO DE BEBIDAS ALCOHOLICAS

Art. 46.- La autoridad sanitaria nacional en coordinación con el Ministerio de Educación y Cultura, las universidades, los gobiernos seccionales y la sociedad civil, diseñará y ejecutará planes y programas de educación y prevención del consumo de bebidas alcohólicas.

Art. 47.- Se prohíbe la distribución o entrega de bebidas alcohólicas, sea a título gratuito u oneroso, a personas menores de 18 años; así como su venta y consumo en establecimientos educativos, de salud y de expendio de medicamentos.

Art. 48.- La publicidad de bebidas alcohólicas por ningún motivo se vinculará a la salud, al éxito deportivo o a la imagen de la mujer como símbolo sexual. La autoridad sanitaria nacional vigilará y controlará el cumplimiento de esta disposición.

Art. 49.- Los envases de bebidas alcohólicas, deben incluir de forma clara, visible y comprensible, la advertencia de su carácter nocivo para la salud; y, para la impresión de la advertencia, se seguirán las especificaciones previstas en el reglamento correspondiente.

Art. 50.- Salvo en los actos autorizados por la autoridad competente, se prohíbe consumir bebidas alcohólicas y de moderación, en instituciones públicas, establecimientos educativos, sean públicos o privados, servicios de salud, lugares de trabajo, medios de transporte colectivo, salas de cine y teatro, y otros espacios que se definan en los reglamentos correspondientes emitidos por la autoridad sanitaria nacional. En estos establecimientos se colocarán advertencias visibles que indiquen la prohibición del consumo de bebidas alcohólicas.

SECCION III
DEL USO Y CONSUMO DE PSICOTROPICOS, ESTUPEFACIENTES Y OTRAS SUBSTANCIAS QUE GENERAN DEPENDENCIA

Art. 51.- Está prohibido la producción, comercialización, distribución y consumo de estupefacientes y psicotrópicos y otras substancias adictivas, salvo el uso terapéutico y bajo prescripción médica, que serán controlados por la autoridad sanitaria nacional, de acuerdo con lo establecido en la legislación pertinente.

TITULO II
Prevención y control de enfermedades

CAPITULO I
De las inmunizaciones

Art. 52.- La autoridad sanitaria nacional proveerá a los establecimientos de salud los biológicos e insumos para las enfermedades inmunoprevenibles contempladas en el esquema básico nacional de vacunación, en forma oportuna y permanente, asegurando su calidad y conservación, sin costo al usuario final.

Art. 53.- Es obligación de los servicios de salud y otras instituciones y establecimientos públicos y privados, inmunizar a los trabajadores que se encuentren expuestos a riesgos prevenibles por vacunación, de conformidad con la normativa emitida por la autoridad sanitaria nacional.

Art. 54.- El Estado garantizará y transferirá oportunamente, a través del organismo competente, los recursos económicos suficientes para el cumplimiento de las acciones del Programa Ampliado de Inmunizaciones, de conformidad con lo señalado en la ley.

Art. 55.- Los biológicos importados por el Estado a través del Fondo Rotatorio o de los convenios de gobierno a gobierno, no requieren de registro sanitario nacional, siendo obligatorio el del país de origen y la comprobación de la calidad y seguridad del producto antes de su distribución y utilización.

Art. 56.- Los biológicos adquiridos a cualquier título por instituciones públicas o privadas, producidos en el país o importados, serán sometidos a los procesos establecidos por la autoridad sanitaria nacional para liberación de lotes con el fin de preservar su calidad e inocuidad.

Art. 57.- Los biológicos importados por el Ministerio de Salud Pública a su arribo al país, deben pasar al Banco Nacional de Vacunas, en un plazo no mayor de cuarenta y ocho horas, debiéndose garantizar el mantenimiento de la cadena de frío y la calidad de los productos, siendo esto responsabilidad de la autoridad aduanera y de la autoridad sanitaria nacional.

Art. 58.- Las instituciones públicas y privadas de salud administrarán, sin costo a la población, de acuerdo a lo que establezca el reglamento aplicable, los biológicos contemplados en el esquema básico nacional de vacunación, cuando éstos hayan sido suministrados por la autoridad sanitaria nacional.

Las instituciones públicas y privadas reportarán obligatoriamente a la autoridad sanitaria nacional sobre las personas inmunizadas.

Art. 59.- Los padres y madres de familia, tutores o representantes legales de los niños, niñas y adolescentes, entidades educativas, instituciones públicas y privadas con población cautiva en riesgo, tienen la obligación y la responsabilidad de vigilar que se aplique y cumpla el esquema básico nacional de vacunación establecido por la autoridad sanitaria nacional.

Art. 60.- Las instituciones públicas y privadas para la administración y expendio de biológicos deben contar con la autorización de la autoridad sanitaria nacional y cumplir con los requisitos establecidos para garantizar una vacuna segura.

CAPITULO II
De las enfermedades transmisibles

Art. 61.- Las instituciones públicas y privadas, los profesionales de salud y la población en general, reportarán en forma oportuna la existencia de casos sospechosos, probables, compatibles y confirmados de enfermedades declaradas por la autoridad sanitaria nacional como de notificación obligatoria y aquellas de reporte internacional. Las instituciones y profesionales de salud, garantizarán la confidencialidad de la información entregada y recibida.

Art. 62.- La autoridad sanitaria nacional elaborará las normas, protocolos y procedimientos que deben ser obligatoriamente cumplidos y utilizados para la vigilancia epidemiológica y el control de las enfermedades transmisibles, emergentes y reemergentes de notificación obligatoria, incluyendo las de transmisión sexual.

Garantizará en sus servicios de salud, atención, acceso y disponibilidad de medicamentos, con énfasis en genéricos, exámenes de detección y seguimiento, para las enfermedades señaladas en el inciso precedente, lo cual también debe garantizar el sistema nacional de seguridad social.

Art. 63.- La autoridad sanitaria nacional en coordinación con otros organismos competentes ejecutará campañas de información y educación dirigidas al personal de salud y a la población en general, para erradicar actitudes discriminatorias contra las personas afectadas por enfermedades transmisibles.

Art. 64.- En casos de sospecha o diagnóstico de la existencia de enfermedades transmisibles, el personal de salud está obligado a tomar las medidas de bioseguridad y otras necesarias para evitar la transmisión y propagación de conformidad con las disposiciones establecidas por la autoridad sanitaria nacional.

Art. 65.- Los gobiernos seccionales deben cumplir con las disposiciones emanadas por la autoridad sanitaria nacional para evitar la proliferación de vectores, la propagación de enfermedades transmisibles y asegurar el control de las mismas.

Art. 66.- Las personas naturales y jurídicas, nacionales y extranjeras, que se encuentren en territorio ecuatoriano deben cumplir las disposiciones reglamentarias que el gobierno dicte y las medidas que la autoridad sanitaria nacional disponga de conformidad con el Reglamento Sanitario Internacional, los convenios internacionales suscritos y ratificados por el país, a fin de prevenir y evitar la propagación internacional de enfermedades transmisibles.

Art. 67.- El Estado reconoce al contagio y la transmisión del VIH-SIDA, como problema de salud pública.

La autoridad sanitaria nacional garantizará en sus servicios de salud a las personas viviendo con VIH-SIDA atención especializada, acceso y disponibilidad de medicamentos antiretrovirales y para enfermedades oportunistas con énfasis en medicamentos genéricos, así como los reactivos para exámenes de detección y seguimiento.

Las responsabilidades señaladas en este artículo corresponden también al sistema nacional de seguridad social.

Art. 68.- Se suministrará la anticoncepción que corresponda, previo consentimiento informado, a mujeres portadoras de VIH y a aquellas viviendo con SIDA. Esto incluye anticoncepción de emergencia cuando el caso lo requiera, a juicio del profesional responsable de la atención.

CAPITULO III
De las enfermedades no transmisibles

Art. 69.- La atención integral y el control de enfermedades no transmisibles, crónico - degenerativas, congénitas, hereditarias y de los problemas declarados prioritarios para la salud pública, se realizará mediante la acción coordinada de todos los integrantes del Sistema Nacional de Salud y de la participación de la población en su conjunto.

Comprenderá la investigación de sus causas, magnitud e impacto sobre la salud, vigilancia epidemiológica, promoción de hábitos y estilos de vida saludables, prevención, recuperación, rehabilitación, reinserción social de las personas afectadas y cuidados paliativos.

Los integrantes del Sistema Nacional de Salud garantizarán la disponibilidad y acceso a programas y medicamentos para estas enfermedades, con énfasis en medicamentos genéricos, priorizando a los grupos vulnerables.

CAPITULO IV
De la sangre, sus componentes y derivados

Art. 70.- Se declara de prioridad nacional la disponibilidad de sangre segura y sus componentes.

El Estado, a través de la autoridad sanitaria nacional, tomará las medidas necesarias para garantizar la disponibilidad y el acceso a sangre y componentes seguros en cantidades suficientes para quien la necesite, siendo obligatoria su provisión en las instituciones públicas, privadas y autónomas, en caso de riesgo inminente para la vida, independientemente de la capacidad de pago.

La autoridad sanitaria nacional está obligada a promover la donación voluntaria y altruista de sangre.

Art. 71.- La autoridad sanitaria nacional dictará las normas relativas a los procesos de donación, transfusión, uso y vigilancia de la calidad de la sangre humana con sus componentes y derivados, con el fin de garantizar el acceso equitativo, eficiente, suficiente y seguro, la preservación de la salud de los donantes y la máxima protección de los receptores así como del personal de salud.

Art. 72.- La autoridad sanitaria nacional licenciará, a través de la instancia competente, a los servicios de sangre (hemocentros, bancos, depósitos y servicios de transfusión) y a las plantas industriales de fraccionamiento de plasma, públicos y privados, de acuerdo a la normativa vigente.

Art. 73.- Los hemocentros, bancos, depósitos y servicios de transfusión de sangre humana, deben mantener programas de gestión y control de calidad interna y externa, así como cumplir con las demás normas y disposiciones que para el efecto dicte la autoridad sanitaria nacional.

Art. 74.- Se prohíbe la comercialización, publicidad de la misma y el lucro en el proceso de donación, obtención, procesamiento, distribución y utilización de sangre, sus derivados y componentes, por parte de personas naturales o jurídicas, públicas o privadas.

Las instituciones que realicen los procesos señalados en el inciso precedente pueden recuperar únicamente lo correspondiente a gastos de operación de los procedimientos que se realicen; cualquier cobro en exceso será sancionado.

Art. 75.- Los establecimientos autorizados para colectar unidades de sangre, previamente a su utilización en transfusiones, están obligados a realizar las pruebas para determinar el grupo y factor sanguíneo y la presencia de anticuerpos irregulares, así como las serológicas para los marcadores de infección, determinados en la reglamentación correspondiente de acuerdo con el perfil epidemiológico local, regional y nacional y los avances tecnológicos.

La separación de componentes se realizará cumpliendo las normas técnicas aplicables con el fin de asegurar la función terapéutica de los mismos.

Art. 76.- La transfusión de sangre y sus componentes, debe ser prescrita por un médico, legalmente habilitado para ejercer la profesión, practicada bajo su responsabilidad y supervisión, en condiciones que garanticen la seguridad del procedimiento y de conformidad con lo establecido en las normas técnicas.

Art. 77.- La aceptación o negativa para transfusión de sangre y sus componentes, debe realizarse por escrito de parte del potencial receptor o a través de la persona legalmente capaz para ejercer su representación, exceptuándose los casos de emergencia o urgencia.

Art. 78.- La donación voluntaria de sangre requiere de la expresa autorización libre, voluntaria y por escrito del donante.

Art. 79.- La exportación de plasma para procesamiento industrial sólo podrá realizarse hacia plantas procesadoras acreditadas y siempre que los derivados obtenidos sean recuperados para consumo nacional.

Art. 80.- Prohíbese la exportación de sangre y sus componentes, salvo casos expresos de donación originados por razones de emergencia y humanitarias según lo señalado en el artículo anterior.

TITULO III
De los trasplantes de órganos, tejidos y disposición de cadáveres

CAPITULO I
De los trasplantes de órganos y tejidos

Art. 81.- Prohíbese la comercialización de componentes anatómicos de personas vivas o fallecidas. Ninguna persona podrá ofrecer o recibir directa o indirectamente beneficios económicos o de otra índole, por la entrega u obtención de órganos y otros componentes anatómicos de personas vivas o fallecidas.

Art. 82.- La donación de órganos u otros componentes anatómicos de una persona viva, requiere de su expresa autorización, manifestada en forma libre y voluntaria.

Igualmente se podrá realizar entre personas con antígenos de histocompatibilidad entre donante y receptor, siempre que el primero exprese su deseo de ser donante voluntario.

La autoridad sanitaria nacional promoverá campañas para la donación voluntaria de órganos y tejidos.

Art. 83.- La utilización de órganos u otros componentes anatómicos de una persona con muerte cerebral confirmada de acuerdo a la regulación pertinente, se realizará si en vida la persona expresó su consentimiento, en la cedula de identidad y/o ciudadanía u otro documento legal, o se cuente con la autorización de las personas facultadas por ley.

Art. 84.- La autoridad sanitaria nacional, normará, licenciará y controlará el funcionamiento de los servicios de salud especializados, públicos y privados, para el ejercicio de actividades relacionadas con el trasplante de órganos u otros componentes anatómicos. Igualmente controlará el ejercicio profesional de quienes realicen dichas actividades.

Art. 85.- La autoridad sanitaria nacional normará la organización de los bancos de tejidos y de células, bajo los parámetros técnicos y estándares que se establezcan para el efecto.

La asignación de órganos u otros componentes anatómicos debe realizarse bajo los parámetros nacionales e internacionales, establecidos por un sistema nacional creado para este efecto.

Art. 86.- Los xenotrasplantes podrán realizarse únicamente cuando se garanticen condiciones científicas y tecnológicas que aseguren la calidad del procedimiento con sujeción a principios bioéticos, y estarán sujetos a la autorización de la autoridad sanitaria nacional a través del organismo competente.

CAPITULO II
De la disposición y manejo de cadáveres

Art. 87.- La instalación, construcción y mantenimiento de cementerios, criptas, crematorios, morgues o sitios de conservación de cadáveres, lo podrán hacer entidades públicas y privadas, para lo cual se dará cumplimiento a las normas establecidas en esta Ley.

Previamente se verificará la ubicación y la infraestructura a emplearse y que no constituyan riesgo para la salud. Deberán contar con el estudio de impacto ambiental y la correspondiente licencia ambiental.

Los cementerios y criptas son los únicos sitios autorizados para la inhumación de cadáveres y deben cumplir las normas establecidas por la autoridad sanitaria nacional y la correspondiente municipalidad.

Art. 88.- Practicada la necropsia, el cadáver debe ser obligatoriamente tratado, inhumado o cremado.

Ningún cadáver podrá mantenerse insepulto o sin someterse a cremación por más de setenta y dos horas, excepto cuando medie orden judicial o no sean reconocidos o reclamados por sus familiares o derechohabientes, en cuyo caso debe garantizarse su mantenimiento en los sitios autorizados y en condiciones de conservación adecuadas que no comprometan la integridad del cadáver ni alteren las posibles evidencias.

Art. 89.- Los cadáveres no identificados o que no fueren reclamados en el plazo de treinta días posteriores a su fallecimiento, se entregarán a título de donación a las facultades de Ciencias Médicas o de la Salud legalmente establecidas dando preferencia a las estatales, o se inhumarán de conformidad con las disposiciones pertinentes.

De los cadáveres no identificados, previa a su donación o inhumación se extraerán muestras que permita la obtención del perfil genético de la persona. Esta información será registrada en un banco de datos de cadáveres no identificados.

Art. 90.- No se podrá proceder a la inhumación o cremación de un cadáver sin que se cuente con el certificado médico que confirme la defunción y establezca sus posibles causas, de acuerdo a su diagnóstico. Esta responsabilidad corresponde a los cementerios o crematorios según el caso.

Art. 91.- La exhumación para efectos legales podrá practicarse en cualquier tiempo por orden de autoridad competente.

Art. 92.- El traslado de cadáveres, dentro del país, en los casos y condiciones establecidos en el reglamento de esta Ley, así como su ingreso al territorio nacional requiere autorización de la autoridad sanitaria nacional, quien establecerá las normas de conservación y seguridad.

Art. 93.- Las necropsias deben ser realizadas bajo responsabilidad de médicos patólogos o forenses, excepto en las localidades donde estos profesionales no existan, en cuyo caso se realizarán de acuerdo con lo establecido en el Código de Procedimiento Penal, sin costo para los familiares o deudos en las instituciones públicas.

Art. 94.- Es obligatoria la necropsia cuando:

a) No se conozca la causa del fallecimiento;
b) Por muerte repentina;
c) El Ministerio Público lo disponga;
d) En casos de emergencia sanitaria;
e) Por razones de salud pública; y,
f) Por petición y consentimiento del representante legal o pariente más cercano hasta el cuarto grado de consanguinidad y segundo de afinidad.

LIBRO II
Salud y seguridad ambiental

Disposición común

Art. 95.- La autoridad sanitaria nacional en coordinación con el Ministerio de Ambiente, establecerá las normas básicas para la preservación del ambiente en materias relacionadas con la salud humana, las mismas que serán de cumplimiento obligatorio para todas las personas naturales, entidades públicas, privadas y comunitarias.

El Estado a través de los organismos competentes y el sector privado está obligado a proporcionar a la población, información adecuada y veraz respecto del impacto ambiental y sus consecuencias para la salud individual y colectiva.

TITULO UNICO

CAPITULO I
Del agua para consumo humano

Art. 96.- Declárase de prioridad nacional y de utilidad pública, el agua para consumo humano.

Es obligación del Estado, por medio de las municipalidades, proveer a la población de agua potable de calidad, apta para el consumo humano.

Toda persona natural o jurídica tiene la obligación de proteger los acuíferos, las fuentes y cuencas hidrográficas que sirvan para el abastecimiento de agua para consumo humano. Se prohíbe realizar actividades de cualquier tipo, que pongan en riesgo de contaminación las fuentes de captación de agua. La autoridad sanitaria nacional, en coordinación con otros organismos competentes, tomarán medidas para prevenir, controlar, mitigar, remediar y sancionar la contaminación de las fuentes de agua para consumo humano.

A fin de garantizar la calidad e inocuidad, todo abastecimiento de agua para consumo humano, queda sujeto a la vigilancia de la autoridad sanitaria nacional, a quien corresponde establecer las normas y reglamentos que permitan asegurar la protección de la salud humana.

CAPITULO II

De los desechos comunes, infecciosos, especiales y de las radiaciones ionizantes y no ionizantes

Art. 97.- La autoridad sanitaria nacional dictará las normas para el manejo de todo tipo de desechos y residuos que afecten la salud humana; normas que serán de cumplimiento obligatorio para las personas naturales y jurídicas.

Art. 98.- La autoridad sanitaria nacional, en coordinación con las entidades públicas o privadas, promoverá programas y campañas de información y educación para el manejo de desechos y residuos.

Art. 99.- La autoridad sanitaria nacional, en coordinación con los municipios del país, emitirá los reglamentos, normas y procedimientos técnicos de cumplimiento obligatorio para el manejo adecuado de los desechos infecciosos que generen los establecimientos de servicios de salud, públicos o privados, ambulatorio o de internación, veterinaria y estética.

Art. 100.- La recolección, transporte, tratamiento y disposición final de desechos es responsabilidad de los municipios que la realizarán de acuerdo con las leyes, reglamentos y ordenanzas que se dicten para el efecto, con observancia de las normas de bioseguridad y control determinadas por la autoridad sanitaria nacional. El Estado entregará los recursos necesarios para el cumplimiento de lo dispuesto en este artículo.

Art. 101.- Las viviendas, establecimientos educativos, de salud y edificaciones en general, deben contar con sistemas sanitarios adecuados de disposición de excretas y evacuación de aguas servidas.

Los establecimientos educativos, públicos y privados, tendrán el número de baterías sanitarias que se disponga en la respectiva norma reglamentaria.

El Estado entregará a los establecimientos públicos los recursos necesarios para el cumplimiento de lo dispuesto en este artículo.

Art. 102.- Es responsabilidad del Estado, a través de los municipios del país y en coordinación con las respectivas instituciones públicas, dotar a la

población de sistemas de alcantarillado sanitario, pluvial y otros de disposición de excretas y aguas servidas que no afecten a la salud individual, colectiva y al ambiente; así como de sistemas de tratamiento de aguas servidas.

Art. 103.- Se prohíbe a toda persona, natural o jurídica, descargar o depositar aguas servidas y residuales, sin el tratamiento apropiado, conforme lo disponga en el reglamento correspondiente, en ríos, mares, canales, quebradas, lagunas, lagos y otros sitios similares. Se prohíbe también su uso en la cría de animales o actividades agropecuarias.

Los desechos infecciosos, especiales, tóxicos y peligrosos para la salud, deben ser tratados técnicamente previo a su eliminación y el depósito final se realizará en los sitios especiales establecidos para el efecto por los municipios del país.

Para la eliminación de desechos domésticos se cumplirán las disposiciones establecidas para el efecto.

Las autoridades de salud, en coordinación con los municipios, serán responsables de hacer cumplir estas disposiciones.

Art. 104.- Todo establecimiento industrial, comercial o de servicios, tiene la obligación de instalar sistemas de tratamiento de aguas contaminadas y de residuos tóxicos que se produzcan por efecto de sus actividades.

Las autoridades de salud, en coordinación con los municipios, serán responsables de hacer cumplir esta disposición.

Art. 105.- Las personas naturales o jurídicas propietarias de instalaciones o edificaciones, públicas o privadas, ubicadas en las zonas costeras e insulares, utilizarán las redes de alcantarillado para eliminar las aguas servidas y residuales producto de las actividades que desarrollen; y, en los casos que inevitablemente requieran eliminarlos en el mar, deberán tratarlos previamente, debiendo contar para el efecto con estudios de impacto ambiental; así como utilizar emisarios submarinos que cumplan con las normas sanitarias y ambientales correspondientes.

Art. 106.- Los terrenos por donde pasen o deban pasar redes de alcantarillado, acueductos o tuberías, se constituirán obligatoriamente en predios sirvientes, de acuerdo a lo establecido por la ley.

Las autoridades de salud, en coordinación con los municipios, serán responsables de hacer cumplir esta disposición.

Art. 107.- La autoridad sanitaria nacional en coordinación con otros organismos competentes, dictará las normas para el manejo, transporte, tratamiento y disposición final de los desechos especiales. Los desechos radioactivos serán tratados de acuerdo con las normas dictadas por el organismo competente en la materia o aceptadas mediante convenios internacionales.

Art. 108.- Corresponde a la autoridad sanitaria nacional, en coordinación con la Comisión Ecuatoriana de Energía Atómica y más organismos competentes, vigilar el cumplimiento de las normas establecidas en materia de radiaciones ionizantes y no ionizantes.

Art. 109.- Ninguna persona será sometida o expuesta a radiaciones ionizantes y no ionizantes más allá de las dosis o límites permisibles, conforme a las normas pertinentes.

Los equipos diagnósticos y terapéuticos que utilicen radiaciones ionizantes y no ionizantes se instalarán en edificaciones técnicamente apropiadas y que cumplan con requisitos sanitarios y de seguridad, establecidos por la autoridad sanitaria nacional y la Comisión Ecuatoriana de Energía Atómica; estarán sujetos a mantenimientos rigurosos y periódicos, debiendo contar con los certificados de control de calidad.

Art. 110.- Los importadores de artículos y dispositivos electrónicos que emiten radiaciones no ionizantes, deberán asegurarse que los mismos cumplan con las normas sanitarias vigentes, no estén prohibidos en su país de origen o en otros países; y, lleven la rotulación de precauciones e indicaciones claras sobre su uso.

CAPITULO III
Calidad del aire y de la contaminación acústica

Art. 111.- La autoridad sanitaria nacional, en coordinación con la autoridad ambiental nacional y otros organismos competentes, dictará las normas técnicas para prevenir y controlar todo tipo de emanaciones que afecten a los sistemas respiratorio, auditivo y visual.

Todas las personas naturales y jurídicas deberán cumplir en forma obligatoria dichas normas.

Art. 112.- Los municipios desarrollarán programas y actividades de monitoreo de la calidad del aire, para prevenir su contaminación por emisiones provenientes de fuentes fijas, móviles y de fenómenos naturales. Los resultados del monitoreo serán reportados periódicamente a las autoridades competentes a fin de implementar sistemas de información y prevención dirigidos a la comunidad.

Art. 113.- Toda actividad laboral, productiva, industrial, comercial, recreativa y de diversión; así como las viviendas y otras instalaciones y medios de transporte, deben cumplir con lo dispuesto en las respectivas normas y reglamentos sobre prevención y control, a fin de evitar la contaminación por ruido, que afecte a la salud humana.

CAPITULO IV
Plaguicidas y otras sustancias químicas

Art. 114.- La autoridad sanitaria nacional, en coordinación con el Ministerio de Agricultura y Ganadería y más organismos competentes, dictará e implementará las normas de regulación para la utilización y control de plaguicidas, fungicidas y otras sustancias químicas de uso doméstico, agrícola e industrial, que afecten a la salud humana.

Art. 115.- Se deben cumplir las normas y regulaciones nacionales e internacionales para la producción, importación, exportación, comercialización, uso y manipulación de plaguicidas, fungicidas y otro tipo de sustancias químicas cuya inhalación, ingestión o contacto pueda causar daño a la salud de las personas.

Art. 116.- Se prohíbe la producción, importación, comercialización y uso de plaguicidas, fungicidas y otras sustancias químicas, vetadas por las normas sanitarias nacionales e internacionales, así como su aceptación y uso en calidad de donaciones.

CAPITULO V
Salud y seguridad en el trabajo

Art. 117.- La autoridad sanitaria nacional, en coordinación con el Ministerio de Trabajo y Empleo y el Instituto Ecuatoriano de Seguridad Social, establecerá las normas de salud y seguridad en el trabajo para proteger la salud de los trabajadores.

Art. 118.- Los empleadores protegerán la salud de sus trabajadores, dotándoles de información suficiente, equipos de protección, vestimenta apropiada, ambientes seguros de trabajo, a fin de prevenir, disminuir o eliminar los riesgos, accidentes y aparición de enfermedades laborales.

Art. 119.- Los empleadores tienen la obligación de notificar a las autoridades competentes, los accidentes de trabajo y enfermedades laborales, sin perjuicio de las acciones que adopten tanto el Ministerio del Trabajo y Empleo como el Instituto Ecuatoriano de Seguridad Social.

Art. 120.- La autoridad sanitaria nacional, en coordinación con el Ministerio del Trabajo y Empleo y el Instituto Ecuatoriano de Seguridad Social, vigilará y controlará las condiciones de trabajo, de manera que no resulten nocivas o insalubres durante los períodos de embarazo y lactancia de las mujeres trabajadoras.

Los empleadores tienen la obligación de cumplir las normas y adecuar las actividades laborales de las mujeres embarazadas y en período de lactancia.

Art. 121.- Las instituciones públicas o privadas cuyo personal esté expuesto a radiación ionizante y emisiones no ionizantes, están obligadas a proveer de dispositivos de cuidado y control de radiación y de condiciones de seguridad en el trabajo que prevengan riesgos para la salud.

El incumplimiento de esta disposición por parte de los empleadores, que ocasione daño a la salud del trabajador, dará lugar a la aplicación de la sanción determinada por la ley.

CAPITULO VI
Del control de la fauna nociva y las zooantroposis

Art. 122.- La autoridad sanitaria nacional organizará campañas para erradicar la proliferación de vectores y otros animales que representen riesgo para la salud individual y colectiva.

Las personas naturales y jurídicas colaborarán con estas campañas.

Art. 123.- Es obligación de los propietarios de animales domésticos vacunarlos contra la rabia y otras enfermedades que la autoridad sanitaria nacional declare susceptibles de causar epidemias, así como mantenerlos en condiciones que no constituyan riesgo para la salud humana y la higiene del entorno.

El control y manejo de los animales callejeros es responsabilidad de los municipios, en coordinación con las autoridades de salud.

Art. 124.- Se prohíbe dentro del perímetro urbano instalar establos o granjas para criar o albergar ganado vacuno, equino, bovino, caprino, porcino, así como aves de corral y otras especies.

Art. 125.- Se prohíbe el faenamiento, transporte, industrialización y comercialización de animales muertos o sacrificados que hubieren padecido enfermedades nocivas para la salud humana.

Art. 126.- El ingreso de animales al país está sujeto al cumplimiento de las disposiciones legales y normativas emitidas por las autoridades correspondientes, los convenios internacionales y otras leyes que regulen el tráfico de animales.

Se prohíbe la entrada al país de animales afectados por enfermedades transmisibles a la población o sospechosos de estarlo, o que sean portadores de agentes patógenos cuya diseminación pueda constituir peligro para la salud de las personas.

Art. 127.- Toda persona procederá al exterminio de artrópodos, roedores y otras especies nocivas para la salud que existan en su vivienda, otros inmuebles y anexos de su propiedad o de su uso.

Será, además, obligación de la autoridad sanitaria nacional, impulsar campañas masivas para hacer efectivo el cumplimiento de este propósito.

Art. 128.- Las empresas que se dediquen al exterminio o control de plagas y vectores transmisores de enfermedades como dengue, rabia y paludismo, deberán obtener el respectivo permiso emitido por la autoridad sanitaria nacional para operar. Todos los químicos usados por dichas empresas deberán ser aprobados por dicha autoridad.

LIBRO III

Vigilancia y control sanitario

Disposiciones comunes

Art. 129.- El cumplimiento de las normas de vigilancia y control sanitario es obligatorio para todas las instituciones, organismos y establecimientos públicos y privados que realicen actividades de producción, importación, exportación, almacenamiento, transporte, distribución, comercialización y expendio de productos de uso y consumo humano.

La observancia de las normas de vigilancia y control sanitario se aplican también a los servicios de salud públicos y privados, con y sin fines de lucro, autónomos, comunitarios y de las empresas privadas de salud y medicina prepagada.

Art. 130.- Los establecimientos sujetos a control sanitario para su funcionamiento deberán contar con el permiso otorgado por la autoridad sanitaria nacional. El permiso de funcionamiento tendrá vigencia de un año calendario.

Art. 131.- El cumplimiento de las normas de buenas prácticas de manufactura, almacenamiento, distribución, dispensación y farmacia, será controlado y certificado por la autoridad sanitaria nacional.

Art. 132.- Las actividades de vigilancia y control sanitario incluyen las de control de calidad, inocuidad y seguridad de los productos procesados de uso y consumo humano, así como la verificación del cumplimiento de los requisitos técnicos y sanitarios en los establecimientos dedicados a la producción, almacenamiento, distribución, comercialización, importación y exportación de los productos señalados.

Art. 133.- La autoridad sanitaria nacional podrá delegar a los municipios, dentro de sus funciones, el ejercicio de las acciones necesarias para el control sanitario, quienes las realizarán de acuerdo con las disposiciones y normas emitidas por dicha autoridad.

Art. 134.- La instalación, transformación, ampliación y traslado de plantas industriales, procesadoras de alimentos, establecimientos farmacéuticos, de producción de biológicos, de elaboración de productos naturales procesados de uso medicinal, de producción de homeopáticos, plaguicidas, productos dentales, empresas de cosméticos y productos higiénicos, están sujetos a la obtención, previa a su uso, del permiso otorgado por la autoridad sanitaria nacional.

Art. 135.- Compete a la autoridad sanitaria nacional autorizar la importación de todo producto inscrito en el registro sanitario, incluyendo muestras médicas y aquellos destinados a consumo interno procedentes de zonas francas.

No se autorizará la importación de productos, ni aún con fines promocionales, si previamente no tienen el registro sanitario nacional, salvo las excepciones determinadas en esta Ley.

Art. 136.- Las materias primas para elaboración de productos sujetos a registro sanitario, no requieren para su importación cumplir con este registro, siempre que justifiquen su utilización en dichos productos.

TITULO UNICO

CAPITULO I
Del registro sanitario

Art. 137.- Están sujetos a registro sanitario los alimentos procesados, aditivos alimentarios, medicamentos en general, productos nutracéuticos, productos biológicos, naturales procesados de uso medicinal, medicamentos homeopáticos y productos dentales; dispositivos médicos, reactivos bioquímicos y de diagnóstico, productos higiénicos, plaguicidas para uso doméstico e industrial, fabricados en el territorio nacional o en el exterior, para su

importación, exportación, comercialización, dispensación y expendio, incluidos los que se reciban en donación.

Las donaciones de productos sujetos a registro sanitario se someterán a la autorización y requisitos establecidos en el reglamento que para el efecto dicte la autoridad sanitaria nacional.

Art. 138.- La autoridad sanitaria nacional a través de su organismo competente, Instituto Nacional de Higiene y Medicina Tropical Dr. Leopoldo Izquieta Pérez, quien ejercerá sus funciones en forma desconcentrada, otorgará, suspenderá, cancelará o reinscribirá el certificado de registro sanitario, previo el cumplimiento de los trámites, requisitos y plazos señalados en esta Ley y sus reglamentos, de acuerdo a las directrices y normas emitidas por la autoridad sanitaria nacional, la misma que fijará el pago de un importe para la inscripción y reinscripción de dicho certificado de registro sanitario, cuyos valores estarán destinados al desarrollo institucional, que incluirá de manera prioritaria un programa nacional de control de calidad e inocuidad posregistro.

La autoridad sanitaria nacional, ejercerá control administrativo, técnico y financiero del Instituto Nacional de Higiene y Medicina Tropical Dr. Leopoldo Izquieta Pérez y evaluará anualmente los resultados de la gestión para los fines pertinentes.

El informe técnico analítico para el otorgamiento del registro sanitario, así como los análisis de control de calidad posregistro, deberán ser elaborados por el Instituto Nacional de Higiene y Medicina Tropical, Dr. Leopoldo Izquieta Pérez, y por laboratorios, universidades y escuelas politécnicas, previamente acreditados por el organismo competente, de conformidad con la normativa aplicable, procedimientos que están sujetos al pago del importe establecido por la autoridad sanitaria nacional.

Art. 139.- El registro sanitario tendrá vigencia de cinco años, contados a partir de la fecha de su concesión. Todo cambio de la condición en que el producto fue aprobado en el registro sanitario debe ser notificado obligatoriamente a la autoridad sanitaria nacional a través del Instituto Nacional de Higiene y Medicina Tropical Dr. Leopoldo Izquieta Pérez y, dará lugar al procedimiento que señale la ley y sus reglamentos.

Para el trámite de registro sanitario no se considerará como requisito la patente de los productos.

El registro sanitario de medicamentos no da derecho de exclusividad en el uso de la fórmula.

Art. 140.- Queda prohibida la importación, exportación, comercialización y expendio de productos procesados para el uso y consumo humano que no cumplan con la obtención previa del registro sanitario, salvo las excepciones previstas en esta Ley.

Art. 141.- El registro sanitario será suspendido o cancelado por la autoridad sanitaria nacional a través del Instituto Nacional de Higiene y Medicina Tropical Dr. Leopoldo Izquieta Pérez, en cualquier tiempo si se comprobase que el producto o su fabricante no cumplen con los requisitos y condiciones establecidos en esta Ley y sus reglamentos o cuando el producto pudiere provocar perjuicio a la salud, y se aplicarán las demás sanciones señaladas en esta Ley.

En todos los casos, el titular del registro o la persona natural o jurídica responsable, deberá resarcir plenamente cualquier daño que se produjere a terceros, sin perjuicio de otras acciones legales a las que hubiere lugar.

Art. 142.- La autoridad sanitaria nacional a través de sus organismos competentes, realizará periódicamente controles posregistro de todos los productos sujetos a registro sanitario mediante toma de muestras para análisis de control de calidad e inocuidad, sea en los lugares de fabricación, almacenamiento, transporte, distribución o expendio. Realizará además

inspecciones a los establecimientos. Si detectare que alguna entidad comercial o industrial usare un número de registro sanitario no autorizado para ese producto, la autoridad sanitaria nacional suspenderá la comercialización del o los productos, sin perjuicio de las sanciones de ley.

Art. 143.- La publicidad y promoción de los productos sujetos a registro sanitario deberá ajustarse a su verdadera naturaleza, composición, calidad u origen, de modo tal que se evite toda concepción errónea de sus cualidades o beneficios, lo cual será controlado por la autoridad sanitaria nacional.

Se prohíbe la publicidad por cualquier medio de medicamentos sujetos a venta bajo prescripción.

Art. 144.- La autoridad sanitaria nacional podrá autorizar la importación de medicamentos, productos biológicos, dispositivos médicos, reactivos bioquímicos y de diagnóstico no inscritos en el registro sanitario, en casos de emergencia sanitaria o para personas que requieren tratamientos especializados no disponibles en el país, así como para fines de investigación clínica humana, previo el cumplimiento de los requisitos establecidos para el efecto. Los medicamentos, productos biológicos, dispositivos médicos, reactivos bioquímicos y de diagnóstico autorizados serán los específicos para cada situación.

CAPITULO II
De los alimentos

Art. 145.- Es responsabilidad de los productores, expendedores y demás agentes que intervienen durante el ciclo producción consumo, cumplir con las normas establecidas en esta Ley y demás disposiciones vigentes para asegurar la calidad e inocuidad de los alimentos para consumo humano.

Art. 146.- En materia de alimentos se prohíbe:

a) El uso de aditivos para disimular, atenuar o corregir las deficiencias tecnológicas de producción, manipulación o conservación y para resaltar fraudulentamente sus características;
b) La utilización, importación y comercialización de materias primas no aptas para consumo humano;
c) La inclusión de substancias nocivas que los vuelvan peligrosos o potencialmente perjudiciales para la salud de los consumidores;
d) El uso de materias primas y productos tratados con radiaciones ionizantes o que hayan sido genéticamente modificados en la elaboración de fórmulas para lactantes y alimentos infantiles;
e) El procesamiento y manipulación en condiciones no higiénicas;
f) La utilización de envases que no cumplan con las especificaciones técnicas aprobadas para el efecto;
g) La oferta de un alimento procesado con nombres, marcas, gráficos o etiquetas que hagan aseveraciones falsas o que omitan datos de manera que se confunda o lleve a error al consumidor;
h) El almacenamiento de materias primas o alimentos procesados en locales en los que se encuentren substancias nocivas o peligrosas;
i) Cualquier forma de falsificación, contaminación, alteración o adulteración, o cualquier procedimiento que produzca el efecto de volverlos nocivos o peligrosos para la salud humana; y,
j) La exhibición y venta de productos cuyo período de vida útil haya expirado.

Art. 147.- La autoridad sanitaria nacional, en coordinación con los municipios, establecerá programas de educación sanitaria para productores, manipuladores y consumidores de alimentos, fomentando la higiene, la salud individual y colectiva y la protección del medio ambiente.

Art. 148.- El control del expendio de alimentos y bebidas en la vía pública lo realizarán los municipios, en coordinación con la autoridad sanitaria nacional y de conformidad con lo establecido en la Ley Orgánica de Régimen Municipal.

Art. 149.- El desarrollo, tratamiento, elaboración, producción, aplicación, manipulación, uso, almacenamiento, transporte, distribución, importación, comercialización y expendio de alimentos para consumo humano que sean o contengan productos genéticamente modificados, se realizará cuando se demuestre ante la autoridad competente, mediante estudios técnicos y científicamente avanzados, su inocuidad y seguridad para los consumidores y el medio ambiente.

Para cumplir con este propósito, la autoridad sanitaria nacional deberá coordinar con los organismos técnicos públicos y privados correspondientes.

Art. 150.- La donación de alimentos que contengan productos genéticamente modificados, así como su utilización, uso y manejo en planes y programas y planes de ayuda alimentaria, serán aceptados si es que mediante procedimientos técnicos y científicamente avanzados, demuestren su inocuidad y seguridad ante la autoridad sanitaria nacional.

Para cumplir con este propósito, la autoridad sanitaria nacional actuará de conformidad con los principios universales en materia de salud pública y lo establecido en el inciso segundo del artículo precedente.

Art. 151.- Los envases de los productos que contengan alimentos genéticamente modificados, sean nacionales o importados, deben incluir obligatoriamente, en forma visible y comprensible en sus etiquetas, el señalamiento de esta condición, además de los otros requisitos que establezca la autoridad sanitaria nacional, de conformidad con la ley y las normas reglamentarias que se dicten para el efecto.

Art. 152.- La autoridad sanitaria nacional, en coordinación con los organismos competentes, establecerá e implementará un sistema nacional integrado para garantizar la inocuidad de los alimentos.

CAPITULO III
De los medicamentos

Art. 153.- Todo medicamento debe ser comercializado en establecimientos legalmente autorizados.

Para la venta al público se requiere de receta emitida por profesionales facultados para hacerlo, a excepción de los medicamentos de venta libre, clasificados como tales con estricto apego a normas farmacológicas actualizadas, a fin de garantizar la seguridad de su uso y consumo.

Art. 154.- El Estado garantizará el acceso y disponibilidad de medicamentos de calidad y su uso racional, priorizando los intereses de la salud pública sobre los económicos y comerciales.

Promoverá la producción, importación, comercialización, dispensación y expendio de medicamentos genéricos con énfasis en los esenciales, de conformidad con la normativa vigente en la materia. Su uso, prescripción, dispensación y expendio es obligatorio en las instituciones de salud pública.

Art. 155.- Los medicamentos en general, incluyendo los productos que contengan nuevas entidades químicas que obtengan registro sanitario nacional y no sean comercializados por el lapso de un año, serán objeto de cancelación de dicho registro sanitario.

Art. 156.- La autoridad sanitaria nacional autorizará la importación de medicamentos en general, en las cantidades necesarias para la obtención del requisito sanitario, de conformidad con lo previsto en el reglamento correspondiente.

Art. 157.- La autoridad sanitaria nacional garantizará la calidad de los medicamentos en general y desarrollará programas de fármaco vigilancia y estudios de utilización de medicamentos, entre otros, para precautelar la seguridad de su uso y consumo.

Además realizará periódicamente controles posregistro y estudios de utilización de medicamentos para evaluar y controlar los estándares de calidad, seguridad y eficacia y sancionar a quienes comercialicen productos que no cumplan dichos estándares, falsifiquen o adulteren los productos farmacéuticos.

Art. 158.- El desarrollo, la producción, manipulación, uso, almacenamiento, transporte, distribución, importación, comercialización y expendio de productos nutraceúticos, será permitido cuando se demuestre técnica y científicamente ante la autoridad sanitaria nacional, su seguridad para el consumidor y el ambiente. El registro y control sanitarios de estos productos se sujetará a las regulaciones vigentes para medicamentos.

Art. 159.- Corresponde a la autoridad sanitaria nacional la fijación, revisión y control de precios de los medicamentos de uso y consumo humano a través del Consejo Nacional de Fijación y Revisión de Precios de Medicamentos de Uso Humano, de conformidad con la ley.

Se prohíbe la comercialización de los productos arriba señalados sin fijación o revisión de precios.

Art. 160.- Para efectos de la fijación y revisión de precios de los medicamentos de uso y consumo humano, los gastos de publicidad y promoción serán regulados de conformidad con la ley y la normativa vigente, para que no afecten al acceso a los medicamentos y a los derechos de los consumidores.

Art. 161.- Para la fijación y revisión de precios de medicamentos importados, se considerará el precio en el puerto de embarque (FOB) del país de origen del producto, el mismo que no podrá ser superior a los precios de venta al distribuidor o mayorista del país de origen.

Art. 162.- Los precios de venta al público deben estar impresos en los envases de manera que no puedan ser removidos. Se prohíbe alterar los precios o colocar etiquetas que los modifiquen.

Art. 163.- Los laboratorios farmacéuticos, distribuidoras farmacéuticas, casas de representación de medicamentos, dispositivos médicos, productos dentales, reactivos bioquímicos y de diagnóstico, en las ventas que realicen a las instituciones públicas descontarán un porcentaje no inferior al 15% del precio de venta a farmacia.

CAPITULO IV
De los productos naturales procesados de uso medicinal

Art. 164.- Los productos naturales procesados de uso medicinal, se producirán, almacenarán, comercializarán e importarán siempre que cuenten con registro sanitario nacional, de conformidad con la ley y el reglamento correspondiente y bajo las normas de calidad emitidas por la autoridad sanitaria nacional.

CAPITULO V
De los establecimientos farmacéuticos

Art. 165.- Para fines legales y reglamentarios, son establecimientos farmacéuticos los laboratorios farmacéuticos, casas de representación de medicamentos, distribuidoras farmacéuticas, farmacias y botiquines, que se encuentran en todo el territorio nacional.

Art. 166.- Las farmacias deben atender al público mínimo doce horas diarias, ininterrumpidas y cumplir obligatoriamente los turnos establecidos por la autoridad sanitaria nacional. Requieren obligatoriamente para su funcionamiento la dirección técnica y responsabilidad de un profesional químico farmacéutico o bioquímico farmacéutico, quien brindará atención farmacéutica especializada.

Los botiquines estarán a cargo de personas calificadas y certificadas para el manejo de medicamentos. La autorización para su funcionamiento es transitoria y revocable.

La autoridad sanitaria nacional implementará farmacias y botiquines institucionales, debidamente equipados, en todas sus unidades operativas de acuerdo al nivel de complejidad.

Art. 167.- La receta emitida por los profesionales de la salud facultados por ley para hacerlo, debe contener obligatoriamente y en primer lugar el nombre genérico del medicamento prescrito.

Quien venda informará obligatoriamente al comprador sobre la existencia del medicamento genérico y su precio.

No se aceptarán recetas ilegibles, alteradas o en clave.

Art. 168.- Son profesionales de la salud humana facultados para prescribir medicamentos, los médicos, odontólogos y obstetrices.

Art. 169.- La venta de medicamentos al público al por menor sólo puede realizarse en establecimientos autorizados para el efecto.

Art. 170.- Los medicamentos, para su venta deben cumplir con los siguientes requisitos:

a) Estar debidamente identificados y etiquetados, sin alteraciones ni enmiendas;
b) Contener en sus etiquetas el número de registro sanitario nacional, el precio de venta al público y la fecha de expiración;
c) No estar caducados;
d) No provenir de instituciones de servicio social, de programas sociales estatales, de donaciones o ser muestras médicas;
e) No haber sido introducidos clandestinamente al país;
f) No ser falsificados o adulterados; y,
g) No tener colocados elementos sobre las etiquetas que impidan la visibilidad de la información del producto, incluidas las que contienen los precios.

Art. 171.- Es prohibida la venta de medicamentos que contengan sustancias psicotrópicas y estupefacientes que no cuenten con receta emitida por profesionales autorizados para prescribirlas. Cuando se requiera la prescripción y venta de medicamentos que contengan estas sustancias, se realizará conforme a las normas emitidas por la autoridad sanitaria nacional y la Ley de Sustancias Estupefacientes y Psicotrópicas.

Art. 172.- En las farmacias y botiquines no se podrá ofrecer o dar consulta médica, obstétrica, odontológica, aplicar tratamientos, realizar toma de muestras ni tener laboratorios clínicos.

Art. 173.- Todo establecimiento farmacéutico debe contar con la responsabilidad técnica de un profesional químico farmacéutico o bioquímico farmacéutico, quien puede tener bajo su responsabilidad técnica uno o más establecimientos farmacéuticos, de conformidad con lo que establezca el reglamento.

El reglamento de aplicación de esta Ley normará lo relacionado a este servicio, en los lugares en donde no existan suficientes profesionales ni establecimientos farmacéuticos.

Art. 174.- Se prohíbe a los expendedores de farmacias recomendar la utilización de medicamentos que requieran receta médica o cambiar la sustancia activa prescrita, sin la autorización escrita del prescriptor.

Art. 175.- Sesenta días antes de la fecha de caducidad de los medicamentos, las farmacias y botiquines notificarán a sus proveedores, quienes tienen la obligación de retirar dichos productos y canjearlos de acuerdo con lo que establezca la reglamentación correspondiente.

Art. 176.- Los medicamentos caducados referidos en el artículo anterior deben ser destruidos y eliminados por los fabricantes o importadores, conforme

a los procedimientos establecidos por la autoridad sanitaria nacional y bajo su supervisión.

CAPITULO VI
Otros establecimientos sujetos a control sanitario

Art. 177.- Es responsabilidad de la autoridad sanitaria nacional, expedir normas y controlar las condiciones higiénico sanitarias de establecimientos de servicios de atención al público y otros sujetos a control sanitario, para el otorgamiento o renovación del permiso de funcionamiento.

En el caso de establecimientos educativos públicos y privados, vigilará, controlará y evaluará periódicamente la infraestructura y condiciones higiénico sanitarias requisitos necesarios para su funcionamiento.

Art. 178.- Los establecimientos de producción, almacenamiento, envase o expendio de productos naturales de uso medicinal y de medicamentos homeopáticos, requieren para su instalación y funcionamiento del permiso otorgado por la autoridad sanitaria nacional.

Art. 179.- Las casas de representación y distribuidoras de productos dentales, dispositivos médicos, reactivos bioquímicos y de diagnóstico, para su funcionamiento deberán obtener el permiso de la autoridad sanitaria nacional.

LIBRO IV
De los servicios y profesiones de salud

TITULO UNICO

CAPITULO I
De los servicios de salud

Art. 180.- La autoridad sanitaria nacional regulará, licenciará y controlará el funcionamiento de los servicios de salud públicos y privados, con y sin fines de lucro, autónomos, comunitarios y de las empresas privadas de salud y medicina prepagada y otorgará su permiso de funcionamiento.

Regulará los procesos de licenciamiento y acreditación.

Regulará y controlará el cumplimiento de la normativa para la construcción, ampliación y funcionamiento de estos establecimientos de acuerdo a la tipología, basada en la capacidad resolutiva, niveles de atención y complejidad.

Art. 181.- La autoridad sanitaria nacional regulará y vigilará que los servicios de salud públicos y privados, con y sin fines de lucro, autónomos y las empresas privadas de salud y medicina prepagada, garanticen atención oportuna, eficiente y de calidad según los enfoques y principios definidos en esta Ley.

Art. 182.- La autoridad sanitaria nacional, regulará y aprobará las tarifas de los servicios de salud y las de los planes y programas de las empresas de servicios de salud y medicina prepagada, de conformidad con el reglamento que se emita para el efecto.

Art. 183.- El contrato de prestación de servicios de medicina prepagada debe ser aprobado por la autoridad sanitaria nacional.

Es obligación de las empresas de medicina prepagada obtener dicha aprobación y hacerla constar en el contrato respectivo.

Art. 184.- Es obligación de los servicios de salud exhibir en sitios visibles para el público, las tarifas que se cobran por sus servicios, las mismas que deben estar aprobadas por la autoridad sanitaria nacional.

Art. 185.- Los servicios de salud funcionarán, de conformidad con su ámbito de competencia, bajo la responsabilidad técnica de un profesional de la salud.

Art. 186.- Es obligación de todos los servicios de salud que tengan salas de emergencia, recibir y atender a los pacientes en estado de emergencia. Se prohíbe exigir al paciente o a las personas relacionadas un pago, compromiso económico o trámite administrativo, como condición previa a que la persona sea recibida, atendida y estabilizada en su salud.

Una vez que el paciente haya superado la emergencia, el establecimiento de salud privado podrá exigir el pago de los servicios que recibió.

Art. 187.- Los valores no recuperados por el servicio de salud por la atención a un paciente en estado de emergencia, cuya imposibilidad de pago esté debidamente comprobada, se deducirán del impuesto a la renta de conformidad con las disposiciones de la Ley de Régimen Tributario Interno.

Art. 188.- La autoridad sanitaria nacional, regulará y vigilará que los servicios de salud públicos y privados apliquen las normas de prevención y control de infecciones nosocomiales.

CAPITULO II
De las medicinas tradicionales y alternativas

Art. 189.- Los integrantes del Sistema Nacional de Salud respetarán y promoverán el desarrollo de las medicinas tradicionales, incorporarán el enfoque intercultural en las políticas, planes, programas, proyectos y modelos de atención de salud, e integrarán los conocimientos de las medicinas tradicionales y alternativas en los procesos de enseñanza - aprendizaje.

Art. 190.- La autoridad sanitaria nacional promoverá e impulsará el intercambio de conocimientos entre los distintos agentes de las medicinas tradicionales, fomentará procesos de investigación de sus recursos diagnósticos y terapéuticos en el marco de los principios establecidos en esta Ley, protegiendo los derechos colectivos de los pueblos indígenas y negros o afroecuatorianos.

Art. 191.- La autoridad sanitaria nacional implementará procesos de regulación y control, para evitar que las prácticas de las medicinas tradicionales atenten a la salud de las personas.

Art. 192.- Los integrantes del Sistema Nacional de Salud respetarán y promoverán el desarrollo de las medicinas alternativas en el marco de la atención integral de salud.

Las medicinas alternativas deben ser ejercidas por profesionales de la salud con títulos reconocidos y certificados por el CONESUP y registrados ante la autoridad sanitaria nacional.

Las terapias alternativas requieren para su ejercicio, el permiso emitido por la autoridad sanitaria nacional.

CAPITULO III
De las profesiones de salud, afines y su ejercicio

Art. 193.- Son profesiones de la salud aquellas cuya formación universitaria de tercer o cuarto nivel está dirigida específica y fundamentalmente a dotar a los profesionales de conocimientos, técnicas y prácticas, relacionadas con la salud individual y colectiva y al control de sus factores condicionantes.

Art. 194.- Para ejercer como profesional de salud, se requiere haber obtenido título universitario de tercer nivel, conferido por una de las universidades establecidas y reconocidas legalmente en el país, o por una del exterior, revalidado y refrendado. En uno y otro caso debe estar registrado ante el CONESUP y por la autoridad sanitaria nacional.

Art. 195.- Los títulos de nivel técnico superior o tecnológico así como los de auxiliares en distintas ramas de la salud, para su habilitación deben ser registrados en las instancias respectivas e inscritos ante la autoridad sanitaria nacional.

Art. 196.- La autoridad sanitaria nacional analizará los distintos aspectos relacionados con la formación de recursos humanos en salud, teniendo en cuenta las necesidades nacionales y locales, con la finalidad de promover entre las instituciones formadoras de recursos humanos en salud, reformas en los planes y programas de formación y capacitación.

Art. 197.- Para la habilitación del ejercicio profesional y el registro correspondiente, los profesionales de salud deben realizar un año de práctica en las parroquias rurales o urbano marginales, con remuneración, en concordancia con el modelo de atención y de conformidad con el reglamento correspondiente en los lugares destinados por la autoridad sanitaria nacional, al término del cual se le concederá la certificación que acredite el cumplimiento de la obligación que este artículo establece.

La autoridad sanitaria nacional en coordinación con organismos seccionales y organizaciones de base, controlará la asignación y el cumplimiento del año obligatorio por parte de los profesionales que cumplen el año de salud rural.

Se prohíbe el ejercicio de la práctica rural en unidades operativas urbanas de segundo y tercer nivel.

Art. 198.- Los profesionales y técnicos de nivel superior que ejerzan actividades relacionadas con la salud, están obligados a limitar sus acciones al área que el título les asigne.

Art. 199.- Corresponde a la autoridad sanitaria nacional la investigación y sanción de la práctica ilegal, negligencia, impericia, imprudencia e inobservancia en el ejercicio de las profesiones de la salud, sin perjuicio de la acción de la justicia ordinaria.

Art. 200.- El profesional que ampare con su título o con su firma el ejercicio de las profesiones de la salud a personas no autorizadas, sin perjuicio de lo establecido en esta Ley, será sancionado de acuerdo con la legislación aplicable.

Art. 201.- Es responsabilidad de los profesionales de salud, brindar atención de calidad, con calidez y eficacia, en el ámbito de sus competencias, buscando el mayor beneficio para la salud de sus pacientes y de la población, respetando los derechos humanos y los principios bioéticos.

Es su deber exigir condiciones básicas para el cumplimiento de lo señalado en el inciso precedente.

Art. 202.- Constituye infracción en el ejercicio de las profesiones de salud, todo acto individual e intransferible, no justificado, que genere daño en el paciente y sea resultado de:

a) Inobservancia, en el cumplimiento de las normas;
b) Impericia, en la actuación del profesional de la salud con falta total o parcial de conocimientos técnicos o experiencia;
c) Imprudencia, en la actuación del profesional de la salud con omisión del cuidado o diligencia exigible; y,
d) Negligencia, en la actuación del profesional de la salud con omisión o demora injustificada en su obligación profesional.

Art. 203.- Los servicios de salud, serán corresponsables civilmente, de las actuaciones de los profesionales de la salud que laboran en ellos.

Art. 204.- El consentimiento o autorización del paciente o de la persona que le representa legalmente, no exime de responsabilidad al profesional o al servicio de salud en aquellos casos determinados en el artículo 202 de esta Ley.

CAPITULO IV
De la capacitación sanitaria

Art. 205.- Créase la carrera sanitaria para los recursos humanos del Sistema Nacional de Salud, basada en el criterio de clasificación por niveles de formación y estructura ocupacional, con el propósito de establecer sus obligaciones y derechos, así como los incentivos que permitan garantizar la equidad, calidad en la atención y el servicio, la asignación adecuada y suficiente de recursos humanos en las distintas zonas del país.

La autoridad sanitaria nacional promoverá y desarrollará, dentro de la carrera sanitaria, un plan nacional de educación permanente con enfoque de género y pluricultural, para mejorar la productividad, calidad del desempeño laboral y promoción de sus recursos humanos.

Art. 206.- La autoridad sanitaria nacional establecerá planes de capacitación y evaluación permanente de los profesionales y recursos humanos en salud e implementará promociones e incentivos.

LIBRO V
TITULO UNICO

Investigación científica en salud, genética y sistema de información en salud

CAPITULO I
De la investigación científica en salud

Art. 207.- La investigación científica en salud así como el uso y desarrollo de la biotecnología, se realizará orientada a las prioridades y necesidades nacionales, con sujeción a principios bioéticos, con enfoques pluricultural, de derechos y de género, incorporando las medicinas tradicionales y alternativas.

Art. 208.- La investigación científica tecnológica en salud será regulada y controlada por la autoridad sanitaria nacional, en coordinación con los organismos competentes, con sujeción a principios bioéticos y de derechos, previo consentimiento informado y por escrito, respetando la confidencialidad.

CAPITULO II
De la genética humana

Art. 209.- La autoridad sanitaria nacional normará, licenciará y controlará el funcionamiento de los servicios de salud especializados, públicos y privados, para el ejercicio de actividades relacionadas con la investigación y desarrollo de la genética humana. Igualmente controlará el ejercicio profesional de quienes realicen dichas actividades, que deberán necesariamente tener especialidad en el área de genética o afines.

Art. 210.- Sólo podrán hacerse pruebas de identificación humana, filiación y compatibilidad de antígenos para:

a) Trasplantes;
b) Estudios mutacionales;
c) Ligamiento genético;
d) Pruebas predictivas de enfermedades genéticas.
e) Pruebas para detectar la predisposición genética a una enfermedad;
f) Fines terapéuticos; y,
g) Otras que se desarrollen con fines de salud genética.

Estas pruebas deberán contar con asesoramiento y supervisión genético especializado, siguiendo procedimientos científicamente probados, con sujeción y respeto a los principios bioéticos.

Art. 211.- Se prohíbe toda forma de discriminación de una persona a causa de su patrimonio genético.

Es obligatorio guardar confidencialidad respecto al genoma individual de la persona.

Art. 212.- Se prohíbe la intervención genética sobre células de la línea germinal y células madre, con fines de experimentación y lucro.

Podrán efectuarse intervenciones sobre el genoma humano, células de la línea germinal y células madre únicamente por razones predictivas, preventivas, diagnósticas o terapéuticas, siempre que se disponga de asesoramiento genético especializado, procedimientos científicamente probados y seguros, previo consentimiento informado, expreso y escrito de la persona y que sea de beneficio social y eugenésico.

Art. 213.- No se podrán patentar genes ni derivados celulares humanos naturales.

Art. 214.- Se prohíben las prácticas de clonación de seres humanos, así como la obtención de embriones humanos con fines de experimentación.

La autoridad sanitaria nacional procurará y fomentará la integración y trabajo cooperativo de los centros de investigación y desarrollo de la genética.

CAPITULO III
Del sistema común de información

Art. 215.- La autoridad sanitaria nacional con la participación de los integrantes del Sistema Nacional de Salud, implementará el sistema común de información con el fin de conocer la situación de salud, identificar los riesgos para las personas y el ambiente, dimensionar los recursos disponibles y la producción de los servicios, para orientar las decisiones políticas y gerenciales y articular la participación ciudadana en todos los niveles, entre otras.

Este sistema incorporará los enfoques pluricultural, multiétnico, de género, las particularidades regionales y poblacionales, así como la división político - administrativa del país.

LIBRO SEXTO
Jurisdicción, competencia, procedimiento, sanciones y definiciones

CAPITULO I
De la jurisdicción y competencia

Art. 216.- La jurisdicción y competencia administrativa, en materia de salud nacen de esta Ley.

Art. 217.- Tienen jurisdicción para conocer, juzgar e imponer las sanciones previstas en esta Ley y demás normas vigentes, las siguientes autoridades de salud:

a) El Ministro de Salud Pública;
b) El Director General de Salud;
c) Los directores provinciales de salud; y,
d) Los comisarios de salud.

Art. 218.- Los comisarios de salud deben ser doctores en jurisprudencia o abogados con experiencia mínima de tres años de ejercicio profesional.

Art. 219.- El Ministro de Salud Pública y el Director General de Salud, tienen competencia en todo el territorio nacional.

Los directores provinciales de salud y los comisarios de salud, tienen competencia en el ámbito provincial.

Art. 220.- La Fuerza Pública está obligada a colaborar con las autoridades de salud para hacer cumplir las disposiciones de esta Ley, cuando se requiera su intervención.

CAPITULO II
Del procedimiento

Art. 221.- Las autoridades de salud señaladas en el Capítulo anterior, actuarán de oficio, por denuncia o informe para conocer y sancionar las infracciones señaladas en esta Ley. Las denuncias se presentarán en forma verbal o por escrito.

Art. 222.- Las autoridades de salud señaladas en el artículo 217, que no cumplieren adecuadamente su obligación de conocer, juzgar e imponer las sanciones previstas en esta Ley, serán sancionadas de conformidad con el reglamento correspondiente y demás normas atinentes a la materia, sin perjuicio de las acciones administrativas, civiles y penales a que hubiere lugar.

Art. 223.- Se concede acción pública para denunciar cualquier infracción a las disposiciones de la presente Ley.

Art. 224.- Cuando se actúe de oficio o mediante informe o denuncia, la autoridad de salud correspondiente dictará un auto inicial que contendrá:

a) La relación sucinta de los hechos y del modo como llegaron a su conocimiento;
b) La orden de citar al presunto infractor, disponiendo que señale domicilio para entregar las notificaciones, bajo prevención de que será juzgado en rebeldía en caso de no comparecer;
c) La orden de agregar al expediente el informe o denuncia, si existieren, y de que se practiquen las diligencias que sean necesarias para comprobar la infracción;
d) El señalamiento del día y hora para que tenga lugar la audiencia de juzgamiento; y,
e) La designación del secretario que actuará en el proceso.

Art. 225.- Corresponde conocer y resolver las causas en primera instancia:

a) Al comisario de salud, las infracciones sancionadas en los artículos 241, 242, 243, 244 y 245 de esta Ley;
b) Al director provincial de salud, las infracciones sancionadas en los artículos 246, 247, 248 y 256 de esta Ley; y,
c) Al Director General de Salud, las infracciones sancionadas en los artículos 249, 250, 251, 252, 254 y 255 de esta Ley.

De no ser competente la autoridad se inhibirá de conocer la causa y la remitirá de oficio, a quien corresponda.

Art. 226.- En caso de que la infracción tenga indicios de responsabilidad penal, el expediente se remitirá a la autoridad competente.

Art. 227.- La citación con el auto inicial, se hará personalmente al infractor, en su domicilio o lugar de trabajo; si no se le encontrare, se le citará mediante tres boletas dejadas en el domicilio o lugar de trabajo, en diferentes días, sentando la razón de la citación.

Art. 228.- En la audiencia de juzgamiento, se oirá al infractor, que intervendrá por sí o por medio de su abogado; se recibirán las pruebas que presente y se agregarán al proceso, de lo cual se dejará constancia en acta firmada por el compareciente, la autoridad de salud correspondiente y el secretario.

Art. 229.- De solicitarlo cualquiera de las partes o de oficio, en la misma diligencia, se abrirá la causa a prueba por el término de seis días, en la cual se practicarán todas las pruebas que se soliciten.

Art. 230.- De no haberse solicitado que se abra la causa a prueba, la autoridad de salud correspondiente procederá a dictar la resolución en el término de cinco días.

Art. 231.- Vencido el término de prueba y practicadas todas las diligencias oportunamente solicitadas y ordenadas, la autoridad de salud correspondiente dictará su resolución dentro del termino de cinco días.

Art. 232.- De las resoluciones del comisario de salud, podrá apelarse ante el director provincial de salud; de las que dicte el director provincial de salud, ante el Director General de Salud; y, de las de esta autoridad ante el Ministro de Salud Pública, siendo estas decisiones de segunda y definitiva instancia.

Las resoluciones podrán ser apeladas dentro del término de tres días luego de ser notificadas a las partes; la autoridad superior dentro del término de ocho días desde que avoca conocimiento deberá dictar la correspondiente resolución.

Unicamente podrán apelarse las resoluciones de primera instancia, las de segunda instancia causarán ejecutoria.

Art. 233.- Una vez que la resolución esté ejecutoriada, se emitirá la orden de pago, la misma que de no ser pagada por el sujeto pasivo, será cobrada por la vía coactiva por el Ministerio de Salud Pública de acuerdo a lo establecido en el artículo 941 del Código de Procedimiento Civil, en el cual se le concede al Estado y a sus instituciones, acción y jurisdicción coactiva a nivel nacional.

Art. 234.- Los bienes y productos que fueren comisados y puedan ser utilizados, se entregarán a las instituciones de beneficencia de la jurisdicción provincial en donde se haya cometido la infracción, de conformidad con el reglamento que al efecto emita la autoridad sanitaria nacional.

Art. 235.- Los bienes y productos que no puedan ser utilizados, serán destruidos por la autoridad correspondiente, dejando constancia en acta que suscribirá conjuntamente con el secretario, cuyo original se remitirá a la autoridad inmediata superior para su conocimiento.

Art. 236.- En todo lo no previsto en esta Ley, se actuará de conformidad con lo previsto en los Códigos Penal y Civil; y, de Procedimiento Penal y Civil.

CAPITULO III
De las sanciones

Art. 237.- Las infracciones en materia de salud serán sancionadas de conformidad con las disposiciones contenidas en esta Ley y sus reglamentos, sin perjuicio de las sanciones civiles, administrativas y penales a que hubiera lugar.

Art. 238.- En la concurrencia de más de una infracción a las disposiciones de esta Ley y sus reglamentos, la persona será juzgada por todas las cometidas.

Art. 239.- La reincidencia en el incumplimiento de esta Ley y sus reglamentos, será reprimida con el doble del máximo de la sanción para cada caso, sin perjuicio de las sanciones civiles o penales a que hubiere lugar.

Art. 240.- Las infracciones determinadas en esta ley se sancionarán con:

a) Multa;
b) Suspensión del permiso o licencia;
c) Suspensión del ejercicio profesional;
d) Decomiso; y,
e) Clausura parcial, temporal o definitiva del establecimiento correspondiente.

CAPITULO IV
De las infracciones

Art. 241.- Será sancionado con multa de un salario básico unificado del trabajador en general, el incumplimiento a lo dispuesto en los artículos 32, 53, 61, 64, 74 inciso segundo, 101, 111 inciso segundo, 115, 120 inciso segundo, 122, 123, 167, 195, 198 y 202 literal a), de esta Ley.

Art. 242.- Será sancionado con multa de un salario básico unificado del trabajador en general y clausura temporal o definitiva del establecimiento correspondiente, el incumplimiento a lo dispuesto en los artículos 40, 47, 58 inciso segundo, 97, 103 y 124 de esta Ley.

Art. 243.- Será sancionado con multa de cinco salarios básicos unificados del trabajador en general, el incumplimiento a lo dispuesto en los artículos 50, 57, 60, 74 inciso primero, 90, 118, 163, 175, 184 y 202 literal b), de esta Ley.

Art. 244.- Será sancionado con multa de cinco salarios básicos unificados del trabajador en general y clausura temporal o definitiva del establecimiento correspondiente, el incumplimiento a lo dispuesto en los artículos 105, 109, 166, 169, 172, 174, 178, 194, 200 y 212 de esta Ley.

Art. 245.- Será sancionado con multa de cinco salarios básicos unificados del trabajador en general y decomiso, el incumplimiento de lo dispuesto en el artículo 125 y primer inciso del artículo 153 de esta Ley.

Art. 246.- Será sancionado con multa de diez salarios básicos unificados del trabajador en general, el incumplimiento a lo dispuesto en los artículos 12 inciso segundo, 22, 29, 41, 48, 80, 110, 173 y 202 literal c), de esta Ley.

Art. 247.- Será sancionado con multa de diez salarios básicos unificados del trabajador en general y clausura temporal o definitiva del establecimiento correspondiente, el incumplimiento a lo dispuesto en los artículos 104, 116, 121, 143, 159 inciso segundo, 186 y 192 incisos segundo y tercero, de esta Ley.

Art. 248.- Será sancionado con multa de diez salarios básicos unificados del trabajador en general, decomiso y clausura temporal o definitiva del establecimiento correspondiente, el incumplimiento a lo dispuesto en los artículos 42, 49, 137, 140, 141 inciso primero, 146, 164 y 170 de esta Ley.

Art. 249.- Será sancionado con multa de veinte salarios básicos unificados del trabajador en general, el incumplimiento a lo dispuesto en los artículos 27 inciso segundo, 75, 162 y 202 literal d), de esta Ley.

Art. 250.- Será sancionado con multa de veinte salarios básicos unificados del trabajador en general y clausura temporal o definitiva, el incumplimiento a lo dispuesto en los artículos 149 y 183 inciso segundo, de esta Ley.

Art. 251.- Será sancionado con multa de veinte salarios básicos unificados del trabajador en general, decomiso y clausura temporal o definitiva del establecimiento correspondiente, el incumplimiento a lo dispuesto en los artículos 150 y 151, de esta Ley.

Art. 252.- Será sancionado con multa de cincuenta salarios básicos unificados del trabajador en general, el incumplimiento a lo dispuesto en los artículos 81 y 82 inciso primero, de esta Ley.

Art. 253.- La infracción a lo dispuesto en los artículos 213 y 214, será sancionada con suspensión del ejercicio profesional, multa de cien salarios básicos unificados del trabajador en general y clausura definitiva del establecimiento, sin perjuicio de las sanciones civiles y penales a que hubiere lugar.

Art. 254.- Será sancionado con multa de cinco salarios básicos unificados del trabajador en general, el incumplimiento a lo dispuesto en los artículos 130 y 134 de esta Ley.

Art. 255.- Será sancionado con la suspensión del ejercicio profesional por cinco años y clausura temporal o definitiva del establecimiento correspondiente, el incumplimiento a lo dispuesto en el artículo 210 de esta Ley.

Art. 256.- Será sancionado con clausura temporal o definitiva del establecimiento correspondiente, el incumplimiento a lo dispuesto en el artículo 185 de esta Ley.

Art. 257.- El producto de las multas que se recauden por infracciones a lo dispuesto por esta Ley y sus reglamentos, será utilizado en la respectiva jurisdicción en donde se las impusiere, debiendo destinarlo para la atención y mejoramiento de los servicios de salud de la respectiva dirección provincial.

Art. 258.- Para el cumplimiento de las disposiciones establecidas en la presente Ley, las autoridades de salud tendrán libre acceso a los lugares en los cuales deban cumplir sus funciones de inspección y control, pudiendo al efecto requerir la intervención de la fuerza pública, en caso de ser necesario.

CAPITULO V
De las definiciones

Art. 259.- Para efectos de esta Ley, se entiende por:

Acreditación de servicios de salud.- Es el proceso voluntario realizado con regularidad y periodicidad, de carácter reservado, a través del cual un servicio de salud, independientemente de su nivel es evaluado por un organismo técnico calificado, de acuerdo a un conjunto de normas que describe las actividades y estructuras que contribuyen en forma directa a los resultados deseados para los pacientes-usuarios, el cumplimiento de estas normas busca alcanzar un óptimo nivel de calidad de atención teniendo en cuenta los recursos disponibles.

Aditivos alimentarios.- Son sustancias o mezclas de sustancias de origen natural o artificial, que por sí solas no se consumen directamente como alimentos, tengan o no valor nutritivo y se adicionan en límites permitidos durante la producción, manipulación, fabricación, elaboración, tratamiento o conservación de alimentos.

Agentes de las medicinas tradicionales.- Son aquellos sanadores que intervienen en diferentes ámbitos de la salud, cuyas denominaciones son particulares a cada una de las nacionalidades y pueblos, y su reconocimiento proviene de las propias comunidades donde prestan sus servicios. Las condiciones y características formales y temporales de su formación son propias de su tradición y cultura ancestral.

Alimento.- Es todo producto natural o artificial que ingerido aporta al organismo de los seres humanos o de los animales, los materiales y la energía necesarios para el desarrollo de los procesos biológicos.

Comprende también las sustancias y mezclas de las mismas que se ingieren por hábito o costumbre, tengan o no valor nutritivo.

Alimentos genéticamente modificados.- Son aquellos que contienen o están compuestos por organismos genéticamente modificados o han sido producidos a partir de ellos.

Alimento natural.- Es aquel que se utiliza como se presenta en la naturaleza sin haber sufrido transformación en sus caracteres o en su composición, pudiendo ser sometido a procesos prescritos por razones de higiene, o las necesarias para la separación de partes no comestibles.

Alimento procesado.- Es toda materia alimenticia natural o artificial que para el consumo humano ha sido sometida a operaciones tecnológicas necesarias para su transformación, modificación y conservación, que se distribuye y comercializa en envases rotulados bajo una marca de fábrica determinada.

El término alimento procesado, se extiende a bebidas alcohólicas y no alcohólicas, aguas de mesa, condimentos, especias y aditivos alimentarios.

Atención farmacéutica.- Es la asistencia al paciente por parte del químico farmacéutico o bioquímico farmacéutico en el seguimiento del tratamiento fármaco terapéutico, dirigido a contribuir con el médico y otros profesionales de la salud, en la consecución de los resultados previstos y el logro del máximo beneficio terapéutico.

Bancos de sangre.- Son servicios de salud, técnicos, especializados y calificados, encargados de realizar la extracción, preparación, conservación, almacenamiento y suministro de la sangre humana, sus componentes y derivados.

Bancos de tejidos.- Son servicios de salud técnicos, especializados y calificados, que tienen por misión garantizar la calidad de los tejidos desde su obtención hasta su utilización clínica.

Botiquines.- Son establecimientos farmacéuticos autorizados para expender al público, únicamente la lista de medicamentos y otros productos que determine la autoridad sanitaria nacional; funcionarán en zonas rurales en las que no existan farmacias y deben cumplir en todo tiempo con prácticas adecuadas de almacenamiento.

Casas de representación.- Son los establecimientos farmacéuticos autorizados para realizar promoción médica, importación y venta al por mayor a terceros de los productos elaborados por sus representados. Deben cumplir con buenas prácticas de almacenamiento y distribución determinadas por la autoridad sanitaria nacional. Requieren para su funcionamiento de la dirección técnica responsable de un profesional químico farmacéutico o bioquímico farmacéutico.

Ciclo producción - consumo.- Son las etapas o fases involucradas en la producción, manipulación, almacenamiento, transporte, distribución, importación, exportación, comercialización, expendio y consumo de productos.

Componentes anatómicos.- Son los órganos, tejidos, células, sus derivados y en general todas las partes del organismo humano.

Desechos.- Son los residuos o desperdicios en cualquier estado de la materia, producto de actividades industriales, comerciales y de la comunidad; se clasifican en comunes, infecciosos y especiales o peligrosos.

Desechos comunes.- Son aquellos que no representan riesgo para la salud humana, animal o el ambiente.

Desechos peligrosos.- Son aquellos resultantes de un proceso de producción, transformación, reciclaje, utilización o consumo y que tengan algún compuesto con características reactivas, inflamables, corrosivas, infecciosas o tóxicas, que presenten un riesgo para la salud humana, los recursos naturales y el ambiente.

Desechos infecciosos.- Son aquellos que contienen gérmenes patógenos y representan riesgo para la salud; se generan en los establecimientos de salud humana, veterinarios, morgues y otros.

Dispositivos médicos.- Son los artículos, instrumentos, aparatos, artefactos o invenciones mecánicas, incluyendo sus componentes, partes o accesorios, fabricado, vendido o recomendado para uso en diagnóstico, tratamiento curativo o paliativo, prevención de una enfermedad, trastorno o estado físico anormal o sus síntomas, para reemplazar o modificar la anatomía o un proceso fisiológico o controlarla. Incluyen las amalgamas, barnices, sellantes y más productos dentales similares.

Distribuidoras farmacéuticas.- Son establecimientos farmacéuticos autorizados para realizar importación, exportación y venta al por mayor de medicamentos en general de uso humano, especialidades farmacéuticas, productos para la industria farmacéutica, auxiliares médico-quirúrgico, dispositivos

médicos, insumos médicos, cosméticos y productos higiénicos. Deben cumplir con las buenas prácticas de almacenamiento y distribución determinadas por la autoridad sanitaria nacional. Funcionarán bajo la representación y responsabilidad técnica de un químico farmacéutico o bioquímico farmacéutico.

Donante.- Es la persona de la cual, durante su vida o después de su muerte, se extraen componentes anatómicos en buen estado funcional, para trasplantarlos en otra persona o utilizarlos con fines terapéuticos o de investigación.

Emergencia sanitaria.- Es toda situación de riesgo de afección de la salud originada por desastres naturales o por acción de las personas, fenómenos climáticos, ausencia o precariedad de condiciones de saneamiento básico que favorecen el incremento de enfermedades transmisibles. Requiere la intervención especial del Estado con movilización de recursos humanos, financieros u otros, destinados a reducir el riesgo o mitigar el impacto en la salud de las poblaciones más vulnerables.

La emergencia sanitaria deberá ser declarada por el Presidente de la República conforme lo manda la Constitución Política.

Farmacias.- Son establecimientos farmacéuticos autorizados para la dispensación y expendio de medicamentos de uso y consumo humano, especialidades farmacéuticas, productos naturales procesados de uso medicinal, productos biológicos, insumos y dispositivos médicos, cosméticos, productos dentales, así como para la preparación y venta de fórmulas oficinales y magistrales. Deben cumplir con buenas prácticas de farmacia. Requieren para su funcionamiento la dirección técnica y responsabilidad de un profesional químico farmacéutico o bioquímico farmacéutico.

Genética.- Es la ciencia que trata de la reproducción, herencia, variación tanto en estado normal como anormal o de enfermedad, y del conjunto de fenómenos y problemas relativos a la descendencia.

Laboratorios farmacéuticos.- Son establecimientos farmacéuticos autorizados para producir o elaborar medicamentos en general, especialidades farmacéuticas, biológicos de uso humano o veterinario; deben cumplir las normas de buenas prácticas de manufactura determinadas por la autoridad sanitaria nacional; y, estarán bajo la dirección técnica de químicos farmacéuticos o bioquímicos farmacéuticos.

Licenciamiento de servicios de salud.- Es el procedimiento de carácter obligatorio por medio del cual la autoridad sanitaria nacional otorga el permiso de funcionamiento a las instituciones prestadoras de servicios de salud, públicas o privadas, según su capacidad resolutiva, niveles de atención y complejidad, previa verificación del cumplimiento de los requisitos o estándares mínimos indispensables.

Materia prima alimentaria.- Es la sustancia o mezcla de sustancias, natural o artificial permitida por la autoridad sanitaria nacional, que se utiliza para la elaboración de alimentos y bebidas.

Medicamento.- Es toda preparación o forma farmacéutica, cuya fórmula de composición expresada en unidades del sistema internacional, está constituida por una sustancia o mezcla de sustancias, con peso, volumen y porcentajes constantes, elaborada en laboratorios farmacéuticos legalmente establecidos, envasada o etiquetada para ser distribuida y comercializada como eficaz para diagnóstico, tratamiento, mitigación y profilaxis de una enfermedad, anomalía física o síntoma, o el restablecimiento, corrección o modificación del equilibrio de las funciones orgánicas de los seres humanos y de los animales.

Por extensión esta definición se aplica a la asociación de sustancias de valor dietético, con indicaciones terapéuticas o alimentos especialmente preparados, que reemplacen regímenes alimenticios especiales. (CONTINUA).

Art. 259.- (CONTINUACION)

Medicamento de venta libre.- Es el medicamento oral o tópico que por su composición y por la acción farmacológica de sus principios activos, es autorizado para ser expendido o dispensado sin prescripción facultativa.

Medicamento genérico.- Es aquel que se registra y comercializa con la Denominación Común Internacional (DCI) del principio activo, propuesta por la Organización Mundial de la Salud; o en su ausencia, con una denominación genérica convencional reconocida internacionalmente. Estos medicamentos deben mantener los niveles de calidad, seguridad y eficacia requeridos para los de marca.

Medicamento homeopático.- Es el preparado farmacéutico obtenido por técnicas homeopáticas, conforme a las reglas descritas en las farmacopeas oficiales aceptadas en el país, con el objeto de prevenir la enfermedad, aliviar, curar, tratar y rehabilitar a un paciente. Los envases, rótulos, etiquetas y empaques hacen parte integral del medicamento, por cuanto éstos garantizan su calidad, estabilidad y uso adecuado. Deben ser prescritos por profesionales autorizados para el efecto y dispensados o expendidos en lugares autorizados para el efecto.

Medicinas alternativas.- Son el conjunto de medicinas científicamente comprobadas, ejercidas por profesionales médicos, con título de cuarto nivel en la materia y reconocidas por la autoridad sanitaria nacional.

Medicinas tradicionales.- Son el conjunto de conocimientos y prácticas ancestrales de las nacionalidades, pueblos, comunidades indígenas, mestizas y afro descendientes que a lo largo del tiempo han constituido un saber específico, mantenido y difundido en un contexto cultural, de interrelación de elementos naturales, éticos, espirituales, mentales, psicológicos y afectivos y que se explica y funciona en ese mismo universo cultural. Sus prácticas se corresponden con saberes, técnicas y procedimientos propios de su cosmovisión y son ejercidas por sanadores de las medicinas tradicionales, reconocidos por sus comunidades y registrados por la autoridad sanitaria nacional.

Necropsia o autopsia.- Es el procedimiento técnico mediante el cual se observa y analiza un cadáver, externa e internamente para establecer las causas del fallecimiento de la persona.

Nueva entidad química.- Es el medicamento, ingrediente o principio activo de uso o consumo humano que nunca ha sido empleado para ninguna indicación terapéutica en el ámbito mundial. No se considerará nueva entidad química entre otros, los nuevos usos o segundos usos, ni las novedades o cambio de los siguientes aspectos: formas farmacéuticas, indicaciones o segundas indicaciones, nuevas combinaciones de entidades químicas conocidas, formulaciones, formas de dosificación, vías de administración, modificaciones de cualquier índole que no afecten el mecanismo de acción, condiciones de comercialización y empaque y en general, aquellas que impliquen nuevas presentaciones.

Organismos genéticamente modificados, OGM u organismo vivo modificado OVM.- Cualquier organismo vivo, con excepción de los seres humanos, que ha adquirido una combinación genética novedosa, generada a través del uso específico de técnicas de la biotecnología moderna.

Permiso de funcionamiento.- Es el documento otorgado por la autoridad sanitaria nacional a los establecimientos sujetos a control y vigilancia sanitaria que cumplen con todos los requisitos para su funcionamiento, establecidos en los reglamentos correspondientes.

Plantas procesadoras de alimentos.- Son establecimientos en los que se realizan operaciones de selección, purificación y transformación de materias primas para la producción, envasado y etiquetado de alimentos.

Producto natural procesado de uso medicinal.- Es el producto medicinal terminado y etiquetado, cuyos ingredientes activos están formados por cualquier parte de los recursos naturales de uso medicinal o sus combinaciones, como droga cruda, extracto o en una forma farmacéutica reconocida, que se utiliza con fines terapéuticos

No se considera un producto natural procesado de uso medicinal, si el recurso natural de uso medicinal se combina con sustancias activas definidas desde el punto de vista químico, inclusive constituyentes de recursos naturales, aislados y químicamente definidos.

Producto nutracéutico.- También llamado funcional o compuesto bioactivo, es cualquier producto semejante en apariencia a un alimento convencional que tiene uno o más beneficios intencionales, más allá de proporcionar una nutrición adecuada, como un mejor estado de salud o una reducción del riesgo de una enfermedad determinada.

Productos del tabaco.- Abarca los productos preparados totalmente o en parte utilizando como materia prima hojas de tabaco y destinados a ser fumados, chupados, inhalados, mascados o utilizados como rapé.

Reactivos bioquímicos.- Son todas las sustancias o productos que se utilizan con máquinas especiales o no, para reaccionar con líquidos o materias orgánicas y ayudar en el diagnóstico, monitoreo, control y tratamiento de las enfermedades de los seres humanos.

Receptor.- Es la persona en cuyo cuerpo se implantan componentes anatómicos provenientes de sí mismo, de otra persona o de otra especie.

Registro sanitario.- Es la certificación otorgada por la autoridad sanitaria nacional, para la importación, exportación y comercialización de los productos de uso y consumo humano señalados en el artículo 137 de esta Ley. Dicha certificación es otorgada cuando se cumpla con los requisitos de calidad, seguridad, eficacia y aptitud para consumir y usar dichos productos cumpliendo los trámites establecidos en la presente Ley y sus reglamentos.

Salud ambiental.- Son los conocimientos que se ocupan de las formas de vida, sustancias, fuerzas y condiciones del entorno del ser humano que pueden ejercer efectos nocivos sobre su salud y bienestar, así como las acciones para impedirlos o reducirlos, en el marco de la promoción y desarrollo de ambientes saludables.

Salud reproductiva.- Es el estado general de bienestar físico, mental y social y no de mera ausencia de enfermedades o dolencias, en todos los aspectos relacionados con el sistema reproductivo, sus funciones y procesos e implica el derecho de las personas a tomar decisiones respecto a ella.

Salud sexual.- Es el estado general de bienestar físico, mental y social y no de mera ausencia de enfermedades o dolencias, que permita a la persona en forma libre y responsable disfrutar de una vida sexual plena, placentera, libre de abuso sexual, coerción o acoso y de enfermedades sexualmente transmisibles.

Saneamiento ambiental.- Es el conjunto de actividades dedicadas a acondicionar, controlar y proteger el ambiente en que vive el ser humano, a fin de proteger su salud.

Servicios de salud.- Son aquellos que están destinados a brindar prestaciones de salud, de promoción, de prevención, de recuperación y rehabilitación en forma ambulatoria, domiciliaria o internamiento, son clasificados de acuerdo a la capacidad resolutiva, niveles de atención y complejidad.

Terapias alternativas.- Conjunto de métodos, técnicas y sistemas utilizados para prevención o tratamiento de enfermedades y se orientan a equilibrar el organismo en sus aspectos físico, mental o espiritual, y a establecer un balance entre el individuo y el entorno.

Trasplante de órganos.- Es la sustitución con fines terapéuticos de componentes anatómicos en una persona, por otros iguales y funcionales provenientes del mismo receptor o de un donante vivo o muerto.

Violencia.- Es toda acción, omisión o uso intencional de la fuerza física o el poder, real o por amenaza, de una persona, grupo o institución con el fin de dañar a otra en contra de su voluntad, caracterizada por la agresión contra la integridad física, sexual, psicológica, simbólica o cultural.

DISPOSICIONES GENERALES

PRIMERA.- Los servicios de control, inspecciones, autorizaciones, permisos, licencias, registros y otros de similar naturaleza que preste la autoridad sanitaria nacional, satisfarán el pago de derechos de conformidad con los reglamentos respectivos.

SEGUNDA.- El Presidente de la República dictará el reglamento general para la aplicación de la presente Ley, en un plazo máximo de noventa días.

TERCERA.- Derogatorias.- Deróganse todas las normas, disposiciones generales o especiales que se opongan a la presente Ley, en materia de salud.

Deróganse expresamente:

El Código de la Salud, expedido mediante Decreto Ejecutivo No. 188, publicado en el Registro Oficial No. 158 del 8 de febrero de 1971 y todas sus reformas.

Los artículos 8, 9, 10, 11 y el Capítulo VIII de la Ley de Producción, Importación, Comercialización y Expendio de Medicamentos Genéricos de Uso Humano, publicada en el Registro Oficial No. 59 de 17 de abril del 2000.

El artículo 99 de la Ley de Promoción de la Inversión y Participación Ciudadana, publicada en el Suplemento del Registro Oficial No. 144, de 18 de agosto del 2000.

El artículo 11 de la Ley de Trasplantes de Organos y Tejidos, publicada en el Registro Oficial No. 492 de 27 de julio de 1994.

CUARTA.- Efectúense las siguientes reformas:

a) En el artículo 2 de la Ley de Producción, Importación, Comercialización y Expendio de Medicamentos Genéricos de Uso Humano, publicada en el Registro Oficial No. 59 de 17 de abril del 2000, sustitúyase la palabra: "...emplean", por: "comercializan...";

b) En toda la Ley de Derechos y Amparo al Paciente, sustitúyase: "centros de salud", por: "servicios de salud";

c) En el artículo 98 de la Ley de Registro Civil, Identificación y Cedulación, a continuación del numeral 13, agréguese el siguiente:

"14. Autorización expresa del ciudadano para ser donante de órganos u otros componentes anatómicos, de conformidad con lo establecido en el artículo 83 de la Ley Orgánica de Salud.";

d) Sustitúyanse los artículos 1 y 2 de la Ley de Aprovisionamiento y Utilización de Sangre y sus Derivados, publicada en el Registro Oficial No. 559 de 7 de noviembre de 1986, por los siguientes.

"Art. 1.- La vigilancia y control del aprovisionamiento y utilización de sangre y sus derivados en el Ecuador, será responsabilidad de la autoridad sanitaria nacional.

Organizará en coordinación con la Cruz Roja Ecuatoriana, el sistema nacional de bancos y depósitos de sangre, en las ciudades y servicios de salud que los requieran, siempre que cuenten con las condiciones técnicas para ello.

La Cruz Roja Ecuatoriana, el Ministerio de Salud Pública, el Instituto Ecuatoriano de Seguridad Social, las Fuerzas Armadas y la Junta de Beneficencia de Guayaquil continuarán administrando los bancos y depósitos de sangre adscritos a sus servicios de salud.

Art. 2.- Prohíbese la exportación de sangre y sus derivados, salvo lo señalado en el artículo 79 de la Ley Orgánica de Salud."; y,

e) A continuación del inciso quinto del artículo 46 de la Ley Orgánica de Aduanas, inclúyase otro inciso con el siguiente texto:

"Se exceptúan también de la verificación en origen: las vacunas, biológicos, medicamentos e insumos importados por el Ministerio de Salud Pública.".

QUINTA.- Todas las capitales de provincia, sin excepción, contarán al menos con un hospital público de tercer nivel de atención, con la infraestructura, equipamiento, bienes, insumos, presupuestos y recursos humanos idóneos, suficientes y permanentes, facultados para dar solución a las necesidades de la población, de conformidad con la realidad epidemiológica local.

SEXTA.- Conforme lo previsto en el numeral 10 del artículo 35 de la Constitución Política de la República, se prohíbe la paralización, a cualquier título o por algún motivo, del servicio público de salud, bajo prevención de aplicar a los responsables las sanciones previstas en las leyes que regulan la relación laboral y el Código Penal.

DISPOSICION TRANSITORIA

Los reglamentos que sobre asuntos de salud están vigentes, seguirán aplicándose en todo lo que no se oponga a la presente Ley, hasta cuando se dicten otros.

Dada, en la ciudad de San Francisco de Quito, Distrito Metropolitano, en la sala de sesiones del Congreso Nacional del Ecuador, a los catorce días del mes de diciembre del año dos mil seis.

Ley Orgánica de Donación y Trasplante de Órganos, Tejidos y Células

Publicada en el Registro Oficial No. 398 del 4 de marzo de 2011

www.donaciontrasplante.gob.ec

El proceso de donación y trasplantes constituye el mayor exponente de lo que significa el trabajo en equipo. Cada vez que se produce una donación se pone en marcha un despliegue logístico en el que diferentes colectivos profesionales tienen que actuar en pocas horas, con gran celeridad y en perfecta sincronización, para alcanzar el feliz resultado de dar vida.

El proceso de donación y trasplantes implica aspectos profundamente humanos, técnicos y éticos, que tocan nuestras concepciones más arraigadas respecto a la vida y a la aceptación de la muerte. Este proceso es posible mediante la constante formación de profesionales capaces de comprender el dolor intenso de las personas que pierden un ser querido, construyendo lazos de confianza y apoyando a la familia del donante en su duelo.

La actividad trasplantológica en el país está evolucionando gracias a la dotación de recursos técnicos, la responsabilidad de las unidades médicas públicas y privadas, la solidaridad de la sociedad al momento de aceptar la donación y al financiamiento del Estado, que garantiza que el acceso al trasplante no esté mediado por la condición económica del paciente.

La donación de órganos y tejidos, así como el trasplante no es solo un tema de salud, es de compromiso y cohesión social, es el reflejo del interés compartido por todos los ecuatorianos.

El presente articulado y su contexto jurídico consagran el principio de equidad, así como la construcción del Sistema Nacional Integrado de Donación y Trasplantes y el fortalecimiento de los servicios públicos para realizar estos procedimientos, promueve una cultura de donación de órganos y tejidos en el Ecuador y resalta su carácter voluntario, desinteresado y gratuito para situar el concepto de la donación como un acto natural y cotidiano.

Por eso, el objetivo y compromiso del Ministerio de Salud Pública y el Instituto Nacional de Donación de Trasplantes de Órganos, Tejidos y Células (Indot) con la sociedad ecuatoriana es lograr el consentimiento efectivo de las personas a la donación de órganos y tejidos, incrementar las tasas de trasplante y gestionar con trasparencia el proceso. Estamos conscientes de que hay mucho por hacer, pero estamos seguros que avanzamos por el camino correcto hacia el fortalecimiento del Sistema Nacional Integrado de Donación y Trasplantes en el Ecuador.

Ministerio de Salud Pública del Ecuador
Instituto Nacional de Donación y Trasplantes
de Órganos, Tejidos y Células. INDOT

ASAMBLEA NACIONAL
EL PLENO

Considerando:

Que, el inciso primero del artículo 32 de la Constitución de la República establece que la salud es un derecho que debe ser garantizado por el Estado;

Que, el inciso segundo del articulo 32 de la Constitución de la República expresa que la prestación de servicios de salud se regirá, entre otros, por los principios de precaución y bioética;

Que, el artículo 50 de la Constitución de la República garantiza a toda persona que sufra una enfermedad catastrófica o de alta complejidad el derecho a una atención especializada y gratuita, de manera oportuna y preferente;

Que, el numeral segundo del artículo 66 de la Constitución de la República reconoce y garantiza a las personas el derecho a una vida digna, que asegure su salud;

Que, el literal a) del numeral 3 del artículo 66 de la Constitución de la República garantiza el derecho a la integridad personal que incluye la integridad física, psíquica, moral y sexual;

Que, el literal d) del numeral 3 del artículo 66 de la Constitución de la República prohíbe el uso de material genético y la experimentación científica que atente contra los derecho humanos;

Que, el inciso primero del artículo 84 de la Constitución de la República establece la obligación de la Asamblea Nacional de adecuar, formal y materialmente, las leyes y demás normas jurídicas a los derechos previstos en la Constitución y los que sean necesarios para garantizar la dignidad del ser humano;

Que, el numeral segundo del artículo 133 de la Constitución de la República dispone que serán orgánicas las leyes que regulen el ejercicio de derechos y garantías constitucionales;

Que, de conformidad con lo consagrado en el artículo 361 de la Constitución de la República, el Estado ejercerá la rectoría del sistema nacional de salud a través de la autoridad sanitaria nacional;

Que, el artículo 358 de la Constitución de la República establece que el sistema nacional de salud tendrá por finalidad el desarrollo, protección y recuperación de las capacidades y potencialidades para una vida saludable e integral, tanto individual como colectiva, y reconocerá la diversidad social y cultural, y se guiará entre otros por los principios de bioética y suficiencia;

Que, el numeral 1 del artículo 363 de la Constitución de la República señala la responsabilidad del Estado de formular políticas públicas que garanticen la promoción, prevención, curación, rehabilitación y atención integral en salud y fomentar prácticas saludables en los ámbitos familiar, laboral y comunitario;

Que, el numeral 3 del articulo 385 de la Constitución de la República establece que es finalidad del sistema nacional de ciencia, tecnología, innovación y saberes ancestrales desarrollar tecnologías e innovaciones que mejoren la calidad de vida y contribuyan a la realización del buen vivir;

Que, la Declaración Americana de la Derechos y Deberes del Hombre establece el derecho a la preservación de la salud y al bienestar, manifestando que toda persona tiene derecho a que su salud sea preservada por medidas sanitarias y sociales relativas a la alimentación, vestido, vivienda y asistencia medica, correspondientes al nivel que permitan los recursos públicos y de la comunidad;

Que, en el año 1997, la Conferencia General de la Organización de las Naciones Unidas para la Educación, la Ciencia y la Cultura (UNESCO), en su 298va. reunión, aprobó la Declaración Universal sobre el Genoma Humano y los Derechos Humanos, que fue adoptada por la Asamblea General de la Organización de las Naciones Unidas en el año 1998;

Que, en el año 1999, la Conferencia General de la UNESCO, en su 308va. reunión, hizo suyas las orientaciones para la aplicación de la Declaración Universal sobre Genoma Humano y los Derechos Humanos aprobada por el Comité Intergubernamental de Bioética;

Que, la Organización Panamericana de la Salud/Organización Mundial de la Salud (OPS/OMS), en el Tercer Encuentro Latinoamericano de Derecho, Bioética y Genoma Humano, realizado en la cuidad de Santiago de Chile en el año 2001, expidió la Declaración Ibero-Latinoamericana sobre Derecho, Bioética y Genoma Humano;

Que, la 63va. Asamblea Mundial de la Salud revisó las Principios Rectores de la OMS sobre trasplante de células, tejidos y órganos humanos, invitando a los Estados miembros a adoptar la resolución recomendada;

Que, la Conferencia General de la UNESCO; celebrada el 19 de octubre de 2005, aprobó la Declaración Universal sobre Bioética y Derechos Humanos, cuyos principios se sustentan en el respeto a la vida y dignidad de las personas y sus libertades fundamentales, recogiendo fundamentalmente la interrelación entre ética y derechos humanos; y, que dicha Declaración reconoce que la identidad de una persona comprende dimensiones biológicas, psicológicas, educativas, afectivas, culturales y espirituales;

Que, uno de los principales objetivos de la Declaración Universal sobre Bioética y Derechos Humanos consiste en proporcionar un marco universal de principios y procedimientos que sirvan de guía a los Estados en la formulación de legislaciones, políticas u otros instrumentos en el ámbito de la bioética; al tiempo que determina que toda intervención médica preventiva, diagnóstica y terapéutica solamente habrá de llevarse a cabo previo consentimiento libre e informado de la persona interesada, basada en la información adecuada;

Que, la Conferencia General de la UNESCO sobre los Datos Genéticos, celebrada el 16 de octubre de 2003, reconoce que la información genética forma parte del acervo general de los datos médicos, y que el contenido de éstos se encuentra íntimamente ligado al contexto y depende de las circunstancias de cada caso; reconociendo, asimismo, que los datos genéticos humanos son singulares por su condición de datos sensibles y que los Estados e instituciones deben aplicar rigurosas exigencias de confidencialidad a todos los datos médicos;

Que, la Ley Orgánica de Salud, publicada en el Suplemento del Registro Oficial No. 423 de 22 de diciembre de 2006, regula los trasplantes de órganos, tejidos y disposición de cadáveres; y,

En uso de las atribuciones que le han sido conferidas por la Constitución de la República y la Ley, expide la siguiente:

LEY ORGÁNICA DE DONACIÓN Y TRASPLANTES DE ÓRGANOS, TEJIDOS Y CÉLULAS

TITULO PRELIMINAR
Del objeto y ámbito de aplicación

Art. 1.- Objeto.- La presente Ley garantiza el derecho a la salud en materia de trasplantes, a través de la regulación de las actividades relacionadas con la obtención y utilización clínica de órganos, tejidos y células de humanos, además de los productos derivados de ellos, incluyendo la promoción, donación, extracción, preparación, almacenamiento, transporte, distribución y trasplante.

Esta Ley tiene por objeto promover la actividad trasplantológica en el país, así como consolidar el Sistema Nacional Integrado de Donación y Trasplantes que fortalezca el sistema público y actúe bajo la rectoría del Estado, a través de la Autoridad Sanitaria Nacional, garantizando el cumplimiento de los derechos consagrados en la Constitución de la República y en estricta observancia con las disposiciones constantes en los tratados e instrumentos internacionales vigentes sobre el genoma humano, los datos genéticos y la bioética.

Art. 2.- Ámbito y aplicación.- Las disposiciones de la presente Ley son de aplicación obligatoria para todo el Sistema Nacional de Salud en los temas referentes al proceso de donación y trasplantes.

La presente norma incluye las nuevas prácticas y técnicas que la Autoridad Sanitaria Nacional reconoce como vinculadas a la implantación de órganos o tejidos en seres humanos.

Art. 3.- Responsabilidades de la Autoridad Sanitaria Nacional.- Corresponde a la Autoridad Sanitaria Nacional, en ejercicio de su rectoría, emitir las políticas públicas relacionadas con la donación y el trasplante de órganos, tejidos, células, de acuerdo a las siguientes responsabilidades:

a) Crear y desarrollar el Sistema Nacional Integrado de Donación y Trasplantes;
b) Generar mecanismos adecuados para la detección y notificación obligatoria, a la Autoridad Sanitaria Nacional, de potenciales donantes tanto en muerte encefálica como corazón parado, según lo determine el respectivo reglamento;
c) Garantizar el acceso a trasplantes para las y los ciudadanos ecuatorianos, y para las y los extranjeros residentes en el país, que lo requieran y cumplan con los criterios técnicos y/o médicos para someterse a los mismos;
d) Desarrollar la actividad trasplantológica, especialmente la implantación de bancos heterólogos de progenitores hematopoyéticos, bancos de tejidos así como unidades de trasplantes en los hospitales del Sistema Nacional de Salud, principalmente en el sistema público;
e) Desarrollar nuevas técnicas para trasplante, que sean aprobadas por organismos internacionales a los cuales se encuentra adscrito el país;
f) Desarrollar y fortalecer la capacitación del personal que forma parte del Sistema Nacional Integrado de Donación y Trasplantes;
g) Implementar acciones encaminadas a incrementar el número de donantes de órganos, tejidos y células en todo el Sistema Nacional de Salud; y,
h) Garantizar los recursos necesarios para implementar la política y el Sistema Nacional Integrado de Donación y Trasplantes de órganos, tejidos y células en todo el país.

TITULO I
De los Principios, Derechos y Generalidades

CAPÍTULO PRIMERO
De los principios

Art. 4.- Principios.- Además de los establecidos en la Constitución de la República y los tratados internacionales vigentes sobre la materia, la presente Ley se rige por los siguientes principios:

a) Altruismo.- Es la conducta humana que refleja una actitud de servicio voluntaria, manifestando preocupación o atención desinteresada por el otro;
b) Voluntariedad.- Actitud humana que manifiesta, libre y potestativamente, la intención de participar en un proceso de donación;
c) Gratuidad.- No se podrá ofrecer ni recibir compensación económica o valorable económicamente por la donación de órganos y/o tejidos humanos, por parte del donante o cualquier otra persona natural o jurídica;
d) Solidaridad.- Es uno de los principios de la filosofía social y política que determina una relación entre seres humanos, derivada de la justicia, fundamentada en la igualdad, que busca el bien del prójimo;
e) Transparencia.- Todos los procesos relacionados con la donación y trasplante de órganos y/o tejidos humanos se realizarán con transparencia, de manera que permitan y promuevan el conocimiento, contenidos, trazabilidad y fundamentos para la realización de los mismos;
f) Interculturalidad.- La consideración y garantía de respeto a la diversidad que en relación con la salud y la integridad de la persona tienen las y los miembros de los colectivos, comunas, comunidades, pueblos y nacionalidades; así como, el diálogo entre los saberes sobre la salud humana entre las culturas; y,
g) Bioética.- el examen moral, interdisciplinario y ético de las dimensiones de la conducta humana en el área de las ciencias de la vida y la salud, examinada a la luz de los valores y principios morales.

CAPITULO SEGUNDO
De los derechos de donantes y receptores

Art. 5.- Derechos.- Además de aquellos establecidos en la Constitución de la República y los tratados internacionales vigentes sobre la materia, las y los donantes y receptores gozarán, dentro de los procesos de donación, de los siguientes derechos:

a) A ser informados veraz, oportuna y previamente sobre las consecuencias de la decisión de participar en un procedimiento de donación y/o trasplante,
b) A expresar explícitamente y por escrito su consentimiento para participar en un procedimiento de donación y/o trasplante, sea como donante o receptor;
c) A que la información que se refiera a su identidad, que pueda afectar de cualquier manera sus derechos, no sea revelada y se respete su carácter confidencial.
d) A que todos los datos que se determinen u obtengan, producto del procedimiento de donación y/o trasplante, sean protegidos y precautelados en su confidencialidad por quien los posea;
e) A recibir, oportuna y gratuitamente, todas las facilidades para precautelar su salud, garantizando la asistencia precisa para su restablecimiento, sin perjuicio del lugar donde se realice el proceso de donación y/o trasplante;
f) A la garantía de que los componentes anatómicos, provenientes de una donación previa a su utilización, cumplan con todos los requisitos legales y técnicos en cada una de las etapas del proceso.
g) A que el Estado garantice los recursos necesarios para asegurar un lugar especializado para el tratamiento del paciente, y el alojamiento de la persona a su cuidado, manteniendo condiciones adecuadas para una evolución favorable y satisfactoria; y,
h) A recibir la medicación necesaria en forma gratuita, oportuna y permanente por parte del Estado para el mantenimiento del órgano trasplantado bajo los más altos estándares que garanticen su calidad y efectividad.

CAPÍTULO TERCERO
Generalidades
Sección Primera
Disposiciones comunes

Art. 6.- Órganos, tejidos y células.- Los órganos, tejidos y células, independientemente del lugar de su ablación o extirpación, una vez obtenidos de acuerdo a las normas de la presente Ley, son responsabilidad de la Autoridad Sanitaria Nacional, incluyendo su adecuado uso.

Art. 7.- Entrega de Información.- Todos los actores del Sistema Nacional Integrado de Donación y Trasplantes están obligados a entregar regularmente la información referente a la frecuencia, procesos y resultados a corto y mediano plazo al organismo regulador definido por la Autoridad Sanitaria Nacional. La Autoridad Sanitaria Nacional está obligada a realizar los respectivos controles periódicos, al menos una vez al año.

Art. 8.- Trato preferencial.- Toda persona, que haya recibido un órgano por trasplante, tendrá trato preferencial en la atención médica con la finalidad de conservar el órgano trasplantado y mejorar su calidad de vida. Del mismo modo, toda persona que habiendo recibido un órgano trasplantado no haya recuperado sus capacidades funcionales, orgánicas y/o laborales, será considerada como persona con discapacidad, a fin de que pueda obtener los beneficios legales pertinentes.

Se otorgará el mismo trato a toda o todo donante vivo que, por efectos de la donación, haya sufrido una alteración que signifique disminución o discapacidad en sus funciones orgánicas y de salud que, debidamente certificada por una institución médica calificada, le incapacite al menos parcialmente para las actividades que realizaba antes de la donación.

Art. 9.- Excepciones.- Las disposiciones de esta Ley no serán aplicables a los casos de sangre humana, sus componentes diferenciados, espermatozoides y óvulos. Las actividades médicas en las que se empleen estos elementos o partes del cuerpo humano, se regularán por las disposiciones internacionales, leyes de salud, y más cuerpos legales.

Sección Segunda
De la confidencialidad

Art. 10.- Protección de datos y confidencialidad.- La Autoridad Sanitaria Nacional, a través del organismo regulador designado, adoptará las medidas necesarias para garantizar que la información generada del proceso de donación y trasplante, se convierta en anónima, a fin de que la o el donante y la o el receptor no sean identificables.

En consecuencia, es deber de la Autoridad Sanitaria Nacional:

a) Adoptar medidas que garanticen la seguridad de los datos y la imposibilidad de su revelación no autorizada, así como establecer salvaguardias para evitar adiciones, supresiones o modificaciones de los datos en la fichas registros de las y los donantes;
b) Establecer procedimientos para solventar posibles discrepancias en los datos; y,
c) Reglamentar que los Bancos de Tejidos y Células conserven los datos necesarios durante un mínimo de treinta años, para garantizar su trazabilidad en todas las fases. Los datos serán archivados en soporte físico y electrónico.

Art. 11.- Prohibición de divulgación de información.- En ningún caso se facilitarán o divulgarán informaciones que permitan la identificación de la o el donante y/o de la o el receptor de los órganos, tejidos o células, salvo el caso de requerimiento de la función judicial, dentro del ámbito de su competencia, o mediante acción de habeas data, cuya audiencia tendrá carácter reservado.

El funcionario que divulgue la información considerada como confidencial por la presente ley, será inmediatamente destituido sin perjuicio de las acciones que se puedan iniciar en su contra.

Art. 12.- Identidad de la o el donante y/o receptor.- La o el donante no podrá conocer la identidad de la o el receptor, ni éste la de la o el donante, con excepción de los donantes vivos.

Art. 13.- Adopción de medidas preventivas.- El deber de confidencialidad no impedirá la adopción de medidas preventivas cuando se sospeche acerca de la existencia de riesgos para la salud individual o colectiva, en los términos previstos en la Constitución de la República, los tratados e instrumentos internacionales vigentes, la presente Ley y demás leyes vigentes que norman la salud pública en el país.

Art. 14.- Prohibición de compensación.- No se podrá percibir compensación económica o de otra índole por la donación de órganos, tejidos y/o células humanos a favor de la o el donante u otra persona.

Sección Tercera
Del Sistema Nacional Integrado de Donación y Trasplantes

Art. 15.- Sistema Nacional Integrado de Donación y Trasplantes.- Se crea el Sistema Nacional Integrado de Donación y Trasplantes, como parte del Sistema Nacional de Salud que actuará bajo la rectoría de la Autoridad Sanitaria Nacional.

El sistema estará coordinado por el organismo designado, para tal efecto, por la Autoridad Sanitaria Nacional y será responsable de ejecutar las políticas públicas en la materia.

Comprenderá las instituciones, programas, políticas, recursos, acciones y actores relacionados con la actividad trasplantológica de órganos, tejidos y células humanos.

El desarrollo del Sistema se basará en el análisis técnico de las potencialidades y capacidades de las instituciones del Sistema Nacional de Salud Pública, para propender a su especialización y fortalecimiento.

Art. 16.- Integrantes del Sistema Nacional Integrado de Donación y Trasplantes.- Todas las instituciones, entidades y/o profesionales, que formen parte del Sistema Nacional Integrado de Donación y Trasplantes, deberán contar con la acreditación respectiva emitida por la Autoridad Sanitaria Nacional.

Forman parte del Sistema Nacional Integrado de Donación y Trasplantes:

a) Los hospitales e instituciones del Sistema Nacional de Salud;
b) Los laboratorios clínicos generales de la red de salud y los laboratorios especiales de genética;
c) Los bancos de tejidos y bancos heterólogos de progenitores hematopoyéticos, acreditados por la Autoridad Sanitaria Nacional;
d) Los profesionales médicos o equipos médicos especializados en trasplantes;
e) Los centros de investigación científica que desarrollan actividades relacionadas con el trasplante de órganos, tejidos y/o células;
f) El Sistema aeroportuario del país, dentro del ámbito de su competencia;
g) La función judicial, dentro del ámbito de su competencia;
h) Los gobiernos autónomos descentralizados provinciales, distritales y municipales, dentro del ámbito de sus respectivas competencias;

Las Fuerzas Armadas, la Policía Nacional, las compañías de transporte aéreo, terrestre y fluvial; y, otras instituciones, serán entidades de apoyo logístico y operativo en los procesos de trasplante y cumplirán las disposiciones de la presente Ley y su reglamento.

Art. 17.- Optimización de unidades de alta complejidad.- La Autoridad Sanitaria Nacional, a través de los mecanismos pertinentes, creará y/o fortalecerá unidades de alta complejidad en el sistema público, con la finalidad de generar las capacidades suficientes y necesarias para desarrollar la actividad trasplantológica en el país, las mismas que formarán parte del Sistema Nacional Integrado de Donación y Trasplante, siendo responsables de la supervisión, seguimiento y evaluación en las fases de pre- trasplante, trasplante, y post- trasplante.

Art 18.- Capacitación del personal.- La Autoridad Sanitaria Nacional, priorizará la capacitación del personal sanitario y garantizará los recursos humanos suficientes y necesarios para tal fin.

Art. 19.- Autorización y Acreditación.- Los trasplantes de órganos, tejidos y células solamente podrán realizarse en hospitales e instituciones de salud que cuenten con la autorización de la Autoridad Sanitaria Nacional.

La acreditación será otorgada por la entidad o dependencia designada por la Autoridad Sanitaria Nacional. Los requisitos para la acreditación serán determinados por el reglamento que se expida para el efecto.

La Autoridad Sanitaria Nacional suspenderá o retirará, en forma inmediata y luego de la correspondiente inspección, la autorización y/o acreditación a los programas de trasplantes de los establecimientos de salud que no realicen estos procedimientos, de conformidad con el reglamento correspondiente.

Art. 20.- Responsabilidad.- La Autoridad Sanitaria Nacional será sólidamente responsable por los perjuicios que se deriven de la acreditación de establecimientos y profesionales que no hubieren cumplido con los requisitos establecidos en la presente Ley y sus reglamentos.

Las instituciones en las que se desarrolle la actividad trasplantológica y sus equipos de profesionales serán solidariamente responsables por cualquier violación a los preceptos de la presente Ley y sus reglamentos.

Art. 21.- Preparación del recurso humano.- Las instituciones de educación superior, en coordinación con la Autoridad Sanitaria Nacional, garantizarán la preparación del recurso humano profesional y de los equipos de trasplante, a través de procesos de formación y educación permanentes. Hasta que las instituciones de educación superior nacionales ofrezcan estudios avanzados y especializados de postgrado en esta materia, la preparación correspondiente se realizará a través de convenios de cooperación con instituciones educativas de otros países.

Art. 22.- Acreditación profesional.- Los actos médicos referidos al proceso de donación y trasplantes contemplados en esta Ley solamente podrán ser realizados por médicos o equipos acreditados, para tal efecto, por la Autoridad Sanitaria Nacional y reconocidos por la Secretaría de Educación Superior Ciencia, Tecnología e Innovación.

Art. 23.- Integración de equipos de trasplante.- Los equipos de trasplante se conformarán para cada tipo de trasplante. Los profesionales podrán participar de los equipos de trasplante para los cuales la Autoridad Sanitaria le haya otorgado su acreditación, pero no podrán participar de dos o más trasplantes simultáneos.

Los profesionales extranjeros podrán realizar su actividad en el país, siempre y cuando cumplan con los requisitos establecidos en esta Ley y en la Ley orgánica de educación superior.

Los profesionales que pertenezcan a los equipos de trasplante no podrán ser parte del organismo regulador.

Art. 24.- De las remuneraciones.- Los profesionales que forman parte del Sistema Nacional Integrado de Donación y Trasplantes percibirán una remuneración acorde con la actividad realizada, que garantice su dedicación permanente al Sistema.

Art. 25.- Lista de Espera Única Nacional.- Los órganos, tejidos y/o células serán distribuidos respetando la Lista de Espera Única Nacional; y, en casos específicos, en base de las escalas técnicas adoptadas para cada órgano y tejido en particular.

La Lista de Espera Única Nacional se establecerá de acuerdo a los parámetros definidos de conformidad con el reglamento que, para cada órgano y/o tejido, establezca la autoridad competente. La Autoridad Sanitaria Nacional administrará esta base de datos y asignará los componentes anatómicos respetando principios y criterios universales y constitucionales, en especial el interés superior de las niñas y niños y las condiciones de doble vulnerabilidad.

Se reconoce el derecho que tienen las y los ecuatorianos residentes en el exterior, que requieran algún trasplante, a ser incorporados en la Lista de Espera Única Nacional de acuerdo al reglamento que se dicte para el efecto y de acuerdo a los convenios internacionales referentes a la materia que suscriba el estado ecuatoriano.

Art. 26.- Asignación de componentes anatómicos.- La Autoridad Sanitaria Nacional, de acuerdo a escalas técnicas, diseñará los mecanismos operativos para la asignación de los componentes anatómicos provenientes de una donación.

Art. 27.- Referencia obligatoria.- Todo medico que diagnostique una enfermedad susceptible de ser tratada mediante un trasplante, tiene la obligación de notificar al paciente y referirlo a las unidades de salud correspondientes.

TITULO II
De la Donación y Ablación de Órganos y Tejidos

CAPITULO PRIMERO
De la Donación

Art. 28.- Sistema de identificación de donantes.- La Autoridad Sanitaria Nacional desarrollará un sistema de identificación de potenciales donantes. Este sistema será de aplicación obligatoria en todas las instituciones que forman parte del Sistema Nacional de Salud.

Art. 29.- Donación.- Las ecuatorianas, ecuatorianos y extranjeros residentes legales en el país, mayores de dieciocho años, al fallecer se convertirán en donantes, a menos que en vida hubieren manifestado, en forma expresa, su voluntad en contrario en una de las siguientes formas:

a) Manifestando su negativa a la donación de los órganos, tejidos o células de su cuerpo para posterior implante en seres humanos vivos o con fines de estudio o investigación; o,
b) Restringiendo, de modo específico, su voluntad afirmativa de donación a determinados órganos, tejidos y/o células.

Art. 30.- Expresión de la Voluntad.- La manifestación, restricción o condicionamiento de la voluntad para la donación de componentes anatómicos se hará constar en la cédula de ciudadanía en el caso de las y los ciudadanos ecuatorianos y en cualquier otro documento de identificación en el caso de los extranjeros residentes legalmente en el país.

La negativa de las personas a ser donantes no generará discriminación alguna y no podrá ser utilizada de modo público por ninguna autoridad, persona o medio de comunicación.

Art. 31.- Registro de la manifestación de voluntad.- Es obligación de la Dirección General de Registro Civil, Identificación y Cedulación de la República consultar y recabar de las personas mayores de dieciocho años, que concurran ante dicho organismo, la manifestación de su voluntad respecto de tener o no la calidad de donantes de órganos y registrarla en el documento de identificación respectivo.

Art. 32.- Autorización de donación de órganos, tejidos y células de menores de edad fallecidos.- Cuando se compruebe el diagnóstico de muerte cerebral de ecuatorianas, ecuatorianos o extranjeros residentes legalmente en el país, menores de dieciocho años de edad y que no sean emancipados, solamente sus padres y a falta de éstos su representante legal podrán autorizar, en forma exclusiva, la donación de sus órganos, tejidos y/o células especificando los alcances de la misma.

En ausencia de las personas mencionadas en el inciso anterior, podrán intervenir los jueces de la niñez y adolescencia competentes, para autorizar la donación.

Art. 33.- Requisitos de la donación en vida.- Cualquier persona podrá donar en vida sus componentes anatómicos, siempre y cuando se cumplan los siguientes requisitos:

a) Que la o el donante sea mayor de edad, en goce de plenas facultades mentales, con un estado de salud adecuado para el procedimiento y exista compatibilidad biológica, morfológica y funcional con la o el receptor;
b) Que la o el receptor tenga parentesco, hasta el cuarto grado de consanguinidad, con la o el donante, o se trate de su cónyuge o conviviente en unión libre; y, que, siendo el caso, se hubiere comprobado la compatibilidad entre donante y receptor mediante las pruebas médicas correspondientes. La misma regla se aplicará para los casos de filiación por adopción;
c) Que la o el donante y la o el receptor hayan sido previamente informados de las posibles consecuencias de su decisión y otorguen su consentimiento escrito y notariado, en forma libre, consciente y voluntaria. Dicho consentimiento deberá ser anexado a las respectivas historias clínicas;
d) Que la o el receptor sea una persona determinada en forma previa, de acuerdo al reglamento a la presente Ley;
e) Que la extracción de las partes o tejidos o la remoción de órganos no implique para la o el donante riesgo de incapacidad funcional permanente;
f) Que no existan indicios de prácticas ilegales de turismo para trasplante o tráfico de órganos; y,
g) En caso de donación cruzada, no constará la identidad de la o el receptor y será codificada por la Autoridad Sanitaria Nacional.

Art. 34.- Restricción de la donación en vida.- La extracción de órganos de donantes vivos se limitará a situaciones en las que se prevean grandes posibilidades de éxito del trasplante.

Art. 35.- Consentimiento expreso.- La donación de órganos, tejidos y/o células de donante vivo, para fines de trasplante, requerirá de la declaración del consentimiento informado de la o el donante, otorgada ante notario público. A esta declaración será incorporado el correspondiente informe psiquiátrico sobre la normalidad de sus facultades mentales. Para tal efecto, será necesario contar con el informe motivado del Comité de Ética del hospital trasplantador.

Art. 36.- Estado de salud.- El estado de salud físico y mental de la o el donante deberá ser certificado por un médico, distinto de aquellos que vayan a efectuar la extracción y el trasplante. Dicho profesional deberá informar al paciente respecto de los riesgos inherentes a la intervención, las consecuencias previsibles de orden somático o psicológico, las repercusiones que pueda suponer en su vida personal, familiar o profesional y los beneficios esperados.

Art. 37.- Documento de cesión.- El documento de cesión, donde se hace constar la conformidad con la donación, será firmado por la o el donante, el médico que ha de ejecutar la extracción y los demás asistentes. Cualquiera de ellos podrá oponerse, en forma expresa, a la donación en caso de dudar respecto de la idoneidad del consentimiento de la o el donante, lo que será notificado inmediatamente al organismo regulador.

Entre la firma del documento de cesión del órgano y la extracción del mismo, previa la autorización de la Autoridad Sanitaria Nacional, deberán transcurrir por lo menos veinticuatro horas.

Art. 38.- Revocatoria del consentimiento.- El consentimiento informado de la o el donante vivo no podrá ser sustituido ni complementado. Sin embargo, podrá ser revocado, en forma verbal, hasta el momento mismo de la intervención quirúrgica, mientras la o el donante conserve la capacidad para expresar su voluntad. Esta revocatoria no generará obligación de ninguna clase ni dará lugar a indemnización alguna por daños y perjuicios.

Art. 39.- Prohibición de expresar consentimiento por hijas e hijos menores de edad o representados vivos.- Los padres o los representantes legales no podrán otorgar el consentimiento para donar en vida con fines de trasplante u otra operación semejante, los órganos o tejidos de sus hijas o hijos menores de edad o representados. Se exceptúan de esta prohibición los casos de donación de médula osea, que podrá ser autorizada exclusivamente por los padres cumpliendo las condiciones y limitaciones establecidas en esta Ley y su reglamento.

Art. 40.- Trasplantes a extranjeros de donante vivo.- Las instituciones acreditadas para la realización de trasplantes estarán impedidas de realizar actos quirúrgicos de donación y/o implantación de órganos y tejidos a pacientes extranjeros que no sean residentes legales en la República del Ecuador.

En el caso particular del paciente extranjero que sea declarado en código cero, tendrá el mismo tratamiento que los pacientes nacionales.

Art. 41.- Donación cadavérica.- Una vez comprobada y certificada la muerte de una persona, se podrá disponer de todos o parte de sus órganos, tejidos y/o células, de conformidad con lo previsto en el articulo 29 de esta Ley.

Art. 42.- Muerte violenta.- En caso de muerte violenta de una persona, la extracción indicada en el artículo anterior solamente podrá realizarse cuando no interfiera con los resultados finales de la autopsia, siendo necesaria para la realización de la ablación de los órganos y tejidos la notificación previa al fiscal de turno.

Art. 43.- Xenotrasplante.- Los procedimientos de xenotrasplante están permitidos de acuerdo a las regulaciones que se establezcan en el reglamento a la presente Ley.

CAPITULO SEGUNDO
De la selección, donación y extracción

Art. 44.- Selección de órganos, tejidos y células.- Las actividades relacionadas con la selección, evaluación y obtención de órganos, tejidos y células se llevarán a cabo garantizando que estos procedimientos se efectúen de conformidad con los requisitos que, para el efecto, establecerá la Autoridad Sanitaria Nacional.

Art. 45.- Procedimiento de Ablación.- El retiro de órganos, tejidos y/o células de un cadáver será realizado por profesionales acreditados. La ablación de órganos, tejidos y células se realizará en estricto apego a los protocolos emitidos por la Autoridad Sanitaria Nacional.

Art.- 46.- Condiciones y requisitos para la ablación.- La obtención de órganos de donantes fallecidos se podrá realizar en todas las instituciones que cuenten unidades de cuidados intensivos y por personal debidamente acreditado por la Autoridad Sanitaria Nacional, de conformidad con el reglamento que dicte para el efecto.

Art. 47.- Componentes anatómicos que pueden ser objeto de ablación.- La Autoridad Sanitaria Nacional, de acuerdo con criterios técnicos y científicos, describirá en el respectivo reglamento los componentes anatómicos que pueden ser objeto de ablación.

Art. 48.- Banco de tejidos y/o células.- La Autoridad Sanitaria Nacional, en ejercicio de su rectoría, creará, autorizará y regulará el funcionamiento de banco de tejidos, progenitores no embrionarios ni fetales, hematopoyéticos y células no embrionarias ni fetales.

Las obligaciones de éstos se establecerán en el reglamento que se dicten para su efecto.

Art. 49.- Accesibilidad a Bancos de tejidos y/o células.- Los centros públicos y privados acreditados, que realizan implantación de tejidos y/o células, para que tengan acceso a los mismos, serán registrados en una base de datos y su entrega se realizará según el reglamento correspondiente.

Art. 50.- Condiciones de los bancos de tejidos y/o células.- Los bancos de tejidos y/o células garantizarán que todos los procedimientos asociados con su obtención, procesamiento, transporte, almacenamiento y distribución se encuentren documentados en manuales de procedimientos y se ajusten a las normativas internacionales y requisitos establecidos por la Autoridad Sanitaria Nacional.

Art. 51.- Personal de los bancos de tejidos y/o células.- Todo el personal de los bancos de tejidos y/o células que intervengan en las diferentes actividades relacionadas con la obtención, procesamiento, preservación, almacenamiento y distribución de células y tejidos deberá ser acreditado para el ejercicio de sus actividades. Su perfil, funciones y responsabilidades serán los previstos en el reglamento respectivo.

Art. 52.- Células hematopoyéticas.- Podrán realizarse en el país los tratamientos con células progenitoras, no embrionarias ni fetales, hematopoyéticas provenientes de la médula ósea, sangre periférica y cordón umbilical para el tratamiento de patologías, cuya eficacia haya sido comprobada y sean debidamente autorizados por la Autoridad Sanitaria Nacional.

Art. 53.- Células Madre.- La Autoridad Sanitaria Nacional controlará y regulará el uso, investigación y aplicación de células madre adultas, provenientes de sangre cordón umbilical del recién nacido, médula ósea, o cualquier otro componente anatómico adulto de donde se obtenga. Se excluye la aplicación de células madres embrionarias y fetales.

Toda nueva terapia con células madres adultas, no embrionarias ni fetales, que se quieran aplicar en el país, deberá contar con la aprobación de la Autoridad Sanitaria Nacional y ser aceptada por los organismos mundiales de salud de los que el Estado ecuatoriano sea parte.

La manipulación de células madre con fines de investigación, estará permitida siempre y cuando se cumpla con los siguientes requisitos:

a) Exista la autorización expresa de la autoridad competente;
b) No exista fines de lucro;
c) Exista el consentimiento informado de la o el donante y la o el receptor;
d) No se trate de células madres embrionarias y fetales; y,
e) Los demás que señale el respectivo reglamento.

Art. 54.- Autorización.- Se podrá realizar investigación con ingeniería tisular, previa autorización de la Autoridad Sanitaria Nacional y el auspicio de centros de investigación reconocidos.

Art. 55.- Prohibición.- Se prohíbe toda actividad que involucre la utilización de células y tejidos humanos que no se encuentren regulada en esta Ley y sus reglamentos.

TITULO III
DE LA AUTORIDAD REGULADORA

Art. 56.- Autoridad Reguladora.- La Autoridad Sanitaria Nacional, en ejercio de su rectoría, a través de la entidad o dependencia que designe para el efecto, normará, regulará y controlará la actividad trasplantológica en la República del Ecuador. Las funciones y atribuciones para su funcionamiento, serán las establecidas en el reglamento a la presente ley.

Art. 57.- Función.- La entidad o dependencia designada por la Autoridad Sanitaria Nacional, encargada de ejecutar la política pública de donación y trasplantes, estará adscrita a dicha Autoridad y gozará de autonomía técnica, administrativa y financiera. Se sujetará a lo establecido en la presente Ley y su reglamento, velando por su cumplimiento y promoviendo acuerdos internacionales de cooperación.

Art. 58.- Control de la actividad de las compañías de seguros y empresas privadas de salud y medicina prepagada.- La Autoridad Sanitaria Nacional regulará y controlará a las compañías de seguros y empresas privadas de salud y medicina prepagada en lo referente a la oferta de trasplante de órganos, tejidos y/o células.

Las compañías de seguros y las empresas privadas de salud y medicina prepagada están obligadas, en el marco de las políticas definidas por la Autoridad Sanitaria Nacional y de la presente ley, a cumplir las coberturas comprometidas para trasplantes que se establezcan en los respectivos contratos o pólizas, así como a cubrir los montos totales del trasplante y de las complicaciones médicas que se lleguen a presentar. En caso de incumplimiento, estas compañías serán administrativa y civilmente responsables. Sin perjuicio de las acciones penales que puedan iniciarse en contra de sus administradores y/o representantes legales.

Art. 59.- Campañas de educación e información.- La Autoridad Sanitaria Nacional a través de sus instancias competentes, realizará, coordinará y ejecutará campañas de educación e información para promover una conciencia solidaria en la población, a fin de promover la cultura de donación y explicar objetivamente los beneficios de los trasplantes.

Art. 60.- Campañas de educación en el Sistema Nacional de Educación.- La Autoridad Educativa Nacional en coordinación con la Autoridad Sanitaria Nacional, incorporará en los planes y programas del sistema nacional de educación la temática correspondiente a la importancia y necesidad de la donación de órganos, tejidos y/o células para trasplante.

Art. 61.- Difusión a unidades médicas y profesionales de la salud.- La Autoridad Sanitaria Nacional planificará, implementará y coordinará campañas internas y capacitación relacionadas con el trasplante de órganos, tejidos y/o células, en beneficio de las unidades médicas y los profesionales de la salud.

Art. 62.- Publicidad y Promoción.- El Estado garantizará a través de las instancias correspondientes, la difusión y promoción, mediante campañas de información nacional en los medios de comunicación masiva destinadas a orientar a la población hacia una cultura de donación y trasplante de órganos, tejidos y/o células, así como a informar respecto del derecho de la población a no ser donante.

TITULO IV
Del Procedimiento Administrativo, Prohibiciones y Sanciones

CAPITULO PRIMERO
De los Actos Administrativos

Art. 63.- Actos Administrativos.- Para la aplicación de la presente Ley, la Autoridad Sanitaria Nacional se regirá por la dispuesto en el Estatuto del Régimen Jurídico Administrativo de la Función Ejecutiva, incluyendo la impugnación, recursos administrativos, plazos para resolver y los efectos del silencio administrativo.

Art. 64.- Actos normativos.- Los actos normativos de la entidad o dependencia designada por la Autoridad Sanitaria Nacional serán expedidos de conformidad con lo previsto en el Estatuto del Régimen Jurídico Administrativo de la Función Ejecutiva. La iniciativa para la expedición deberá ir acompañada por los estudios e informes necesarios que justifiquen su legitimidad y oportunidad.

Art. 65.- Impugnación de actos normativos.- Las personas que se consideren afectadas directamente por las disposiciones de los actos normativos, emitidos de conformidad con lo previsto en el anterior artículo de esta Ley, podrán pedir su derogatoria o reforma en sede administrativa, sin perjuicio de su derecho a impugnarlos judicialmente.

CAPITULO SEGUNDO
De la competencia administrativa y procedimiento

Art. 66.- Competencia administrativa.- La entidad o dependencia designada por la Autoridad Sanitaria Nacional tendrá competencia administrativa para conocer, aplicar y ejecutar las disposiciones previstas en esta Ley y sancionar administrativamente las infracciones previstas en esta Ley a nivel nacional.

Art. 67.- Ejercicio de la competencia.- La competencia administrativa de la entidad o dependencia designada estará sujeta a las normas establecidas para la competencia ene el Estatuto del Régimen Jurídico Administrativo de la Función Ejecutiva.

Art. 68.- Procedimiento Administrativo.- Para efecto de lo dispuesto en esta Ley, inclusive en la aplicación de sanciones, la entidad o dependencia designada aplicará el procedimiento administrativo común establecido en el Estatuto del Régimen Jurídico Administrativo de la Función Ejecutiva; así mismo, para la presentación de recursos y reclamos administrativos se estará a lo dispuesto en el mencionado Estatuto.

Art. 69.- Responsabilidad de las autoridades de salud.- Las autoridades de salud, responsables de la aplicación de esta Ley, que no cumplieren adecuadamente con su obligación estarán sujetas a las acciones administrativas, civiles y penales a que hubiere lugar.

CAPITULO TERCERO
Del régimen de infracciones y sanciones administrativas

Sección Primera
De las medidas preventivas y actividades de inspección

Art. 70.- Verificación de cumplimiento.- La Autoridad Sanitaria Nacional será responsable de verificar el cumplimiento de esta Ley y sus reglamentos, mediante la realización de la inspecciones y peticiones de información que considere pertinentes.

Art. 71.- Medidas Preventivas.- En caso de verificarse acciones u omisiones que pudieren provocar daño o constituir un peligro para la salud de las personas, como consecuencia de las actividades relacionadas con esta Ley, la Autoridad Sanitaria Nacional establecerá las medidas preventivas a ser adoptadas, de conformidad con el reglamento correspondiente.

Sección Segunda
De las infracciones y sanciones administrativas

Art. 72.- Sanciones.- Las infracciones administrativas determinadas en esta Ley, serán sancionadas por la Autoridad Sanitaria Nacional con:

a) Multa;
b) Suspensión del permiso o licencia y acreditación;
c) Suspensión temporal o definitiva de la autorización o acreditación para realizar actividades de trasplante;
d) Suspensión temporal o definitiva del ejercicio profesional; y,
e) Clausura parcial, temporal o definitiva del establecimiento correspondiente.

Art. 73.- Sanciones por comercialización.- Sin perjuicio de las sanciones civiles y penales a que hubiere lugar, será sancionado con:

a) Multa de cincuenta remuneraciones básicas unificadas del trabajador privado, quien comercialice órganos, tejidos, células y/o componentes anatómicos. En el caso de que éstos provengan de personas vivas, la multa será de cien remuneraciones básicas unificadas del trabajador privado; y,
b) Multa de cincuenta remuneraciones básicas unificadas del trabajador privado, quien facilite o proporcione a otro con animo de lucro, uno o más órganos propios para ser usados con fines de trasplante;

La donación de órganos solamente podrá realizarse a título gratuito. Se prohíbe, en consecuencia, y será nulo y no tendrá valor jurídico alguno, al acto o contrato que, a título oneroso o a cualquier otro tipo de compensación, contenga la promesa de entrega de uno o más órganos para efectuar un trasplante.

Art. 74.- Sanción por el uso indebido de información.- Sin perjuicio de las sanciones civiles y penales a que hubiere lugar, será sancionado con multa de cien remuneraciones básicas unificadas del trabajador privado, quien, utilizando información privilegiada favoreciera a un receptor para el trasplante de órganos, tejidos y/o células, haciendo caso omiso de la Lista de Espera Única Nacional.

Art. 75.- Sanción por realizar turismo de trasplantes.- Sin perjuicio de las sanciones civiles y penales a que hubiere lugar, quien o quienes fomenten o participen en actividades relacionadas con turismo para trasplante de órganos, de conformidad con las disposiciones de la Organización Panamericana de la Salud, será sancionado con multa de cien remuneraciones básicas unificadas del trabajador privado.

Art. 76.- Sanción por la realización de procedimientos de trasplante sin autorización.- Sin perjuicio de las sanciones civiles y penales a que hubiere lugar, los establecimientos de salud públicos o privados en donde se realicen o se hayan realizado procedimientos regulados por esta Ley, sin contar con la autorización y acreditación emitida por la Autoridad Sanitaria Nacional, serán sancionados con multa de doscientas remuneraciones básicas unificadas del trabajador privado y clausura temporal o definitiva del establecimiento.

Art. 77.- Sanciones por falta de notificación.- Sin perjuicio de las sanciones civiles y penales a que hubiere lugar, la máxima autoridad de la institución de salud, que teniendo conocimiento de la comisión de la infracción tipificada en el artículo anterior no hubiere notificado a la Autoridad Sanitaria Nacional, será sancionado con multa de cincuenta remuneraciones básicas unificadas del trabajador privado.

En caso de tratarse de un profesional de la salud se le suspenderá su ejercicio profesional por cinco años, y en caso de estar involucrado en cualquier otra actividad ilícita que haga relación a las actividades reguladas por esta Ley será suspendido definitivamente de su ejercicio profesional.

En caso de tratarse de una institución pública, su máxima autoridad será destituida, previo el correspondiente sumario administrativo, respetando el debido proceso.

Art. 78.- Actuación de los profesionales de la Salud.- Sin perjuicio de las sanciones civiles y penales a que hubiere lugar, el profesional de la salud que hubiere realizado cualquiera de los procedimientos contemplados en esta Ley sin la debida autorización de la Autoridad Sanitaria Nacional será sancionado con:

a) Suspensión temporal del ejercicio profesional hasta cinco años; y,
b) Suspensión definitiva del ejercicio profesional, en caso de reincidencia.

Art. 79.- Irrespeto a la Lista Única Nacional.- Sin perjuicio de las sanciones civiles y penales a que hubiere lugar, la institución y/o profesional de la salud que incumplan lo dispuesto en esta ley respecto del orden establecido en la Lista de Espera Única Nacional serán sancionados de la siguiente manera:

a) Clausura temporal de la institución hasta por cinco años; y,
b) Suspensión de la autorización o acreditación del o la profesional de la salud para realizar actividades de trasplante hasta por cinco años.

En ambos casos se aplicará una multa de veinte remuneraciones básicas unificadas del trabajador privado; y, en caso de reincidencia, se impondrá la clausura definitiva de la institución o la suspensión definitiva de la autorización o acreditación del o la profesional de la salud para realizar actividades de trasplante.

Art. 80.- Incumplimiento en brindar facilidad para el transporte.- Sin perjuicio de las sanciones administrativas, civiles y penales a que hubiere lugar, quien incumpla lo dispuesto en la Disposición General Tercera de esta Ley será sancionado con multa de cien remuneraciones básicas unificadas del trabajador privado.

Art. 81.- Falta de pago de multas.- La falta de pago de las multas, aplicadas de conformidad con esta Ley, hará exigible su cobro por vía coactiva, constituyendo título ejecutivo suficiente el testimonio autenticado de la resolución condenatoria en firme.

Art. 82.- Reincidencias.- La reincidencia en el incumplimiento de esta Ley y sus reglamentos será reprimida con el doble de la sanción máxima establecida para el caso de las multas, con clausura definitiva para el caso de establecimientos y la suspensión definitiva del ejercicio profesional para el caso de profesionales de la salud.

Art. 83.- Destino de las multas.- El valor total de las multas que aplique la Autoridad Sanitaria Nacional será depositado en la Cuenta Única del Tesoro Nacional y se destinará al fortalecimiento de los procesos de donación y trasplante de órganos, tejidos y células en todo el territorio nacional, así como a los procesos de control de las actividades previstas en la presente Ley.

Art. 84.- Prescripción de las acciones administrativas.- Las acciones administrativas prescribirán en el plazo de tres (3) años contado desde la fecha de su comisión.

DEFINICIONES

Para la interpretación de las normas contenidas en la presente Ley se utilizarán las siguientes definiciones:

Ablación.- Separación o extirpación quirúrgica de una parte del cuerpo; amputación.

Almacenamiento.- Es el mantenimiento de los tejidos y/o células en condiciones controladas y adecuadas hasta su distribución.

Alogénico.- Es el trasplante entre individuos de una misma especie genéticamente diferentes.

Aplicación.- Es cualquier actividad que implique el uso de células y/o tejidos en un receptor humano y/o en aplicaciones extra corporales (se engloban las actividades de implantar, infundir, injertar, aplicar o trasplantar).

Asignación de órganos, tejidos y/o células.- Es el procedimiento mediante el cual, respetando los principios de bioética, las listas de espera y su reglamento, la Autoridad Sanitaria determina al beneficiario del o los órganos, tejidos y/o células.

Autoinjerto o trasplante unipersonal.- Es el reemplazo en una persona de componentes anatómicos por otros provenientes de su propio organismo.

Banco de tejidos.- Es la unidad de salud técnica, especializada y autorizada, que obtiene, procesa, almacena y preserva tejidos y/o células para su posterior implantación o utilización con fines terapéuticos y de investigación, bajo normas que permitan garantizar la calidad desde su obtención hasta la utilización clínica.

Banco autólogo.- Es la unidad de salud técnica, especializada y calificada que preserva tejidos y células de una misma persona.

Banco alogénico.- Es la unidad de salud técnica, especializada y calificada que preserva tejidos y células obtenidos de diversos donantes y utilizados para diferentes receptores.

Célula.- Es la unidad anatómica, funcional y genética de los seres vivos. Para fines de ésta Ley se entenderá por células al conjunto de células individuales que no están unidas por ninguna forma de tejido conectivo.

Células Madre.- Son aquellas células dotadas simultáneamente de la capacidad de autorenovación (es decir, producir más células madre) y de originar células hijas comprometidas en determinadas rutas de desarrollo, que se convertirán finalmente por diferenciación en tipos celulares especializados.

Código Cero.- Es la condición médica en la cual la vida del paciente está en inminente peligro y depende de un trasplante de extrema urgencia, considerándose con estricta prioridad en las listas de espera.

Componentes anatómicos.- Son los órganos, tejidos y/o células, y en general, todas las partes que constituyen el organismo humano.

Cuarentena.- La condición de espera para el tejido o células extraídas, previa a su implantación, mientras se toma una decisión sobre su aceptación o rechazo.

Distribución.- El transporte y la entrega de órganos, tejidos y/o células destinados a su implantación en el ser humano.

Donación.- Es el hecho de donar tejidos y/o células humanas destinadas a ser aplicadas en el ser humano.

Donante.- Es toda fuente humana viva o muerta de órganos, tejidos y/o células en buen estado funcional, para trasplantarlos en otra persona o utilizarlos con fines terapéuticos o de investigación.

Donante vivo.- Se considera donante vivo a aquella persona que, cumpliendo los requisitos establecidos en la presente Ley y su reglamento, efectúa la donación en vida de células, tejidos u órganos o parte de los mismos, cuya función sea compatible con la vida y pueda ser compensada por su organismo de forma adecuada y suficientemente segura.

Donante cadavérico.- Se considera donante cadavérico a aquella persona fallecida de la que se pretende extraer órganos, tejidos y/o células que, cumpliendo los requisitos establecidos en la presente Ley y su reglamento, no hubiere dejado constancia expresa de su oposición.

Efecto adverso grave.- Cualquier hecho desfavorable vinculado a la obtención, evaluación, procesamiento, almacenamiento y distribución de componentes anatómicos que pueda conducir a la trasmisión de una enfermedad, a la muerte del paciente, o a estados que hagan peligrar su vida, a discapacidades o incapacidades o que puedan dar lugar a hospitalización, o enfermedad, o la pueda prolongar.

Equipo de Trasplantes.- Grupo interdisciplinario de profesionales con formación académica y experiencia certificada en los diferentes procesos relacionados a la procuración de órganos, ablación y/o trasplante de órganos, tejidos y células, calificados por la Autoridad Sanitaria Nacional.

Lista de Espera Única Nacional.- Es el registro ordenado de las o los pacientes con patologías susceptibles de trasplante, manejado directa y exclusivamente por la Autoridad Sanitaria Nacional, que se encuentran en espera de un órgano, tejidos y/o células correspondientes y que ha cumplido con los requisitos establecidos, de conformidad con el reglamento correspondiente.

Muerte.- Para fines de esta Ley, es el "cese permanente de la función del organismo como un todo. Esta definición implica que el mantenimiento por medios artificiales de la función cardiovascular y ventilatoria se reduce al funcionamiento de "subsistemas" independientes y que la función del organismo "como un todo" se ha perdido; teniendo en cuenta que el encéfalo es el responsable de la función del organismo como un todo" se considera que la "muerte encefálica" es equivalente a la muerte.

Muerte encefálica.- Cese irreversible de las funciones encefálicas, aún en presencia de un funcionamiento cardiovascular y ventilatorio artificial, certificada de acuerdo al protocolo que la Autoridad Sanitaria Nacional reglamente.

Órgano.- Una parte diferenciada y vital del cuerpo humano formada por diferentes tejidos, que mantiene su estructura, vascularización y capacidad para desarrollar funciones fisiológicas con un nivel de autonomía importante.

Preservación.- La utilización de agentes físicos y químicos, u otros medios durante la obtención, procesamiento y mantenimiento de los órganos y/o tejidos, a fin de retrasar el deterioro biológico o físico de los mismos.

Procuración.- Es el conjunto de actividades relacionadas con la detección, identificación, evaluación y mantenimiento de un potencial donante cadavérico; con el diagnostico y certificación de muerte, obtención del consentimiento familiar o de procurador en el caso de niños, niñas y adolescentes o de personas que no pueden expresar su voluntad de acuerdo a la Ley; coordinación de los equipos de ablación, acondicionamiento y mantenimiento de los órganos, tejidos y células en condiciones de viabilidad para su implante. Así como la asignación, búsqueda y localización de receptores.

Protocolos.- Son los documentos que definen las normas y procedimientos técnicos y administrativos del proceso de los trasplantes y en los cuales constan todos los datos e información que deben ser cumplidos obligatoriamente por los responsables de las diferentes fases de los trasplantes.

Receptor.- Es la persona en cuyo cuerpo se implantan componentes anatómicos provenientes de otro organismo humano o de otra especie.

Tejido.- Toda parte constituyente del cuerpo humano formada por células unidas por algún tipo de tejido conectivo.

Tráfico de órganos.- Es la extracción u obtención, transporte, trasferencia, encubrimiento y/o recepción de componentes anatómicos de personas vivas o fallecidas con la finalidad de obtener o extraer sus órganos, tejidos o células, con fines de trasplante; mediante una amenaza, uso de la fuerza u otras formas de coacción, plagio, fraude, abuso de poder, o la entrega y recepción de pagos o beneficios.

Trasplante.- Es el remplazo, con fines terapéuticos, de componentes anatómicos en una persona, por otros iguales y funcionales, provenientes del mismo receptor, de un donante vivo o cadavérico.

Trazabilidad.- Capacidad de localizar e identificar tejidos o células durante cualquier etapa, desde su obtención, pasando por el procesamiento, evaluación y almacenamiento, hasta su distribución al receptor o su desestimación o eliminación, incluyendo la capacidad de identificar al donante, el banco de tejidos y células, las instalaciones que lo reciben, procesan o almacenan los órganos, tejidos o células, los receptores y cualquier producto y material que entre en contacto con esos tejidos o células y que pueda afectar a la calidad y seguridad de los mismos.

Turismo de trasplantes.- Es el traslado de órganos, donantes, receptores del trasplante fuera de sus fronteras de jurisdiccionales originales, dirigido a realizar un trasplante en el Ecuador, sin contar con la categoría de inmigrante en el país.

Validación.- Es la evidencia documental que prueba, con un elevado nivel de garantía, que un determinado proceso, equipo o parte de un equipo o condición ambiental acaba produciendo, de forma consistente y reproducible, un determinado producto que cumple las especificaciones, cualidades y atributos que se habían predeterminado. Un proceso es validado con vistas a probar su efectividad para un uso determinado.

Xenotrasplante.- Es el trasplante de órganos, tejidos o células de una especie a otra. Es decir, la utilización de órganos, tejidos o células de animales para su implantación en el ser humano.

DISPOSICIONES GENERALES

PRIMERA.- Los trasplantes de órganos, tejidos y células serán considerados como prácticas de técnica corriente y no experimental y se sujetarán a los procedimientos técnicos y jurídicos de control de calidad que establecerá la Autoridad Sanitaria Nacional.

SEGUNDA.- Es obligación de la Autoridad Sanitaria Nacional fortalecer los servicios públicos de salud, para que sean éstos los que desarrollen los procedimientos de trasplantes de órganos, tejidos y células a nivel nacional.

TERCERA.- Las compañías de transporte aéreo, terrestre, marítimo y fluvial deberán brindar todas las facilidades para transportar todo el equipo humano, órgano, tejido, célula o componente anatómico que sea necesario para realizar un procedimiento de trasplante.

DISPOSICIONES TRANSITORIAS

PRIMERA.- El Presidente de la República, dentro del plazo de noventa días contado a partir de la vigencia de esta Ley, emitirá el Reglamento que cree o ratifique al, organismo regulador de trasplante de órganos, tejidos y células de la República del Ecuador. Mientras tanto, el Organismo Nacional de trasplante de Órganos y Tejidos, creado a través del Decreto Ejecutivo No. 2302, publicado en el Registro Oficial No. 516 de 18 de febrero de 2002, seguirá cumpliendo sus funciones y atribuciones.

SEGUNDA.- El Presidente de la República, dentro del plazo de noventa días contados a partir de la vigencia de esta Ley, emitirá todos los reglamentos pertinentes para su debida aplicación.

TERCERA.- Una vez promulgada la presente Ley, la Dirección General del Registro Civil, Identificación y Cedulación en coordinación con la Autoridad Sanitaria Nacional, implementarán en un plazo no mayor a 360 días, los mecanismos necesarios para la aplicación de lo dispuesto en el artículo 30 de la presente Ley.

CUARTA.- La Autoridad Sanitaria Nacional, una vez promulgada la presente Ley y en coordinación con las entidades relacionadas, en el transcurso del año subsiguiente de la promulgación, llevará a cabo una campaña informativa y educativa nacional al respecto del contenido de esta Ley, así como, de concientización de donación de órganos y los mecanismos de acceso a los servicios; una vez trascurrido el año al que se hace referencia en la presente disposición, se hará efectivo lo dispuesto en el artículo 29 de la ley.

DISPOSICIONES REFORMATORIAS

PRIMERA.- Sustitúyase en numeral 14 del Artículo 98 de la Ley General del Registro Civil Identificación y Cedulación, agregado por la ley No. 67, publicada en el Suplemento del Registro Oficial No. 423 de 22 de Diciembre del 2006, por el siguiente:

"14o.- Manifestación, restricción o condicionamiento de la voluntad para la donación de órganos, tejidos o células del ciudadano, de conformidad con lo establecido en la Ley Orgánica de Donación y Trasplantes de Órganos, Tejidos y Células".

SEGUNDA.- Sustitúyase el artículo innumerado, que consta en el Capítulo agregado por la Ley 2005-2, promulgada en el Registro oficial No. 45 de 23 de junio de 2005, por el siguiente:

"Artículo... (1) Quien dolosamente incumpla con las obligaciones o viole las prohibiciones previstas en los artículos 11, 19, 58, 69, 74, 76, 77, 78 y 79 de la Ley Orgánica de Donación y Trasplante de Órganos, Tejidos y Células; quien falsifique o adultere un protocolo de donación de trasplante, documento definido en la misma Ley, será reprimido con reclusión menor ordinaria de (3) a seis (6) años.

En caso de incumplimiento e inobservancia de las obligaciones o prohibiciones antes señaladas, cuando se refiera a instituciones o personas jurídicas, se presumirá la responsabilidad penal de máxima autoridad de la institución o representante legal de la persona jurídica.

Quien, comercie dolosamente o trafique con órganos, tejidos, sustancias corporales o cualquier material anatómico proveniente de cadáveres humanos será reprimido con reclusión menor extraordinaria de nueve (9) a doce (12) años. Igual, pena se impondrá a quien los seleccione, extraiga, evalúe, prepare, obtenga, almacene, transporte, asigne, distribuya o trasplante dolosamente.

La pena será de reclusión mayor extraordinaria de doce (12) a dieciséis (16) años, si las actividades referidas en el inciso anterior se realizan con órganos, tejidos, sustancias corporales o cualquier material anatómico que provengan de personas vivas.

Se impondrá pena de reclusión mayor exxtraordinaria de doce (12) a dieciséis años, a las personas que extraigan o trasplanten cualquier componente anatómico humano, en centros médicos no acreditados por la Autoridad Sanitaria Nacional.

Si los componentes anatómicos extraídos o trasplantados dolosamente, provienen de niños, niñas o de adolescentes o personas con discapacidad, la pena será de reclusión mayor especial de de dieciséis (16) a veinticinco (25) años".

TERCERA.- Agréguese, a continuación del artículo inumerado, agregado en el capítulo agregado por la Ley 2005-2, agregado en el capítulo agregado por la ley 2005-2, promulgada en el Registro Oficial No. 45 de 23 de junio de 2005, el siguiente artículo:

"Art... (2).- Quien traslade órganos, donantes, receptores o profesionales de la salud especializados en trasplantes, fuera de sus fronteras jurisdiccionales originales, con la finalidad de realizar uno o más trasplantes en la República de Ecuador, sin contar con la categoría inmigrante en el país o con los permisos correspondientes de la Autoridad Sanitaria Nacional, será reprimido con la apena de reclusión mayor extraordinaria de doce (12) meses a dieciséis (16) años."

DISPOSICIONES DEROGATORIAS

PRIMERA.- Derógase la Ley de Trasplantes de Órganos y Tejidos, Ley No. 58, publicada en el Registro Oficial No. 492 de 27 de julio de 1994.

SEGUNDA.- Derógase el artículo 82 de la Ley Orgánica de Salud, Ley No. 67 publicada en el Suplemento del Registro Oficial No. 432 de 22 de diciembre de 2006.

TERCERA.- Derógase el artículo 83 de la Ley Orgánica de Salud, Ley No. 67, publicada en el Registro Oficial No. 432 de 22 de diciembre de 2006.

CUARTA.- Derógase el artículo 252 de la Ley Orgánica de Salud, Ley No. 67, publicada en el Suplemento del Registro Oficial No. 432 de 22 de diciembre de 2006.

QUINTA.- Derógase expresamente todas aquellas normas que se contrapongan a la presente Ley.

Artículo final.- La presente Ley entrará en vigencia partir de la fecha de su publicación en el Registro Oficial.

Dado y suscrito en la Asamblea Nacional, ubicada en el Distrito Metropolitano de Quito, Provincia de Pichincha, a los catorce días del mes de febrero de dos mil once. f) FERNANDO CORDERO CUEVA Presidente f) DR. ANDRÉS SEGOVIA S. Secretario General.

CERTIFICO que la Asamblea Nacional discutió y aprobó la **LEY ORGÁNICA DE DONACIÓN Y TRASPLANTES DE ÓRGANOS, TEJIDOS Y CÉLULAS**, en primer debate el 28 de octubre de 2010, en segundo debate 4 y 6 de enero de 2011 y se pronunció sobre la objeción parcial del Presidente de la República el 14 de febrero de 2011.

Quito, 21 de febrero de 2011

f.) Dr. Andrés Segovia S., Secretario General.

MATRIZ COMPARATIVA
LEY ORGÁNICA DE DONACIÓN Y TRASPLANTES DEL 2011
vs. LEY DE TRASPLANTES DE 1994

EJE TEMÁTICO	LEY ANTERIOR	LEY ACTUAL
Sobre el Rol de la Autoridad Sanitaria Nacional	No se encontraba claramente definido en la ley	Encargado de la Emisión de políticas públicas sobre la Donación y Trasplante y su aplicación a través de: La creación y desarrollo del Sistema Integrado Nacional de Donación y Trasplante; la generación de mecanismos para la detección y notificación obligatoria de potenciales donantes; el desarrollo de la actividad trasplantológica (creación de bancos e implementación de unidades de trasplante); el desarrollo de nuevas técnicas de trasplante; la capacitación de personal; la creación de mecanismos de incremento de Donantes; y la garantía de recursos.
Sobre los Principios de la Donación	No hace referencia	Establece 7 Principios: Altruismo, Voluntariedad, Gratuidad, Solidaridad, Transparencia, Interculturalidad y Bioética.
Sobre los Derechos de los Donantes y Receptores	No se los establece explícitamente, ya que se encuentran implícitos en cada uno de los procesos regulados.	Se definen 8 derechos fundamentales: El derecho a la Información; a expresar su consentimiento; a precautelar su identidad; a la confidencialidad sobre datos, productos y procesos en la donación y trasplante; derecho a la Oportunidad y Gratuidad; a la Garantía sobre los componentes anatómicos; a un lugar especializado y manutención de la persona que la cuida; y a la medicación necesaria para mantener su trasplante.
Jurisdicción sobre órganos, tejidos y/o células	El Ministerio de Salud Pública llevará un registro Nacional de Órganos y Componentes anatómicos.	Independientemente de su lugar de ablación o extirpación son responsabilidad de la Autoridad Sanitaria Nacional.
Entrega de Información	No hace referencia	Establece como una obligación para todos los actores del SNIDYT
Trato Preferencial	No hace referencia	Para el Receptor y Donante
Confidencialidad	No hace referencia	Hace énfasis en la no identificación del donante y/o receptor y el establecimiento de mecanismos para resguardar datos; así como la obligación de mantener información clínica por 30 años bancos de tejidos; y la prohibición de divulgación de información.
Sistema Nacional Integrado de Donación y Trasplantes	No hace referencia	Crea dicho sistema el cual va estar compuesto por las instituciones, programas, políticas, recursos, acciones y actores relacionados con la actividad trasplantológica; que será coordinado por el ONTOT quien ejecutará las políticas de trasplante.
Acreditación	Establece la acreditación de hospitales e instituciones y sus condiciones técnicas de manera general	Establece la acreditación de cada uno de los miembros del SINDYT, entre los cuales se incluyen los profesionales médicos y equipos médicos. Establece además que no se puede realizar ningún proceso de trasplante sin que la entidad o los médicos y equipo médico se encuentren debidamente acreditados. Definiendo la responsabilidad solidaria frente a las acciones de sus profesionales.
Lista de Espera	No hace referencia	Administrada por la Autoridad Sanitaria Nacional; en base a principios y criterios universales y constitucionales (interés superior de las niñas y niños y doble vulnerabilidad). Establece que los órganos, tejidos y/o células serán distribuidos respetando la Lista de Espera Única Nacional, de acuerdo a escalas técnicas por cada órgano y tejido en particular; y reconociendo además el derecho de ecuatorianas y ecuatorianos residentes en el exterior.
Asignación de órganos	Distribución de órganos de acuerdo a un estricto orden de prioridad científica; hay una comisión de delegados.	La Autoridad Sanitaria establecerá mecanismos de designación en base a escalas técnicas.
Referencia Obligatoria	No hace referencia	Todo médico que diagnostique una enfermedad de ser tratada mediante un trasplante tiene la obligación de referir al paciente a las unidades de salud correspondientes.
Voluntad	a) Donación Previa; b) Consentimiento escrito de los familiares, dentro del cuarto grado de consanguineidad y segundo grado de afinidad; c) Consentimiento presunto sin objeción alguna.	Voluntad Presunta: “todos somos donantes a menos que hubiésemos manifestado lo contrario, según los mecanismos establecidos por la ley”.
Restricción de la Voluntad	Se hará constar, sin formalidad especial, en la ficha de ingreso del centro médico o en su historia clínica, siempre y cuando no lo hubiera expresado antes. Esta restricción puede ser total o parcial.	La restricción de la voluntad o condicionamiento de la misma se hará constar en la cédula, por lo tanto la Dirección General del Registro Civil, cedulación e Identificación, es el órgano encargado de consultar y registrar la voluntad.
Autorización de donación de menores de edad	Ni los padres, ni representantes podrán otorgar el consentimiento para donar con fines de trasplante los componentes de hijos, pupilos y representados. Se exceptúa la donación de médula ósea.	Si se ha diagnosticado la muerte encefálica, los padres y a falta de estos sus representantes legales podrán autorizar la donación, especificando el alcance de la misma. No se podrá autorizar la donación en vida de menores de edad, a menos de que sea donación de médula ósea y lo harán sus padres o representantes legales.
Donación en vida	**Condiciones del Donante:** Mayor de Edad; Goce facultades mentales; Estado de salud adecuado; Debe ser padre, madre, hijo o hermanos; excepcional cuarto grado de consanguinidad y segundo de afinidad. Consentimiento Informado del donante y receptor. **Condiciones del Proceso:** El receptor debe ser determinado; No debe provocar incapacidad funcional temporal o permanente al donante; Declaración del Consentimiento Notariado.	**Condiciones del Donante:** Mayor de edad, Goce de sus facultades mentales, Estado de Salud Adecuado, Compatibilidad biológica, morfológica y funcional, Parentesco hasta el cuarto grado de consanguineidad, o cónyuge o conviviente en unión libre; **Condiciones del Proceso:** Objeto lícito (No tráfico de órganos/ no Turismo de trasplante, No haya riesgo de incapacidad permanente; Receptor determinado. Requisitos Formales: Certificado de un Médico distinto al que efectuará la extracción y el trasplante; Consentimiento Informado y Notariado; Historia Clínica; Informe Psiquiátrico; Informe Motivado del Comité de Ética; Documento de Cesión y **Autorización de la Autoridad Sanitaria Nacional.**
Revocatoria del Consentimiento de la Donación en Vida	Se podrá revocar hasta el momento mismo de la intervención quirúrgica y esto no representará obligación alguna.	Este criterio se mantiene en la nueva ley.

EJE TEMÁTICO	LEY ANTERIOR	LEY ACTUAL
Trasplante a extranjeros	No hay ninguna referencia	Prohibición de realizar cualquier acto quirúrgico de donación o trasplante a pacientes extranjeros que no sean residentes legales den el país. Excepto código cero.
Donación Cadavérica	Una vez comprobada la muerte encefálica y determinada la voluntad de donar, se procederá inmediatamente con el proceso de ablación.	Una vez comprobada y certificada la muerte se podrá disponer total o parcialmente de los órganos de acuerdo a lo establecido en el art. 29.
Muerte Violenta	Los médicos que hubieren realizado la extracción de materiales anatómicos deberán presentar al juez un informe detallado sobre el estado del material anatómico retirado. Este proceso se hará siempre y cuando no interfiera en los resultados finales de la autopsia y en presencia del médico legista y de las autoridades legales competentes.	Solo podrá realizarse cuando no interfiera en los resultados finales de la autopsia, previa notificación al fiscal de turno.
Xenotrasplante	No hace referencia	Está permitido en los términos establecidos en el reglamento.
Selección	No hace referencia	La selección, evaluación y obtención de órganos, tejidos y células se harán de acuerdo a los requisitos establecidos por la Autoridad Sanitaria Nacional.
Extracción	El retiro de los componentes anatómicos se efectuará por los médicos que integran el equipo de trasplantes o por profesionales médicos autorizados por este, quienes suscribirán un acta de constancia del estado de los componentes retirados.	Será realizado por profesionales acreditados, quienes se deberán apegar a los protocolos establecidos por la Autoridad Sanitaria Nacional. Las entidades generadoras de donantes deberán contar con las unidades de cuidados intensivos.
Bancos de Tejidos y Células	El Ministerio de Salud Pública creará o autorizará el funcionamiento de bancos de órganos, componentes anatómicos y líquidos orgánicos. Podrán ser dependientes al Ministerio o estar vinculados obligatoriamente a un centro de asistencial u hospitalario que hubiesen obtenido la correspondiente licencia de funcionamiento.	La Autoridad Sanitaria Nacional los creará, autorizará y regulará; Los procedimientos de obtención, procesamiento, transporte, almacenamiento y distribución deben ser documentados en manuales de procedimiento; Todo su personal debe ser debidamente acreditado; Los centros públicos o privados que realicen procesos de implantación de células o tejidos para que tengan acceso a los mismos deben estar previamente registrados.
Células Madre	No hace referencia	La Autoridad Sanitaria Nacional controlará su uso, investigación y aplicación. Se realizarán tratamientos con célula madre adultas cuya eficacia haya sido debidamente comprobada y hayan sido autorizados por la Autoridad Sanitaria Nacional. Las nuevas terapias deben ser autorizada por la Autoridad Sanitaria Nacional y reconocidas por organismos mundiales de los cuales forma parte el Ecuador. Se establecen condiciones para la Investigación, y define que para la investigación con Ingeniería Tisular, se requiere autorización de la Autoridad Sanitaria Nacional y el auspicio de un centro de Investigación reconocido. Queda prohibida toda práctica no aprobada.
Sobre la Autoridad Reguladora	No hace referencia	La Autoridad Sanitaria Nacional designará la entidad o dependencia que normará, regulará y controlará la actividad trasplantológica en el país. Ejecutará la política de donación y trasplante; Estará adscrita a la Autoridad Sanitaria Nacional; Gozará de autonomía técnica, administrativa y financiera. Se sujetará a esta ley y su reglamento e cumplirá y promoverá Acuerdos Internacionales de cooperación.
Control actividades compañías de seguro, empresas privadas de salud y medicina prepagada	No hace referencia	Están obligadas a cumplir con las coberturas para trasplantes, que se establezcan en los respectivos contratos o pólizas, así como a cubrir los montos totales para el trasplante y de las complicaciones médicas que se llegaren a presentar. En caso de incumplimiento serán administrativa y civilmente responsables.
Campañas de Educación e Información, Promoción y Difusión	Ministerio de Salud Pública realizará, autorizará y coordinará campañas de educación e información, para todo nivel de la población.	La Autoridad Sanitaria Nacional a través de las instancias competentes coordinará y ejecutará campañas de educación e información. En coordinación con la Autoridad Educativa Nacional incorporará en los planes y programas del Sistema Nacional de Educación la temática correspondiente a la importancia y necesidad de la donación. Realizará además campañas a favor de las Unidades Médicas y profesionales de la Salud. El Estado garantizará a través de las instancias correspondientes, la difusión y promoción, mediante campañas de información nacional mediantes los medios de comunicación masiva, la cultura de la donación y el trasplante y respecto del derecho de la población a no ser donante.
Procedimientos de la Administración	No hace referencia	Actos administrativos, normativos e impugnación de dichos actos, se regirán por lo dispuesto en el Estatuto del Régimen Jurídico Administrativo de la Función Ejecutiva.
Competencia Administrativa y su ejercicio	No hace referencia	La entidad o dependencia designada por la Autoridad tendrá competencia administrativa para conocer, aplicar y ejecutar la ley y sancionar las infracciones cometidas sobre esta. El ejercicio de la competencia se hará en base a lo establecido en el ERJAFE. Las Autoridades de Salud son las responsables de la aplicación de esta ley, en caso de incumplimiento serán responsables administrativamente, civil y penalmente.
Régimen de Infracciones y Sanciones	Prohíbase la comercialización de órganos y componentes anatómicos. Quienes violaren esta disposición y ofrecieren o recibieren, directa o indirectamente, beneficios económicos u otros semejantes para la entrega y obtención de órganos u otros materiales anatómicos de personas vivas o fallecidas, serán reprimidos con prisión de uno o tres años.	**Tipos:** Comercialización, Uso inadecuado de información (favorece a un receptor), Turismo de trasplante, Procedimiento de trasplante sin autorización, Falta de notificación, Actuación de profesionales sin acreditación, Irrespeto a la lista de espera única, Incumplimiento en brindar facilidades de transporte. **Sanciones:** Multa, Suspensión permiso licencia o acreditación, Suspensión temporal o definitiva acreditación, Suspensión temporal o definitiva ejercicio profesional, Clausura temporal, parcial o definitiva del establecimiento.

CÓDIGO DE LA SALUD

Contexto Jurídico para la Ley Orgánica de Donación y Trasplantes

TITULO III
De los trasplantes de órganos, tejidos y disposición de cadáveres

CAPITULO I
De los trasplantes de órganos y tejidos

Art. 81.- Prohíbese la comercialización de componentes anatómicos de personas vivas o fallecidas. Ninguna persona podrá ofrecer o recibir directa o indirectamente beneficios económicos o de otra índole, por la entrega u obtención de órganos y otros componentes anatómicos de personas vivas o fallecidas.

Art. 82.- (Derogado por la Ley Orgánica de Donación y Trasplante de Órganos, Tejidos y Células publicada mediante Registro Oficial No. 398 del 4 de marzo de 2011)

Art. 83.- (Derogado por la Ley Orgánica de Donación y Trasplante de Órganos, Tejidos y Células publicada mediante Registro Oficial No. 398 del 4 de marzo de 2011)

Art. 84.- La Autoridad Sanitaria Nacional, normará, licenciará y controlará el funcionamiento de los servicios de salud especializados, públicos y privados, para el ejercicio de actividades relacionadas con el trasplante de órganos u otros componentes anatómicos. Igualmente controlará el ejercicio profesional de quienes realicen dichas actividades.

Art. 85.- La Autoridad Sanitaria Nacional normará la organización de los bancos de tejidos y de células, bajo los parámetros técnicos y estándares que se establezcan para el efecto.

La asignación de órganos u otros componentes anatómicos debe realizarse bajo los parámetros nacionales e internacionales, establecidos por un sistema nacional creado para este efecto.

Art. 86.- Los xenotrasplantes podrán realizarse únicamente cuando se garanticen condiciones científicas y tecnológicas que aseguren la calidad del procedimiento con sujeción a principios bioéticos, y estarán sujetos a la autorización de la autoridad sanitaria nacional a través del organismo competente.

CAPITULO II
De la genética humana

Art. 210.- Sólo podrán hacerse pruebas de identificación humana, filiación y compatibilidad de antígenos para:

a) Trasplantes;
b) Estudios mutacionales;
c) Ligamiento genético;
d) Pruebas predictivas de enfermedades genéticas.
e) Pruebas para detectar la predisposición genética a una enfermedad;
f) Fines terapéuticos; y,
g) Otras que se desarrollen con fines de salud genética.

Estas pruebas deberán contar con asesoramiento y supervisión genético especializado, siguiendo procedimientos científicamente probados, con sujeción y respeto a los principios bioéticos.

Art. 252.-(Derogado por la Ley Orgánica de Donación y Trasplante de Órganos, tejidos y células publicada mediante Registro Oficial No. 398 del 4 de marzo de 2011)

Reglamento General a la Ley Orgánica de Donación y Trasplantes de Órganos, Tejidos y Células

La actividad trasplantológica en el Ecuador presenta una constante evolución por la intervención del Estado que cumple su rol a cabalidad de ser el garante de los derechos de los ciudadanos, la capacitación de profesionales de alto nivel, el fortalecimiento de entidades públicas y privadas que a través de un trabajo mancomunado hacen posible mejorar y salvas vidas. Son los rostros de niños, adolescentes, hombres y mujeres llenos de ilusiones y sueños que tras recibir una donación de un órgano o tejido evidencian una nueva oportunidad de vida.

Los trasplantes se concretan mediante la solidaridad y actitud positiva de familias que en medio del dolor y tristeza de perder a un ser querido deciden respetar su voluntad y manifiestan un sí a la donación. Es un proceso que implica un verdadero compromiso social.

El Reglamento General que regula el desarrollo y aplicación a la Ley Orgánica de Donación y Trasplantes de Órganos, Tejidos y Células en el país entró en vigencia el 13 de julio del 2012, tras su publicación en el Registro Oficial. En el se constituye el Instituto Nacional de Donación y Trasplantes de Órganos, Tejidos y Células (Indot), entidad adscrita al Ministerio de Salud Pública con autonomía técnica, administrativa y financiera responsable de la regulación y coordinación de la actividad trasplantológica en el país.

La vigencia de este cuerpo legal constituye un logro más para el Estado y todos los actores que participan en el proceso de la donación y trasplantes. Consagra el principio de equidad, promueve una cultura de donación en el marco del respeto de lineamientos bioéticos y de transparencia y fortalece los servicios de salud implicados en esta compleja actividad. Además, afianza el Sistema Nacional de Donación y Trasplantes que consolida los derechos de la ciudadanía a recibir un trasplante.

Se están superando las expectativas en materia de trasplantes y se continúa laborando en apego a los principios del Plan Nacional del Buen Vivir y a la Constitución con el compromiso de todos los actores del Sistema Integrado de Donación y Trasplantes para que renazcan más esperanzas de vida.

El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplantes de Órganos, Tejidos y Células (Indot) tiene el reto de constituir al Ecuador en referente regional e internacional de la gestión y coordinación de la donación y trasplantes de órganos, tejidos y células con solidez, credibilidad, eficiencia y eficacia mediante la promoción de una cultura social de apoyo a la donación que permite maximizar las oportunidades de acceso a los distintos procesos de trasplantes de forma técnica, equitativa y oportuna.

Ministerio de Salud Pública del Ecuador
Instituto Nacional de Donación y Trasplantes
de Órganos , Tejidos y Células. INDOT

No. 1205

RAFAEL CORREA DELGADO
PRESIDENTE CONSTITUCIONAL DE LA REPÚBLICA

CONSIDERANDO:

Que el artículo 32 de la Constitución de la República del Ecuador, establece que el derecho a la salud debe ser garantizado por el Estado, y que su realización se vincula al ejercicio de otros derechos;

Que el artículo 50 de la Constitución de la República del Ecuador, garantiza a las personas que sufren de enfermedades catastróficas o de alta complejidad, el derecho a la atención especializada y gratuita, de manera oportuna y preferente;

Que en el Registro Oficial N° 398 de marzo 4 de 2011, se promulgó la Ley Orgánica de Donación y Trasplantes de Órganos, Tejidos y Células;

Que la Disposición Transitoria Segunda de la Ley Orgánica de Donación y Trasplantes de Organos, Tejidos y Células, establece que el Presidente de la República, deberá expedir el Reglamento de aplicación de la Ley;

En ejercicio de las facultades previstas en el artículo 147, número 13, de la Constitución de la República del Ecuador,
DECRETA:

Expedir el **REGLAMENTO GENERAL A LA LEY ORGÁNICA DE DONACIÓN Y TRASPLANTES DE ÓRGANOS, TEJIDOS Y CÉLULAS.**

Capítulo I
Del Ambito y Objeto

Artículo 1.- Ámbito.- El presente reglamento general tiene por objeto regular el desarrollo y la aplicación de la Ley Orgánica de Donación y Trasplante de Órganos, Tejidos y Células, en adelante ley.

La actividad de donación y trasplante de órganos, tejidos y células, incluida la terapia celular o regenerativa, la ingeniería tisular y el xenotrasplante, estará sujeta a las disposiciones señaladas en la ley, a las previstas en este reglamento y a las disposiciones y resoluciones .que emita la Autoridad Sanitaria Nacional y el Instituto Nacional de Donación
y Trasplante de órganos, tejidos y células, en adelante INDOT.

Capítulo II
De la Autoridad Reguladora

Instituto Nacional de Donación y Trasplante de Órganos, Tejidos y Células

Artículo 2.- Instituto Nacional de Donación y Trasplante de órganos, tejidos y células.- Créase el Instituto Nacional de Donación y Trasplante de órganos, tejidos y células, en adelante INDOT, como entidad adscrita a la Autoridad Sanitaria Nacional, con autonomía técnica, administrativa, financiera y de gestión.

Su domicilio será la ciudad de Quito y contará con coordinaciones zonales de acuerdo a la división territorial del Estado y la epidemiología de cada zona.

Artículo 3.- Atribuciones y Facultades.- El INDOT, cumplirá con las siguientes atribuciones y facultades:

1. Ser el ejecutor de las políticas públicas de donación y trasplantes de órganos, tejidos y células, dentro del territorio nacional;
2. Coordinar y gestionar la provisión de órganos, tejidos y células para trasplante;
3. Coordinar y gestionar el Sistema Nacional Integrado de Donación y Trasplantes;
4. Planificar todo lo relacionado con la actividad de donación y trasplante de órganos, tejidos y células;
5. Controlar y regular a las instituciones, hospitales, bancos de tejidos y/o células y a los profesionales que desarrollan actividades relacionadas con los procesos de donación y trasplantes de órganos, tejidos y células;
6. Promocionar y difundir la donación de órganos, tejidos y células para trasplantes;
7. Desarrollar y coordinar programas de capacitación de los profesionales que forman parte del Sistema Nacional Integrado de Donación y Trasplantes;
8. Acreditar a las instituciones y equipos médicos relacionados con la actividad de donación y trasplante de órganos, tejidos y células;
9. Administrar la Lista de Espera Unica Nacional de órganos, tejidos y células;
10. Asignar y distribuir los órganos, tejidos y células provenientes de la donación;
11. Conocer, aplicar y ejecutar las disposiciones previstas en la ley, este reglamento y las resoluciones que emita la Autoridad Sanitaria Nacional, y sancionar administrativamente su incumplimiento;
12. Normar la actividad de donación y trasplante de órganos, tejidos y células, incluida la terapia celular e ingeniería tisular;
13. Financiar la procuración de donantes y ablación de órganos, tejidos y células en las instituciones privadas y/o públicas, independientemente del lugar donde sean identificados los donantes, siempre y cuando no sea cubierta por otro financiador;
14. Organizar un sistema logístico informativo ágil e integrado de manera progresiva en todo el territorio nacional.
15. Realizar proyectos de investigación en todo lo referente a donación y trasplante de órganos, tejidos y células, incluida la terapia celular e ingeniería tisular;
16. Autorizar y monitorear los procesos de investigación clínica referente a donación y trasplante de órganos, tejidos y células, incluida la terapia celular e ingeniería tisular;
17. Controlar, regular y autorizar el uso, investigación y aplicación de células madre provenientes de sangre de cordón umbilical del recién nacido, médula ósea o cualquier otro componente anatómico adulto de donde se obtenga;
18. Implementar y administrar bancos públicos de tejidos y /o células con fines de trasplante;
19. Autorizar la donación en vida de órganos para trasplante;
20. Autorizar la importación y exportación de órganos, tejidos y/o células, destinados a procedimientos de donación y trasplante, una vez cumplidos los requisitos establecidos para el efecto;
21. Regular y controlar a las empresas privadas de salud y medicina pre pagada en lo referente a la oferta de trasplante de órganos, tejidos y/o células;
22. Controlar el origen y destino de órganos, tejidos y células y su trazabilidad; y,
23. Otras que la Autoridad Sanitaria Nacional le delegue.

Artículo 4.- Medidas Preventivas.- Sin perjuicio a las sanciones establecidas en la ley, el INDOT podrá adoptar como medida preventiva la suspensión inmediata de las prácticas que contravinieren lo establecido en la ley, el presente reglamento general y las resoluciones que emita la Autoridad Sanitaria Nacional.

Las medidas preventivas no podrán tener una duración mayor de noventa (90) días o hasta que el INDOT emita una resolución definitiva.

Capítulo III
De la Promoción y Publicidad de la Donación

Artículo 5.- Promoción y Publicidad para la Donación de órganos, células y tejidos para trasplante.- Toda actividad de promoción y publicidad en apoyo de la donación de órganos, células y tejidos deberá cumplir con las directrices y disposiciones legales y reglamentarias establecidas.

La normativa incluirá restricciones o prohibiciones adecuadas en materia de publicidad sobre su uso y utilidad de los trasplantes de órganos células y tejidos, con el objetivo de que no sea posible impulsar el ofrecimiento o la obtención de un beneficio económico o una ventaja comparable. No se podrán promocionar terapias que se encuentren en proceso de experimentación.

Toda información promocional relacionada con donación y trasplante de órganos, tejidos y células deberá ser veraz, objetiva, demostrable, sustentada en datos y experiencias avaladas por organismos de salud de los cuales el Estado es miembro, además debe ser de carácter público y estar sujeta a verificación.

Artículo 6.- Prohibiciones a los Medios de Comunicación.- Se prohíbe que por cualquiera de los medios de comunicación se realice lo siguiente:
1. La difusión de los nombres de donantes y receptores o cualquier dato que permita su identificación o vinculación entre éstos;
2. La oferta de órganos, tejidos y células por cualquier medio, con finalidad de trasplante u otra relacionada, que promocione o induzca a un intercambio comercial;

No. 1205

RAFAEL CORREA DELGADO
PRESIDENTE CONSTITUCIONAL DE LA REPÚBLICA

3. La difusión de información que promueva o de lugar al tráfico de órganos o turismo de trasplante.

Capítulo IV
Régimen de Acreditación

Artículo 7.- Acreditación.- Es un proceso que tiene como objetivo la evaluación y garantía pública de que los procedimientos de donación y trasplantes de órganos, tejidos y células, incluida la terapia celular o regenerativa, la ingeniería tisular y el xenotrasplante, realizados por instituciones, hospitales, bancos de tejidos y/o células y profesionales, cumplan con lo establecido en la ley, el presente reglamento general y las demás resoluciones que emita la Autoridad Sanitaria Nacional y el INDOT.

La acreditación otorgada a las instituciones, hospitales y profesionales relacionadas con la actividad trasplantológica será concedida para cada órgano, tipo de tejido o aplicación regenerativa específico/a de acuerdo al órgano, tejido o célula utilizada, tanto para terapia celular, ingeniería tisular como para el xenotrasplante.

La acreditación otorgada es pública por lo que podrá ser consultada por los usuarios a través de la página web del Ministerio de Salud Pública y exhibida en la oficina principal de las instituciones, hospitales y bancos de tejidos y/o células.

Los requisitos y el procedimiento de acreditación serán establecidos por el INDOT.

Capítulo V
De la asignación de órganos, tejidos y células

Artículo 8.- Lista de Espera Única Nacional.- La Lista de Espera Única Nacional es el registro de datos de los paciencites preparados y listos para recibir un transplante de órganos y tejidos que tengan el estado de ACTIVO, inscritos por las unidades acreditadas.

La responsabilidad de la administración de la Lista de Espera Única Nacional le corresponde únicamente al INDOT, el cual deberá emitir los lincamientos de regulación y control correspondientes.

Artículo 9.- Asignación de órganos, tejidos y células.- El INDOT emitirá la normativa sobre los criterios técnicos de asignación para cada órgano, tejido y células, tomando en cuenta los siguientes parámetros:

1. Los pacientes declarados en código cero se convertirán en casos prioritarios;
2. Respeto al principio de interés superior de las niñas y niños, menores de edad y condiciones de doble vulnerabilidad; y,
3. Escalas de orden técnico, ético y científico de acuerdo al tipo de órganos, tejidos y células.

Esta enunciación no reflejará necesariamente el orden de asignación.

Capítulo VI
De la Voluntad de Donación

Artículo 10.- Voluntad Presunta.- Es la presunción legal que establece que todos los ecuatorianos y extranjeros residentes legalmente en el país, mayores de dieciocho años, al fallecer se convertirán en donantes a menos que en vida hubiesen manifestado su voluntad en contrario, de acuerdo a lo establecido en el artículo 29 de la ley.

El INDOT informará y protegerá el derecho de la población a decidir el no ser donante.

Artículo 11.- Registro de la voluntad en contrario.- La Dirección General de Registro Civil, Identificación y Cedulación es la entidad responsable de consultar y registrar la manifestación de voluntad de los ciudadanos y de los extranjeros residentes legalmente en el país, con respecto a su condición de donante de órganos y tejidos; desarrollará todos los mecanismos necesarios de constancia sobre la consulta y registro de la voluntad dentro de la base de datos nacional, obligándose a implementar las medidas necesarias en sus procedimientos y sistemas para velar por el cumplimiento del principio de confidencialidad.

El registro de la manifestación de la voluntad por parte de los usuarios, constará en el documento de identificación.

En caso de que los ciudadanos manifiesten su voluntad contraria o parcial, la Dirección General de Registro Civil, Identificación y Cedulación entregará un formulario, el cual debe estar obligatoriamente firmado por el titular o su representante legal según sea el caso.

En el caso de ciudadanos mayores de edad incapaces absolutos, la Dirección General de Registro Civil, Identificación y Cedulación, realizará la respectiva consulta respecto a la condición de donante al representante legal. En caso de manifestar su voluntad en contrario o parcial, se entregará el formulario que deberá estar obligatoriamente suscrito por el representante legal del mayor incapaz absoluto.

Artículo 12.- Verificación de la Donación.- Producida la muerte de una persona en los términos establecidos en la ley y resoluciones del INDOT, se podrá disponer de todos o parte de sus órganos y tejidos, cuando la no oposición a la donación se haya confirmado, previa consulta a la Dirección General de Registro Civil, Identificación y Cedulación, por parte del INDOT.

Para dicha confirmación la unidad médica donde se encuentre el posible donante, deberá notificar al INDOT, con el nombre y número de cédula del fallecido.

La Dirección General de Registro Civil, Identificación y Cedulación garantizará el acceso rápido a la consulta de la voluntad del donante, con el fin de agilitar la logística, los desplazamientos y la gestión del proceso de donación y trasplante.

Ninguna institución, ni persona podrá consultar la base de datos de la Dirección General de Registro Civil, Identificación y Cedulación, antes de que se haya confirmado el fallecimiento por criterios de muerte encefálica y/o parada cardiaca del potencial donante.

Los campos de consulta se limitan al número de cédula de ciudadanía o identidad, nombres completos, fecha de nacimiento, fecha de registro de su voluntad y demás que considere el INDOT en coordinación con la Dirección General de Registro Civil, Identificación y Cedulación; los cuales estarán contenidos en una certificación de la voluntad.

En los casos de existir voluntad contraria a la donación debidamente certificada por la Dirección General de Registro Civil, Identificación y Cedulación, en los fallecimientos por muerte encefálica debidamente certificados, se procederán a retirar los soportes artificiales y a realizar los trámites legales pertinentes.

Artículo 13.- Sujetos no identificados.- En el caso de no poder identificar al posible donante, no se podrá realizar proceso de donación y procuración de órganos y/o tejidos alguno.

Artículo 14.- Muerte violenta.- En caso de fallecimiento por causa violenta, el coordinador de la unidad médica notificará al Fiscal de Turno previa verificación de que se trata de un donante, por cualquier medio comprobable ya sea este en físico o digital.

Una vez producida la ablación, la unidad médica entregará a la Fiscalía en copias certificadas la siguiente documentación:

1. Certificación de muerte;
2. Formulario de Valoración de Donante Cadavérico;
3. Informes de extracción en el que se describirá el estado de cada uno de los órganos y/o tejidos ablacionados; y,
4. Demás documentación que determine la Fiscalía en coordinación con el INDOT.

La extracción a la que se refiere este artículo sólo podrá realizarse cuando no interfiera en los resultados finales de la autopsia.

Artículo 15.- Información a la familia del donante cadavérico.- Los familiares del donante cadavérico deben ser debidamente informados a través del protocolo respectivo de la manera más cálida, humana y brindando ayuda a la familia para que acepte la muerte. Adicionalmente el personal de la unidad médica o del INDOT informará acerca del procedimiento de procuración y ablación, su duración, cuáles van a ser los órganos y/o tejidos donados, las condiciones en las que se entregará el cadáver a la familia, entre otros. Esta

No. 1205

RAFAEL CORREA DELGADO
PRESIDENTE CONSTITUCIONAL DE LA REPÚBLICA

información estará contenida en un acta suscrita por uno de los miembros del Equipo de Procuración y por uno de los familiares del donante.

En caso de no concurrir ningún familiar, se notificará a la Policía Nacional para que realice todas las gestiones necesarias para localizarlos, pero si en dos (2) horas de producida la notificación no se ha podido ubicarlos, se hará constar en el Acta este particular y se procederá a la procuración de órganos y tejidos de quienes tengan la condición de donantes, previa comunicación del particular al INDOT.

Artículo 16.- Prohibición de donación.- No podrán obtenerse órganos y/o tejidos de personas con deficienaias psíquicas o enfermedades mentales que presenten alteración cognoscitiva. A menos que su representante legal lo autoricen.

Además, no podrán obtenerse órganos y/o tejidos provenientes del cadáver de una mujer gestante.

Capítulo VII
Apoyo Logístico

Artículo 17.- Apoyo Logístico.- El INDOT coordinará el apoyo logístico y operativo de las entidades que forman parte del Sistema Nacional Integrado de Donación y Trasplantes, para el traslado de profesionales, equipos de trasplantes, material biológico, componentes anatómicos e insumos necesarios para el trasplante; traslado de pacientes críticos que requieran un trasplante; y las demás actividades que, dentro del ejercicio de sus facultades legales, requiera el INDOT.

Capítulo VIII
De la Donación en Vida

Artículo 18.- Requisitos y condiciones.- Las unidades acreditadas solicitarán al INDOT la autorización de todo procedimiento de trasplante con donante vivo, exceptuando el autotrasplante y la donación de tejidos y/o células, para los cual, el INDOT establecerá el procedimiento respectivo.

El INDOT establecerá los requisitos y el procedimiento de determinación del receptor y de la donación en vida.

En los casos de donación de médula ósea de menores de edad, las condiciones y limitaciones para la autorización emitida por los padres serán determinadas por el INDOT.

Artículo 19.- Órganos susceptibles de donación en vida.- Unicamente se podrán donar en vida los órganos pares o fracciones de un órgano regenerable.

Artículo 20.-Xenotrasplante.- El INDOT regulará todas las prácticas relacionadas con el xenotrasplante, incluida la investigación, bajo los parámetros y normas establecidas para el efecto.

Capítulo IX
Regulación de Costos

Artículo 21.- Regulación de Costos.- La Autoridad Sanitaria Nacional a través del INDOT velará por la aplicación del tarifario de prestaciones de servicios de trasplantes diferenciado por procesos.

Será obligación del INDOT elaborar y/o adaptar los tarifarios de aquellos procedimientos relacionados con los trasplantes que no se encuentren incluidos en el tarifario de prestaciones de servicios para el Sistema Nacional de Salud.

DISPOSICIONES TRANSITORIAS

PRIMERA.- Transfiérase todas las representaciones, delegaciones, derechos, obligaciones, unidades, presupuesto, personal; así como, los recursos, patrimonio y en general, todos los activos y pasivos del Organismo Nacional de Trasplantes de Órganos y Tejidos al Instituto Nacional de Donación y Trasplante de órganos, tejidos y células, para lo cual éste podrá estructurar las unidades de apoyo y ejecución que sean necesarias para cumplir lo establecido en la Ley, este Reglamento General, la Política Nacional de Donación y Trasplante y resoluciones emitidas por la Autoridad Sanitaria Nacional.

SEGUNDA.- Los servidores que vienen prestando sus servicios con nombramientos o contrato o bajo cualquier modalidad en el Organismo Nacional de Trasplantes de Órganos y Tejidos, continuarán prestando sus servicios para el Instituto Nacional de Donación y Trasplante de órganos, tejidos y células con sus mismos derechos y obligaciones, y serán sujetos a procesos de evaluación y selección a efectos de determinar su continuidad en la nueva institución, de acuerdo a los requerimientos estructurales y orgánicos de ésta. Una vez realizado el proceso de evaluación y selección, se determinarán los puestos que continuarán siendo necesarios y se crearán aquellos que de acuerdo a la estructura y competencias del Instituto Nacional de Donación y Trasplante de órganos, tejidos y células se requieran, para lo cual se analizarán los expedientes individuales de las servidoras y servidores, y aquellos puestos que de acuerdo con la nueva estructura orgánica funcional de la Institución no sean necesarios, serán suprimidos de conformidad con la Ley Orgánica del Servicio Público, su Reglamento General y demás normas pertinentes.

TERCERA.- Los Bancos de Córneas del Hospital Eugenio Espejo en la ciudad de Quito, Hospital Abel Gilbert Pontón de la ciudad de Guayaquil y Hospital Vicente Corral Moscoso de la ciudad de Cuenca, se incorporarán al Banco Nacional de Tejidos una vez que se cree, incluyendo su equipamiento y recurso humano con los contratos y partidas correspondientes.

Todos los equipos, insumos y materiales registrados por el Hospital Eugenio Espejo, para la creación e implementación del Banco Nacional de Tejidos, deberán ser transferidos a favor del INDOT.

CUARTA.- Si el documento de identificación es obtenido mediante el sistema AS/400 de la Dirección General de Registro Civil, Identificación y Cedulación, la manifestación de voluntad contraria total o parcial del usuario será registrada en la base de datos institucional de esta entidad a fin de garantizar la confidencialidad de la información, hasta que realice la renovación del documento de identificación que contenga chip.

DISPOSICIÓN FINAL
El presente Reglamento entrará en vigencia a partir de su publicación en el Registro Oficial.

Dado en el Palacio Nacional, en Quito, a 26 de Junio 2012.

Rafael Correa Delgado
PRESIDENTE CONSTITUCIONAL DE LA REPÚBLICA

Carina Vance Mafla
MINISTRA DE SALUD (E)

Yo soy donante
Tú eres donante

Todos podemos ser donantes
porque todos podemos necesitar un trasplante

Presentación

En un contexto de avances científicos, tecnológicos y socioculturales, la bioética ofrece un enfoque multidisciplinario para enriquecer el análisis de los dilemas que se suscitan, principalmente en el campo de la biomedicina y el desarrollo de políticas públicas, con un enfoque incluyente y perspectiva de género, en beneficio de la población.

La Secretaria de Salud Mercedes Juan, a lo largo de su gestión, ha impulsado la consolidación de la rectoría de la Comisión Nacional de Bioética, con el objeto de fortalecer los mecanismos institucionales que promuevan el respeto y la protección a los sujetos de investigación en salud, por encima de intereses científicos, políticos, profesionales y comerciales, entre otros.

La Comisión Nacional de Bioética promueve la organización y el funcionamiento de Comités Hospitalarios de Bioética y Comités de Ética en Investigación, en las instituciones de salud públicas y privadas. Asimismo, establece mediante la *Guía nacional para la integración y el funcionamiento de los Comités Ética en Investigación*, los criterios para el desarrollo de las actividades y la capacitación de los miembros de los cuerpos colegiados.

El Decreto por el que se adiciona el Artículo 41 Bis y se reforma el artículo 98 de la Ley General de Salud -publicado en el Diario Oficial de la Federación, el 14 de diciembre de 2011- señala la obligatoriedad de los establecimientos de atención médica, que lleven a cabo actividades de investigación en seres humanos, de contar con Comités de Ética en Investigación (CEI).

Los CEI son responsables de evaluar y dictaminar los protocolos de investigación en seres humanos, formular las recomendaciones de carácter ético que correspondan, elaborar lineamientos y guías éticas institucionales para la investigación en salud y dar seguimiento a sus dictámenes.

La Guía nacional de CEI, de carácter vinculante, ofrece un marco conceptual que puede propiciar el diálogo entre la Comisión Nacional de Bioética y los Comités, con la finalidad de establecer un proceso de actualización continua en temas relativos a actividades clínicas, docencia en salud y desarrollo profesional, entre otros.

Asimismo, establece la importancia de contar con un mecanismo de autoevaluación, así como de lineamientos y guías éticas institucionales para afrontar los aspectos prácticos de la docencia médica y promover la formación en bioética de sus miembros, personal del establecimiento de salud, pacientes y familiares.

De la misma manera, se presentan las características, objetivos, funciones, integración, operatividad, control y seguimiento del Comité, además de los requisitos para obtener el registro ante la Comisión, su actualización y las consideraciones mínimas para la revisión de protocolos desde el punto de vista ético.

La quinta edición de la *Guía nacional para la integración y el funcionamiento de los Comités de Ética en Investigación* ratifica el compromiso de la Comisión Nacional de Bioética en la consolidación de la infraestructura institucional en bioética y la promoción de una cultura de la ética de la investigación.

Manuel H Ruiz de Chávez
Presidente del Consejo
Comisión Nacional de Bioética

Marco Conceptual

El término *bioética*, desarrollado por Fritz Jahr como imperativo bioético definió por primera vez la ética de las relaciones de los seres humanos con los animales y la naturaleza. Van Rensselaer Potter lo incorporó al discurso académico contemporáneo y la cultura general en el artículo *Bioethics, the science of survival, publicado en 1970 y en su libro Bioethics: bridge to the future*[1].

Para la Comisión Nacional de Bioética *CONBIOÉTICA*, la bioética es la rama de la ética aplicada que reflexiona, delibera y hace planteamientos normativos y de políticas públicas para regular y resolver conflictos en la vida social, especialmente en las ciencias de la vida, así como en la práctica y en la investigación médica que afecten la vida en el planeta, tanto en la actualidad, como en futuras generaciones. Esta noción de bioética, formulada con el apoyo y aval del Consejo de la Comisión, deriva de dos aspectos fundamentales: la necesidad de contar con una aproximación conceptual -en tanto no se cuenta con una definición de carácter universal- y la relevancia de trasladarla al terreno operativo y llevarla a la práctica.

La bioética es esencial en los debates públicos sobre temas que involucran los desarrollos científicos y tecnológicos, así como sus repercusiones en todas las dimensiones de la vida, de ahí que se ha incluido en el diálogo nacional e internacional para que la toma de decisiones en el espacio público recoja la perspectiva ética que las sociedades contemporáneas necesitan y demandan.

La aplicación del conocimiento y el desarrollo de la cultura bioética son favorables para garantizar el bienestar individual y social. La disciplina promueve los conceptos de equidad, solidaridad y calidad de los servicios; los principios de beneficencia, no maleficencia, justicia y autonomía, así como la protección a los derechos de las personas.

La investigación con seres humanos conlleva riesgos, esto hace necesario garantizar condiciones éticamente aceptables en la producción de conocimiento, considerando que el marco legal no es suficiente para elucidar o resolver los conflictos de orden moral o ético que se presentan en la actividad científica.

La bioética, sin ser un código de preceptos, integra la actividad analítica y se fundamenta en principios filosóficos y criterios científicos, a fin de orientar la práctica en las distintas áreas de la salud y la investigación. La información y el conocimiento se han globalizado, la disciplina transita por una reflexión permanente que incluye el ámbito internacional, ejemplo de ello es la Declaración de Principios Éticos para las Investigaciones Médicas en Seres Humanos de la Asociación Médica Mundial, adoptada en Helsinki, Finlandia, en 1964 y sus actualizaciones.[2]

Se consideran también las declaraciones emitidas por la Organización de las Naciones Unidas para la Educación, la Ciencia y la Cultura (UNESCO), entre las que destacan la Declaración Universal sobre el Genoma Humano y los Derechos Humanos (1997); la Declaración sobre las Responsabilidades de las Generaciones Actuales hacia las Generaciones Futuras (1997); la Declaración Internacional sobre los Datos Genéticos Humanos (2003); y la Declaración Universal sobre Bioética y Derechos Humanos (2005).

1 *Cfr.* González, J. (2008). Perspectivas de Bioética. México: Fondo de Cultura Económica. Disponible en línea en: http://www.bioetica.unam.mx/que%20etica%20para%20la%20bioetica.pdf

2 La última actualización del documento se realizó en Fortaleza, Brasil, en octubre de 2013.
El texto se encuentra disponible en línea en la liga http://www.wma.net/es/30publications/10policies/b3/

La Convención para la Protección de los Derechos Humanos y de la Dignidad del Ser Humano ante las Aplicaciones de la Biología y la Medicina del Consejo de Europa (1997), conocida como Convenio de Oviedo, es el único instrumento en el mundo que cuenta con la jerarquía de un tratado internacional adoptado por 29 países del continente europeo.

Estos instrumentos ponen de manifiesto diversos compromisos, como son la protección de los derechos humanos, respeto a la dignidad y a la privacidad, evitar toda forma de discriminación, equidad en la atención a la salud con calidad y realizar investigaciones en seres humanos sólo si el objetivo justifica el riesgo para el sujeto de investigación, asegurando su integridad y bienestar.

Para afrontar tales responsabilidades, han surgido en diversos países comisiones o comités nacionales de ética/bioética, estas instancias asesoran a los representantes políticos y a los gobiernos, fomentan el debate democrático y público, así como el análisis y la elaboración de políticas públicas en campos éticos complejos. Su función no es estrictamente normativa, dichas comisiones definen los problemas, los estudian y exponen puntos de vista con la finalidad de explorar posibles soluciones y formular recomendaciones.

Las repercusiones de la institucionalización de la bioética trascienden en los distintos órdenes de la vida social. El Estado mexicano crea en 1992, a través de la Secretaría de Salud, la Comisión Nacional de Bioética y en 2005 le concede, mediante decreto presidencial, el carácter de órgano desconcentrado, otorgándole facultades para coadyuvar a la salvaguarda de la dignidad y el respeto a los derechos humanos en la atención médica y la investigación en salud.

Actualmente la infraestructura nacional en bioética está conformada por la Comisión Nacional de Bioética, las Comisiones Estatales de Bioética, los Comités Hospitalarios de Bioética y los Comités de Ética en Investigación. De esta manera, la bioética se lleva al campo de la acción pública y gubernamental para apoyar en la formulación y evaluación de políticas públicas. Asimismo, las legislaturas federales y estatales se pronuncian con mayor intensidad a favor de la regulación en temas relacionados con la materia.

Investigación y principios éticos

Toda investigación que involucre seres humanos debe llevarse a cabo de acuerdo con normas éticas universalmente reconocidas.[3] A fin de reducir al mínimo la posibilidad de causar daño, se han establecido una serie de principios éticos que deben acatar los protocolos de investigación: respeto de la autonomía, no maleficencia, beneficencia y justicia, reflejados en las guías y lineamientos nacionales e internacionales.

Estos principios, sin embargo, no son limitativos, es necesario complementarlos con otros aspectos éticos, propios de la investigación, como son la integridad científica, la confidencialidad en el manejo de información sensible o el valor social de la investigación.[4]

Respeto a la autonomía

El respeto a la autonomía reconoce la capacidad de las personas para la toma de decisiones. Este principio se materializa, a través del proceso del consentimiento informado. Es importante enfatizar que a diferencia de la práctica médica, en la que el principal beneficio es el alivio o curación del paciente, en la investigación el objetivo principal es generar conocimiento para lo cual es indispensable que el sujeto esté informado sobre la naturaleza de la investigación y, de manera libre, acepte su participación.

Para asegurar las decisiones informadas, debe existir una descripción comprensible de los procedimientos de investigación, propósito, riesgos y beneficios. El consentimiento libre e informado implica que no existen influencias o coerción. Es difícil no ejercer cierta influencia, sin embargo, ésta no debe implicar un riesgo inaceptable, como es el caso de un estímulo financiero o el condicionamiento del acceso a los servicios de salud, en función de la participación en el estudio. En el caso de investigaciones en las que participan individuos incapaces de consentir se deben considerar mecanismos adicionales de protección.

Beneficencia y no maleficencia

Estos principios están contenidos en el imperativo ético de maximizar los posibles beneficios y minimizar los daños o riesgos potenciales. En investigación, el principio de beneficencia obliga a asegurar la pertinencia científica, la competencia de los investigadores y la protección de los participantes en las investigaciones. Debe considerarse que, si bien las investigaciones confieren un riesgo, éste sólo debe asumirse cuando no exista otra alternativa con resultados similares.

La investigación en salud, sólo debe autorizarse si existe equilibrio entre riesgos y beneficios tanto físicos como psicológicos para el sujeto, incluso si da su consentimiento para participar.

Justicia

El principio de justicia comprende la equidad e igualdad. En la investigación con seres humanos esto implica que la distribución de cargas y beneficios sea equilibrada.

La justicia tiene implicaciones en la selección de los participantes y en las investigaciones en países con recursos limitados. Es importante que el tipo de investigación responda a las necesidades de una población específica y que los beneficios se distribuyan equitativamente.

Importancia de la Guía nacional para la integración y el funcionamiento de los Comités de Ética en Investigación

La investigación en salud requiere intervenir en condiciones experimentales -con incertidumbre para los individuos que aceptan participar voluntariamente- por lo que nunca está exenta de riesgos, el quehacer de un CEI es asegurar que se minimicen y se respeten los principios éticos.

Con el registro y seguimiento de los CEI se armoniza la integración y funcionamiento de estos cuerpos colegiados, brindando la certeza de su operación, de acuerdo con estándares éticos mundiales, enfatizando el compromiso de evitar posibles conflictos de interés que comprometan su funcionamiento, transparencia y libertad en la toma de decisiones.

Esta Guía no agota los temas relacionados con ética en investigación y bioética; señala pautas para el funcionamiento y operatividad de los CEI, que deben ser complementadas con el manual de organización, reglamento interior y procedimientos normalizados de operación, que marcarán el actuar cotidiano, así como la delimitación de las atribuciones de cada institución o establecimiento.[5]

Normatividad

La CONBIOÉTICA ha participado en la generación, promoción y difusión de la normatividad nacional, que permite dar cumplimiento a su Decreto de Creación, publicado en el Diario Oficial de la Federación el 07 de septiembre de 2005.[6] Dichas acciones se reflejan en diversas reformas a la legislación sanitaria, fortaleciendo el marco jurídico, como consecuencia de la incorporación y observancia de los derechos humanos.

En diciembre de 2011, se publica en el Diario Oficial de la Federación **el Decreto de reforma a la Ley General de Salud, por el que se adiciona el artículo 41 Bis y se reforma el 98** de la citada Ley, que obliga a los establecimientos de salud del sector público, privado y social a contar con Comités Hospitalarios de Bioética y Comités de Ética en Investigación, bajo los lineamientos de la Comisión Nacional de Bioética.[7]

En octubre de 2012, se publica en el Diario Oficial de la Federación **el Acuerdo por el que se emiten las Disposiciones Generales para la Integración y Funcionamiento de los Comités de Ética en Investigación y se establecen las unidades hospitalarias que deben contar con ellos, de conformidad con los criterios establecidos por la Comisión Nacional de Bioética.[8]**

El 02 de abril de 2014, se publican en el Diario Oficial de la Federación las reformas al Reglamento de la Ley General de Salud en Materia de Investigación para la Salud, a través de la cual se establece que **el registro de Comités de Ética en Investigación estará a cargo de la Comisión Nacional de Bioética.[9]**

El 11 de enero de 2016, se publica en el Diario Oficial de la Federación el ACUERDO por el que se reforma y adiciona el diverso por el que se emiten las Disposiciones Generales para la Integración y Funcionamiento de los Comités de Ética en Investigación y se establecen las unidades hospitalarias que deben contar con ellos, de conformidad con los criterios establecidos por la Comisión Nacional de Bioética, publicado el 31 de octubre de 2012. (D.O.F. 11/01/16).

Marco jurídico nacional

En México, el marco jurídico en materia de salud se ha transformado en las últimas décadas. A continuación se enuncian los instrumentos normativos más relevantes en el estudio de los temas bioéticos y de ética en investigación. No obstante, cada caso analizado por un Comité de Ética en Investigación tiene particularidades que requieren de consideraciones legales específicas:

Documentos internacionales relevantes para la investigación en seres humanos[27]

Existen en la normatividad internacional pautas, guías o recomendaciones en materia de ética en investigación, sin embargo es necesario aclarar que no necesariamente son de carácter vinculante y constituyen criterios para guiar las investigaciones conforme a principios éticos. Algunos de los principales documentos internacionales, que abordan el tema de ética en investigación son:

- Código de Nüremberg; Juicio de Nüremberg por el Tribunal Internacional de Nüremberg, 1947.[28]
- Declaración de Helsinki, Asociación Médica Mundial, 2013.[29]
- Informe Belmont, Comisión Nacional para la Protección de los Sujetos de Investigación Biomédica y de Conducta, 1979.[30]

Comités de Ética en Investigación

Los CEI forman parte del compromiso de transparencia institucional, que asumen los establecimientos que realizan investigación en seres humanos, con las instancias reguladoras, los participantes en las investigaciones y la sociedad en su conjunto.

La inclusión de los aspectos éticos en los protocolos es un indicador de calidad, equiparable al rigor metodológico de una investigación científica. Los CEI deben ser los garantes de que responda, desde el punto de vista ético, a los intereses y necesidades de la ciudadanía. Por ello, y de conformidad con lo dispuesto en la Ley General de Salud, deberán instalarse y funcionar en todas las instituciones y establecimientos públicos y privados, en los que se lleve a cabo investigación en seres humanos.

El propósito del CEI es revisar protocolos de investigación en seres humanos y salvaguardar la dignidad, derechos y seguridad de los involucrados en el proceso, enfatizando su protección.[44] En este sentido, los Comités deben ser:

- **Autónomos:** Son independientes de influencias de tipo profesional, institucionales, políticas, de mercado, entre otras.
- **Institucionales:** Pertenecen a un establecimiento para la atención médica o instituciones de salud o de enseñanza superior[45] del sector público, social o privado del Sistema Nacional de Salud, donde se realice investigación con seres humanos. Los establecimientos deberán contar con Licencia Sanitaria para Establecimientos de Atención Médica emitida por la Secretaria de Salud.
- **Multidisciplinarios:** Hacen converger los conocimientos de distintas disciplinas, deben incluir especialistas en asuntos científicos, metodológicos y buenas prácticas clínicas. Al menos un integrante deberá tener conocimientos en bioética y ética en investigación; es recomendable contar con la participación de enfermería, trabajo social, abogados, entre otros, y un representante del núcleo afectado o usuario de los servicios de salud. En caso necesario, debe considerarse la invitación de expertos en áreas específicas.
- **Plurales:** Reconocen y promueven la diversidad y tratan de alcanzar acuerdos entre diversas posturas, en una discusión que parta de mínimos compartidos.
- **Consultivos:** Asesoran al cuerpo de gobierno. Buscan determinar los valores de la ética social y fungir como órganos de primera instancia para la emisión de dictámenes, opiniones o recomendaciones de carácter general.

Los CEI constituyen espacios de deliberación, en los que se desarrolla la discusión y la reflexión, en un ambiente de libertad y tolerancia. Desempeñan un rol social con el investigador para resolver de manera prudente y adecuada, los dilemas éticos que plantea cada una de las investigaciones en las que participan seres humanos. De lo anterior, se puede decir que los CEI representan:

- Guía y apoyo de la conciencia del investigador.
- Protección de los participantes en la investigación.
- Garantía pública de respeto a la dignidad, igualdad y derechos humanos.
- Fomento de la educación interdisciplinaria y multisectorial.
- Conciencia bioética institucional y de la integridad científica.

Objetivos

Los objetivos del Comité de Ética en Investigación son:

- Contribuir a salvaguardar la dignidad, los derechos, la seguridad y el bienestar de los actuales o potenciales participantes en las investigaciones, así como de las comunidades

44 *Cfr.* Lisker, R. (2013) Investigación Clínica. PAC Medicina General 5. Tomo 1. México: Intersistemas SA de CV.

45 De acuerdo a la definición del numeral 4.11 de la NORMA Oficial Mexicana NOM-012-SSA3-2012, Que establece los criterios para la ejecución de proyectos de investigación para la salud en seres humanos Institución o establecimiento donde se realiza investigación para la salud, a todo aquel donde se proporcionen servicios de atención médica, perteneciente a los sectores público, social o privado, cualquiera que sea su denominación, que pueda efectuar actividades preventivas, diagnósticas, terapéuticas y de rehabilitación, por si misma o subrogadas, dirigidas a mantener o reintegrar el estado de salud de las personas y efectuar actividades de formación y desarrollo de personal para la salud, así como de investigación: 8.1. Toda investigación en seres humanos, deberá realizarse en una institución o establecimiento, el cual deberá contar con la infraestructura y capacidad resolutiva suficiente, para proporcionar la atención médica adecuada o en su caso, a través de terceros, ante la presencia de cualquier efecto adverso de la maniobra experimental expresada en el proyecto o protocolo de investigación autorizado. 8.6 Toda institución o establecimiento, en el que se lleve a cabo o se pretenda realizar una investigación, debe contar con un servicio para la atención de urgencias médicas. En su caso, se deberá contar con un convenio suscrito con un establecimiento para la atención médica de mayor capacidad resolutiva, que a manera de tercero, brinde dicha atención de urgencias.

involucradas, tomando en consideración la regulación nacional e internacional en materia de ética en la investigación.
- Actuar en el interés de los sujetos de investigación.
- Asesorar a los titulares de los establecimientos e instituciones sobre la autorización de investigaciones en sus unidades de responsabilidad.
- Vigilar la aplicación de la legislación, normatividad y contenidos éticos vigentes en materia de investigación y las demás disposiciones aplicables, así como auxiliar a los investigadores para la realización óptima de sus estudios.
- Fomentar que los beneficios y las responsabilidades de la investigación sean distribuidos entre los grupos sociales, tomando en cuenta la edad, género, estatus económico, cultura y consideraciones étnicas.

Funciones

Función resolutiva

Prevé la responsabilidad de los CEI para:

- Analizar y revisar los protocolos de investigación puestos a su consideración, así como apoyar los en la toma de decisiones respecto de los problemas o dilemas bioéticos que se presenten en la investigación.
- Evaluar y dictaminar, desde el punto de vista ético, los contenidos que se presenten en la investigación, en forma transparente, independiente, competente, oportuna, de calidad, libre de influencia indebida, institucional, profesional y comercial, así como su integridad científica.
- Solicitar la interrupción o suspensión de una investigación en caso de que la integridad de los sujetos esté amenazada.

Función de control y seguimiento

Da continuidad a las resoluciones emitidas por el CEI, de acuerdo con lo establecido en esta guía y los manuales de procedimientos de cada institución. En ejercicio de estas funciones, podrán:

- Vigilar la aplicación de la legislación vigente, la normatividad, los lineamientos, los criterios que establezca la CONBIOÉTICA, en materia de bioética en investigación en seres humanos y demás disposiciones aplicables.
- Dar seguimiento al desarrollo de la investigación asegurando la protección de los participantes.
- Informar a las autoridades competentes las conductas que deberían ser sancionadas.
- Asegurar que el investigador notifique a los responsables de la institución o del establecimiento, las autoridades sanitarias y al patrocinador, la ocurrencia de eventos adversos serios.

El CEI no actúa como verificador por lo que el investigador principal, patrocinador u organización de investigación clínica, deben comprometerse a informarle cualquier circunstancia significativa para la protección de los sujetos.

Función educativa

Promueve entre sus integrantes la capacitación en bioética y ética en investigación de forma permanente. Es importante que el CEI establezca estrategias educativas para el personal del establecimiento de salud sede y los posibles sujetos en la investigación.

Derivado de las funciones anteriormente descritas, comprende las siguientes actividades:

- Elaborar lineamientos y guías éticas institucionales en materia de investigación para la salud, apegadas a las disposiciones normativas vigentes.
- Realizar el seguimiento a las recomendaciones de carácter ético que correspondan a los protocolos de investigación en seres humanos y apoyar a los investigadores para la óptima realización ética de sus protocolos.
- Coadyuvar en la aplicación de la Ley General de Salud y su Reglamento en Materia de Investigación para la Salud, así como las demás disposiciones aplicables en materia de investigación en salud.
- Establecer mecanismos de colaboración con otros CEI, para la evaluación conjunta de protocolos de investigación cuando así se amerite.
- Elaborar los informes de acuerdo a la normatividad y lineamientos establecidos y proporcionarla a las instancias que proceda.
- Participar en el Comité Interno de Trasplantes, como lo indica el Reglamento de la Ley General de Salud en Materia de Trasplantes en su artículo 32, fracción VI.[46]

Integración

Los establecimientos para la atención médica o instituciones de salud en donde se realice investigación en seres humanos, deberán conformar un CEI, el cual se encargará de la revisión de los aspectos éticos de los protocolos de investigación y en caso de ser aprobados dar seguimiento a los mismos, observando que en las acciones directamente relacionadas con los participantes en la investigación no se vulneren su integridad, dignidad y derechos.[47] La función del CEI no se limita a la aprobación del protocolo de investigación, ésta debe continuar durante y después de la investigación y asegurar la integridad en la comunicación sobre los resultados.

El CEI deberá integrarse por personal médico, investigadores y profesionales de la salud, psicología, enfermería, trabajo social, sociología, antropología, filosofía y derecho, entre otras. Podrán o no estar adscritos al establecimiento. De preferencia con capacitación en ética en investigación y bioética.

El CEI deberá contar con representantes del núcleo de personas afectado o de personas usuarias de los servicios de salud, hasta el número convenido de sus integrantes, procurando equilibrio de género.

Corresponde a los integrantes, de acuerdo con sus áreas de formación, la precisión de los aspectos teóricos y metodológicos de los protocolos.

El CEI se integrará por:

- Presidente.
- Vocales (mínimo cuatro, de entre los cuales se nombra al secretario).
- Representante del núcleo afectado o de las personas usuarias de los servicios de salud.

El CEI, para el cumplimiento de sus funciones, se auxiliará de un Secretario (uno de los vocales) que será nombrado por el Presidente. Asimismo, se podrán invitar y consultar a especialistas internos o externos, cuya intervención se considere necesaria para la toma de decisiones relacionadas con los asuntos a tratar en las sesiones.

46 *Cfr.* Reglamento de la ley General de Salud en Materia de Trasplantes publicado en DOF 26-03-2014. Disponible en: http://www.diputados.gob.mx/LeyesBiblio/regley/Reg_LGS_MT.pdf

47 *Cfr.* Artículos 41 bis y 98 de la Ley General de Salud. Ver en apartado de normatividad.

La participación de los integrantes del CEI, tendrá carácter honorífico. Se recomienda que las autoridades consideren la participación en el Comité para efectos de valoración del mérito al interior de sus establecimientos.

En el caso de los Comités de reciente creación y/o cuando dentro de la institución, no se logre reunir a las personas adecuadas, el Titular del establecimiento junto con el Presidente del CEI, podrán solicitar apoyo y asesoría de los Comités de Ética institucionales constituidos en el Sistema Nacional de Salud.

Requisitos de los integrantes

En la selección de los integrantes del Comité se deberán considerar las características siguientes:[48]

- Contar con referencias personales y profesionales que hagan constar su conducta ética referencias laborales de trabajo, de la comunidad o de la organización a la que pertenece).
- Documentar su experiencia profesional en el campo de la investigación o ética en investigación.
- Tener alguna formación, capacitación o experiencia en bioética o ética en investigación y buenas prácticas clínicas.
- Adquirir el compromiso de capacitarse continuamente en el conocimiento de la bioética, y la ética en investigación.
- Ser respetuoso, tolerante, abierto al diálogo, flexible, prudente, honesto y de conducta conciliadora.
- No tener conflictos de interés con las funciones encomendadas dentro del CEI.

Selección

El CEI deberá establecer en sus reglas de funcionamiento el proceso por el cual se elegirán a los integrantes y prever una política para la renovación de los nombramientos, determinar el procedimiento de renuncia y su sustitución escalonada.

Para poder cumplir con las responsabilidades, deberán tener la experiencia y conocimientos en el campo de las investigaciones que revisa y existir un balance de integrantes con conocimientos científicos, metodológicos, filosóficos, bioéticos y legales; considerarán la perspectiva de los usuarios de los servicios de salud.

El Presidente del CEI no podrá presidir el Comité de Investigación ni el de bioseguridad. Es importante que los integrantes puedan expresar sus puntos de vista al considerar los aspectos éticos involucrados en las investigaciones que revisan, por lo que ningún integrante deberá pertenecer al cuerpo directivo de la institución.

El CEI puede establecer una lista de consultores externos que aporten experiencia en algunos protocolos de investigación para evaluarlos. Los consultores pueden ser especialistas en aspectos éticos o legales, enfermedades o metodologías específicas y podrán participar en las sesiones o enviar sus comentarios, pero no pueden participar en la deliberación.

48 Con excepción del representante de los usuarios de servicios de salud.

Los representantes del núcleo afectado o los usuarios de los servicios de salud serán propuestos por el Presidente o Vocal Secretario, a consideración de los demás integrantes del CEI. Se deberá asegurar que no existan conflictos de interés en la revisión de los protocolos. En temas sensibles para un grupo específico (adicciones, VIH o violencia familiar) deberá asegurarse que el representante del núcleo afectado o usuario no pueda identificar a los sujetos de investigación.

Es requisito fundamental para el funcionamiento del CEI que los integrantes del Comité deliberen libres de conflictos de interés, con respecto a los investigadores y patrocinadores. Los mecanismos para asegurar esta independencia deben estar establecidos en los lineamientos de operación.
El reconocimiento como autoridad del Comité se adquiere a través de su trabajo. Es importante demostrar la imparcialidad, transparencia y capacidad de fomentar el diálogo con los demás actores involucrados en la investigación biomédica.

Designación

El mecanismo para la designación de los integrantes del CEI debe ser transparente y libre de influencias que puedan comprometer su independencia. En el caso de reciente creación, el titular de la institución o del establecimiento deberá nombrar al Presidente, quien tendrá la facultad de proponer al Titular de la institución al resto de los integrantes. El Secretario será nombrado por el presidente de entre los Vocales y tendrá como función principal auxiliar al CEI en el cumplimiento de sus funciones, el período de gestión será de tres años. Al término de la primera gestión, los integrantes propondrán una terna al Titular de la institución a fin de designar a la persona para el cargo de Presidente, así como la renovación de los integrantes restantes, procurando la sustitución escalonada, por una sola ocasión.

La constancia de designación debe ser expedida por el titular de la institución o del establecimiento a cada uno de los integrantes del CEI y deberá contener al menos los requisitos siguientes:

- Nombre completo de la persona designada.
- Duración del nombramiento.
- Cláusula de confidencialidad con relación a las solicitudes, información del investigador y de los sujetos de investigación que se someten a consideración del CEI, así como de las reuniones en las que se delibera sobre los protocolos.
- El señalamiento expreso de que la incorporación al CEI será con carácter honorífico.
- Declaración firmada de no conflicto de interés.[49]

La capacitación es un requisito para los integrantes del Comité, debe incluir temas básicos como: introducción a la bioética, ética en investigación, aspectos regulatorios nacionales, principales normativas internacionales y el conocimiento de la Guía de CEI. Es importante establecer un programa de capacitación en bioética/ética en investigación y buenas prácticas clínicas, así como mantenerse actualizado en la normatividad nacional.

49 El integrante del Comité que participe directamente o indirectamente en una investigación, se deberá excusar de su asistencia y participación en la sesión correspondiente.

El expediente de cada uno de los integrantes del CEI, deberá establecer en un documento firmado que contenga:

- El compromiso de velar por el interés de los participantes de la investigación, de confidencialidad, resguardo y uso de la información, así como la aceptación y cumplimiento de los objetivos y funciones del CEI y de abstenerse de revisar cualquier protocolo en el que participe, independientemente del rol que desempeñe;
- Constancia de capacitación.

Los consultores externos y los representantes del núcleo afectado o de las personas usuarias de los servicios de salud, también deberán firmar cláusula de confidencialidad y declaración de no conflicto de interés.

Funciones de los integrantes

Presidente

- Coordinar las actividades del CEI, así como convocar, organizar y presidir las sesiones conforme a los criterios establecidos en los lineamientos del CEI.
- Instrumentar mecanismos de prevención y detección de conflictos de interés dentro del CEI.
- Realizar el proceso de asignación y renovación de los integrantes conforme al reglamento interno del CEI.
- Fomentar las actividades de capacitación continua interna y externa del CEI que incluya la población del área de influencia.
- Notificar y firmar los dictámenes y resoluciones emitidas por el CEI a las instancias que correspondan.
- Emitir la información de las actividades para proporcionarla a las instancias que tengan facultades legales y administrativas para requerirla.
- Llevar a cabo todas aquellas funciones, afines a las señaladas.
- Deberán asistir al menos al 80% de las sesiones, de manera presencial.

Vocal Secretario

- Convocar a los vocales, a petición expresa del presidente, a las reuniones del CEI.
- Elaborar y proporcionar las agendas de trabajo de las reuniones y remitir a los integrantes del CEI la documentación necesaria, de conformidad a lo establecido en los lineamientos de operación, a excepción de las sesiones expeditas.
- Coordinar la elaboración de los documentos e instrumentos normativos y de operación para la integración y desarrollo de actividades del CEI.
- Elaborar el acta de las sesiones, recabando la firma de los participantes para su formalización y distribución donde proceda.
- Recibir los asuntos que se propongan para ser tratados en las sesiones del CEI y revisar que la información sea adecuada y suficiente para incluirlas en las agendas de trabajo.
- Integrar el programa anual de actividades que incluya acciones consultivas, capacitación y seguimiento solicitando las aportaciones de los integrantes del CEI.
- Colaborar en actividades de formación, actualización en bioética y difusión entre el personal de la institución o del establecimiento.
- Asegurar que la documentación de las decisiones tomadas durante las sesiones se encuentre disponible para revisión en caso necesario.
- Elaborar los informes de evaluaciones y dictámenes solicitados al CEI para emitirlos con oportunidad a quienes proceda.

- Integrar y remitir a las instancias que proceda los dictámenes y resoluciones emitidos por el CEI en tiempo y forma.
- Establecer los mecanismos de información al presidente y a los integrantes, de las comunicaciones recibidas en el CEI.
- Efectuar el registro de las asignaciones, donaciones y valores destinados al CEI.
- Mantener actualizados los archivos del CEI, mediante el registro de actividades y evidencia documental.
- Desempeñar cualquier otra función que le sea asignada por el presidente relacionado con el CEI.
- Deberán asistir al menos al 80% de las sesiones, de manera presencial.

Vocales

- Revisar sistemáticamente los protocolos de investigación o cualquier otra información o documento que les sean asignados por el Presidente para dar cumplimiento a las funciones y objetivos del CEI.
- Participar en las reuniones para el análisis, evaluación y dictamen de los protocolos de investigación, para la emisión de resoluciones consensadas por el Comité.
- Dar seguimiento a los acuerdos tomados e identificar temas que pudieran ser motivo de deliberación por parte del CEI.
- Colaborar en la selección y renovación de los integrantes del Comité, mediante la revisión del cumplimiento de los requisitos para su designación.
- Colaborar en actividades de formación, actualización en bioética y otras acciones del CEI con el personal y la población del área de influencia del establecimiento.
- Desempeñar cualquier otra función, relacionada con el Comité, que le asigne el Presidente.
- Deberán asistir al menos al 80% de las sesiones, de manera presencial.

Representantes del núcleo afectado o los usuarios de los servicios de salud

- Asegurar que el formato de consentimiento informado sea lo suficientemente explícito para ser comprendido por los posibles participantes en la investigación.
- No forman parte de la vocalía.

Consultores externos

- Asesorar al CEI en aspectos específicos en la revisión de un protocolo y que a su juicio los comentarios pudieran enriquecer la discusión y la protección de los sujetos participantes. Puede participar personalmente en las sesiones o enviando sus comentarios técnicos.
- Participar con probidad y sin tener conflictos de interés en las sesiones a las que sea expresamente convocado.

Competencias de los integrantes del Comité de Ética en Investigación

Los integrantes de los CEI requieren una capacitación inicial y educación continua en bioética, ética en investigación y aspectos relevantes para esta tarea, también deberán ser capaces de evaluar:

La protección a los sujetos de investigación

- Entender los principios fundamentales para la protección de los participantes en investigaciones.
- Identificar los riesgos y beneficios de los protocolos y asegurar el balance de estos.
- Reconocer las investigaciones cuyo riesgo es inaceptable.
- Evaluar el formato de consentimiento informado y asegurar que la participación es voluntaria, y la capacidad ha sido evaluada, que no existe coerción o influencia indebida y que se describen los riesgos y beneficios.

- Informar sobre otras opciones de tratamiento, especificar que se trata de un estudio de investigación y establecer las medidas a tomar en caso de daño derivado de la investigación.
- Vigilar la aplicación de lo estipulado en leyes, reglamentos, y disposiciones mexicanas y asegurar que la investigación cumpla con los estándares éticos internacionales.
- Cerciorarse que los procedimientos propuestos en el protocolo para el reclutamiento de los participantes sea justo.
- Evaluar aspectos relevantes que surgen en la investigación de grupos vulnerables.
- Aplicar lo establecido en la presente Guía, así como los procedimientos y reglamento del CEI en el que participa.
- Asegurar la privacidad y confidencialidad de los datos personales contenidos en los documentos revisados.

Diseño y análisis del estudio

- Asegurar que el protocolo sea revisado y dictaminado por el Comité de Investigación (en el manual de procedimientos deberá especificarse si ambos comités sesionan conjuntamente).
- Analizar los mecanismos de monitorización de riesgo y notificación de eventos adversos.

Investigación en comunidades

- Conocer las características de la comunidad objeto del estudio, tomando en cuenta las diferentes implicaciones sociales y culturales de la investigación, para garantizar la protección de los participantes y de sus datos personales

Comunicación de los resultados de investigación

- Velar que la autoría y derechos intelectuales de los participantes se respeten, de acuerdo con los estándares establecidos.

Conflictos de interés

- Reconocer la existencia de conflictos de interés financiero o de otra índole.
- Reconocer posibles conflictos de interés, resultado de la interacción entre el investigador o la institución con patrocinadores.
- Reconocer, investigar y denunciar la conducta indebida, incluyendo la falsificación de resultados y plagio.
- Definir las políticas en el manejo de conflictos de interés.

Competencias y responsabilidades del investigador

- La investigación deberá ser realizada por expertos y profesionales de la salud, bajo la responsabilidad de una institución de atención a la salud,[50] que actúe bajo la supervisión de las autoridades sanitarias competentes y que cuente con los recursos humanos y materiales necesarios, que garanticen el bienestar del sujeto de investigación.[51]
- El investigador deberá conocer los aspectos relevantes de la ética en investigación.
- El investigador será directamente responsable de los aspectos científicos y éticos del estudio y de someter al Comité la solicitud de revisión.

50 *Cfr.* Artículo 114 del Reglamento de la Ley General de Salud en Materia de Investigación para la Salud. Última Reforma DOF 02-04-2014.

51 *En el caso de la investigación médica en seres humanos, esta debe ser llevada a cabo sólo por personas con la educación, formación y calificaciones científicas y éticas apropiadas. La investigación en pacientes o voluntarios sanos necesita la supervisión de un médico u otro profesional de la salud competente y calificad apropiadamente.* Declaración de Helsinki 2013.

- Para que el CEI pueda realizar una revisión completa, el protocolo deberá contener toda la información pertinente, incluyendo posibles conflictos de interés.
- Debe conducir la investigación de acuerdo con lo establecido en el protocolo aprobado por el Comité. Cualquier enmienda o desviación del protocolo deberá ser informada al CEI. Las enmiendas que modifiquen sustancialmente el protocolo o le confieran un riesgo adicional o distinto a los sujetos de investigación deberán ser aprobadas por el Comité. Es responsabilidad del investigador tomar medidas en situaciones que requieran una acción inmediata para evitar daños innecesarios.

Instalación

El CEI deberá instalarse bajo la responsabilidad del titular de la institución o del establecimiento de salud, de conformidad con lo dispuesto en la Ley General de Salud, haciendo constar dicho acto formal en el acta de instalación. La información correspondiente se encuentra disponible en el portal web de la Comisión Nacional: http://www.conbioetica- mexico.salud.gob.mx/interior/registrocomites/Dictamen_CEI2.html

El acta de instalación especificará los requisitos siguientes:

- Denominación o razón social del establecimiento.
- Domicilio de la institución o del establecimiento al que pertenece el CEI.
- Nombre, profesión y cargo que ocupan los integrantes del CEI.
- Fundamento jurídico que contenga las facultades del titular para la constitución del CEI.
- Manifestación del titular de la institución o del establecimiento en la que conste que bajo su responsabilidad se constituye el CEI.
- Firma autógrafa del titular responsable de la institución o del establecimiento.
- Lugar, fecha y hora de instalación.

El CEI deberá contar con un reglamento, lineamientos o manuales de operación en el que se establecerán los procedimientos para las funciones que llevará a cabo, mismos que deben estar disponibles para su revisión a solicitud de los interesados.

Operatividad

Los CEI en el desarrollo de sus actividades deberán respetar y dar cumplimiento a los principios bioéticos y jurídicos previstos en la normatividad vigente. Tal compromiso se refleja en los diversos informes de actividades presentados ante las autoridades sanitarias correspondientes, mismas que pueden ser supervisados por la instancia competente.

Financiamiento de operación

Los gastos de operación del CEI deben estar previstos en la estructura programática de los establecimientos, de acuerdo con los lineamientos internos aplicables. El establecimiento podrá recibir apoyos de fuentes externas por evaluar protocolos. Dichos apoyos no deberán ser otorgados directamente a ninguno de los integrantes del CEI; las aportaciones no deberán traducirse en conflicto de interés entre la fuente de financiamiento y las funciones del CEI. Asimismo, las evaluaciones del Comité no deben significar ganancias financieras para éste.

Los apoyos al CEI no deberán ser utilizados en otros fines que no sean para su funcionamiento y deberán ser manejados con total transparencia. Es importante que los integrantes reciban apoyo por parte de las autoridades del establecimiento en los aspectos siguientes:

- Tiempo para su participación en las sesiones del CEI.
- Reconocimientos académicos o laborales por su desempeño en el CEI.
- Apoyo para la capacitación de bioética y ética en investigación dentro y fuera de la institución.
- Espacio físico para la sede del CEI, tanto para sesionar, como para la recepción de documentos y resguardo de la documentación de los protocolos, los dictámenes y las minutas.
- Ayuda administrativa para la actividad del CEI, toda vez que se requiere un registro formal de consultas hechas al CEI.

Sesiones

El CEI deberá sesionar en forma ordinaria al menos una vez cada dos meses, y en forma extraordinaria en cualquier momento a solicitud de su presidente o de la mayoría de sus integrantes (Anexo 1). Se deberá considerar en aquellas instituciones en las que exista gran actividad en investigación la posibilidad de sesionar con mayor frecuencia.

- **Sesiones ordinarias:** se establecen a través del programa anual de trabajo, determinando fechas, horarios de sesiones y términos de la convocatoria.
- **Sesiones extraordinarias:** se llevan a cabo a petición expresa y en función de situaciones relacionadas con el quehacer del CEI, los investigadores, los participantes o la institución. Se realizan por convocatoria del Presidente.
- **Sesiones expeditas:** se llevan a cabo para resolver cambios administrativos, registro de nuevos investigadores, cambios de fecha, etcétera.

El CEI podrá sesionar de manera conjunta con el Comité de Investigación para la valoración integral de los protocolos. En la evaluación de estudios multicéntricos, el Comité podrá sesionar de forma conjunta con CEI de otros establecimientos del país para la valoración y dictamen único de estos protocolos, respetando la normatividad de cada una de las instituciones participantes.

Toma de decisiones

Las decisiones deben basarse en un proceso de discusión y deliberación incluyente. Durante las reuniones se iniciará una discusión sobre la documentación sometida para consideración del CEI. La reunión se llevará a cabo en un ambiente de respeto permitiendo que los distintos puntos de vista puedan ser expresados.

Se sugiere que el Presidente del CEI estimule la participación de todos los integrantes, asegurándose que se dispone del tiempo suficiente para la deliberación. Solamente los presentes durante la deliberación podrán emitir opiniones para la toma de decisiones sobre el estudio. El Presidente es responsable del proceso y de determinar, cuando sea necesario, el consenso para la toma de decisiones. Los investigadores, patrocinadores y otras personas directamente involucradas en el estudio no deberán estar presentes durante la deliberación.

Las decisiones por consenso implican que ninguno de los integrantes deberá considerar esta decisión inaceptable. Los integrantes del CEI deben estar conscientes de sus limitaciones relacionadas con temas específicos y buscar asesoría externa cuando sea necesaria. Nunca se tomarán decisiones por votación.

Las resoluciones deberán contener argumentos sólidos y fundamentados. En caso de que la decisión esté condicionada, el CEI deberá brindar sugerencias claras para la nueva revisión del protocolo. Las decisiones negativas deberán fundamentarse en argumentos claros y específicos, enunciando el procedimiento para someter a revisión nuevamente la solicitud.

Procedimientos de revisión de protocolos

La bioética no recomienda un conjunto específico de reglas o políticas, sino que proporciona una estructura para evaluar problemas y determinar los cursos de acción apropiados.

- Los protocolos sometidos a revisión por el CEI, deberán cumplir con los criterios establecidos.[52]
- Los CEI deberán estar familiarizados con las diferentes metodologías y hacer las consideraciones éticas aplicables para cada tipo de investigación propuesta.
- El análisis ético de las investigaciones deberá reflejar lo estipulado en la legislación nacional, la normativa internacional, los valores culturales y los instrumentos de derechos humanos.
- Deben basar sus decisiones en una metodología coherente y consistente.
- Sus decisiones deberán ser transparentes y señalar los fundamentos en los que se basa su decisión.

A continuación se enlistan los aspectos que los CEI deben considerar como mínimo al evaluar un protocolo:[53]

- **Valor científico**

  Para ser ética, la investigación en seres humanos debe tener valor científico o social, y en consecuencia, ayudar a mejorar la salud o bienestar de la población, probar una hipótesis que pueda generar información importante acerca de la estructura o la función de los sistemas biológicos humanos, aun cuando tal información no tenga aplicaciones prácticas inmediatas.

  Algunos ejemplos de investigación clínica sin valor científico ni social incluyen la investigación que duplica parcial o totalmente resultados comprobados, no generalizables, una hipótesis banal o una en la que la intervención no puede llevarse a cabo en forma práctica aun cuando sea eficaz. El valor social es un requisito ético que asegura el uso responsable de recursos limitados y evita la explotación.

- **Pertinencia científica en el diseño y conducción del estudio**

  Todo proceso de investigación se inicia con la selección de una pregunta, seguida del diseño apropiado para responder a ésta, el desarrollo de un protocolo, la implementación del estudio, la recolección de datos, el análisis de los resultados y la publicación de los mismos. Las consideraciones éticas son parte integral de la investigación a lo largo de la misma. Si bien la responsabilidad fundamental de los CEI es la revisión de los aspectos éticos de las investigaciones en las que participan seres humanos, debe evaluar si la investigación carece de la pertinencia y rigor científico que pudiera causar un daño o riesgos mayores a los participantes y por lo tanto no sea ética, la pertinencia científica es una exigencia no negociable.

52 *Cfr.* Norma Oficial Mexicana NOM-012-SSA3-2012.
53 Emanuel, E. J., Wendler, D. & Grady, C. (2000) What Makes Clinical Research Ethical? Chicago: American Medical Association. Disponible en: http://jama.jamanetwork.com/article.aspx?articleid=192740

- **Selección de los participantes**
  La identificación y selección de los posibles sujetos de investigación debe ser equitativa, requiere que sea la ciencia y no la vulnerabilidad, el estigma social, la impotencia o factores no relacionados con la finalidad de la investigación, la que determine a los posibles participantes. La selección equitativa requiere que a todos los grupos se les ofrezca la oportunidad de participar en la investigación a menos que existan buenas razones científicas o de riesgo que restrinjan su elegibilidad.

- **Proporcionalidad en los riesgos y beneficios**
  El riesgo se define como la combinación de la probabilidad de que se produzca un evento con consecuencias negativas. En la investigación el grado de riesgo y beneficio es incierto y en el caso de la investigación en seres humanos solamente puede justificarse cuando: 1. Los riesgos potenciales se minimizan; 2. Los posibles beneficios para los participantes de manera individual o para la sociedad se maximizan; y 3. Los posibles beneficios son proporcionales o exceden a los riesgos anticipados.[54]

  Desde la perspectiva principialista la búsqueda del mayor beneficio y el menor riesgo atiende los principios de beneficencia y no maleficencia. En la investigación clínica, esto se traduce en la necesidad de maximizar los beneficios de la investigación tanto para el sujeto individual como para la sociedad. Se requiere tener la seguridad de que los beneficios exceden los riesgos para evitar la explotación de las personas.[55]

- **Evaluación independiente**
  Los posibles conflictos de interés para la autorización de un protocolo se reducen al mínimo cuando la evaluación es independiente, haciendo que la investigación clínica sea revisada por expertos que no estén involucrados en el estudio y que tengan autoridad para aprobar, condicionar o, en casos extremos, cancelar la investigación.

- **Respeto a los participantes**
  Es importante proteger la privacidad de los participantes de la investigación, ofrecer la posibilidad de retirarse del estudio y asegurar que están siendo evaluados de manera continua durante el estudio.

- **Consentimiento informado**
  El consentimiento informado es un proceso mediante el cual un individuo, después de recibir la información necesaria, toma la decisión voluntaria de participar, o no, en un estudio de investigación. El consentimiento informado se registra por medio de un documento, firmado y fechado. Consta de dos partes, la primera en la que se proporciona información sobre la investigación que se propone y la segunda que es el acto formal en el cual el sujeto de investigación con su firma acepta participar en la investigación:

54 *Cfr.* Artículo 15 del Reglamento de la Ley General de Salud en Materia de Investigación para la Salud. Última Reforma DOF 02-04-2014.

55 *Cfr.* Artículo 70 del Reglamento de la Ley General de Salud en Materia de Investigación para la Salud señala: Los estudios de farmacología clínica fase I, de medicamentos nuevos antineoplásicos y de otros con índice terapéuticos muy reducido, serán permitidos cuando: I. Estén fundamentados en estudios preclínicos que demuestren la actividad farmacológica del medicamento e indiquen con claridad las características de su toxicidad; II. Se realicen solamente en sujetos voluntarios con la enfermedad específica avanzada, confirmada por medios de diagnóstico adicionales, que no hayan presentado respuesta terapéutica a ningún otro tratamiento disponible y en quienes el medicamento nuevo pudiera ofrecer un beneficio terapéutico, y III. No ocasionen gastos al paciente.

a. Información

El documento escrito será la base o la guía para la explicación verbal y la discusión del estudio al sujeto o su representante legal. Quedará consignado por escrito cualquier otro documento que sea utilizado durante la investigación. Debe incluirse un apartado en el que se estipule que los fármacos, productos y procedimientos relacionados con el estudio serán gratuitos, así como el registro de los responsables de su financiamiento.

b. Consentimiento

Es el proceso que da validez ética y legal a la intervención o la investigación médica, su finalidad es facilitar la toma de decisiones a través de la comunicación y el dialogo, con respeto a la autonomía del sujeto. Un aspecto importante a considerar es la capacidad de tomar decisiones, esto es, la habilidad de comprender la información y entender las consecuencias de su decisión. Se considera que todos los adultos son capaces, a menos que exista evidencia de lo contrario. En el caso de menores e individuos incapaces el consentimiento es proporcionado por el tutor o representante legal y, en su caso, los niños mayores de 7 años proporcionarán su asentimiento.[56] (Ver anexo 5).

Resultados y dictámenes de las evaluaciones de protocolos

Aprobado

Cumple con todos los requisitos establecidos.

Pendiente de aprobación

a. Requiere modificaciones mayores y deberá ser evaluado por el CEI, en pleno, cuando se realicen dichas modificaciones;

b. Requiere modificaciones menores y podrá ser evaluado de manera expedita, conforme a lo asentado en el capítulo correspondiente;

c. Condicionado o en proceso de valoración. Se requiere mayor información o surgieron dudas durante el proceso de revisión del protocolo.

No aprobado

Protocolo rechazado por razones éticas que ameritan una restructuración mayor.

Comunicación del resultado de la revisión del protocolo

Las decisiones deberán ser notificadas por escrito al solicitante en el lapso indicado en el reglamento interno del CEI, se sugiere sea enviada en un lapso no mayor a cinco días hábiles después de haberse reunido. Las aprobaciones tienen vigencia de un año.[57] En los Anexo 5 se presentan algunas recomendaciones para la comunicación de la decisión, particularmente en el caso de ensayos clínicos que deben ser autorizados por la Comisión Federal para la Protección Contra Riesgos Sanitarios (COFEPRIS).

56 *Cfr.* Artículo Art 20, 21, 22 Fracción V Reglamento de la Ley General de Salud en Materia de Investigación para la Salud. Última Reforma DOF 02-04-2014.

57 En investigaciones con riesgo elevado, estudios Fase 0 o Fase I, el CEI podrá determinar una vigencia menor.

Las decisiones tomadas por el Comité sólo serán válidas cuando exista el *quórum* establecido, de cuando menos el cincuenta por ciento de los integrantes más uno. Asimismo, al recibir el documento de dictamen, el investigador entregará al CEI una carta compromiso con fecha y firma que deberá contener por lo menos los siguientes apartados:

- Mecanismo para la entrega de reporte(s) de los avances o en su caso, la terminación o cancelación del protocolo.
- Mecanismo para notificar al CEI, si hubiese enmiendas al protocolo (no las enmiendas que involucren sólo aspectos logísticos o administrativos del estudio).
- Mecanismo para notificar al CEI, en el caso de enmiendas del material de reclutamiento y la información para los potenciales participantes en la investigación o al formato de consentimiento informado.
- Mecanismo para reportar eventos adversos serios e inesperados relacionados con la conducción del estudio o circunstancias imprevistas.

Uso de medicamentos no aprobados en situaciones de urgencia y emergencia

El CEI será informado de manera anticipada del empleo del medicamento de investigación, si el investigador anticipa la necesidad de su uso en situaciones de urgencia. Posteriormente, si el uso del medicamento, indicación, dosis o vías de administración nuevas, surgieran como necesidades no previstas, el CEI emitirá el dictamen en favor o en contra de aprobar el uso planeado o la repetición del uso no previsto del medicamento.[58]

En el marco de una emergencia sanitaria, se podrá modificar el proceso de aprobación de un medicamento, reduciendo el número de fases del ensayo clínico, con la intervención de la autoridad sanitaria correspondiente.

Seguimiento de protocolos

El CEI debe establecer procedimientos para el seguimiento de los estudios que aprobó, desde el momento en que la decisión fue tomada, hasta la culminación de la investigación y el reporte de los resultados. En el procedimiento de seguimiento debe tomarse en consideración lo siguiente:

1. Responsabilidades del CEI durante el seguimiento:[59]
   a. El intervalo en el seguimiento de los protocolos será determinado por el CEI y debe llevarse a cabo al menos una vez al año. El Comité informará al investigador principal la renovación o cualquier otra decisión que surgiera como resultado de la revisión del estudio, relacionada con la protección de los participantes.
2. Responsabilidades del investigador:
   a. Comunicar al CEI:
      - Cualquier enmienda del protocolo que eventualmente pudiera afectar los derechos, la seguridad o el bienestar de los participantes en la investigación.
      - Cualquier situación o nuevo conocimiento que mostrara un mayor riesgo para los participantes.
      - La terminación o suspensión prematura del estudio, las razones y los resultados obtenidos.
      - Al completar el estudio.
   b. Enviar resumen final de los resultados del estudio e informar sobre la publicación del mismo.

58 *Cfr.* Artículo 71, Fracción V Reglamento de la Ley General de Salud en Materia de Investigación para la Salud. Última Reforma DOF 02-04-2014

59 Los requisitos de quórum, el procedimiento de revisión y el procedimiento de comunicación para revisiones de seguimiento, no difieren de los requisitos para la evaluación inicial.

Eventos adversos

Una vez aprobada la investigación, el investigador debe informar al CEI de todo Evento Adverso (EA), es decir, cualquier signo, síntoma o enfermedad asociado con el uso de un producto medicinal, independientemente de que pudiera estar relacionado con el medicamento.[60]

A menos que se haya definido un marco temporal distinto cuando se aprobó el estudio, el investigador principal deberá informar al Comité de todo EA. Asimismo, deberá informarle, con la periodicidad establecida en los manuales de operación, sobre la ausencia de Eventos Adversos en los proyectos o protocolos de investigación que estén bajo su responsabilidad. En caso de reportar un EA, el CEI revisará el mismo y el Presidente decidirá si es necesario tomar acciones para minimizar el riesgo potencial a los sujetos.

Eventos adversos serios

Los eventos adversos serios (EAS) se definen como cualquier evento médico, asociado con el uso de un producto medicinal, independientemente de que pudiera estar relacionado con el medicamento que resulte en la muerte del individuo o ponga en peligro su vida.[61]

Cuando el EAS ocurre en el establecimiento en el que el CEI aprobó el protocolo, el investigador deberá informar al Comité en un periodo no mayor a 7 días (o de acuerdo a lo establecido en el manual de procedimientos).[62] El investigador deberá informar al patrocinador en los términos establecidos en el manual del investigador y a la autoridad sanitaria en un periodo no mayor a 15 días naturales.[63] El mecanismo de reporte puede realizarse por medios electrónicos o por vía telefónica.[64] Es confidencialidad del CEI asegurar la protección de los participantes en la investigación y, por tanto, debe evaluar la necesidad de suspender transitoriamente un estudio o de que los participantes vuelvan a dar su consentimiento con la nueva información.[65]

Consideraciones sobre la recolección de material biológico

El material biológico humano incluye todo tipo de muestras, desde las estructuras subcelulares como el ADN hasta células, tejidos (sanguíneos, musculares, óseos, conectivos, cutáneos, entre otros), órganos y residuos biológicos. Su uso y asociación con datos personales es cada vez más frecuente e importante en las investigaciones biomédicas. La recolección de estos materiales y la posibilidad de obtener, a través de éstos, informaciones genéticas representa un reto desde el punto de vista ético, jurídico y social. Es por esto que la población debe tener la confianza de que el material será manejado con confidencialidad.[66]

65 *Cfr.* Artículo 68, Fracciones I y III del Reglamento de la Ley General de Salud en Materia de Investigación para la Salud. Ultima reforma DOF 02-04-2014

66 *Cfr.* Steering Committee on Bioethics/ Council of Europe (2012) Guide for Research Ethics Committee Members. Strasbourg: Council of Europe.

Desde la perspectiva ética, es importante considerar los siguientes aspectos:

- El consentimiento informado relacionado con el uso y almacenamiento del material biológico, debe dejar claro que no será utilizado para un fin diferente al planteado de manera inicial, a menos que se garantice la privacidad del donador y el CEI apruebe el protocolo.
- Deberá informar que el investigador no podrá comercializar las muestras.
- No ejercerá influencia indebida a través de estímulos económicas a los donadores de tejidos.
- La recolección de material genético deberá ser evaluada y en su caso aprobada por el CEI.

El consentimiento en el que el donador proporciona el tejido debe abordar algunos de los siguientes puntos:

- Tipo y cantidad de tejido que se solicita.
- La forma en que éste se obtendrá (señalar los riesgos, si el procedimiento es invasivo, si se realizará con ese sólo propósito o durante un procedimiento diagnóstico o terapéutico).
- Las estrategias para proteger la confidencialidad conforme a Ley.
- Tiempo que será almacenado y cómo se preservará.
- Los planes para comunicar al donador alguna información relevante.
- Permiso para otros usos.

Consideraciones relevantes en la recolección de tejidos:

- La recolección y transferencia de material biológico no debe, bajo ninguna circunstancia, poner en riesgo el cuidado médico y la seguridad del sujeto de investigación.
- El CEI enviará al departamento legal, para su revisión y aprobación, cualquier propuesta que implique una transferencia monetaria o algún tipo de remuneración, relacionada con el uso de material biológico.
- Es necesario el consentimiento informado específico para recolectar tejidos o realizar pruebas genéticas, en ningún caso la autorización deberá estar contenida en el mismo formato que la propia autorización para participar en un ensayo clínico.
- Cuando se recolecten datos genéticos humanos, datos proteómicos humanos o muestras biológicas con fines de investigación médica y científica, la persona de que se trate podrá revocar su consentimiento, a menos que esos datos estén irreversiblemente disociados de una persona identificable.
- Ante la revocación del consentimiento, deben dejar de utilizarse los datos genéticos, datos proteómicos y muestras biológicas, a menos que estén irreversiblemente asociados a la persona. Los datos y las muestras biológicas que no estén irreversiblemente asociados deberán tratarse conforme a los deseos del interesado.[67]
- El CEI debe exigir límites de tiempo para el uso del material y prohibir el uso irrestricto del material.

Consideraciones éticas en estudios epidemiológicos

Las principales preocupaciones éticas en los estudios epidemiológicos son la protección de la privacidad y la confidencialidad de los participantes. En los estudios que involucran la revisión de expedientes en los que los individuos no sean contactados, el CEI deberá asegurarse que la privacidad de los individuos estará protegida. En los casos en los que se establezca contacto con individuos o familiares, el CEI estará obligado a tomar las consideraciones necesarias. Un aspecto a considerar es el Consentimiento Informado en estudios retrospectivos y de muestras almacenadas.[35]

Desempeño del Comité de Ética en Investigación

Existe cada vez mayor interés de asegurar que los CEI cumplen con su mandato para la revisión y seguimiento de protocolos, de acuerdo con estándares éticos que aseguren la protección de los participantes en las investigaciones. En este sentido, la CONBIOÉTICA impulsa con esta Guía el desarrollo de procedimientos estandarizados que promuevan la aplicación consistente de los principios éticos y así cada CEI pueda asegurar y comprobar la calidad en la revisión y el seguimiento de las investigaciones en las que participan seres humanos.

Es necesario que el CEI informe a la Comisión anualmente sobre su trabajo. El informe debe incluir el número de sesiones ordinarias, extraordinarias y expeditas realizadas, número de protocolos revisados, aprobados, rechazados, el seguimiento y cualquier otra información pertinente, que la Comisión considere en el formato que al efecto establezca. Estos informes no deberán contener datos confidenciales de la investigación o de sus participantes.

La CONBIOÉTICA realizará visitas aleatorias a los CEI con registro, para asegurar:

- El apego a la Guía Nacional para la integración y funcionamiento de los CEI,
- El seguimiento de los procedimientos establecidos en cada CEI,
- Que la conformación del CEI sea concordante con el tipo de investigación y el número de protocolos revisados y su seguimiento,
- Las comunicaciones con los investigadores,
- Las prácticas apropiadas en el archivo de la documentación.

El vínculo entre la CONBIOÉTICA y la Comisión Federal para la Protección Contra Riesgos Sanitarios (COFEPRIS), busca asegurar que la investigación en seres humanos se lleve a cabo con estándares éticos y científicos. En aquellos casos en los que exista algún cuestionamiento sobre la protección de los participantes en las investigaciones por métodos inadecuados en la revisión de protocolos o falta de seguimiento, la COFEPRIS realizará una visita al CEI y la Comisión podrá suspender temporal o definitivamente el registro del CEI en cumplimiento a la resolución emitida por la autoridad competente. Toda información deberá estar fundamentada y los procedimientos deberán ser trasparentes.

Conflictos de interés[4]

El Instituto de Medicina de los Estados Unidos definió al conflicto de interés como las circunstancias que ocasionan el riesgo de que el juicio o las acciones del profesional con respecto de un interés primario estén indebidamente influenciados por un interés secundario.[68] *La Organización de Naciones Unidas, lo define como cualquier circunstancia o situación en la que el juicio profesional o la integridad de las acciones de un individuo o de la institución respecto a un interés primario se ve indebidamente afectado por un interés secundario, los cuales pueden ser financieros o personales, como el reconocimiento profesional, académico, concesiones o privilegios a terceros.*[69]

Para los fines de esta Guía es importante explicitar que en la investigación con seres humanos el interés primario comprende la promoción y protección del bienestar de los sujetos y la integridad de la investigación.

4 *Vid.* Koepsell D., Ruiz de Chávez M. (2015). Ética de la investigación, Integridad científica. CONBIOÉTICA / CONACYT: México. Disponible en formato eBook en: http://www.conbioetica-mexico.salud.gob.mx/

68 *Cfr.* Lo B, Field MJ, eds. Conflict of interest in medical research, education, and practice. National Academies Press, 2009.

69 Organización de Naciones Unidas. Asesoramiento y orientación éticos Conflictos de intereses Disponible en : http://www.un.org/es/ethics/conflictofinterest.shtml

Los CEI registrados ante la CONBIOÉTICA establecerán lineamientos o directrices por escrito para evitar que algún conflicto de interés afecte negativamente la protección de los participantes en investigaciones, la integridad científica y la credibilidad del CEI y de la institución. Para mayor información sírvase consultar el capítulo cuatro del libro *Ética de la Investigación, Integridad Científica.* Durante el seguimiento de los CEI registrados, deberá demostrarse bajo protesta de decir verdad ante la Comisión que cualquier interés económico está separado de la revisión ética del CEI. En el Anexo 6 se presenta un ejemplo de formato para la declaración de conflictos de interés.

Recomendaciones para evitar conflictos de interés:[70]

- Establecer las medidas necesarias para evitar conflictos de interés en la protección de los derechos de los sujetos de investigación.[71]
- Transparentar posibles conflictos de interés de los investigadores e integrantes del CEI.
- Desarrollar material informativo sobre conflictos de interés.
- Considerar los casos en los que el investigador es también el médico tratante.
- Establecer criterios para proporcionar compensaciones para los sujetos, que sean proporcionales a los inconvenientes de la investigación, sin embargo, no debe significar una influencia indebida.

Políticas sobre la interacción del evaluador del CEI con el patrocinador de la investigación y Organizaciones de Investigación por Contrato (CRO, por sus siglas en inglés).

Los integrantes del CEI no deberán comunicarse con el patrocinador del estudio. Todo contacto con el patrocinador se hará a través del investigador principal, a quien solicitará cualquier información adicional.[72] El CEI al igual que en el caso de los patrocinadores, no establecerá comunicación con las CRO.[73]

Registro de los Comités Ética en Iinvestigación

Los establecimientos de atención médica del Sistema Nacional de Salud o las instituciones de salud en donde se realice investigación para la salud en seres humanos deberán solicitar ante la CONBIOÉTICA, a través del director general,[74] titular o representante legal,[75] de acuerdo a la naturaleza jurídica del establecimiento solicitante, el registro del CEI de su establecimiento. La Comisión como órgano desconcentrado de la Secretaría de Salud atenderá la solicitud conforme a lo establecido en el artículo 101 del Reglamento de la Ley General de Salud, en materia de Investigación para la Salud, el Acuerdo por el que se emiten las Disposiciones Generales para la Integración y Funcionamiento de los Comités de Ética en Investigación y el Acuerdo por el que se reforma y adiciona el diverso por

70 Los servidores públicos deberán cumplir con lo establecido en la los artículos 7, 8 y 9 de La Ley Federal de Responsabilidades Administrativas de los Servidores Públicos. Disponible en : http://www.sep.gob.mx/work/models/sep1/Resource/fe27ab92-1e15-4cc0-b36b-eb2af344f06/ley_fed_resp_admvas_serv_pub.pdf últimas versión publicada en el D.O.F el Última reforma publicada DOF 14-07-2014

71 *Cfr.* Artículo 63 RLGS en Materia de Investigación para la Salud. Cuando exista patrocinio u otras formas de remuneración, deberán establecerse las medidas necesarias para evitar que éstos originen conflictos de interés al investigador principal en la protección de los derechos de los sujetos de investigación, aunque hayan dado su consentimiento en la preservación de la veracidad de los resultados y en la asignación de los recursos.

73 *Cfr.* Glickman SW, McHutchison JG, Peterson ED, Cairns CB, Harrington RA, Califf RM, Schulman KA. ethical and scientific implications of the globalization of clinical research. New England Journal of Medicine. 2009;360:816–823

74 Es un cargo dentro de un establecimiento que corresponde a la jerarquía más alta en la estructura orgánica de la institución, cuya función principal es coordinar o dirigir. Generalmente las facultades, a favor de los directores, para crear nuevos órganos al interior del establecimiento, como lo son los Comités, están previstas en el Manual de Organización Específico o en un poder para actos de administración.

75 Es la persona que, por virtud de un acto jurídico, actúa a nombre del representado (empresa o establecimiento) para llevar a cabo determinadas acciones.

el que se emiten las Disposiciones Generales para la Integración y Funcionamiento de los Comités de Ética en Investigación y se establecen las unidades hospitalarias que deben contar con ellos, de conformidad con los criterios establecidos por la Comisión Nacional de Bioética, publicado el 31 de octubre de 2012. (D.O.F. 11/01/16).

Los establecimientos que podrán contar con el registro del CEI serán aquellos que reúnan los requisitos previstos en la Ley General de Salud y su Reglamento en Materia de Investigación para la Salud, cuya infraestructura deberá garantizar la capacidad técnica, material, humana y financiera, así como las instalaciones, equipo y tecnología para realizar las pruebas, estudios, ensayos, y demás actividades necesarias para llevar a cabo la investigación en seres humanos, respetando los derechos humanos y la dignidad de los sujetos participantes en la investigación.

Solicitud

La solicitud deberá presentarse en días y horas hábiles, en las instalaciones de la CONBIOÉTICA por correo certificado con acuse de recibo, en el formato preestablecido. Toda la información que se envíe a la Comisión deberá ser dirigida a la Presidencia del Consejo de la Comisión, ubicada en Calzada Arenal número 134, Colonia El Arenal Tepepan, Delegación Tlalpan, C.P. 14610, México, Distrito Federal.

El formato a que hace referencia el párrafo anterior deberá contener:

Datos del establecimiento:

1. Nombre, denominación o razón social.
2. Nombre del representante legal.
3. Nombre del responsable sanitario.
4. Nombre de la persona para recibir notificaciones.
5. Licencia sanitaria emitida por la Comisión Federal para la Protección contra Riesgos Sanitarios (COFEPRIS) para establecimientos de atención médica.
6. CLUES.

6. (bis) RENIECYT

Domicilio del establecimiento:

7. Calle, número y colonia.
8. Delegación o municipio.
9. Ciudad.
10. Entidad Federativa.
11. Código Postal.
12. Correo electrónico.
13. Teléfono con lada.

Características del Comité:

14. Tipo de servicio que presta el establecimiento al que pertenece el CEI.
15. Tipo de investigación que revisa el CEI.
16. Tipos de estudio revisados por el CEI.

Integración del CEI:

17. Fecha de instalación.
18. Nombre del Presidente del CEI.

19. Correo electrónico del Presidente del CEI.
20. Teléfono del Presidente del CEI, nombre, sexo, cargo al interior del CEI, profesión y número de cédula profesional de cada uno de los integrantes del CEI.

Integrantes:

21. Nombre, apellido paterno, apellido materno.
22. Género.
23. Cargo en el CEI.
24. Profesión y número de cédula profesional.
25. Documentos que acompañan la solicitud.
26. Lugar.
27. Fecha.
28. Nombre y firma del Director o Titular.

Clasificación de la documentación presentada

El solicitante deberá clasificar la documentación que presente a la CONBIOÉTICA como información pública o información confidencial. En caso de ser confidencial deberá señalar entre corchetes los datos que son confidenciales. Los documentos deberán contener las leyendas: información pública o información confidencial, justificando, en caso de esta última, la razón por la cual se le asigna el carácter de información confidencial o reservada.

Deberán presentarse dos originales de la solicitud con firma autógrafa del titular de la institución en la que se declare bajo protesta de decir verdad, que los datos que se proporcionan son correctos y en la que se comprometa a facilitar a petición de la Comisión Nacional de Bioética, la información, datos o documentos que le sean requeridos. Adicionalmente para cotejo deberá presentarse la documentación solicitada, en medio magnético, con las siguientes características:

a. Las imágenes en formato PDF y TIF (archivos tipo imagen), que sea compatible con Windows XP o posteriores.
b. Un disco para la versión pública y otro para la versión confidencial, debidamente identificados.
c. Los CD/DVD no regrabables y etiquetados o rotulados, con tinta indeleble o en dispositivo USB.

Términos y plazos

En un término de diez días hábiles, la CONBIOÉTICA admitirá el trámite o, en su caso, prevendrá al solicitante para que subsane las omisiones. El solicitante tendrá un plazo de quince días hábiles para atender la prevención; en caso de no hacerlo se tendrá por no presentada la solicitud.

Es necesario que el CEI de la institución o establecimiento cuente con un registro vigente para que los dictámenes de los protocolos o el seguimiento de los mismos tengan validez ante la autoridad sanitaria nacional. De no contar con registro vigente, el CEI tiene la obligación de informar a la institución, investigador y patrocinador. En caso de tener investigaciones en curso y no contar con registro vigente, el titular o director del establecimiento deberá asegurar que el seguimiento de los protocolos se realice por un CEI con registro vigente.

La Comisión en un plazo de treinta días hábiles, contados a partir de la admisión a trámite de la solicitud o cumplimentación del requerimiento, notificará al solicitante, sobre la procedencia de su solicitud y, en caso de ser aplicable, emitirá la constancia de registro correspondiente.

Elementos de la constancia de registro

La constancia de registro, además de los requisitos de todo acto administrativo previstos en la Ley Federal de Procedimiento Administrativo y el Código Federal de Procedimientos Civiles de aplicación supletoria, deberá contener los siguientes requisitos:

1. Nombre, denominación o razón social del establecimiento al que pertenece el CEI.
2. Domicilio del establecimiento en la que se encuentre el CEI.
3. Clave alfanumérica de registro único.
4. Fecha de emisión.
5. Vigencia.

Vigencia

La constancia de registro tendrá una vigencia de tres años. Deberá ser exhibida en la página electrónica del establecimiento, en caso de que aplique, y señalar el número de registro en los dictámenes emitidos a protocolos de investigación; deberán publicarse el objeto y las funciones del CEI, en un lugar visible para los usuarios del establecimiento.

Renovación

La solicitud de renovación del registro deberá presentarse dentro de los 45 días hábiles anteriores al vencimiento de la vigencia, para lo cual se deberán presentar:

1. Solicitud de renovación en el formato previamente establecido por la CONBIOÉTICA.
2. Constancias de capacitación de cada uno de los integrantes del CEI.
3. Acuse de recibo de los tres últimos informes anuales presentados ante la Comisión.
4. Constancias de designación los integrantes.
5. Copia simple de la cédula profesional de los integrantes del CEI.

Documentos a inscribirse en la renovación

1. La constancia de registro del CEI que haya concluido su trámite.
2. Los cambios de integrantes del CEI.[76]
3. Cambio de representante legal del establecimiento (en caso de que aplique).
4. Documento con el que se acredite la representación legal del establecimiento.
5. Informes anuales.
6. Información acerca del número de protocolos evaluados, tipos de dictámenes emitidos y el seguimiento de los mismos.
7. Los convenios que celebren los establecimientos con otras instituciones para la revisión de protocolos de investigación por el CEI.
8. Los demás actos que afecten el funcionamiento del CEI.

76 Las modalidades de cambio de los integrantes del CEI pueden ser por: a) baja de integrantes; b) alta de nuevos integrantes; c) alta y baja simultáneas de integrantes; y d) cambio de cargo al interior del CEI.

Actualización

Los establecimientos que cuenten con registro del CEI y que requieran la actualización de datos del comité, podrán solicitar por mediante escrito libre constancia de cambios de algunos de los integrantes de comité. La solicitud deberá estar dirigida al Titular de la CONBIOÉTICA con la siguiente información:

1. Nombre, denominación o razón social del establecimiento solicitante;
2. Domicilio para recibir notificaciones y correo electrónico;
3. La petición que se formula (relacionada con el número de expediente);
4. Los hechos o razones que dan motivo a la petición;
5. Cartas de designación de los integrantes
6. Estar firmado por el director, titular del establecimiento.

A la solicitud se deberán anexar los documentos probatorios que correspondan a lo solicitado y, en caso de que los cambios solicitados afecten ya sea de forma directa o indirecta a los sujetos que participan en la investigación para la salud, deberán demostrar las medidas implementadas para que los sujetos de investigación sean protegidos y no vulnerados durante su participación en la investigación.

La CONBIOÉTICA emitirá el oficio correspondiente dentro del término de 15 días hábiles en los supuestos previstos en las fracciones 3,4 y 6 y dentro del término de 45 días hábiles en los demás supuestos previstos en el apartado de documentos a inscribirse. En caso de cambio de domicilio, o la suspensión temporal del establecimiento o CEI y, en general, aquellos que afecten la protección de los participantes en la investigación, la Comisión podrá solicitar información que considere necesaria para garantizar la protección de los sujetos de investigación. En los supuestos previstos en las fracciones 10 y 11, el registro seguirá la suerte del acto principal.

Instituciones de Educación Superior

Las Universidades y centros de educación superior tienen un papel importante en la investigación biomédica. Los CEI de estas instituciones deben revisar los protocolos de investigación, de acuerdo con los lineamientos éticos que regulan la investigación nacional e internacional.

Los CEI pertenecientes a Universidades y centros de educación superior -con Registro Nacional de Instituciones y Empresas Científicas y Tecnológicas (RENIECyT)- podrán solicitar el registro ante la CONBIOÉTICA, de conformidad con los criterios correspondientes.

Anexo 1
Solicitud de registro de comité de ética en investigación

1. DATOS DEL ESTABLECIMIENTO			
(1) Nombre, denominación o razón social*			
(2) Nombre del representante legal *	Nombre (s)	Apellido Paterno	Apellido Materno
(3) Nombre del responsable sanitario *			
(4) Nombre de la persona para recibir notificaciones			
(5) Licencia Sanitaria es obligatoria*			
(6) CLUES			
(6 bis) RENIECYT			

2. DOMICILIO DEL ESTABLECIMIENTO			
(7) Calle, número y colonia *			
(8) Delegación o Municipio*		(9) Ciudad *	
(10) Entidad Federativa *		(11) Código Postal *	
(12) Correo electrónico *		(13) Teléfono (con lada) *	

3. CARACTERÍSTICAS DEL COMITÉ				
(14) Tipo de servicio que presta el Establecimiento al que pertenece el CEI *	Público ☐ Social ☐ Privado ☐	(15) Tipo de investigación que revisa el CEI*	Sin riesgo ☐ Con riesgo mínimo ☐ Con riesgo mayor al mínimo ☐	
(16) Tipos de estudio revisados por el CEI*	Investigaciones sociales ☐ Ensayos clínicos ☐ Dispositivos médicos ☐		Investigaciones epidemiológicas ☐ Investigación con muestras biológicas ☐ Bioequivalencia ☐	

4. INTEGRACIÓN DEL COMITÉ			
(17) Fecha de instalación *			
(18) Nombre del Presidente *	Nombre (s)	Apellido Paterno	Apellido Materno
(19) Correo electrónico del Presidente*		(20) Teléfono (con lada) del Presidente*	

INTEGRANTES *					
(21) Nombre (s)	Apellido Paterno	Apellido Materno	(22) Género (M o F)	(23) Cargo en el CEI *	(24) Profesión y No. Cédula Profesional *

(25) **5. SEÑALE CON UNA (X) LOS DOCUMENTOS QUE SE ACOMPAÑAN** *	
( )	Formato de autoevaluación.
( )	Acta de instalación del Comité.
( )	Constancias de designación de cada uno de los integrantes del Comité.
( )	Copia de la cédula profesional de cada uno de los integrantes del Comité.
( )	Currículum vitae de cada uno de los integrantes del Comité
( )	Constancias de capacitación en bioética y/o ética en investigación de los integrantes del Comité, excepto del representante del núcleo afectado o de las personas usuarias de los servicios de salud.
( )	Documento con el que se acredite la representación legal del Establecimiento.
( )	Licencia Sanitaria del Establecimiento.
( )	Aviso de designación de responsable sanitario del Establecimiento.
( )	Reglas de funcionamiento del Comité.
( )	Políticas, lineamientos o guías en apego a las buenas prácticas clínicas del Establecimiento
( )	Procedimiento de operación para dar seguimiento a los protocolos autorizados

( )	Manifestación bajo protesta de decir verdad de que el Establecimiento se encuentra en los supuestos previstos en los artículos 41 BIS y 98 de la Ley General de Salud y cuenta con la infraestructura que garantice la capacidad técnica, material, humana y financiera, así como las instalaciones, equipo y tecnología para llevar a cabo las pruebas, estudios, ensayos, verificaciones y demás actividades necesarias para llevar a cabo actividades de investigación en seres humanos, de conformidad con los criterios establecidos en la normatividad vigente.
( )	En su caso, manifestación bajo protesta de decir verdad de que el Establecimiento solicitante cuenta con las instalaciones necesarias para proteger a los participantes en investigaciones, el personal y equipo necesario para la atención de cualquier urgencia médica, los procedimientos para el internamiento de pacientes en caso de ser necesario y demás lineamientos establecidos en las Buenas Prácticas de Investigación y normatividad vigente.
( )	Otros:

Declaro bajo protesta de decir verdad, que los datos que se proporcionan son correctos y me comprometo a facilitar a petición de la Comisión Nacional de Bioética, la información, datos o documentos que sean requeridos.

(26) Lugar *		(28) Nombre y firma del Director o Titular*
(27) Fecha *		

A efecto de garantizar la seguridad de los sujetos participantes en las investigaciones y la integridad científica en éstas, la Comisión se reserva el derecho de solicitar documentación o información adicional.

Instrucciones de llenado

El presente formato deberá llenarse a máquina o con letra legible, no deberá de contener abreviaturas, tachaduras ni enmendaduras. Los datos marcados con asterisco (*) son obligatorios.

(1) Asentar el nombre, denominación o razón social del Establecimiento solicitante al que pertenece el Comité, tal como aparece en el documento con el que se acredite la autorización sanitaria para realizar investigación en seres humanos.

(2) Señalar el nombre completo del representante legal del Establecimiento en el orden siguiente: nombre(s), apellido paterno y apellido materno, sin hacer referencia a grados académicos, el cual deberá de coincidir con el documento con el que se acredite la representación legal del Establecimiento.

(3) Asentar el nombre completo del responsable sanitario del Establecimiento en el orden siguiente: nombre(s), apellido paterno y apellido materno, tal como aparece en sus documentos oficiales, sin señalar el grado académico.

(4) En su caso, señalar el nombre completo de la persona autorizada para oír y recibir notificaciones, en el orden siguiente: nombre(s), apellido paterno y apellido materno, sin señalar el grado académico.

(5) Indique el número de Licencia Sanitaria del Establecimiento.

(6) Señalar la Clave Única de Establecimientos de Salud, emitida por la Dirección General de Información en Salud

(6bis) Registro Nacional de Instituciones y Empresas Científicas y Tecnológicas (RENIECyT) del Consejo Nacional de Ciencia y Tecnología (CONACYT). No obligatorio para las instituciones de salud.

(7) Indicar el nombre de la calle, número y colonia, en donde se encuentra ubicado el Establecimiento al que pertenece el Comité.

(8) Indicar la Delegación o Municipio del inmueble en donde se encuentra ubicado el Establecimiento al que pertenece el Comité.

(9) Señalar la Ciudad en donde se encuentra ubicado el Establecimiento al que pertenece el Comité

(10) Indicar la Entidad Federativa en donde se encuentra ubicado el Establecimiento al que pertenece el Comité.

(11) Indicar el Código Postal en donde se encuentra ubicado el Establecimiento al que pertenece el Comité.

(12) Indicar el correo electrónico al que podrán enviarse avisos para el Comité.

(13) Señalar el teléfono con clave lada en el que se podrán dar avisos para el Comité.

(14) Marcar el tipo de servicio que presta el Establecimiento:

Públicos: Son servicios de salud que se prestan a la población en general los que se presten en establecimientos públicos de salud a los residentes del país que así lo requieran, regidos por criterios de universalidad y de gratuidad en el momento de usar los servicios, fundados en las condiciones socioeconómicas de los usuarios.

Sociales: Son servicios de salud que se presten, directamente o mediante la contratación de seguros individuales o colectivos, los grupos y organizaciones sociales a sus integrantes y a los beneficiarios de los mismos.

Privados: Son servicios de salud que se presten a personas físicas o morales en las condiciones que convengan con los usuarios, sujetas a los ordenamientos legales, civiles y mercantiles.

(15) Indique el tipo de investigación revisada por el Comité, pudiéndose marcar más de una opción.

Investigación sin riesgo: Son estudios que emplean técnicas y métodos de investigación documental retrospectivos y aquéllos en los que no se realiza ninguna intervención o modificación intencionada en las variables fisiológicas, psicológicas y sociales de los individuos que participan en el estudio, entre los que se consideran: cuestionarios, entrevistas, revisión de expedientes clínicos y otros, en los que no se le identifique ni se traten aspectos sensitivos de su conducta.

Investigación con riesgo mínimo: Estudios prospectivos que emplean el riesgo de datos a través de procedimientos comunes en exámenes físicos o psicológicos de diagnósticos o tratamiento rutinarios, entre los que se consideran: pesar al sujeto, pruebas de agudeza auditiva; electrocardiograma, termografía, colección de excretas y secreciones externas, obtención de placenta durante el parto, colección de líquido amniótico al romperse las membranas, obtención de saliva, dientes deciduales y dientes permanentes extraídos por indicación terapéutica, placa dental y cálculos removidos por procedimiento profilácticos no invasores, corte de pelo y uñas sin causar desfiguración, extracción de sangre por punción venosa en adultos en buen estado de salud, con frecuencia máxima de dos veces a la semana y volumen máximo de 450 ml. en dos meses, excepto durante el embarazo, ejercicio moderado en voluntarios sanos, pruebas psicológicas a individuos o grupos en los que no se manipulará la conducta del sujeto, investigación con medicamentos de uso común, amplio margen terapéutico, autorizados para su venta, empleando las indicaciones, dosis y vías de administración establecidas y que no sean los medicamentos de investigación que se definen en el artículo 65 del Reglamento de la Ley General de Salud en Materia de Investigación para la Salud, entre otros.

Investigación con riesgo mayor que el mínimo: Son aquéllas en que las probabilidades de afectar al sujeto son significativas, entre las que se consideran: estudios radiológicos y con microondas, ensayos con los medicamentos y modalidades que se definen en el artículo 65 del Reglamento de la Ley General de Salud en Materia de Investigación para la Salud, ensayos con nuevos dispositivos, estudios que incluyan procedimientos quirúrgicos, extracción de sangre mayor al 2% del volumen circulante en neonatos, amniocentesis y otras técnicas invasoras o procedimientos mayores, los que empleen métodos aleatorios de asignación a esquemas terapéuticos y los que tengan control con placebos, entre otros.

(16) Indique el tipo de estudios revisados por el Comité de Ética en Investigación del mismo.

Investigaciones sociales: Proceso que, utilizando el método científico, permite obtener nuevos conocimientos en el campo de la realidad social o que permite estudiar una situación social para diagnosticar necesidades y problemas a los efectos de aplicar los conocimientos con finalidades prácticas.

Investigaciones epidemiológicas: Investigación sistemática de las características de un caso y del contexto epidemiológico en el que éste ocurre.

Ensayo clínico: Cualquier investigación que se lleva a cabo en humanos y que podrá tener como objetivos: descubrir o verificar los efectos clínicos, farmacológicos y/u otros efectos farmacodinámicos de un producto en investigación; identificar cualquier reacción adversa de un producto en investigación, y estudiar la absorción, distribución, metabolismo y excreción con el objetivo de evaluar la eficacia y la seguridad de un medicamento de investigación.

Muestra biológica humana: Parte del cuerpo humano separada del mismo, que alberga ácidos nucleicos y que contiene la dotación genética característica de una persona.

Dispositivos médicos: Investigaciones con cualquier instrumento, aparato, artefacto, equipo biomédico u otro artículo similar o relacionado, utilizado sólo en combinación, incluyendo sus componentes, partes, accesorios y programas informáticos utilizados para prevenir, diagnosticar o sustituir el funcionamiento de alguna parte del cuerpo.

Bioequivalencia: Estudios para verificar la equivalencia terapéutica entre un fármaco en estudio farmacéuticamente equivalente y un fármaco autorizado de referencia.

(17) Indicar la fecha de instalación del Comité en el orden siguiente: día, mes, año.

(18) Señalar el nombre completo del Presidente del Comité en el orden siguiente: nombre(s), apellido paterno y apellido materno, sin indicar el grado académico.

(19) Indicar el correo electrónico del Presidente del Comité al que podrán enviarse avisos para el Comité.

(20) Señalar el teléfono con clave lada del Presidente del Comité en el que se podrán dar avisos para el Comité.

(21) Señalar el nombre completo de cada uno de los integrantes del Comité en el orden siguiente: nombre(s), apellido paterno y apellido materno, sin hacer referencia a grados académicos.

(22) Asentar el género, debiendo señalar (H) Hombre o (M) Mujer.

(23) Mencionar el cargo que cada uno de los integrantes ocupa al interior del Comité, incluyendo a la representación del núcleo afectado o de los usuarios de los servicios de salud, en cuyo caso de pondrá tal situación. En caso de que sea insuficiente el espacio, se podrá reproducir el formato cuantas veces sea necesario.

(24) Indicar la profesión y el número de Cédula Profesional del integrante del Comité, expedida por la Secretaría de Educación Pública. Se exceptúa el caso de la representación del núcleo afectado o de las personas usuarias de los servicios de salud, en cuyo caso se podrá señalar "NO APLICA".

(25) Marcar con una (X) los documentos que se acompañan a la solicitud.

(26) Mencione el lugar en el que se suscribe la solicitud.

(27) Indique la fecha en la que se suscribe la solicitud en el orden siguiente: día, mes, año.

(28) Asentar el nombre completo en el orden siguiente: nombre(s), apellido paterno y apellido materno, así como la firma del Director o Titular del Establecimiento solicitante.

Anexo 2
Solicitud de renovación de registro de Comité de Ética en Investigación

1. DATOS DEL ESTABLECIMIENTO			
(1) Nombre y razón social del establecimiento al que pertenece el CEI *

Instrucciones de llenado

El presente formato deberá llenarse a máquina o con letra legible, no deberá de contener abreviaturas, tachaduras ni enmendaduras. Los datos marcados con asterisco (*) son obligatorios

(1) Asentar el nombre, denominación o razón social del Establecimiento solicitante al que pertenece el Comité, tal como aparece en el documento con el que se acredite la autorización sanitaria para realizar investigación en seres humanos.

(2) Señalar el nombre completo del representante legal del Establecimiento en el orden siguiente: nombre(s), apellido paterno y apellido materno, sin hacer referencia a grados académicos, el cual deberá de coincidir con el documento con el que se acredite la representación legal del Establecimiento.

(3) Asentar el nombre completo del responsable sanitario del Establecimiento en el siguiente orden: nombre(s), apellido paterno y apellido materno, tal como aparece en sus documentos oficiales, sin señalar el grado académico.

(4) En su caso, señalar el nombre completo de la persona autorizada para oír y recibir notificaciones, en el orden siguiente: nombre(s), apellido paterno y apellido materno, sin señalar el grado académico.

(5) Indique el número de Licencia Sanitaria del Establecimientos de Atención Médica

(6) Señalar la Clave Única de Establecimientos de Salud, emitida por la Dirección General de Información en Salud.

(6bis) Registro Nacional de Instituciones y Empresas Científicas y Tecnológicas (RENIECyT) del Consejo Nacional de Ciencia y Tecnología (CONACYT). No obligatorio para las instituciones de salud.

(7) Indicar el nombre de la calle, número oficial y colonia, en donde se encuentra ubicado el Establecimiento al que pertenece el Comité.

(8) Indicar la Delegación o Municipio en donde se encuentra ubicado el Establecimiento al que pertenece el Comité.

(9) Señalar la Ciudad en donde se encuentra ubicado el Establecimiento al que pertenece el Comité.

(10) Indicar la Entidad Federativa en donde se encuentra ubicado el Establecimiento al que pertenece el Comité.

(11) Indicar el Código Postal en donde se encuentra ubicado el Establecimiento al que pertenece el Comité.

(12) Indicar el correo electrónico al que podrán enviarse avisos para el Comité.

(13) Señalar el teléfono con clave lada en el que se podrán dar avisos para el Comité.

(14) Indicar el número de registro otorgado por la Comisión.

(15) Señalar el nombre completo del Presidente del Comité en el orden siguiente: nombre(s), apellido paterno y apellido materno, sin indicar el grado académico.

(16) Indicar el correo electrónico del Presidente del Comité al que podrán enviarse avisos para el Comité.

(17) Señalar el teléfono con clave lada del presidente del Comité, en el que se podrán dar avisos para el Comité.

(18) Señalar el nombre completo de cada uno de los integrantes del Comité en el orden siguiente: nombre(s), apellido paterno y apellido materno, sin hacer referencia a grados académicos.

(19) Asentar el género, debiendo señalar (H) Hombre o (M) Mujer.

(20) Mencionar el cargo que cada uno de los integrantes ocupa al interior del Comité, incluyendo a la representación del núcleo afectado o de los usuarios de los servicios de salud, en cuyo caso de pondrá tal situación. En caso de que sea insuficiente el espacio, se podrá reproducir el formato cuantas veces sea necesario.

(21) Indicar la profesión y el número de Cédula Profesional del integrante del Comité, expedida por la Secretaría de Educación Pública. Se exceptúa el caso de la representación del núcleo afectado o de las personas usuarias de los servicios de salud, en cuyo caso se podrá señalar "NO APLICA".

(22) Marque con una (X) los documentos que se acompañan a la solicitud.

(23) Mencione el lugar en el que se suscribe el documento.

(24) Indique la fecha en la que se suscribe el documento.

(25) Asentar el nombre completo en el orden siguiente: nombre(s), apellido paterno y apellido materno, así como la firma del Director o Titular del Establecimiento solicitante.

Anexo 3
Procedimientos del Comité de Ética en Investigación
Requisitos de las sesiones

Las sesiones del CEI deberán cumplir las siguientes condiciones:

- El CEI deberá sesionar al menos una vez cada dos meses. En aquellas instituciones en las que exista gran actividad en investigación se deberá considerar la posibilidad de sesionar con mayor frecuencia.
- Las fechas programadas serán anunciadas con anticipación a los interesados. El calendario anual deberá darse a conocer en enero.
- El orden del día y los documentos correspondientes a cada sesión, se entregarán cuando menos siete días hábiles antes de la reunión. En el caso de las sesiones extraordinarias, éstos se entregarán con tres días de antelación.
- El mínimo de integrantes requeridos para completar un quórum deberá ser mayor al 50% de los integrantes, entre los cuales deberá estar el presidente.[77]
- El presidente y/o el secretario deben estar presentes como uno de los mínimos requeridos para formar quórum. Sin su presencia no se puede dar inicio a las sesiones del CEI.
- A consideración del CEI, el investigador puede ser invitado a presentar la propuesta o a profundizar en cuestiones específicas del mismo, esta práctica es deseable para abreviar tiempos y optimizar la comunicación entre CEI e investigador.
- Pueden ser invitados a las sesiones o a presentar comentarios por escrito, un representante de la comunidad involucrada en el estudio específico a evaluar, así como los consultores externos quienes deberán apegarse a los criterios de confidencialidad aplicables al resto de los integrantes del CEI.
- Las sesiones extraordinarias serán solicitadas por convocatoria del Presidente del CEI. y a petición expresa, o cuando lo soliciten la mayoría de sus integrantes.
- El CEI podrá sesionar de manera conjunta con el Comité de Investigación para la valoración integral de los protocolos de investigación.
- En los casos que por su naturaleza así se requiera, como en la evaluación de estudios multicéntricos, el CEI podrá sesionar con CEI de otros establecimientos de manera conjunta, para la valoración y dictamen único de estos protocolos.
- En el caso de existir conflicto de interés en alguno de los integrantes del CEI, deberá declararse inhabilitado para esa deliberación en particular y no podrá contarse para completar el quórum. Esta condición deberá enunciarse en las actas correspondientes.
- Las revisiones expeditas no requieren el quórum necesario para las reuniones ordinarias y extraordinarias. Los asuntos de estas reuniones pueden ser revisadas por el presidente y/o el secretario. Las observaciones realizadas en estas revisiones deberán informarse en la siguiente reunión del CEI, para su conocimiento.
- Para los efectos legales y administrativos en las reuniones deben elaborarse minutas, así como establecer, en el reglamento interno del CEI, el procedimiento de aprobación de las mismas, su resguardo y archivo.

77 Excepto las sesiones expeditas

Información y archivos

Los archivos deberán ser resguardados en la oficina del CEI conforme a lo estipulado en la Ley General de Transparencia y Acceso a la Información Pública, en la Ley Federal de Protección de Datos Personales en Posesión de los Particulares, lo que se determine en la normatividad de las Entidades Federativas, así como en las demás disposiciones aplicables en la materia. Una vez transcurrido el periodo establecido, el CEI podrá trasladar la documentación a un lugar destinado para estos fines, bajo resguardo y registrando este acto en la base de datos del CEI.

Toda la documentación y las comunicaciones de un CEI deben fecharse, numerarse y archivarse de acuerdo a los procedimientos escritos. Se requiere una definición del procedimiento de acceso y de recuperación de documentos, expedientes y archivos, especificando las personas autorizadas para tales efectos. Será responsabilidad del presidente en turno del CEI, resguardar los archivos de los protocolos de investigación durante cinco años, a partir de que finalice el protocolo.
En los archivos internos del CEI se deberá incluir:

1. Acta de instalación del CEI.
2. Reglamento del CEI.
3. Manual de Procedimientos del CEI.
4. Guías operacionales, manuales, normas nacionales, normas internacionales, documentos técnicos, textos reglamentarios aplicables.
5. Programación de las sesiones del CEI.
6. Copia de los nombramientos de los integrantes.
7. Lista de identificación y la currícula actualizada de los integrantes del CEI.
8. Protocolos evaluados con toda la documentación analizada.
9. Acta de aprobación, copia de informes de seguimiento, reportes y enmiendas.
10. Informes de las decisiones, actas de aprobación e informes de rechazo y suspensión (ordenadas correlativamente y foliadas por año).
11. Reportes de eventos adversos serios en cada investigación o ensayo clínico.
12. Minutas de las reuniones enumeradas correlativamente por año y copia de todo el material enviado por el solicitante.
13. Informes periódicos sobre el estudio y el informe final, dejando copia en el archivo correspondiente al protocolo donde deberá estar toda la documentación referida al estudio: protocolo en sus distintas versiones, manual del investigador, consentimiento informado, currícula de los investigadores, acta de aprobación o rechazo, informes y correspondencia ordenada por fecha correlativa (es obligación que cada protocolo esté resguardado en un archivo identificado con el título, código, nombre de la institución patrocinadora, nombre del investigador y lugar o centro donde se lleva a cabo la investigación, así como fecha de inicio y de término).
14. Correspondencia recibida, la documentación enviada por los investigadores, la correspondencia intercambiada con ellos y otros actores.
15. Registros de gastos o uso de los recursos recibidos de conformidad con los principios expresados en la presente guía y con los lineamientos de la institución.
16. Correspondencia despachada.

Anexo 4
Carta de aprobación de protocolos por el Comité de Ética en Investigación

Es recomendable que la comunicación de la decisión incluya la siguiente información:

1. El título exacto de la propuesta de investigación revisada.
   - a. Descripción detallada de los documentos evaluados y aprobados en idioma español, citando versión y fecha:[78]
   - b. Nombre completo del investigador principal con la documentación necesaria para corroborar sus credenciales, resumen curricular fechado y firmado de los investigadores.
   - c. Manual del investigador que especifique el idioma y las fechas de las versiones revisadas.
   - d. Formato de solicitud de revisión del investigador principal y el sitio de investigación (razón social o denominación social y dirección del centro en donde se llevará a cabo la investigación).
   - e. Consentimiento informado que especifique el idioma y las fechas de las versiones revisadas.
   - f. Convocatoria (propaganda, anuncios, entre otros) mediante la cual se reclutarán a los voluntarios y todo el material escrito que se proporcionará a los sujetos.
   - g. En caso de que el CEI esté dictaminando un protocolo de un sitio de investigación distinto a la institución a la que pertenece el CEI, deberá incluir los datos del sitio y las autorizaciones correspondientes emitidas por la autoridad sanitaria.
2. Descripción clara del estatus para aprobación de los documentos.
3. Todas las comunicaciones realizadas por el CEI deberán hacerse en papel membretado en el que se indique el establecimiento al que pertenece y el número de registro emitido por la CONBIOÉTICA.
4. En el caso de los protocolos aprobados:
   - a. Título exacto y número de protocolo.
   - b. Nombre del investigador principal.
   - c. Descripción detallada de los documentos aprobados en idioma español, citando versión y fecha (protocolo, consentimiento, material para pacientes).
5. En el caso del Formato de Consentimiento Informado (FCI):
   - a. Todos los FCI aprobados por el CEI tendrán dos fechas: 1. la de aprobación por el CEI; y 2. la del periodo de vigencia establecido por el CEI.
   - b. El CEI deberá establecer en sus procedimientos la forma para la identificación de los FCI aprobados (por ejemplo, un sello). Las cartas aprobadas con el identificador podrán fotocopiarse, asegurando siempre que el identificador se mantenga visible; esto garantiza que sólo los FCI aprobados por el CEI sean utilizados para el consentimiento de los sujetos.
   - c. Vigencia de la aprobación del protocolo (no podrá ser mayor a un año).
6. En los casos en los que el protocolo no esté aprobado (condicionados o rechazados):
   - Explicitar las razones por las cuales se tomó la decisión.
   - Precisar las condiciones necesarias para su aprobación.
   - Emitir comentarios al FCI, en su caso.
   - Especificar los requerimientos del CEI y el procedimiento para una nueva revisión.
   - Especificar las acciones requeridas, en caso de una decisión pendiente de aprobación.

78 U.S. Department of Health and Human Services/ Food and Drug Administration/ Center for Drug Evaluation and Research/Center for Biologics Evaluation and Research (1996) Guidance for Industry E6 Good Clinical Practice: Consolidated Guidance. Disponible en: en http://www.fda.gov/downloads/Drugs/Guidances/ucm073122.pdf

7. Explicitar el no conflicto de interés de los integrantes de CEI.
   - Ningún integrante del CEI presenta conflicto de interés.
   - Señalar los integrantes que no participaron en sesión del CEI por presentar algún conflicto de interés.
8. La fecha y firma del presidente o del secretario del CEI (de acuerdo con lo señalado en el registro).
9. Lista de los participantes en la sesión.[79]

Anexo 5
Consentimiento Informado[80]

Formato de Consentimiento Informado

El formato de consentimiento informado debe reflejar la información proporcionada a los sujetos de investigación,[81] el lenguaje que se emplee a lo largo del documento deberá estar al nivel de un estudiante con nivel de educación primaria. El formato comprende dos secciones, la primera en la que se proporciona la información del estudio, y la segunda, en la que el participante acepta participar al firmar el formato junto con dos testigos.

Primera parte. Información

1. En este documento se informará al participante de la investigación sobre el carácter voluntario de su participación.
2. Información sobre qué es una investigación.
3. El objetivo o propósito del estudio.
4. El /los tratamientos del estudio.

79 Es importante transparentar las actividades de los CEI si es necesario indicar que integrantes de los CEI participaron en el dictamen de los protocolos. Aun cuando no es indispensable, se puede mencionar cargo, representación, género y grado académico de los participantes en la reunión de CEI, por ejemplo: Presidente- Representante Científico-Masculino–Medico, Doctor en Ciencias; Vocal Secretario-Femenino– Abogada, Maestra en Bioética; Vocal, -Femenina-Licenciada en Enfermería; Vocal, Masculino–Antropólogo; Representante de los usuarios de servicios de salud, Femenina, secretaria; Consultor externo, Masculino- Médico Psiquiatra.

5. La forma y probabilidad de asignación a cada tratamiento, en caso de que sean estudios comparativos.
6. Los procedimientos que se llevarán a cabo.
7. Los riesgos o molestias y aspectos experimentales del estudio.
8. Los beneficios esperados; si no hubieran beneficios directos para el paciente se debe de especificar este aspecto.
9. Las alternativas de tratamiento.
10. Los compromisos del investigador.
11. Los compromisos que asume el sujeto de investigación.
12. La gratuidad de todos los fármacos, productos y los procedimientos.
13. El tratamiento médico que se proporcionará en caso de daños derivados o lesión relacionada con el estudio.
14. Debe hacerse constar que la participación es voluntaria, puede rehusarse a participar o retirarse del estudio en cualquier momento, sin necesidad de expresar las razones de su decisión o sin pérdida de los beneficios a los que tiene derecho.
15. El permiso para acceder en forma directa a los registros de la investigación.
16. Se deberán incluir los nombres de monitores, auditores y proporcionarlos al CEI y a la autoridad sanitaria competente, señalando sus alcances, respetando la confidencialidad de la persona.
17. Información acerca de que los datos de identificación se mantendrán en forma confidencial asegurando que si los resultados del estudio se publican, la identidad se mantendrá en forma confidencial y resguardada.
18. Las circunstancias por las cuales se puede dar por terminado el estudio.
19. La duración del estudio.
20. El número aproximado de participantes en la investigación.
21. Nombres y datos de contacto del investigador principal y el presidente del CEI. Se deberá firmar el formato por el sujeto o su representante y dos testigos, se entregará un duplicado de la hoja informativa, así como la hoja de firmas.

Segunda Parte. Carta de Consentimiento Informado
Ejemplo

Título de la Investigación

Esta sección puede ser redactada en primera persona. Deberá incluir una breve explicación acerca de la investigación.

He sido invitado a participar en una investigación para_____ .Me han informado que los riesgos_____ .También, me han informado que recibiré de forma gratuita el medicamento_____.

Mi médico me dio una explicación clara y leí la información sobre la investigación, tuve oportunidad de hacer preguntas y mis dudas han sido resueltas. Acepto voluntariamente participar en este estudio y entiendo que tengo derecho a retirarme de la investigación, sin perder mis derechos como paciente de este hospital.

Nombre del participante_____
Dirección_____ Teléfono _____
Firma del Participante _____Fecha Día/mes/año

Nombre del Testigo _____ Parentesco _____
Dirección_____ Teléfono _____
Firma del Testigo _____ Fecha Día/mes/año

Nombre del Testigo _____ Parentesco _____
Dirección_____ Teléfono _____
Firma del Testigo _____ Fecha Día/mes/año

Nombre y firma de quien solicitó el Consentimiento_____

Aspectos a considerar

1. Debe asegurarse que no exista influencia indebida o coerción (una influencia indebida en la población mexicana que asiste a las instituciones públicas podría consistir en mencionar que al participar en el estudio recibirá mejor atención o se reclasificará el nivel socioeconómico).
2. La información deberá actualizarse y revisarse cuando surjan datos que puedan ser relevantes para el consentimiento del sujeto y deberá ser aprobado por el CEI.
3. Debe verificarse la comprensión de la información y contar con el tiempo suficiente para resolver dudas.
4. Si la persona o su representante legal no pueden leer, deberán participar al menos dos testigos que puedan hacerlo.

5. En el caso de estudios en los que participen menores de edad o disminución en la capacidad intelectual, la persona deberá ser informada sobre el estudio, y deberá firmar un asentimiento.

Consentimiento Informado en poblaciones especiales

Población en situación de vulnerabilidad

La vulnerabilidad puede definirse como la presencia de ciertas situaciones en las que individuos y/o grupos se encuentran disminuidos en su autonomía debido a la imposición de estructuras sociales, políticas y/o económicas que los excluyen del acceso a mecanismos e instancias decisivas para su calidad de vida.[82] Tradicionalmente se ha reconocido vulnerabilidad en la condición de ser menor de edad, mujer, una persona con discapacidad, adulto mayor, padecer alguna enfermedad mental, ser inmigrante, analfabeta, pertenecer a minorías étnicas o raciales, desempleado, no tener hogar, estar recluso.

Sin embargo, un individuo o grupo nunca será vulnerable per se, por lo que es preferible hablar de situación de vulnerabilidad debido a que una de las características de ésta es su condición dinámica y relacional, depende de un espacio y tiempo definidos.

De acuerdo con el Informe Belmont, "El respeto por las personas incorpora por lo menos dos convicciones éticas: la primera es que los individuos deben ser tratados como agentes autónomos y la segunda es que las personas con autonomía disminuida tienen derecho a ser protegidas".
Al revisar las investigaciones en las que participan las poblaciones vulnerables, los CEI deberán garantizar que se implementen mecanismos de seguridad adicionales para minimizar los riesgos específicos para cada grupo.

Niños

La participación de menores en una investigación deberá siempre tener un beneficio directo en el menor o será el único tratamiento disponible para el tratamiento de su enfermedad. También deberá asegurarse de que los resultados de la investigación que se pretende llevar a cabo en niños no podrían obtenerse con la participación de adultos.

- El uso de placebos debe estar científicamente justificado y no deben ser utilizados en substitución de tratamientos efectivos.
- El asentimiento deberá estar firmado por los padres o el representante legal. Adicionalmente, los niños que puedan comprender la investigación propuesta, deben ser informados sobre la investigación, expresar sus dudas. Se debe considerar la firma de asentimiento en menores de 7 a18 años. El asentimiento no reemplaza el consentimiento de los padres.[83]
- En el texto del asentimiento se debe asegurar que la información proporcionada es apropiada para la comprensión de los niños.
- Cuando dos personas ejerzan la patria potestad de un menor, sólo será admisible el consentimiento de una de ellas si existe imposibilidad fehaciente o manifiesta de la otra para proporcionarlo o en caso de riesgo inminentes para la salud o la vida del menor o incapaz.
- En la investigación en áreas sensibles, por ejemplo, uso de drogas ilegales.

82 *Cfr.* Bayón, M, C, Mier y Terán, M, (2010) Familia y vulnerabilidad en México. Realidades y percepciones. Cuaderno de Investigación, No. 42. México: Instituto de Investigaciones Sociales-UNAM.
83 *Cfr.* The Process of Obtaining Informed Consent. World Health Organization. http://www.who.int/rpc/research_ethics/Process_seeking_IF_printing.pdf

- Sexualidad en adolescentes, abuso sexual, el CEI debe asegurase que el investigador tiene establecidas estrategias adecuadas para proteger la privacidad y la confidencialidad.
- Cuando la capacidad mental y estado psicológico del menor o incapaz lo permitan, deberá obtenerse, además, su aceptación para ser sujeto de investigación, después de explicarle lo que se pretende hacer. El CEI podrá dispensar el cumplimiento de estos requisitos por causas justificadas.[84]
- Las mismas consideraciones son aplicables cuando se realiza investigación en personas incapaces de decidir.

Personas en situación de cárcel[85]

La investigación en este grupo de personas representa un reto para los CEI ya que por protección a los derechos humanos con frecuencia se evita llevar a cabo investigación en estas personas, sin embargo, existen algunas circunstancias en las que esta población en específico podría ser beneficiada, por ejemplo, en el caso de las investigaciones de tuberculosis multiresistente que es de alta prevalencia en estas circunstancias.

Es conveniente que en la sesión CEI en la que se revisa un protocolo en donde se incluye la participación de personas en situación de cárcel, cuente con un representante con experiencia para para revisar los aspectos éticos de este grupo de individuos. La autonomía de estas se manifiesta en su derecho a decidir si desean o no participar en investigación biomédica.

Los requisitos específicos para el consentimiento informado en estos individuos son:

- Asegurar que los riesgos son equivalentes a los que se aprobarían para cualquier individuo.
- Revisar y asegurar que no existe manipulación de parte de las autoridades u otros prisioneros.
- Evitar que cualquier ventaja durante el encarcelamiento en las condiciones de vida, atención médica, alimentos, etcétera, ejerzan influencia indebida.
- Asegurar que no existen ventajas para alcanzar libertad provisional al participar en la investigación.

Mujeres embarazadas y fetos[17]

La investigación en mujeres embarazadas y fetos solamente estará permitida si ésta representa una oportunidad para entender, prevenir o aliviar alguna patología grave.

- Las mujeres embarazadas no deberán ser excluidas de las investigaciones si los riesgos para el feto son mínimos, el consentimiento informado deberá mencionar el posible riesgo para el feto.
- Para el uso de materiales biológicos derivados de abortos el consentimiento informado deberá ser independiente del que se otorgue para realizar el aborto y no deberá incluir una compensación económica.[37]

17 *Cfr.* Reglamento de la Ley General de Salud en Materia de Investigación para la Salud, Última reforma publicada en el Diario Oficial de la Federación el 02 de abril de 2014. http://biblio.juridicas.unam.mx/libros/5/2292/63.pdf

37 U.S. Department of Health and Human Services (2009) Code of Federal Regulations Title 45 Public Welfare Department of Health And Human Services, Part 46 Protection of Human. Disponible en: http://www.hhs.gov/ohrp/humansubjects/guidance/45cfr46.html

84 *Cfr.* Requisitos establecidos en el Reglamento de la Ley General de Salud en Materia de Investigación y demás disposiciones contenidas en el CAPITULO III De la Investigación en Menores de Edad o Incapaces Artículos 34-39

85 *Cfr.* Committee on Ethical Considerations for Revisions to DHHS Regulations for Protection of Prisoners Involved in Research/ Board on Health Sciences Policy/ Institute of Medicine (2007) Considerations FOR Research Involving Prisoners. Washington, D.C.: The National Academies Press. Disponible en: http://www.nap.edu/catalog/11692/ethical-considerations-for-research-involving-prisoners Ethical Considerations for Research Involving Prisoners. Disponible en https://rgs.usu.edu/irb/investigator-handbook/chapter-7-research-involving-vulnerable-populations

- Para realizar investigaciones en mujeres embarazadas, durante el trabajo de parto, puerperio y lactancia, en nacimientos vivos o muertos, en la utilización de embriones, óbitos o fetos y para la fertilización asistida, se requiere obtener la carta de consentimiento informado de la mujer y de su cónyuge o concubinario, previa información de los riesgos posibles para el embrión, feto o recién nacido en su caso.
- El consentimiento del cónyuge o concubinario sólo podrá dispensarse en caso de incapacidad o imposibilidad fehaciente o manifiesta para proporcionarlo, porque el concubinario no se haga cargo de la mujer, o bien, cuando exista riesgo inminente para la salud o la vida de la mujer, embrión, feto o recién nacido.[86]
- Sólo con la autorización del CEI podrá modificarse el método para terminar el embarazo con propósitos de investigación, cuando tales modificaciones signifiquen un riesgo mínimo para la salud de la madre y no representen riesgo alguno para la sobrevivencia del feto, y en todo caso queda estrictamente prohibido otorgar estímulos monetarios o de otro tipo para interrumpir el embarazo, por el interés de la investigación o por otras razones.[87]

Subordinados y estudiantes

Son grupos subordinados los siguientes: estudiantes, trabajadores de laboratorios y hospitales, empleados, miembros de las fuerzas armadas, internos en reclusorios o centros de readaptación social y otros grupos especiales de la población, en los que el consentimiento informado pueda ser influenciado por alguna autoridad.[88]

- El investigador principal debe definir claramente las razones por las que planea reclutar empleados o estudiantes; además, todas las estrategias de reclutamiento deben ser estipuladas.
- Es un requisito para la aprobación del protocolo, una declaración por escrito del jefe inmediato o la autoridad correspondiente de que no ha existido coacción.
- Si médicos residentes o socios son reclutados para la investigación, el director del programa deberá proporcionar al CEI una carta de apoyo, este escrito debe provenir de una figura sin lazos con el estudio (por ejemplo: si el Director del programa realiza una investigación en los residentes, la carta debe provenir del Director del departamento o de la autoridad a cargo del programa académico).
- Es importante considerar para el grupo de subordinados y estudiantes la cuestión de confidencialidad de los datos de investigación, dependiendo de la naturaleza del estudio y de la información recolectada. Una violación a la confidencialidad puede afectar las posibilidades de empleo de la persona, su desarrollo profesional, planes de estudio o relaciones sociales dentro de la comunidad escolar o del hospital. El CEI pondrá especial atención a los planes del Investigador principal para salvaguardar la seguridad de los datos.

Actualización del consentimiento

En ciertas circunstancias puede ser necesario que los sujetos vuelvan a dar su consentimiento para participar en un estudio, por lo que el CEI determinará en qué casos es necesario solicitarlo nuevamente, de acuerdo con el seguimiento de la investigación.

86 Requisitos establecidos en el Artículo 43 del Reglamento de la Ley General de Salud en Materia de Investigación. Última reforma DOF 02-04-2014

87 *Cfr.* Requisitos establecidos en el Artículo 43 del Reglamento de la Ley General de Salud en Materia de Investigación. Última reforma DOF 02-04-2014

88 *Cfr.* Requisitos establecidos en el Artículo 58 del Reglamento de la Ley General de Salud en Materia de Investigación para la Salud Secretaría General Secretaría de Servicios Parlamentarios Última Reforma DOF 02-04-2014

El CEI puede pedir que un sujeto vuelva a dar su consentimiento si el sujeto participa en un estudio longitudinal. Si el estudio es particularmente largo, puede ser que la persona vuelva a dar su consentimiento para garantizar que entiende las actividades de investigación relevantes. Los investigadores deben presentar un plan para mantener el consentimiento informado cuando someten protocolos a los que se les dará seguimiento por largo tiempo.

Si se hacen enmiendas al protocolo, se presentan Eventos Adversos Serios (EAS) o se descubre nueva información relevante para que el sujeto siga participando, los investigadores deben definir si es necesario volver a dar el consentimiento.

Anexo 6
Formato de declaración de no conflicto de interés

Existe conflicto de interés potencial o verdadero cuando los compromisos y obligaciones principales están indebidamente influenciadas por otros intereses materiales o personales, especialmente si estos no están debidamente transparentados.

En este formato deberá indicar si usted considera que existe un interés secundario que pudiera influir indebidamente en su responsabilidad de proteger a los sujetos de investigación.

Se le pide que responda a las preguntas concernientes a usted y a sus "familiares directos".[89] Este formato pretende identificar y abordar los conflictos de intereses, existentes y potenciales. Se incluyen cuatro preguntas.

1. Tengo algún conflicto de interés que reportar	Si	No
Tengo los siguientes conflictos que declarar:		
2. Relación comercial o económica directa con el patrocinador	Si	No
3. Relación profesional directa con el patrocinador	Si	No
4. Cualquier otra cosa que pudiera afectar su objetividad o independencia en el desempeño de sus funciones	Si	No

Si usted contestó afirmativamente a cualquiera de las preguntas formuladas arriba, por favor proporcione los detalles:

_____

_____

_____

_____

Declaro bajo protesta de decir verdad que la información señalada es correcta.

Fecha y Firma del Investigador

89 A efectos de este formulario, "familiares directos" son: (i) su cónyuge o pareja de hecho; y (ii) sus hijos.

Glosario

Asentimiento Informado
Documento que señala la voluntad de cooperación del niño(a) para participar en un estudio clínico.

Asignación Aleatoria
Proceso de asignación de los sujetos de un estudio a los grupos de tratamiento o de control, utilizando el azar.

Atención médica
Conjunto de servicios que se proporcionan al individuo con el fin de promover, proteger y restaurar su salud.

Bienestar
Integridad física y mental de los sujetos que participan en un estudio clínico.

Buena Práctica Clínica (BPC)
Estándar para el diseño, conducción, realización, monitoreo, auditoría, registro, análisis y reporte de estudios clínicos que proporciona una garantía de que los datos y los resultados reportados son creíbles y precisos y de que están protegidos los derechos, integridad y confidencialidad de los sujetos del estudio.

Carta de consentimiento informado
Documento escrito, signado por el investigador principal, el paciente o su familiar, tutor o representante legal y dos testigos, mediante el cual el sujeto de investigación acepta participar voluntariamente en una investigación y que le sea aplicada una maniobra experimental, una vez que ha recibido la información suficiente, oportuna, clara y veraz sobre los riesgos y beneficios esperados. Deberán indicarse los nombres de los testigos, su dirección y la relación que tienen con el sujeto de investigación.

Confidencialidad
No revelar a otros –a menos que sea personal autorizado- la información o identidad de un sujeto.

Estudio clínico o ensayo clínico controlado
Cualquier investigación que se lleva a cabo en humanos con el objetivo de descubrir o verificar los efectos clínicos, farmacológicos y/o farmacodinámicos de un producto en investigación y/o identificar cualquier reacción adversa de un producto en investigación y/o estudiar la absorción, distribución, metabolismo y excreción, con el objetivo de evaluar la eficacia y la seguridad de un medicamento de investigación. Los términos de estudio clínico y ensayo clínico son sinónimos.

Estudios clínicos Fase 0
Estudios exploratorios sin fines terapéuticos o diagnósticos.

Estudios clínicos Fase I
Administración por primera vez de un medicamento de investigación al ser humano sano, sin beneficio diagnóstico o terapéutico, en dosis únicas o múltiples, en grupos pequeños hospitalizados, para establecer parámetros farmacológicos iniciales en el ser humano.[90]

90 Casi nunca tiene el diseño de ensayo clínico

Estudios clínicos Fase II
Administración de un medicamento de investigación en sujetos enfermos, en dosis únicas o múltiples, en grupos pequeños hospitalizados, para determinar su eficacia inicial y otros parámetros farmacológicos en el organismo enfermo.[91]

Estudios clínicos Fase III
Administración de un medicamento de investigación a grupos grandes de sujetos (generalmente externos), para definir su utilidad terapéutica e identificar reacciones adversas, interacciones y factores externos que puedan alterar el efecto farmacológico generalizado y prolongado.[92]

Estudios clínicos Fase IV
Estudios que se realizan después de que se concede al medicamento registro y autorización de nueva información sobre la seguridad de medicamento durante su empleo generalizado y prolongado. Estos estudios se clasifican como: de intervención y de no intervención.[93]

Estudios clínicos fase IV (de intervención)
Cuando además de nueva información sobre la seguridad del medicamento, se busquen nuevas indicaciones, rutas de administración, tratamientos, combinaciones terapéuticas, y/o dosis.

Estudios de fase IV (de no intervención)
Estudios observacionales, realizados durante el uso regular del medicamento, para determinar la asociación entre efectos y factores causales y/o vigilar su perfil de seguridad, de acuerdo con las condiciones de autorización del mismo.

Estudios de post comercialización temprana
Aquellos que, a solicitud de la autoridad, se realizan en los primeros 2 o 3 años de comercialización de todas las moléculas nuevas, para seguimiento del perfil de la seguridad e incluyen aquellas actividades encaminadas a identificar y caracterizar los riesgos potenciales de los medicamentos a través de una vigilancia activa.

Estudios de farmacovigilancia intensiva
Método de la farmacovigilancia que consiste en obtener información de las sospechas de reacciones a medicamentos de manera sistemática, de calidad y completa, caracterizada por su alta calidad y fiabilidad; especialmente cuando se hace necesario determinar la frecuencia de reacciones adversas, identificar factores predisponentes y patrones de uso de medicamentos, entre otros.

Evento adverso
Conjunto de signos y síntomas no calculados e inesperados que se presentan en un sujeto de investigación, como consecuencia de la aplicación de maniobras experimentales previstas en un protocolo o proyecto de investigación para la salud en seres humanos y que potencialmente representen un riesgo para su salud.

91 Frecuentemente no tiene el diseño de ensayo clínico controlado
92 Esta fase es la que siempre tiene diseño de ensayo clínico controlado
93 Rara vez tienen diseño de ensayo clínico controlado

Enmienda
Cualquier cambio a un documento que forma parte del proyecto o protocolo de investigación, derivado de variaciones a la estructura metodológica, sustitución del investigador principal o ante la identificación de riesgos en los sujetos de investigación. Los documentos susceptibles de enmienda son: proyecto o protocolo, carta de consentimiento informado, manual del investigador, documentos para el paciente, escalas de medición y cronograma.

Informe anual de actividades
Es el documento que contiene información acerca de las actividades desarrolladas por el comité de ética en investigación durante el ejercicio fiscal anterior al año que se presenta. Es entregado tanto al titular del establecimiento como a la CONBIOÉTICA.

Institución o establecimiento
Donde se realiza investigación para la salud, a todo aquel donde se proporcionen servicios de atención médica, perteneciente a los sectores público, social o privado, cualquiera que sea su denominación, que pueda efectuar actividades preventivas, diagnósticas, terapéuticas y de rehabilitación, por si misma o subrogadas, dirigidas a mantener o reintegrar el estado de salud de las personas y efectuar actividades de formación y desarrollo de personal para la salud, así como de investigación.

Investigación para la salud en seres humanos
En la que el ser humano es el sujeto de investigación y que se desarrolla con el único propósito de realizar aportaciones científicas y tecnológicas, para obtener nuevos conocimientos en materia de salud.

Investigador principal
Profesional de la salud, responsable de conducir, coordinar y vigilar el desarrollo de dicha investigación.

Maniobra experimental
Empleo de medicamentos o materiales, respecto de los cuales aún no se tenga evidencia científica suficiente de su eficiencia terapéutica o rehabilitatoria o se pretenda la modificación de las indicaciones terapéuticas de productos ya conocidos, en un sujeto de investigación, con la finalidad de obtener información científica respecto de la eficacia de su uso con fines preventivos, diagnósticos, terapéuticos o rehabilitatorios.

Medicamentos o materiales
Principios farmacológicos, químicos, biológicos, materiales y dispositivos médicos, utilizados o aplicados en seres humanos con fines de investigación científica, respecto de los cuales no se tenga evidencia científica suficiente para probar su eficacia preventiva, terapéutica o rehabilitatoria.

Monitoreo
Acto de vigilar el proceso de un estudio clínico y asegurarse de que éste sea conducido, registrado y reportado de acuerdo con el protocolo, Procedimientos Estándar de Operación (PEOs), la Buena Práctica Clínica (BPC) y los requerimientos regulatorios aplicables.

Núcleo afectado
Se refiere al grupo de personas quienes cursan con la patología o con las características señaladas en la investigación.

Organización de Investigación por Contrato (Contract Research Organizations) (CRO)
Persona u organización comercial, académica o de otro tipo) contratada por el patrocinador para realizar una o más de las labores y funciones del patrocinador relacionadas con el estudio.

Patrocinador
Persona física o moral que acepta responsabilidades para financiar una investigación.

Placebo
Substancia inerte, físicamente indistinguible del medicamento en estudio.

Procedimiento invasivo
Aquel que se vale de una o varias técnicas médicas que invaden el cuerpo, con un fin diagnóstico o terapéutico.

Proyecto o protocolo de investigación para la salud en seres humanos
Documento que describe la propuesta de una investigación para la salud en seres humanos, conforme al objetivo y campo de aplicación de esta norma, integrado al menos por los capítulos de: planeación, programación, organización y presupuestación estructurado de manera metodológica y sistematizada en sus diferentes fases de trabajo, que se realizarán bajo la responsabilidad, conducción y supervisión de un investigador principal.

Sitios de investigación o sitios
Cualquier establecimiento pública o privada, o instalación médica donde se conducen los estudios clínicos.

Sujeto de investigación
Individuo que otorga su consentimiento informado, por sí mismo o por conducto de su representante legal, para que en su persona sean practicados determinados procedimientos con fines de investigación para la salud en seres humanos.

UNESCO
Organización de las Naciones Unidas para la Educación, la Ciencia y la Cultura.

LEY DE BIOSEGURIDAD DE ORGANISMOS GENÉTICAMENTE MODIFICADOS

Nueva Ley publicada en el Diario Oficial de la Federación el 18 de marzo de 2005

TEXTO VIGENTE
Última reforma publicada DOF 11-05-2022

Al margen un sello con el Escudo Nacional, que dice: Estados Unidos Mexicanos.- Presidencia de la República.

VICENTE FOX QUESADA, Presidente de los Estados Unidos Mexicanos, a sus habitantes sabed:

Que el Honorable Congreso de la Unión, se ha servido dirigirme el siguiente

DECRETO

"EL CONGRESO DE LOS ESTADOS UNIDOS MEXICANOS, DECRETA:

SE EXPIDE LA LEY DE BIOSEGURIDAD DE ORGANISMOS GENÉTICAMENTE MODIFICADOS.

ARTÍCULO ÚNICO: Se expide la Ley de Bioseguridad de Organismos Genéticamente Modificados, para quedar como sigue:

LEY DE BIOSEGURIDAD DE ORGANISMOS GENÉTICAMENTE MODIFICADOS

TÍTULO PRIMERO
Disposiciones Generales

CAPÍTULO I
Objeto y Finalidades

ARTÍCULO 1.- La presente Ley es de orden público y de interés social, y tiene por objeto regular las actividades de utilización confinada, liberación experimental, liberación en programa piloto, liberación comercial, comercialización, importación y exportación de organismos genéticamente modificados, con el fin de prevenir, evitar o reducir los posibles riesgos que estas actividades pudieran ocasionar a la salud humana o al medio ambiente y a la diversidad biológica o a la sanidad animal, vegetal y acuícola.

ARTÍCULO 2.- Para cumplir su objeto, este ordenamiento tiene como finalidades:

I. Garantizar un nivel adecuado y eficiente de protección de la salud humana, del medio ambiente y la diversidad biológica y de la sanidad animal, vegetal y acuícola, respecto de los efectos adversos que pudiera causarles la realización de actividades con organismos genéticamente modificados;

II. Definir los principios y la política nacional en materia de bioseguridad de los OGMs y los instrumentos para su aplicación;

III. Determinar las competencias de las diversas dependencias de la Administración Pública Federal en materia de bioseguridad de los OGMs;

IV. Establecer las bases para la celebración de convenios o acuerdos de coordinación entre la Federación, por conducto de las Secretarías competentes y los gobiernos de las entidades federativas, para el mejor cumplimiento del objeto de esta Ley;

V. Establecer las bases para el funcionamiento de la Comisión Intersecretarial de Bioseguridad de los Organismos Genéticamente Modificados, a través de la cual las Secretarías que la integran deban colaborar de manera coordinada, en el ámbito de sus competencias, en lo relativo a la bioseguridad de los organismos genéticamente modificados;

VI. Establecer procedimientos administrativos y criterios para la evaluación y el monitoreo de los posibles riesgos que puedan ocasionar las actividades con organismos genéticamente modificados en la salud humana o en el medio ambiente y la diversidad biológica o en la sanidad animal, vegetal o acuícola;

VII. Establecer el régimen de permisos para la realización de actividades de liberación experimental, de liberación en programa piloto y de liberación comercial, de organismos genéticamente modificados, incluyendo la importación de esos organismos para llevar a cabo dichas actividades;

VIII. Establecer el régimen de avisos para la realización de actividades de utilización confinada de organismos genéticamente modificados, en los casos a que se refiere esta Ley;

IX. Establecer el régimen de las autorizaciones de la Secretaría de Salud de organismos genéticamente modificados que se determinan en esta Ley;

X. Crear y desarrollar el Sistema Nacional de Información sobre Bioseguridad y el Registro Nacional de Bioseguridad de los Organismos Genéticamente Modificados;

XI. Determinar las bases para el establecimiento caso por caso de áreas geográficas libres de OGMs en las que se prohíba y aquellas en las que se restrinja la realización de actividades con determinados organismos genéticamente modificados, así como de cultivos de los cuales México sea centro de origen, en especial del maíz, que mantendrá un régimen de protección especial;

XII. Establecer las bases del contenido de las normas oficiales mexicanas en materia de bioseguridad;

XIII. Establecer medidas de control para garantizar la bioseguridad, así como las sanciones correspondientes en los casos de incumplimiento o violación a las disposiciones de esta Ley, sus reglamentos y las normas oficiales mexicanas que deriven de la misma;

XIV. Establecer mecanismos para la participación pública en aspectos de bioseguridad materia de esta Ley, incluyendo el acceso a la información, la participación de los sectores privado, social y productivo a través del Consejo Consultivo Mixto de la CIBIOGEM, y la consulta pública sobre solicitudes de liberación de OGMs al ambiente, y

XV. Establecer instrumentos de fomento a la investigación científica y tecnológica en bioseguridad y biotecnología.

ARTÍCULO 3.- Para los efectos de esta Ley, se entiende por:

I. Accidente: La liberación involuntaria de organismos genéticamente modificados durante su utilización y que pueda suponer, con base en criterios técnicos, posibles riesgos para la salud humana o para el medio ambiente y la diversidad biológica.

II. Actividades: La utilización confinada, la liberación experimental, la liberación en programa piloto, la liberación comercial, la comercialización, la importación y la exportación de organismos genéticamente modificados, conforme a esta Ley.

III. Autorización: Es el acto administrativo mediante el cual la Secretaría de Salud, en el ámbito de su competencia conforme a esta Ley, autoriza organismos genéticamente modificados determinados expresamente en este ordenamiento, a efecto de que se pueda realizar su comercialización e importación para su comercialización, así como su utilización con finalidades de salud pública o de biorremediación.

IV. Biorremediación: El proceso en el que se utilizan microorganismos genéticamente modificados para la degradación o desintegración de contaminantes que afecten recursos y/o elementos naturales, a efecto de convertirlos en componentes más sencillos y menos dañinos o no dañinos al ambiente.

V. Bioseguridad: Las acciones y medidas de evaluación, monitoreo, control y prevención que se deben asumir en la realización de actividades con organismos genéticamente modificados, con el objeto de prevenir, evitar o reducir los posibles riesgos que dichas actividades pudieran ocasionar a la salud humana o al medio ambiente y la diversidad biológica, incluyendo los aspectos de inocuidad de dichos organismos que se destinen para uso o consumo humano.

VI. Biotecnología moderna: Se entiende la aplicación de técnicas in vitro de ácido nucleico, incluidos el ácido desoxirribonucleico (ADN y ARN) recombinante y la inyección directa de ácido nucleico en células u organelos, o la fusión de células más allá de la familia taxonómica, que supera las barreras fisiológicas naturales de la reproducción o de la recombinación y que no son técnicas utilizadas en la reproducción y selección tradicional, que se aplican para dar origen a organismos genéticamente modificados, que se determinen en las normas oficiales mexicanas que deriven de esta Ley.

VII. Caso por caso: La evaluación individual de los organismos genéticamente modificados, sustentada en la evidencia científica y técnica disponible, considerando, entre otros aspectos, el organismo receptor, el área de liberación y las características de la modificación genética, así como los antecedentes que existan sobre la realización de actividades con el organismo de que se trate y los beneficios comparados con opciones tecnológicas alternas para contender con la problemática específica.

VIII. Centro de origen: Es aquella área geográfica del territorio nacional en donde se llevó a cabo el proceso de domesticación de una especie determinada.

IX. Centro de diversidad genética: Es aquella área geográfica del territorio nacional donde existe diversidad morfológica, genética o ambas de determinadas especies, que se caracteriza por albergar poblaciones de los parientes silvestres y que constituye una reserva genética.

X. Comercialización: Es la introducción al mercado para distribución y consumo de organismos genéticamente modificados en calidad de productos o mercancías, sin propósitos de liberación intencional al medio ambiente y con independencia del ánimo de lucro y del título jurídico bajo el cual se realice.

XI. CIBIOGEM: La Comisión Intersecretarial de Bioseguridad de los Organismos Genéticamente Modificados.

XII. CONACyT: El Consejo Nacional de Ciencia y Tecnología.

XIII. Diversidad biológica: La variabilidad de organismos vivos de cualquier fuente, incluidos, entre otras cosas, los ecosistemas terrestres y marinos y otros ecosistemas acuáticos y los complejos

ecológicos de los que forman parte; comprende la diversidad dentro de cada especie, entre las especies y de los ecosistemas.

XIV. Inocuidad: La evaluación sanitaria de los organismos genéticamente modificados que sean para uso o consumo humano o para procesamiento de alimentos para consumo humano, cuya finalidad es garantizar que dichos organismos no causen riesgos o daños a la salud de la población.

XV. Liberación: La introducción en el medio ambiente de un organismo o combinación de organismos genéticamente modificados, sin que hayan sido adoptadas medidas de contención, tales como barreras físicas o una combinación de éstas con barreras químicas o biológicas, para limitar su contacto con la población y el medio ambiente.

XVI. Liberación comercial: Es la introducción, intencional y permitida en el medio ambiente, de un organismo o combinación de organismos genéticamente modificados, sin que hayan sido adoptadas medidas de contención, tales como barreras físicas o una combinación de éstas con barreras químicas o biológicas, para limitar su contacto con la población y el medio ambiente, que se realiza con fines comerciales, de producción, de biorremediación, industriales y cualesquiera otros distintos de la liberación experimental y de la liberación en programa piloto, en los términos y condiciones que contenga el permiso respectivo.

XVII. Liberación experimental: Es la introducción, intencional y permitida en el medio ambiente, de un organismo o combinación de organismos genéticamente modificados, siempre que hayan sido adoptadas medidas de contención, tales como barreras físicas o una combinación de éstas con barreras químicas o biológicas, para limitar su contacto con la población y el medio ambiente, exclusivamente para fines experimentales, en los términos y condiciones que contenga el permiso respectivo.

XVIII. Liberación en programa piloto: Es la introducción, intencional y permitida en el medio ambiente, de un organismo o combinación de organismos genéticamente modificados, con o sin medidas de contención, tales como barreras físicas o una combinación de éstas con barreras químicas o biológicas, para limitar su contacto con la población y el medio ambiente, que constituye la etapa previa a la liberación comercial de dicho organismo, dentro de las zonas autorizadas y en los términos y condiciones contenidos en el permiso respectivo.

XIX. Medio Ambiente: El conjunto de elementos naturales y artificiales o inducidos por el hombre que hacen posible la existencia y desarrollo de los seres humanos y demás organismos vivos que interactúan en un espacio y tiempo determinados, fuera del área de las instalaciones o del ámbito de la utilización confinada de organismos genéticamente modificados.

XX. Organismo: Cualquier entidad biológica viva capaz de reproducirse o de transferir o replicar material genético, quedando comprendidos en este concepto los organismos estériles, los microorganismos, los virus y los viroides, sean o no celulares. Los seres humanos no deben ser considerados organismos para los efectos de esta Ley.

XXI. Organismo genéticamente modificado: Cualquier organismo vivo, con excepción de los seres humanos, que ha adquirido una combinación genética novedosa, generada a través del uso específico de técnicas de la biotecnología moderna que se define en esta Ley, siempre que se utilicen técnicas que se establezcan en esta Ley o en las normas oficiales mexicanas que deriven de la misma.

XXII. OGM u OGMs: Organismo u organismos genéticamente modificados.

XXIII. Paso a paso: Enfoque metodológico conforme al cual, todo OGM que esté destinado a ser liberado comercialmente debe ser previamente sometido a pruebas satisfactorias conforme a los estudios de riesgo, la evaluación de riesgos y los reportes de resultados aplicables en la realización de actividades

de liberación experimental y de liberación en programa piloto de dichos organismos, en los términos de esta Ley.

XXIV. Permiso: Es el acto administrativo que le corresponde emitir a la SEMARNAT o a la SAGARPA, en el ámbito de sus respectivas competencias conforme a esta Ley, necesario para la realización de la liberación experimental, la liberación en programa piloto, la liberación comercial y la importación de OGMs para realizar dichas actividades, en los casos y términos establecidos en esta Ley y en las normas oficiales mexicanas que de ella deriven.

XXV. Productos que contengan organismos genéticamente modificados: Son aquellos que contienen algún o algunos organismos genéticamente modificados en su composición para comercialización.

XXVI. Productos derivados: Son aquellos en los que hubieren intervenido organismos genéticamente modificados como insumos en su proceso de producción, incluyendo sus extractos, siempre que no contengan en su composición para su comercialización organismos genéticamente modificados vivos y que, por ello, no tienen la capacidad de transferir o replicar su material genético.

XXVII. Registro: El Registro Nacional de Bioseguridad de los Organismos Genéticamente Modificados.

XXVIII. Residuos: Cualquier material de desecho generado en la utilización confinada de organismos genéticamente modificados, incluidos los propios organismos genéticamente modificados.

XXIX. Secretarías: La Secretaría de Agricultura, Ganadería, Desarrollo Rural, Pesca y Alimentación, la Secretaría de Medio Ambiente y Recursos Naturales y la Secretaría de Salud, respecto de sus respectivos ámbitos de competencia establecidos en esta Ley.

XXX. SAGARPA: La Secretaría de Agricultura, Ganadería, Desarrollo Rural, Pesca y Alimentación.

XXXI. SEMARNAT: La Secretaría de Medio Ambiente y Recursos Naturales.

XXXII. SHCP: La Secretaría de Hacienda y Crédito Público.

XXXIII. SSA: La Secretaría de Salud.

XXXIV. Utilización confinada: Cualquier actividad por la que se modifique el material genético de un organismo o por la que éste, así modificado, se cultive, almacene, emplee, procese, transporte, comercialice, destruya o elimine, siempre que en la realización de tales actividades se utilicen barreras físicas o una combinación de éstas con barreras químicas o biológicas, con el fin de limitar de manera efectiva su contacto con la población y con el medio ambiente. Para los efectos de esta Ley el área de las instalaciones o el ámbito de la utilización confinada no forma parte del medio ambiente.

XXXV. Zonas autorizadas: Las áreas o regiones geográficas que se determinen caso por caso en la resolución de un permiso, en las cuales se pueden liberar al ambiente organismos genéticamente modificados que se hubieren analizado.

XXXVI. Zonas restringidas: Los centros de origen, los centros de diversidad genética y las áreas naturales protegidas, dentro de los cuales se restrinja la realización de actividades con organismos genéticamente modificados, en los términos de esta Ley.

ARTÍCULO 4.- Es materia de esta Ley la bioseguridad de todos los OGMs obtenidos o producidos a través de la aplicación de las técnicas de la biotecnología moderna a que se refiere el presente ordenamiento, que se utilicen con fines agrícolas, pecuarios, acuícolas, forestales, industriales, comerciales, de biorremediación y cualquier otro, con las excepciones que establece esta Ley.

ARTÍCULO 5.- También es materia de esta Ley la autorización de los OGMs que se destinen a su uso o consumo humano o al procesamiento de alimentos para consumo humano, para poder realizar su comercialización e importación para su comercialización. Asimismo es materia de este ordenamiento la autorización de OGMs, distintos de los anteriores, que se destinen a una finalidad de salud pública o a la biorremediación.

ARTÍCULO 6.- Quedan excluidos del ámbito de aplicación de esta Ley:

I. Las actividades de utilización confinada, liberación experimental, liberación en programa piloto y liberación comercial, comercialización, importación y exportación de OGMs, cuando la modificación genética de dichos organismos se obtenga por técnicas de mutagénesis tradicional o de fusión celular, incluida la de protoplastos de células vegetales, en que los organismos resultantes puedan producirse también mediante métodos tradicionales de multiplicación o de cultivo in vivo o in vitro, siempre que estas técnicas no supongan la utilización de organismos genéticamente modificados como organismos receptores o parentales;

II. La utilización de las técnicas de fertilización in vitro, conjugación, transducción, transformación o cualquier otro proceso natural y la inducción poliploide, siempre que no se empleen moléculas de ácido desoxirribonucleico (ADN) recombinante ni de organismos genéticamente modificados;

III. La producción y proceso de medicamentos y fármacos con OGMs generados a partir de procesos confinados cuya regulación corresponde a la Ley General de Salud;

IV. El control sanitario de los productos derivados y los procesos productivos confinados en los que intervengan OGMs autorizados conforme a esta Ley, para uso o consumo humano o animal, los cuales quedan sujetos a las disposiciones de la Ley General de Salud y sus reglamentos aplicables a todos los productos y procesos;

V. El genoma humano, el cultivo de células troncales de seres humanos, la modificación de células germinales humanas y la bioseguridad de hospitales, cuya regulación corresponde a la Ley General de Salud, y a los Tratados Internacionales en los que los Estados Unidos Mexicanos sean parte;

VI. La colecta y el aprovechamiento de recursos biológicos, cuya regulación corresponde a la Ley General del Equilibrio Ecológico y la Protección al Ambiente, a la Ley General de Vida Silvestre, y a los Tratados Internacionales en los que los Estados Unidos Mexicanos sean parte, y

VII. La propiedad intelectual de los productos y procesos biotecnológicos, lo que es materia de la Ley de Propiedad Industrial, de la Ley Federal de Variedades Vegetales y de los Tratados Internacionales en los que los Estados Unidos Mexicanos sean parte.

ARTÍCULO 7.- Las actividades, organismos y productos sujetos al ámbito de esta Ley, no requerirán, en materia de bioseguridad e inocuidad, de otros permisos, autorizaciones, avisos y, en general, requisitos, trámites y restricciones que los establecidos en este ordenamiento.

Se exceptúa de lo dispuesto en el párrafo anterior:

I. Las medidas que en materia de salubridad general corresponda adoptar a la Secretaría de Salud en los términos de la Ley General de Salud y sus reglamentos, salvo en lo relativo a la tramitación y expedición de autorizaciones que regula esta Ley;

II. Las medidas que en materia de sanidad animal, vegetal y acuícola corresponda adoptar a la Secretaría de Agricultura, Ganadería, Desarrollo Rural, Pesca y Alimentación, en los términos de la Ley

Federal de Sanidad Animal, de la Ley Federal de Sanidad Vegetal, de la Ley de Pesca, de la Ley de Desarrollo Rural Sustentable, y de las demás disposiciones aplicables, y

III. Las medidas que en materia ambiental corresponda adoptar a la Secretaría de Medio Ambiente y Recursos Naturales en los términos de la Ley General del Equilibrio Ecológico y la Protección al Ambiente, de la Ley General de Vida Silvestre, de la Ley General de Desarrollo Forestal Sustentable y de otras leyes aplicables en dicha materia, salvo en lo relativo a:

A) La evaluación del impacto ambiental y del estudio de riesgo regulados en la Sección V del Capítulo IV del Título Primero y en el Capítulo V del Título Cuarto, de la Ley General del Equilibrio Ecológico y la Protección al Ambiente, y

B) La tramitación y expedición de permisos y los demás instrumentos de control y monitoreo que regula esta Ley.

ARTÍCULO 8.- A falta de disposición expresa en el presente ordenamiento, se estará a lo establecido en la Ley Federal de Procedimiento Administrativo.

CAPÍTULO II
Principios en Materia de Bioseguridad

ARTÍCULO 9.- Para la formulación y conducción de la política de bioseguridad y la expedición de la reglamentación y de las normas oficiales mexicanas que deriven de esta Ley, se observarán los siguientes principios:

I. La Nación Mexicana es poseedora de una biodiversidad de las más amplias en el mundo, y en su territorio se encuentran áreas que son centro de origen y de diversidad genética de especies y variedades que deben ser protegidas, utilizadas, potenciadas y aprovechadas sustentablemente, por ser un valioso reservorio de riqueza en moléculas y genes para el desarrollo sustentable del país;

II. El Estado tiene la obligación de garantizar el derecho de toda persona a vivir en un medio ambiente adecuado para su alimentación, salud, desarrollo y bienestar;

III. La bioseguridad de los OGMs tiene como objetivo garantizar un nivel adecuado de protección en la esfera de la utilización confinada, la liberación experimental, la liberación en programa piloto, la liberación comercial, la comercialización, la importación y la exportación de dichos organismos resultantes de la biotecnología moderna que puedan tener efectos adversos para la conservación y utilización sustentable del medio ambiente y de la diversidad biológica, así como de la salud humana y de la sanidad animal, vegetal y acuícola;

IV. Con el fin de proteger el medio ambiente y la diversidad biológica, el Estado Mexicano deberá aplicar el enfoque de precaución conforme a sus capacidades, tomando en cuenta los compromisos establecidos en tratados y acuerdos internacionales de los que los Estados Unidos Mexicanos sean parte. Cuando haya peligro de daño grave o irreversible, la falta de certeza científica absoluta no deberá utilizarse como razón para postergar la adopción de medidas eficaces en función de los costos para impedir la degradación del medio ambiente y de la diversidad biológica. Dichas medidas se adoptarán de conformidad con las previsiones y los procedimientos administrativos establecidos en esta Ley;

V. La protección de la salud humana, del medio ambiente y de la diversidad biológica exigen que se preste la atención debida al control y manejo de los posibles riesgos derivados de las actividades con OGMs, mediante una evaluación previa de dichos riesgos y el monitoreo posterior a su liberación;

VI. Los conocimientos, las opiniones y la experiencia de los científicos, particularmente los del país, constituyen un valioso elemento de orientación para que la regulación y administración de las actividades con OGMs se sustenten en estudios y dictámenes científicamente fundamentados, por lo cual debe fomentarse la investigación científica y el desarrollo tecnológico en bioseguridad y en biotecnología;

VII. En la utilización confinada de OGMs con fines de enseñanza, investigación científica y tecnológica, industriales y comerciales, se deberán observar las disposiciones de esta Ley, sus reglamentos y las normas oficiales mexicanas que de ella deriven, así como las normas y principios de prevención que establezcan las propias instituciones, centros o empresas, sean públicos o privados, que realicen dichas actividades;

VIII. Los posibles riesgos que pudieran producir las actividades con OGMs a la salud humana y a la diversidad biológica se evaluarán caso por caso. Dicha evaluación estará sustentada en la mejor evidencia científica y técnica disponible;

IX. La liberación de OGMs en el ambiente debe realizarse "paso a paso" conforme a lo cual, todo OGM que esté destinado a ser liberado comercialmente debe ser previamente sometido a pruebas satisfactorias conforme a los estudios de riesgo, la evaluación de riesgos y los reportes de resultados aplicables en la realización de actividades de liberación experimental y de liberación en programa piloto de dichos organismos, en los términos de esta Ley;

X. Deben ser monitoreados los efectos adversos que la liberación de los OGMs pudieran causar a la diversidad biológica, teniendo también en cuenta los posibles riesgos para la salud humana;

XI. Los procedimientos administrativos para otorgar permisos y autorizaciones para realizar actividades con OGMs, deben ser eficaces y transparentes; en la expedición de los reglamentos y las normas oficiales mexicanas que deriven de esta Ley, se deberán observar los compromisos establecidos en tratados y acuerdos internacionales en los que los Estados Unidos Mexicanos sean parte, de manera que su contenido y alcances sean compatibles con dichos tratados y acuerdos;

XII. Es necesario apoyar el desarrollo tecnológico y la investigación científica sobre organismos genéticamente modificados que puedan contribuir a satisfacer las necesidades de la Nación;

XIII. Para el análisis de soluciones a problemas particulares se evaluarán caso por caso los beneficios y los posibles riesgos del uso de OGMs. Este análisis podrá también incluir la evaluación de los riesgos de las opciones tecnológicas alternas para contender con la problemática específica para la cual el OGM fue diseñado. Dicho análisis comparativo deberá estar sustentado en la evidencia científica y técnica, así como en antecedentes sobre uso, producción y consumo, y podrá ser elemento adicional al estudio de evaluación del riesgo para decidir, de manera casuística, sobre la liberación al medio ambiente del OGM de que se trate;

XIV. Se deberá contar con la capacidad y con la normativa adecuadas para evitar la liberación accidental al medio ambiente de OGMs provenientes de residuos de cualquier tipo de procesos en los que se hayan utilizado dichos organismos;

XV. La aplicación de esta Ley, los procedimientos administrativos y criterios para la evaluación de los posibles riesgos que pudieran generar las actividades que regula esta Ley, los instrumentos de control de dichas actividades, el monitoreo de las mismas, sus reglamentos y las normas oficiales mexicanas que de ella deriven, los procedimientos de inspección y vigilancia para verificar y comprobar el cumplimiento de esta Ley y de las disposiciones que de ella deriven, la implantación de medidas de seguridad y de urgente aplicación, y la aplicación de sanciones por violaciones a los preceptos de esta Ley y las disposiciones que de ella emanen, son la forma en que el Estado Mexicano actúa con precaución, de manera prudente y con bases científicas y técnicas para prevenir, reducir o evitar los posibles riesgos que

las actividades con OGMs pudieran ocasionar a la salud humana o al medio ambiente y la diversidad biológica;

XVI. La bioseguridad de los productos agropecuarios, pesqueros y acuícolas se encuentra estrechamente relacionada con la sanidad vegetal, animal y acuícola, por lo que la política en estas materias deberá comprender los aspectos ambientales, de diversidad biológica, de salud humana y de sanidad vegetal y animal;

XVII. El Estado Mexicano cooperará en la esfera del intercambio de información e investigación sobre los efectos socioeconómicos de los OGMs, especialmente en las comunidades indígenas y locales;

XVIII. El Estado Mexicano garantizará el acceso público a la información en materia de bioseguridad y biotecnología a que se refiere esta Ley, de conformidad con lo establecido en este ordenamiento y en las disposiciones aplicables a la materia de acceso a la información pública gubernamental, y

XIX. La experimentación con OGMs o con cualquier otro organismo para fines de fabricación y/o utilización de armas biológicas queda prohibida en el territorio nacional.

CAPÍTULO III
De las Competencias en Materia de Bioseguridad

ARTÍCULO 10.- Son autoridades competentes en materia de bioseguridad:

I. La SEMARNAT;

II. La SAGARPA, y

III. La SSA.

La SHCP tendrá las facultades que se establecen en esta Ley, en lo relativo a la importación de OGMs y de productos que los contengan.

ARTÍCULO 11.- Corresponde a la SEMARNAT el ejercicio de las siguientes facultades respecto de actividades con todo tipo de OGMs, salvo cuando se trate de OGMs que correspondan a la SAGARPA:

I. Participar en la formulación y aplicar la política general de bioseguridad;

II. Analizar y evaluar caso por caso los posibles riesgos que las actividades con OGMs pudieran ocasionar al medio ambiente y a la diversidad biológica, con base en los estudios de riesgo y los reportes de resultados que elaboren y presenten los interesados, en los términos de esta Ley;

III. Resolver y expedir permisos para la realización de actividades de liberación al ambiente de OGMs, así como establecer y dar seguimiento a las condiciones y medidas a las que se deberán sujetar dichas actividades, conforme a las disposiciones del presente ordenamiento, incluyendo la liberación de OGMs para biorremediación;

IV. Realizar el monitoreo de los efectos que pudiera causar la liberación de OGMs, permitida o accidental, al medio ambiente y a la diversidad biológica, de conformidad con lo que dispongan esta Ley y las normas oficiales mexicanas que de ella deriven;

V. Participar en la elaboración y expedición de las listas a que se refiere esta Ley;

VI. Suspender los efectos de los permisos, cuando disponga de información científica y técnica de la que se deduzca que la actividad permitida supone riesgos superiores a los previstos, que puedan afectar negativamente al medio ambiente, a la diversidad biológica o a la salud humana o la sanidad animal, vegetal o acuícola. Estos dos últimos supuestos, a solicitud expresa de la SAGARPA o de la SSA, según su competencia conforme a esta Ley, con apoyo en elementos técnicos y científicos;

VII. Ordenar y aplicar las medidas de seguridad o de urgente aplicación pertinentes, con bases científicas y técnicas y en el enfoque de precaución, en los términos de esta Ley;

VIII. Inspeccionar y vigilar el cumplimiento de la presente Ley, sus reglamentos y las normas oficiales mexicanas que deriven de la misma;

IX. Imponer sanciones administrativas a las personas que infrinjan los preceptos de esta Ley, sus reglamentos y las normas oficiales mexicanas que de ella deriven, sin perjuicio, en su caso, de las penas que correspondan cuando los actos u omisiones constitutivos de infracciones a este ordenamiento sean también constitutivos de delito, y de la responsabilidad civil y ambiental que pudiera resultar, y

X. Las demás que esta Ley le confiere.

ARTÍCULO 12.- Corresponde a la SAGARPA el ejercicio de las facultades que le confiere esta Ley, cuando se trate de actividades con OGMs en los casos siguientes:

I. Vegetales que se consideren especies agrícolas, incluyendo semillas, y cualquier otro organismo o producto considerado dentro del ámbito de aplicación de la Ley Federal de Sanidad Vegetal, con excepción de las especies silvestres y forestales reguladas por la Ley General de Vida Silvestre y la Ley General de Desarrollo Forestal Sustentable, respectivamente, y aquellas que se encuentren bajo algún régimen de protección por normas oficiales mexicanas derivadas de esas leyes;

II. Animales que se consideren especies ganaderas y cualquier otro considerado dentro del ámbito de aplicación de la Ley Federal de Sanidad Animal, con excepción de las especies silvestres reguladas por la Ley General de Vida Silvestre y aquellas que se encuentren bajo algún régimen de protección por normas oficiales mexicanas derivadas de esas leyes;

III. Insumos fitozoosanitarios y de nutrición animal y vegetal;

IV. Especies pesqueras y acuícolas, con excepción de aquellas que se encuentren bajo algún régimen de protección por normas oficiales mexicanas;

V. OGMs que se utilicen en la inmunización para proteger y evitar la diseminación de las enfermedades de los animales;

VI. OGMs que sean hongos, bacterias, protozoarios, virus, viroides, espiroplasmas, fitoplasmas, y otros microorganismos, que tengan fines productivos agrícolas, pecuarios, acuícolas o fitozoosanitarios, y

VII. En los demás organismos y productos que determine el reglamento de esta Ley.

ARTÍCULO 13.- En los casos establecidos en el artículo anterior, corresponde a la SAGARPA el ejercicio de las siguientes atribuciones:

I. Participar en la formulación y aplicar la política general de bioseguridad;

II. Analizar y evaluar caso por caso los posibles riesgos que las actividades con OGMs pudieran ocasionar a la sanidad animal, vegetal y acuícola, así como al medio ambiente y a la diversidad biológica,

con base en los estudios de riesgo y los reportes de resultados que elaboren y presenten los interesados, en los términos de esta Ley;

III. Resolver y expedir permisos para la realización de actividades con OGMs, así como establecer y dar seguimiento a las condiciones y medidas a las que se deberán sujetar dichas actividades, conforme a las disposiciones del presente ordenamiento;

IV. Realizar el monitoreo de los efectos que pudiera causar la liberación de OGMs, permitida o accidental, a la sanidad animal, vegetal y acuícola, y a la diversidad biológica, de conformidad con lo que dispongan esta Ley y las normas oficiales mexicanas que de ella deriven;

V. Participar en la elaboración y expedición de las listas a que se refiere esta Ley;

VI. Suspender los efectos de los permisos, cuando disponga de información científica y técnica superveniente de la que se deduzca que la actividad permitida supone riesgos superiores a los previstos, que puedan afectar negativamente a la sanidad animal, vegetal o acuícola, a la diversidad biológica o a la salud humana. Estos dos últimos supuestos, a solicitud expresa de la SEMARNAT o de la SSA, según sea su competencia conforme a esta Ley, con apoyo en elementos técnicos y científicos;

VII. Ordenar y aplicar las medidas de seguridad o de urgente aplicación pertinentes, con bases técnicas y científicas y en el enfoque de precaución, en los términos de esta Ley;

VIII. Inspeccionar y vigilar el cumplimiento de la presente Ley, sus reglamentos y las normas oficiales mexicanas que deriven de la misma;

IX. Imponer sanciones administrativas a las personas que infrinjan los preceptos de esta Ley, sus reglamentos y las normas oficiales mexicanas que de ella deriven, sin perjuicio, en su caso, de las penas que correspondan cuando los actos u omisiones constitutivos de infracciones a este ordenamiento sean también constitutivos de delito, y de la responsabilidad civil que pudiera resultar, y

X. Las demás que esta Ley le confiere.

ARTÍCULO 14.- En los casos en que a la SEMARNAT le corresponda el conocimiento, tramitación y resolución de una solicitud de permiso, tratándose de especies silvestres y forestales, deberá remitir el expediente respectivo a la SAGARPA para que emita la opinión que corresponda.

ARTÍCULO 15.- En los casos que son competencia de la SAGARPA, a la SEMARNAT le corresponderá lo siguiente:

I. Emitir el dictamen de bioseguridad que corresponda, previo a la resolución de la SAGARPA, como resultado del análisis y evaluación de riesgos que realice con base en el estudio que elaboren y presenten los interesados, sobre los posibles riesgos que la actividad con OGMs de que se trate pueda causar al medio ambiente y a la diversidad biológica, cuando se trate de solicitudes de permisos para liberación experimental de dichos organismos, o con base en los reportes de resultados y la información que adjunten los interesados a sus solicitudes de permisos para liberación en programa piloto y para liberación comercial;

II. Requerir a la SAGARPA la suspensión de los efectos de los permisos que expida dicha Secretaría, cuando disponga de información científica y técnica de la que se deduzca que la liberación permitida supone riesgos superiores a los previstos que pueden afectar negativamente el medio ambiente y la diversidad biológica, y

III. El ejercicio de las facultades establecidas en las fracciones I, II, IV, V, VII y VIII del artículo 11 de esta Ley.

El dictamen de bioseguridad a que se refiere la fracción I de este artículo tendrá carácter vinculante, previo al otorgamiento de los permisos que le corresponda emitir a la SAGARPA, y se expedirá en los términos del artículo 66 de esta Ley.

ARTÍCULO 16.- Corresponde a la SSA el ejercicio de las siguientes facultades en relación con los OGMs:

I. Participar en la formulación y aplicar la política general de bioseguridad;

II. Evaluar caso por caso los estudios que elaboren y presenten los interesados sobre la inocuidad y los posibles riesgos de los OGMs sujetos a autorización en los términos del Título Quinto de esta Ley;

III. Resolver y expedir las autorizaciones de OGMs a que se refiere la fracción anterior;

IV. Participar en la elaboración y expedición de las listas a que se refiere esta Ley;

V. Ordenar y aplicar las medidas de seguridad o de urgente aplicación pertinentes, con bases técnicas y científicas y en el enfoque de precaución, en los términos de esta Ley;

VI. Solicitar a la SEMARNAT o a la SAGARPA, según se trate, con apoyo en elementos técnicos y científicos, la suspensión de los efectos de los permisos de liberación al ambiente de OGMs, cuando disponga de información de la que se deduzca que la actividad permitida por esas Secretarías supone riesgos superiores a los previstos que pudieran afectar a la salud humana;

VII. Inspeccionar y vigilar el cumplimiento de la presente Ley, sus reglamentos y normas oficiales mexicanas;

VIII. Imponer sanciones administrativas a las personas que infrinjan los preceptos de esta Ley, sus reglamentos y las normas oficiales mexicanas que deriven de esta Ley, sin perjuicio, en su caso, de las penas que correspondan cuando los actos u omisiones constitutivos de infracciones a este ordenamiento sean también constitutivos de delito, y de la responsabilidad civil que pudiera resultar, y

IX. Las demás que esta Ley le confiere.

La SSA realizará las acciones de vigilancia sanitaria y epidemiológica de los OGMs y de los productos que los contengan y de los productos derivados, de conformidad con la Ley General de Salud y sus disposiciones reglamentarias.

ARTÍCULO 17.- En caso de liberación accidental de OGMs, las Secretarías se coordinarán para que, en el ámbito de sus respectivas competencias conforme a esta Ley, impongan las medidas necesarias para evitar afectaciones negativas a la diversidad biológica, a la salud humana o a la sanidad animal, vegetal y acuícola, según se trate.

ARTÍCULO 18.- Corresponde a la SHCP el ejercicio de las siguientes facultades, respecto de la importación de OGMs y de productos que los contengan:

I. Revisar en las aduanas de entrada del territorio nacional, que los OGMs que se importen y destinen a su liberación al ambiente o a las finalidades establecidas en el artículo 91 de esta Ley, cuenten con el permiso y/o la autorización respectiva, según sea el caso en los términos de este ordenamiento;

II. Revisar que la documentación que acompañe a los OGMs que se importen al país, contenga los requisitos de identificación establecidos en las normas oficiales mexicanas que deriven de esta Ley;

III. Participar, de manera conjunta con las Secretarías, en la expedición de normas oficiales mexicanas relativas al almacenamiento o depósito de OGMs o de productos que los contengan en los recintos aduaneros del territorio nacional;

IV. Dar aviso inmediato a la SEMARNAT, a la SAGARPA y/o a la SSA, sobre la probable comisión de infracciones a los preceptos de esta Ley, en materia de importación de OGMs, y

V. Impedir la entrada al territorio nacional de OGMs y productos que los contengan, en los casos en que dichos organismos y productos no cuenten con permiso y/o autorización, según corresponda, para su importación, conforme a esta Ley.

La SHCP ejercerá las facultades anteriores, sin perjuicio de las que le confiera la legislación aduanera, aplicables a la importación de todas las mercancías.

CAPÍTULO IV
De la Coordinación y Participación

ARTÍCULO 19.- La CIBIOGEM es una Comisión Intersecretarial que tiene por objeto formular y coordinar las políticas de la Administración Pública Federal relativas a la bioseguridad de los OGMs, la cual tendrá las funciones que establezcan las disposiciones reglamentarias que deriven de esta Ley, conforme a las siguientes bases:

I. La CIBIOGEM estará integrada por los titulares de las Secretarías de Agricultura, Ganadería, Desarrollo Rural, Pesca y Alimentación; Medio Ambiente y Recursos Naturales; Salud; Educación Pública; Hacienda y Crédito Público, y Economía, así como por el Director General del CONACyT;

II. La CIBIOGEM tendrá una Presidencia que será rotatoria entre los titulares de las Secretarías de Agricultura, Ganadería, Desarrollo Rural, Pesca y Alimentación, de Medio Ambiente y Recursos Naturales y de Salud, y cuyo ejercicio, funciones y duración se determinarán en las disposiciones reglamentarias correspondientes. También habrá una Vicepresidencia cuyo titular será el Director General del CONACyT, quien presidirá las sesiones en ausencia del Presidente, coadyuvará con la Comisión y con el Secretario Ejecutivo en el ejercicio de sus funciones y realizará las actividades que le encomiende la propia CIBIOGEM en los términos que establezcan las disposiciones reglamentarias que deriven de la presente Ley;

III. La CIBIOGEM podrá invitar a otras dependencias a participar, con voz, en los acuerdos y decisiones de los asuntos que tengan relación con su objeto, así como a los miembros del Consejo Consultivo;

IV. La CIBIOGEM contará con un Secretario Ejecutivo que será designado por el Presidente de la República, a propuesta del Director General del CONACyT, aprobada por la propia CIBIOGEM. Tendrá las atribuciones y facultades que se determinen en las disposiciones reglamentarias que deriven de este ordenamiento, y ejecutará y dará seguimiento a los acuerdos de la propia Comisión y ejercerá las demás funciones que se le encomienden;

V. La Secretaría Ejecutiva de la CIBIOGEM contará con la estructura orgánica que se apruebe en los términos de las disposiciones aplicables, y será considerada una unidad administrativa por función del CONACyT, de conformidad con la Ley Orgánica de dicha entidad paraestatal, y

VI. La CIBIOGEM también contará con un Comité Técnico integrado por los coordinadores, directores generales o equivalentes competentes en la materia que designen los titulares de las dependencias y entidades que formen parte de la CIBIOGEM. Dicho Comité podrá proponer la creación de subcomités especializados para la atención de asuntos específicos y tendrá las atribuciones que se determinen en las disposiciones reglamentarias que deriven de esta Ley.

ARTÍCULO 20.- Se crea el Consejo Consultivo Científico de la CIBIOGEM que fungirá como órgano de consulta obligatoria de la propia CIBIOGEM en aspectos técnicos y científicos en biotecnología moderna y bioseguridad de OGMs. Se integrará por un conjunto de personas expertas en diferentes disciplinas, provenientes de centros, instituciones de investigación, academias o sociedades científicas de reconocido prestigio, que ejercerán su función a título personal, con independencia de la institución, asociación o empresa de la que formen parte o en la que presten sus servicios. Dichas personas expertas manifestarán expresamente en carta compromiso, al momento de ser designadas como integrantes del Consejo Consultivo Científico, no tener ningún conflicto de interés.

La selección de las personas integrantes del Consejo Consultivo Científico se realizará mediante convocatoria pública que emitan conjuntamente el CONACyT y el Foro Consultivo Científico y Tecnológico previsto en la Ley de Ciencia y Tecnología, garantizando el principio de paridad de género. Entre las funciones del Consejo Consultivo se preverá la formulación de protocolos de investigación, análisis y metodologías y dictámenes técnicos, que podrán ser remunerados. Las funciones específicas del Consejo Consultivo y los mecanismos para que la renovación de sus integrantes sea progresiva y escalonada, se establecerán en las disposiciones reglamentarias que deriven de esta Ley. Los dictámenes técnicos que emita el Consejo Consultivo Científico deberán ser considerados por la CIBIOGEM en las decisiones que adopte.

Artículo reformado DOF 11-05-2022

ARTÍCULO 21.- Se crea el Consejo Consultivo Mixto de la CIBIOGEM que fungirá como órgano auxiliar de consulta y opinión de la propia CIBIOGEM. Se integrará garantizando el principio de paridad de género, por representantes de asociaciones, cámaras o empresas de los sectores privado, social y productivo. Su función fundamental será conocer y opinar sobre aspectos sociales, económicos, y otros aspectos relativos a las políticas regulatorias y de fomento, así como sobre las prioridades en la normalización y el mejoramiento de trámites y procedimientos en materia de bioseguridad de los OGMs. Las funciones específicas del Consejo Consultivo Mixto y los mecanismos para la incorporación de sus integrantes serán establecidas por la CIBIOGEM.

Artículo reformado DOF 11-05-2022

ARTÍCULO 22.- La CIBIOGEM emitirá sus reglas de operación en las que se establecerán los mecanismos de participación para que integrantes y representantes de los sectores académico, científico, tecnológico, social y productivo, de reconocido prestigio y experiencia en los temas relacionados directamente con las actividades que son materia de esta Ley, puedan participar mediante opiniones, estudios y consultas en el conocimiento y evolución de las políticas de bioseguridad y de fomento de la investigación en bioseguridad y biotecnología, así como también para recibir opiniones, estudios y consultas en dichas materias.

ARTÍCULO 23.- El CONACyT contará en su presupuesto con los recursos necesarios para el desarrollo de las actividades de la CIBIOGEM, de la Secretaría Ejecutiva y del Consejo Consultivo Científico, conforme al presupuesto que se autorice en los términos de las disposiciones aplicables. Dichos recursos serán administrados y ejercidos por el Secretario Ejecutivo de la CIBIOGEM.

Los programas, proyectos, apoyos, así como las demás acciones que se lleven a cabo por la aplicación de la presente Ley y demás disposiciones en la materia, en los que se ejerzan recursos de carácter federal, se sujetarán a la disponibilidad de recursos que se determinen para tal fin en el

Presupuesto de Egresos de la Federación del ejercicio fiscal correspondiente, y deberán observar las disposiciones aplicables en materia presupuestaria.

ARTÍCULO 24.- Las Secretarías podrán establecer comités técnicos científicos que les proporcionen apoyo en la resolución de expedientes de solicitudes de permisos y autorizaciones, así como en materia de avisos. Las disposiciones reglamentarias de esta Ley determinarán las bases de organización y funcionamiento de dichos comités.

CAPÍTULO V
De la Coordinación con las Entidades Federativas

ARTÍCULO 25.- La Federación, por conducto de las Secretarías en el ámbito de su competencia y en los términos de las disposiciones aplicables, con el conocimiento de la CIBIOGEM, podrá celebrar convenios o acuerdos de coordinación con los gobiernos de las entidades federativas, con el objeto de:

I. Establecer la colaboración concurrente en el monitoreo de los riesgos que pudieran ocasionar las actividades de liberación de OGMs al ambiente, sea experimental o en programa piloto, que se determinen en dichos convenios o acuerdos, y

II. En su caso, en la realización de acciones para la vigilancia del cumplimiento de las disposiciones de esta Ley.

ARTÍCULO 26.- Los convenios o acuerdos de coordinación que suscriban la Federación con los gobiernos de las entidades federativas para los propósitos a que se refiere el artículo anterior, deberán ajustarse a las disposiciones aplicables y a las siguientes bases:

I. Definirán con precisión las materias y actividades que constituyan el objeto del convenio o acuerdo;

II. El propósito de los convenios o acuerdos deberá ser congruente con la política en materia de bioseguridad;

III. Se describirán los bienes y recursos que aporten las partes esclareciendo cuál será su destino específico y su forma de administración, para lo cual la Federación contribuirá al fortalecimiento de sus capacidades financieras e institucionales;

IV. Se determinarán los medios, procedimientos y recursos necesarios que aporten las Secretarías competentes, con la finalidad de que los gobiernos de las entidades federativas puedan realizar las acciones y las actividades objeto de los convenios o acuerdos de coordinación;

V. Se especificará la vigencia del convenio o acuerdo, sus formas de terminación y de solución de controversias y, en su caso, de prórroga;

VI. Definirán el órgano u órganos que llevarán a cabo las acciones que resulten de los convenios o acuerdos de coordinación;

VII. Determinarán las acciones para promover y participar conjuntamente en el apoyo a la investigación científica y tecnológica en bioseguridad y biotecnología;

VIII. Se establecerá la obligación de presentar informes detallados sobre el cumplimiento del objeto de los convenios y acuerdos de coordinación, y

IX. Contendrán las demás estipulaciones que las partes consideren necesarias para el correcto cumplimiento del convenio o acuerdo.

Los convenios a que se refiere este artículo deberán publicarse en el **Diario Oficial de la Federación** y en el órgano de difusión oficial del gobierno local respectivo.

ARTÍCULO 27.- Los gobiernos de las entidades federativas tendrán acceso permanente a la información que se inscriba en el Registro Nacional de Bioseguridad de los Organismos Genéticamente Modificados. Asimismo, la CIBIOGEM, por conducto de su Secretaría Ejecutiva, notificará las solicitudes de permisos de liberación comercial al ambiente de OGMs, a los gobiernos de las entidades federativas en las que se pretenda llevar a cabo dicha actividad, a efecto de que tengan conocimiento de esa situación y puedan emitir sus opiniones en los términos de esta Ley. La notificación deberá realizarse dentro de los veinte días siguientes a aquel en que la CIBIOGEM haya recibido la solicitud de permiso correspondiente para su inscripción en el Registro.

CAPÍTULO VI
Del Fomento a la Investigación Científica y Tecnológica en Bioseguridad y Biotecnología

ARTÍCULO 28.- El Ejecutivo Federal fomentará, apoyará y fortalecerá la investigación científica y tecnológica en materia de bioseguridad y de biotecnología a través de las políticas y los instrumentos establecidos en esta Ley y en la Ley de Ciencia y Tecnología. En materia de biotecnología, estos apoyos se orientarán a impulsar proyectos de investigación y desarrollo e innovación, formación de recursos humanos especializados y fortalecimiento de grupos e infraestructura de las universidades, instituciones de educación superior y centros públicos de investigación, que se lleven a cabo para resolver necesidades productivas específicas del país y que beneficien directamente a los productores nacionales.

En materia de bioseguridad se fomentará la investigación para obtener conocimientos suficientes que permitan evaluar los posibles riesgos de los OGMs en el medio ambiente, la diversidad biológica, la salud humana y la sanidad animal, vegetal y acuícola; para generar las consideraciones socioeconómicas de los efectos de dichos organismos para la conservación y el aprovechamiento de la diversidad biológica, y para valorar y comprobar la información proporcionada por los promoventes. Asimismo, se impulsará la creación de capacidades humanas, institucionales y de infraestructura para la evaluación y monitoreo de riesgos.

ARTÍCULO 29.- Para lograr el fomento a la investigación científica y tecnológica en materia de bioseguridad y de biotecnología se establecerá un programa para el desarrollo de la bioseguridad y la biotecnología que será considerado como un programa cuya formulación estará a cargo del CONACyT con base en las propuestas que presenten las Secretarías y las demás dependencias y entidades de la Administración Pública Federal que apoyen o realicen investigación científica y desarrollo tecnológico. En dicho proceso se tomarán en cuenta las opiniones y propuestas de las comunidades científica, académica, tecnológica y sector productivo, convocadas por el Foro Consultivo Científico y Tecnológico, y de la CIBIOGEM.

Dicho programa formará parte del Programa Especial de Ciencia y Tecnología que establece la Ley de Ciencia y Tecnología.

ARTÍCULO 30.- El programa para el desarrollo de la bioseguridad y la biotecnología deberá contener, cuando menos, diagnósticos, políticas, estrategias y acciones generales y sectoriales en cuanto a:

I. Investigación científica;

II. Innovación y desarrollo tecnológico;

III. Formación de investigadores, tecnólogos y profesionales de alto nivel;

IV. Apoyo a los centros públicos de investigación;

V. Proyectos de investigación científica y de innovación y desarrollo tecnológico orientados a la solución de problemas nacionales y en actividades que redunden en beneficio para los productores agropecuarios, forestales y acuícolas del país;

VI. Nuevos centros de investigación y transferencia tecnológica en áreas primordiales del desarrollo nacional, de acuerdo con las necesidades locales o regionales de conservación y protección ambiental o de producción silvícola, agropecuaria e industrial;

VII. Difusión del conocimiento científico y tecnológico;

VIII. Colaboración nacional e internacional;

IX. Fortalecimiento de la cultura de la bioseguridad, y

X. Descentralización y desarrollo regional.

El Ejecutivo Federal, por conducto de las Secretarías competentes, se asegurará de poner a disposición de las empresas semilleras de las organizaciones de campesinos y de productores, de manera preferente y accesible, los resultados de la investigación científica y de innovación y desarrollo tecnológico contenidos en el Programa para el desarrollo de la bioseguridad y la biotecnología.

ARTÍCULO 31.- El CONACyT llevará a cabo las acciones de Fomento y Apoyo a la Investigación Científica y Tecnológica en Bioseguridad y Biotecnología de conformidad con lo dispuesto en la presente Ley, en la Ley de Ciencia y Tecnología, y demás disposiciones aplicables.

Artículo reformado DOF 06-11-2020

TÍTULO SEGUNDO
De los Permisos

CAPÍTULO I
Disposiciones Comunes

ARTÍCULO 32.- Requerirá de permiso la realización de las siguientes actividades:

I. La liberación experimental al ambiente, incluyendo la importación para esa actividad, de uno o más OGMs;

II. La liberación al ambiente en programa piloto, incluyendo la importación para esa actividad, de OGMs, y

III. La liberación comercial al ambiente, incluyendo la importación para esa actividad, de OGMs.

ARTÍCULO 33.- Una vez que las Secretarías correspondientes reciban una solicitud de permiso de liberación al ambiente de OGMs, y siempre y cuando cumpla con la información y los requisitos establecidos en esta Ley, deberán remitirla al Registro, para su inscripción y publicidad respectivas. Una vez realizado lo anterior, la Secretaría a la que le corresponda resolver la solicitud de permiso de liberación de OGMs al ambiente, pondrá a disposición del público dicha solicitud, para su consulta

pública, debiendo observar las previsiones sobre confidencialidad establecidas en esta Ley. Dicha Secretaría podrá hacer uso de los medios que considere idóneos a efecto de poner a disposición del público la solicitud del permiso respectivo.

Cualquier persona, incluyendo a los gobiernos de las entidades federativas en las que se pretenda realizar la liberación respectiva, podrá emitir su opinión, que deberá estar sustentada técnica y científicamente, en un plazo no mayor de veinte días hábiles contados a partir de la fecha en que la solicitud respectiva sea puesta a disposición del público en los términos de este artículo.

Las opiniones que se emitan de conformidad con lo establecido en el párrafo anterior serán consideradas por las Secretarías correspondientes para el establecimiento de medidas de bioseguridad adicionales, en caso de que proceda expedir el permiso de liberación de OGMs al ambiente que corresponda, en los términos de esta Ley.

ARTÍCULO 34.- La Secretaría correspondiente expedirá su resolución, debidamente fundada y motivada, una vez analizada la información y documentación aportados por el interesado, el dictamen o la opinión que hubieran expedido las Secretarías a las que les corresponde emitirlos de conformidad con esta Ley y, cuando proceda, la autorización del OGM que expida la SSA en los términos de este ordenamiento. La Secretaría correspondiente en su resolución podrá:

I. Expedir el permiso para la realización de la actividad de liberación al ambiente de que se trate, pudiendo establecer medidas de monitoreo, control, prevención y seguridad adicionales a las que fueron propuestas por el interesado en la solicitud del permiso, o

II. Negar el permiso en los siguientes casos:

A) Cuando la solicitud no cumpla con lo establecido en esta Ley o las normas oficiales mexicanas como requisitos para el otorgamiento del permiso;

B) Cuando la información proporcionada por el interesado, incluyendo la relativa a los posibles riesgos que pudieran ocasionar los OGMs sea falsa, esté incompleta o sea insuficiente, o

C) Cuando la Secretaría correspondiente concluya que los riesgos que pudieran presentar los OGMs de que se trate, afectarán negativamente a la salud humana o a la diversidad biológica, o a la sanidad animal, vegetal o acuícola, pudiéndoles causar daños graves o irreversibles.

ARTÍCULO 35.- Los plazos establecidos en esta Ley para la resolución de una solicitud de permiso de liberación al ambiente de OGMs, sea experimental o en programa piloto, serán prorrogables, en caso de que el interesado no cuente con la autorización expedida por la SSA en los términos de este ordenamiento, siempre y cuando dicha autorización sea requisito para la expedición del permiso respectivo.

ARTÍCULO 36.- Los permisos para liberación experimental, en programa piloto o comercial de OGMs al ambiente, surtirán efectos de permisos de importación de dichos organismos para ser liberados en forma experimental, en programa piloto o comercial, según sea el caso, en los términos y condiciones que se establezcan en los propios permisos. Lo anterior, sin perjuicio de que la importación de los OGMs de que se trate, quede sujeta al régimen fitosanitario o acuícola establecido en la legislación de la materia que corresponda.

ARTÍCULO 37.- Las medidas de monitoreo, prevención, control y seguridad de los posibles riesgos de la utilización del OGM que establezca la Secretaría correspondiente en los permisos, podrán comprender entre otros, los siguientes aspectos:

I. Manejo del OGM;

II. Medidas de seguridad para que el posible riesgo se mantenga dentro de los límites de tolerancia aceptados en la evaluación, y

III. Monitoreo de la actividad de que se trate, en relación con los posibles riesgos que dicha actividad pudiera generar.

ARTÍCULO 38.- La Secretaría que expida el permiso podrá modificar las medidas de monitoreo, control y prevención, requerir al interesado la implantación de nuevas medidas, así como suspender o revocar dicho permiso, previa audiencia que se otorgue a los interesados, cuando disponga de información científica o técnica de la que se deduzca que la actividad puede suponer riesgos superiores o inferiores a los previstos originalmente en los estudios correspondientes. Lo anterior deberá ser establecido en los permisos que expidan las Secretarías competentes.

ARTÍCULO 39.- El titular del permiso estará obligado a observar y cumplir las medidas de monitoreo, prevención, control y seguridad que establezca el permiso, así como las disposiciones de este ordenamiento, sus reglamentos y las normas oficiales mexicanas que de él deriven, que resulten aplicables a la liberación de que se trate. El incumplimiento de las medidas y disposiciones a que se refiere este artículo, dará lugar a la determinación de la responsabilidad respectiva y a la aplicación de las sanciones que correspondan conforme esta Ley.

ARTÍCULO 40.- No se permitirá la importación de OGMs o de productos que los contengan al territorio nacional, en los casos en que dichos organismos se encuentren prohibidos en el país de origen o se encuentren clasificados en las listas como no permitidos para su liberación comercial o para su importación para esa actividad.

ARTÍCULO 41.- Se prohíbe realizar actividades con OGMs o con cualquier otro organismo cuya finalidad sea la fabricación y/o utilización de armas biológicas.

CAPÍTULO II
Requisitos para la Obtención de Permisos

SECCIÓN I
Permiso para liberación experimental al ambiente

ARTÍCULO 42.- La solicitud del permiso para realizar la liberación experimental al ambiente de OGMs, incluyendo su importación para esa actividad, deberá acompañarse de la siguiente información:

I. Caracterización del OGM, en la que se deberá considerar lo que establezcan para cada caso las normas oficiales mexicanas que deriven de esta Ley;

II. La identificación de la zona donde se pretende liberar experimentalmente el OGM, incluyendo la especificación de la superficie total en la que se realizará la liberación;

III. Un estudio de los posibles riesgos que la liberación de los OGMs pudiera generar al medio ambiente y a la diversidad biológica. Además, en los casos que sean de la competencia de la SAGARPA, el estudio deberá contener lo relativo a los posibles riesgos que la liberación de dichos organismos pudieran causar a la sanidad animal, vegetal o acuícola;

IV. Las medidas y procedimientos de monitoreo de la actividad y de bioseguridad, que se llevarán a cabo al momento de realizarla y las posteriores a la liberación;

V. En su caso, los antecedentes de liberación de los OGMs de que se trate en otros países;

VI. En su caso, se presentarán consideraciones sobre los riesgos de las alternativas tecnológicas con las que se cuente para contender con el problema para el cual se construyó el organismo genéticamente modificado que se pretende liberar, y

VII. La información que para cada caso determinen las normas oficiales mexicanas que deriven de esta Ley.

Será requisito para obtener el permiso de liberación experimental al ambiente, que el solicitante cuente con la autorización del OGM que expida la SSA de conformidad con esta Ley, cuando dicho organismo tenga finalidades de salud pública o se destine a la biorremediación. El interesado podrá iniciar el trámite para obtener dicho permiso ante la Secretaría competente, pero no le será otorgado hasta que acredite en el expediente respectivo haber obtenido la autorización de la SSA.

ARTÍCULO 43.- Los interesados en importar OGMs para su liberación experimental al ambiente, además de lo establecido en el artículo anterior, deberán adjuntar a su solicitud la información y documentación que acredite que el OGM esté permitido conforme la legislación del país de origen, para su liberación, al menos, en etapa experimental, adjuntando para tales efectos la autorización o documentación oficial que ampare dicha situación.

ARTÍCULO 44.- La resolución a una solicitud de permiso para liberación experimental de OGMs deberá expedirse en un plazo máximo de seis meses contados a partir del día siguiente a aquel en que la Secretaría que deba resolver haya recibido la solicitud del permiso y la información aportada por el interesado esté completa.

ARTÍCULO 45.- En caso de que, con posterioridad al otorgamiento del permiso, en la realización de la liberación experimental de un OGM al ambiente se presente lo siguiente:

I. Se produzca cualquier modificación en la liberación que pueda incrementar o disminuir los posibles riesgos para el medio ambiente y la diversidad biológica, o

II. Se disponga de nueva información científica y técnica sobre dichos riesgos.

En estos casos, el titular del permiso estará obligado a:

A. Informar a la Secretaría correspondiente, de manera inmediata, dicha situación;

B. Revisar las medidas de monitoreo y de bioseguridad especificadas en la documentación, y

C. Adoptar las medidas de bioseguridad necesarias.

ARTÍCULO 46.- El titular del permiso de liberación experimental al ambiente, deberá informar a la Secretaría que lo expidió, mediante un reporte, los resultados de la o las liberaciones realizadas en relación con los posibles riesgos para el medio ambiente y la diversidad biológica. Las características y contenido del reporte a que se refiere este artículo se establecerán en las normas oficiales mexicanas que deriven de esta Ley.

ARTÍCULO 47.- El titular del permiso estará obligado a informar inmediatamente a la Secretaría correspondiente, cualquier situación que en la realización de la liberación permitida, pudiera incrementar o disminuir los posibles riesgos para el medio ambiente, la diversidad biológica y/o la salud humana.

ARTÍCULO 48.- La Secretaría correspondiente podrá limitar la vigencia del permiso de liberación experimental al ambiente considerando los elementos del expediente.

ARTÍCULO 49.- Las liberaciones experimentales al ambiente de OGMs se realizarán al amparo y conforme a los términos y condiciones que establezca el permiso. En caso de que dicho permiso comprenda la realización de diversas liberaciones del mismo OGM en la misma área geográfica establecida en el permiso, en el mismo se podrá establecer el requisito de aviso de cada liberación.

SECCIÓN II
Permiso para liberación al ambiente en programa piloto

ARTÍCULO 50.- La solicitud del permiso para realizar la liberación al ambiente de OGMs en programa piloto, incluyendo su importación para esa actividad, deberá acompañarse de la siguiente información:

I. El permiso para la liberación experimental del OGM de que se trate;

II. Referencia y consideraciones sobre el reporte de los resultados de la o las liberaciones experimentales realizadas en relación con los posibles riesgos al medio ambiente y la diversidad biológica y, adicionalmente, a la sanidad animal, vegetal o acuícola en los casos que sean competencia de la SAGARPA conforme a esta Ley;

III. Información relativa a:

A) La cantidad total del OGM a liberar;

B) Las condiciones de manejo que se darán al OGM, y

C) Identificación de las zonas donde se pretende liberar el OGM, incluyendo la especificación de la superficie o superficies totales en las que se realizará la liberación.

IV. Las medidas de monitoreo y de bioseguridad a realizar durante la liberación y posteriores a dicha actividad, y

V. La información que para cada caso determinen las normas oficiales mexicanas que deriven de esta Ley.

Lo anterior, con la finalidad de que las Secretarías correspondientes cuenten con la información para que realicen el análisis y la evaluación de los posibles riesgos al medio ambiente y la diversidad biológica o a la sanidad animal, vegetal o acuícola, según les corresponda conforme a esta Ley.

Será requisito para obtener el permiso de liberación al ambiente en programa piloto, que el solicitante cuente con la autorización del OGM que expida la SSA de conformidad con esta Ley, cuando dicho organismo sea para uso o consumo humano. El interesado podrá iniciar el trámite para obtener dicho permiso ante la Secretaría competente, pero no le será otorgado hasta que acredite en el expediente respectivo haber obtenido la autorización de la SSA.

ARTÍCULO 51.- Los interesados en importar OGMs para su liberación al ambiente en programa piloto, además de lo establecido en el artículo anterior, deberán adjuntar a su solicitud la información y documentación que acredite que el OGM esté permitido conforme la legislación del país de origen, para su liberación, al menos, en esta clase de etapa, adjuntando para tales efectos la autorización o documentación oficial que ampare dicha situación.

ARTÍCULO 52.- La resolución a una solicitud de permiso para liberación al ambiente de OGMs en programa piloto deberá expedirse en un plazo máximo de tres meses contados a partir del día siguiente a aquel en que la Secretaría que deba resolver haya recibido la solicitud del permiso y la información aportada por el interesado esté completa.

La vigencia del permiso se determinará considerando los elementos del expediente.

ARTÍCULO 53.- El titular del permiso de liberación al ambiente en programa piloto, deberá informar a la Secretaría que lo expidió, mediante un reporte, los resultados de la o las liberaciones realizadas en relación con los posibles riesgos para el medio ambiente y la diversidad biológica. Las características y contenido del reporte a que se refiere este artículo se establecerán en las normas oficiales mexicanas que deriven de esta Ley.

ARTÍCULO 54.- El titular del permiso estará obligado a informar inmediatamente a la Secretaría correspondiente, cualquier situación que en la realización de la liberación permitida, pudiera incrementar o disminuir los posibles riesgos para el medio ambiente, la diversidad biológica y/o la salud humana.

SECCIÓN III
Permiso para liberación comercial al ambiente

ARTÍCULO 55.- La solicitud del permiso para realizar la liberación comercial al ambiente de OGMs, incluyendo su importación para esa actividad, deberá acompañarse de la siguiente información:

I. Los permisos para la liberación experimental y en programa piloto del OGM de que se trate;

II. Referencia y consideraciones sobre los reportes de resultados de la liberación experimental y de la liberación en programa piloto que se hayan realizado, en términos de los permisos a que se refiere la fracción anterior;

III. Instrucciones o recomendaciones específicas de almacenamiento, transporte y, en su caso, manejo;

IV. En su caso, condiciones para su liberación y comercialización;

V. En su caso, se presentarán consideraciones sobre los riesgos de las alternativas tecnológicas con las que se cuente para contender con el problema para el cual se construyó el OGM que se pretende liberar;

VI. En su caso, la información que disponga el solicitante sobre datos o resultados de la comercialización del mismo OGM en otros países, y

VII. La demás información que determinen las normas oficiales mexicanas que deriven de esta Ley.

Lo anterior, con la finalidad de que las Secretarías correspondientes cuenten con la información para que realicen el análisis y la evaluación de los posibles riesgos al medio ambiente y la diversidad biológica o a la sanidad animal, vegetal o acuícola, según les corresponda conforme a esta Ley.

ARTÍCULO 56.- Los interesados en importar OGMs para su liberación comercial, además de lo establecido en el artículo anterior, deberán adjuntar la información y documentación que acredite que el OGM esté permitido conforme la legislación del país de origen para su comercialización, adjuntando para tales efectos la autorización o documentación oficial que ampare dicha situación.

ARTÍCULO 57.- La resolución a una solicitud de permiso para liberación comercial al ambiente, deberá expedirse en el plazo de cuatro meses contados a partir del día siguiente a aquel en que la Secretaría que deba resolver haya recibido la solicitud del permiso y la información aportada por el interesado esté completa.

ARTÍCULO 58.- Las actividades e importaciones subsecuentes al permiso de liberación comercial al ambiente se realizarán sujetándose a los términos y condiciones que en el mismo se establezcan, y sin que requieran de permisos sucesivos. Se entenderá que las importaciones subsecuentes se realizan en los mismos términos y condiciones establecidos en el permiso de liberación comercial respectivo, cuando se trate del mismo OGM y la misma área de liberación. Lo anterior, con independencia de que dichas actividades e importaciones puedan ser objeto de monitoreo y de acciones de inspección y vigilancia, en los términos de esta Ley.

ARTÍCULO 59.- El permiso de liberación comercial al ambiente de un OGM conlleva la autorización de comercialización del organismo de que se trate y de los productos que lo contengan, en los términos de esta Ley.

CAPÍTULO III
Estudio y Evaluación del Riesgo

ARTÍCULO 60.- La evaluación del riesgo es el proceso por el cual se analizan caso por caso, con base en estudios fundamentados científica y técnicamente que deberán elaborar los interesados, los posibles riesgos o efectos que la liberación experimental al ambiente de OGMs pueden causar al medio ambiente y a la diversidad biológica, así como a la sanidad animal, vegetal y acuícola.

Los posibles riesgos a la salud humana serán materia de estudio de riesgos para la obtención de la autorización del OGM de que se trate, en los términos de esta Ley.

ARTÍCULO 61.- Para llevar a cabo el estudio y la evaluación del riesgo, se deberán observar los siguientes lineamientos:

I. Deben realizarse caso por caso de una forma transparente y basada en principios científicos y en el enfoque de precaución, en los términos de esta Ley, tomando en cuenta el asesoramiento de expertos;

II. Se realizarán en los campos de especialidad relevantes;

III. La falta de conocimiento o consenso científico no se interpretará necesariamente como indicador de un determinado nivel de riesgo, de ausencia de riesgo, o de la existencia de un riesgo aceptable;

IV. Deben tener como base mínima los posibles riesgos que se impondrían por la liberación de los organismos hospederos no modificados genéticamente o de los organismos parentales, cuando fueran liberados en ese medio ambiente;

V. Se deberá considerar el organismo receptor, la modificación genética, incluyendo la construcción genética y el método de inserción, y el ambiente en el que se pretende liberar el OGM, y

VI. La naturaleza y el nivel de detalle de la información que contengan pueden variar de un caso a otro, dependiendo del OGM de que se trate, su uso previsto y el probable ambiente receptor.

ARTÍCULO 62.- Las etapas básicas a seguir en el estudio y la evaluación del riesgo son las siguientes:

I. La identificación de características nuevas asociadas con el OGM que pudieran tener posibles riesgos en la diversidad biológica;

II. La evaluación de que estos posibles riesgos ocurran realmente, teniendo en cuenta el nivel y el tipo de exposición del OGM;

III. La evaluación de las consecuencias si posibles riesgos ocurrieran realmente;

IV. La estimación del posible riesgo global que represente el OGM, basada en la evaluación de la probabilidad de que los posibles riesgos y las consecuencias identificadas ocurran realmente, y

V. La recomendación sobre si los posibles riesgos son aceptables o manejables, o no lo son, incluyendo la determinación de estrategias para el manejo de esos posibles riesgos.

ARTÍCULO 63.- Cuando haya incertidumbre acerca del nivel del posible riesgo que los OGMs puedan causar a la diversidad biológica, las Secretarías correspondientes solicitarán dentro del procedimiento administrativo de permiso de la actividad de liberación al ambiente de OGMs de que se trate, información adicional sobre cuestiones concretas del estudio de riesgo o adoptarán estrategias apropiadas para el manejo del riesgo y/o el monitoreo del OGM en el ambiente receptor.

En caso de peligro de daño grave o irreversible, la incertidumbre acerca del nivel de los posibles riesgos que los OGMs puedan causar a la diversidad biológica o a la salud humana, no deberá utilizarse como razón para que la Secretaría correspondiente postergue la adopción de medidas eficaces que impidan la afectación negativa de la diversidad biológica o de la salud humana. En la adopción de dichas medidas, la Secretaría correspondiente tomará en cuenta la evidencia científica existente que le sirva de fundamento o criterio para el establecimiento de la medida o medidas; los procedimientos administrativos establecidos en esta Ley, y la normatividad comercial contenida en tratados y acuerdos internacionales de los que los Estados Unidos Mexicanos sean parte.

ARTÍCULO 64.- El interesado podrá presentar de manera adicional al estudio de los posibles riesgos, otros estudios o consideraciones en los que se analicen tanto la contribución del OGM a la solución de problemas ambientales, sociales, productivos o de otra índole, las consideraciones socioeconómicas que existan respecto de la liberación de OGMs al ambiente, como una evaluación de los riesgos de las opciones tecnológicas alternas para contender con la problemática específica para la cual el OGM fue diseñado. Estos análisis deberán estar sustentados en evidencias científicas y técnicas, en los antecedentes sobre uso, producción y consumo, y podrán ser considerados por las Secretarías competentes como elementos adicionales para decidir sobre la liberación experimental al ambiente, y consecuentes liberaciones al ambiente en programa piloto y comercial, respectivamente, del OGM de que se trate.

ARTÍCULO 65.- Las características y requisitos de los estudios de evaluación de los posibles riesgos, se establecerán en las normas oficiales mexicanas que deriven de esta Ley.

CAPÍTULO IV
De los Dictámenes

ARTÍCULO 66.- Los dictámenes que deberá emitir la SEMARNAT únicamente se requerirán tratándose de actividades de liberación experimental, de liberación en programa piloto y de liberación comercial de OGMs que sean de competencia de la SAGARPA. Dichos dictámenes deberán ser emitidos en un plazo de sesenta días contados a partir de que la SEMARNAT reciba el expediente administrativo remitido por la SAGARPA. Dicho plazo comprende tanto la expedición del dictamen correspondiente,

como su remisión a la SAGARPA. La SAGARPA expedirá el permiso de liberación de OGMs al ambiente que corresponda, siempre que el dictamen que emita la SEMARNAT sea favorable.

CAPÍTULO V
De la Reconsideración de las Resoluciones Negativas

ARTÍCULO 67.- Los interesados a los que la Secretaría correspondiente les haya negado el permiso solicitado, podrán pedir a dicha Secretaría la reconsideración de la resolución respectiva, cuando se considere que:

I. Se ha producido un cambio en las circunstancias que puede influir en el resultado del estudio de los posibles riesgos en el cual se basó la resolución, o

II. Se disponga de nueva información científica o técnica pertinente de la que se deduzca que los posibles riesgos identificados no son los previstos originalmente.

La Secretaría competente podrá emitir una resolución dentro de los dos meses siguientes. En caso de no hacerlo, se tendrá por desestimada la reconsideración.

ARTÍCULO 68.- La reconsideración a que se refiere el artículo anterior no constituye ningún recurso o medio de defensa, y podrá ser promovida por los interesados con independencia de que hagan valer el medio de impugnación establecido en esta Ley en contra de la resolución que les afecte.

CAPÍTULO VI
De la Revisión de los Permisos

ARTÍCULO 69.- La Secretaría correspondiente, en cualquier momento y sobre la base de nueva información científica o técnica acerca de los posibles riesgos que puedan provocar los OGMs a la salud pública o al medio ambiente y a la diversidad biológica, podrán revisar los permisos otorgados y, en su caso, suspender sus efectos o revocar dichos permisos, conforme a los procedimientos que establezcan las disposiciones reglamentarias que deriven de esta Ley, cuando considere como causas que:

I. Se presente un cambio en las circunstancias de las actividades que puede influir en el resultado del estudio de la evaluación de los posibles riesgos en el cual se basó el permiso, o

II. Se cuente con información científica o técnica adicional que pudiese modificar cualesquiera condiciones, limitaciones o requisitos del permiso.

CAPÍTULO VII
Confidencialidad

ARTÍCULO 70.- Los interesados podrán identificar claramente en su solicitud de permiso, aquella información que deba considerarse como confidencial conforme al régimen de propiedad industrial o de derechos de autor. La Secretaría correspondiente se sujetará a lo establecido en las leyes de la materia y se abstendrá de mandar registrar y de facilitar a terceros la información y los datos que estén protegidos por dichas leyes.

ARTÍCULO 71.- No tendrán el carácter de confidencial:

I. La descripción general de los OGMs;

II. La identificación del interesado o responsable de la actividad;

III. La finalidad y el lugar o lugares de la actividad;

IV. Los sistemas y las medidas de bioseguridad, monitoreo, control y emergencia, y

V. Los estudios sobre los posibles riesgos a la salud humana o al medio ambiente y a la diversidad biológica.

El acceso a la información a la que se refieren las fracciones anteriores se regirá, además, por las disposiciones aplicables en materia de acceso a la información pública gubernamental.

CAPÍTULO VIII
Exportación de OGMs que se destinen a su liberación al ambiente en otros países

ARTÍCULO 72.- Los interesados en exportar OGMs que se destinen a su liberación al ambiente en otros países, notificarán por sí, conforme se determine en las disposiciones reglamentarias que deriven de esta Ley, su intención de exportar dichos organismos, a las autoridades competentes del país respectivo. Dicha notificación sólo se realizará en los casos en que los tratados y acuerdos internacionales en los que los Estados Unidos Mexicanos sean parte, establezcan ese requisito para efectuar la exportación al país de que se trate. La información que el interesado adjunte a la notificación a que se refiere este artículo, deberá ser exacta, fidedigna y ajustada a lo que establezcan dichos tratados y acuerdos internacionales.

TÍTULO TERCERO
De la Utilización Confinada y Avisos

CAPÍTULO I
Utilización Confinada

ARTÍCULO 73.- La utilización confinada de OGMs puede ser con fines de enseñanza, de investigación científica y tecnológica, industriales o comerciales.

ARTÍCULO 74.- Quienes realicen actividades de utilización confinada sujetas al requisito de presentación de aviso en los términos de esta Ley, deberán cumplir con lo siguiente:

I. Llevar un libro de registro de las actividades de utilización confinada que realicen, el cual se deberá proporcionar a las Secretarías correspondientes cuando éstas lo soliciten;

II. Aplicar las medidas de confinamiento cuya ejecución deberá adaptarse a los conocimientos científicos y técnicos más modernos y avanzados en materia de manejo de riesgos y de tratamiento, disposición final y eliminación de residuos de OGMs generados en la realización de la actividad, y

III. En el caso de la utilización confinada con fines de enseñanza o de investigación científica y tecnológica, integrar una comisión interna de bioseguridad y aplicar los principios de las buenas prácticas de la investigación científica, así como las reglas de bioseguridad que defina la comisión interna de bioseguridad. Dicha comisión interna estará encargada de la seguridad en las instalaciones y de las buenas prácticas y la seguridad en el manejo de OGMs utilizados en la actividad señalada.

Las normas oficiales mexicanas que deriven de esta Ley establecerán:

A) Los requisitos y las características generales que debe contener el libro de registro a que se refiere este artículo, para cada tipo de actividad;

B) Los requisitos y características relativas al confinamiento, tratamiento, disposición final, destrucción y eliminación de residuos de OGMs;

C) Las condiciones de manejo que se requieran en las diversas formas de utilización confinada de dichos organismos, y

D) Acciones a realizar en caso de liberación accidental de OGMs.

ARTÍCULO 75.- El almacenamiento o depósito de OGMs o de productos que los contengan, que se realice en las aduanas del territorio nacional, se sujetará a lo que dispongan las normas oficiales mexicanas respectivas que expidan de manera conjunta las Secretarías competentes, con la participación de la SHCP.

ARTÍCULO 76.- El transporte de OGMs o de productos que los contengan, así como el tránsito de dichos organismos y productos por el territorio nacional, cuando tengan como destino otro país, se regirán por las normas oficiales mexicanas que expidan de manera conjunta las Secretarías competentes, con la participación de la Secretaría de Comunicaciones y Transportes.

CAPÍTULO II
De los Avisos

ARTÍCULO 77.- El aviso es la comunicación que deben presentar en formatos oficiales los sujetos señalados en esta Ley, a la SEMARNAT o a la SAGARPA, según corresponda conforme a este ordenamiento, respecto de la utilización confinada de OGMs en los casos que se establecen en este capítulo.

ARTÍCULO 78.- Los avisos se deberán presentar a la SEMARNAT o a la SAGARPA, conforme a las atribuciones que esta Ley les confiere, en los formatos oficiales que se expidan para tal efecto. El contenido de los formatos lo determinarán dichas Secretarías, con la previa aprobación de la Comisión Federal de Mejora Regulatoria. En dichos formatos se determinará la información y documentación que deba presentar el interesado. Los formatos se deberán publicar en el **Diario Oficial de la Federación**.

ARTÍCULO 79.- Requieren de presentación de aviso:

I. Los OGMs que se manejen, generen y produzcan con fines de enseñanza e investigación científica y tecnológica;

II. La integración de las comisiones internas de bioseguridad, incluyendo el nombre del o los responsables de dichas comisiones;

III. La primera utilización de laboratorios o instalaciones específicas de enseñanza o investigación científica y tecnológica en las que se manejen, generen y produzcan OGMs;

IV. La producción de OGMs que se utilicen en procesos industriales, y

V. La primera utilización de instalaciones específicas en donde se produzcan los OGMs a que se refiere la fracción anterior.

ARTÍCULO 80.- También requiere de presentación de aviso la importación de OGMs para su utilización confinada con fines industriales o comerciales, únicamente cuando se reúnan los supuestos siguientes:

I. Que se trate de OGMs que no requieran de permiso, en virtud de que se destinen exclusivamente a su utilización confinada y por tanto no se importen para su liberación al ambiente, y

II. Que se trate de OGMs que no requieran autorización sanitaria debido a que no se destinarán a uso o consumo humano o a finalidades de salud pública.

ARTÍCULO 81.- Los sujetos que deben presentar a la Secretaría correspondiente el aviso respectivo, son los siguientes:

I. En los casos a que se refieren las fracciones I, II y III del artículo 79, el responsable de la comisión interna de bioseguridad de la institución, centro o empresa en donde se realicen las actividades de enseñanza e investigación científica y tecnológica en las que se genere y produzca el OGM de que se trate;

II. En los casos a que se refieren las fracciones IV y V del artículo 79, el representante legal de la empresa en la que se produzcan los OGMs de que se trate, y

III. En el caso a que se refiere el artículo anterior, el importador del OGM.

ARTÍCULO 82.- Se exceptúa de la presentación de aviso, la utilización confinada o importación para esa actividad, en caso de que el OGM de que se trate se exente de dicho requisito en las listas que expidan las Secretarías conforme a esta Ley.

ARTÍCULO 83.- La utilización confinada de OGMs y la importación de dichos organismos para esa actividad, podrá realizarse a partir del momento en que la comisión interna de bioseguridad o el importador, según se trate, presente el aviso respectivo a la Secretaría correspondiente.

ARTÍCULO 84.- Una vez presentado el aviso, la Secretaría correspondiente podrá determinar, en su caso, con sustento científico y técnico:

I. Que en consideración del organismo genéticamente modificado y los posibles riesgos en su manejo, debe suspenderse la actividad;

II. En su caso, podrá resolver que la utilización confinada requiere de la adopción e implementación de requisitos y medidas de bioseguridad adicionales a los señalados por el propio interesado en el aviso, las cuales serán determinadas por dicha Secretaría, y deberán ser observadas y cumplidas por el interesado para continuar la realización de la actividad, o

III. La prohibición de la utilización confinada del organismo genéticamente modificado de que se trate o su importación para esa actividad.

Dicha resolución podrá ser impugnada a través del recurso de revisión establecido en el presente ordenamiento.

ARTÍCULO 85.- Las personas cuya actividad de utilización confinada esté sujeta al requisito de presentación de aviso estarán obligadas a observar y cumplir las demás disposiciones del presente ordenamiento y de las normas oficiales mexicanas que deriven del mismo, en lo que le sea aplicable.

TÍTULO CUARTO
Zonas Restringidas

CAPÍTULO I
Centros de Origen y de Diversidad Genética

ARTÍCULO 86.- Las especies de las que los Estados Unidos Mexicanos sea centro de origen y de diversidad genética así como las áreas geográficas en las que se localicen, serán determinadas conjuntamente mediante acuerdos por la SEMARNAT y la SAGARPA, con base en la información con la que cuenten en sus archivos o en sus bases de datos, incluyendo la que proporcione, entre otros, el Instituto Nacional de Estadística, Geografía e Informática, el Instituto Nacional de Investigaciones Forestales, Agrícolas y Pecuarias, el Instituto Nacional de Ecología, la Comisión Nacional para el Conocimiento y Uso de la Biodiversidad y la Comisión Nacional Forestal, así como los acuerdos y tratados internacionales relativos a estas materias. La SEMARNAT y la SAGARPA establecerán en los acuerdos que expidan, las medidas necesarias para la protección de dichas especies y áreas geográficas.

ARTÍCULO 87.- Para la determinación de los centros de origen y de diversidad genética se tomarán en cuenta los siguientes criterios:

I. Que se consideren centros de diversidad genética, entendiendo por éstos las regiones que actualmente albergan poblaciones de los parientes silvestres del OGM de que se trate, incluyendo diferentes razas o variedades del mismo, las cuales constituyen una reserva genética del material, y

II. En el caso de cultivos, las regiones geográficas en donde el organismo de que se trate fue domesticado, siempre y cuando estas regiones sean centros de diversidad genética.

ARTÍCULO 88.- En los centros de origen y de diversidad genética de especies animales y vegetales sólo se permitirá la realización de liberaciones de OGMs cuando se trate de OGMs distintos a las especies nativas, siempre que su liberación no cause una afectación negativa a la salud humana o a la diversidad biológica.

CAPÍTULO II
De las Actividades con OGMs en Áreas Naturales Protegidas

ARTÍCULO 89.- En las áreas naturales protegidas creadas de conformidad con lo dispuesto en la materia, sólo se permitirán actividades con OGMs para fines de biorremediación, en los casos en que aparezcan plagas o contaminantes que pudieran poner en peligro la existencia de especies animales, vegetales o acuícolas, y los OGMs hayan sido creados para evitar o combatir dicha situación, siempre que se cuente con los elementos científicos y técnicos necesarios que soporten el beneficio ambiental que se pretende obtener, y dichas actividades sean permitidas por la SEMARNAT en los términos de esta Ley.

Para los efectos de lo dispuesto en el párrafo anterior, queda prohibido realizar actividades con OGMs en las zonas núcleo de las áreas naturales protegidas.

En caso de que algún centro de origen o centro de diversidad genética se ubique dentro de alguna área natural protegida, las declaratorias de creación y los programas de manejo de dichas áreas se modificarán en los términos de la legislación de la materia, conforme se realicen las determinaciones a que se refiere el Artículo 86 de la presente Ley.

CAPÍTULO III
Zonas Libres de OGMs

ARTÍCULO 90.- Se podrán establecer zonas libres de OGMs para la protección de productos agrícolas orgánicos y otros de interés de la comunidad solicitante, conforme a los siguientes lineamientos generales:

I. Las zonas libres se establecerán cuando se trate de OGMs de la misma especie a las que se produzcan mediante procesos de producción de productos agrícolas orgánicos, y se demuestre científica y técnicamente que no es viable su coexistencia o que no cumplirían con los requisitos normativos para su certificación;

II. Dichas zonas serán determinadas por la SAGARPA mediante acuerdos que se publicarán en el **Diario Oficial de la Federación**, previo dictamen de la CIBIOGEM, con la opinión de la Comisión Nacional para el Conocimiento y Uso de la Biodiversidad, tomando en cuenta lo establecido en las normas oficiales mexicanas relativas a los productos agrícolas orgánicos;

III. La determinación de las zonas libres se realizará con base en los siguientes requisitos:

A. Se hará a solicitud escrita de las comunidades interesadas, por conducto de su representante legal;

B. Dicha solicitud deberá acompañarse de la opinión favorable de los gobiernos de las entidades federativas y los gobiernos municipales de los lugares o regiones que se determinarán como zonas libres;

C. Se realizarán las evaluaciones de los efectos que los OGMs pudieran ocasionar a los procesos de producción de productos agrícolas orgánicos o a la biodiversidad, mediante las cuales quede demostrado, científica y técnicamente, que no es viable su coexistencia o no cumplan con los requisitos normativos para su certificación, de acuerdo con las normas oficiales mexicanas que expida la SAGARPA. Las evaluaciones mencionadas se realizarán conforme lo establezca dicha Secretaría en normas oficiales mexicanas, y

IV. La SAGARPA establecerá en los acuerdos las medidas de seguridad que se podrán adoptar en las zonas libres de OGMs, a fin de garantizar la adecuada protección de los productos agrícolas orgánicos.

TÍTULO QUINTO
De la Protección de la Salud Humana en relación con los OGMs

CAPÍTULO I
De las Autorizaciones de OGMs

ARTÍCULO 91.- Los OGMs objeto de autorización son los siguientes:

I. Los que se destinen a su uso o consumo humano, incluyendo granos;

II. Los que se destinen al procesamiento de alimentos para consumo humano;

III. Los que tengan finalidades de salud pública, y

IV. Los que se destinen a la biorremediación.

Para los efectos de esta Ley, también se consideran OGMs para uso o consumo humano aquellos que sean para consumo animal y que puedan ser consumidos directamente por el ser humano.

ARTÍCULO 92.- La solicitud de autorización de un OGM deberá acompañarse de los siguientes requisitos:

I. El estudio de los posibles riesgos que el uso o consumo humano del OGM de que se trate pudiera representar a la salud humana, en el que se incluirá la información científica y técnica relativa a su inocuidad, y

II. Los demás requisitos que se determinen en las normas oficiales mexicanas que deriven de esta Ley.

Los lineamientos, criterios, características y requisitos de los estudios de los posibles riesgos que los OGMs puedan causar a la salud humana, serán determinados por la SSA en las normas oficiales mexicanas que expida conforme a esta Ley.

ARTÍCULO 93.- En el caso de solicitudes de autorización de un OGM para poder realizar su importación para las finalidades a que se refiere el artículo 91 de esta Ley, además de lo establecido en el artículo anterior, el interesado deberá adjuntar la información y documentación que acredite que el OGM esté autorizado conforme la legislación del país de origen. En su defecto, el interesado manifestará la inexistencia de dicha situación, y expondrá los elementos de consideración que sustenten el que la SSA pueda resolver la solicitud de autorización.

ARTÍCULO 94.- Una vez que la SSA reciba una solicitud de autorización, y siempre y cuando cumpla con la información y los requisitos establecidos en esta Ley, deberá remitirla al Registro, para su inscripción y publicidad respectivas.

ARTÍCULO 95.- Las autorizaciones deberán ser expedidas en un plazo no mayor a seis meses contados a partir de que la SSA reciba la solicitud de autorización por parte del interesado y la información aportada en dicha solicitud esté completa.

ARTÍCULO 96.- La SSA expedirá su resolución, una vez que haya analizado la información y documentación aportados por el interesado. Dicha Secretaría en su resolución podrá, fundada y motivadamente:

I. Expedir la autorización, o

II. Negar la autorización en los siguientes casos:

A) Cuando la solicitud no cumpla con lo establecido en esta Ley o las normas oficiales mexicanas como requisitos para el otorgamiento de la autorización;

B) Cuando la información proporcionada por el interesado sea falsa, esté incompleta o sea insuficiente, o

C) Cuando la SSA concluya que los riesgos que pueden presentar dichos organismos afectarán negativamente a la salud humana, pudiéndole causar daños graves o irreversibles.

La SSA basará sus resoluciones de acuerdo con la identificación científica y técnicamente sustentada de los posibles riesgos que pudieran generar los OGMs, y de la posibilidad real de afectación a la salud humana por dichos organismos.

ARTÍCULO 97.- Los OGMs autorizados por la SSA podrán ser libremente comercializados e importados para su comercialización, al igual que los productos que contengan dichos organismos y los productos derivados de los mismos. Lo anterior sin perjuicio de que dichos organismos autorizados, los productos que los contengan y los productos derivados queden sujetos al régimen de control sanitario

general que establece la Ley General de Salud y sus reglamentos y, en caso de que les sean aplicables, los requisitos fitozoosanitarios que correspondan.

ARTÍCULO 98.- Serán aplicables al procedimiento administrativo de autorización, las disposiciones relativas del Título Segundo, en cuanto a la Reconsideración de las Resoluciones Negativas, Revisión de los Permisos y Confidencialidad.

CAPÍTULO II
Disposiciones Adicionales

ARTÍCULO 99.- El envasado de OGMs y de productos que los contengan, para uso o consumo humano, se regirá por las normas oficiales mexicanas que expida la SSA, conjuntamente con la Secretaría de Economía, de conformidad con la Ley General de Salud y sus disposiciones reglamentarias, y con la Ley Federal sobre Metrología y Normalización.

ARTÍCULO 100.- El desarrollo, producción, comercialización y en general proceso de OGMs con efectos terapéuticos, adicionalmente a lo establecido en esta Ley, estará sujeto a lo dispuesto por la Ley General de Salud y demás ordenamientos aplicables a medicamentos y fármacos.

TÍTULO SEXTO
Etiquetado e Identificación de OGMs

ARTÍCULO 101.- Los OGMs o productos que contengan organismos genéticamente modificados, autorizados por la SSA por su inocuidad en los términos de esta Ley y que sean para consumo humano directo, deberán garantizar la referencia explícita de organismos genéticamente modificados y señalar en la etiqueta la información de su composición alimenticia o sus propiedades nutrimentales, en aquellos casos en que estas características sean significativamente diferentes respecto de los productos convencionales, y además cumplir con los requisitos generales adicionales de etiquetado conforme a las normas oficiales mexicanas que expida la SSA, de acuerdo con lo dispuesto en la Ley General de Salud y sus disposiciones reglamentarias, con la participación de la Secretaría de Economía.

La información que contengan las etiquetas, conforme a lo establecido en este artículo, deberá ser veraz, objetiva, clara, entendible, útil para el consumidor y sustentada en información científica y técnica.

El etiquetado de OGMs que sean semillas o material vegetativo destinados a siembra, cultivo y producción agrícola, quedará sujeto a las normas oficiales mexicanas que expida la SAGARPA con la participación de la Secretaría de Economía. Respecto de este tipo de OGMs, será obligatorio consignar en la etiqueta que se trata de organismos genéticamente modificados, las características de la combinación genética adquirida y sus implicaciones relativas a condiciones especiales y requerimientos de cultivo, así como los cambios en las características reproductivas y productivas.

La evaluación de la conformidad de dichas normas oficiales mexicanas la realizarán la SSA, la SAGARPA y la Secretaría de Economía en el ámbito de sus respectivas competencias y las personas acreditadas y aprobadas conforme a lo dispuesto en la Ley Federal sobre Metrología y Normalización.

ARTÍCULO 102.- Los requisitos de información que deberá contener la documentación que acompañe a los OGMs que se importen conforme a esta Ley, se establecerán en normas oficiales mexicanas que deriven del presente ordenamiento, considerando en su expedición la finalidad a la que se destinen dichos organismos y lo que se establezca en tratados internacionales de los que los Estados Unidos Mexicanos sean parte. Las normas oficiales mexicanas a que se refiere este artículo, serán expedidas conjuntamente por la SAGARPA, la SSA y la Secretaría de Economía. En caso de que la importación de

OGMs se realice con la finalidad de su liberación al ambiente, las normas oficiales mexicanas a que se refiere este artículo serán expedidas por las Secretarías señaladas conjuntamente con la SEMARNAT.

TÍTULO SÉPTIMO
De las Listas de OGMs

ARTÍCULO 103.- Las listas de OGMs que conforme a esta Ley se expidan y publiquen serán las siguientes:

I. Las de OGMs que cuenten con permiso para su liberación comercial o para su importación para esa actividad;

II. Las de OGMs que no cuenten con permiso para su liberación comercial o para su importación para esa actividad;

III. Las de OGMs que cuenten con autorización por la SSA, y

IV. Las de OGMs para realizar actividades de utilización confinada de OGMs con fines de enseñanza y de investigación científica y tecnológica.

Las listas de OGMs a que se refiere este artículo serán expedidas y publicadas por las Secretarías competentes con la periodicidad que establezcan las disposiciones reglamentarias que deriven de esta Ley y de acuerdo a lo establecido en el presente Título. Tendrán como finalidad dar a conocer a los interesados y al público en general el resultado de las resoluciones que expidan respecto de las solicitudes de permisos y autorizaciones.

ARTÍCULO 104.- La lista de OGMs a que se refieren las fracciones I y II del artículo anterior será elaborada considerando los resultados de la evaluación caso por caso y expedida conjuntamente por la SEMARNAT, la SSA y la SAGARPA, y se publicará para su conocimiento y difusión en el **Diario Oficial de la Federación**.

Las finalidades de la lista a que se refiere este artículo serán:

I. Indicar la situación jurídica en que se encuentren esos OGMs, y

II. Determinar los casos en los cuales los OGMs permitidos para su liberación comercial o para su importación para esa actividad puedan ser liberados e importados libremente en las áreas geográficas que se determinen conforme al análisis caso por caso.

En dicha lista, las Secretarías correspondientes podrán indicar los casos en que la importación, el uso, manejo y liberación de dichos organismos puedan realizarse sin condiciones, así como los casos en que se deban cumplir condiciones específicas.

ARTÍCULO 105.- La lista de OGMs que cuenten con autorización, será elaborada y expedida por la SSA, considerando los resultados de la evaluación caso por caso de los posibles riesgos de dichos organismos para la salud humana, y se publicará para su conocimiento y difusión en el **Diario Oficial de la Federación**. Sus finalidades serán indicar la situación jurídica en que se encuentren esos OGMs, y determinar los casos en los cuales los OGMs autorizados conforme a esta Ley puedan ser comercializados e importados.

ARTÍCULO 106.- La lista de OGMs para realizar actividades de utilización confinada de dichos organismos con fines de enseñanza y de investigación científica y tecnológica será expedida

conjuntamente por las Secretarías, y se publicará para su conocimiento y difusión en el **Diario Oficial de la Federación**.

ARTÍCULO 107.- En la formulación, expedición y modificación de las listas informativas de OGMs, se estará a lo que se establezca en las disposiciones reglamentarias que deriven del presente ordenamiento, tomando en cuenta los siguientes lineamientos:

Se formularán atendiendo:

I. La naturaleza del organismo genéticamente modificado;

II. La presencia en el país o región de interés, de especies sexualmente compatibles con el organismo genéticamente modificado;

III. El tipo de reproducción sexual del organismo genéticamente modificado y las especies nativas sexualmente compatibles;

IV. La naturaleza del organismo receptor o parental;

V. Las características del vector y del inserto de material genético utilizados en la operación;

VI. La capacidad y forma de propagación de los organismos genéticamente modificados;

VII. La existencia de especies silvestres parientes en alguna área o región del territorio nacional que sea su centro de origen;

VIII. La escala o volumen de manejo, y

IX. Los posibles efectos o riesgos que las distintas actividades con dichos organismos pudieran causar al medio ambiente y a la diversidad biológica o a la salud humana o a la sanidad animal, vegetal o acuícola.

TÍTULO OCTAVO
De la Información sobre Bioseguridad

CAPÍTULO I
Del Sistema Nacional de Información sobre Bioseguridad

ARTÍCULO 108.- La CIBIOGEM, a través de su Secretaría Ejecutiva, desarrollará el Sistema Nacional de Información sobre Bioseguridad que tendrá por objeto organizar, actualizar y difundir la información sobre bioseguridad. En dicho Sistema, la CIBIOGEM deberá integrar, entre otros aspectos, la información correspondiente al Registro.

La CIBIOGEM reunirá informes y documentos relevantes que resulten de las actividades científicas, académicas, trabajos técnicos o de cualquier otra índole en materia de bioseguridad, incluyendo la inocuidad de OGMs, realizados por personas físicas o morales, nacionales o extranjeras, los que serán remitidos y organizados por el Sistema Nacional de Información sobre Bioseguridad. Además, elaborará y publicará anualmente un informe detallado de la situación general existente en el país en materia de biotecnología y bioseguridad materia de esta Ley.

La CIBIOGEM, además, realizará los estudios y las consideraciones socioeconómicas resultantes de los efectos de los OGMs que se liberen al ambiente en el territorio nacional, y establecerá los

mecanismos para realizar la consulta y participación de los pueblos y comunidades indígenas asentadas en las zonas donde se pretenda la liberación de OGMs, considerando el valor de la diversidad biológica.

Asimismo, la Secretaría Ejecutiva de la CIBIOGEM fungirá como Centro Focal Nacional ante el Secretariado del Protocolo de Cartagena sobre Seguridad de la Biotecnología del Convenio sobre la Diversidad Biológica, siendo la responsable del enlace con dicho Secretariado y de dar cumplimiento a lo establecido en el Artículo 19 de dicho Tratado Internacional. La Secretaría Ejecutiva de la CIBIOGEM también se encargará de proporcionar al Centro de Intercambio de Información sobre Seguridad de la Biotecnología establecido en el mencionado Protocolo, cualquier información sobre:

I. Leyes, reglamentos y directrices nacionales existentes para la aplicación del Protocolo, así como la información y documentación que se requiera, en términos de esta Ley, para el procedimiento administrativo de permisos de importación de OGMs para ser liberados experimental, en programa piloto o comercialmente;

II. Acuerdos y arreglos bilaterales, regionales y multilaterales;

III. Resúmenes de las evaluaciones de riesgo de OGMs, así como información pertinente sobre productos derivados de OGMs;

IV. Las resoluciones definitivas acerca de la importación o liberación al ambiente de OGMs, así como de la modificación de resoluciones derivada de su revisión conforme a esta Ley;

V. Los efectos socioeconómicos de los OGMs, especialmente en las comunidades indígenas y locales, y

VI. Los informes sobre el cumplimiento de las obligaciones establecidas en el Protocolo, incluidos los relativos a la aplicación del procedimiento de importación de OGMs para ser liberados al ambiente en forma experimental, en programa piloto o comercial.

Las Secretarías competentes podrán proporcionar de manera directa al Centro de Intercambio de Información sobre Seguridad de la Biotecnología, la información a que se refieren las fracciones anteriores, informando simultáneamente a la Secretaría Ejecutiva de la CIBIOGEM.

CAPÍTULO II
Del Registro Nacional de Bioseguridad de los OGMs

ARTÍCULO 109.- El Registro, que estará a cargo de la Secretaría Ejecutiva de la CIBIOGEM, tendrá carácter público y tiene por objeto la inscripción de la información relativa a las actividades con OGMs, así como de los propios organismos. Su funcionamiento y lo que puede ser objeto de inscripción se determinarán en las disposiciones reglamentarias que deriven de esta Ley. La SEMARNAT, la SAGARPA y la SSA contribuirán a la organización y funcionamiento del Registro.

TÍTULO NOVENO
De las Normas Oficiales Mexicanas en Materia de Bioseguridad

ARTÍCULO 110.- Para garantizar la bioseguridad de las actividades con OGMs, las Secretarías, de manera conjunta o con la participación de otras dependencias de la Administración Pública Federal, expedirán normas oficiales mexicanas que tengan por objeto establecer lineamientos, criterios, especificaciones técnicas y procedimientos conforme a las disposiciones de esta Ley.

ARTÍCULO 111.- En la formulación de normas oficiales mexicanas en materia de bioseguridad deberá considerarse que el cumplimiento de sus previsiones deberá realizarse de conformidad con las características de cada actividad o proceso productivo con OGMs.

ARTÍCULO 112.- La aplicación de las normas oficiales mexicanas en materia de bioseguridad, así como los actos de inspección y vigilancia corresponderán exclusivamente a las Secretarías competentes en los términos de esta Ley. El cumplimiento de dichas normas podrá ser evaluado por los organismos de certificación, unidades de verificación y laboratorios de pruebas aprobados por dichas Secretarías de conformidad con las disposiciones reglamentarias que deriven del presente ordenamiento y con la Ley Federal sobre Metrología y Normalización.

TÍTULO DÉCIMO
Inspección y Vigilancia y Medidas de Seguridad o de Urgente Aplicación

CAPÍTULO I
Inspección y Vigilancia

ARTÍCULO 113.- Para verificar y comprobar el cumplimiento de esta Ley, sus reglamentos y las normas oficiales mexicanas que de ella deriven, las Secretarías competentes podrán realizar por conducto de personal debidamente autorizado, los actos de inspección y vigilancia que consideren necesarios, por conducto de las Unidades Administrativas facultadas legalmente para ello, conforme a esta Ley.

ARTÍCULO 114.- Por lo que hace a los requisitos y formalidades que deben observarse en la realización de visitas de inspección y vigilancia, son aplicables supletoriamente a este Capítulo las disposiciones del Capítulo Decimoprimero del Título Tercero de la Ley Federal de Procedimiento Administrativo. En materia de restauración o compensación de daños al medio ambiente o a la diversidad biológica, podrá ser aplicable lo dispuesto en el segundo párrafo del Artículo 168 de la Ley General del Equilibrio Ecológico y la Protección al Ambiente.

CAPÍTULO II
Medidas de Seguridad o de Urgente Aplicación

ARTÍCULO 115.- Las Secretarías, en el ámbito de su competencia conforme a esta Ley, ordenarán alguna o algunas de las medidas que se establecen en este artículo, en caso de que en la realización de actividades con OGMs se presente lo siguiente:

I. Surjan riesgos no previstos originalmente, que pudieran causar daños o efectos adversos y significativos a la salud humana o a la diversidad biológica o a la sanidad animal, vegetal o acuícola;

II. Se causen daños o efectos adversos y significativos a la salud humana o a la diversidad biológica o a la sanidad animal, vegetal o acuícola, o

III. Se liberen accidentalmente OGMs no permitidos y/o no autorizados al ambiente.

En estos casos, las medidas podrán ser las siguientes:

A. Clausura temporal, parcial o total, de los lugares y/o de las instalaciones en que se manejen o almacenen OGMs o se desarrollen las actividades que den lugar a los supuestos que originan la imposición de la medida;

B. El aseguramiento precautorio de OGMs, además de los bienes, vehículos, utensilios e instrumentos directamente relacionados con la acción u omisión que da lugar a la medida;

C. La suspensión temporal, total o parcial, de la actividad que motive la imposición de la medida;

D. La repatriación de OGMs a su país de origen;

E. La realización de las acciones y medidas necesarias para evitar que se continúen presentando los supuestos que motiven la imposición de la medida, y

F. La destrucción de OGMs de que se trate, a costa del interesado, para lo cual se deberá atender lo siguiente:

a) Procederá únicamente en caso de que los riesgos o daños sean graves o irreparables, y sólo mediante la imposición de esta medida sea posible evitar, atenuar o mitigar los riesgos o daños que la motivaron;

b) Para determinar la imposición de la medida, la Secretaría competente deberá emitir un dictamen, sustentado técnica y científicamente, mediante el cual se justifique la procedencia de la destrucción del OGM de que se trate, debiéndolo hacer del conocimiento del interesado, para que éste dentro de los cinco días siguientes exponga lo que a su derecho convenga y, en su caso, aporte las pruebas con que cuente, y

c) En tanto la Secretaría competente dicta la resolución que proceda, podrá ordenar, de manera previa, el aseguramiento precautorio de los OGMs, pudiéndolo llevar a cabo la propia Secretaría o a través del interesado.

Asimismo, la Secretaría competente que imponga las medidas a que se refiere este artículo podrá promover ante las otras Secretarías competentes, la ejecución de alguna o algunas medidas que se establezcan en otros ordenamientos.

ARTÍCULO 116.- Cuando las Secretarías competentes ordenen alguna de las medidas previstas en el artículo anterior, indicarán al interesado las acciones que debe llevar a cabo para subsanar las irregularidades que motivaron la imposición de dichas medidas, así como los plazos para su realización, a fin de que una vez cumplidas éstas, se ordene el retiro de las medidas impuestas.

Si el interesado se rehusare a llevar a cabo las acciones para subsanar las irregularidades que motivaron la imposición de la o las medidas de que se trate, la Secretaría que las haya impuesto las realizará inmediatamente, con cargo total al interesado renuente.

En el caso en que el interesado realice las medidas de seguridad o de urgente aplicación o subsane las irregularidades en que hubiere incurrido, previamente a que la Secretaría competente imponga alguna o algunas de las sanciones establecidas en esta Ley, dicha Secretaría deberá considerar tal situación como atenuante de la infracción cometida.

ARTÍCULO 117.- En caso de liberaciones accidentales de OGMs que se verifiquen en el territorio nacional, y que pudieran tener efectos adversos significativos a la diversidad biológica o a la salud humana de otro país, la Secretaría competente notificará tal situación a la autoridad correspondiente del país que pudiera resultar afectado por dicha liberación. Dicha notificación deberá incluir:

I. Información sobre las cantidades estimadas y las características y/o rasgos importantes del OGM;

II. Información sobre las circunstancias y la fecha estimada de la liberación accidental, así como el uso que tiene el OGM en el territorio nacional;

III. Información disponible sobre los posibles efectos adversos para la diversidad biológica y la salud humana;

IV. Información disponible sobre las posibles medidas de regulación, atención y control del riesgo, y

V. Un punto de contacto para obtener información adicional.

Sin perjuicio de lo anterior, las Secretarías, en el ámbito de sus competencias conforme a esta Ley, realizarán las acciones y medidas necesarias para reducir al mínimo cualquier riesgo o efecto adverso que los OGMs liberados accidentalmente pudieran ocasionar. Dichas acciones y medidas serán ordenadas por las Secretarías a quien haya ocasionado la liberación accidental de OGMs al ambiente, quien deberá cumplirlas de manera inmediata. En caso contrario, las Secretarías procederán conforme a lo establecido en el segundo párrafo del artículo anterior.

ARTÍCULO 118.- Son aplicables supletoriamente a este Capítulo las disposiciones del Capítulo Único del Título Quinto de la Ley Federal de Procedimiento Administrativo, excepto para lo dispuesto en el artículo anterior.

TÍTULO DECIMOPRIMERO
Infracciones, Sanciones y Responsabilidades

CAPÍTULO I
De las Infracciones

ARTÍCULO 119.- Incurre en infracciones administrativas a las disposiciones de esta Ley, la persona que, con pleno conocimiento de que se trata de OGMs:

I. Realice actividades con OGMs sin contar con los permisos y las autorizaciones respectivas;

II. Realice actividades con OGMs incumpliendo los términos y condiciones establecidos en los permisos y las autorizaciones respectivas;

III. Realice actividades de utilización confinada de OGMs, sin presentar los avisos en los términos establecidos en esta Ley;

IV. Realice actividades con OGMs que se encuentren sujetas o exentas de la presentación de aviso, incumpliendo las demás disposiciones de esta Ley, sus reglamentos y las normas oficiales mexicanas que deriven de aquella, que resulten aplicables a la actividad de que se trate o que sean comunes a todas las actividades en materia de bioseguridad;

V. Presente a las Secretarías competentes, información y/o documentación a que se refiere este ordenamiento que sea falsa, incluyendo la relativa a los posibles riesgos que las actividades con OGMs pudieran ocasionar a la salud humana o a la diversidad biológica;

VI. Incumpla las medidas sanitarias, de monitoreo, control y prevención señaladas por los interesados en la información y documentación aportada para obtener los permisos y las autorizaciones respectivas, y las establecidas por las Secretarías en los propios permisos y autorizaciones;

VII. Incumpla las medidas de control y de respuesta en caso de emergencia señaladas por los interesados en sus estudios de los posibles riesgos que las actividades con OGMs puedan ocasionar a la salud humana o a la diversidad biológica o a la sanidad animal, vegetal o acuícola;

VIII. Incumpla la obligación de informar o hacer del conocimiento a las Secretarías, en los supuestos establecidos en esta Ley;

IX. Incumpla la obligación de adoptar e implementar los requisitos y medidas adicionales de bioseguridad determinadas por las Secretarías, en los casos de actividades de utilización confinada sujetas a aviso, en que así se determine;

X. Incumpla la obligación de revisar, implantar o adoptar nuevas medidas sanitarias, de monitoreo, control y prevención, en los casos en que así lo determinen las Secretarías competentes conforme a lo dispuesto en esta Ley;

XI. Realice actividades con OGMs o con cualquier otro organismo cuya finalidad sea la fabricación y/o utilización de armas biológicas;

XII. Realice liberaciones de OGMs en los centros de origen y de diversidad genética, fuera de los casos establecidos en la presente Ley;

XIII. Realice actividades con OGMs en las áreas naturales protegidas señaladas en esta Ley, fuera de los casos establecidos por la misma;

XIV. Incumpla la obligación de informar a la SEMARNAT o a la SAGARPA, según su ámbito de competencia conforme a esta Ley, mediante el reporte correspondiente, los resultados de la realización de liberaciones experimentales o de liberaciones en programa piloto, que cuenten con el permiso respectivo;

XV. Importe OGMs que se encuentren prohibidos en el país de origen o se encuentren clasificados como no permitidos para su liberación comercial o para su importación para esa actividad en las listas a que se refiere esta Ley, cuando las Secretarías correspondientes no hubieren determinado positivamente que esas prohibiciones no son aplicables en el territorio nacional;

XVI. Presente los avisos a las Secretarías correspondientes sin ser firmados por la persona que debe hacerlo de conformidad con esta Ley;

XVII. No lleve y/o no proporcione a la Secretaría correspondiente el libro de registro de las actividades que se realicen en utilización confinada, en los términos establecidos en esta Ley y en las normas oficiales mexicanas que de ella deriven;

XVIII. No suspenda la actividad de utilización confinada en los casos en que las Secretarías correspondientes, una vez presentado el aviso por el interesado, determinen dicha situación y, en su caso, que la actividad requiere de requisitos o medidas de bioseguridad adicionales para continuar su realización;

XIX. Realice actividades de utilización confinada dejando de aplicar las medidas de confinamiento y de tratamiento, disposición final y eliminación de residuos de OGMs generados en la realización de la actividad;

XX. Incumpla las disposiciones relativas a la generación, tratamiento, confinamiento, disposición final, destrucción o eliminación de residuos de OGMs, que se establezcan en las normas oficiales mexicanas que deriven del presente ordenamiento;

XXI. No integre las comisiones internas de bioseguridad en los casos, formas y plazos que establezcan las disposiciones reglamentarias que deriven de esta Ley;

XXII. Incumpla la obligación de llevar a cabo las acciones y medidas de seguridad o de urgente aplicación que establezcan las Secretarías competentes, en los casos y términos establecidos en esta Ley;

XXIII. Incumpla lo dispuesto en esta Ley y en las normas oficiales mexicanas que deriven de la misma, relativas al etiquetado de productos que contengan OGMs y productos derivados de dichos organismos;

XXIV. Incumpla lo dispuesto en este ordenamiento y en las normas oficiales mexicanas que deriven del mismo, relativas a la identificación de OGMs;

XXV. Realice actividades de utilización confinada de OGMs, distintas a las manifestadas en los avisos presentados en los términos de esta Ley;

XXVI. Realice actividades con OGMs distintas de las permitidas, o destine los OGMs a fines diferentes de los permitidos o autorizados;

XXVII. Libere intencionalmente OGMs al ambiente sin contar con los permisos de liberación y, en su caso, las autorizaciones, que correspondan conforme a esta Ley, y

XXVIII. Libere al ambiente OGMs que hayan sido importados o producidos en el territorio nacional, en los términos de esta Ley, para consumo directo humano o animal, para procesamiento de alimentos para consumo humano, o para otros usos distintos a su liberación al ambiente.

CAPÍTULO II
De las Sanciones

ARTÍCULO 120.- Las infracciones a los preceptos de esta Ley, sus reglamentos y las normas oficiales mexicanas que de ella deriven, señaladas en el artículo anterior, serán sancionadas administrativamente por las Secretarías competentes, con una o más de las siguientes sanciones:

I. Multa de quinientos a quince mil días de salario mínimo general vigente en el Distrito Federal a quien cometa las infracciones previstas en las fracciones IV, V, VIII, XIV, XVI, XVII, y XXI del artículo 119 de esta Ley;

II. Multa de quince mil uno a treinta mil días de salario mínimo general vigente en el Distrito Federal a quien cometa las infracciones previstas en las fracciones I, II, III, VI, VII, IX, X, XI, XII, XIII, XV, XVIII, XIX, XX, XXII, XXIII, XXIV, XXV, XXVI y XXVII del artículo 119 de este ordenamiento.

En el caso de reincidencia, se duplicará el monto de la multa que corresponda. Para los efectos de esta fracción, se considera reincidente al infractor que incurra más de una vez en conductas que impliquen infracciones a un mismo precepto, en un periodo de dos años, contados a partir de la fecha en que la Secretaría competente determine mediante una resolución definitiva la comisión de la primera infracción, y siempre que ésta no hubiese sido desvirtuada;

III. Clausura temporal o definitiva, parcial o total, de las instalaciones en las que se hayan cometido las infracciones cuando:

A) Las infracciones generen posibles riesgos o efectos adversos a la salud humana o a la diversidad biológica o a la sanidad animal, vegetal o acuícola;

B) El infractor no hubiere cumplido en los plazos y condiciones impuestas por las Secretarías competentes, con las medidas de seguridad o de urgente aplicación ordenadas, o

C) Se trate de desobediencia reiterada al cumplimiento de alguna o algunas medidas de seguridad o de urgente aplicación impuestas por las Secretarías competentes;

IV. El decomiso de los instrumentos, ejemplares, organismos obtenidos o productos relacionados directamente con las infracciones cometidas;

V. La suspensión o revocación de los permisos y las autorizaciones correspondientes;

VI. Arresto administrativo hasta por treinta y seis horas, y

VII. Prohibición de la liberación experimental, de la liberación en programa piloto o de la comercialización de OGMs o de los productos que los contengan.

ARTÍCULO 121.- Con independencia de lo dispuesto en el Artículo anterior, toda persona que, con pleno conocimiento de que se trata de OGMs, cause daños a terceros en sus bienes o a su salud, por el uso o manejo indebido de dichos organismos, será responsable y estará obligada a repararlos en los términos de la legislación civil federal. Igual obligación asumirá la persona que dañe el medio ambiente o la diversidad biológica, por el uso o manejo indebido de OGMs, para lo cual será aplicable lo dispuesto en el Artículo 203 de la Ley General del Equilibrio Ecológico y la Protección al Ambiente.

Las personas afectadas directamente en sus bienes podrán solicitar al juez, que requiera a la Secretaría competente para que, por conducto de su respectivo comité técnico científico que establezca conforme a este ordenamiento, elabore un dictamen técnico cuyo objeto sea demostrar la existencia del daño, y sirva de base al juez para determinar, en su caso, la forma de su reparación. El dictamen técnico que se expida no generará costo alguno a cargo de los solicitantes.

En el caso de daños al medio ambiente o a la diversidad biológica, la SEMARNAT, a través de la Procuraduría Federal de Protección al Ambiente, ejercerá la acción de responsabilidad, pudiéndolo hacer en cualquiera de las siguientes formas:

I. De oficio, con base en el expediente relativo a actos de inspección y vigilancia que hayan concluido en definitiva, se haya determinado la comisión de infracciones a esta Ley y esta determinación no haya sido desvirtuada por cualquier medio de impugnación, o

II. Por denuncia, presentada por miembros de la comunidad afectada, de actos que pudieran contravenir lo establecido en esta Ley y demás disposiciones que de ella emanen. La denuncia deberá acompañarse de la información técnica y científica que la sustente, con la participación del Consejo Consultivo Científico de la CIBIOGEM, previa opinión de la Comisión Nacional para el Conocimiento y Uso de la Biodiversidad.

En los casos a que se refieren las fracciones anteriores, la Procuraduría Federal de Protección al Ambiente procederá a ejercitar la acción de responsabilidad con base en el dictamen técnico que para tal efecto elabore el comité técnico científico de la SEMARNAT. Para la formulación del dictamen, el comité técnico científico evaluará la información y los elementos con que cuente la Procuraduría Federal de Protección al Ambiente, sea que obren en el expediente administrativo o los que aporten los denunciantes, respectivamente, y determinará, en su caso, la existencia del daño. Serán competentes para conocer sobre las acciones de responsabilidad por daños al medio ambiente o a la diversidad

biológica en los términos de este Artículo, los juzgados de distrito en materia civil, conforme a la competencia territorial establecida en las disposiciones respectivas.

Las sanciones administrativas establecidas en el Artículo anterior se aplicarán sin perjuicio, en su caso, de las penas que correspondan cuando los actos u omisiones constitutivos de infracciones a esta Ley, sean también constitutivos de delito conforme a las disposiciones aplicables del Código Penal Federal.

ARTÍCULO 122.- Son aplicables supletoriamente a este Capítulo en cuanto a responsabilidades administrativas, las disposiciones del Capítulo Único del Título Cuarto de la Ley Federal de Procedimiento Administrativo, con excepción del artículo 70-A de dicho ordenamiento.

TÍTULO DECIMOSEGUNDO
Recurso de Revisión

ARTÍCULO 123.- Las resoluciones definitivas dictadas en los procedimientos administrativos con motivo de la aplicación de esta Ley, sus reglamentos y las normas que de ella deriven, podrán ser impugnadas por los afectados mediante el recurso de revisión, dentro de los quince días siguientes a la fecha de su notificación, o ante las instancias jurisdiccionales competentes.

El recurso de revisión se interpondrá directamente ante la Secretaría que emitió la resolución impugnada, quien en su caso, otorgará su admisión, y el otorgamiento o la denegación de la suspensión del acto recurrido, turnando el recurso a su superior jerárquico en la misma Secretaría para su resolución definitiva.

ARTÍCULO 124.- Por lo que se refiere a los demás trámites relativos a la substanciación del recurso de revisión a que se refiere el artículo anterior, se estará a lo dispuesto en el Título Sexto de la Ley Federal de Procedimiento Administrativo.

TRANSITORIOS

ARTÍCULO PRIMERO.- La presente Ley entrará en vigor a los treinta días hábiles siguientes de su publicación en el **Diario Oficial de la Federación**.

ARTÍCULO SEGUNDO.- Las Secretarías competentes deberán expedir y publicar en el **Diario Oficial de la Federación** los formatos de avisos a que se refiere este ordenamiento, dentro de los veinte días siguientes a la aprobación de los mismos por la Comisión Federal de Mejora Regulatoria.

ARTÍCULO TERCERO.- Una vez expedidos y publicados los formatos a que se refiere el artículo transitorio anterior, los interesados que de conformidad con esta Ley tengan la obligación de presentar avisos, deberán hacerlo en un plazo de noventa días contados a partir de la publicación de dichos formatos en el **Diario Oficial de la Federación**.

ARTÍCULO CUARTO.- Los titulares de las autorizaciones otorgadas con anterioridad a la expedición de esta Ley, no serán afectados por virtud de la entrada en vigor de este ordenamiento en los derechos y obligaciones consignados en las mismas.

ARTÍCULO QUINTO.- Las solicitudes de autorizaciones cuya tramitación haya iniciado con anterioridad a la expedición de la presente Ley, y que se encuentren pendientes de resolución, deberán ser resueltas conforme a las disposiciones jurídicas y administrativas vigentes al momento en que dichas solicitudes fueron ingresadas.

ARTÍCULO SEXTO.- La SHCP realizará los actos necesarios para transferir los recursos necesarios para el funcionamiento de la Secretaría Ejecutiva y del Consejo Consultivo Científico de la CIBIOGEM, y aprobará las plazas que sean necesarias para el funcionamiento de la Secretaría Ejecutiva de dicha CIBIOGEM, con cargo a los recursos que tenga aprobada dicha Comisión, así como aquellos que las dependencias y entidades que integran dicha Comisión, tengan aprobados para dichos fines, en los términos de las disposiciones aplicables.

Las acciones que se deriven del cumplimiento de esta Ley y demás disposiciones que de ella deriven, se atenderán con cargo a la disponibilidad presupuestaria aprobada para tal efecto a las dependencias y entidades de la Administración Pública Federal que integran la CIBIOGEM.

El Acuerdo Presidencial por el que se creó la CIBIOGEM continuará en vigor en lo que no se oponga a esta Ley, hasta en tanto se expidan las disposiciones reglamentarias correspondientes de este ordenamiento.

ARTÍCULO SÉPTIMO.- Las disposiciones reglamentarias relativas a lo dispuesto en el Capítulo IV del Título Primero de la presente Ley, así como las correspondientes a los Capítulos I y II del Título Octavo de este mismo ordenamiento, se deberán expedir en el plazo de seis meses contados a partir de la entrada en vigor del presente ordenamiento. La CIBIOGEM emitirá sus reglas de operación dentro de los sesenta días siguientes a la entrada en vigor de las disposiciones reglamentarias señaladas en este artículo.

ARTÍCULO OCTAVO.- La convocatoria para integrar el Consejo Consultivo se expedirá dentro de los treinta días siguientes a la entrada en vigor de esta Ley, y se integrará dentro de los tres meses siguientes a la publicación de la convocatoria.

ARTÍCULO NOVENO.- El CONACyT realizará lo necesario para modificar el fideicomiso que tiene establecido para el manejo de recursos de la Comisión Intersecretarial creada mediante el Acuerdo Presidencial publicado en el **Diario Oficial de la Federación** el 5 de noviembre de 1999, para dar cumplimiento a esta Ley, a efecto de que opere en lo sucesivo como el Fondo para el Fomento y Apoyo a la Investigación Científica y Tecnológica en Bioseguridad y Biotecnología que establece el presente ordenamiento.

ARTÍCULO DÉCIMO.- El programa para el desarrollo de la bioseguridad y la biotecnología a que se refiere el artículo 29 de esta Ley, se formulará y expedirá en un plazo no mayor a un año contado a partir de la entrada en vigor del presente ordenamiento.

ARTÍCULO DECIMOPRIMERO.- Los anteproyectos de las normas oficiales mexicanas a que se refieren los artículos 42, fracción VII, 50 fracción V, 55 fracción VII, 74, 101 y 102 de esta Ley, deberán ser presentados a los Comités Consultivos Nacionales de Normalización correspondientes e integrarse al Programa Nacional de Normalización, dentro de un plazo no mayor a seis meses contados a partir de la entrada en vigor del presente ordenamiento, de conformidad y para los efectos establecidos en la Ley Federal sobre Metrología y Normalización.

Los anteproyectos de las demás normas oficiales mexicanas a que se refiere esta Ley, se presentarán dentro del plazo de un año contado a partir de la entrada en vigor del presente ordenamiento, para los efectos señalados en el párrafo anterior.

En tanto se expiden las normas oficiales mexicanas a que se refieren los artículos 42, fracción VII, 50 fracción V y 55 fracción VII de esta Ley, la SEMARNAT y la SAGARPA, en sus respectivos ámbitos de su competencia, podrán determinar la información que se considere necesaria, con la participación que le corresponda a la Comisión Federal de Mejora Regulatoria, y en un plazo que no excederá de un año

contado a partir de la entrada en vigor del presente ordenamiento, a efecto de expedir los permisos correspondientes.

ARTÍCULO DECIMOSEGUNDO.- Se derogan todas las disposiciones legales que se opongan a la presente Ley.

México, D.F., a 15 de febrero de 2005.- Dip. **Manlio Fabio Beltrones Rivera**, Presidente.- Sen. **Diego Fernández de Cevallos Ramos**, Presidente.- Dip. **Marcos Morales Torres**, Secretario.- Sen. **Sara I. Castellanos Cortés**, Secretaria.- Rúbricas.**"**

En cumplimiento de lo dispuesto por la fracción I del Artículo 89 de la Constitución Política de los Estados Unidos Mexicanos, y para su debida publicación y observancia, expido el presente Decreto en la Residencia del Poder Ejecutivo Federal, en la Ciudad de México, Distrito Federal, a los diecisiete días del mes de marzo de dos mil cinco.- **Vicente Fox Quesada**.- Rúbrica.- El Secretario de Gobernación, **Santiago Creel Miranda**.- Rúbrica.

ARTÍCULOS TRANSITORIOS DE DECRETOS DE REFORMA

DECRETO por el que se reforman y derogan diversas disposiciones de la Ley para la Protección de Personas Defensoras de Derechos Humanos y Periodistas; de la Ley de Cooperación Internacional para el Desarrollo; de la Ley de Hidrocarburos; de la Ley de la Industria Eléctrica; de la Ley Federal de Presupuesto y Responsabilidad Hacendaria; de la Ley General de Protección Civil; de la Ley Orgánica de la Financiera Nacional de Desarrollo Agropecuario, Rural, Forestal y Pesquero; de la Ley de Ciencia y Tecnología; de la Ley Aduanera; de la Ley Reglamentaria del Servicio Ferroviario; de la Ley General de Cultura Física y Deporte; de la Ley Federal de Cinematografía; de la Ley Federal de Derechos; de la Ley del Fondo Mexicano del Petróleo para la Estabilización y el Desarrollo; de la Ley de Bioseguridad de Organismos Genéticamente Modificados; de la Ley General de Cambio Climático; de la Ley General de Víctimas y se abroga la Ley que crea el Fideicomiso que administrará el Fondo de Apoyo Social para Ex Trabajadores Migratorios Mexicanos.

Publicado en el Diario Oficial de la Federación el 6 de noviembre de 2020

ARTÍCULO DÉCIMO SEXTO. Se reforma el artículo 31 de la Ley de Bioseguridad de Organismos Genéticamente Modificados, para quedar como sigue:

……

Transitorios

Primero. El presente Decreto entrará en vigor el día siguiente al de su publicación en el Diario Oficial de la Federación.

Segundo. Se derogan todas las disposiciones que se opongan a lo dispuesto en el presente Decreto.

Tercero. Se abroga la Ley que crea el Fideicomiso que Administrará el Fondo para el Fortalecimiento de Sociedades y Cooperativas de Ahorro y Préstamo y de Apoyo a sus Ahorradores.

Cuarto. Las dependencias y entidades, por conducto de sus unidades responsables, deberán coordinar las acciones que correspondan para que a más tardar dentro de los 30 días naturales contados a partir de la entrada en vigor del presente Decreto concentren, en términos de la Ley de Ingresos de la Federación para el ejercicio fiscal que corresponda, en la Tesorería de la Federación la totalidad de los recursos públicos federales que formen parte de los fideicomisos, mandatos y análogos públicos previstos en las disposiciones que se abrogan, reforman o derogan por virtud de este Decreto, salvo que la Secretaría de Hacienda y Crédito Público determine una fecha distinta para la concentración de los recursos.

A la extinción de los fideicomisos, y terminación de mandatos y análogos públicos las entidades concentrarán en sus respectivas tesorerías los recursos distintos a los fiscales, en el plazo señalado en el primer párrafo del presente Transitorio.

Los ingresos excedentes que se concentren en la Tesorería de la Federación al amparo del presente Transitorio se destinarán en términos de la Ley de Ingresos de la Federación para el ejercicio fiscal correspondiente, con prioridad para el fortalecimiento de los programas y acciones en materia de salud, especialmente para los requerimientos derivados de la atención a la Pandemia generada por la enfermedad Covid-19, que ocasiona el Coronavirus SARS-CoV2, incluyendo, en su caso, la obtención de

la vacuna en el número de dosis necesarias, así como para procurar la estabilización del balance fiscal federal y el pago de las obligaciones previamente contraídas por los vehículos financieros a que se refiere el presente Decreto con anterioridad a la entrada en vigor del mismo.

Quinto. Los ejecutores de gasto, por conducto de sus unidades responsables, deberán coordinarse con las instituciones que fungen como fiduciarias para llevar a cabo los actos y procesos necesarios para extinguir los fideicomisos y dar por terminados los mandatos y análogos públicos a que se refieren las disposiciones que se reforman o derogan por virtud de este Decreto, con la finalidad de que durante el primer semestre del ejercicio 2021 se suscriban los convenios de extinción o terminación respectivamente, en términos de las disposiciones aplicables.

Los derechos y obligaciones derivados de los instrumentos jurídicos que por virtud del presente Decreto se extinguen o terminan, serán asumidos por los ejecutores de gasto correspondientes con cargo a su presupuesto autorizado, de conformidad con las disposiciones aplicables.

Sexto. Las dependencias y entidades que coordinen la operación de los fideicomisos, mandatos o análogos públicos serán las responsables de realizar todos los actos necesarios que permitan llevar a cabo la extinción o terminación de éstos, entre otros, por lo que se refiere a los activos y pasivos con los que cuente, en términos de la Ley Federal de Presupuesto y Responsabilidad Hacendaria y su Reglamento.

Séptimo. El Consejo Nacional de Ciencia y Tecnología, así como los Centros Públicos de Investigación llevarán a cabo las acciones necesarias para que los fideicomisos constituidos al amparo de la Ley de Ciencia y Tecnología, se ajusten a lo dispuesto en la Ley Federal de Presupuesto y Responsabilidad Hacendaria y su Reglamento, y en consecuencia concentren en la Tesorería de la Federación, en términos de la Ley de Ingresos de la Federación para el ejercicio fiscal que corresponda, la totalidad de los recursos públicos federales que formen parte del patrimonio de dichos fideicomisos, en términos de las disposiciones aplicables, en la fecha que determine la Secretaría de Hacienda y Crédito Público en conjunto con el Consejo Nacional de Ciencia y Tecnología, sin que la misma rebase el 30 de junio de 2021. Por lo que a partir de la entrada en vigor del presente Decreto no podrán adquirir compromisos adicionales con cargo al patrimonio de dichos instrumentos.

Asimismo, deberán concentrar en sus tesorerías los recursos distintos a los señalados en el primer párrafo del presente Transitorio en el plazo previsto en el mismo.

El Consejo Nacional de Ciencia y Tecnología y los Centros Públicos de Investigación deberán coordinarse con las instituciones que fungen como fiduciarias para llevar a cabo los actos y procesos necesarios para extinguir los fideicomisos públicos constituidos al amparo de la Ley de Ciencia y Tecnología, con la finalidad de que durante el ejercicio fiscal de 2021 se suscriban los convenios de extinción en términos de las disposiciones aplicables.

Los fideicomisos públicos constituidos por Centros Públicos de Investigación para el cumplimiento exclusivo de obligaciones de carácter laboral o en materia de seguridad social continuarán operando con la finalidad de salvaguardar los derechos laborales de los trabajadores.

En caso de que los Centros Públicos de Investigación cuenten con fideicomisos que integren el cumplimiento de obligaciones de carácter laboral o en materia de seguridad social y otras obligaciones de distinta naturaleza en un solo instrumento, deberán llevar a cabo la modificación a los mismos dentro de un plazo de 30 días naturales contados a partir de la entrada en vigor del presente Decreto, a efecto de que dichos fideicomisos públicos conserven únicamente aquellas obligaciones de carácter laboral o en materia de seguridad social, y concentren los recursos no relacionados con dichos fines en términos del primer párrafo del presente Transitorio.

Los ingresos excedentes que se concentren en la Tesorería de la Federación al amparo del presente Transitorio se destinarán en términos de la Ley de Ingresos de la Federación para el ejercicio fiscal correspondiente, de conformidad con lo dispuesto por el último párrafo del transitorio Cuarto de este Decreto.

A la entrada en vigor del presente Decreto, los fondos Sectorial CONACYT-Secretaría de Energía-Hidrocarburos; Sectorial CONACYT-Secretaría de Energía-Sustentabilidad Energética, y de Investigación Científica y Desarrollo Tecnológico del Instituto Mexicano del Petróleo, no podrán contraer obligaciones adicionales con cargo a sus respectivos patrimonios.

Los recursos a que se refiere el artículo 88 de la Ley Federal de Presupuesto y Responsabilidad Hacendaria, que se reforma por virtud del presente Decreto, se podrán destinar a cubrir los pagos derivados de los compromisos adquiridos por los fondos a que se refiere el párrafo anterior, previo a la entrada en vigor de este Decreto.

Octavo. El Consejo Nacional de Ciencia y Tecnología, deberá llevar a cabo las acciones que correspondan para que a partir de la entrada en vigor del presente Decreto no se adquieran compromisos adicionales con cargo al patrimonio del fideicomiso público denominado Fondo para el Fomento y Apoyo a la Investigación Científica y Tecnológica en Bioseguridad y Biotecnología, y se concentren en la Tesorería de la Federación, en términos de la Ley de Ingresos de la Federación para el ejercicio fiscal que corresponda, la totalidad de los recursos públicos federales que formen parte del patrimonio del mismo en la fecha que determine la Secretaría de Hacienda y Crédito Público en conjunto con el Consejo Nacional de Ciencia y Tecnología, sin que la misma rebase el 30 de junio de 2021. Cumplido lo anterior, el fideicomiso deberá extinguirse durante el ejercicio fiscal de 2021.

Los ingresos excedentes que se concentren en la Tesorería de la Federación al amparo del presente Transitorio se destinarán en términos de la Ley de Ingresos de la Federación para el ejercicio fiscal correspondiente, de conformidad con lo dispuesto por el último párrafo del Artículo Cuarto Transitorio de este Decreto.

Noveno. Se deroga el transitorio Tercero del Decreto por el que se reforman, adicionan y derogan diversas disposiciones de la Ley Aduanera, publicado en el Diario Oficial de la Federación el 1o. de enero de 2002.

Décimo. La Comisión Nacional de Cultura Física y Deporte realizará las acciones conducentes para el otorgamiento de un reconocimiento económico vitalicio a los deportistas que en representación oficial obtengan o hayan obtenido una o más medallas en Juegos Olímpicos o Paralímpicos, con cargo a su presupuesto autorizado, para lo cual el Reglamento de la Ley General de Cultura Física y Deporte establecerá los criterios y bases para el otorgamiento de dicho reconocimiento.

Décimo Primero. Dentro de un plazo de ciento ochenta días naturales, el Ejecutivo Federal deberá reformar los Reglamentos de las leyes que se reforman por virtud de la entrada en vigor del presente Decreto, en lo que resulte conducente.

Décimo Segundo. La Secretaría de Gobernación, con cargo a su presupuesto autorizado, asumirá las obligaciones pendientes de cumplimiento relacionadas con el Fondo de Apoyo Social para ex Trabajadores Migratorios Mexicanos, hasta su total cumplimiento.

Décimo Tercero. Los recursos que integran el patrimonio de los fideicomisos públicos denominados Fondo Metropolitano y Fondo Regional se concentrarán en la Tesorería de la Federación sujetándose a lo dispuesto en el transitorio Cuarto del presente Decreto. Los recursos aportados deberán ser destinados, en primer término, al Programa de Mejoramiento Urbano a cargo de la Secretaría de Desarrollo Agrario, Territorial y Urbano.

Décimo Cuarto. Los recursos que integran el patrimonio del fideicomiso público denominado Fondo para el Desarrollo de Zonas de Producción Minera se concentrarán en la Tesorería de la Federación sujetándose a lo dispuesto en el transitorio Cuarto del presente Decreto por lo que se refiere a los recursos obtenidos previo al ejercicio fiscal 2019. Por lo que se refiere a los recursos obtenidos durante el ejercicio fiscal 2019 se estará a lo dispuesto por la autoridad jurisdiccional competente y, en caso de resultar procedente se sujetarán a dicho Transitorio.

Una vez realizado lo anterior, la Secretaría de Economía por conducto de la unidad responsable de dicho fideicomiso público en conjunto con la institución fiduciaria procederán en términos de lo señalado en el transitorio Quinto.

Décimo Quinto. A la entrada en vigor del presente Decreto, el Fideicomiso para promover el acceso al financiamiento de MIPYMES y Emprendedores no podrá contraer obligaciones adicionales con cargo a su patrimonio, sin embargo, continuará cumpliendo con los compromisos derivados de los instrumentos de garantía contratados, conforme a las disposiciones aplicables, para el cumplimiento de sus fines.

Una vez cumplidas la totalidad de las obligaciones y se ejerzan los derechos derivados de los instrumentos a que se refiere el párrafo anterior, el Fideicomiso para promover el acceso al financiamiento de MIPYMES y Emprendedores se extinguirá en términos de las disposiciones aplicables.

A la extinción de dicho vehículo, la Secretaría de Economía por conducto de la unidad responsable, realizará las acciones necesarias para concentrar los recursos federales remanentes en la Tesorería de la Federación.

Los ingresos excedentes que se concentren en la Tesorería de la Federación al amparo del presente Transitorio se destinarán en términos de la Ley de Ingresos de la Federación para el ejercicio fiscal correspondiente.

Décimo Sexto. La Secretaría de Hacienda y Crédito Público, en su carácter de mandante en el contrato de Mandato para la Administración de los Recursos del Programa de Cooperación Energética para Países de Centroamérica y el Caribe, deberá coordinarse con la institución que funja con el carácter de mandataria para llevar a cabo las acciones necesarias para formalizar la terminación de dicho instrumento en términos del transitorio Quinto del presente Decreto. De igual forma, por conducto de la unidad responsable del mandato, deberá coordinar las acciones que correspondan para que concentre los recursos públicos federales en la Tesorería de la Federación, de conformidad con lo dispuesto en el transitorio Cuarto del presente Decreto.

Asimismo, la unidad responsable del Mandato deberá llevar a cabo las acciones conducentes para efectuar la recuperación de los créditos que, en su caso, se hubiesen otorgado con cargo a los recursos del Mandato a que se refiere el presente transitorio, a efecto de que dichos recursos sean concentrados en Tesorería de la Federación, en los términos previstos en el transitorio Cuarto del presente Decreto.

Décimo Séptimo. A partir de la entrada en vigor del presente Decreto, los ejecutores de gasto no podrán comprometer recursos públicos con cargo a los fideicomisos sin estructura orgánica, mandatos o análogos públicos, a que se refieren las disposiciones que se reforman o derogan por virtud de este Decreto y de sus disposiciones transitorias.

Décimo Octavo. Los recursos que integran el patrimonio del Fondo a que se refiere el segundo párrafo del artículo 22 de la Ley Orgánica de la Financiera Nacional de Desarrollo Agropecuario, Rural, Forestal y Pesquero que se deroga deberán ser reintegrados a la Financiera mismo que formará parte de su patrimonio, salvo el monto que, en su caso, la Secretaría de Hacienda y Crédito Público determine se reintegre a la Tesorería de la Federación. Asimismo, la Financiera, en conjunto con la institución crediticia

del citado Fondo, procederá en términos de lo señalado en los transitorios Cuarto y Quinto del presente Decreto.

Décimo Noveno. Se deroga el transitorio Noveno del Decreto por el que se expide la Ley General de Protección Civil publicado en el Diario Oficial de la Federación el 6 de junio de 2012.

A partir del 1o. de enero de 2021, el Fideicomiso Fondo de Desastres Naturales no asumirá compromisos adicionales a los adquiridos previamente, salvo los relativos a los gastos de operación, y únicamente podrán llevarse a cabo los actos tendientes a su extinción. Con los recursos a que se refiere el artículo 37 de la Ley Federal de Presupuesto y Responsabilidad Hacendaria se podrán cubrir las obligaciones que se tengan pendientes y que no se paguen con cargo al patrimonio del Fideicomiso.

Los remanentes de recursos de este Fideicomiso se deberán concentrar a más tardar el 30 de junio de 2021, por concepto de aprovechamientos, a la Tesorería de la Federación y se destinarán por la Secretaría de Hacienda y Crédito Público para la atención de desastres naturales, así como para cubrir las obligaciones pendientes y que no se paguen con cargo al patrimonio del Fideicomiso.

Vigésimo. Se faculta a la SHCP, para que en coordinación con la Fiduciaria establecida por la Ley del FIPAGO, en su caso, realice los convenios, acuerdos, y todos los actos jurídicos que sean necesarios, para dar cumplimiento a las obligaciones contraídas y convenios en proceso de formalización al 20 de septiembre de 2020. Asimismo, se faculta a la SHCP para realizar los convenios, acuerdos, y todos los actos jurídicos que se requieran, en coordinación con las Entidades Federativas en las que se localizan las citadas cajas de ahorro, para dar cumplimiento a las obligaciones contraídas y convenios en proceso de formalización que hayan sido reportados por la SHCP.

Ciudad de México, a 20 de octubre de 2020.- Dip. **Dulce María Sauri Riancho**, Presidenta.- Sen. **Oscar Eduardo Ramírez Aguilar**, Presidente.- Dip. **María Guadalupe Díaz Avilez**, Secretaria.- Sen. **Lilia Margarita Valdez Martínez**, Secretaria.- Rúbricas.**"**

En cumplimiento de lo dispuesto por la fracción I del Artículo 89 de la Constitución Política de los Estados Unidos Mexicanos, y para su debida publicación y observancia, expido el presente Decreto en la Residencia del Poder Ejecutivo Federal, en la Ciudad de México, a 4 de noviembre de 2020.- **Andrés Manuel López Obrador**.- Rúbrica.- La Secretaria de Gobernación, Dra. **Olga María del Carmen Sánchez Cordero Dávila**.- Rúbrica.

DECRETO por el que se reforman y adicionan diversas disposiciones de la Ley Federal de Defensoría Pública, de la Ley General de Salud, de la Ley General de Cultura Física y Deporte, de la Ley General de Cambio Climático, de la Ley Orgánica de la Procuraduría de la Defensa del Contribuyente, de la Ley Orgánica del Seminario de Cultura Mexicana, de la Ley de la Agencia Nacional de Seguridad Industrial y de Protección al Medio Ambiente del Sector Hidrocarburos, de la Ley de la Comisión Federal de Electricidad, de la Ley de la Comisión Nacional Bancaria y de Valores, de la Ley que Crea la Agencia de Noticias del Estado Mexicano, de la Ley del Sistema Público de Radiodifusión del Estado Mexicano, de la Ley de Instituciones de Seguros y de Fianzas, de la Ley del Fondo Mexicano del Petróleo para la Estabilización y el Desarrollo, de la Ley de la Industria Eléctrica, de la Ley de la Economía Social y Solidaria, Reglamentaria del Párrafo Octavo del Artículo 25 de la Constitución Política de los Estados Unidos Mexicanos, en lo referente al Sector Social de la Economía, de la Ley de la Casa de Moneda de México, de la Ley de Concursos Mercantiles, de la Ley de Bioseguridad de Organismos Genéticamente Modificados, de la Ley de Aguas Nacionales, de la Ley de Asistencia Social, de la Ley General de Desarrollo Social, de la Ley Orgánica de la Financiera Nacional de Desarrollo Agropecuario, Rural, Forestal y Pesquero, de la Ley Federal para la Administración y Enajenación de Bienes del Sector Público, de la Ley Federal de Variedades Vegetales, de la Ley Federal de Sanidad Vegetal, de la Ley Federal de Sanidad Animal, de la Ley Federal de Fomento a las Actividades Realizadas por Organizaciones de la Sociedad Civil, de la Ley Orgánica del Consejo Nacional de Ciencia y Tecnología, de la Ley de Protección al Ahorro Bancario, de la Ley de los Institutos Nacionales de Salud, de la Ley de Ciencia y Tecnología, en materia de paridad de género.

Publicado en el Diario Oficial de la Federación el 11 de mayo de 2022

Artículo Décimo Octavo. Se reforman los artículos 20 y 21 de la Ley de Bioseguridad de Organismos Genéticamente Modificados, para quedar como sigue:

……..

Transitorios

Primero. El presente Decreto entrará en vigor el día siguiente al de su publicación en el Diario Oficial de la Federación.

Segundo. De acuerdo con el artículo transitorio Tercero del Decreto por el que se reforman los artículos 2, 4, 35, 41, 52, 53, 56, 94, y 115; de la Constitución Política de los Estados Unidos Mexicanos, en materia de Paridad entre Géneros, se deberá observar el principio de paridad de manera progresiva, a partir de las nuevas designaciones y nombramientos que correspondan, de conformidad con la ley.

Tercero. Todas las obligaciones que se generen con la entrada en vigor del presente Decreto se cubrirán con cargo al presupuesto aprobado a los ejecutores de gasto responsables para el ejercicio fiscal en curso y subsecuentes, por lo que no se autorizarán recursos adicionales para tales efectos y, en caso de que se realice alguna modificación a su estructura orgánica, está también deberá ser cubierta con su presupuesto autorizado y conforme a las disposiciones jurídicas aplicables.

Ciudad de México, a 15 de marzo de 2022.- Dip. **Sergio Carlos Gutiérrez Luna**, Presidente.- Sen. **Olga Sánchez Cordero Dávila**, Presidenta.- Dip. **Luis Enrique Martínez Ventura**, Secretario.- Sen. **Verónica Noemí Camino Farjat**, Secretaria.- Rúbricas.**"**

En cumplimiento de lo dispuesto por la fracción I del Artículo 89 de la Constitución Política de los Estados Unidos Mexicanos, y para su debida publicación y observancia, expido el presente Decreto en la Residencia del Poder Ejecutivo Federal, en la Ciudad de México, a 2 de mayo de 2022.- **Andrés Manuel López Obrador**.- Rúbrica.- El Secretario de Gobernación, Lic. **Adán Augusto López Hernández**.- Rúbrica.

REGLAMENTO DE LA LEY GENERAL DE SALUD EN MATERIA DE TRASPLANTES

TEXTO VIGENTE
Nuevo Reglamento publicado en el Diario Oficial de la Federación el 26 de marzo de 2014

Al margen un sello con el Escudo Nacional, que dice: Estados Unidos Mexicanos.- Presidencia de la República.

ENRIQUE PEÑA NIETO, Presidente de los Estados Unidos Mexicanos, en ejercicio de la facultad que me confiere el artículo 89, fracción I, de la Constitución Política de los Estados Unidos Mexicanos, y con fundamento en los artículos 39 de la Ley Orgánica de la Administración Pública Federal y 3o., fracción XXVI; 13, apartado A, fracción II; 17 Bis, párrafos primero y segundo, fracciones II, IV, VIII y X; 202; 375, fracción VI; 313 a 342; 393 a 401 Bis 2; 462 y 462 Bis, segundo párrafo, de la Ley General de Salud, he tenido a bien expedir el siguiente

REGLAMENTO DE LA LEY GENERAL DE SALUD EN MATERIA DE TRASPLANTES

TÍTULO PRIMERO
DISPOSICIONES GENERALES

Capítulo Único
De las Disposiciones Generales

Artículo 1. El presente Reglamento tiene por objeto regular la disposición de órganos, tejidos y células, con excepción de la sangre, componentes sanguíneos y células progenitoras o troncales, que se realice con fines de trasplantes. Sus disposiciones, son de orden público, interés social y aplicación obligatoria en todo el territorio nacional.

Artículo 2. Para efectos del presente Reglamento, además de las definiciones previstas en el artículo 314 de la Ley, se entenderá por:

I. CENATRA: El Centro Nacional de Trasplantes;

II. Centros Estatales de Trasplantes o Consejos Estatales de Trasplantes: Las estructuras administrativas o cuerpos colegiados que, establezcan los gobiernos de las entidades federativas o las ya existentes que tengan a su cargo realizar de manera coordinada con el CENATRA, las funciones vinculadas a la materia de Disposición de Órganos, Tejidos y células para fines de Trasplantes;

III. COFEPRIS: La Comisión Federal para la Protección contra Riesgos Sanitarios;

IV. Comité Interno de Coordinación para la Donación: El Comité a que se refiere el segundo párrafo del artículo 316 de la Ley;

V. Comité Interno de Trasplantes: El Comité a que se refiere el tercer párrafo del artículo 316 de la Ley;

VI. Compatibilidad: El grado de semejanza genética entre los individuos que se comprueba después de llevar a cabo los estudios correspondientes a grupo sanguíneo, inmunogenética,

antropometría o aquéllos necesarios, atendiendo al Órgano, Tejido o célula de que se trate y al avance científico; que prevenga el riesgo de rechazo del Órgano, Tejido o células trasplantadas;

VII. Coordinador Hospitalario: Al Coordinador Hospitalario de Donación de Órganos y Tejidos para Trasplantes al que se refiere la fracción XX del artículo 314 de la Ley;

VIII. Criterios Médicos: Los elementos clínicos, de laboratorio y de gabinete, definidos por los Comités Internos de Trasplantes, que permitan seleccionar a los candidatos a recibir un Órgano, Tejido o célula;

IX. Establecimientos de Salud**:** Las unidades clínicas u hospitalarias que realizan actos de Extracción, análisis, conservación, preparación, suministro y Trasplante de Órganos, Tejidos y células;

X. Extracción de Órganos, Tejidos o células: El acto quirúrgico a través del cual se obtienen uno o varios Órganos, Tejidos o células de un Donador vivo o fallecido para su posterior Trasplante en uno o varios Receptores;

XI. Histocompatibilidad: La semejanza entre dos o más Tejidos a nivel de sus características genéticas e inmunológicas;

XII. Ley: La Ley General de Salud;

XIII. Oportunidad del Trasplante: El conjunto de condiciones de tiempo, modo y lugar que permitan realizar un Trasplante;

XIV. Programa de Trasplante: El conjunto de servicios autorizados a un Establecimiento de Salud para proporcionar en forma integral a los pacientes que requieren de un Trasplante de un Órgano, Tejido o célula, coordinado por el Comité Interno de Trasplantes;

XV. Receptor Candidato: El paciente que ha sido aceptado por el Comité Interno de Trasplantes para ser Receptor de un Órgano, Tejido o célula y que ha sido inscrito en el Registro Nacional de Trasplantes, hasta antes de que se le realice el Trasplante;

XVI. Secretaría: La Secretaría de Salud, y

XVII. Urgencia de Trasplante o Código 0: El riesgo inminente de muerte de un paciente, que por su condición de gravedad, su única alternativa de vida es el Trasplante de Órganos.

Artículo 3. La interpretación para efectos administrativos del presente Reglamento corresponde a la Secretaría.

Artículo 4. Corresponde a la Secretaría por conducto del CENATRA:

I. Establecer programas y campañas orientados a difundir entre los responsables sanitarios y los profesionales de la salud, los requisitos sanitarios que se deben satisfacer en la Disposición de Órganos, Tejidos y células con fines de Trasplantes;

II. Fomentar en coordinación con las dependencias y entidades de la Administración Pública Federal y los gobiernos de las entidades federativas, acciones para promover la donación de Órganos, Tejidos y células, tanto en vida como después de acontecida la pérdida de la misma, con fines de Trasplantes;

III. Fomentar el desarrollo de programas de estudio e investigación relacionados con la Disposición de Órganos, Tejidos y células, en lo que respecta a Trasplantes;

IV. Informar y orientar a la población sobre la donación de Órganos, Tejidos y células con fines de Trasplante, así como, impulsar la participación de los medios de comunicación en la difusión de información relativa a las acciones que impliquen actividades a favor de la cultura de la donación de Órganos, Tejidos y células;

V. Coordinar el Subsistema Nacional de Donación y Trasplantes;

VI. Coordinar la Distribución y Asignación de Órganos, Tejidos y células de Donadores con pérdida de vida para Trasplante, y

VII. Operar el Registro Nacional de Trasplantes.

Artículo 5. En toda donación o Trasplante de Órganos, Tejidos y células obtenidos de Donadores que hubiesen perdido la vida, los responsables sanitarios de los Establecimientos de Salud y el personal de salud participante, deberán mantener en el anonimato la identidad entre el Donador y el Receptor.

TÍTULO SEGUNDO
LA DONACIÓN PARA FINES DE TRASPLANTES

Capítulo I
Del Consentimiento para la Donación con Fines de Trasplantes

Artículo 6. En ningún caso se podrá disponer de Órganos, Tejidos y células para fines de Trasplantes, en contra de la voluntad del Donador.

Artículo 7. La donación de la totalidad de un Órgano único, esencial para la conservación de la vida, sólo podrá hacerse una vez declarada la pérdida de la vida del Donador.

Los ojos y el tejido corneal sólo podrán extraerse con fines de Trasplante de Donadores que hayan perdido la vida, o por acto quirúrgico por indicación médica.

Artículo 8. El CENATRA dará a conocer, mediante publicación que se realice en el Diario Oficial de la Federación, el formato oficial que se utilizará para manifestar el consentimiento expreso para donar Órganos, Tejidos y células después de la muerte para que éstos sean utilizados en Trasplantes, en términos del segundo párrafo del artículo 329 de la Ley.

El formato a que se hace referencia en el párrafo anterior, contendrá por lo menos, el nombre completo de su otorgante, su edad, sexo, nacionalidad, estado civil, ocupación, referencias personales, y el señalamiento del documento con el que se haya identificado, así como si se trata de una donación amplia o limitada.

Artículo 9. El documento en el que el Donador exprese su consentimiento para la donación en vida de sus Órganos, Tejidos y células con fines de Trasplante, deberá ser obtenido por el Comité Interno de Trasplantes y al menos contener:

I. Nombre del Donador;

II. Domicilio del Donador;

III. Edad del Donador;

IV. Sexo del Donador;

V. Estado civil del Donador;

VI. Ocupación del Donador;

VII. Nombre y domicilio del cónyuge, concubina o concubino, si tuviere el Donador;

VIII. Nombre y domicilio de los padres y a falta de éstos, de alguno de sus familiares más cercanos, cuando el Donador se encuentre soltero;

IX. El señalamiento de que por propia voluntad y a título gratuito, consiente en la donación del Órgano, Tejido o célula de que se trate, expresándose que esta donación se entenderá hecha entre vivos, lo cual deberá ser acorde con las disposiciones jurídicas aplicables;

X. Nombre del Receptor del Órgano, Tejido o célula;

XI. El señalamiento de haber recibido información a su satisfacción sobre los riesgos de la operación y las consecuencias de la Extracción del Órgano, Tejido o célula;

XII. Nombre, firma y domicilio de los testigos cuando se trate de documento privado;

XIII. Lugar y fecha en que se emite el documento;

XIV. Firma o huella digital del Donador;

XV. El señalamiento de si la donación se hace a favor de alguna persona o institución determinada. En este caso, se deberá mencionar el nombre o denominación o razón social de dicha persona o institución, y

XVI. Las demás circunstancias de modo, lugar y tiempo que considere pertinentes el donante, así como cualquier otra que condicione la donación.

Tratándose de donación entre personas en las que no exista algún tipo de parentesco, se deberá exhibir además, el consentimiento expreso otorgado ante notario público, en términos de lo dispuesto por el artículo 333, fracción VI, inciso b), de la Ley.

Artículo 10. El documento en el que se haga constar el consentimiento que otorguen las personas a que se refiere el párrafo primero del artículo 324 de la Ley, será recabado por el Coordinador Hospitalario, una vez que se certifique la pérdida de la vida.

El documento en el que se haga constar el consentimiento a que se refiere el párrafo anterior deberá contener, cuando menos, lo siguiente:

I. Nombre del otorgante y fecha de nacimiento;

II. Domicilio del otorgante;

III. Nombre y datos generales del Donador, entre ellos, fecha de nacimiento, domicilio y nacionalidad;

IV. Relación del otorgante con el Donador que lo legitime a dar su consentimiento;

V. La manifestación de que fue informado acerca de la donación de que se trate, que se le dio oportunidad de hacer preguntas y que éstas fueron contestadas satisfactoriamente;

VI. La declaración de que siendo mayor de edad y estando en pleno uso de sus facultades mentales, autoriza libremente la donación total o parcial del cuerpo del Donador, a título gratuito, para ser utilizado con fines de Trasplante;

VII. Lugar y fecha en que se emite el documento, y

VIII. Firma o huella digital del otorgante y la de dos testigos.

Artículo 11. El escrito público o privado por el que la persona manifieste su negativa expresa a ser Donador, a que hace referencia el segundo párrafo del artículo 324 de la Ley, será redactado en formato libre, el cual deberá contener la firma de la persona que manifiesta dicha negativa o su huella digital en caso de no poder firmar.

Sin perjuicio de lo anterior, el Donador podrá expresar su negativa utilizando el formato que para tal efecto, dé a conocer el CENATRA, mediante publicación que se realice en el Diario Oficial de la Federación, el cual deberá contener por lo menos, el nombre completo de su otorgante, su edad, sexo, nacionalidad, estado civil, ocupación y el señalamiento del documento con el que se haya identificado.

Capítulo II
Del Coordinador Hospitalario

Artículo 12. Al Coordinador Hospitalario, además de lo señalado en la Ley, le corresponderá:

I. Constatar que los Cadáveres de los cuales se dispusieron Órganos, Tejidos o células para fines de Trasplante, sean entregados a sus familiares o a la autoridad competente, con la menor dilación posible;

II. Participar en la elaboración de programas y proyectos de trabajo, así como manuales de procedimientos médicos, técnicos y administrativos relativos a las actividades de Procuración de Órganos, Tejidos y células que el Establecimiento de Salud efectúe, así como dar seguimiento a su observancia;

III. Participar en la capacitación y evaluación del desempeño del personal a su cargo y, en su caso, coadyuvar en actividades docentes y de investigación en materia de Trasplantes;

IV. Promover y difundir estrategias y acciones que fomenten la donación voluntaria y altruista al interior del Establecimiento de Salud en el que laboren, y

V. Las demás que señalen otras disposiciones jurídicas aplicables.

Artículo 13. El Coordinador Hospitalario deberá realizar sus funciones en coordinación con el CENATRA, con los Centros Estatales de Trasplantes o Consejos Estatales de Trasplantes y, en su caso, con las Coordinaciones Institucionales respectivas.

Artículo 14. La capacitación del Coordinador Hospitalario, a que se refiere el artículo 316 Bis de la Ley, así como la expedición de la constancia que acredita dicha capacitación, estará a cargo del

CENATRA, para lo cual podrá auxiliarse de instituciones académicas, en términos de los convenios que para tal efecto se celebren.

Artículo 15. Además de la capacitación a que se refiere el artículo 316 Bis de la Ley, el Coordinador Hospitalario deberá acreditar cada cinco años, ante los integrantes de su Comité Interno de Coordinación para la Donación, o del Comité Interno de Trasplantes del Establecimiento de Salud en el que laboran, que cuenta con los conocimientos actualizados para desempeñar su función. Dicha acreditación deberá ser notificada al CENATRA.

TÍTULO TERCERO
LOS TRASPLANTES

Capítulo I
Disposiciones Comunes

Artículo 16. Cuando el presente Reglamento se refiera a Trasplante de Tejido, éste podrá ser de Tejido simple o compuesto, entendiéndose por Trasplante de Tejido simple, aquél que se realiza de un sólo Tejido, y de Tejido compuesto, aquel Trasplante que se realiza de diferentes Tejidos músculo-esquelético, utilizando o no anastomosis vasculares, entre los que se encuentran los de extremidades y cara.

Artículo 17. Una persona será considerada candidata para recibir un Trasplante cuando:

I. Tenga un padecimiento que pueda tratarse de manera eficaz por medio de un Trasplante de Órgano, Tejido o célula;

II. No presente otras enfermedades que pudieran poner en riesgo el éxito del Trasplante;

III. Tenga una condición física y mental que permita suponer que tolerará el Trasplante y su evolución, y

IV. Otorgue su consentimiento informado de conformidad con las disposiciones jurídicas aplicables.

En caso de menores de edad o incapacidad del paciente para otorgar su consentimiento para la realización del Trasplante, éste deberá ser otorgado por quienes ejerzan la patria potestad, el tutor o el representante legal, según corresponda.

Artículo 18. Si por alguna circunstancia en el Establecimiento de Salud al que le fue enviado un Órgano, Tejido o célula para ser trasplantado, no se pudiera realizar el Trasplante, deberá notificarlo de manera inmediata por escrito al Comité Interno de Coordinación para la Donación o al Comité Interno de Trasplantes del Establecimiento de Salud del que proceda el Órgano, Tejido o célula, informando las razones por las cuales no fue posible realizar dicho Trasplante, para que el Comité al que se haya informado determine una nueva Distribución del Órgano, Tejido o célula de que se trate. Dicha determinación deberá notificarse de manera inmediata al Registro Nacional de Trasplantes.

Artículo 19. El Establecimiento de Salud en el cual se realice la Extracción del Órgano, Tejido o células deberá conservar las evidencias documentales del proceso de donación, por lo menos durante cinco años contados a partir de la Extracción.

Capítulo II
De los Trasplantes de Donadores que hayan Perdido la Vida

Artículo 20. Para la Extracción de Órganos, Tejidos y células de un Donador en el que se haya certificado la pérdida de la vida, a fin de minimizar los riesgos de efectos adversos en el Receptor y no comprometer el éxito del Trasplante, se deberá comprobar mediante la evaluación médica correspondiente que el Donador cumpla con los siguientes requisitos:

I. Tener una edad fisiológica útil para fines de la donación al momento de la pérdida de la vida;

II. No haber presentado neoplasias malignas con riesgo de metástasis, infecciones u otros padecimientos que pudieren afectar al Receptor, y

III. No haber sufrido el efecto deletéreo de una agonía prolongada.

Artículo 21. En el caso de mujeres embarazadas en que se haya certificado la pérdida de la vida, se dará preferencia a la vida del producto de la concepción antes de disponer de Órganos, Tejidos o células para Trasplantes.

Artículo 22. Para la realización de un Trasplante de Órganos, Tejidos o células provenientes de un Donador en el que se haya certificado la pérdida de la vida, en pacientes extranjeros, se deberá de cumplir con los requisitos siguientes:

I. El Receptor deberá tener una condición de estancia en el territorio nacional de residente temporal, residente temporal estudiante o residente permanente y acreditar su permanencia ininterrumpida en el país de por lo menos seis meses previos a la realización del Trasplante, salvo en casos de Urgencia con diagnóstico de hepatitis fulminante, debidamente documentados, y

II. El Receptor deberá contar con resolución favorable del Comité Interno de Trasplantes del Establecimiento de Salud donde se vaya a realizar el Trasplante, firmada por todos sus integrantes, previa evaluación médica, clínica y psicológica. En dicha resolución se deberá manifestar que se ha constatado la inexistencia de circunstancias que pudieran hacer presumir actos de comercio o simulación jurídica que tengan por objeto la intermediación onerosa de Órganos, Tejidos y células.

La Secretaría podrá solicitar al Establecimiento de Salud donde se vaya a realizar el Trasplante, previo a que se realice el mismo, la documentación que compruebe el cumplimiento de los requisitos señalados.

Artículo 23. Los profesionales de la salud encargados de la Extracción de Órganos, Tejidos o células, deberán tratar con cuidado, respeto y dignidad al Cadáver, a fin de conservarlo y entregarlo en las mejores condiciones.

Artículo 24. El Cadáver se entregará a los familiares o a la autoridad competente según sea el caso, al concluir la Extracción de Órganos, Tejidos o células, para lo anterior se deberán agilizar los trámites hospitalarios correspondientes.

Capítulo III
De los Trasplantes entre Vivos

Artículo 25. En los casos de Trasplante con Donadores vivos, una vez que el Comité Interno de Trasplantes haya evaluado favorablemente, tanto al Donador como al Receptor Candidato, se deberá proporcionar, previo a la realización del Trasplante, la información correspondiente al Registro Nacional de Trasplantes, a través de su sistema informático.

Si después de haber proporcionado la información a que hace referencia el párrafo anterior, no se realiza el Trasplante, el Receptor Candidato conservará la antigüedad de su inscripción en el Registro Nacional de Trasplantes.

En los casos en que el Donador no tenga parentesco con el paciente, el Comité Interno de Trasplantes del Establecimiento de Salud donde se vaya a realizar el Trasplante, deberá emitir la resolución favorable para realizarlo, previo a la inscripción del Receptor Candidato en el Registro Nacional de Trasplantes. Esta resolución será firmada por todos los integrantes del Comité Interno de Trasplantes del Establecimiento de Salud, cuando el Donador o el Receptor sean de nacionalidad extranjera.

Artículo 26. La resolución a que se refiere el artículo 333, fracción VI, inciso a), de la Ley, deberá contener lo siguiente:

I. El resumen clínico del caso, incluyendo estudios de evaluación médica, clínica y psicológica del Receptor;

II. La evaluación médica, clínica y psicológica del Donador, y

III. El resultado de la investigación realizada por el Comité Interno de Trasplantes, la que deberá considerar el resultado de las evaluaciones médicas, clínicas y psicológicas practicadas al Donador y al Receptor, con la finalidad de descartar posibles conductas de simulación jurídica, comercio o coacción que tengan por objeto la intermediación onerosa de Órganos, Tejidos y células, manifestando que se ha constatado la inexistencia de dichas conductas.

Para tal efecto, el Comité Interno de Trasplantes, deberá agregar los documentos que le permitan comprobar la ausencia de ánimo de lucro y de hechos de coacción. Dichos documentos deberán integrarse en el expediente clínico.

Artículo 27. Para realizar Trasplantes entre vivos, cuando el Receptor, el Donador o ambos, sean extranjeros, además de cumplir con lo señalado en el artículo 333 de la Ley, se estará a lo siguiente:

I. En los casos en que no exista parentesco entre el Donador y el Receptor:

a) Deberán acreditar su condición de estancia regular en el país, en los términos de las disposiciones migratorias aplicables, con una permanencia comprobable en territorio nacional, de al menos seis meses previos a la realización del Trasplante, y

b) El Receptor deberá contar con un expediente clínico de al menos seis meses en el Establecimiento de Salud en el que vaya a realizarse dicho Trasplante;

II. En los casos en que exista parentesco entre el Donador y el Receptor:

a) Se deberá agregar al expediente clínico original o copia certificada de la documentación que compruebe la relación de parentesco, debidamente apostillada o, en su caso, legalizada en términos de las disposiciones jurídicas aplicables. Si la documentación exhibida estuviera redactada en idioma distinto al español, se deberá acompañar de la traducción que realice un perito traductor, y

b) El Comité Interno de Trasplantes deberá levantar un acta firmada por todos sus integrantes, en la que se haga constar que no existen circunstancias que hagan presumir una simulación

jurídica o comercio de Órganos, Tejidos y células, o bien, hechos de coacción hacia el Donador.

Para el levantamiento del acta a que se hace referencia en el párrafo anterior, se deberán tomar en cuenta las evaluaciones médicas, clínicas y psicológicas del Receptor y del Donador.

El Establecimiento de Salud en el que se vaya a realizar el Trasplante, deberá inscribir al Receptor Candidato del Órgano, Tejido o célula en el Registro Nacional de Trasplantes con una antelación de por lo menos quince días hábiles, si se trata de un Trasplante entre familiares por consanguinidad, civil o de afinidad hasta el cuarto grado, y en los demás casos, de al menos seis meses previos a la realización del Trasplante.

Artículo 28. En los casos previstos en los artículos 26, fracción III y 27, fracción II, inciso b), de este Reglamento, la COFEPRIS y el CENATRA, cuando lo consideren necesario, podrán solicitar cualquier otro elemento de convicción que permita acreditar la legalidad de la realización del Trasplante.

Capítulo IV
De los Comités Internos de Coordinación para la Donación y de Trasplantes

Artículo 29. Los Comités Internos de Coordinación para la Donación, así como los Comités Internos de Trasplantes, deberán instalarse bajo la responsabilidad de los directores o titulares de los Establecimientos de Salud, mediante la suscripción de un acta, que deberá estipular sus respectivas características, funcionamiento y operación, así como las personas que los integran, conforme a lo dispuesto por la Ley, el presente Reglamento y demás disposiciones jurídicas aplicables.

Artículo 30. Los Comités Internos de Coordinación para la Donación estarán integrados por:

I. El Director General o su equivalente del Establecimiento de Salud, y en su ausencia, su inmediato inferior que cuente con un alto nivel de conocimientos médicos, académicos y profesionales, quien lo presidirá;

II. Un representante del Comité Hospitalario de Bioética del Establecimiento de Salud;

III. Un representante del área jurídica del Establecimiento de Salud, en caso de contar con dicha área o de la institución a la que pertenece;

IV. El jefe de urgencias del Establecimiento de Salud;

V. El jefe de terapia intensiva del Establecimiento de Salud de existir ésta;

VI. El responsable sanitario del Establecimiento de Salud, en los casos en los que esta función no sea realizada por alguna de las personas señaladas en las fracciones que anteceden, y

VII. Los demás integrantes que para su correcto funcionamiento determine el Establecimiento de Salud, los cuales contarán con capacitación y conocimientos en la materia de Disposición de Órganos, Tejidos y células.

El Coordinador Hospitalario del Establecimiento de Salud fungirá como Secretario Técnico del Comité Interno de Coordinación para la Donación.

Las sesiones del Comité Interno de Coordinación para la Donación se considerarán válidas con la asistencia de la mayoría de sus integrantes y sus decisiones se tomarán por mayoría.

El Presidente del Comité Interno de Coordinación para la Donación contará con voto de calidad en caso de empate.

Artículo 31. Los Comités Internos de Coordinación para la Donación, además de las previstas por la Ley, tendrán las funciones siguientes:

I. Elaborar el acta correspondiente a cada sesión que se lleve a cabo, la cual una vez firmada por los integrantes se incorporará al libro de actas correspondiente. Tanto las actas como el libro deberán conservarse por un mínimo de cinco años. En el caso del libro de actas, los cinco años se computarán a partir de la fecha de la última acta registrada.

En el acta a que se hace referencia en el párrafo anterior, se hará constar, entre otros aspectos, los siguientes:

a) Los cambios de integrantes que se hayan presentado en los Comités Internos de Coordinación para la Donación y de Coordinadores Hospitalarios, y

b) Las disposiciones de Órganos, Tejidos y células efectuadas en el Establecimiento de Salud al cual pertenezcan, especificando los Criterios y argumentos Médicos, legales y científicos que se tomaron en cuenta para su Distribución;

II. Establecer la Distribución de Órganos, Tejidos y células a otros Establecimientos de Salud, de conformidad con los procedimientos que establezca el CENATRA, y

III. Coadyuvar con el responsable sanitario en proporcionar al Registro Nacional de Trasplantes, dentro de las cuarenta y ocho horas posteriores al evento, la información de su Establecimiento de Salud relativa a:

a) Los cirujanos de Trasplantes responsables de la Extracción, así como los Coordinadores Hospitalarios, y

b) La fracción III del artículo 338 de la Ley.

Artículo 32. Los Comités Internos de Trasplantes estarán integrados por:

I. El Director General o su equivalente del Establecimiento de Salud, y en su ausencia, su inmediato inferior que cuente con un alto nivel de conocimientos médicos, académicos y profesionales, quien lo presidirá;

II. El psiquiatra o psicólogo del Establecimiento de Salud, en caso de contar con dicho profesional;

III. Un representante del área jurídica del Establecimiento de Salud, en caso de contar con dicha área o de la institución a la que pertenece;

IV. Un representante de cada Programa de Trasplante de los servicios de salud que intervienen en el Trasplante de que se trate;

V. Un representante del Comité Hospitalario de Bioética del Establecimiento de Salud;

VI. Un representante del Comité de Ética en Investigación;

VII. El responsable sanitario del Establecimiento de Salud, en los casos en los que esta función no sea realizada por alguna de las personas señaladas en las fracciones que anteceden, y

VIII. Los demás integrantes que para su correcto funcionamiento determine el Establecimiento de Salud, los cuales contarán con capacitación y conocimientos en la materia de Disposición de Órganos, Tejidos y células.

El Coordinador Hospitalario del Establecimiento de Salud fungirá como Secretario Técnico del Comité Interno de Trasplantes.

Las sesiones del Comité Interno de Trasplantes se considerarán válidas con la asistencia de la mayoría de sus integrantes, salvo en los casos en que se traten asuntos relacionados con la selección de Donador y Receptor para Trasplantes en personas de nacionalidad extranjera, en cuyo caso será necesaria la participación de la totalidad de sus integrantes. Las decisiones del Comité Interno de Trasplantes se tomarán por mayoría.

El Presidente del Comité Interno de Trasplantes contará con voto de calidad en caso de empate.

Artículo 33. Los Comités Internos de Trasplantes, además de las previstas por la Ley, tendrán las funciones siguientes:

I. Realizar la selección de Donadores y Receptores para Trasplante, con excepción de los casos en los que la donación de Órganos, Tejidos o células se realice entre personas que tengan parentesco por consanguinidad, civil o de afinidad, en cuyo caso dicho Comité evaluará la viabilidad y factibilidad de realizar el Trasplante;

II. Supervisar que los Trasplantes que se lleven a cabo en el Establecimiento de Salud, además de cumplir con los principios a que hace referencia el artículo 327 de la Ley, se realicen con la máxima seguridad, de acuerdo con los principios de ética médica y de conformidad con los requisitos que establecen la Ley y este Reglamento;

III. Supervisar el desempeño del Coordinador Hospitalario, así como del equipo quirúrgico y de los diversos profesionales de la salud que participan en el Trasplante;

IV. Seleccionar el laboratorio de Histocompatibilidad que se utilizará para las pruebas relativas a los Trasplantes;

V. Evaluar, en su caso, la atención de las resoluciones o recomendaciones que emitan los Comités Hospitalario de Bioética, de Investigación y, de Ética en Investigación;

VI. Establecer la Asignación de Órganos, Tejidos y células, así como la Distribución de los mismos a otros Establecimientos de Salud, de conformidad con los procedimientos que establezca el CENATRA;

VII. Establecer los procedimientos para la conservación de Órganos, Tejidos y células;

VIII. Aprobar o rechazar la realización del Trasplante, previo dictamen de la disponibilidad de los recursos humanos, materiales e insumos necesarios para su realización;

IX. Evaluar los resultados de los Programas de Trasplantes con que cuente el Establecimiento de Salud;

X. Dictaminar, en su caso, sobre las publicaciones que pudieran derivar de los programas de trabajo o de investigación del Establecimiento de Salud dentro del área de Trasplantes;

XI. Coadyuvar con el responsable sanitario en proporcionar al Registro Nacional de Trasplantes, la información de su Establecimiento de Salud relativa a:

a) La fracción II del artículo 338 de la Ley, dentro de las cuarenta y ocho horas posteriores a la designación;

b) La fracción III del artículo 338 de la Ley, dentro de las cuarenta y ocho horas posteriores al evento;

c) La fracción IV del artículo 338 de la Ley, dentro de las setenta y dos horas posteriores al evento, y

d) La fracción V del artículo 338 de la Ley, dentro de las cuarenta y ocho horas posteriores a la resolución del Comité Interno de Trasplantes;

XII. Elaborar el acta correspondiente a cada sesión que se lleve a cabo, la cual una vez firmada por los integrantes se integrará al libro de actas correspondiente. Tanto las actas como el libro deberán conservarse por un mínimo de cinco años. En el caso del libro de actas, los cinco años se computarán a partir de la fecha de la última acta registrada.

En el acta a que se hace referencia en el párrafo anterior, se hará constar, entre otros aspectos, los siguientes:

a) Los cambios de integrantes que se hayan presentado en los Comités Internos de Trasplantes, de Coordinadores Hospitalarios, así como de los cirujanos responsables de la Extracción y Trasplantes de Órganos, Tejidos y células;

b) Los casos de aceptación de Receptores Candidatos y rechazo de pacientes para ser Receptores de Órganos, Tejidos y células para Trasplante, así como de donadores vivos;

c) Las disposiciones de Órganos, Tejidos y células efectuadas en el Establecimiento de Salud al cual pertenezcan, especificando los Criterios y argumentos Médicos, legales y científicos que se tomaron en cuenta para su Distribución, y

d) Los Trasplantes realizados en el Establecimiento de Salud al cual pertenezcan, especificando los Criterios y argumentos Médicos, legales, científicos y éticos que se tomaron en cuenta para su Asignación, y

XIII. Las demás que establezcan las disposiciones jurídicas aplicables.

Artículo 34. Los Comités Internos de Trasplantes deberán contar con un sistema de gestión de calidad de los Programas de Trasplantes, definido, en su caso, en coordinación con sus respectivas Coordinaciones Institucionales, el cual deberá ser remitido al CENATRA y a los Centros Estatales de Trasplantes o Consejos Estatales de Trasplantes, los que podrán formular las recomendaciones que estimen pertinentes.

Artículo 35. El responsable sanitario a que se refiere el artículo 338 de la Ley, deberá proporcionar al CENATRA, la información relativa a la integración del Comité Interno de Trasplantes y del Comité Interno de Coordinación para la Donación, en caso de existir este último, así como los cambios de sus integrantes o en su caso, la disolución del Comité.

Capítulo V
De la Distribución y Asignación de Órganos, Tejidos y Células con Fines de Trasplante

Artículo 36. Los Comités Internos de Coordinación para la Donación, y de Trasplantes de los Establecimientos de Salud, según corresponda, serán los responsables de realizar la Distribución y la Asignación de Órganos, Tejidos y células, de acuerdo con lo dispuesto en los artículos 316 y 339 de la Ley, con base en los criterios y requisitos previstos en dicho ordenamiento, este Reglamento, y demás disposiciones jurídicas aplicables.

Asimismo, los Comités a que se refiere el párrafo anterior, establecerán un procedimiento interno de Distribución para cada tipo de Órgano, Tejido y célula contemplado en sus Programas de Trasplantes, el cual deberá ser acorde con los procedimientos que establezca el CENATRA.

El procedimiento interno a que se refiere el párrafo anterior, deberá estar aprobado por el Director General, o su equivalente, del Establecimiento de Salud y por la Coordinación Institucional, de contar con esta última. Dicho procedimiento será enviado para su conocimiento al CENATRA, el cual podrá formular las recomendaciones que estime pertinentes.

Artículo 37. Los Comités Internos de Coordinación para la Donación, y de Trasplantes no podrán delegar su facultad para la Distribución y Asignación de Órganos, Tejidos y células, por lo que esta facultad no podrá ser ejercida por una sola persona.

Artículo 38. La Distribución por Establecimiento de Salud, en caso de no existir una Urgencia de Trasplante, se hará tomando en cuenta el siguiente orden:

I. Al Establecimiento de Salud en donde se lleve a cabo la donación, siempre que esté autorizado para realizar Trasplantes del tipo de Órgano, Tejido o célula de que se trate;

II. A la Institución de Salud a la que pertenezca el Establecimiento de Salud, para lo cual contará con el auxilio de sus Coordinaciones Institucionales, en su caso, para dicha Distribución;

III. A cualquier Establecimiento de Salud de la entidad federativa en la que se encuentre ubicado el Establecimiento de Salud en donde se llevó a cabo la donación, y

IV. A cualquier Establecimiento de Salud de una Institución de Salud a nivel nacional.

Tratándose de los supuestos a que hacen referencia las fracciones III y IV del presente artículo, el Comité Interno de Coordinación para la Donación o el de Trasplantes, según corresponda, procurará hacer llegar los Órganos, Tejidos y células generados en su Establecimiento de Salud, a Establecimientos de Salud de Instituciones de Salud de su propio sector, es decir, si el Establecimiento de Salud es público, buscará un Establecimiento de Salud de una Institución de Salud del sector público, y si es privado, a un Establecimiento de Salud de una Institución de Salud del sector privado.

Artículo 39. Los Comités Internos de Trasplantes podrán, en casos excepcionales y debidamente justificados, previa opinión del CENATRA, establecer esquemas de Distribución que permitan destinar Órganos, Tejidos y células a un Establecimiento de Salud que no pertenezca a su Institución de Salud, contando con la aprobación de la Coordinación Institucional a la que pertenezca, en su caso.

Las razones que justifiquen el establecimiento de esquemas excepcionales de Distribución a que se refiere el párrafo anterior, podrán ser circunstancias que hagan que sea más oportuno y viable considerar como primera opción un Establecimiento de Salud que no pertenece a su Institución de Salud.

Artículo 40. Para la Distribución y Asignación de Órganos, Tejidos y células de Donadores que hayan perdido la vida menores de 18 años de edad, denominados pediátricos, en caso de que no exista Urgencia de Trasplante, se dará preferencia a los Receptores que tengan menos de 18 años de edad.

Artículo 41. La notificación de una Urgencia de Trasplante por un Establecimiento de Salud, implica la Distribución y Asignación preferente a nivel nacional de un Órgano, Tejido o célula al paciente que ha sido calificado en tal condición.

La determinación de una Urgencia de Trasplante corresponde al Comité Interno de Trasplantes del Establecimiento de Salud en el que se realizará el Trasplante. La Urgencia de Trasplante deberá ser notificada al Registro Nacional de Trasplantes mediante el formato establecido para tal fin por el CENATRA, a efecto de activar una alerta en el Registro Nacional de Trasplantes, a los Establecimientos de Salud sobre la existencia de un paciente con estatus de Urgencia de Trasplante, para que éstos den prioridad para la Distribución y Asignación del Órgano en cuestión a dicho paciente.

La vigencia de una notificación sobre la existencia de un paciente con estatus de Urgencia de Trasplante será de setenta y dos horas contadas a partir de la recepción de la notificación en el Registro Nacional de Trasplantes, debiendo actualizarse las veces que sea necesario, mediante el procedimiento señalado en este artículo.

La documentación que soporte la Urgencia de Trasplante de un paciente, deberá ser resguardada por el Comité Interno de Trasplantes por un periodo de cinco años a partir de la notificación a que se refiere el segundo párrafo del presente artículo y estar disponible en cualquier momento para el caso de que las autoridades competentes la requieran. De llevarse a cabo el Trasplante el resguardo de la información será de cinco años a partir de la realización del mismo.

Artículo 42. Para los casos de Urgencia de Trasplante en la Asignación del corazón, el paciente debe presentar cualquiera de las siguientes condiciones, sin otra opción de tratamiento:

I. Pacientes con falla primaria del corazón trasplantado dentro de las primeras cuarenta y ocho horas;

II. Pacientes en situación de shock cardiogénico y con asistencia ventricular;

III. Pacientes en situación de shock cardiogénico y con balón intraaórtico de contrapulsación;

IV. Pacientes en situación de shock cardiogénico que requieren fármacos vasoactivos y ventilación mecánica, o

V. Pacientes hospitalizados en clase funcional IV refractario a tratamiento médico.

En caso de existir varias Urgencias de Trasplante de corazón, se estará al orden de prelación establecido en las fracciones anteriores.

En caso de existir dos o más del mismo grado de condición a que se refiere el párrafo primero de este artículo, se asignará por orden de inscripción en el Registro Nacional de Trasplantes.

Artículo 43. Para los casos de Urgencia de Trasplante en la Asignación del hígado, el paciente debe encontrarse en cualquiera de las situaciones siguientes:

I. Hepatitis fulminante o subfulminante, y

II. Falla primaria del hígado trasplantado.

En caso de existir varias Urgencias de Trasplante de hígado, se estará al orden de prelación establecido en las fracciones anteriores.

En caso de existir dos o más situaciones iguales a que se refiere el párrafo primero de este artículo, se asignará por orden de inscripción en el Registro Nacional de Trasplantes.

Artículo 44. La Asignación prioritaria de un riñón será en aquellos casos en que no exista posibilidad de someter al paciente a un tratamiento dialítico y su condición ponga en peligro su vida.

Los Receptores sometidos a Trasplante que pierdan la función del riñón trasplantado antes de un mes, conservarán su antigüedad en la base de datos del Registro Nacional de Trasplantes, una vez que sean registrados nuevamente.

Artículo 45. Se asignará prioritariamente una córnea, con independencia de que provenga del extranjero, al paciente que presente perforación corneal o úlcera con inminencia de pérdida del globo ocular.

Artículo 46. Cuando en un Establecimiento de Salud se identifique a un paciente que reúna las características señaladas en los artículos 44 o 45 de este Reglamento, el Comité Interno de Trasplantes deberá notificarlo a su Coordinación Institucional, de contar con ella, al CENATRA y a su Centro Estatal de Trasplantes o Consejo Estatal de Trasplantes, a fin de que dicho Trasplante se pueda concretar en el menor tiempo posible.

Artículo 47. Los bancos de córneas únicamente podrán distribuirlas a aquellos Establecimientos de Salud autorizados para Trasplante corneal con los que tengan celebrados convenios para tal efecto. La celebración de dichos convenios se hará del conocimiento del CENATRA.

Artículo 48. Las Instituciones de Salud que importen córneas, únicamente podrán utilizarlas para Trasplante en Receptores de sus propios Establecimientos de Salud.

Artículo 49. Se prohíbe el comercio de Órganos, Tejidos o células desprendidas o seccionadas por intervención quirúrgica, accidente o hecho ilícito.

TÍTULO CUARTO
LOS ESTABLECIMIENTOS DE SALUD Y RESPONSABLES SANITARIOS

Capítulo Único
De los Establecimientos de Salud y Responsables Sanitarios

Artículo 50. Los Establecimientos de Salud en términos del artículo 315 de la Ley, sólo podrán efectuar los actos que expresamente determine la autorización sanitaria correspondiente, en los términos que establezcan la Ley, este Reglamento y demás disposiciones jurídicas aplicables.

Artículo 51. Para la obtención de la autorización a que se refiere el artículo 315 de la Ley, los Establecimientos de Salud que realizan actos de Trasplantes de Órganos, Tejidos y células deberán contar con:

I. La especialidad médica o quirúrgica correlativa a los Trasplantes a realizar, con independencia de otras actividades de atención médica que presten;

II. Laboratorio de patología clínica;

III. Laboratorio de anatomía patológica o acceso a uno;

IV. Banco de sangre o un servicio de transfusión, capaces de proveer unidades de sangre y Componentes Sanguíneos en la cantidad y con la calidad requerida para el tipo de Trasplante que realizan;

V. Sala de recuperación;

VI. Unidad de cuidados intensivos;

VII. Personal médico especializado en el tipo de Trasplantes que realizan, y demás personal profesional, técnico y auxiliar de la salud de apoyo con experiencia en Trasplantes;

VIII. Medicamentos, equipo e instrumental médico quirúrgico adecuados al Trasplante que realizan, y

IX. Los demás que señale este Reglamento y otras disposiciones jurídicas aplicables.

Los Establecimientos de Salud que realizan exclusivamente Trasplante de córnea, deberán de reunir únicamente los requisitos que señalan las fracciones I, II, III, V, VII, VIII y IX, del presente artículo.

Artículo 52. Para la obtención de la autorización a que se refiere el artículo 315 de la Ley, los Establecimientos de Salud que realizan actos de Extracción, análisis, conservación, preparación y suministro de Órganos, Tejidos y células deberán contar con lo siguiente:

I. Un área física con privacidad y ambiente adecuado para atender a los familiares del potencial Donador;

II. Equipo necesario, así como personal capacitado para la certificación de la pérdida de la vida;

III. Un procedimiento que contemple el registro de las actividades que incluyan Extracción e intercambio de Órganos, Tejidos y células, que permitan la Trazabilidad de dichos Órganos, Tejidos y células;

IV. Recursos informáticos que garanticen una comunicación electrónica con el CENATRA, y

V. Los demás que señalen otras disposiciones jurídicas aplicables.

Artículo 53. La Secretaría podrá autorizar, para fines terapéuticos, la instalación de bancos de Órganos, Tejidos y células.

Para efectos de lo establecido en el párrafo anterior, se deberá contar con un manual interno de procedimientos que contenga los lineamientos técnicos que deben observarse en el análisis, conservación y preparación de los Órganos, Tejidos y células, a efecto de garantizar su viabilidad y Trazabilidad, así como cumplir con los requisitos de infraestructura y equipamiento, que se prevean en las disposiciones jurídicas aplicables.

Tratándose de bancos de Órganos y células, la Secretaría mediante disposiciones de carácter general que se publiquen en el Diario Oficial de la Federación, determinará las funciones que tendrán éstos y sus responsables sanitarios. Dichas funciones estarán orientadas a mantener en óptimas condiciones los Órganos y células para fines de Trasplantes, su Trazabilidad, así como a supervisar que se cumplan las disposiciones jurídicas aplicables.

Artículo 54. El suministro y la recepción de Órganos, Tejidos y células para fines terapéuticos, sólo podrán efectuarse entre Establecimientos de Salud que cuenten con la autorización específica de la Secretaría, para llevar a cabo la Extracción, conservación, suministro o Trasplantes del tipo de Órgano, Tejido o célula de que se trate.

Artículo 55. El responsable de la Extracción de Órganos y Tejidos compuestos deberá ser profesional médico y contar con una especialidad o posgrado, de acuerdo con el Programa de Trasplante para el cual el Establecimiento de Salud está autorizado.

La Extracción de tejido simple o células podrá ser realizada por personal médico o técnico capacitado.

Artículo 56. El responsable de cada Programa de Trasplante de Órganos, Tejidos y células, deberá ser profesional médico, con título legalmente expedido y registrado por las autoridades educativas competentes, y ser designado por el Comité Interno de Trasplantes, dando aviso al CENATRA. Dicha designación deberá establecerse en el acta correspondiente.

Artículo 57. Los bancos de Órganos, Tejidos y células deberán funcionar en coordinación con uno o varios Establecimientos de Salud autorizados para fines de este Reglamento.

Artículo 58. Los Bancos de Tejidos podrán ser:

I. De córnea;

II. De hueso;

III. De músculo esquelético;

IV. De piel;

V. De cardiovascular;

VI. De amnios, y

VII. Los demás que autorice la Secretaría, de acuerdo a los avances en la ciencia y la tecnología en esta materia.

Artículo 59. Los Bancos de Tejidos tendrán las siguientes funciones:

I. Recibir los Tejidos remitidos para su resguardo temporal de los Establecimientos de Salud autorizados, y

II. Mantener en óptimas condiciones el Tejido hasta su procesamiento o Destino Final, o bien, enviarlo a otro Establecimiento de Salud.

Artículo 60. Los responsables de los Bancos de Tejidos tendrán las siguientes funciones:

I. Vigilar que la Preservación y almacenamiento de los Tejidos se realice de acuerdo con lo establecido en la Ley, el presente Reglamento, los manuales internos de procedimientos aprobados en cada banco y demás disposiciones jurídicas aplicables;

II. Vigilar que la calidad de los Tejidos cumpla con los estándares internacionales establecidos para garantizar las condiciones óptimas del Trasplante;

III. Implementar y ejecutar acciones de Procuración de Tejidos que se encuentren bajo su resguardo, las cuales deberán ser acreditables;

IV. Garantizar la Trazabilidad de los Tejidos, de conformidad con las funciones que realiza el banco;

V. Celebrar convenios con los Establecimientos de Salud para promover la Distribución de Tejidos con fines de Trasplantes;

VI. Mantener las condiciones óptimas para el traslado del Tejido que garanticen su viabilidad para el Trasplante;

VII. Supervisar que se cumplan las disposiciones jurídicas aplicables, y

VIII. Las demás que determinen las disposiciones jurídicas aplicables.

TÍTULO QUINTO
REGISTRO NACIONAL DE TRASPLANTES

Capítulo Único
Del Registro Nacional de Trasplantes

Artículo 61. El Registro Nacional de Trasplantes operará bajo un sistema informático, el cual será administrado por el CENATRA.

Artículo 62. La integración, manejo y actualización de la información del Registro Nacional de Trasplantes, además de atender a las disposiciones de la Ley Federal de Transparencia y Acceso a la Información Pública Gubernamental, se sujetará a lo siguiente:

I. Los responsables sanitarios deberán mantener actualizados el registro de los cirujanos responsables de la Extracción y Trasplantes y el de los Coordinadores Hospitalarios de su Establecimiento de Salud, informando altas o bajas de dichas personas;

II. El responsable sanitario del Establecimiento de Salud en el que se realizará un Trasplante, deberá registrar al paciente dentro de las cuarenta y ocho horas posteriores a que el Comité Interno de Trasplantes otorgue su aceptación como Receptor Candidato a recibir un Trasplante;

III. El registro de un Receptor Candidato a recibir el Trasplante en el Registro Nacional de Trasplantes, en términos del artículo 338, fracción V, de la Ley, se hará únicamente por el Establecimiento de Salud público, social o privado en el que es atendido. En los casos de registro para recibir más de un Órgano, Tejido o célula, éste se hará en el o los Establecimientos de Salud en los que sea atendido, pudiéndose generar más de un registro por Receptor, pero sólo uno por cada Órgano, Tejido o célula de que se trate;

IV. Los pacientes que se transfieran de un Establecimiento de Salud a otro, conservarán su antigüedad en el Registro Nacional de Trasplantes;

V. El responsable sanitario del Establecimiento de Salud deberá mantener actualizada la información de los Receptores Candidatos a recibir un Trasplante, notificando al Registro Nacional de Trasplantes cualquier ingreso o cambio;

VI. El responsable sanitario del Establecimiento de Salud deberá efectuar el reporte de una donación o de un Trasplante, en los plazos previstos en el artículo 33, fracción XI, incisos b) y c), del presente Reglamento, y

VII. Las bases de datos del Registro Nacional de Trasplantes serán confidenciales, sólo podrá tener acceso a las mismas, de acuerdo a su ámbito de competencia, personal autorizado de:

a) CENATRA;

b) COFEPRIS;

c) Autoridades aduaneras;

d) Los Centros Estatales de Trasplantes o Consejos Estatales de Trasplantes;

e) Las Coordinaciones Institucionales, y

f) Los Establecimientos de Salud que cuenten con autorización en términos del artículo 315, de la Ley.

Artículo 63. Es responsabilidad del Director del Establecimiento de Salud, supervisar que el responsable sanitario actualice la información requerida en términos del artículo 338 de la Ley.

El CENATRA deberá notificar a la COFEPRIS, el incumplimiento del contenido del presente Capítulo, a fin de que dicha autoridad proceda en términos de las disposiciones jurídicas aplicables.

Artículo 64. Sólo podrán trasplantarse Órganos, Tejidos o células procedentes de Donadores fallecidos, a pacientes inscritos en el Registro Nacional de Trasplantes por lo menos cuarenta y ocho horas antes de la certificación de la pérdida de la vida del Donador. Podrán exceptuarse de lo anterior, los casos de Urgencia de Trasplante.

TÍTULO SEXTO
INTERVENCIÓN DEL MINISTERIO PÚBLICO Y DE LA AUTORIDAD JUDICIAL EN LA DONACIÓN DE ÓRGANOS, TEJIDOS O CÉLULAS

Capítulo Único
De la Intervención del Ministerio Público y de la Autoridad Judicial en la Donación de Órganos, Tejidos o Células

Artículo 65. En los casos en que la pérdida de la vida del Donador se encuentre relacionada con la investigación de un delito, se dará intervención al Ministerio Público, a efecto de que se pronuncie respecto de si la Extracción de los Órganos, Tejidos y células de dicho Donador interfiere con su investigación.

La intervención a que se refiere el párrafo anterior, se dará a la autoridad judicial en los casos en que ésta se encuentre conociendo del delito de que se trate.

La Extracción de Órganos, Tejidos y células que se realice sin dar la intervención al Ministerio Público o a la autoridad judicial, en términos del presente artículo, dará lugar a las responsabilidades administrativas y penales previstas en la legislación aplicable.

Artículo 66. Tratándose de personas en las que se haya certificado la pérdida de la vida, cuya identidad se desconozca o no se pueda localizar a sus parientes, se dará intervención al Ministerio Público a efecto de que manifieste si los hechos que ocasionaron la pérdida de la vida pueden constituir un delito y en caso afirmativo se estará a lo previsto en el artículo anterior.

Para el caso de que una autoridad judicial esté conociendo de los hechos que ocasionaron la pérdida de la vida de las personas cuya identidad se desconozca o no se pueda localizar a sus parientes, la intervención de la autoridad judicial se realizará en los mismos términos establecidos en el párrafo anterior.

Artículo 67. Las determinaciones del Ministerio Público o de la autoridad judicial competente que se expidan en términos de lo dispuesto en los artículos 65 y 66 de este Reglamento no constituyen una autorización para efectuar la Extracción de los Órganos, Tejidos y células.

Las determinaciones a que se refiere el párrafo anterior se harán del conocimiento del Coordinador Hospitalario para que, en su caso, éste realice las gestiones necesarias que permitan cumplir con los requisitos que establezcan la Ley, el presente Reglamento y demás disposiciones jurídicas aplicables para la Extracción de los Órganos, Tejidos y células.

TÍTULO SÉPTIMO
SUBSISTEMA NACIONAL DE DONACIÓN Y TRASPLANTES

Capítulo Único
Del Subsistema Nacional de Donación y Trasplantes

Artículo 68. El Subsistema Nacional de Donación y Trasplantes tiene por objeto coordinar acciones que faciliten la realización de Trasplantes a los pacientes que lo requieran, bajo los principios de confidencialidad, ausencia de ánimo de lucro, altruismo, factibilidad, transparencia, equidad y eficiencia, debiendo protegerse los datos personales en términos de las disposiciones jurídicas aplicables.

Artículo 69. La coordinación del Subsistema Nacional de Donación y Trasplantes está a cargo del CENATRA.

Para efectos del párrafo anterior, el CENATRA tendrá las siguientes funciones:

I. Coordinar las actividades en materia de donación y Trasplantes de Órganos, Tejidos y células, de los integrantes del Subsistema Nacional de Donación y Trasplantes;

II. Evaluar periódicamente los resultados alcanzados por los diferentes integrantes del Subsistema Nacional de Donación y Trasplantes, y

III. Convocar a consensos para definir la homologación de los criterios de atención médica integral en materia de Trasplantes, así como la difusión de los mismos.

TÍTULO OCTAVO
RECONOCIMIENTO AL MÉRITO Y ALTRUISMO DEL DONADOR Y DE SUS FAMILIAS

Capítulo Único
Del Reconocimiento al Mérito y Altruismo del Donador y de sus Familias

Artículo 70. El Coordinador Hospitalario del Establecimiento de Salud en el que se haya realizado la donación hará constar el mérito y altruismo del Donador y de su familia, mediante una carta de

reconocimiento, dirigida a la familia del Donador, haciendo referencia al mérito por haber respetado su voluntad. En la carta no se especificarán los Órganos, Tejidos o células, motivo de la donación.

Artículo 71. El CENATRA realizará anualmente, una ceremonia pública de entrega simbólica del reconocimiento al mérito y altruismo del Donador y de su familia.

Asimismo, el CENATRA promoverá que los Centros Estatales de Trasplantes o Consejos Estatales de Trasplantes, en el marco del Subsistema Nacional de Donación y Trasplantes, programen anualmente, preferentemente durante el mes de septiembre, la realización de una ceremonia pública de entrega del reconocimiento al mérito y altruismo del Donador y de su familia.

TÍTULO NOVENO
LA TRANSPORTACIÓN Y EMBALAJE DE ÓRGANOS, TEJIDOS Y CÉLULAS

Capítulo Único
De la Transportación y Embalaje de Órganos, Tejidos y Células

Artículo 72. El traslado de Órganos, Tejidos y células de seres humanos con fines de Trasplante, se hará en contenedores destinados específicamente para ello, que permitan su buen manejo, temperatura y conservación en relación con el tipo de Órgano, Tejido o célula y tiempo de isquemia de ser el caso.

Artículo 73. Los contenedores a que se refiere el artículo anterior, deberán identificarse mediante un documento adherido que tendrá los siguientes datos:

I. La leyenda “ÓRGANOS, TEJIDOS Y CÉLULAS PARA TRASPLANTE”;

II. Tipo de Órgano, Tejido o célula;

III. Nombre del Establecimiento de Salud donde se llevó a cabo la Extracción;

IV. Nombre del Establecimiento de Salud que recibirá el Órgano, Tejido o célula, y

V. Nombre del responsable del traslado.

Artículo 74. El contenedor deberá contar con tapa de cierre hermético y las medidas adecuadas de acuerdo al volumen del o los Órganos, Tejidos o células a transportar.

Artículo 75. Al contenedor se deberá acompañar un documento con la siguiente información:

I. Datos del Donador, consistentes en las iniciales de su nombre y el tipo de sangre;

II. Fecha y hora de la Extracción, a fin de determinar el inicio del periodo de isquemia fría;

III. Relación de Órganos, Tejidos o células que se encuentren en el contenedor;

IV. Establecimiento de Salud de destino y resultado de los exámenes de laboratorio que descarten un riesgo sanitario, y

V. Nombre del responsable del traslado.

Artículo 76. Para el manejo y conservación de los Órganos, Tejidos o células a trasplantarse, deberán utilizarse, según sea el caso, los materiales y equipos que garanticen una adecuada transportación y

Preservación de los mismos, en términos de las disposiciones jurídicas aplicables y mediante las técnicas internacionalmente aceptadas.

Artículo 77. Los vehículos dedicados al transporte de Órganos, Tejidos y células de seres humanos con fines de Trasplantes, deberán contar con el equipo y condiciones necesarias que garanticen el traslado adecuado de los mismos, en términos de las disposiciones jurídicas aplicables.

Por ningún motivo se podrá transportar en el mismo vehículo, los Órganos, Tejidos y células para el Trasplante y materiales, equipos, substancias o cualquier otro objeto que los pudiera contaminar, dañar o confundir.

Artículo 78. El traslado a que se refiere este Capítulo se hará bajo la responsabilidad de la persona que al efecto designe el Comité Interno de Trasplantes del Establecimiento de Salud al que se ha destinado el Órgano, Tejido o célula, quien deberá llevar consigo un documento que lo identifique y acredite como responsable en términos del presente artículo. El Comité Interno de Trasplantes antes de realizar el traslado, deberá dar aviso al CENATRA de la persona designada para tal efecto.

Artículo 79. En el expediente del Donador deberá registrarse el Establecimiento de Salud al que se destinaron los Órganos, Tejidos o células; la fecha de la Procuración, así como el nombre de la persona responsable del traslado a que se refiere el artículo anterior y los datos que se desprendan de la identificación oficial que porte, incluyendo el número de folio de la misma.

TÍTULO DÉCIMO
LOS PERMISOS Y AVISOS

Capítulo Único
De los Permisos y Avisos

Artículo 80. Se requerirá permiso sanitario, para la internación o salida del territorio nacional, según sea el caso, de Tejidos, células y sus Componentes para fines de Trasplantes.

Artículo 81. Para obtener el permiso sanitario para la internación al territorio nacional de Tejidos, células y sus Componentes con fines de Trasplantes, el interesado deberá presentar ante la COFEPRIS la solicitud en el formato oficial correspondiente, al cual se anexará la documentación que corresponda, de acuerdo con lo siguiente:

I. Documento que acredite el funcionamiento del Establecimiento de Salud expedido por la autoridad sanitaria del país de origen, y

II. Licencia sanitaria del Establecimiento con giro específico para Trasplante.

Artículo 82. Para la internación de Tejidos o células al territorio nacional, el Establecimiento de Salud que pretenda recibir el Tejido o célula, deberá justificar ante la COFEPRIS y el CENATRA la necesidad de su internamiento, así como la dificultad de su obtención en el país.

Artículo 83. Para obtener el permiso sanitario para la salida del territorio nacional de Tejidos y células, el interesado deberá presentar ante la COFEPRIS solicitud en el formato oficial correspondiente, al cual se anexará la documentación siguiente:

I. Copia de la autorización sanitaria del Establecimiento de Salud para efectuar la Disposición de Órganos, Tejidos y células;

II. Copia del documento que acredite el funcionamiento legal del Establecimiento de Salud que recibirá los Tejidos y células emitida por la autoridad competente, con fines de control del país de destino, y

III. Carta de aceptación del Establecimiento de Salud en el extranjero.

Artículo 84. Los documentos emitidos por el Establecimiento de Salud o el profesional en el extranjero se acompañarán de su traducción cuando estén redactados en idioma distinto al español, realizada por perito traductor.

Artículo 85. Deberá darse aviso a la COFEPRIS en los casos siguientes:

I. La baja, suspensión temporal y reanudación total o parcial de actividades de los Establecimientos de Salud que para su funcionamiento requieren autorización sanitaria, en términos de la Ley y el presente Reglamento;

II. Designación o baja del responsable sanitario de los Establecimientos de Salud, y

III. Los demás que determine la Ley, este Reglamento y otras disposiciones jurídicas aplicables.

TÍTULO DÉCIMO PRIMERO
VIGILANCIA

Capítulo Único
De la Vigilancia

Artículo 86. Corresponde a la Secretaría de Salud, la vigilancia del cumplimiento de este Reglamento y demás disposiciones jurídicas aplicables, la cual se realizará conforme al Título Décimo Séptimo de la Ley.

Artículo 87. Durante la visita de verificación sanitaria y cuando la autoridad sanitaria lo estime necesario, se realizarán los procedimientos que se requieran para comprobar que los Órganos, Tejidos, células, Donadores y Receptores, reúnen las condiciones sanitarias y requisitos que establecen la Ley, este Reglamento y demás disposiciones jurídicas aplicables. En caso de encontrar alguna irregularidad, deficiencia o anomalía, la autoridad sanitaria podrá ordenar las acciones necesarias para identificar el origen de las fallas o problemas.

Las actas que al efecto se levanten, se realizarán conforme a lo dispuesto por el artículo 401, fracción III, de la Ley y demás disposiciones jurídicas aplicables.

Artículo 88. La autoridad sanitaria podrá, en cualquier momento, determinar los casos en que los Órganos, Tejidos y sus Componentes y células no cumplen con los requisitos y condiciones óptimas para su utilización, en los términos establecidos por este Reglamento y en las demás disposiciones jurídicas aplicables.

Artículo 89. En el ejercicio de sus facultades, la autoridad sanitaria podrá solicitar el apoyo del personal de las áreas técnicas de la Secretaría que se consideren necesarias.

TRANSITORIOS

PRIMERO. El presente Reglamento entrará en vigor el día siguiente al de su publicación en el Diario Oficial de la Federación.

SEGUNDO. Se derogan las disposiciones del Reglamento de la Ley General de Salud en Materia de Control Sanitario de la Disposición de Órganos, Tejidos y Cadáveres de Seres Humanos, que se refieran a la donación, disposición y trasplante de órganos, tejidos y células, distintas a la sangre y sus componentes, células progenitoras hematopoyéticas o troncales, así como aquellas disposiciones que se opongan al presente Reglamento.

En consecuencia, se mantienen vigentes las Secciones Tercera y Cuarta del Capítulo III; el Capítulo IV, y el Capítulo V del Reglamento de la Ley General de Salud en Materia de Control Sanitario de la Disposición de Órganos, Tejidos y Cadáveres de Seres Humanos, así como las demás disposiciones del mismo ordenamiento, que resulten necesarias para la aplicación de dichas Secciones y Capítulos antes citados.

TERCERO. Se abroga el Acuerdo mediante el cual se establecen los lineamientos para la asignación y distribución de órganos y tejidos de cadáveres de seres humanos para trasplante, publicado en el Diario Oficial de la Federación el 23 de abril de 2009.

CUARTO. Se abroga el Acuerdo por el que se delega en el Titular de la Comisión Federal para la Protección contra Riesgos Sanitarios la atención del trámite que se indica, publicado en el Diario Oficial de la Federación el 16 de junio de 2011.

QUINTO. El Centro Nacional de Trasplantes tendrá un plazo de noventa días hábiles, contados a partir de la entrada en vigor del presente Reglamento, para la emisión de los formatos a que hacen referencia los artículos 8 y 11 del presente ordenamiento.

SEXTO. Los trámites y procedimientos administrativos relacionados con el objeto de este Reglamento que se encuentren en trámite al momento de su entrada en vigor, se resolverán conforme a las disposiciones vigentes en la fecha en que iniciaron dichos trámites y procedimientos.

SÉPTIMO. Las erogaciones que se generen con motivo de la entrada en vigor del presente Reglamento deberán cubrirse con cargo al presupuesto aprobado a la Secretaría de Salud, por lo que no requerirá de ampliaciones presupuestales adicionales y no se incrementará su presupuesto regularizable para el presente ejercicio fiscal.

Dado en la Residencia del Ejecutivo Federal, en la Ciudad de México, Distrito Federal, a veintiuno de marzo de dos mil catorce.- **Enrique Peña Nieto**.- Rúbrica.- La Secretaria de Salud, **María de las Mercedes Martha Juan López**.- Rúbrica.

REGLAMENTO DE LA LEY DE BIOSEGURIDAD DE ORGANISMOS GENÉTICAMENTE MODIFICADOS

Nuevo Reglamento publicado en el Diario Oficial de la Federación el 19 de marzo de 2008

TEXTO VIGENTE
Última reforma publicada DOF 06-03-2009

Al margen un sello con el Escudo Nacional, que dice: Estados Unidos Mexicanos.- Presidencia de la República.

FELIPE DE JESÚS CALDERÓN HINOJOSA, Presidente de los Estados Unidos Mexicanos, en ejercicio de la facultad que me confiere el Artículo 89, fracción I, de la Constitución Política de los Estados Unidos Mexicanos y con fundamento en los artículos 13, 32 bis, 34, 35, 38, y 39 de la Ley Orgánica de la Administración Pública Federal, y en la Ley de Bioseguridad de Organismos Genéticamente Modificados, he tenido a bien expedir el siguiente

REGLAMENTO DE LA LEY DE BIOSEGURIDAD DE ORGANISMOS GENÉTICAMENTE MODIFICADOS

TÍTULO PRIMERO
Disposiciones generales

Capítulo Único

Artículo 1. El presente ordenamiento tiene por objeto reglamentar la Ley de Bioseguridad de Organismos Genéticamente Modificados, a fin de proveer a su exacta observancia.

Artículo 2. Para los efectos de este Reglamento se estará a las definiciones previstas en el artículo 3 de la Ley de Bioseguridad de Organismos Genéticamente Modificados y las siguientes:

I. Ley: Ley de Bioseguridad de Organismos Genéticamente Modificados;

II. México: Estados Unidos Mexicanos;

III. NOM: Norma Oficial Mexicana;

IV. OGM con finalidades de salud pública: Aquellos organismos cuya modificación genética tenga como objetivo generar mecanismos de prevención o control de enfermedades del ser humano, salvo aquellos a que se refiere el artículo 6, fracción III, de la Ley;

V. Protocolo de Cartagena: El Protocolo de Cartagena sobre Seguridad de la Biotecnología del Convenio sobre la Diversidad Biológica;

VI. SALUD: La Secretaría de Salud;

VII. Secretaría competente: SEMARNAT y SAGARPA en el ámbito de sus competencias conforme a la Ley;

VIII. Secretaría Ejecutiva: La Secretaría Ejecutiva de la CIBIOGEM;

IX. Solicitud integrada: Los datos y los documentos anexos, a que se refiere el artículo 5 de este Reglamento, y

X. UTM: Proyección Transversal Universal de Mercator, sistema utilizado para convertir coordenadas geográficas esféricas en coordenadas cartesianas planas.

Artículo 3. A falta de disposición expresa en el presente ordenamiento, se estará a lo establecido en la Ley Federal de Procedimiento Administrativo.

Artículo 4. Cuando se realice un trámite ante la Secretaría competente o SALUD, en su caso, se deberá adjuntar copia del pago de derechos, al momento que lo señale la Ley correspondiente.

TÍTULO SEGUNDO
Permisos para Actividades con OGMs

Capítulo I
De la solicitud de permisos

Artículo 5. Quienes pretendan realizar las actividades previstas en el artículo 32 de la Ley, deberán presentar ante la Secretaría competente, una solicitud por escrito, en el formato que al efecto expidan las Secretarías competentes, acompañada de la información a que hacen referencia los artículos 16, 17 y 19 del presente Reglamento. Deberá presentarse una solicitud por cada OGM, en original y copia. Los datos que contendrá la solicitud serán los siguientes:

I. Nombre, denominación o razón social del promovente y, en su caso, nombre del representante legal;

II. Domicilio para oír y recibir notificaciones, así como el nombre de la persona o personas autorizadas para recibirlas;

III. Dirección de correo electrónico para recibir notificaciones, en caso de que el promovente desee ser notificado por este medio;

IV. Modalidad de la liberación solicitada y las razones que dan motivo a la petición;

V. Señalar el órgano de la Secretaría competente, al que se dirige la solicitud;

VI. Lugar y fecha, y

VII. Firma del interesado o del representante legal, o en su caso, huella digital.

El promovente deberá adjuntar a su solicitud los documentos que acrediten su personalidad.

En caso de que cuente con el número de identificación en el registro de personas acreditadas, podrá citarlo en el escrito, sin necesidad de asentar la información prevista en las fracciones I, II y VII de este artículo, ni los documentos con los que acredite su personalidad, excepto la información prevista en las fracciones III, IV, V y VI, de este artículo.

El promovente no estará obligado a proporcionar datos o entregar juegos adicionales de documentos entregados previamente a la Secretaría competente, siempre y cuando señale los datos de identificación

del escrito en el que se citaron o con el que se acompañaron y el nuevo trámite lo realice ante dicha Dependencia.

Adicionalmente a los requisitos antes mencionados, deberán presentarse los datos y documentos anexos que contengan la información y requisitos establecidos en los artículos 42, 43, 50, 51, 55 y 56 de la Ley, y 16, 17 y 19 del presente Reglamento, según la modalidad de liberación que corresponda.

La solicitud deberá estar acompañada de dispositivos electrónicos de almacenamiento de información que contendrán la versión electrónica de la solicitud presentada por escrito, así como todos los datos y documentos anexos que contengan la información y requisitos establecidos en la Ley, el presente Reglamento y las NOM.

Dicha versión electrónica deberá presentarse en el formato que mediante acuerdo expedido conjuntamente por SEMARNAT y SAGARPA y publicado en el Diario Oficial de la Federación se determine.

Artículo 6. La solicitud integrada debe ser presentada en idioma español. Si se encuentra en un idioma distinto, deberán adjuntarse las versiones en ambos idiomas y, de existir controversia en cuanto a su contenido, prevalecerá lo manifestado en el idioma de origen.

Artículo 7. El interesado podrá identificar claramente dentro de la información proporcionada, aquella que sea considerada como confidencial, de acuerdo a los artículos 70 y 71 de la Ley.

Artículo 8. La Secretaría competente hará la revisión de la solicitud integrada, dentro de los diez días hábiles siguientes a que la reciba, y en caso de que la misma no cumpla con los datos o requisitos correspondientes, deberá prevenir a los interesados por escrito y por una sola vez, para que subsanen la omisión, en un plazo no mayor a veinte días hábiles, contados a partir del día siguiente de la notificación.

Transcurrido el plazo correspondiente sin que se haya desahogado la prevención, se desechará el trámite.

Para efectos de lo previsto en el artículo 44 de la Ley, se entiende que la solicitud integrada fue recibida y la información está completa, en los casos en que una vez presentada no se haga prevención o hecha ésta sea atendida por el promovente, sin perjuicio de las atribuciones que le confiere el artículo 34, fracción II de la Ley a la Secretaría competente.

Artículo 9.- Si la Secretaría competente no realiza la prevención en los términos señalados en el artículo anterior no podrá desechar el trámite argumentando que está incompleto.

Artículo 10. La Secretaría competente sólo podrá requerir información adicional, dentro de los veinte días posteriores a la admisión de la solicitud integrada, en los casos a que se refiere el artículo 63 de la Ley.

Artículo 11. El promovente contará con un plazo de veinte días hábiles, contados a partir del día siguiente a que haya surtido efectos la notificación, para atender el requerimiento a que se refiere el artículo 10 del presente Reglamento.

Transcurrido este plazo sin que el promovente haya presentado la información solicitada, la Secretaría competente podrá negar el permiso, de conformidad con lo dispuesto en la fracción II del artículo 34 de la Ley.

Durante el periodo de veinte días y el previsto para atender la prevención a que alude el artículo 8 de este ordenamiento, se suspenderán los plazos de resolución del permiso de la solicitud o de la emisión

del dictamen u opinión, y se reanudarán al día hábil siguiente a que el promovente desahogue el requerimiento.

Artículo 12. Dentro de los dos días hábiles siguientes a que la solicitud integrada sea admitida, la Secretaría competente remitirá al Registro copia de la misma para su inscripción y publicidad respectivas, en términos del artículo 33 de la Ley.

Artículo 13. Para efectos de la emisión del dictamen o la opinión a que se refiere el artículo 34 de la Ley, se procederá de la manera siguiente:

I. Dentro de los tres días hábiles siguientes a aquél en que la solicitud integrada de permiso fue admitida, la Secretaría competente deberá entregar una copia de la misma a la Secretaría que deba emitir el dictamen u opinión;

II. Cuando se requiera información adicional, en los casos a que se refiere el artículo 63 de la Ley, para la emisión del dictamen u opinión, la Secretaría que deba emitir este dictamen u opinión lo comunicará por escrito y por una sola vez a la Secretaría competente, para lo cual se observará lo previsto por los artículos 10 y 11 de este Reglamento.

El plazo para efectuar esta revisión y comunicar por escrito el resultado de la misma a la Secretaría competente, será de diez días hábiles contados a partir del día siguiente a que haya recibido la copia de la solicitud de permiso, y

III. En caso de que la Secretaría que deba emitir el dictamen u opinión, no solicite la información adicional, deberá emitir su dictamen u opinión con la información de la copia de la solicitud integrada a que se refiere la fracción I de este artículo, sin que pueda argumentar la falta de dicha información para emitir un dictamen u opinión en sentido negativo.

Artículo 14. La Secretaría que deba emitir el dictamen o la opinión, respecto de los permisos de liberación, incluyendo su importación, a que se refiere el artículo 32 de la Ley, tendrá los plazos siguientes para entregarlo a la Secretaría competente:

I. Para el caso de liberación experimental al ambiente, hasta ochenta días hábiles;

II. Para el caso de liberación al ambiente en programa piloto, hasta cuarenta días hábiles, y

III. Para el caso de liberación comercial al ambiente hasta cincuenta días hábiles.

Los plazos a que se refiere este artículo, se contarán a partir del día siguiente a aquel en que la Secretaría que deba emitir el dictamen o la opinión, reciba la copia de la solicitud integrada por parte de la Secretaría competente.

En caso de que la Secretaría que deba emitir el dictamen u opinión no lo entregue en los plazos previstos en este artículo, se entenderá que no existe objeción a las pretensiones del promovente.

Artículo 15. El dictamen o la opinión a que se refiere el artículo anterior deberá contener:

I. Declaración de la Secretaría que emite el dictamen u opinión, favorable o desfavorable sobre la solicitud integrada de permiso;

II. Cuando sea favorable, se indicarán:

a) Opinión respecto de la propuesta de vigencia del permiso y, de ser necesario, las medidas y procedimientos de monitoreo y de bioseguridad adicionales a las presentadas por el promovente;

b) Las razones por las que se determina adicionar tales medidas y procedimientos, y

c) Las disposiciones jurídicas en que basan las adiciones mencionadas en el inciso a) de esta fracción, y las razones científicas por las que se justifique establecer las medidas y procedimientos adicionales.

III. Cuando sea desfavorable, se indicarán:

a) De ser el caso, las razones por las que se considera que el promovente no atendió las cuestiones planteadas en el requerimiento a que se refiere el artículo 10 del Reglamento;

b) Las razones científicas o técnicas por las que se considera que los riesgos que pudieran presentar los OGM de que se trate, afectarán negativamente a la diversidad biológica, al medio ambiente, la sanidad animal, vegetal o acuícola, pudiéndoles causar daños graves o irreversibles;

c) Las razones por las que la liberación solicitada contraviene la Ley, el presente Reglamento y las demás disposiciones aplicables, y

d) Las demás determinaciones que formule la autoridad en ejercicio del enfoque precautorio establecido en la Ley.

De conformidad con el último párrafo del artículo 15 de la Ley, el dictamen de bioseguridad a que se refiere la fracción I de dicho artículo será vinculante para la SAGARPA en la resolución de las solicitudes de permisos que conforme a la Ley sean de su competencia.

Capítulo II
De los requisitos para los permisos de liberación al ambiente

Artículo 16. La información que deberá adjuntarse a la solicitud de permiso de liberación experimental de OGMs de conformidad con los artículos 5, 6 y 7 del presente Reglamento, será la siguiente:

I. Caracterización del OGM;

a) Identificador único del evento de transformación, de organismos internacionales de los que México sea parte, cuando exista;

b) Especies relacionadas con el OGM y distribución de éstas en México;

c) Especificación de la existencia de especies sexualmente compatibles;

d) Descripción de los hábitats donde el OGM puede persistir o proliferar en el ambiente de liberación;

e) Descripción taxonómica del organismo receptor y donador de la construcción genética;

f) País y localidad donde el OGM fue colectado, desarrollado o producido;

g) Referencia documental sobre origen y diversificación del organismo receptor;

h) Secuencia génica detallada del evento de transformación, incluyendo tamaño del fragmento insertado, sitio de inserción de la construcción genética, incluyendo las secuencias de los oligonucleótidos que permitan la amplificación del sitio de inserción;

i) Descripción de las secuencias flanqueantes, número de copias insertadas, y los resultados de los experimentos que comprueben los datos anteriores, así como la expresión de mensajeros del evento de transformación genética, incluyendo la demostración de los resultados;

j) Mapa de la construcción genética, tipo de herencia de los caracteres producto de los genes insertados, expresión de las proteínas y localización de las mismas;

k) Descripción del método de transformación;

l) Descripción, número de copias, sitios de inserción y expresión de las secuencias irrelevantes para la expresión de la modificación genética y en su caso, la identificación de los efectos no esperados;

m) Secuencia de aminoácidos y de las proteínas novedosas expresadas por el OGM, tamaño del producto del gen, expresión de copias múltiples;

n) Rutas metabólicas involucradas en la expresión del transgen y sus cambios;

o) Productos de degradación de la proteína codificada por el transgen en subproductos;

p) Secuencia nucleotídica de las secuencias reguladoras incluyendo promotores, terminadores y otras, y su descripción, número de copias insertadas, pertenencia de éstas secuencias a la especie receptora, inclusión de secuencias reguladoras homólogas a la especie receptora;

q) Patogenicidad o virulencia de los organismos donadores y receptores;

r) Genes de selección utilizados durante el desarrollo del OGM y el fenotipo que confiere estos genes de selección, incluyendo el mecanismo de acción de éstos genes;

s) Número de generaciones que mostraron estabilidad en la herencia del transgen, y

t) Referencia bibliográfica sobre los datos presentados.

II. Identificación de la zona o zonas donde se pretenda liberar el OGM:

a) Superficie total del polígono o polígonos donde se realizará la liberación;

b) Ubicación, en coordenadas UTM, del polígono o polígonos donde se realizará la liberación, y

c) Descripción de los polígonos donde se realizará la liberación y de las zonas vecinas a éstos según las características de diseminación del OGM de que se trate:

1. Listado de especies sexualmente compatibles y de las especies que tengan interacción en el área de liberación y en zonas vecinas a éstos;

2. Descripción geográfica, y

3. Plano de ubicación señalando las principales vías de comunicación.

III. Estudio de los posibles riesgos que la liberación de los OGMs pudiera generar al medio ambiente y a la diversidad biológica a los que se refiere el artículo 42, fracción III, de la Ley. Contendrá, además de lo dispuesto en el artículo 62 de la Ley, la información siguiente:

a) Estabilidad de la modificación genética del OGM;

b) Expresión del gen introducido, incluyendo niveles de expresión de la proteína de interés en los diversos tejidos, así como los resultados que lo demuestren;

c) Características del fenotipo del OGM;

d) Identificación de cualquier característica física y fenotípica nueva relacionada con el OGM que pueda tener efectos adversos sobre la diversidad biológica y en el medio ambiente receptor del OGM;

e) Comparación de la expresión fenotípica del OGM respecto al organismo receptor, la cual incluya al menos, ciclo biológico y cambios en la morfología básica;

f) Declaración sobre la existencia de efectos sobre la diversidad biológica y al medio ambiente que se puedan derivar de la liberación del OGM;

g) Descripción de uno o más métodos de identificación del evento específico del OGM, incluyendo niveles de sensibilidad y reproducibilidad, con la manifestación expresa del promovente de que los métodos de identificación son los reconocidos por el desarrollador del OGM para la detección del mismo;

h) Existencia potencial de flujo génico del OGM a especies relacionadas;

i) Bibliografía reciente de referencia a los datos presentados, y

j) Las demás que establezcan las NOM que deriven de la Ley.

IV. Medidas y procedimientos de monitoreo de la actividad y de bioseguridad a llevar a cabo:

a) Medidas y procedimientos de monitoreo de la actividad:

1. Plan de monitoreo detallado;

2. Estrategias de monitoreo posteriores a la liberación del OGM, con el fin de detectar cualquier interacción entre el OGM y especies presentes relevantes, directa o indirectamente, en la zona o zonas donde se pretenda realizar la liberación, cuando existan, y

3. Estrategias para la detección del OGM y su presencia posterior en la zona o zonas donde se pretenda realizar la liberación y zonas vecinas, una vez concluida la liberación.

b) Medidas y procedimientos de bioseguridad:

1. Medidas y procedimientos para prevenir la liberación y dispersión del OGM fuera de la zona o zonas donde se pretende realizar la liberación;

2. Medidas y procedimientos para disminuir el acceso de organismos vectores de dispersión, o de personas que no se encuentren autorizadas para ingresar al área de liberación a dicha zona o zonas;

3. Medidas para la erradicación del OGM en zonas distintas a las permitidas;

4. Medidas para el aislamiento de la zona donde se pretenda liberar experimentalmente el OGM;

5. Medidas para la protección de la salud humana y del ambiente, en caso de que ocurriera un evento de liberación no deseado, y

6. Métodos de limpieza o disposición final de los residuos de la liberación.

El promovente deberá distinguir claramente las medidas y procedimientos que se realizarán durante la liberación de los que se realizarán con posterioridad a la misma.

V. Antecedentes de liberación del OGM en otros países, cuando esto se haya realizado, debiendo anexar la información pertinente cuando ésta se encuentre al alcance del promovente:

a) Descripción de la zona en donde se realizó la liberación;

b) Efectos de la liberación sobre la flora y la fauna;

c) Estudio de los posibles riesgos de la liberación de los OGMs presentado en el país de origen, cuando haya sido requerido por la autoridad de otro país y se tenga acceso a él. La descripción de las medidas y procedimientos de monitoreo de bioseguridad establecidos deberá incluirse en el estudio.

d) En caso de que el promovente lo considere adecuado, otros estudios o consideraciones en los que se analicen tanto la contribución del OGM a la solución de problemas ambientales, sociales, productivos o de otra índole, así como las consideraciones socioeconómicas que existan respecto de la liberación de OGMs al ambiente. Estos análisis deberán estar sustentados en evidencias científicas y técnicas, en los antecedentes sobre uso, producción y consumo, y podrán ser considerados por las Secretarías competentes como elementos adicionales para decidir sobre la liberación experimental al ambiente, y consecuentes liberaciones al ambiente en programa piloto y comercial, respectivamente, del OGM de que se trata, y

e) En caso de importación copia legalizada o apostillada de las autorizaciones o documentación oficial que acredite que el OGM está permitido conforme a la legislación del país de origen, al menos para su liberación experimental, traducida al español. La Secretaría competente, de considerarlo necesario, podrá requerir copia simple de la legislación aplicable vigente en el país de exportación traducida al español.

VI. Consideraciones sobre los riesgos de las alternativas tecnológicas con que se cuente para contender con el problema para el cual se construyó el OGM, en caso de que tales alternativas existan;

VII. Número de autorización expedida por SALUD cuando el OGM tenga finalidades de salud pública o se destine a la biorremediación. En caso de no contar con la autorización al momento de

presentar la solicitud de permiso, el promovente podrá presentarla posteriormente anexa a un escrito libre, en el que se indique el número de autorización;

VIII. La propuesta de vigencia para el permiso y los elementos empleados para determinarla, y

IX. La información que en cada caso determinen las NOM.

Artículo 17. La información que deberá adjuntarse a la solicitud de permiso de liberación al ambiente de OGMs en programa piloto de conformidad con los artículos 5, 6 y 7 del presente Reglamento, será la siguiente:

I. Datos de identificación del permiso de liberación experimental o copia simple del referido permiso;

II. Referencia y consideraciones sobre el reporte de los resultados de la o las liberaciones experimentales realizadas en relación con los posibles riesgos al medio ambiente y la diversidad biológica y, adicionalmente, a la sanidad animal, vegetal o acuícola;

III. Cantidad del OGM a liberar;

IV. Condiciones de manejo que se darán al OGM;

V. Identificación de la zona o zonas donde se pretenda liberar el OGM:

a) Superficie total del predio o predios donde se realizará la liberación;

b) Ubicación, en coordenadas UTM, del polígono o polígonos donde se realizará la liberación, y

c) Descripción de los polígonos donde se realizará la liberación y de las zonas vecinas a éstos en un radio según las características de diseminación del OGM de que se trate:

1. Listado de especies sexualmente compatibles y de las especies que tengan interacción en el área de liberación y en zonas vecinas a éstos en el radio señalado en este inciso;

2. Descripción geográfica, y

3. Plano de ubicación señalando las principales vías de comunicación.

VI. Medidas de monitoreo y de bioseguridad a realizar:

a) Medidas de monitoreo:

1. Plan de monitoreo detallado;

2. Estrategias de monitoreo posteriores a la liberación del OGM, con el fin de detectar cualquier interacción entre el OGM y especies presentes en el área de la zona o zonas donde se pretenda realizar la liberación, cuando existan, y

3. Estrategias para la detección del OGM y su presencia posterior en la zona o zonas donde se pretenda realizar la liberación y zonas vecinas, una vez concluida la liberación.

b) Medidas de bioseguridad:

1. Medidas para la erradicación del OGM en zonas distintas a las permitidas, y

2. Medidas para la protección de la salud humana y el ambiente, en caso de que ocurriera un evento de liberación no deseado.

El promovente deberá distinguir claramente las medidas que se realizarán durante la liberación de los que se realizarán con posterioridad a la misma.

VII. Número de autorización expedida por SALUD, cuando el OGM se destine para uso o consumo humano, o se destine a procesamiento de alimentos para consumo humano, o tenga finalidades de salud pública o se destine a la biorremediación. En caso de no contar con la autorización al momento de presentar la solicitud de permiso, el promovente podrá presentarla posteriormente anexa a un escrito libre en el que se indique el número de autorización;

VIII. En caso de importación del OGM, copia legalizada o apostillada de las autorizaciones o documentación oficial que acredite que el OGM está permitido conforme a la legislación del país de origen, al menos para su liberación en programa piloto, traducida al español. La Secretaría competente, de considerarlo necesario, podrá requerir copia simple de la legislación aplicable vigente en el país de exportación traducida al español;

IX. La propuesta de vigencia del permiso y los elementos empleados para determinarla, y

X. La Información que en cada caso determinen las NOM.

Artículo 18. Conforme lo dispuesto en los artículos 46 y 53 de la Ley, los titulares del permiso de liberación experimental y liberación en programa piloto, deberán informar mediante un reporte a la Secretaría que expidió el permiso los resultados de las liberaciones realizadas en el momento que se establezca en los permisos correspondientes. El reporte contendrá lo siguiente:

I. Lineamientos del protocolo propuesto para la liberación experimental o en programa piloto;

II. Cambios fenotípicos del OGM respecto a su adaptación al área de liberación;

III. Efectos de los genes de selección y posibles efectos sobre la biodiversidad;

IV. Caracterización bioquímica y metabólica de todos los productos del gen novedoso con relación a su actividad, productos de degradación o subproductos, productos secundarios y rutas metabólicas;

V. Cambios en la capacidad competitiva del OGM en comparación con la contraparte no modificada, incluyendo supervivencia y reproducción, producción de estructuras reproductoras, periodos de latencia y duración del ciclo de vida;

VI. Posibles efectos al ambiente y a la diversidad biológica por la liberación del OGM, incluyendo, el protocolo utilizado para establecer estos posibles efectos;

VII. Efectos de las prácticas de uso y aprovechamiento, y

VIII. En su caso, referencia bibliográfica sobre los datos presentados.

En los permisos la Secretaría competente podrá establecer, caso por caso, requisitos específicos de contenido de reportes de resultados. Tratándose de liberaciones de OGMs que sean competencia de la

SAGARPA, dicha Secretaría considerará lo que se establezca en el dictamen vinculante que emita la SEMARNAT conforme a la Ley y el presente Reglamento.

Artículo 19. La información que deberá adjuntarse a la solicitud de permiso de liberación comercial al ambiente de OGMs, de conformidad con los artículos, 5, 6 y 7 del presente Reglamento, será la siguiente:

I. Datos de identificación del permiso de liberación experimental y del permiso de liberación en programa piloto, o copia simple de cada uno de los referidos permisos;

II. Descripción de la zona donde se realizará la liberación, la cual consistirá en lo siguiente:

a) Ubicación, en coordenadas UTM, del polígono o polígonos donde podrá realizar la liberación;

b) Municipio o municipios donde se encuentra cada uno de dichos polígonos, y

c) Estado o estados donde se ubica cada uno de dichos polígonos.

III. Referencia y consideraciones sobre los reportes de resultados de la liberación experimental y de la liberación en programa piloto que se hayan realizado, en términos de los permisos a que se refiere la fracción anterior;

IV. Instrucciones o recomendaciones específicas de transporte, de conformidad con las NOM a que se refiere el artículo 76 de la Ley, de almacenamiento y, en su caso, manejo;

V. Condiciones para su liberación y comercialización, en caso de ser necesarias;

VI. Consideraciones sobre los riesgos de las alternativas tecnológicas con que se cuente para contender con el problema para el cual se construyó el OGM, en caso de que tales alternativas existan;

VII. En su caso, la información que disponga el solicitante sobre datos o resultados de la comercialización del mismo OGM en otros países;

VIII. En caso de importación del OGM, copia legalizada o apostillada de las autorizaciones o documentación oficial que acredite que el OGM está permitido conforme a la legislación del país de origen, al menos para su liberación comercial, traducida al español;

IX. La Secretaría competente, de considerarlo necesario, podrá requerir copia simple de la legislación aplicable vigente en el país de exportación traducida al español, y

X. La información que en cada caso determinen las NOM.

Capítulo III
De la resolución de solicitudes de permiso y su vigencia

Artículo 20. La Secretaría competente resolverá al promovente su solicitud de permiso de liberación incluyendo lo relativo a la importación, dentro de los siguientes plazos máximos, contados a partir del día hábil siguiente a que dicha solicitud sea admitida:

I. Para liberación experimental al ambiente seis meses;

II. Para liberación al ambiente en programa piloto tres meses, y

III. Para liberación comercial al ambiente cuatro meses.

Se entiende que la solicitud es admitida en los casos en que la solicitud fue recibida y la información está completa, conforme a lo previsto por el artículo 8, último párrafo, de este Reglamento.

Artículo 21. En términos de lo señalado por el artículo 35 de la Ley, solamente en caso de que sea necesaria la autorización de SALUD y ésta aún no la haya emitido, el plazo para resolver la solicitud de permiso se prorrogará de forma que la Secretaría competente resuelva dentro de los diez días hábiles posteriores a que el interesado haya acreditado en el expediente respectivo la obtención de dicha autorización.

Artículo 22. La vigencia de los permisos para realizar la liberación experimental y en programa piloto será propuesta por el promovente con la justificación correspondiente, de conformidad con los artículos 16, fracción VIII, y 17, fracción IX, de este Reglamento.

La Secretaría competente podrá limitar la vigencia propuesta considerando los elementos del expediente.

Tratándose del permiso para realizar la liberación comercial, la vigencia será indefinida.

Los permisos contendrán de manera expresa, la vigencia de los mismos.

Una vez otorgado el permiso correspondiente, la Secretaría competente podrá modificar la vigencia del mismo, cuando de la información proporcionada por el interesado concluya que se evitarán daños graves e irreversibles a la diversidad biológica o a la sanidad vegetal, animal o acuícola, debiendo identificar en la resolución los daños que se evitarán, y establecer las razones científicas para justificar la modificación.

TÍTULO TERCERO
De las autorizaciones

Capítulo I
Disposiciones Generales

Artículo 23. Quienes pretendan obtener una autorización de alguno de los OGM a que se refiere el artículo 91 de la Ley, deberán presentar ante SALUD, una solicitud por escrito acompañada de la información a que se refiere el artículo 31 de este Reglamento. La solicitud deberá presentarse en original y una copia simple para acuse.

Artículo 24. Deberá presentarse una solicitud por cada OGM, debiendo contener los siguientes datos:

I. Nombre, denominación o razón social del promovente y, en su caso, nombre del representante legal;

II. Domicilio para oír y recibir notificaciones, así como el nombre de la persona o personas autorizadas para recibirlas;

III. Dirección de correo electrónico para recibir notificaciones, en caso de que el promovente desee ser notificado por este medio;

IV. Tipo del OGM, de conformidad con las fracciones del artículo 91 de la Ley, y las razones que dan motivo a la petición;

V. Señalar el órgano de Salud, al que se dirige la solicitud;

VI. Lugar y fecha, y

VII. Firma del interesado o del representante legal, o en su caso, huella digital.

El promovente deberá adjuntar a su solicitud los documentos que acrediten su personalidad.

En caso de que cuente con el número de identificación en el registro de personas acreditadas, podrá citarlo en el escrito, sin necesidad de asentar la información prevista en las fracciones I, II y VII de este artículo, ni los documentos con los que acredite su personalidad, excepto la información prevista en las fracciones III, IV, V y VI, de este artículo.

El promovente no estará obligado a proporcionar datos o entregar juegos adicionales de documentos entregados previamente a SALUD, siempre y cuando señalen los datos de identificación del escrito en el que se citaron o con el que se acompañaron y el nuevo trámite lo realice ante dicha Dependencia.

La solicitud deberá estar acompañada de dispositivos electrónicos de almacenamiento de información que contendrán la versión electrónica de la solicitud presentada por escrito, así como todos los datos y documentos anexos que contengan la información y requisitos establecidos en la Ley, el presente Reglamento y las NOM.

Dicha versión electrónica deberá presentarse en el formato que mediante acuerdo publicado en el Diario Oficial de la Federación determine SALUD.

Artículo 25. La documentación e información a que se refieren los artículos 23 y 24 del presente Reglamento debe ser presentada en idioma español. Si se encuentra en un idioma distinto al español, deberán adjuntarse ambas versiones y, de existir controversia en cuanto a su contenido, prevalecerá lo manifestado en la versión en el idioma de origen.

El interesado podrá identificar claramente dentro de la información proporcionada, aquella que sea considerada como confidencial, de acuerdo a los artículos 70 y 71 de la Ley.

Artículo 26. Las solicitudes de autorización se presentarán ante SALUD con los anexos correspondientes. En el original de la solicitud y en el acuse de recibo se asentará la fecha y hora de recepción.

Artículo 27. El plazo a que se refiere el artículo 95 de la Ley para expedir la autorización, comenzará a correr a partir del día hábil siguiente a aquél en que la solicitud sea admitida.

Artículo 28. Una vez admitida la solicitud, SALUD evaluará los datos y documentos presentados con la misma, para determinar si cumplen con la información y los requisitos establecidos en la Ley, el presente Reglamento y demás disposiciones aplicables. De ser necesario, prevendrá al promovente, por escrito y por una sola vez para que subsane la omisión.

El plazo para realizar la evaluación y requerir al promovente de la información o requisitos que no se ajusten a lo previsto en la Ley, el Reglamento y demás disposiciones aplicables, será de treinta días hábiles, contados a partir del día hábil siguiente a la presentación de la solicitud del trámite.

Artículo 29. El promovente contará con un plazo de veinte días hábiles contados a partir del día siguiente a que haya surtido efectos la notificación, para atender el requerimiento a que se refiere el artículo anterior. Durante este periodo se suspenderán los plazos de resolución de la solicitud de autorización, y se reanudarán al día hábil siguiente a aquél en que el promovente desahogue el requerimiento.

Transcurrido este plazo sin que el promovente haya desahogado la prevención, SALUD desechará el trámite.

Artículo 30. Una vez desahogada la prevención a que se refiere el artículo 28 de este Reglamento, o bien, si el requerimiento no se notifica al promovente o se notifica fuera del plazo o en términos distintos a los establecidos en dicho artículo, la autoridad no podrá desechar el trámite argumentando que está incompleto.

Para efectos de lo previsto en el artículo 95 de la Ley, se entiende que la solicitud fue recibida y la información está completa, en los casos en que una vez presentada no se haga prevención o hecha ésta sea atendida por el promovente, sin perjuicio de las atribuciones que le confiere el artículo 96, fracción II de la Ley a la autoridad.

Capítulo II
De los requisitos y de la resolución de solicitudes para las autorizaciones

Artículo 31. La información que deberá adjuntarse a la solicitud de autorización del OGM, de conformidad con los artículos 23 y 24 de este Reglamento, será la siguiente:

I. Estudio de posibles riesgos que el uso o consumo humano del OGM de que se trate pudiera representar a la salud humana, en el que se incluirá la información científica y técnica relativa a su inocuidad, consistente en:

a) Organismo receptor, sea vegetal, animal o microorganismo:

1. Identificación;

2. Designación taxonómica más reciente;

3. Origen, historia de uso seguro en alimentos, experiencias previas de uso o consumo;

4. Patogenicidad asociada a los géneros y especies, cualquier evidencia pertinente del potencial de producción de compuestos tóxicos o antinutrientes, y

5. Indicación de la presencia de plásmidos, transposones e integrones que contengan genes de resistencia a antimicrobianos.

b) Sobre cada organismo donante de genes:

1. Clasificación taxonómica más reciente;

2. Historia de uso;

3. Origen, y

4. Indicación de la presencia de plásmidos, transposones e integrones que contengan genes de resistencia a antimicrobianos.

c) En el caso de los microorganismos genéticamente modificados, sean receptores o donantes de genes:

1. Género, especie, subespecie, cepa y nombre común del receptor;

2. Estabilidad genética, potencial impacto inmunológico y a la salud humana, habilidad para formar esporas u otras estructuras de supervivencia, y

3. Infectividad, factores de virulencia y rango de receptores potencialmente susceptibles de ser infectados.

d) Sobre la introducción del material genético:

1. Función del ADN introducido;

2. Localización y orientación del material genético;

3. Para todo ADN introducido se deberá describir la secuencia del ADN o mapa de restricción, caracterización de todos los componentes genéticos incluyendo los genes marcadores, elementos reguladores, promotores, terminadores y otros que afectan la función del ADN;

4. Descripción detallada del método de transformación y número de secuencias codificadoras;

5. Regulación de la expresión del gen, identificación de cualquier marco de lectura abierto dentro del ADN insertado o creados por las modificaciones del ADN contiguo en el cromosoma;

6. Estabilidad de la modificación, y

7. Organismos hospedadores intermediarios.

e) Cuando se empleó un gen marcador como elemento de selección de los organismos modificados:

1. Razones de elección de dicho marcador, y

2. Si se tratase de un gen que confiere resistencia antimicrobiana, se deberá justificar su empleo y fundamentar la no elección de otro gen marcador.

f) En cuanto al OGM:

1. Organización del material genético insertado y los métodos empleados para su caracterización;

2. En el caso de que se hayan insertado porciones truncadas se deberá establecer su tamaño, mecanismo de acción del producto de expresión de los genes insertados;

3. Productos génicos o análisis de las transcripciones o de los productos expresados para identificar cualquier sustancia nueva que pueda estar presente en el alimento o, en el caso de tratarse de organismos empleados con la finalidad de biorremediación en el ambiente o salud pública cualquier efecto secundario en la bioquímica, fisiología y metabolismo del OGM;

4. Estabilidad de la construcción genética bajo diferentes condiciones de proceso y la expresión de nuevos materiales o modificación de materiales nativos, y

5. Caracterización, sensibilidad y especificidad de la acción designada sobre los productos de expresión de los transgenes insertados.

g) Cuando las modificaciones genéticas alteren la expresión de constituyentes naturales o metabolitos, se deberá informar sobre los posibles efectos secundarios sobre las rutas metabólicas relacionadas;

h) Sobre la expresión de los transgenes:

1. Cinética de expresión de los genes en el organismo modificado;

2. En el caso de los vegetales, nivel de expresión en las diferentes estructuras de la planta;

3. Demostrar si se han logrado los efectos buscados con la modificación y si todas las características expresadas se heredan de una manera estable en la cantidad de propagación necesaria para su uso en la producción de alimentos, biorremediación o salud pública y conformes a las leyes de la herencia;

4. Indicar si existen datos que sugieran que uno o más genes del organismo receptor han sido afectados por las modificaciones o por el proceso de intercambio genético, y

5. Tamaño y número de copias de todos los insertos detectables, tanto de los insertados completamente como los truncados.

i) Métodos de detección e identificación del OGM, incluyendo infraestructura requerida para su identificación, reactivos requeridos para las metodologías de extracción, purificación y detección de sus materiales, secuencias de primers y sondas evento específico para detectar el ADN transgénico, al menos 300 pb a un lado del sitio de inserción, anticuerpos específicos para la proteína exógena, y nivel de confiabilidad de cada método. Anexar muestras de los controles positivos y negativos que emplean. En el caso de los microorganismos genéticamente modificados, se deberá describir con detalle el método de identificación que permita su detección inequívoca; fundamentando su elección en su sensibilidad, especificidad y reproducibilidad;

j) Cuando el OGM se use como alimento o para procesamiento de alimentos:

1. Descripción del producto;

2. Uso propuesto, especificando información sobre su procesamiento;

3. Cualquier cambio introducido en el OGM que pueda alterar la forma en que éste interactúa con la matriz alimentaria y, cuando aplique, en la luz intestinal y con los microorganismos que cohabitan la luz intestinal;

4. Desarrollo de la expresión del transgen durante el ciclo de vida de la planta y partes donde el inserto es expresado, y

5. Estudios de equivalencia sustancial aplicado a condiciones de uso o consumo en México, que incluya:

i. Contenido de proteína verdadera, nitrógeno no proteico, perfil de aminoácidos;

ii. Si se ha introducido una nueva proteína: presencia y nivel en las diferentes partes de la planta y en el alimento propuesto, evidencias de consumo en otros alimentos, efectos de procesamiento, función biológica, digestibilidad;

iii. Composición cualitativa y cuantitativa de lípidos totales;

iv. Composición de la fracción hidratos de carbono;

v. Composición cualitativa y cuantitativa de vitaminas;

vi. Presencia de componentes antinutrimentales;

vii. Estabilidad durante el almacenamiento, especialmente degradación de nutrimentos y biodisponiblidad de nutrimentos, y

viii. Para cada caso se deberá determinar el impacto de los cambios en los componentes nutrimentales que pudieran afectar el perfil global de los nutrimentos.

k) En el caso de los microorganismos genéticamente modificados, proceso mediante el cual las materias primas se transforman en producto final, paso a paso, haciendo especial énfasis en los parámetros más relevantes para la caracterización del producto final con relación a los aspectos de seguridad y nutrimentales;

l) Estudios completos de toxicidad:

1. Aguda;

2. Subcrónica;

3. Crónica en aquellos casos donde el estudio subcrónico suponga o evidencie algún riesgo a largo plazo en la salud, de todos los productos de expresión de los transgenes, de acuerdo a si su finalidad es para uso o consumo humano, biorremedicación o salud pública;

4. En el caso de emplearse como alimento o para el procesamiento de alimentos, estudios de los constituyentes del alimento o componentes específicos que fueran alterados como consecuencia de la modificación genética, y

5. Cuando se utilice para el bioensayo, proteína transgénica obtenida a partir de cultivos bacterianos, se debe demostrar que la proteína expresada en el OGM posee el mismo peso molecular e inmunoreactividad que la proteína microbiana.

m) Estudios de alergenicidad completos. Los criterios pertinentes utilizados deben incluir los aspectos referentes al:

1. Origen del material genético transferido;

2. Homología de secuencias aminoacídicas entre la nueva proteína y alergenos conocidos;

3. Efecto del pH o de la digestión enzimática;

4. Estabilidad frente al calor o la elaboración;

5. Modificaciones post-transduccionales, y

6. Cuando, a pesar de que no exista homología entre la proteína transgénica y alergenos conocidos, pero las pruebas citadas de digestión enzimática, a pH y estabilidad al calor o elaboración, demuestren su potencial alergénico, se deberán aportar datos del análisis de reactividad cruzada de IgE entre una proteína de nueva expresión y un alergeno conocido;

n) Cuando se trate de eventos con combinación de genes, los eventos parentales involucrados en la generación de dicho evento deberán estar previamente autorizados. La información que deberá entregarse en este tipo particular de OGMs incluye:

1. Especificación de las siguientes categorías:

i. Categoría 1. Parentales con características fenotípicas no relacionadas;

ii. Categoría 2. Parentales que poseen características relacionadas pero su acción deriva de rutas diferentes o se incluyen a distintos modos de acción, y

iii Categoría 3. Parentales con características relacionadas con actividad en la misma ruta metabólica o biosintética.

2. Procedimiento aplicado para la obtención del evento con combinación de genes, incluyendo las características genotípicas y fenotípicas de sus líneas parentales:

i. Rutas metabólicas en las que actúen cada una de las proteínas transgénicas codificadas en el evento con combinación de genes;

ii. Estudios sobre la estabilidad de los genes insertados, y

iii. Estudios de equivalencia substancial, y

II. En caso de solicitudes de autorización de un OGM para poder realizar su importación para las finalidades a que se refiere el artículo 91 de la Ley, la información y documentación que acredite que el OGM esté autorizado conforme la legislación del país de origen o, en su defecto, manifestación del interesado de la inexistencia de dicha situación y exposición de los elementos de consideración que sustenten el que SALUD pueda resolver la solicitud de autorización, y

III. Los demás requisitos que determine SALUD en las NOM que deriven de la Ley.

Artículo 32. SALUD resolverá sobre la solicitud de autorización en un plazo no mayor de seis meses contados a partir del día hábil siguiente al que admita la solicitud.

Se entiende que la solicitud es admitida en los casos en que la solicitud fue recibida y la información está completa, conforme a lo previsto por el artículo 30, párrafo segundo, de este Reglamento.

TÍTULO CUARTO
De la reconsideración de las resoluciones negativas y la revisión de los permisos y autorizaciones

Capítulo I
De la reconsideración de las resoluciones negativas

Artículo 33. Para el supuesto que se establece en los artículos 67 y 98 de la Ley, la solicitud de reconsideración de una resolución negativa sobre un permiso o sobre una autorización deberá ser presentada ante la autoridad que la emitió, debiendo aportar los elementos en los que se sustente la pretensión del promovente en el mismo escrito de reconsideración.

En el escrito de reconsideración, el promovente deberá indicar:

I. Los datos de identificación de la resolución y la fecha en que fue emitida y

II. Los argumentos y elementos que demuestren que su solicitud se apega a los supuestos previstos en el artículo 67 de la Ley.

Artículo 34. En los casos en que se haya negado el permiso de liberación de OGMs al ambiente, debido a que SALUD no otorgó la autorización correspondiente, el promovente podrá presentar, de forma simultánea ante la Secretaría competente y SALUD, la solicitud de reconsideración. Sin embargo para que la Secretaría competente que negó el permiso resuelva la solicitud de reconsideración, deberá estar resuelta la presentada ante SALUD.

Dentro de los tres días hábiles siguientes al que se haya resuelto la reconsideración correspondiente SALUD enviará una copia de su resolución a la Secretaría competente que resolvió en sentido negativo la solicitud del permiso o de la autorización, a efecto de que esta última resuelva la reconsideración dentro de los cinco días hábiles siguientes.

Artículo 35. En caso de que la solicitud de permiso hubiese sido negada con base al dictamen de la SEMARNAT o en la opinión de la SAGARPA, la Secretaría competente que resolvió la solicitud de permiso deberá entregar la solicitud de reconsideración a la Secretaría que deba dictaminar u opinar, en un plazo no mayor a tres días hábiles, contado a partir de que el particular haya ingresado su solicitud de reconsideración.

Asimismo, la solicitud de reconsideración se remitirá a la Secretaría que deba dictaminar u opinar, cuando de la nueva información presentada en la reconsideración, deriven cuestiones que deban ser del conocimiento de la Secretaría que emita el dictamen u opinión.

La Secretaría que deba dictaminar u opinar tendrá un plazo no mayor a un mes, contado a partir del día siguiente a aquél en que le fue entregada la solicitud de reconsideración, para entregar su dictamen u opinión a la Secretaría competente que resolvió la solicitud de permiso.

Artículo 36. La Secretaría que resolvió negativamente la solicitud de permiso o de autorización deberá resolver la solicitud de reconsideración en un plazo no mayor a dos meses, contado a partir del día hábil siguiente a que el promovente haya entregado su solicitud de reconsideración.

Capítulo II
De la revisión de los permisos y las autorizaciones

Artículo 37. Las Secretarías competentes y SALUD podrán revisar los permisos y autorizaciones otorgados en el ámbito de su respectiva competencia, cuando se presenten cualquiera de los supuestos establecidos en los artículos 69 y 98 de la Ley.

La revisión de permisos y autorizaciones otorgados por las Secretarías se realizará conforme al siguiente procedimiento:

I. La Secretaría revisora notificará al titular del permiso o autorización el inicio del procedimiento de revisión, debiendo fundar y motivar las causas que dieron origen al procedimiento;

II. El titular del permiso o autorización contará con quince días hábiles para manifestar lo que a su derecho convenga y presentar cualquier elemento de convicción que tenga el carácter de prueba;

III. Una vez recibidas las manifestaciones y pruebas del titular del permiso o autorización, o sin ellas, la Secretaría revisora iniciará el proceso de evaluación y confrontará la información, a fin de emitir la resolución correspondiente;

IV. La resolución que recaiga a la revisión del permiso o autorización podrá:

a) Mantenerlo en los términos en que fue otorgado;

b) Modificar las condiciones bajo las cuales se otorgó;

c) Suspender sus efectos, o

d) Revocarlo, y

V. La Secretaría revisora contará con treinta días hábiles para la emisión de la resolución respectiva, la cual deberá ser hecha del conocimiento de las demás Secretarías y del titular del permiso o autorización objeto de la revisión, salvo en el caso del inciso a) de la fracción IV de este artículo, caso en el cual sólo se la debe notificar al titular del permiso o autorización.

Artículo 38. Cuando el permiso haya sido otorgado por la SAGARPA, y la SEMARNAT cuente con nueva información científica o técnica que permita establecer posibles riesgos al medio ambiente y a la diversidad biológica, esta dependencia lo hará del conocimiento de la SAGARPA para que inicie el procedimiento de revisión a que se refiere el artículo anterior.

Artículo 39.- Durante el proceso de evaluación a que se refiere la fracción III del artículo 37 del presente Reglamento, la SEMARNAT revisará su dictamen, con base en la nueva información científica o técnica y, de ser necesario, lo modificará. El dictamen que emita la SEMARNAT será vinculante para la resolución del procedimiento de revisión que realice la SAGARPA.

Artículo 40. La revisión de permisos y autorizaciones que practiquen las Secretarías competentes y SALUD en sus respectivos ámbitos de competencia y en los términos de la Ley y de este Reglamento, se realizará con independencia de las medidas de seguridad o de urgente aplicación que pudieran determinar las propias Secretarías conforme al artículo 115 de la Ley.

TÍTULO QUINTO
De la importación y exportación de los OGMs que se destinen a su liberación al ambiente

Capítulo Único

Artículo 41. Previo a la importación de OGMs que se pretendan liberar al ambiente, se deberá obtener el permiso correspondiente a la liberación que corresponda, el cual surtirá efectos de permiso de importación en los términos que establece la Ley.

Artículo 42. La notificación a que se refiere el artículo 72 de la Ley deberá realizarse por escrito, cumpliendo con los requisitos establecidos en los tratados y acuerdos internacionales de los que México sea parte, así como los que exijan las autoridades del país de destino de los OGMs.

TÍTULO SEXTO
De las comisiones internas de bioseguridad

Capítulo Único

Artículo 43. Las comisiones internas de bioseguridad a las que se refiere el artículo 74, fracción III, de la Ley, estarán integradas por un mínimo de tres personas que cuenten con experiencia y conocimiento en las actividades de utilización confinada de OGMs.

Artículo 44.- Las comisiones internas de bioseguridad serán permanentes y sus integrantes podrán ser sustituidos de acuerdo con las reglas internas que expidan para su funcionamiento y que deberán ser aprobadas por la instancia facultada de quienes realicen actividades de utilización confinada de OGMs.

Artículo 45. Las comisiones internas de bioseguridad deberán:

I. Emitir las reglas de bioseguridad, las cuales deben contener, entre otros aspectos, lo relativo a la prevención de liberaciones accidentales y la vigilancia del cumplimiento de las reglas y de las buenas prácticas;

II. Definir las buenas prácticas de la investigación científica que deben observarse;

III. Proporcionar asesoría científica y técnica a los responsables de las actividades de utilización confinada del OGM, en el ámbito de su competencia material;

IV. Emitir opinión técnica sobre los aspectos de bioseguridad de la enseñanza e investigaciones propuestas, previa revisión de las instalaciones y de los materiales a utilizar para el manejo seguro del OGM y métodos involucrados;

V. Garantizar la seguridad de las instalaciones en las que se realicen las actividades de utilización confinada, así como la seguridad en el manejo del OGM, y

VI. Garantizar la integridad física y biológica del personal expuesto y de las personas que realicen la utilización confinada.

TÍTULO SÉPTIMO
De los comités técnicos científicos

Capítulo Único

Artículo 46. Los comités técnicos científicos que podrán apoyar a las Secretarías respecto de las solicitudes de permisos y autorizaciones, así como respecto de los avisos, se integrarán por personas con conocimiento científico o tecnológico que cuenten con experiencia en materia de evaluación, control y gestión de riesgos de OGMs, ya sea a la salud humana, al medio ambiente y la diversidad biológica o a

la sanidad animal, vegetal y acuícola, o en biotecnología moderna aplicada a la investigación, creación y desarrollo de este tipo de organismos.

La designación de los integrantes corresponde al Titular de la Secretaría a la cual proporcionen el apoyo, o al servidor público en que éste delegue la facultad.

Artículo 47. Los comités a que se refiere el artículo anterior emitirán sus reglas de operación, previa validación de las Secretarías correspondientes.

Artículo 48. Los comités técnicos científicos deberán conducirse con estricto apego a los principios de objetividad, imparcialidad y legalidad en la emisión de las opiniones y dictámenes que les sean solicitados, observando las disposiciones sobre protección de información confidencial contenidas en los ordenamientos jurídicos respectivos.

TÍTULO OCTAVO
De las zonas restringidas

Capítulo Único
De los centros de origen y de diversidad genética

Artículo 49. Los acuerdos mediante los cuales se determinen los centros de origen y de diversidad genética a que se refiere el artículo 86 de la Ley deberán contener:

I. Listado de especies, incluyendo nombre científico y común;

II. Clasificación taxonómica;

III. Las poligonales del área o áreas geográficas en coordenadas UTM, y

IV. Las medidas necesarias para la protección de dichas especies.

Los acuerdos serán promovidos indistintamente por la SEMARNAT o la SAGARPA, y expedidos conjuntamente por ambas Secretarías.

TÍTULO NOVENO
De la Información sobre Bioseguridad

Capítulo I
Del Sistema Nacional de Información sobre Bioseguridad

Artículo 50. El Sistema Nacional de Información sobre Bioseguridad estará a cargo de la Secretaría Ejecutiva. La información que integre el Sistema estará disponible en portal de Internet de la CIBIOGEM y deberá ser actualizado permanentemente.

Artículo 51. El Sistema Nacional de Información sobre Bioseguridad contendrá:

I. La información del Registro de conformidad con lo dispuesto por el artículo 56 del presente Reglamento;

II. Las estadísticas nacionales en materia de bioseguridad y OGM;

III. Las zonas restringidas y el municipio o municipios donde se ubica, distinguiendo:

a) Centros de origen y de diversidad genética por especie; en coordenadas UTM;

b) Áreas naturales protegidas de competencia federal, en las coordenadas establecidas en sus instrumentos de creación;

c) Áreas naturales protegidas de competencia local, en las coordenadas establecidas en sus instrumentos de creación, en caso de que las autoridades locales deseen que estas áreas se encuentren en el Sistema Nacional de Información sobre Bioseguridad, y

d) Zonas libres de OGMs, en coordenadas UTM.

IV. Informes y documentos relevantes que resulten de las actividades científicas, académicas, trabajos técnicos o de cualquier otra índole en materia de bioseguridad incluyendo la inocuidad de OGMs, realizados por personas físicas o morales, nacionales o extranjeras;

V. La información sobre los formatos de los avisos a los que se refiere el artículo 78 de la Ley y las comunicaciones a que alude el artículo 59 de este Reglamento, las medidas tomadas por los permisionarios o por quienes realizan actividades de utilización confinada y las medidas tomadas por la autoridad, para atender las liberaciones accidentales o cualquier modificación en la liberación que pueda incrementar los posibles riesgos para el medio ambiente y la diversidad biológica al realizar actividades de liberación experimental o de liberación en programa piloto;

VI. La información relativa a las solicitudes de permiso, para efectos de lo previsto en el artículo 33 de la Ley, y

VII.- El informe anual a que se refiere el artículo 53 del Reglamento.

Artículo 52. La Secretaría Ejecutiva establecerá el sistema informático para recibir la información a que se refiere el artículo anterior, a efecto de incorporarla al Sistema Nacional de Información sobre Bioseguridad.

Serán responsables de incorporar a dicho sistema informático, en los plazos para ello establecidos, los que a continuación se indican:

I. Las Secretarías, de conformidad con lo dispuesto en el artículo 57 de este Reglamento, para efectos de la información prevista en la fracción I del artículo anterior;

II. La Secretaría competente que haya promovido el Acuerdo para la determinación de un centro de origen y de diversidad genética, para efectos de la información prevista en la fracción III, inciso a), del artículo anterior, y deberá hacerlo dentro de los cinco días hábiles siguientes a que se hayan publicado los Acuerdos;

III. La SEMARNAT, para efectos de la información prevista en la fracción III, inciso b), del artículo anterior, y deberá hacerlo dentro de los cinco días hábiles siguientes a que se haya creado un área natural protegida de carácter federal;

IV. La SAGARPA, para efectos de la información referente al inciso d) de la fracción III del artículo anterior, dentro de los cinco días hábiles siguientes a que se haya creado una zona libre de OGMs;

V. Las dependencias y entidades de la administración pública federal y los institutos de investigación nacionales y las personas que desarrollen biotecnología, que generen documentos relevantes sobre biotecnología,

VI. La Secretaría competente que admita una solicitud de permiso, para efectos de la fracción VI del artículo anterior, y

VII. La Secretaría competente que reciba una comunicación en términos del artículo 59 de este Reglamento, dentro de los cinco días hábiles siguientes a que se hayan decidido las medidas que adoptará la Secretaría competente.

Para efectos de la fracción II del artículo anterior, el Secretario Ejecutivo solicitará a las Secretarías y a los órganos de consulta y opinión de la CIBIOGEM la información necesaria para integrar las estadísticas.

Las Secretarías y los órganos de consulta y opinión de la CIBIOGEM deberán responder esas solicitudes ingresando en el sistema de información a que se refiere este artículo, los datos y documentos que le requiera la Secretaría Ejecutiva.

Capítulo II
Del seguimiento a la información sobre bioseguridad

Artículo 53. La CIBIOGEM elaborará y publicará en su portal de Internet un informe anual de la situación general existente en el país en materia de bioseguridad, considerando al menos las estadísticas derivadas de la información comprendida en el Registro sobre solicitudes, permisos, autorizaciones y avisos, así como aquella información sobre las acciones implementadas en cumplimiento del Protocolo de Cartagena.

Artículo 54. La consulta y participación de los pueblos y comunidades indígenas asentadas en las zonas donde se pretenda la liberación de los OGMs se realizará de conformidad con los mecanismos que para el efecto determine la CIBIOGEM.

Capítulo III
Del Registro

Artículo 55. El Registro es parte del Sistema Nacional de Información sobre Bioseguridad, tendrá carácter público y estará a cargo de la Secretaría Ejecutiva. Su objeto es la inscripción de información relativa a las actividades con OGMs, así como de los propios organismos sujetos a las disposiciones de la Ley y el presente Reglamento.

Artículo 56. Serán objeto de inscripción en el Registro:

I. Solicitudes de permisos y autorizaciones;

II. Resoluciones de permisos y autorizaciones, distinguiendo cuáles OGM son importados; así como las resoluciones a las que se refiere el artículo 37, fracción IV, de este Reglamento;

III. Suspensiones y revocaciones;

IV. Avisos de utilización confinada;

V. Requisitos y medidas adicionales para los avisos señalados en el artículo 84 de la Ley;

VI. Las comunicaciones a las que se refiere el artículo 59 de este Reglamento, y

VII. Los demás que establezcan las disposiciones aplicables.

TÍTULO DÉCIMO
De las Listas de OGMs

Capítulo Único

Artículo 57. Las listas de OGMs a que se refieren los artículos 103 y 104 de la Ley serán expedidas por las Secretarías competentes y SALUD, a través de un aviso que se publicará en el Diario Oficial de la Federación. Las listas a que se refieren las fracciones I y II del artículo 103 de la Ley, deberán publicarse de manera conjunta entre la SEMARNAT, SALUD y la SAGARPA.

Las listas a las que se refiere este artículo deberán ser publicadas dentro los primeros diez días hábiles del mes de febrero de cada año en el Diario Oficial de la Federación.

Una vez publicadas las listas sólo podrán ser modificadas por alguna de las causas a que se refiere el artículo 58 de este Reglamento, mediante aviso que será publicado en el Diario Oficial de la Federación dentro de los diez días hábiles siguientes a que verifique la causa de modificación respectiva.

En la publicación anual de las listas deberá observarse un enfoque sistémico que incluya todos los OGMs que hayan sido objeto de las listas anteriores, en los términos establecidos en los artículos 103 y 104 de la Ley.

Artículo 58. Son causas de modificación de las listas a que se refiere el artículo anterior:

I. La resolución de una autorización o permiso;

II. Cambio de la situación jurídica en que se encuentren los OGMs, a que se refieren las fracciones I y II del artículo 103 de la Ley, y

III. Los cambios de los casos a que se refiere el artículo 104, fracción II y último párrafo, de la Ley.

TÍTULO DÉCIMO PRIMERO
De la inspección, vigilancia, medidas de seguridad o de urgente aplicación y de las infracciones y sanciones

Capítulo Único

Artículo 59. En caso de la liberación accidental, los permisionarios o quienes realicen actividades de utilización confinada deberán comunicar dicha situación a la Secretaría que expidió el permiso o a la cual se presentó el aviso, dentro de las veinticuatro horas siguientes a que se tenga conocimiento de la misma. Las Secretarías competentes establecerán en el permiso el medio a través del cual el permisionario deberá realizar esta comunicación, y en los formatos de los avisos a que se refiere el artículo 72 de la Ley.

Inmediatamente después de tomar conocimiento de la liberación accidental, la Secretaría que expidió el permiso o recibió el aviso deberá informar a las otras Secretarías sobre el accidente ocurrido y los riesgos o afectaciones que pudieran producirse o se hayan producido a la salud humana, al medio ambiente, la diversidad biológica o la sanidad animal, vegetal o acuícola. Estas dependencias podrán

imponer en su ámbito de competencia las medidas de seguridad o de urgente aplicación que consideren necesarias para contender con dicha situación.

Adicionalmente a la comunicación señalada en el primer párrafo de este artículo, dentro de los tres días hábiles siguientes a que haya tenido conocimiento de la situación descrita en el párrafo anterior, el permisionario o quien realice actividades de utilización confinada deberá presentar un aviso por escrito a la Secretaría que le expidió el permiso o recibió el permiso, que contendrá:

I. Datos de identificación del permiso o del aviso;

II. El polígono donde ocurrió la liberación accidental, ubicado en coordenadas UTM;

III. Circunstancias y fecha estimada de la liberación accidental;

IV. Cantidades estimadas del OGM que fue liberado accidentalmente;

V. Información de que disponga el permisionario o quien realice actividades de utilización confinada sobre los posibles efectos adversos para la diversidad biológica y la salud humana;

VI. Medidas de atención y control de riesgo que aplicó y aplicará el permisionario o quien realice actividades de utilización confinada, y

VII. Nombre y teléfono de la persona que fungirá como punto de contacto.

Artículo 60. Las Secretarías, en su ámbito de competencia, podrán ordenar alguna o algunas de las medidas de seguridad o de urgente aplicación previstas en el artículo 115 de la Ley. Una vez recibida el acta de inspección por la autoridad ordenadora de los actos de inspección y vigilancia, mediante notificación personal o por correo certificado con acuse de recibo, requerirá al interesado que ejecute, por su cuenta y costo, las medidas de seguridad o de urgente aplicación que procedan, señalando los plazos para su cumplimiento.

Artículo 61. Cuando se imponga como medida de seguridad la repatriación, el interesado deberá cubrir los costos de la misma, pudiendo trasladar los gastos en que incurrió en contra del responsable de la infracción.

Artículo 62. Si como resultado de una visita de inspección y vigilancia, se ordena la imposición de medidas de seguridad o de urgente aplicación, el inspeccionado deberá notificar a la Secretaría competente el cumplimiento de cada una, en un término de cinco días hábiles contados a partir de la fecha de vencimiento del plazo concedido para la ejecución de cada una de ellas.

Artículo 63. Cuando la Secretaría competente emplace al presunto infractor y éste comparezca mediante escrito aceptando las irregularidades circunstanciadas en el acta de inspección, la Secretaría procederá, dentro de los veinte días hábiles siguientes, a dictar la resolución respectiva.

Artículo 64. La resolución administrativa que se dicte, señalará, además de las infracciones y sanciones, las medidas que deberán llevarse a cabo para corregir las deficiencias o irregularidades observadas durante la inspección y el plazo otorgado para cumplirlas, en los términos de la Ley.

TÍTULO DÉCIMO SEGUNDO
Del Régimen de protección especial del maíz

Capítulo Único

Artículo 65. Las actividades relacionadas con el maíz genéticamente modificado se sujetarán al presente Título, a las demás disposiciones generales aplicables a los OGM, así como a lo previsto en otros instrumentos que establezca la autoridad.

Artículo reformado DOF 06-03-2009

Artículo 66. Los particulares, al realizar las solicitudes de permiso de liberación experimental de maíz genéticamente modificado, adicionalmente a lo establecido en el artículo 16 del presente Reglamento, deberán proporcionar lo siguiente:

I. Los materiales de referencia que permitan la detección, identificación y cuantificación del maíz genéticamente modificado que pretenda liberarse, y

II. La información que les requieran las autoridades para determinar la procedencia de etapas de liberación subsecuentes.

Artículo adicionado DOF 06-03-2009

Artículo 67. No se permitirá la experimentación ni la liberación al ambiente de maíz genéticamente modificado que contenga características que impidan o limiten su uso o consumo humano o animal, o bien su uso en procesamiento de alimentos para consumo humano.

Artículo adicionado DOF 06-03-2009

Artículo 68. La SAGARPA, previo al otorgamiento del permiso de liberación experimental, deberá verificar que para el organismo que se pretende liberar no exista una variedad convencional alternativa. En caso afirmativo, la SAGARPA llevará a cabo el análisis comparativo entre las diferentes opciones tecnológicas. El resultado de este análisis deberá ser elemento adicional al estudio de evaluación del riesgo para resolver la solicitud de permiso.

Artículo adicionado DOF 06-03-2009

Artículo 69. En aquellos casos en que se considere que el desarrollo tecnológico propuesto por los particulares, mediante una solicitud de permiso de liberación, sea contrario al artículo 2 de la Ley Federal de Competencia Económica o que pudiera facilitar la realización de las prácticas prohibidas por los artículos 8, 9 y 10 del mismo ordenamiento legal, se deberá informar dicho suceso, de manera puntual y oportuna, a la Comisión Federal de Competencia, para los efectos legales a que haya lugar.

Artículo adicionado DOF 06-03-2009

Artículo 70. La SAGARPA y la SEMARNAT deberán promover la conservación *in situ* de razas y variedades de maíces criollos y sus parientes silvestres a través de los programas de subsidio u otros mecanismos de fomento para la conservación de la biodiversidad, sin que ello implique autorización alguna para el cambio del uso de suelo de forestal a agrícola.

Las dependencias señaladas en el párrafo anterior deberán fomentar el uso de semillas de maíces criollos en proyectos estratégicos que destinen su producción a mercados específicos y a la atención de oportunidades comerciales.

Artículo adicionado DOF 06-03-2009

Artículo 71. Las autoridades competentes en materia de bioseguridad promoverán el desarrollo de laboratorios para la detección, identificación y cuantificación de maíz genéticamente modificado.

Artículo adicionado DOF 06-03-2009

Artículo 72. En los casos en que las autoridades determinen la presencia no permitida de material genéticamente modificado en razas, variedades y parientes silvestres de maíz, deberán establecer medidas para eliminar, controlar o mitigar dicha presencia. Para el caso de las razas y variedades, la atribución corresponderá a la SAGARPA, y para el caso de los parientes silvestres, a la SEMARNAT.

Artículo adicionado DOF 06-03-2009

Artículo 73. Las actividades relacionadas con la protección especial del maíz contarán con un apartado específico en el Sistema Nacional de Información sobre Bioseguridad.

Artículo adicionado DOF 06-03-2009

TRANSITORIOS

PRIMERO. El presente Reglamento entrará en vigor al día siguiente de su publicación en el Diario Oficial de la Federación.

SEGUNDO. Las personas que actualmente realicen actividades de utilización confinada de OGMs con fines de enseñanza y de investigación científica y tecnológica, deberán conformar sus respectivas comisiones internas de bioseguridad dentro de los treinta días posteriores a la entrada en vigor de este Reglamento.

TERCERO. Los titulares de SALUD, la SEMARNAT y la SAGARPA, publicarán en el Diario Oficial de la Federación los acuerdos respectivos mediante los cuales se informa al público en general que las solicitudes de permiso y autorización, así como los avisos en materia de bioseguridad, se recibirán a través de las páginas electrónicas habilitadas para tal efecto. Dicha publicación deberá realizarse en un plazo no mayor a doce meses contados a partir de la entrada en vigor del presente Reglamento.

CUARTO. Para dar cabal cumplimiento a lo dispuesto en el artículo 51, fracción III, inciso b) y 52, fracción III, de este Reglamento, la SEMARNAT deberá incorporar en el sistema informático que determine la Secretaría Ejecutiva, la información referente a las áreas naturales protegidas creadas hasta el día en que entre en vigor el presente Reglamento. Para tal efecto, contará con un plazo de tres meses contados a partir del día siguiente al que entre en vigor este Reglamento.

QUINTO. Las solicitudes de permisos presentadas con antelación a la entrada en vigor del presente Reglamento y aquéllas que se presenten en tanto no se emitan los acuerdos a que se refiere el artículo 86 de la Ley, deberán ser resueltas por la Secretaría competente previa consulta con las instituciones señaladas en el citado artículo.

Artículo reformado DOF 06-03-2009

SEXTO. En tanto se expidan los Acuerdos a que se refiere el artículo 78 de la Ley, los formatos oficiales deberán contener lo siguiente:

I. Nombre, denominación o razón social de quien promueve, y documento que acredite su personalidad jurídica. Cuando exista más de un responsable de la comisión interna de bioseguridad, deberán asentarse los nombres de todos los responsables;

II. Nombre del representante legal, en su caso;

III. Domicilio para oír y recibir notificaciones;

IV. Dirección de correo electrónico para recibir notificaciones, en caso de que el promovente desee ser notificado por este medio;

V. Lugar donde se llevará a cabo la utilización confinada, en coordenadas UTM, así como la descripción de las instalaciones del confinamiento y de las medidas de bioseguridad;

VI. El objetivo y propósito de la utilización confinada;

VII. Datos del OGM incluyendo el nombre científico, común y comercial, y

VIII. El medio a través del cual deberá de realizarse la comunicación a que se refiere el artículo 59 de este Reglamento.

IX. El registro de personas acreditadas, si cuenta con él. En este caso, no deberá presentar la información a que se refieren las fracciones I a IV.

El aviso deberá ser presentado en los casos establecidos en los artículos 79 y 80 de la Ley.

SÉPTIMO. Las acciones derivadas del presente Reglamento se ejecutarán con cargo al presupuesto aprobado para las Dependencias y Entidades responsables de su aplicación.

OCTAVO. Derogado.

Artículo derogado DOF 06-03-2009

NOVENO. Los integrantes de la CIBIOGEM establecerán, dentro del año siguiente a la entrada en vigor de este Reglamento, políticas públicas para la protección, utilización, desarrollo y aprovechamiento sustentable de especies de las que México sea centro de origen y de diversidad genética.

DÉCIMO. Se derogan todas las disposiciones que se opongan al presente Reglamento.

Dado en la Residencia del Poder Ejecutivo Federal, en la Ciudad de México, Distrito Federal, a los catorce días del mes de marzo de dos mil ocho.- **Felipe de Jesús Calderón Hinojosa**.- Rúbrica.- El Secretario de Medio Ambiente y Recursos Naturales, **Juan Rafael Elvira Quesada**.- Rúbrica.- El Secretario de Economía, **Eduardo Sojo Garza Aldape**.- Rúbrica.- El Secretario de Agricultura, Ganadería, Desarrollo Rural, Pesca y Alimentación, **Alberto Cárdenas Jiménez**.- Rúbrica.- La Secretaria de Educación Pública, **Josefina Eugenia Vázquez Mota**.- Rúbrica.- El Secretario de Salud, **José Ángel Córdova Villalobos**.- Rúbrica.

ARTÍCULOS TRANSITORIOS DE DECRETOS DE REFORMA

DECRETO por el que se reforman, adicionan y derogan diversas disposiciones del Reglamento de la Ley de Bioseguridad de Organismos Genéticamente Modificados.

Publicado en el Diario Oficial de la Federación el 6 de marzo de 2009

ARTÍCULO PRIMERO.- Se **REFORMA** el artículo 65 y se **ADICIONAN** los artículos 66, 67, 68, 69, 70, 71, 72 y 73 del Reglamento de la Ley de Bioseguridad de Organismos Genéticamente Modificados, para quedar como sigue:

…….

ARTÍCULO SEGUNDO.- Se **REFORMA** el artículo quinto transitorio y se **DEROGA** el artículo octavo transitorio del Reglamento de la Ley de Bioseguridad de Organismos Genéticamente Modificados, para quedar como sigue:

…….

TRANSITORIOS

ÚNICO.- El presente Decreto entrará en vigor el día siguiente al de su publicación en el Diario Oficial de la Federación.

Dado en la Residencia del Poder Ejecutivo Federal, en la Ciudad de México, Distrito Federal, a cinco de marzo de dos mil nueve.- **Felipe de Jesús Calderón Hinojosa**.- Rúbrica.- El Secretario de Medio Ambiente y Recursos Naturales, **Juan Rafael Elvira Quesada**.- Rúbrica.- El Secretario de Economía, **Gerardo Ruiz Mateos**.- Rúbrica.- El Secretario de Agricultura, Ganadería, Desarrollo Rural, Pesca y Alimentación, **Alberto Cárdenas Jiménez**.- Rúbrica.- La Secretaria de Educación Pública, **Josefina Eugenia Vázquez Mota**.- Rúbrica.- El Secretario de Salud, **José Ángel Córdova Villalobos**.- Rúbrica.

LEY FEDERAL DE PROTECCIÓN DE DATOS PERSONALES EN POSESIÓN DE LOS PARTICULARES

Nueva Ley publicada en el Diario Oficial de la Federación el 20 de marzo de 2025

TEXTO VIGENTE
Última reforma publicada DOF 14-11-2025

Al margen un sello con el Escudo Nacional, que dice: Estados Unidos Mexicanos.- Presidencia de la República.

CLAUDIA SHEINBAUM PARDO, Presidenta de los Estados Unidos Mexicanos, a sus habitantes sabed:

Que el Honorable Congreso de la Unión, se ha servido dirigirme el siguiente

DECRETO

"EL CONGRESO GENERAL DE LOS ESTADOS UNIDOS MEXICANOS, DECRETA:

SE EXPIDEN LA LEY GENERAL DE TRANSPARENCIA Y ACCESO A LA INFORMACIÓN PÚBLICA; LA LEY GENERAL DE PROTECCIÓN DE DATOS PERSONALES EN POSESIÓN DE SUJETOS OBLIGADOS; LA LEY FEDERAL DE PROTECCIÓN DE DATOS PERSONALES EN POSESIÓN DE LOS PARTICULARES; Y SE REFORMA EL ARTÍCULO 37, FRACCIÓN XV, DE LA LEY ORGÁNICA DE LA ADMINISTRACIÓN PÚBLICA FEDERAL

Artículo Primero y Artículo Segundo.- ……..

Artículo Tercero.- Se **expide** la Ley Federal de Protección de Datos Personales en Posesión de los Particulares, para quedar como sigue:

LEY FEDERAL DE PROTECCIÓN DE DATOS PERSONALES EN POSESIÓN DE LOS PARTICULARES

Capítulo I
Disposiciones Generales

Artículo 1. La presente Ley es de orden público y de observancia general en todo el territorio nacional y tiene por objeto la protección de los datos personales en posesión de los particulares, con la finalidad de regular su tratamiento legítimo, controlado e informado, a efecto de garantizar la privacidad y el derecho a la autodeterminación informativa de las personas.

Quedan exceptuados de la aplicación de la presente Ley:

I. Las sociedades de información crediticia en los supuestos de la Ley para Regular las Sociedades de Información Crediticia y demás disposiciones aplicables, y

II. Las personas que lleven a cabo la recolección y almacenamiento de datos personales, que sea para uso exclusivamente personal, y sin fines de divulgación o utilización comercial.

Artículo 2. Para los efectos de esta Ley, se entenderá por:

I. **Aviso de Privacidad:** Documento a disposición de la persona titular de la información de forma física, electrónica o en cualquier otro formato generado por el responsable, a partir del momento en el cual se recaben sus datos personales, con el objeto de informarle los propósitos del tratamiento de los mismos, de conformidad con el artículo 14 de la presente Ley;

II. **Bases de datos:** Conjunto ordenado de datos personales referentes a una persona identificada o identificable condicionados a criterios determinados, con independencia de la forma o modalidad de su creación, tipo de soporte, procesamiento, almacenamiento y organización;

III. **Bloqueo:** Identificación y conservación de datos personales una vez cumplida la finalidad para la cual fueron recabados, con el único propósito de determinar posibles responsabilidades en relación con su tratamiento, hasta el plazo de prescripción legal o contractual de éstas. Durante dicho periodo, los datos personales no podrán ser objeto de tratamiento y, transcurrido este, se procederá a su cancelación en la base de datos que corresponda;

IV. **Consentimiento:** Manifestación de la voluntad libre, específica e informada de la persona titular de los datos mediante la cual se efectúa el tratamiento de los mismos;

V. **Datos personales:** Cualquier información concerniente a una persona identificada o identificable. Se considera que una persona es identificable cuando su identidad pueda determinarse directa o indirectamente a través de cualquier información;

VI. **Datos personales sensibles:** Aquellos datos personales que afecten a la esfera más íntima de la persona titular, o cuya utilización indebida pueda dar origen a discriminación o conlleve un riesgo grave para esta. De manera enunciativa más no limitativa se consideran sensibles los datos personales que puedan revelar aspectos como origen racial o étnico, estado de salud presente o futuro, información genética, creencias religiosas, filosóficas y morales, opiniones políticas y preferencia sexual;

VII. **Derechos ARCO:** Derechos de acceso, rectificación, cancelación y oposición al tratamiento de datos personales;

VIII. **Días:** Días hábiles;

IX. **Disociación:** Procedimiento mediante el cual los datos personales no pueden asociarse a la persona titular ni permitir, por su estructura, contenido o grado de desagregación, la identificación de la misma;

X. **Fuente de acceso público:** Aquellas bases de datos, sistemas o archivos que por disposición de ley puedan ser consultadas públicamente cuando no exista impedimento por una norma limitativa, y sin más exigencia que, en su caso, el pago de una contraprestación, tarifa o contribución. No se considerará fuente de acceso público cuando la información contenida en la misma sea obtenida o tenga una procedencia ilícita, conforme a las disposiciones establecidas por la presente Ley y demás disposiciones jurídicas aplicables;

XI. **Ley:** Ley Federal de Protección de Datos Personales en Posesión de los Particulares;

XII. **Persona encargada:** Persona física o jurídica que sola o conjuntamente con otras trate datos personales por cuenta del responsable;

XIII. **Reglamento:** Reglamento de la Ley Federal de Protección de Datos Personales en Posesión de los Particulares;

XIV. **Responsable:** Sujetos regulados a que se refiere la fracción XVI de este artículo;

XV. **Secretaría:** Secretaría Anticorrupción y Buen Gobierno;

XVI. **Sujetos regulados:** Personas físicas o morales de carácter privado que llevan a cabo el tratamiento de datos personales;

XVII. **Tercero:** Persona física o moral, nacional o extranjera, distinta de la persona titular o del responsable de los datos;

XVIII. **Titular:** Persona a quien corresponden los datos personales;

XIX. **Tratamiento:** Cualquier operación o conjunto de operaciones efectuadas mediante procedimientos manuales o automatizados aplicados a los datos personales, relacionadas con la obtención, uso, registro, organización, conservación, elaboración, utilización, comunicación, difusión, almacenamiento, posesión, acceso, manejo, aprovechamiento, divulgación, transferencia o disposición de datos personales, y

XX. **Transferencia:** Toda comunicación de datos personales dentro o fuera del territorio mexicano, realizada a persona distinta de la titular, del responsable o de la persona encargada del tratamiento.

Artículo 3. Los principios y derechos previstos en esta Ley, tendrán como límite en cuanto a su observancia y ejercicio, la protección de la seguridad nacional, el orden, la seguridad y la salud públicos, así como los derechos de terceros.

Artículo 4.- A falta de disposición expresa en esta Ley, se aplicarán de manera supletoria las disposiciones del Código Nacional de Procedimientos Civiles y Familiares y de la Ley Federal de Procedimiento Administrativo.

Párrafo reformado DOF 14-11-2025

Para la substanciación de los procedimientos de protección de derechos, de verificación e imposición de sanciones se observarán las disposiciones contenidas en la Ley Federal de Procedimiento Administrativo.

Capítulo II
De los Principios de Protección de Datos Personales

Artículo 5. El responsable deberá observar los principios de licitud, finalidad, lealtad, consentimiento, calidad, proporcionalidad, información y responsabilidad en el tratamiento de datos personales.

Artículo 6. Los datos personales deberán recabarse y tratarse de manera lícita conforme a lo previsto por esta Ley y demás disposiciones jurídicas aplicables.

El responsable no deberá obtener y tratar datos personales a través de medios engañosos o fraudulentos, y deberá privilegiar la protección de los intereses de la persona titular y la expectativa razonable de privacidad, entendida como la confianza que deposita cualquier persona en otra, respecto

de que los datos personales proporcionados serán tratados conforme a lo que acordaron en los términos establecidos por esta Ley.

Artículo 7. Todo tratamiento de datos personales estará sujeto al consentimiento de la persona titular, salvo las excepciones previstas por la presente Ley.

El consentimiento podrá manifestarse de forma expresa o tácita. Se deberá entender que el consentimiento es expreso cuando la voluntad de la persona titular se manifieste verbalmente, por escrito, por medios electrónicos, ópticos, signos inequívocos o por cualquier otra tecnología.

El consentimiento será tácito cuando habiéndose puesto a disposición de la persona titular el aviso de privacidad, esta no manifieste su voluntad en sentido contrario.

Por regla general será válido el consentimiento tácito, salvo que las disposiciones jurídicas aplicables exijan que la voluntad de la persona titular se manifieste expresamente.

Los datos financieros o patrimoniales requerirán el consentimiento expreso de la persona titular, salvo las excepciones a que se refieren los artículos 9 y 36 de la presente Ley.

El consentimiento podrá ser revocado en cualquier momento sin que se le atribuyan efectos retroactivos. Para revocar el consentimiento, el responsable deberá, en el aviso de privacidad, establecer los mecanismos y procedimientos para ello.

Artículo 8. Tratándose de datos personales sensibles, el responsable deberá obtener el consentimiento expreso y por escrito de la persona titular para su tratamiento, a través de su firma autógrafa, firma electrónica, o cualquier mecanismo de autenticación que al efecto se establezca.

No podrán crearse bases de datos que contengan datos personales sensibles, sin que se justifique la creación de las mismas para finalidades legítimas, concretas y acordes con las actividades o fines explícitos que persigue el sujeto regulado.

Artículo 9. El responsable no estará obligado a recabar el consentimiento de la persona titular para el tratamiento de los datos personales cuando:

I. Una disposición jurídica así lo disponga;

II. Los datos personales figuren en fuentes de acceso público;

III. Los datos personales se sometan a un procedimiento previo de disociación;

IV. Los datos personales se requieran para ejercer un derecho o cumplir obligaciones derivadas de una relación jurídica entre la persona titular y el responsable;

V. Exista una situación de emergencia que potencialmente pueda dañar a un individuo en su persona o en sus bienes;

VI. Los datos personales sean indispensables para efectuar un tratamiento para atención médica, la prevención, diagnóstico, la prestación de asistencia sanitaria, o la gestión de servicios sanitarios, mientras la persona titular no esté en condiciones de otorgar el consentimiento, en los términos que establece la Ley General de Salud y demás disposiciones jurídicas aplicables y que dicho tratamiento de datos se realice por una persona sujeta al secreto profesional u obligación equivalente, o

VII. Exista una orden judicial, resolución o mandato fundado y motivado de autoridad competente.

Artículo 10. El responsable procurará que los datos personales contenidos en las bases de datos sean exactos, completos, correctos y actualizados para los fines para los cuales fueron recabados.

Cuando los datos personales hayan dejado de ser necesarios para el cumplimiento de las finalidades previstas en el aviso de privacidad y que motivaron su tratamiento conforme a las disposiciones legales aplicables, deberán ser suprimidos previo bloqueo, en su caso, y una vez que concluya el plazo de conservación de los mismos.

El responsable estará obligado a eliminar los datos relativos al incumplimiento de obligaciones contractuales, una vez que transcurra un plazo de setenta y dos meses, contado a partir de la fecha calendario en que se presente el mencionado incumplimiento.

Artículo 11. El tratamiento de datos personales deberá limitarse al cumplimiento de las finalidades previstas en el aviso de privacidad, sin embargo, si el responsable pretende tratar los datos para una finalidad distinta a las establecidas en el aviso de privacidad, se requerirá obtener nuevamente el consentimiento de la persona titular.

Artículo 12. El tratamiento de datos personales será el que resulte necesario, adecuado y relevante en relación con las finalidades previstas en el aviso de privacidad, para los datos personales sensibles, el responsable deberá realizar esfuerzos razonables para limitar el periodo de tratamiento de los mismos a efecto de que sea el mínimo indispensable.

Artículo 13. El responsable velará por el cumplimiento de los principios de protección de datos personales establecidos por esta Ley, debiendo adoptar las medidas necesarias y suficientes para su aplicación, así como para garantizar que el aviso de privacidad dado a conocer a la persona titular, sea respetado en todo momento por él o por terceros con los que guarde alguna relación jurídica.

Artículo 14. El responsable tendrá la obligación de informar a la persona titular, a través del aviso de privacidad, la existencia y características principales del tratamiento al que serán sometidos sus datos personales, a fin de que pueda tomar decisiones informadas al respecto.

Artículo 15. El aviso de privacidad deberá contener, al menos, la siguiente información:

I. La identidad y domicilio del responsable;

II. Los datos personales que serán sometidos a tratamiento, identificando aquéllos que son sensibles;

III. Las finalidades del tratamiento de datos personales, distinguiendo aquéllas que requieren el consentimiento de la persona titular;

IV. Las opciones y medios que el responsable ofrezca a las personas titulares para limitar el uso o divulgación de los datos;

V. Los mecanismos, medios y procedimientos para ejercer los derechos ARCO, de conformidad con lo dispuesto en esta Ley, y

VI. El procedimiento y medio por el cual el responsable comunicará a las personas titulares de cambios al aviso de privacidad, de conformidad con lo previsto en esta Ley.

Artículo 16. El responsable debe poner a disposición de las personas titulares el aviso de privacidad, a través de formatos impresos, digitales, visuales, sonoros o cualquier otra tecnología de la siguiente manera:

I. Cuando los datos personales sean obtenidos personalmente a través de formatos impresos, deberá ser dado a conocer en ese momento, salvo que se hubiera facilitado el aviso con anterioridad, y

II. Cuando los datos personales sean obtenidos por cualquier medio electrónico, óptico, sonoro, visual, o a través de cualquier otra tecnología, deberá ser proporcionado en su modalidad simplificada la que deberá contener al menos la información a que se refieren las fracciones I a IV del artículo anterior, y señalar el sitio donde se podrá consultar el aviso de privacidad integral.

Artículo 17. Cuando los datos no hayan sido obtenidos directamente de la persona titular, el responsable deberá darle a conocer el cambio en el aviso de privacidad.

No resulta aplicable lo establecido en el párrafo anterior, cuando el tratamiento sea con fines históricos, estadísticos o científicos.

Cuando resulte imposible dar a conocer el aviso de privacidad a la persona titular de manera directa o ello exija esfuerzos desproporcionados, el responsable podrá instrumentar medidas compensatorias en términos del Reglamento de esta Ley.

Artículo 18. Todo responsable deberá establecer y mantener medidas de seguridad administrativas, técnicas y físicas que permitan proteger los datos personales contra daño, pérdida, alteración, destrucción o el uso, acceso o tratamiento no autorizado.

Los responsables no adoptarán medidas de seguridad menores a aquellas que mantengan para el manejo de su información. Asimismo, se tomará en cuenta el riesgo existente, las posibles consecuencias para las personas titulares, la sensibilidad de los datos y el desarrollo tecnológico.

Artículo 19. Las vulneraciones de seguridad ocurridas en cualquier fase del tratamiento de datos personales que afecten de forma significativa los derechos patrimoniales o morales de las personas titulares le serán informadas de forma inmediata por el responsable, a fin de que pueda tomar las medidas correspondientes a la defensa de sus derechos.

Artículo 20. El responsable o tercero deberá establecer controles o mecanismos que tengan por objeto que todas aquellas personas que intervengan en cualquier fase del tratamiento de datos personales, guarden confidencialidad respecto de estos, obligación que subsistirá aun después de finalizar sus relaciones con el mismo.

Capítulo III
De los Derechos de las Personas Titulares de Datos Personales

Artículo 21. Cualquier persona titular o, en su caso, su representante legal, podrá ejercer los derechos ARCO previstos en la presente Ley.

El ejercicio de cualquiera de los derechos ARCO no es requisito previo ni impide el ejercicio de otro.

Los datos personales deben ser resguardados de tal manera que permitan el ejercicio sin dilación de estos derechos.

Artículo 22. La persona titular tendrá derecho a acceder a sus datos personales que obren en posesión del responsable, así como conocer la información relacionada con las condiciones y generalidades de su tratamiento, a través del aviso de privacidad.

Artículo 23. La persona titular tendrá derecho a solicitar la rectificación o corrección de sus datos personales, cuando resulten ser inexactos, incompletos o no se encuentren actualizados.

Artículo 24. La persona titular tendrá en todo momento el derecho a solicitar la cancelación de sus datos personales de los archivos, registros, expedientes y sistemas del responsable, a fin de que los mismos ya no estén en posesión del responsable.

La cancelación de datos personales dará lugar a un periodo de bloqueo tras el cual se procederá a la supresión del dato, el responsable podrá conservarlos exclusivamente para efectos de las responsabilidades nacidas del tratamiento.

El periodo de bloqueo será equivalente al plazo de prescripción de las acciones derivadas de la relación jurídica que funda el tratamiento en los términos de la Ley aplicable en la materia, y una vez cancelado el dato se dará aviso a la persona titular.

Cuando los datos personales hubiesen sido transmitidos con anterioridad a la fecha de rectificación o cancelación y sigan siendo tratados por terceros, el responsable deberá hacer de su conocimiento dicha solicitud de rectificación o cancelación, para que proceda a efectuarla también.

Artículo 25. El responsable no estará obligado a cancelar los datos personales cuando:

I. Se refiera a las partes de un contrato privado, social o administrativo y sean necesarios para su desarrollo y cumplimiento;

II. Deban ser tratados por disposición legal;

III. Obstaculice las actuaciones judiciales o administrativas vinculadas a obligaciones fiscales, la investigación y persecución de delitos o la actualización de sanciones administrativas;

IV. Sean necesarios para proteger los intereses jurídicamente tutelados de la persona titular;

V. Sean necesarios para realizar una acción en función del interés público;

VI. Sean necesarios para cumplir con una obligación legalmente adquirida por la persona titular, y

VII. Sean objeto de tratamiento para la prevención o para el diagnóstico médico o la gestión de servicios de salud, siempre que dicho tratamiento se realice por un profesional de la salud sujeto a un deber de secreto.

Artículo 26. La persona titular tendrá derecho en todo momento y por causa legítima a oponerse al tratamiento de sus datos o exigir que se cese en el mismo cuando:

I. Exista causa legítima y su situación específica así lo requiera, lo cual debe justificar que aun siendo lícito el tratamiento, el mismo debe cesar para evitar que su persistencia le cause un daño o perjuicio, o

II. Sus datos personales sean objeto de un tratamiento automatizado, el cual le produzca efectos jurídicos no deseados o afecte de manera significativa sus intereses, derechos o libertades, y estén destinados a evaluar, sin intervención humana, determinados aspectos personales de la misma o analizar o predecir, en particular, su rendimiento profesional, situación económica, estado de salud, preferencias sexuales, fiabilidad o comportamiento.

No procederá el ejercicio del derecho de oposición en aquellos casos en los que el tratamiento sea necesario para el cumplimiento de una obligación legal impuesta al responsable.

Capítulo IV
Del Ejercicio de los Derechos de Acceso, Rectificación, Cancelación y Oposición

Artículo 27. La persona titular o su representante legal podrán solicitar al responsable en cualquier momento el ejercicio de los derechos ARCO, respecto de los datos personales que le conciernen.

Artículo 28. La solicitud para el ejercicio de los derechos ARCO deberá contener y acompañar lo siguiente:

I. El nombre de la persona titular y su domicilio o cualquier otro medio para recibir notificaciones;

II. Los documentos que acrediten la identidad de la persona titular o, en su caso, la personalidad e identidad de su representante;

III. La descripción clara y precisa de los datos personales respecto de los que se busca ejercer alguno de los derechos ARCO, salvo que se trate del derecho de acceso;

IV. La descripción del derecho ARCO que se pretende ejercer, o bien, lo que solicita la persona titular, y

V. Cualquier otro elemento o documento que facilite la localización de los datos personales.

Artículo 29. Todo responsable fomentará la protección de datos personales al interior de la organización y designará a una persona, o departamento de datos personales, quien dará trámite a las solicitudes de las personas titulares, para el ejercicio de los derechos a que se refiere la presente Ley.

Artículo 30. En el caso de solicitudes para el ejercicio del derecho de rectificación de datos personales, la persona titular deberá indicar, además de lo señalado en el artículo 29 de esta Ley, las modificaciones a realizarse y aportar la documentación que sustente su petición.

Artículo 31. El responsable comunicará a la persona titular, en un plazo máximo de veinte días, contados desde la fecha en que se recibió la solicitud para el ejercicio de los derechos ARCO, la determinación adoptada, a efecto de que, si resulta procedente, se haga efectiva la misma dentro de los quince días siguientes a la fecha en que se comunica la respuesta. Tratándose de solicitudes para el ejercicio del derecho de acceso a datos personales, procederá la entrega previa acreditación de la identidad del titular o representante legal, según corresponda.

Los plazos antes referidos podrán ser ampliados una sola vez por un periodo igual, siempre y cuando así lo justifiquen las circunstancias del caso.

Artículo 32. La obligación de acceso a los datos personales se dará por cumplida cuando se pongan a disposición de la persona titular los mismos; o bien, mediante la expedición de copias simples, documentos electrónicos o cualquier otro medio que determine el responsable en el aviso de privacidad.

En el caso de que la persona titular solicite el acceso a los datos a una persona que presume es el responsable y ésta resulta no serlo, bastará con que así se le indique a la persona titular por cualquiera de los medios a que se refiere el párrafo anterior, para tener por cumplida la solicitud.

Artículo 33. Las causas en las que el ejercicio de los derechos ARCO no serán procedentes y por tanto el responsable podrá negar los mismos son:

I. Cuando la persona titular o el representante legal no estén debidamente acreditados para ello;

II. Cuando los datos personales no se encuentren en posesión del responsable;

III. Cuando se lesionen derechos de un tercero;

IV. Cuando exista un impedimento legal, o la resolución de una autoridad competente, que restrinja el acceso a los datos personales, o no permita la rectificación, cancelación u oposición de los mismos, y

V. Cuando la rectificación, cancelación u oposición haya sido previamente realizada.

La negativa a que se refiere este artículo podrá ser parcial cuando alguno de los requerimientos descritos en la solicitud para el ejercicio de los derechos ARCO de la persona titular o de su representante no se encuentren en alguna de las causas antes referidas, en cuyo caso el responsable efectuará el acceso, rectificación, cancelación u oposición requerida.

En todos los casos anteriores, el responsable deberá informar el motivo de su decisión y comunicarla a la persona titular, o en su caso, al representante legal, en los plazos establecidos para tal efecto, por el mismo medio por el que se llevó a cabo la solicitud para el ejercicio de los derechos ARCO, acompañando, en su caso, las pruebas que resulten pertinentes.

Artículo 34. El ejercicio de los derechos ARCO es gratuito, solo podrán realizarse cobros para recuperar los costos de reproducción, copias o envío.

Cuando la persona titular proporcione el medio magnético, electrónico o el mecanismo necesario para reproducir los datos personales, los mismos deberán ser entregados sin costo a esta.

Cuando una misma persona titular o su representante reitera su solicitud en un periodo menor a doce meses, los costos no serán mayores a tres veces la Unidad de Medida y Actualización vigente, a menos que existan modificaciones sustanciales al aviso de privacidad que motiven nuevas consultas.

Capítulo V
De la Transferencia de Datos

Artículo 35. Cuando el responsable pretenda transferir los datos personales a terceros nacionales o extranjeros, distintos de la persona encargada deberá comunicar a éstos el aviso de privacidad y las finalidades a las que la persona titular sujetó su tratamiento.

El tratamiento de los datos se hará conforme a lo convenido en el aviso de privacidad, el cual contendrá una cláusula en la que se indique si la persona titular acepta o no la transferencia de sus datos, de igual manera, el tercero receptor, asumirá las mismas obligaciones que correspondan al responsable que transfirió los datos.

Artículo 36. Las transferencias nacionales o internacionales de datos podrán llevarse a cabo sin el consentimiento de la persona titular cuando se ubiquen en alguno de los supuestos siguientes:

I. La transferencia esté prevista en una Ley o Tratado en los que México sea parte;

II. La transferencia sea necesaria para la prevención o el diagnóstico médico, la prestación de asistencia sanitaria, tratamiento médico o la gestión de servicios sanitarios;

III. La transferencia sea efectuada a sociedades controladoras, subsidiarias o afiliadas bajo el control común del responsable, o a una sociedad matriz o a cualquier sociedad del mismo grupo del responsable que opere bajo los mismos procesos y políticas internas;

IV. La transferencia sea necesaria por virtud de un contrato celebrado o por celebrar en interés de la persona titular, por el responsable y un tercero;

V. La transferencia sea necesaria o legalmente exigida para la salvaguarda de un interés público, o para la procuración o administración de justicia;

VI. La transferencia sea precisa para el reconocimiento, ejercicio o defensa de un derecho en un proceso judicial, y

VII. La transferencia sea precisa para el mantenimiento o cumplimiento de una relación jurídica entre el responsable y la persona titular.

Capítulo VI
De la Autorregulación

Artículo 37. Las personas físicas o morales podrán convenir entre ellas o con organizaciones civiles o gubernamentales, nacionales o extranjeras, esquemas de autorregulación vinculante en la materia, que complementen lo dispuesto por la presente Ley. Dichos esquemas deberán contener mecanismos para medir su eficacia en la protección de los datos, consecuencias y medidas correctivas eficaces en caso de incumplimiento.

Los esquemas de autorregulación podrán traducirse en códigos deontológicos o de buena práctica profesional, sellos de confianza u otros mecanismos y contendrán reglas o estándares específicos que permitan armonizar los tratamientos de datos efectuados por los adheridos y facilitar el ejercicio de los derechos de las personas titulares. Dichos esquemas serán notificados de manera simultánea a las autoridades correspondientes y a la Secretaría.

Capítulo VII
De la Secretaría

Artículo 38. La Secretaría, para efectos de esta Ley, tendrá por objeto difundir el conocimiento del derecho a la protección de datos personales en la sociedad mexicana, promover su ejercicio y vigilar por la debida observancia de las disposiciones previstas en la presente Ley y que deriven de la misma; en particular aquellas relacionadas con el cumplimiento de obligaciones por parte de los sujetos regulados por este ordenamiento.

Artículo 39. La Secretaría tiene las siguientes atribuciones:

I. Vigilar y verificar el cumplimiento de las disposiciones contenidas en esta Ley, en el ámbito de su competencia, con las excepciones previstas por la legislación;

II. Interpretar en el ámbito administrativo la presente Ley;

III. Proporcionar apoyo técnico a los responsables que lo soliciten, para el cumplimiento de las obligaciones establecidas en la presente Ley;

IV. Emitir los criterios y recomendaciones, de conformidad con las disposiciones aplicables de esta Ley, para efectos de su funcionamiento y operación;

V. Divulgar estándares y mejores prácticas internacionales en materia de seguridad de la información, en atención a la naturaleza de los datos; las finalidades del tratamiento, y las capacidades técnicas y económicas del responsable;

VI. Conocer y resolver los procedimientos de protección de derechos y de verificación señalados en esta Ley e imponer las sanciones según corresponda;

VII. Cooperar con otras autoridades de supervisión y organismos nacionales e internacionales, a efecto de coadyuvar en materia de protección de datos;

VIII. Acudir a foros internacionales en el ámbito de la presente Ley;

IX. Elaborar estudios de impacto sobre la privacidad previos a la puesta en práctica de una nueva modalidad de tratamiento de datos personales o a la realización de modificaciones sustanciales en tratamientos ya existentes;

X. Difundir el conocimiento de las obligaciones en torno a la protección de datos personales y brindar capacitación a los sujetos obligados, y

XI. Las demás que le confieran esta Ley y demás ordenamientos aplicables.

Capítulo VIII
Del Procedimiento de Protección de Derechos

Artículo 40. El procedimiento se iniciará a instancia de la persona titular de los datos o de su representante legal, expresando con claridad el contenido de su reclamación y de los preceptos de esta Ley que se consideran vulnerados. La solicitud de protección de datos deberá presentarse ante la Secretaría dentro de los quince días siguientes a la fecha en que se comunique la respuesta a la persona titular por parte del responsable.

En el caso de que la persona titular de los datos no reciba respuesta por parte del responsable, la solicitud de protección de datos podrá ser presentada a partir de que haya vencido el plazo de respuesta previsto para el responsable. En este caso, bastará que la persona titular de los datos acompañe a su solicitud de protección de datos el documento que pruebe la fecha en que presentó la solicitud de acceso, rectificación, cancelación u oposición.

La solicitud de protección de datos también procederá en los mismos términos cuando el responsable no entregue a la persona titular los datos personales solicitados, o lo haga en un formato incomprensible,

se niegue a efectuar modificaciones o correcciones a los datos personales, la persona titular no esté conforme con la información entregada por considerar que es incompleta o no corresponda a la información requerida.

Recibida la solicitud de protección de datos ante la Secretaría, se dará traslado de la misma al responsable, para que, en el plazo de quince días, emita respuesta, ofrezca las pruebas que estime pertinentes y manifieste por escrito lo que a su derecho convenga.

La Secretaría admitirá las pruebas que estime pertinentes y procederá a su desahogo. Asimismo, podrá solicitar del responsable las demás pruebas que estime necesarias. Concluido el desahogo de las pruebas, la Secretaría notificará al responsable el derecho que le asiste para que, de considerarlo necesario, presente sus alegatos dentro de los cinco días siguientes a su notificación.

Para el debido desahogo del procedimiento, la Secretaría resolverá sobre la solicitud de protección de datos formulada, una vez analizadas las pruebas y demás elementos de convicción que estime pertinentes, como pueden serlo aquéllos que deriven de la o las audiencias que se celebren con las partes.

El Reglamento de la Ley establecerá la forma, términos y plazos conforme a los que se desarrollará el procedimiento de protección de derechos.

Artículo 41. La solicitud de protección de datos podrá interponerse por escrito libre o a través de los formatos, del sistema electrónico que al efecto proporcione la Secretaría y deberá contener la siguiente información:

I. El nombre de la persona titular o, en su caso, el de su representante legal, así como del tercero interesado, si lo hay;

II. El nombre del responsable ante el cual se presentó la solicitud de acceso, rectificación, cancelación u oposición de datos personales;

III. El domicilio para oír y recibir notificaciones;

IV. La fecha en que se le dio a conocer la respuesta del responsable, salvo que el procedimiento inicie con base en lo previsto en el artículo 45 de la presente Ley;

V. Los actos que motivan su solicitud de protección de datos, y

VI. Los demás elementos que se considere procedente hacer del conocimiento de la Secretaría.

La forma y términos en que deba acreditarse la identidad de la persona titular o bien, la representación legal, se establecerán en el Reglamento.

Asimismo, a la solicitud de protección de datos deberá acompañarse la solicitud y la respuesta que se recurre o, en su caso, los datos que permitan su identificación.

En el caso de falta de respuesta sólo será necesario presentar la solicitud.

En el caso de que la solicitud de protección de datos se interponga a través de medios que no sean electrónicos, deberá acompañarse de las copias de traslado suficientes.

Artículo 42. El plazo máximo para dictar la resolución en el procedimiento de protección de derechos será de cincuenta días, contados a partir de la fecha de presentación de la solicitud de protección de

datos. Cuando haya causa justificada, la Secretaría podrá ampliar por una vez y hasta por un período igual este plazo.

Artículo 43. En caso que la resolución de protección de derechos resulte favorable a la persona titular de los datos, se requerirá al responsable para que, en el plazo de diez días siguientes a la notificación o cuando así se justifique, uno mayor que fije la propia resolución, haga efectivo el ejercicio de los derechos objeto de protección, debiendo dar cuenta por escrito de dicho cumplimiento a la Secretaría dentro de los siguientes diez días.

Artículo 44. En caso de que la solicitud de protección de datos no satisfaga alguno de los requisitos a que se refiere el artículo 41 de esta Ley, y la Secretaría no cuente con elementos para subsanarlo, se prevendrá a la persona titular de los datos dentro de los veinte días siguientes a la presentación de la solicitud de protección de datos, por una sola ocasión, para que subsane las omisiones dentro de un plazo de cinco días. Transcurrido el plazo sin desahogar la prevención se tendrá por no presentada la solicitud de protección de datos. La prevención tendrá el efecto de interrumpir el plazo que tiene la Secretaría para resolver la solicitud de protección de datos.

Artículo 45. La Secretaría suplirá las deficiencias de la queja en los casos que así se requiera, siempre y cuando no altere el contenido original de la solicitud de acceso, rectificación, cancelación u oposición de datos personales, ni se modifiquen los hechos o peticiones expuestos en la misma o en la solicitud de protección de datos.

Artículo 46. Las resoluciones de la Secretaría podrán:

I. Sobreseer o desechar la solicitud de protección de datos por improcedente;

II. Confirmar, revocar o modificar la respuesta del responsable, o

III. Ordenar la entrega de los datos personales, en caso de omisión del responsable.

Artículo 47. La solicitud de protección de datos será desechada por improcedente cuando:

I. La Secretaría no sea competente;

II. La persona titular o su representante no acrediten debidamente su identidad y personalidad de este último;

III. La Secretaría haya conocido anteriormente de la solicitud de protección de datos contra el mismo acto y resuelto en definitiva respecto del mismo recurrente;

IV. Se esté tramitando ante los tribunales competentes algún recurso o medio de defensa interpuesto por la persona titular o, en su caso, por el tercero interesado, en contra del acto recurrido ante la Secretaría;

V. Se trate de una solicitud de protección de datos ofensiva o irracional, o

VI. Sea extemporánea por haber transcurrido el plazo establecido en el artículo 40 de la presente Ley.

Artículo 48. La solicitud de protección de datos será sobreseída cuando:

I. La persona titular fallezca;

II. La persona titular se desista de manera expresa;

III. Admitida la solicitud de protección de datos, sobrevenga una causal de improcedencia, y

IV. Por cualquier motivo quede sin materia la misma.

Artículo 49. La Secretaría podrá en cualquier momento del procedimiento buscar una conciliación entre la persona titular de los datos y el responsable.

De llegarse a un acuerdo de conciliación entre ambos, éste se hará constar por escrito y tendrá efectos vinculantes. La solicitud de protección de datos quedará sin materia y la Secretaría verificará el cumplimiento del acuerdo respectivo.

Para efectos de la conciliación a que se alude en el presente ordenamiento, se estará al procedimiento que se establezca en el Reglamento de esta Ley.

Artículo 50. Interpuesta la solicitud de protección de datos ante la falta de respuesta a una solicitud en ejercicio de los derechos ARCO por parte del responsable, la Secretaría dará vista al citado responsable para que, en un plazo no mayor a diez días, acredite haber respondido en tiempo y forma la solicitud, o bien dé respuesta a la misma. En caso de que la respuesta atienda a lo solicitado, la solicitud de protección de datos se considerará improcedente y la Secretaría deberá sobreseerlo.

En el segundo caso, la Secretaría emitirá su resolución con base en el contenido de la solicitud original y la respuesta del responsable que alude el párrafo anterior.

Si la resolución de la Secretaría a que se refiere el párrafo anterior determina la procedencia de la solicitud, el responsable procederá a su cumplimiento, sin costo alguno para la persona titular, debiendo cubrir el responsable todos los costos generados por la reproducción correspondiente y gastos de envío.

Artículo 51. Contra las resoluciones de la Secretaría, los particulares podrán promover juicio de amparo. Los juicios de amparo serán sustanciados por jueces y tribunales especializados en los términos del artículo 94 de la Constitución Política de los Estados Unidos Mexicanos.

Artículo 52. Todas las resoluciones de la Secretaría serán susceptibles de difundirse públicamente en versiones públicas, eliminando aquellas referencias a la persona titular de los datos que lo identifiquen o lo hagan identificable.

Artículo 53. Las personas titulares que consideren que han sufrido un daño o lesión en sus bienes o derechos como consecuencia del incumplimiento a lo dispuesto en la presente Ley por el responsable o la persona encargada, podrán ejercer los derechos que estimen pertinentes para efectos de la indemnización que proceda, en términos de las disposiciones legales correspondientes.

Capítulo IX
Del Procedimiento de Verificación

Artículo 54. La Secretaría verificará el cumplimiento de la presente Ley y de la normatividad que de ésta derive. La verificación podrá iniciarse de oficio o a petición de parte.

La verificación de oficio procederá cuando se dé el incumplimiento a resoluciones dictadas con motivo de procedimientos de protección de derechos a que se refiere el Capítulo anterior o se presuma fundada y motivadamente la existencia de violaciones a la presente Ley.

Artículo 55. En el procedimiento de verificación la Secretaría tendrá acceso a la información y documentación que considere necesarias, de acuerdo a la resolución que lo motive.

Las personas servidoras públicas estarán obligadas a guardar confidencialidad sobre la información que conozcan derivada de la verificación correspondiente.

El Reglamento desarrollará la forma, términos y plazos en que se sustanciará el procedimiento a que se refiere el presente artículo.

Capítulo X
Del Procedimiento de Imposición de Sanciones

Artículo 56. Si con motivo del desahogo del procedimiento de protección de derechos o del procedimiento de verificación que realice la Secretaría, ésta tuviera conocimiento de un presunto incumplimiento de alguno de los principios o disposiciones de esta Ley, iniciará el procedimiento de imposición de sanciones.

Artículo 57. El procedimiento de imposición de sanciones dará comienzo con la notificación que efectúe la Secretaría a la presunta persona infractora, sobre los hechos que motivaron el inicio del procedimiento y le otorgará un término de quince días para que rinda pruebas y manifieste por escrito lo que a su derecho convenga. En caso de no rendirlas, la Secretaría resolverá conforme a los elementos de convicción de que disponga.

La Secretaría admitirá las pruebas que estime pertinentes y procederá a su desahogo. Asimismo, podrá solicitar de la presunta persona infractora las demás pruebas que estime necesarias. Concluido el desahogo de las pruebas, la Secretaría notificará a la presunta persona infractora el derecho que le asiste para que, de considerarlo necesario, presente sus alegatos dentro de los cinco días siguientes a su notificación.

La Secretaría, una vez analizadas las pruebas y demás elementos de convicción que estime pertinentes, resolverá en definitiva dentro de los cincuenta días siguientes a la fecha en que inició el procedimiento sancionador. Dicha resolución deberá ser notificada a las partes.

Cuando haya causa justificada, la Secretaría podrá ampliar por una vez y hasta por un período igual este plazo.

El Reglamento desarrollará la forma, términos y plazos en que se sustanciará el procedimiento de imposición de sanciones, incluyendo presentación de pruebas y alegatos, la celebración de audiencias y el cierre de instrucción.

Capítulo XI
De las Infracciones y Sanciones

Artículo 58. Constituyen infracciones a esta Ley, las conductas llevadas a cabo por el responsable:

I. No cumplir con la solicitud para el ejercicio de los derechos ARCO de la persona titular, sin razón fundada, en los términos previstos en esta Ley;

II. Actuar con negligencia o dolo durante la sustanciación de las solicitudes para el ejercicio de los derechos ARCO;

III. Declarar dolosamente la inexistencia de datos personales, cuando exista total o parcialmente en las bases de datos del responsable;

IV. Dar tratamiento a los datos personales en contravención a los principios establecidos en la presente Ley;

V. Omitir en el aviso de privacidad, alguno o todos los elementos a que se refiere el artículo 15 de esta Ley;

VI. Mantener datos personales inexactos cuando resulte imputable al responsable, o no efectuar las rectificaciones o cancelaciones de los mismos que legalmente procedan cuando resulten afectados los derechos de las personas titulares;

VII. No cumplir con el apercibimiento a que se refiere la fracción I del artículo 59 de la presente Ley;

VIII. Incumplir el deber de confidencialidad establecido en el artículo 20 de esta Ley;

IX. Cambiar sustancialmente la finalidad originaria del tratamiento de los datos, sin observar lo dispuesto por el artículo 11 de esta Ley;

X. Transferir datos a terceros sin comunicar a estos el aviso de privacidad que contiene las limitaciones a que la persona titular sujetó la divulgación de los mismos;

XI. Vulnerar la seguridad de bases de datos, locales, programas o equipos, cuando resulte imputable al responsable;

XII. Llevar a cabo la transferencia o cesión de los datos personales, fuera de los casos en que esté permitida por la Ley;

XIII. Recabar o transferir datos personales sin el consentimiento expreso de la persona titular, en los casos en que éste sea exigible;

XIV. Obstruir los actos de verificación de la autoridad;

XV. Recabar datos en forma engañosa y fraudulenta;

XVI. Continuar con el uso ilegítimo de los datos personales cuando se ha solicitado el cese del mismo por la Secretaría o las personas titulares;

XVII. Tratar los datos personales de manera que se afecte o impida el ejercicio de los derechos ARCO establecidos en el artículo 16 de la Constitución Política de los Estados Unidos Mexicanos;

XVIII. Crear bases de datos en contravención a lo dispuesto por el artículo 8, segundo párrafo de esta Ley, y

XIX. Cualquier incumplimiento del responsable a las obligaciones establecidas a su cargo en términos de lo previsto en la presente Ley.

Artículo 59. Las infracciones a la presente Ley serán sancionadas por la Secretaría con:

I. El apercibimiento para que el responsable lleve a cabo los actos solicitados por la persona titular, en los términos previstos por esta Ley, tratándose de los supuestos previstos en la fracción I del artículo anterior;

II. Multa de 100 a 160,000 veces la Unidad de Medida y Actualización, en los casos previstos en las fracciones II a VII del artículo anterior;

III. Multa de 200 a 320,000 veces la Unidad de Medida y Actualización, en los casos previstos en las fracciones VIII a XVIII del artículo anterior, y

IV. En caso de que de manera reiterada persistan las infracciones citadas en los incisos anteriores, se impondrá una multa adicional que irá de 100 a 320,000 veces la Unidad de Medida y Actualización. En tratándose de infracciones cometidas en el tratamiento de datos sensibles, las sanciones podrán incrementarse hasta por dos veces, los montos establecidos.

Artículo 60. La Secretaría fundará y motivará sus resoluciones, considerando:

I. La naturaleza del dato;

II. La notoria improcedencia de la negativa del responsable, para realizar los actos solicitados por la persona titular, en términos de esta Ley;

III. El carácter intencional o no, de la acción u omisión constitutiva de la infracción;

IV. La capacidad económica del responsable, y

V. La reincidencia.

Artículo 61. Las sanciones que se señalan en este Capítulo se impondrán sin perjuicio de la responsabilidad civil o penal que resulte.

Capítulo XII
De los Delitos en Materia del Tratamiento Indebido de Datos Personales

Artículo 62. Se impondrán de tres meses a tres años de prisión al que, estando autorizado para tratar datos personales, con ánimo de lucro, provoque una vulneración de seguridad a las bases de datos bajo su custodia.

Artículo 63. Se sancionará con prisión de seis meses a cinco años al que, con el fin de alcanzar un lucro indebido, trate datos personales mediante el engaño, aprovechándose del error en que se encuentre la persona titular o la persona autorizada para transmitirlos.

Artículo 64. Tratándose de datos personales sensibles, las penas a que se refiere este Capítulo se duplicarán.

Artículo Cuarto.- ……..

Transitorios

Primero.- El presente Decreto entrará en vigor al día siguiente de su publicación en el Diario Oficial de la Federación, con excepción de lo previsto en el transitorio Tercero de este instrumento.

Segundo.- A la entrada en vigor del presente Decreto se abrogan las disposiciones siguientes:

I. La Ley Federal de Protección de Datos Personales en Posesión de los Particulares, publicada en el Diario Oficial de la Federación el 5 de julio de 2010;

II. La Ley General de Transparencia y Acceso a la Información Pública, publicada en el Diario Oficial de la Federación el 4 de mayo de 2015 y sus modificaciones posteriores;

III. La Ley Federal de Transparencia y Acceso a la Información Pública, publicada en el Diario Oficial de la Federación el 9 de mayo de 2016 y sus modificaciones posteriores;

IV. La Ley General de Protección de Datos Personales en Posesión de Sujetos Obligados, publicada en el Diario Oficial de la Federación el 26 de enero de 2017, y

V. El Acuerdo mediante el cual se aprueba el Programa Anual de Verificación y Acompañamiento Institucional para el cumplimiento de las obligaciones en materia de acceso a la información y transparencia por parte de los sujetos obligados del ámbito federal, correspondiente al ejercicio 2025, publicado en el Diario Oficial de la Federación el 21 de enero de 2025.

Tercero.- Los artículos 71 y 72 de la Ley General de Transparencia y Acceso a la Información Pública entrarán en vigor cuando se extingan la Comisión Federal de Competencia Económica y el Instituto Federal de Telecomunicaciones conforme a lo previsto en los transitorios Décimo y Décimo Primero del "Decreto por el que se reforman, adicionan y derogan diversas disposiciones de la Constitución Política de los Estados Unidos Mexicanos, en materia de simplificación orgánica", publicado en el Diario Oficial de la Federación el 20 de diciembre de 2024.

Para efectos del párrafo anterior, la Comisión Federal de Competencia Económica y el Instituto Federal de Telecomunicaciones deberán poner a disposición del público y actualizar la información a que se refiere el artículo 72, fracciones II y V, respectivamente, de la Ley Federal de Transparencia y Acceso a la Información Pública que se abroga por virtud del presente Decreto.

Cuarto.- Las menciones, atribuciones o funciones contenidas en otras leyes, reglamentos y, en general, en cualquier disposición normativa, respecto al Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales se entenderán hechas o conferidas a los entes públicos que adquieren tales atribuciones o funciones, según corresponda.

Quinto.- Los derechos laborales de las personas servidoras públicas del Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales, serán respetados, en términos de la legislación aplicable. Los recursos humanos con que cuente el referido Instituto pasarán a formar parte de la Secretaría Anticorrupción y Buen Gobierno y Transparencia para el Pueblo.

El Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales transferirá los recursos correspondientes al valor del inventario o plantilla de plazas a la Secretaría de Hacienda y Crédito Público, dentro de los veinte días hábiles siguientes contados a partir de la entrada en vigor del presente Decreto, a fin de que esa dependencia realice las acciones que correspondan, conforme a las disposiciones jurídicas aplicables.

Las personas servidoras públicas del Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales que dejen de prestar sus servicios en el mencionado Instituto y que estén obligadas a presentar declaración patrimonial y de intereses, de conformidad con las disposiciones jurídicas aplicables, lo realizarán en los sistemas de la Secretaría Anticorrupción y Buen Gobierno

habilitados para tales efectos o en los medios que esta determine y conforme a la normativa aplicable a la Administración Pública Federal. Lo anterior también es aplicable a las personas que se hayan desempeñado como servidoras públicas en el mencionado Instituto y que a la fecha de entrada en vigor del presente Decreto aún tengan pendiente cumplir con dicha obligación.

Las personas que dentro de los diez días previos a la entrada en vigor del presente Decreto se hayan desempeñado como personas servidoras públicas del Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales, incluyendo a las personas Comisionadas, deben presentar acta administrativa de entrega-recepción institucional e individual, según corresponda, a la persona servidora pública que la Secretaría Anticorrupción y Buen Gobierno designe y conforme a la normativa aplicable a la Administración Pública Federal, en los sistemas de la referida dependencia habilitados para tales efectos o en los medios que ésta determine, en el entendido que la entrega que se realice no implica liberación alguna de responsabilidades que pudieran llegarse a determinar por la autoridad competente con posterioridad.

Sexto.- Los recursos materiales con que cuente el Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales serán transferidos a la Secretaría Anticorrupción y Buen Gobierno, dentro de los veinte días hábiles siguientes a la entrada en vigor del presente Decreto.

Séptimo.- El Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales transferirá los recursos financieros a la Secretaría de Hacienda y Crédito Público, de conformidad con las disposiciones jurídicas aplicables.

Asimismo, el Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales deberá entregar a la citada dependencia la información y formatos necesarios para integrar la Cuenta Pública y demás informes correspondientes al primer trimestre, de conformidad con las disposiciones jurídicas aplicables, dentro de los diez días hábiles siguientes a la entrada en vigor del presente Decreto.

Octavo.- Los registros, padrones y sistemas, internos y externos, que integran la Plataforma Nacional de Transparencia con los que cuenta el Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales, así como los sistemas informáticos utilizados por dicho Instituto, incluso los que ya no se utilicen pero contengan registros históricos, incluida su documentación y titularidad, serán transferidos a la Secretaría Anticorrupción y Buen Gobierno dentro de los quince días hábiles siguientes a la entrada en vigor del presente Decreto.

Noveno.- Los procedimientos iniciados con anterioridad a la entrada en vigor de este Decreto ante el Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales, en materia de acceso a la información pública, se sustanciarán ante Transparencia para el Pueblo conforme a las disposiciones aplicables vigentes al momento de su inicio.

La defensa legal ante autoridades administrativas, jurisdiccionales y judiciales de los actos administrativos y jurídicos emitidos por el Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales, en materia de acceso a la información pública, se llevará a cabo por Transparencia para el Pueblo.

Transparencia para el Pueblo podrá remitir a la Autoridad garante competente aquellos asuntos que se mencionan en los párrafos anteriores que le corresponda conforme al ámbito de sus atribuciones para su atención.

Décimo.- Los procedimientos iniciados con anterioridad a la entrada en vigor de este Decreto ante el Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales, en materia de datos personales o cualquier otra distinta a la mencionada en el transitorio anterior, se

sustanciarán conforme a las disposiciones vigentes al momento de su inicio ante la Secretaría Anticorrupción y Buen Gobierno a que se refiere este Decreto.

La defensa legal ante autoridades administrativas, jurisdiccionales o judiciales de los actos administrativos y jurídicos emitidos por el Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales, en materia de datos personales o cualquier otra distinta a la mencionada en el transitorio anterior, así como el seguimiento de los que se encuentren en trámite, incluso los procedimientos penales y laborales, se llevará a cabo por la Secretaría Anticorrupción y Buen Gobierno.

La Secretaría Anticorrupción y Buen Gobierno podrá remitir a la Autoridad garante competente aquellos asuntos que se mencionan en los párrafos anteriores que le corresponda conforme al ámbito de sus atribuciones para su atención.

Décimo Primero.- Los municipios podrán cumplir con las obligaciones a su cargo en materia de transparencia y acceso a la información, en términos de lo previsto en el transitorio Décimo de la Ley General de Transparencia y Acceso a la Información Pública que se abroga por virtud de este Decreto.

Décimo Segundo.- La persona titular del Ejecutivo Federal deberá expedir las adecuaciones correspondientes a los reglamentos y demás disposiciones aplicables, incluida la emisión del Reglamento Interior de Transparencia para el Pueblo, dentro de los noventa días naturales siguientes a la entrada en vigor del presente Decreto, a fin de armonizarlos a lo previsto en el mismo.

Décimo Tercero.- Los expedientes y archivos que a la entrada en vigor del presente Decreto estén a cargo del Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales para el ejercicio de sus facultades sustantivas, competencias o funciones, de conformidad con la Ley General de Archivos y demás disposiciones jurídicas aplicables, serán transferidos a la Secretaría Anticorrupción y Buen Gobierno dentro de los veinte días hábiles siguientes a la entrada en vigor del presente Decreto.

La Secretaría Anticorrupción y Buen Gobierno, dentro de los treinta días naturales siguientes contados a partir de que se reciban los expedientes y archivos que se mencionan en el párrafo anterior, podrá transferirlos a la autoridad correspondiente.

Décimo Cuarto.- El Órgano Interno de Control del Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales queda extinto y sus asuntos y procedimientos que a la entrada en vigor del presente Decreto estén a su cargo, así como los expedientes y archivos, serán transferidos al Órgano Interno de Control de la Secretaría Anticorrupción y Buen Gobierno dentro de los veinte días hábiles siguientes a su entrada en vigor, y serán tramitados y resueltos por dicho órgano conforme a las disposiciones jurídicas vigentes al momento de su inicio.

Décimo Quinto.- Para efectos de lo dispuesto en los transitorios Quinto, Sexto, Séptimo, Octavo y Décimo Tercero del presente Decreto el Pleno del Instituto Nacional de Transparencia, Acceso a la Información y Protección de Datos Personales deberá integrar, en la fecha de publicación de este instrumento, un Comité de Transferencia conformado por los Comisionados del mencionado Instituto y once personas servidoras públicas del mismo con al menos el nivel de Dirección de área o equivalente, que tengan conocimiento o que se encuentren a su cargo los asuntos que se mencionan en los propios transitorios.

El Comité de Transferencia estará vigente por un periodo de 30 días naturales, en el que sus integrantes participarán con las diversas autoridades competentes para recibir los asuntos que se señalan en los transitorios antes citados y realizar las demás acciones que se consideren necesarias para dichos efectos.

Décimo Sexto.- El Consejo del Sistema Nacional de Acceso a la Información Pública deberá instalarse a más tardar en sesenta días naturales, a partir de la entrada en vigor del presente Decreto, previa convocatoria que al efecto emita la Secretaría Anticorrupción y Buen Gobierno.

Hasta en tanto las legislaturas de las entidades federativas que correspondan armonizan su marco jurídico en materia de acceso a la información pública en términos de lo previsto en el transitorio Cuarto del Decreto por el que se reforman, adicionan y derogan diversas disposiciones de la Constitución Política de los Estados Unidos Mexicanos, en materia de simplificación orgánica, publicado en el Diario Oficial de la Federación el 20 de diciembre de 2024, la persona titular del poder ejecutivo local de que se trate será integrante del Consejo del Sistema Nacional de Acceso a la Información Pública.

Décimo Séptimo.- La persona titular de la Secretaría Ejecutiva del Consejo del Sistema Nacional de Acceso a la Información Pública propondrá las reglas de operación y funcionamiento que se señalan en el artículo 25, fracción XV, de la Ley General de Transparencia y Acceso a la Información Pública, para que sean aprobadas en la instalación de dicho Consejo.

Décimo Octavo.- El órgano de control y disciplina del Poder Judicial; los órganos internos de control de los órganos constitucionales autónomos; las contralorías internas del Congreso de la Unión; el Instituto Nacional Electoral; el Centro Federal de Conciliación y Registro Laboral y el Tribunal Federal de Conciliación y Arbitraje en un plazo máximo de treinta días naturales contados a partir de la entrada en vigor del presente Decreto deberán realizar las adecuaciones necesarias a su normativa interna para dar cumplimiento a lo dispuesto en este instrumento.

Para efectos de lo previsto en este transitorio, se suspenden por un plazo de noventa días naturales contados a partir de la entrada en vigor de este Decreto todos y cada uno de los trámites, procedimientos y demás medios de impugnación, establecidos en este instrumento y demás normativa aplicable, con excepción de la recepción y atención de las solicitudes de información que se tramitan a través de la Plataforma Nacional de Transparencia por las autoridades que se mencionan en el párrafo anterior.

Décimo Noveno.- Hasta en tanto las legislaturas de las entidades federativas, emitan legislación para armonizar su marco jurídico conforme al presente Decreto, los organismos garantes de las mismas continuarán operando y realizarán las atribuciones que le son conferidas a las Autoridades garantes locales, así como a los órganos encargados de la contraloría interna u homólogos de los poderes legislativo y judicial, así como los órganos constitucionales autónomos de las propias entidades federativas en la presente Ley.

Vigésimo.- El Poder Judicial de la Federación deberá habilitar juzgados de Distrito y tribunales Colegiados de Circuito especializados en materia de acceso a la información pública y protección de datos personales, en un plazo no mayor a ciento veinte días naturales contados a partir de la entrada en vigor del presente Decreto, a los cuales se remitirán los juicios de amparo en dichas materias que se encuentran en trámite para su resolución.

Para efectos de lo previsto en este transitorio, se suspenden por un plazo de ciento ochenta días naturales contados a partir de la entrada en vigor de este Decreto los plazos y términos procesales de los juicios de amparo en materia de acceso a la información pública y protección de datos personales que se encuentran en trámite ante juzgados de Distrito y tribunales Colegiados de Circuito.

Ciudad de México, a 20 de marzo de 2025.- Sen. Imelda Castro Castro, Vicepresidenta.- Dip. Sergio Carlos Gutiérrez Luna, Presidente.- Sen. Verónica Noemí Camino Farjat, Secretaria.- Dip. José Luis Montalvo Luna, Secretario.- Rúbricas.**"**

En cumplimiento de lo dispuesto por la fracción I del Artículo 89 de la Constitución Política de los Estados Unidos Mexicanos, y para su debida publicación y observancia, expido el presente Decreto en la Residencia del Poder Ejecutivo Federal, en la Ciudad de México, a 20 de marzo de 2025.- **Claudia Sheinbaum Pardo**, Presidenta de los Estados Unidos Mexicanos.- Rúbrica.- Lcda. **Rosa Icela Rodríguez Velázquez**, Secretaria de Gobernación.- Rúbrica.

ARTÍCULOS TRANSITORIOS DE DECRETOS DE REFORMA

DECRETO por el que se reforman diversas disposiciones de diversos ordenamientos legales, en materia de homologación normativa relativa al Código Nacional de Procedimientos Civiles y Familiares.

Publicado en el Diario Oficial de la Federación el 14 de noviembre de 2025

Artículo Trigésimo Octavo.- Se reforma el artículo 4 de la Ley Federal de Protección de Datos Personales en Posesión de los Particulares, para quedar como sigue:

……..

Transitorios

Primero. El presente Decreto entrará en vigor el día siguiente al de su publicación en el Diario Oficial de la Federación.

Segundo. La aplicación de lo dispuesto en el presente Decreto entrará en vigor en cada una de las entidades federativas al mismo tiempo que la Declaratoria de aplicación gradual que expidan los Congresos Locales para efecto de la entrada en vigor del Código Nacional de Procedimientos Civiles y Familiares, de conformidad con el Artículo Segundo Transitorio del Decreto publicado en el Diario Oficial de la Federación el 7 de junio de 2023.

En el orden federal, la aplicación de lo dispuesto en el presente Decreto entrará en vigor de conformidad con la Declaratoria de aplicación gradual que, indistinta y sucesivamente, realicen para el Código Nacional de Procedimientos Civiles y Familiares las Cámaras de Diputados y Senadores que integran el Congreso de la Unión.

En todos los casos, vencido el plazo sin que se hubiera emitido la Declaratoria respectiva, la entrada en vigor de lo previsto en el presente Decreto será automática a partir del 1o. de abril de 2027.

Tercero. Los procedimientos que se encuentren en trámite a la entrada en vigor del presente Decreto conforme con lo dispuesto en el artículo anterior, continuarán su sustanciación con la legislación aplicable al momento del inicio de los mismos, salvo que las partes conjuntamente opten por la regulación del contenido del Código Nacional de Procedimientos Civiles y Familiares.

No procederá la acumulación de procesos cuando alguno de ellos se tramite conforme con el Código Nacional de Procedimientos Civiles y Familiares y el otro proceso conforme a un Código abrogado.

Cuarto. El Artículo Cuadragésimo Primero, del presente Decreto, tendrá vigencia hasta en tanto no se abrogue la Ley Federal de Telecomunicaciones y Radiodifusión, de conformidad con lo previsto en el artículo Sexto Transitorio del Decreto por el que se expide la Ley en Materia de Telecomunicaciones y Radiodifusión y se abroga la Ley Federal de Telecomunicaciones y Radiodifusión, publicado en el Diario Oficial de la Federación el 16 de julio de 2025.

Ciudad de México, a 01 de octubre de 2025.- Sen. Laura Itzel Castillo Juárez, Presidenta.- Dip. Kenia López Rabadán, Presidenta.- Sen. María Martina Kantún Can, Secretaria.- Dip. Julieta Villalpando Riquelme, Secretaria.- Rúbricas.**"**

En cumplimiento de lo dispuesto por la fracción I del Artículo 89 de la Constitución Política de los Estados Unidos Mexicanos, y para su debida publicación y observancia, expido el presente Decreto en la

Residencia del Poder Ejecutivo Federal, en la Ciudad de México, a 13 de noviembre de 2025.- **Claudia Sheinbaum Pardo**, Presidenta de los Estados Unidos Mexicanos.- Rúbrica.- Lcda. **Rosa Icela Rodríguez Velázquez**, Secretaria de Gobernación.- Rúbrica.

REPUBLICA DE PANAMA
MINISTERIO DE SALUD

DECRETO EJECUTIVO N° 2
(De 21 de Enero de 2013)

Que establece las guías para la utilización de las células madre en la República de Panamá.

EL PRESIDENTE DE LA REPUBLICA
En uso de sus facultades constitucionales y legales, y

CONSIDERANDO:

Que la temática sobre la extracción, trasplantes y almacenamiento de células madre actualmente son procesos regulados por normas que dependen directamente de los países en los que están ubicados los laboratorios ligados a los trasplantes;

Que el Titulo V, Capítulo III de la Ley 3 de 8 de febrero de 2010, "General de Trasplante de Componentes Anatómicos", regula lo relativo a los Centros de Extracción y Trasplantes de Componentes Anatómicos de Donante Vivo;

Que resulta necesario que se establezcan buenas prácticas a través de guías para la legalización de células madre con el propósito que las empresas, entidades, instituciones y/o cualesquiera profesional de la salud que se dedique a la actividad, cumplan con los propósitos establecidos por las instituciones legales que rigen la materia, en el ámbito nacional, en concordancia con los altos estándares internacionales;

Que conforme el numeral 14 del artículo 184 de la Constitución Política de la República, corresponde al Presidente de la República con la participación del ministro respectivo, reglamentar las leyes que lo requieran para su mejor cumplimento, en consecuencia;

DECRETA:

ARTÍCULO 1. Establecer las guías para la utilización de las células madre en la República de Panamá, con el objeto de regular y garantizar el apropiado funcionamiento de los Centros de Extracción y/o Trasplantes de Componentes Anatómicos.

ARTÍCULO 2. Ámbito de Aplicación. Cualquier persona natural o jurídica sea de derecho público o privada relacionada a la actividad de células madre que se encuentren operando legalmente en el país con la debida autorización y poseedora de una de licencia sanitaria de funcionamiento expedida por el Ministerio de Salud antes de la publicación de estas guías, está exenta de estas regulaciones siempre y cuando opere basándose en técnicas o evidencias científicamente comprobadas con estudios clínicos avaladores. En caso contrario, se le otorgará un término de ciento veinte (120) días calendario para regular su situación y cumplir cabalmente con todos y cada uno de los requisitos exigidos.

Cumplido el término anterior y, si el Ministerio de Salud no le ha otorgado, por razones imputables a la compañía o institución, la licencia correspondiente, la empresa o institución no podrá continuar desarrollando esta actividad o cualquiera otra que le sea conexa.

ARTÍCULO 3. Para los efectos del presente Decreto Ejecutivo, los siguientes términos se entenderán así:

1. Almacenamiento: Mantenimiento de las células o tejidos bajo condiciones controladas y apropiadas hasta su distribución.

2. Aplicación: Cualquier actividad que implique el uso de células o tejidos en un receptor humano y/o en aplicaciones extra-corporales (comprenden las actividades de implantar, infundir, injertar, aplicar o trasplantar).
3. Células: - Cada uno de los elementos microscópicos constituidos por protoplasmas y dotados de vida propia que según la teoría celular son las unidades morfológicas fisiológicas que componen el cuerpo de todo ser vivo.
4. Célula madre: Es un tipo de célula que posee la capacidad de replicarse y de dar lugar a diversos tipos de células especializadas y a células idénticas.
5. Células madre alogénicas: Aquellas que se toman del cuerpo de un diferente paciente.
6. Células madre autólogas: Aquellas que se toman del cuerpo del propio paciente.
7. Células madre embrionarias: Son aquellas obtenidas de pre-embriones sobrantes de las técnicas de fecundación 'in vitro' y en fase de blastocito.
8. Células madre pluripotentes inducidas: Son un tipo de células madre con características pluripotenciales (capaces de generar la mayoría de los tejidos) derivadas artificialmente de una célula madre que inicialmente no era pluripotencial.
9. Células somáticas: Son aquellas células que forman el conjunto de tejidos y órganos de un ser vivo, procedentes de células madre originadas durante el desarrollo embrionario y que sufren un proceso de proliferación celular, diferenciación celular y apoptosis.
10. Diferenciación: Es el proceso por el que las células cambian de forma y de función cuando se desarrollan y adoptan un papel especializado.
11. Efecto adverso grave: Cualquier hecho desfavorable vinculado a la obtención, evaluación, procesamiento, almacenamiento y distribución de células y tejido que pueda conducir a la transmisión de una enfermedad, a la muerte del paciente, o a estados que hagan peligrar su vida, a minusvalías o incapacidades o que puedan dar lugar a hospitalización o enfermedad o que la pueda prolongar.
12. Investigación clínica: Investigación desarrollada mediante protocolos que incluyen los procedimientos de obtención y aplicación de células y tejidos humanos en humanos, cuando la eficacia o seguridad de los procedimientos o de las células o tejidos no están suficientemente comprobadas o cuando la indicación terapéutica no está suficientemente consolidada, y cuya finalidad es la comprobación de alguno de estos puntos.
13. Líneas celulares: Conjunto de células derivadas de una única célula madre o progenitora que permanecen estables y sin alteraciones fisiológicas durante un periodo de tiempo prolongado.
14. Modificación Genética: Tipo de modificación que no se da por multiplicación ni recombinación natural, sino por la introducción de un gen modificado o de un gen de otra variedad o especie.
15. Óvulo: Célula sexual femenina que se forma en el proceso de ovogénesis. Es una célula haploide de veintitrés (23) cromosomas, al igual que el espermatozoide; ambas células al fusionarse originan una célula diploide de cuarenta y seis (46) cromosomas.
16. Procesamiento: Operación u operaciones que implican la preparación, manipulación, preservación y acondicionamiento de los tejidos y las células destinados a su aplicación en el ser humano.
17. Reacción adversa grave: Respuesta inesperada del donante o del receptor, incluida una enfermedad transmisible, asociada a la obtención o aplicación en el ser humano de tejidos y células, que resulte mortal, potencialmente mortal, incapacitante, que produzca invalidez o incapacidad, o que dé lugar a hospitalización o enfermedad.
18. Sistema de calidad: Comprende la estructura orgánica, la definición de responsabilidades, los procedimientos, procesos y recursos, que se destinan a

desarrollar la gestión de la calidad. Incluye cualquier actividad que contribuya a la calidad total de forma directa o indirecta.

19. Sistema de gestión de calidad: Actividades coordinadas destinadas a la dirección y control de una organización en relación con la calidad.
20. Trasplante: Utilización terapéutica de los componentes anatómicos de un donante a un receptor.
21. Tejido: Toda parte constituyente del cuerpo humano formada por células unidas por algún tipo de tejido conectivo.
22. Uso alogénico: Proceso mediante el cual las células o tejidos son extraídos de una persona y aplicados a otra.
23. Uso autólogo: Proceso mediante el cual las células o los tejidos son extraídos y aplicados a la misma persona.
24. Validación: Evidencia documental que prueba, con un elevado nivel de garantía, que un determinado proceso, equipo o parte de un equipo o condición ambiental acaba produciendo, de forma consistente y reproducible, un determinado producto que cumple las especificaciones, cualidades y atributos que se habían predeterminado. Un proceso es validado con vistas a probar su efectividad para un uso determinado.

ARTÍCULO 4. Requisitos para establecer una empresa de células madres en Panamá. Toda compañía, empresa o institución que desee establecerse y operar en Panamá, para realizar actividades de cualquiera índole o naturaleza relacionadas con las células madre, deberá cumplir con los siguientes requisitos, los cuales serán evaluados y aprobados por la Dirección General de Salud Pública del Ministerio de Salud.

1. Estar debidamente registrada, en caso de persona jurídica, en Panamá con o sin fines de lucro.

2. Tener presencia física en Panamá habiendo establecido sistemas de calidad para Buenas Prácticas con Tejidos y poseer la documentación apropiada y válida al momento de realizarse la inspección y contar con un personal calificado mediante educación y entrenamiento formal en una Institución académica o de investigación reconocida por el Ministerio de Salud.

3. Por lo menos un miembro de la Junta Directiva de la empresa o institución debe ser panameño o tener residencia permanente.

4. La empresa o institución debe invertir un mínimo de dos millones de balboas (B/.2.000.000.00) en Panamá. Esta inversión puede darse mediante una combinación de compras de bienes raíces, equipo de laboratorio, materiales, insumos, o gastos en construcción de proyectos y otros gastos pertinentes al negocio.

5. Todos los tejidos y células, ya sean de la República de Panamá o de otro país deben ser evaluados en un Laboratorio de Células Madre aprobado por Panamá antes de su administración en humanos en Panamá y deben cumplir con los requisitos especificados en el artículo 18 de la Ley 3 de 8 de febrero de 2010.

6. Cualquier tratamiento a base de células usado en la República de Panamá, ya sea con células autólogas o alogénicas, que utilice células o tejidos originados fuera de la República de Panamá, primero debe ser sometido a las pruebas requeridas por el Ministerio de Salud. Sólo los tratamientos que reúnan los requisitos, análisis y las pruebas requeridas podrán ser utilizados clínicamente en Panamá.

7. Las solicitudes y/o tratamientos que no cumplan con las pruebas exigidas serán devueltas a su fuente de origen.

ARTÍCULO 5. Licencias para un Laboratorio de Células Madre y su personal. Los siguientes requisitos serán exigidos para el otorgamiento de licencias para Laboratorios de Células Madre:

1. Licencia sanitaria de funcionamiento del laboratorio: El Laboratorio de Células Madre debe estar registrado y autorizado luego de haber sido inspeccionado y aprobado por el Ministerio de Salud de Panamá de acuerdo con los requisitos especificados en el artículo 63 de la Ley 3 de 8 de febrero de 2010, y es un requisito el cumplimiento con las normas de GMP, GLP y GTP establecidas por Organización Mundial de la Salud, US FDA, o estándares de Estados Unidos o de la Unión Europea. El laboratorio debe tener un ambiente limpio, y cumplir con los estándares internacionales de acuerdo con el tipo de procedimiento realizado, es decir, cada sección del laboratorio debe cumplir con los niveles de control ambiental apropiados.

2. Todos los laboratorios de células madre tanto públicos como privados deben contar con al menos una acreditación o certificación mundialmente reconocida (AABB, FACT o ISO 9000).

3. Personal técnico del laboratorio: Un laboratorio de células madre debe contar con personal con al menos uno de los siguientes títulos: técnico, licenciado en biología o carreras afines, doctor en medicina, PhD, maestría o un título de postgrado pertinente a la actividad a realizar.

4. El personal debe estar debidamente autorizado por el Ministerio de Salud y debe presentar la documentación de autorización expedida por este Ministerio, basado en las leyes y otras normas existentes que rigen este tema.

5. Director de Laboratorio: Un laboratorio de células madre debe tener como director a un tecnólogo médico idóneo con entrenamiento formal en técnicas de manejo de células madre en laboratorio, con mínimo un año de experiencia en cultivo celular y/o mínimo un año de entrenamiento en cultivo de células madre.
6. Director Médico: debe ser un médico idóneo con especialidad en Medicina (Pediatría, Medicina Interna, Cardiología, Endocrinología), el cual será responsable de todos los aspectos médicos del laboratorio.
7. Director de Investigación: Debe ser un profesional debidamente calificado mediante educación y experiencia, y tener un entrenamiento científico formal, una carrera de doctor en medicina y/o un PhD y haber publicado en los últimos cinco años un artículo cuyo tema se encuentre dentro del campo de investigación de células madre en una revista científica internacional reconocida e indexada por expertos.
8. Investigadores: Los investigadores deben tener entrenamiento científico formal, un título de doctor en medicina, un PhD o estudios de postgrado.
9. Médicos: Los doctores en medicina que laboren en el campo de cédulas madres en Panamá que no tengan experiencia previa en este campo serán supervisados por el Director Médico responsable del Laboratorio de Células Madres.

En caso de tratarse de médicos extranjeros se requiere la autorización y aprobación por parte del el Ministerio de Salud.

ARTÍCULO 6. Parámetros para selección de donantes.

1. Historial clínico, examen físico, revisión de expediente médico.
2. Factores de riesgo o evidencia clínica de enfermedades y agentes transmisibles de relevancia.
3. Historial personal o familiar de enfermedades genéticas, cánceres u otras enfermedades pertinentes.
4. Pruebas de enfermedades infecciosas.
5. Firma de consentimiento informado antes de la donación o la terapia celular para asegurar que el paciente esté anuente de los riesgos y de la naturaleza experimental del tratamiento.

ARTÍCULO 7. Disposiciones de Bioseguridad. Todos los productos médicos que contengan células humanas viables, independientemente de su fuente biológica o geográfica, se le deben aplicar y exigir los estándares de manejo de riesgos y de procesamiento de las Buenas Prácticas con Tejidos establecidos por ISO 13022: 2012: Productos médicos conteniendo células humanas viables, (Medical products containing viable human cells) y además deben tener registros completos de control de calidad, incluyendo:

1. Pruebas obligatorias para determinar la presencia de enfermedades infecciosas, incluyendo:

    a. HBsAg (Antígeno de superficie de Hepatitis B)
    b. Anticuerpo para HIV1 y 2
    c. Anti-HCV (anticuerpo del virus de la Hepatitis C)
    d. VDRL o prueba equivalente para sífilis
    e. Anticuerpo para CMV-IgM
    f. Anticuerpo para Toxoplasma gondii IgM
    g. HTLV-1 y 2
    h. Chagas
    i. Pruebas de esterilidad
    j. Pruebas de endotoxinas
    k. Pruebas de viabilidad celular
    l. Prueba para microplasma
    m. Historia de derivación
    n. Identidad celular

2. Todos los reactivos utilizados en la producción de células y sus productos deben tener los siguientes registros completos de control de calidad expedidos por el Ministerio de Salud:
    a. Toxicidad
    b. Pruebas de esterilidad
    c. Pruebas de endotoxinas
    d. Inmunoreactividad
3. Las Células Madre Autólogas, la Fracción Vascular Estromal y productos basados en células derivados de una persona no serán considerados como un fármaco si son utilizados en la misma persona y su uso será permitido. Las células cultivadas y las células primarias, así como sus productos, están incluidas en esta categoría.

    a. Las células madre autólogas pueden ser aisladas de tejido adiposo, médula ósea, sangre periférica, dientes, sangre y/o tejido de cordón umbilical, placenta, amnios, líquido amniótico, piel y otros tejidos del paciente o persona.

    b. Los productos basados en células autólogas incluyen fuentes biológicas autólogas como plasma rico en plaquetas, lisado de plaquetas y extractos de citoquinas derivados de las células de la misma persona o de un cultivo de las mismas.

    c. El uso de estas células y sus productos podría requerir de datos de seguridad preclínicos para conducir ensayos clínicos en caso que así se considere por el Comité Nacional de Ética de la Investigación. Cada nueva ruta de administración y cada nueva enfermedad tratada requieren datos preclínicos y un ensayo clínico aprobado por el Comité Nacional de Ética de la Investigación antes de su comercialización.

4. Células madre alogénicas y productos basados en estas células: Las células derivadas del cuerpo de otra persona serán reguladas en una categoría más alta de riesgo.

    a. Debe existir validación sobre una adecuada documentación sobre su adquisición, procesamiento, pruebas realizadas, caracterización, sistemas de gestión de calidad y de seguridad para el tipo de células o producto a base de células.

b. Debe existir prueba de que no producen una respuesta inmune. La inmunosupresión puede ser utilizada en casos de enfermedades serias que amenacen la vida, pero no para uso electivo, como aplicaciones cosmiátricas o en lesiones ortopédicas.

c. La caracterización de las células o del producto a base de células debe ser documentada, incluyendo datos de citometría de flujo de al menos un marcador de superficie del tipo de célula (es decir CD90, CD105, CD73 para células de mesénquima; CD34 para células hematopoyéticas).

d. Los extractos de células alogénicas deben ser procesados de manera que los alérgenos sean removidos, por medio de filtración, separación celular, centrifugación o una combinación de estas técnicas. Debe haber prueba y validez de que el producto es seguro y no contiene alérgenos. Estos productos no autólogos pueden ser usados en el tratamiento de enfermedades o en uso electivo, como en cosmiatría.

ARTÍCULO 8. Recolección y almacenamiento de cordón umbilical. Los siguientes puntos deben ser cumplidos al recolectar y almacenar sangre de cordón umbilical:

1. No provocar daños al donante.

2. El momento exacto de la recolección debe ser definido.

3. Los padres deben ser correctamente informados acerca de los posibles riesgos y beneficios.

4. Se debe obtener un consentimiento escrito firmado por la madre.

5. Se deben seguir los Procedimientos Operativos Reconocidos por el Ministerio de Salud para la recolección, transporte, procesamiento, almacenamiento y envío para el uso clínico de las células madre de cordón umbilical.

ARTÍCULO 9. Administración de células madre. La administración de células en seres humanos está limitada a las provenientes de seres humanos.

ARTÍCULO 10. Células madre embrionarias. Un embrión no puede ser creado sólo para el propósito de obtener células madre. Las células embrionarias no pueden ser utilizadas si para su uso se requiere la destrucción del embrión.

Las células derivadas de óvulos humanos clonados, como la transferencia de núcleos celulares de células somáticas, no podrán ser utilizadas en humanos.

ARTÍCULO 11. Células madre fetales. La terapia con células madre fetales no será permitida. La terminación de un embarazo no puede hacerse para obtener células madre fetales ni para obtener beneficio financiero o terapéutico.

ARTÍCULO 12. Células con modificaciones genéticas. La administración de células madre derivadas de células somáticas con alguna modificación genética, incluyendo células madre pluripotenciales inducidas o cualquiera célula con posibilidad de pluripotencialidad está en etapa experimental, por lo cual debe realizarse sólo cuando:

1. Haya extensa evidencia de modelos pre-clínicos de seguridad y eficacia.

2. La investigación se lleve a cabo como parte de un ensayo clínico bien diseñado y aprobado por el Comité Nacional de Ética de la Investigación.

3. Se han realizado las siguientes pruebas adicionales:

a. Cariotipo

PRESIDENCIA DE LA REPÚBLICA DE PANAMÁ
MINISTERIO DE LA PRESIDENCIA

b. Prueba de estabilidad cromosómica.

ARTÍCULO 13. Las líneas celulares permanentes y productos basados en células. El uso en humanos de productos derivados de líneas celulares permanentes producidas en cultivos que no han demostrado formación de tumor o anormalidades citogenéticas será permitido después de transcurrido al menos un año de cultivo celular y de realización de cariotipo. Las líneas celulares para comercialización deben estar registradas y aprobadas por el Comité Nacional de Ética de la Investigación.

ARTÍCULO 14. Manipulación celular. La manipulación de células madre es permitida si las siguientes normas son cumplidas:

1. Cultivo: El cultivo de células madre puede ser realizado con ingredientes basados en animales o aditivos, siempre y cuando estos ingredientes provengan de un país libre de casos de encefalopatía espongiforme bovina o de un lote certificado por la FDA.

2. Diferenciación: La diferenciación de células madre está permitida siempre y cuando se haya probado que el producto celular diferenciado no ha demostrado anormalidades citogenéticas, anormalidades en su ADN, expresión de oncogenes u otras anormalidades.

3. Modificación genética: La modificación genética de células madre debe obedecer las normas legales relacionadas a células madre y las normas de terapia genética vigentes en la República de Panamá.

4. Ingredientes añadidos: La adición de ingredientes como un antibiótico, un factor de crecimiento, una hormona o una droga a un producto de células madre debe tener como base una evidencia científica de su utilidad, o debe realizarse como parte de un ensayo clínico.

5. Manipulación física: Las manipulaciones físicas deben ser realizadas en el laboratorio para probar la viabilidad de las células con pruebas que demuestren más de setenta y cinco por ciento (75%) de viabilidad celular.

6. Etiquetado: Cada producto de células madre debe estar debidamente etiquetado y tener una adecuada ficha de datos de control de calidad. La etiqueta del producto debe incluir la pureza y características de las células, el volumen e ingredientes de la suspensión o solución que contiene, el número total de células, y la viabilidad de las células, además de los requisitos citados en las normas de ISO 13022: 2012.

7. Administración: la administración intravenosa de células madre autólogas y productos de células madre autólogas es permitida. La administración intravenosa de células madre alogénicas será permitida sólo bajo supervisión directa por un médico o enfermera(o).

Cualquier inyección directa invasiva de células madre o un producto de células madre debe ser efectuada por un médico especialista en el área. El paciente debe quedarse en observación bajo cuidado médico al menos una noche en el Centro de Atención Médica después de los procedimientos en donde haya riesgo tardío de sangrado, sepsis, o alguna otra complicación grave (por ejemplo taponamiento cardíaco). Lo anterior según criterio médico.

ARTÍCULO 15. Almacenamiento de células y tejidos. En caso de cese de actividad del Laboratorio de Células Madres, las células y tejidos preservados o almacenados deberán ser transferidos a otro establecimiento de tejidos debidamente autorizado por la República de Panamá. Esta transferencia debe ser garantizada mediante acuerdos previamente establecidos con otros establecimientos los cuales deben estar autorizados por el Ministerio de Salud.

ARTÍCULO 16. Comité de Ética de Células Madre. El Comité Nacional de Ética de la Investigación revisará los estudios con células madre y puede solicitar la asesoría de expertos en el campo de terapias con células madre calificados por entrenamiento y experiencia demostrada.

ARTÍCULO 17. Requerimientos y Normas para los Ensayos Clínicos. Todas las terapias con células madre deben proveer una apropiada evidencia de investigación clínica, incluyendo las científicas y su publicación en revistas científicas internacional e indexadas.

1. Los ensayos clínicos con células madre pueden ser iniciados por un investigador, una compañía, o una institución (por ejemplo un hospital, un gobierno o una universidad). El diseño del estudio, el tamaño de la muestra, la duración y otros aspectos del ensayo clínico deben ser aprobados por el Comité Nacional de Ética de la Investigación.
2. Para minimizar los riesgos se requieren estudios clínicos de seguridad.
3. Para uso homólogo o autólogo en enfermedades en donde la aleatorización no es ética o es imposible, o para uso autólogo de células madre, el estudio de seguridad puede ser eliminado con la aprobación del Comité Nacional de Ética de la Investigación.
4. Todos los ensayos clínicos deben también ser registrados en la página web del US NIH (clinicaltrials.gov) para facilitar la exposición mundial de las actividades de investigación en Panamá, y para calificar para futuras presentaciones de artículos en revistas científicas de renombre internacional.

ARTÍCULO 18. Soporte económico para investigación en el campo de células madre. El Estado panameño puede proveer apoyo financiero para la investigación en el campo de células madre.

ARTÍCULO 19. El presente Decreto Ejecutivo entrará a regir a partir de su promulgación.

COMUNÍQUESE Y CÚMPLASE,

Dado en la ciudad de Panamá a los 21 días del mes de Enero de dos mil trece (2013).

LEY 3
De 8 de febrero de 2010

General de trasplantes de componentes anatómicos

LA ASAMBLEA NACIONAL
DECRETA:

Título I
Materia y Alcance de la Ley

Capítulo I
Objeto, Ámbito de Aplicación y Definiciones

Artículo 1. El objeto de la presente Ley es ofrecer a toda persona que padezca una enfermedad que pueda ser mejorada o resuelta a través de un trasplante de componente anatómico la oportunidad de recibirlo, lo que permitirá mejorar su calidad de vida.

Artículo 2. Esta Ley tiene aplicación en todo el territorio de la República y regula todo lo relacionado con las actividades que incluyen donación, extracción, evaluación, procesamiento, preservación, almacenamiento, distribución y terapéutica de los componentes anatómicos.

Artículo 3. Para los efectos de la presente Ley, los siguientes términos se entenderán así:

1. *Almacenamiento.* Mantenimiento de los componentes anatómicos bajo condiciones controladas y apropiadas hasta su distribución.
2. *Banco de componente anatómico.* Entidad que se dedica a recibir, preservar, almacenar y disponer de componentes anatómicos que provengan de donantes.
3. *Célula.* Cada uno de los elementos microscópicos constituidos por protoplasmas y dotados de vida propia que según la teoría celular son las unidades morfológicas y fisiológicas que componen el cuerpo de todo ser vivo.
4. *Centro de extracción de componentes anatómicos de donante fallecido.* Centro hospitalario que, cumpliendo los requisitos especificados en la presente Ley, posee la autorización correspondiente para el desarrollo de la actividad de extracción de componente anatómico en donantes fallecidos.
5. *Centro de extracción de componentes anatómicos de donante vivo.* Centro hospitalario que, cumpliendo los requisitos especificados en esta Ley, posee la autorización correspondiente para el desarrollo de la actividad de extracción de componentes anatómicos en donantes vivos.
6. *Centro de trasplantes de componentes anatómicos.* Centro hospitalario que, cumpliendo los requisitos especificados en esta Ley, posee la autorización correspondiente para el desarrollo de la actividad de trasplantes de componente anatómico.
7. *Componentes anatómicos.* Órganos, tejidos, células y, en general, todas las partes que

constituyen un organismo.

8. *Donación.* Cesión gratuita y voluntaria de cualquier componente anatómico de origen humano para ser destinado a uso terapéutico en el cuerpo humano.

9. *Donación extraordinaria parcial.* Proceso mediante el cual los deudos de una persona fallecida ceden gratuita y voluntariamente una parte del cuerpo de esta para fines terapéuticos.

10. *Donación extraordinaria total.* Proceso mediante el cual los deudos de una persona fallecida ceden gratuita y voluntariamente la totalidad del cuerpo de esta para fines terapéuticos.

11. *Donación ordinaria parcial.* Dar en vida parte del cuerpo para ser utilizado con fines terapéuticos después de la muerte, de conformidad con la presente Ley.

12. *Donación ordinaria total.* Dar en vida la totalidad de su cuerpo para ser utilizado con fines terapéuticos después de la muerte, de conformidad con la presente Ley.

13. *Donante.* Persona que cede gratuita y voluntariamente componentes anatómicos para que sean utilizados de manera inmediata o diferida en otras personas con fines terapéuticos.

14. *Donante altruista.* Persona que en vida decide donar un componente anatómico a un receptor cuya identidad desconoce, haciéndolo de manera desinteresada y sin que medie compensación económica para que sea implantado de manera inmediata en un receptor en la Lista de Espera Nacional.

15. *Donante cruzado.* Donante que cuenta con un receptor relacionado no compatible y decide ceder un componente anatómico en donación para que, de manera recíproca, su receptor reciba un componente anatómico proveniente de un segundo donante no relacionado, pero compatible biológicamente en la misma situación. Este tipo de donación puede realizarse entre dos o más parejas.

16. *Donante fallecido.* Persona que, en vida, expresa su voluntad de que al morir se le extraigan componentes anatómicos de su cuerpo para donación, a fin de ser utilizados para trasplantes en otros seres humanos. También es donante fallecido quien, después de morir, sus deudos autorizan a que de su cuerpo se extraigan componentes anatómicos, con el propósito de ser utilizados para trasplantes en otras personas, con fines terapéuticos.

17. *Donante vivo no relacionado.* Cualquier otro donante vivo que no esté considerado en el numeral 18.

18. *Donante vivo relacionado.* Persona dentro del cuarto grado de consanguinidad o segundo de afinidad o en unión de hecho comprobada que, cumpliendo los requisitos establecidos en la ley, efectúe la donación en vida de componentes anatómicos cuya extracción sea compatible con la vida y cuya función pueda ser compensada por su organismo de forma adecuada y suficientemente segura.

19. *Extracción de componente anatómico.* Proceso por el cual se obtienen el componente o los componentes anatómicos de un donante para su posterior trasplante en uno o varios receptores.

20. *Fallecido.* Persona en la que se ha producido el cese irreversible de la función

encefálica, diagnosticada de conformidad con la presente Ley.

21. *Implantación diferida.* Trasplante realizado con componentes anatómicos, que previamente hayan sido destinados a un proceso de conservación por parte de un banco de componentes anatómicos.
22. *Implantación inmediata.* Trasplante de componentes anatómicos obtenidos de una persona viva o de un fallecido sin que previamente hayan sido destinados a conservación y utilización diferida por parte de un banco de componentes anatómicos.
23. *Muerte.* Cese irreversible de las funciones de todas las estructuras neurológicas intracraneales, tanto de los hemisferios centrales como del troncoencéfalo.
24. *Órgano.* Parte diferenciable del cuerpo humano constituida por diversos tejidos que mantiene su estructura, vascularización y capacidad para desarrollar funciones fisiológicas con un grado importante de autonomía y suficiencia.
25. *Paro cardiorrespiratorio.* Cese irreversible de la función cardiorrespiratoria tras el adecuado periodo de aplicación de maniobras de resucitación cardiopulmonar avanzada, constatada por la ausencia del pulso central por trazado electrocardiográfico y de ausencia respiratoria espontánea, ambos por un periodo de cinco minutos.
26. *Presunción legal de donación.* Se presume que un fallecido es donante si durante su vida no manifestó su oposición a serlo y si dentro de las seis horas después de realizado el diagnóstico de muerte encefálica o antes del inicio de la necropsia médico-legal sus deudos no expresan su oposición a la donación. En estos casos bastará con la prueba indiciaria de la condición de deudo. La presunción legal de donación no es aplicable a donante fallecido por parada cardiorrespiratoria.
27. *Receptor.* Persona que recibe el trasplante de un componente anatómico con fines terapéuticos.
28. *Tejido hematopoyético.* Tejido en que se forman las células sanguíneas nuevas. Sus fuentes pueden ser médula ósea, sangre periférica y sangre de cordón umbilical.
29. *Trasplante.* Utilización terapéutica de los componentes anatómicos de un donante a un receptor.
30. *Uso alogénico.* Proceso mediante el cual los tejidos hematopoyéticos o las células son extraídos de una persona y aplicados en otra.
31. *Uso autólogo.* Proceso mediante el cual se reemplazan componentes anatómicos en una persona por otros provenientes de su propio cuerpo.

Capítulo II

Protección al Donante y al Receptor

Artículo 4. La información relativa al donante y al receptor de componentes anatómicos humanos será recogida, tratada y custodiada en la más estricta confidencialidad por los centros hospitalarios, excepto cuando se sospeche la existencia de riesgos para la salud individual o colectiva.

Artículo 5. Las autoridades de salud a través de las instituciones públicas y privadas de salud, junto con la sociedad civil, promoverán campañas de información y educación a la población en materia de donación y trasplante, señalando su carácter voluntario, altruista, desinteresado y confidencial.

Artículo 6. Los procedimientos realizados en una institución pública de salud, relacionados a la extracción de componentes anatómicos, en ningún caso ocasionarán gastos para el donante vivo o para los familiares del fallecido, siempre que el trasplante se realice en una institución pública.

Artículo 7. Las instituciones públicas de salud en donde se efectúen trasplantes de componentes anatómicos asumirán los costos del procedimiento y de hospitalización del receptor que no cuente con recursos económicos, previa evaluación socioeconómica.

Artículo 8. Los costos de las intervenciones médico-quirúrgicas destinadas a la extracción de componentes anatómicos, así como los de su implantación posterior estarán sujetos a previo acuerdo entre el equipo de trasplantes y el receptor del componente anatómico donado, cuando se realice en un centro hospitalario privado.

Artículo 9. El Ministerio de Salud establecerá los procedimientos para la extracción de componentes anatómicos de donante fallecido que se efectúe en instituciones privadas de salud autorizadas.

Artículo 10. Al donante de componente anatómico que sea asegurado de la Caja de Seguro Social se le otorgará licencia con sueldo completo por el tiempo que el médico tratante determine sea necesario para su recuperación y no será sujeto de destitución por la donación.

Capítulo III
Disposiciones Fundamentales

Artículo 11. La muerte de una persona ocurre cuando se verifique de modo preciso la inactividad encefálica, corroborada por medios clínicos o técnicos de acuerdo con las diversas situaciones clínicas.

La verificación de la inactividad encefálica no será necesaria en caso de paro cardiorrespiratorio total e irreversible.

Artículo 12. El diagnóstico de muerte encefálica deberá ser constatado por dos o más médicos no interdependientes, que no formen parte del equipo extractor o trasplantador, quienes deberán ser especialistas idóneos en neurología, neurocirugía, medicina interna, medicina crítica o urgenciología. Las actuaciones médicas sobre el particular serán escritas en la historia clínica, con indicación de la fecha y hora de la muerte, dejando constancia del diagnóstico definitivo, y se firmará el certificado de defunción correspondiente.

El paro cardiorrespiratorio deberá ser constatado por dos o más médicos idóneos no interdependientes, que no formen parte del equipo extractor o trasplantador. Las actuaciones médicas sobre el particular serán escritas en la historia clínica, dejando constancia del diagnóstico definitivo.

Artículo 13. Cuando la muerte haya sido diagnosticada con sujeción a las disposiciones de la presente Ley, podrán realizarse procedimientos de perfusión asistida por medios artificiales, con el fin de mantener en óptimas condiciones los componentes anatómicos que estén destinados para trasplantes. Tales métodos podrán ser mantenidos aun durante los procedimientos de extracción de los componentes anatómicos.

La viabilidad de los componentes anatómicos mantenidos por la perfusión prevista en este artículo no desvirtúa la condición de fallecido, según se define en la presente Ley.

Artículo 14. El personal de salud deberá notificar a la coordinación hospitalaria de trasplantes la existencia de pacientes con diagnóstico de muerte encefálica en los cuartos de urgencias y unidades de cuidados intensivos del país.

Artículo 15. El Ministerio de Salud regulará las actividades de extracción, preservación, almacenamiento y procesamiento de componentes anatómicos extraídos de donantes.

Artículo 16. El trasplante de componentes anatómicos se realizará en toda persona que lo requiera luego de haber sido evaluada por el grupo médico trasplantador y que se haya dictaminado que el trasplante es la medida terapéutica más conveniente o vital para esta persona.

Artículo 17. El trasplante de componentes anatómicos provenientes de un donante fallecido se efectuará a nacionales, como primera opción, que formen parte de la Lista de Espera Nacional. En caso de ausencia de receptores nacionales, el componente anatómico será ofrecido a residentes extranjeros que estén en la Lista.

Artículo 18. El Ministerio de Salud autorizará la entrada o salida del país de componentes anatómicos provenientes de donantes fallecidos, siempre que existan acuerdos bilaterales con el Ministerio de Salud de cada país, para lo cual se cumplirán los siguientes criterios:

1. Entrada de componentes anatómicos a Panamá. El Ministerio de Salud admitirá la entrada de componentes anatómicos siempre que esta se efectúe a través de la conexión con una organización de intercambio de componentes anatómicos legalmente reconocida en el país de origen. Además, deberá constatarse que el componente anatómico reúne las garantías éticas y sanitarias exigibles en Panamá y que concurran las siguientes circunstancias:
    a. Que exista un receptor que tenga la misma nacionalidad del donante fallecido o, en su defecto, un receptor en la Lista de Espera Nacional.
    b. Que se disponga de un informe del centro extractor extranjero en el que consten los

estudios efectuados al donante, que demuestren la condición óptima del componente anatómico y la ausencia de enfermedad transmisible, susceptible de constituir un riesgo para el receptor.

2. Salida de componentes anatómicos de Panamá. El Ministerio de Salud admitirá la salida de componentes anatómicos siempre que estos sean para panameños en el extranjero y se efectúe a través de la conexión con una organización de intercambio de componentes anatómicos legalmente reconocida en el país de destino. Además, deberá constatarse que concurran las siguientes circunstancias:
   a. Que no exista receptor adecuado en Panamá.
   b. Que exista un receptor adecuado en el país de destino, siendo un panameño la primera opción.

Artículo 19. Para los efectos de esta Ley, cuando deba expresarse el consentimiento, como deudo de la persona fallecida o en otra condición, sin discriminación de sexo, se tendrá en cuenta en el siguiente orden:

1. El cónyuge o la cónyuge.
2. Los hijos e hijas.
3. El padre y la madre.
4. Los hermanos y hermanas.
5. Los abuelos y abuelas y, en su defecto, los nietos y nietas.
6. Los parientes consanguíneos en línea colateral hasta el tercer grado y los parientes afines hasta el segundo grado.

Cuando a personas ubicadas dentro del mismo numeral de este artículo corresponda expresar su consentimiento, en ausencia de otras con mayor derecho dentro del orden aquí señalado, y manifiesten su voluntad opuesta, prevalecerá la de la mayoría. En caso de empate, se entenderá aceptado el consentimiento.

Para los efectos de donación formal o para ejercer el derecho de oponerse, serán tomados en cuenta los deudos que se presenten y acrediten su condición como tales, dentro del lapso de las seis horas, de acuerdo con el numeral 26 del artículo 3 de la presente Ley.

Artículo 20. Los centros hospitalarios y similares autorizados por el Ministerio de Salud podrán disponer de los componentes anatómicos de los fallecidos no reclamados para fines docentes o de investigación.

Para los efectos del presente artículo, las respectivas autoridades del Ministerio de Salud y/o Ministerio Público determinarán, de acuerdo con las disposiciones legales y los reglamentos de dichas instituciones, el procedimiento para que las entidades autorizadas puedan disponer de las personas fallecidas no reclamadas.

Título II
Donación y Destino de Componentes Anatómicos

Capítulo I
Formas de Donación y Asignación de Componentes Anatómicos

Artículo 21. Los componentes anatómicos solo podrán ser extraídos y utilizados para fines de trasplantes en las siguientes formas de donación:

1. Donación formal, para su implantación inmediata, donado por una persona viva, siempre que no se comprometa su vida.
2. Donación formal, para su implantación diferida, con destino a un banco de componentes anatómicos cuando la donación sea realizada por una persona viva para que tenga efecto después de su muerte.
3. Presunción legal de donación, de conformidad con el numeral 26 del artículo 3 de la presente Ley.

Artículo 22. Para utilizar los componentes anatómicos con fines terapéuticos procedentes de un banco de componentes anatómicos se requiere:

1. Solicitud escrita, presentada conjuntamente por una autoridad médica representativa del centro hospitalario donde se practicará la intervención quirúrgica de trasplante o por el profesional médico, jefe del equipo que lo realizará, especificando claramente el tipo de componentes anatómicos solicitado.
2. Acompañar la solicitud con una copia de la historia clínica del receptor o, en su defecto, con un resumen que incluya información especializada sobre sus antecedentes clínicos patológicos y la necesidad de practicar el trasplante correspondiente.
3. Suscribir un compromiso formal de remitir al banco copia autenticada del protocolo quirúrgico de la operación de trasplante que incluya el resultado del examen anatomopatológico correspondiente del componente anatómico extraído del receptor, si lo hubiera, así como de suministrar la información sobre el seguimiento del caso y su resultado final.

La autenticación a que se refiere este numeral deberá ser hecha por el director del centro hospitalario en donde se practicó la intervención quirúrgica de trasplante o, en su defecto, por el director médico de los servicios de cirugía.

Artículo 23. Los componentes anatómicos para fines terapéuticos que procedan de un banco de componentes anatómicos o para su implantación inmediata se destinarán de acuerdo con los siguientes criterios:

1. Los casos de urgencia en los cuales el trasplante sea vital.
2. Que exista la mejor histocompatibilidad del donante con el receptor.
3. Tiempo de espera, edad pediátrica o antecedentes de donación previa, de acuerdo con el protocolo de cada programa de trasplante.

Capítulo II
Extracción de Componentes Anatómicos de Donante Vivo

Artículo 24. La extracción de componentes anatómicos procedentes de donantes vivos relacionados para su posterior trasplante podrá realizarse si se cumplen las siguientes condiciones y requisitos:

1. El donante debe ser mayor de edad, gozar de plenas facultades físicas y mentales.
2. El donante debe estar dentro del cuarto grado de consanguinidad o segundo de afinidad, en relación con el receptor. La afinidad cuando se refiera a la pareja debe estar determinada por el matrimonio o la unión libre consensuada válida o mantenida por más de cinco años, certificada por el alcalde o un notario.
3. El donante será informado previamente de las consecuencias de su decisión, debiendo otorgar su consentimiento de forma expresa, libre, consciente y desinteresada.
4. Debe tratarse de un componente anatómico o parte de él, cuya extracción sea compatible con la vida, cuya función pueda ser compensada por el organismo del donante de forma adecuada y suficientemente segura, y tenga por objeto un trasplante a una persona determinada con el propósito de mejorar sustancialmente su pronóstico vital o sus condiciones de vida.
5. El donante debe haber sido previamente informado sobre las consecuencias de su decisión, en cuanto pueden ser previsibles desde el punto de vista somático y sicológico, y sobre las eventuales repercusiones que la donación pueda tener sobre su vida personal, familiar y profesional, así como sobre los beneficios que con el trasplante se esperan para el receptor.
6. El donante, en el momento de la extracción, no debe padecer enfermedad susceptible de ser agravada por la extracción del componente anatómico donado y, si es mujer, no debe estar en estado de gravidez.
7. No debe existir compensación económica, ni en dinero ni en especie, por los componentes anatómicos donados, sin perjuicio de la protección que esta Ley le confiere a los donantes.
8. No podrá realizarse la extracción de componentes anatómicos a menores de edad, excepto cuando se trate de trasplante de tejidos hematopoyéticos o de células humanas.
9. Los privados de libertad solo podrán donar componentes anatómicos a sus familiares dentro del segundo grado de consanguinidad y primero de afinidad.

Artículo 25. El estado de salud mental del donante debe ser certificado por un médico siquiatra distinto al que forma parte del equipo médico de extracción o trasplante, quien informará sobre los riesgos inherentes a la intervención, las consecuencias previsibles de orden somático o sicológico, las repercusiones que pueda suponer en su vida personal, familiar o profesional, así como sobre los beneficios que con el trasplante reciba el receptor.

Artículo 26. Para proceder a la extracción de componentes anatómicos de donante vivo, el interesado deberá otorgar por escrito su consentimiento expreso, tras las explicaciones del médico responsable de la extracción o el trasplante.

Artículo 27. Entre la firma del documento de cesión de componentes anatómicos y la extracción de estos deberán transcurrir al menos veinticuatro horas. El donante podrá revocar su consentimiento en cualquier momento antes de la intervención sin sujeción a formalidad alguna. Dicha revocación no podrá dar lugar a ningún tipo de indemnización.

Artículo 28. La extracción de componentes anatómicos procedentes de donantes vivos solo podrá realizarse en los centros hospitalarios expresamente autorizados para ello. Deberá facilitarse al donante vivo asistencia médica para su restablecimiento.

Artículo 29. La donación de componentes anatómicos no genera derecho a indemnización para el donante o sus causahabientes.

Artículo 30. La extracción de componentes anatómicos procedentes de donantes vivos no relacionados se aplicará a la figura del donante cruzado y la del donante altruista, previa autorización del Ministerio de Salud. La extracción de componentes anatómicos procedentes de donante vivo no relacionado para su trasplante inmediato deberá cumplir con los requisitos establecidos en el artículo 24, excepto su numeral 2.

Capítulo III
Extracción de Componentes Anatómicos de Donante Fallecido

Artículo 31. Producida la muerte de una persona en los términos de la presente Ley y expedido su certificado de defunción, siempre que exista donación previa, abandono de fallecido o presunción legal de donación, se podrá disponer de todos o parte de sus componentes anatómicos aprovechables.

Por ningún motivo se podrá abandonar la atención del donante o extraer alguno de sus componentes anatómicos, sino hasta cuando la muerte le haya sido diagnosticada y registrada en la historia clínica.

Artículo 32. Las instituciones o los centros hospitalarios autorizados para efectuar trasplantes llevarán un archivo especial sobre los antecedentes clínicos patológicos de los donantes y de los componentes anatómicos provenientes de otro país. Cuando no fuera posible conocer tales antecedentes, el componente anatómico será rechazado.

Artículo 33. Es obligatorio que toda institución hospitalaria consigne en los documentos de admisión y en la historia clínica si el paciente es donante.

Artículo 34. La oposición a la donación que corresponda a la voluntad de los deudos de una persona deberá hacerse dentro de las seis horas siguientes al diagnóstico de muerte.

Artículo 35. La donación parcial o total podrá hacerse en un banco de componentes anatómicos autorizado, teniendo en cuenta el tipo de donación y la naturaleza de la licencia de funcionamiento que el Ministerio de Salud le haya otorgado.

Artículo 36. La donación ordinaria o extraordinaria de componentes anatómicos total o parcial deberá ser expresada en alguno de los siguientes documentos:

1. Historial clínico.
2. Declaración jurada ante un notario público.
3. Documento privado autenticado por un notario público.
4. Documento suscrito ante dos testigos hábiles.

El donante podrá revocar su decisión en cualquier tiempo utilizando alguno de los documentos señalados y su voluntad prevalecerá sobre el parecer contrario de sus deudos o de cualquier otra persona.

Artículo 37. Quienes hayan sido los representantes legales de los menores de edad o de las personas con discapacidad fallecidos podrán autorizar la donación o rechazarla.

Artículo 38. Siempre que se pretenda proceder a la extracción de componentes anatómicos de donante fallecido en un centro autorizado, la persona a quien corresponda dar la autorización para la extracción deberá verificar la información sobre si el donante hizo patente su voluntad en alguno de los documentos señalados en el artículo 36 de la presente Ley.

Artículo 39. La extracción de componentes anatómicos de un donante fallecido para fines terapéuticos será efectuada por los médicos que integren el equipo médico de extracción. De la intervención se levantará un acta suscrita por los médicos participantes, en la cual se dejará constancia de los componentes anatómicos extraídos.

En los registros clínicos correspondientes se dejará expresa constancia de que al donante fallecido y al receptor se les practicaron las pruebas inmunológicas correspondientes.

Artículo 40. La remoción de los componentes anatómicos se realizará de manera que no se produzcan mutilaciones innecesarias.

Cuando se practiquen enucleaciones de los globos oculares estos serán reemplazados por prótesis fungibles.

Artículo 41. La extracción de tejido ocular, piel y vasos periféricos de un donante fallecido podrá hacerse en lugar distinto al señalado en el artículo 38 de esta Ley, previa expedición del correspondiente certificado de defunción o la autorización para la práctica de necropsia médico-legal. Los procedimientos de extracción de componentes anatómicos a los cuales se

refiere el presente artículo serán practicados por médicos idóneos o profesionales técnicos en la materia.

Artículo 42. En los casos de que un donante muera traumática, violenta, repentina o súbitamente se efectuarán las técnicas de preservación para asegurar la viabilidad de los componentes anatómicos. La autoridad competente autorizará la extracción previo informe y explicación del médico forense, siempre que no se contamine el resultado de la instrucción sumarial.

Artículo 43. Los componentes anatómicos que se obtengan de donantes fallecidos sometidos a necropsias médico-legales solo podrán ser utilizados para fines terapéuticos o científicos y estarán destinados a los bancos de componentes anatómicos autorizados, siempre que se hayan inscrito ante las respectivas dependencias del Instituto de Medicina Legal y Ciencias Forenses.

Capítulo IV
Trasplante de Componentes Anatómicos de Donante Vivo

Artículo 44. El trasplante de componentes anatómicos de donante vivo requiere:

1. Que se cumplan las formas de donación señaladas en el artículo 21 de esta Ley.
2. Que tanto el donante como el receptor hayan sido previamente advertidos de los riesgos que pueden existir en el procedimiento y la imposibilidad de conocer situaciones imprevistas.
3. Que, en caso de trasplante de un órgano par, los dos órganos del donante sean anatómica y fisiológicamente normales.
4. Que, en caso de la donación de una porción de un órgano impar, el órgano restante del donante supla su función y sea compatible con su vida.
5. Que tanto al receptor como al donante le hayan realizado e informado de los resultados de los estudios inmunológicos u otros procedentes para el caso, entre donante y futuro receptor, llevados a cabo por un laboratorio de histocompatibilidad cuyo funcionamiento, métodos y detección inmunológica estén autorizados por el Ministerio de Salud, o dependa de una entidad hospitalaria autorizada para la práctica del trasplante correspondiente.
6. Que el receptor exprese por escrito su consentimiento para la realización del trasplante, si se trata de una persona mayor de edad.
7. Si el receptor fuera menor de edad, en curatela o en interdicción, el consentimiento deberá ser expresado por escrito por sus representantes legales. Cuando se trate de casos de urgencia y el consentimiento no pueda expresarse en la forma indicada, se procederá de conformidad con el artículo 16 de esta Ley.

Título III
Tejidos Hematopoyéticos y Células Humanas

Capítulo I
Selección y Procedimientos de Extracción

Artículo 45. La extracción de tejidos hematopoyéticos o de células se llevará a cabo de forma que garantice que la evaluación y selección de los donantes se realiza de acuerdo con los requisitos especificados en esta Ley.

Artículo 46. La aplicación de criterios de selección y evaluación estará basada en el análisis de la valoración de los riesgos en relación con el uso específico del tejido hematopoyético o el grupo celular.

Artículo 47. En caso de que el tejido hematopoyético o las células obtenidas vayan a ser enviadas a otro banco de componentes anatómicos o institución hospitalaria para su procesamiento, este podrá encargarse de completar la evaluación y selección del tejido hematopoyético o de las células.

Artículo 48. El procedimiento de extracción se realizará en los siguientes términos:

1. La extracción del tejido hematopoyético o de células deberá realizarse mediante procedimientos operativos estandarizados debidamente documentados y validados que sean adecuados para el grupo celular que se va a extraer, que garanticen calidad y seguridad y respeten su integridad.
2. El procedimiento de extracción deberá ser el adecuado para proteger debidamente aquellas propiedades de las células que son necesarias para su uso clínico, a la vez que se minimizarán los riesgos de contaminación microbiológica.
3. El procedimiento de extracción, empaquetado, etiquetado, mantenimiento y transporte hasta dicho centro deberá constar en un documento acordado entre la unidad de extracción y la institución de recepción.

Capítulo II
Procesamiento, Trazabilidad y Biovigilancia
de Tejido Hematopoyético o de Células Humanas

Artículo 49. Las actividades de procesamiento que se realicen en las instituciones hospitalarias o bancos de componentes anatómicos tendrán por objeto la preparación, preservación y almacenamiento de tejidos hematopoyéticos o de células para su uso clínico, tanto autólogo como alogénico, en procedimientos terapéuticos con indicaciones médicas establecidas o en procedimientos de aplicación en humanos en casos de utilidad y eficacia debidamente contrastada, o en procedimientos de investigación clínica debidamente documentada.

Artículo 50. La institución hospitalaria o banco de componentes anatómicos incluirá en sus manuales de procedimientos toda actividad de procesamiento de tejido hematopoyético o de

células y velará para que se realice en condiciones controladas. Se verificará que el equipo utilizado, el entorno de trabajo y la concepción, validación y condiciones de control de los procesos se ajusten a los requisitos exigidos por el Ministerio de Salud.

Artículo 51. Los tejidos hematopoyéticos o las células almacenadas estarán a disposición de los centros o unidades hospitalarias para usos alogénicos en procedimientos terapéuticos con indicaciones médicas establecidas en receptores adecuados.

Artículo 52. El Ministerio de Salud autorizará la entrada y salida del país de las células y tejidos hematopoyéticos de acuerdo con los siguientes criterios:

1. Se autorizará la salida de células y tejidos hematopoyéticos si concurren las siguientes circunstancias:
   a. Que haya disponibilidad suficiente de células y/o tejidos hematopoyéticos en los bancos de componentes anatómicos nacionales.
   b. Que exista un receptor adecuado en el país de destino.
2. Se autorizará el ingreso de células y/o tejidos hematopoyéticos cuando se cumplan las siguientes condiciones:
   a. Que exista un probado beneficio en la utilización de los tejidos hematopoyéticos y de las células que se pretenden aplicar.
   b. Que la finalidad de la entrada de los tejidos y/o células hematopoyéticas sea la utilización terapéutica en seres humanos.
   c. Que exista receptor adecuado en Panamá.
   d. Que no exista disponibilidad en los bancos de componentes anatómicos del país.
   e. Que se especifique la institución de destino.
   f. Que el banco de componentes anatómicos o el centro extractor extranjero presenten un informe donde hagan constar los estudios efectuados al donante, necesarios para demostrar las condiciones óptimas del componente anatómico y la ausencia de enfermedad transmisible, susceptible de constituir un riesgo para el receptor.
   g. Que reúnan las condiciones sanitarias exigibles en Panamá.

Artículo 53. En el caso de que el banco de componentes anatómicos o institución hospitalaria que ha procesado y almacenado las células no disponga de la infraestructura necesaria para una completa tipificación de las células que permita establecer compatibilidades e idoneidades cuando sea preciso, deberá enviar una muestra a otro establecimiento debidamente autorizado que sí esté dotado de la infraestructura adecuada y que se constituirá en establecimiento de referencia.

Artículo 54. La aplicación autóloga quedará encuadrada en el caso de procedimientos terapéuticos de eficacia demostrada en indicaciones médicas establecidas.

En el caso de que se realicen actividades de procesamiento para usos autólogos eventuales de los que no hay indicación médica establecida actual, los tejidos hematopoyéticos o las células así procesadas estarán disponibles para su aplicación alogénica.

Artículo 55. La solicitud para requerir un tejido hematopoyético o grupo celular a un banco de componentes anatómicos la efectuará el responsable de la aplicación a través del centro hospitalario que realizará la intervención. De no presentarse copia de la autorización correspondiente, esta será rechazada.

Artículo 56. Se establecerá un sistema de rastreo de origen y destino de todas las células humanas obtenidas con la finalidad de ser aplicadas en humanos.

Artículo 57. Los bancos de componentes anatómicos y las instituciones hospitalarias recogerán la información del destino de los tejidos hematopoyéticos o las células para la aplicación en humanos. Dicha información deberá ser facilitada por los bancos de componentes anatómicos o por las instituciones hospitalarias y enviada al Registro Nacional de Trasplantes para cada caso en particular, con el fin de asegurar la trazabilidad de los tejidos hematopoyéticos o las células.

Artículo 58. El rastreo de origen y destino se aplicará a los productos celulares y a los productos o materiales que entren en contacto con dichas células y tejidos hematopoyéticos y puedan tener efecto sobre su calidad y seguridad. La información se guardará y custodiará de forma segura durante al menos treinta años a partir de su codificación.

Artículo 59. Se establecerá un sistema único y obligatorio de codificación compatible con los sistemas de otros centros hospitalarios que permita identificar de forma única e inequívoca los tejidos hematopoyéticos o células obtenidos, procesados y distribuidos para su aplicación en humanos y se desarrollará igualmente un sistema técnico que sirva de soporte al sistema de codificación.

Artículo 60. A partir de la entrada en vigencia de la presente Ley, funcionará un sistema de biovigilancia que permita notificar, registrar y transmitir los efectos y reacciones adversas graves que puedan haber influido o influir en la calidad y seguridad de los tejidos hematopoyéticos o las células y que pudieran atribuírsele a los procesos de extracción, evaluación, procesamiento y distribución, así como toda reacción adversa grave observada durante o a raíz de la aplicación clínica de los tejidos hematopoyéticos o las células y que pudiera estar relacionada con su calidad y seguridad.

Título IV
Licencias Sanitarias

Capítulo I
Licencias Sanitarias

Artículo 61. El Ministerio de Salud expedirá, renovará o revocará mediante resolución motivada las siguientes licencias sanitarias de funcionamiento:

1. Para bancos de componentes anatómicos.
2. Para los centros de extracción de componentes anatómicos de donante fallecido.
3. Para los centros de extracción y trasplantes de componentes anatómicos de donante vivo.

Artículo 62. Las licencias sanitarias de funcionamiento de centros de extracción y/o trasplantes expedidas a establecimientos asistenciales u hospitalarios solo podrán desarrollar actividades conforme a la licencia sanitaria que les fue otorgada.

Las licencias sanitarias de funcionamiento que se otorguen a los bancos de componentes anatómicos no comprenden la autorización para realizar procedimientos de trasplantes ni extracción de componentes anatómicos.

Artículo 63. Para solicitar la expedición o renovación de las licencias sanitarias, se requerirá:

1. Solicitud por duplicado presentada por el interesado, en forma personal o mediante apoderado, ante el Ministerio de Salud, precisando el tipo de licencia que se tramita.
2. Nombre o razón social de la entidad solicitante con prueba adjunta de su existencia legal.
3. Número y fecha de la licencia sanitaria correspondiente del centro hospitalario autorizado.
4. Nombre y dirección del representante legal de la entidad solicitante.
5. Dirección o ubicación de la sede de la entidad solicitante.
6. Descripción de las características de la infraestructura de la entidad, así como su naturaleza jurídica, sus objetivos, disponibilidades técnica, científica y humana, precisando las funciones y demás datos relacionados con el personal profesional o técnico, incluyendo su grado de capacitación.
7. Indicación del centro hospitalario al cual está vinculado, si la licencia se solicita para un banco de componentes anatómicos.
8. Especificación de los tipos de trasplantes que se realizarán en el centro, si la licencia se solicita para la práctica de trasplantes en los centros extractores y trasplantadores.
9. Nombres del personal médico, enfermeras, técnicos en enfermería y laboratoristas responsables de los procedimientos en el centro extractor y/o trasplantador, así como su acreditación correspondiente.
10. Protocolos correspondientes de acuerdo con el centro hospitalario que desarrolle estas actividades.
11. Cualquier otro que determine el Ministerio de Salud.

Artículo 64. El Ministerio de Salud determinará los requisitos que debe reunir el personal que integra el equipo médico-quirúrgico y técnico de trasplantes, así como la infraestructura indispensable de los centros a los que se les haya expedido la licencia sanitaria.

Artículo 65. La licencia sanitaria para la práctica de extracción y/o trasplante de componentes anatómicos que expida el Ministerio de Salud indicará las intervenciones o los tipos de trasplantes que pueden practicar.

Artículo 66. Recibida la solicitud, si se encuentra completa la documentación, el Ministerio de Salud ordenará la práctica de una visita de inspección al establecimiento solicitante, con el objeto de constatar las condiciones físicas y técnicas del establecimiento de salud para el funcionamiento como centro extractor y/o trasplantador, así como el cumplimiento de las obligaciones establecidas en los artículos 72, 73 y 76 de la presente Ley.

Artículo 67. Las resoluciones mediante las cuales se conceden o niegan las licencias sanitarias son susceptibles de los recursos que señala la ley.

Artículo 68. Las licencias sanitarias se otorgarán por periodos de cinco años, contados a partir de la fecha de ejecutoria de la resolución de otorgamiento respectivo, y podrán renovarse por periodos iguales previa solicitud de renovación con no menos de noventa días hábiles de antelación a la fecha de vencimiento, siempre que no haya sido revocada.

Artículo 69. Las instituciones hospitalarias y los bancos de componentes anatómicos que, al entrar en vigencia la presente Ley, tengan licencias de funcionamiento para realizar trasplantes o para funcionar como bancos de componentes anatómicos mantendrán sus licencias, de conformidad con esta Ley.

Artículo 70. Vencida una licencia sanitaria, su titular podrá solicitar la renovación o la expedición de otro tipo de licencia sanitaria, de conformidad con los requisitos señalados en esta Ley.

Título V
Bancos, Centros de Extracción y/o de Trasplantes de Componentes Anatómicos

Capítulo I
Bancos de Componentes Anatómicos

Artículo 71. Se establecerán bancos de componentes anatómicos que hayan obtenido la correspondiente licencia de funcionamiento del Ministerio de Salud que se dedicarán a recibir, procesar, preservar, almacenar, transportar y distribuir los componentes anatómicos para su posterior trasplante.

Artículo 72. Los bancos de componentes anatómicos públicos o privados autorizados por el Ministerio de Salud deberán:

1. Contar con una organización y un régimen de funcionamiento que permita cumplir con las funciones para las cuales fueron autorizados.
2. Establecer una unidad de coordinación con los centros hospitalarios de trasplantes hasta que los componentes anatómicos sean requeridos para el trasplante.
3. Disponer del personal técnico y administrativo idóneo para mantener, almacenar, preservar y distribuir los componentes anatómicos que tienen bajo su responsabilidad.
4. Mantener en buenas condiciones las instalaciones y estructuras físicas adecuadas para almacenar, preservar y transportar los componentes anatómicos.

Capítulo II
Centros de Extracción de Componentes Anatómicos de Donante Fallecido

Artículo 73. La extracción de componentes anatómicos de donante fallecido solo podrá realizarse en centros hospitalarios públicos o privados que hayan sido expresamente autorizados por el Ministerio de Salud. Los centros de extracción de componentes anatómicos de donante fallecido deberán:

1. Contar con una organización y un régimen de funcionamiento que permita asegurar la ejecución de las operaciones de extracción de forma satisfactoria.
2. Establecer una unidad de coordinación con los bancos de componentes anatómicos y con los centros hospitalarios de trasplantes.
3. Disponer del personal idóneo, médicos, enfermeras, laboratoristas y técnicos en enfermería, con acreditación en extracción de componentes anatómicos.
4. Disponer de las instalaciones físicas y de un laboratorio clínico para la realización de los exámenes clínicos que se consideren necesarios para la evaluación clínica del donante fallecido y la correcta realización de las extracciones.
5. Contar con el apoyo de un laboratorio de histocompatibilidad debidamente autorizado por el Ministerio de Salud.
6. Proporcionar al Ministerio de Salud toda la información que les sea solicitada en relación con la actividad para la cual hayan sido autorizados.

Artículo 74. Cualquier tipo de modificación que se produzca en las instalaciones hospitalarias o en el funcionamiento del centro extractor de componentes anatómicos deberá ser notificado al Ministerio de Salud para que, luego de su revisión, se proceda a mantener la autorización o a su revocación considerando la trascendencia de la modificación, aun cuando no hubiera vencido el periodo de vigencia.

Artículo 75. Los centros hospitalarios autorizados para la extracción de componentes anatómicos de donante fallecido adoptarán las medidas necesarias a fin de garantizar que los deudos tengan pleno conocimiento de la regulación sobre donación y extracción del componente anatómico.

Capítulo III
Centros de Extracción y Trasplantes
de Componentes Anatómicos de Donante Vivo

Artículo 76. Los centros de extracción y trasplantes de componentes anatómicos, sean instituciones hospitalarias públicas o privadas, que hayan sido expresamente autorizados por el Ministerio de Salud deberán:

1. Garantizar la viabilidad y calidad del programa de trasplante en las actividades que desarrollen.
2. Disponer de los servicios que garanticen la realización de la intervención quirúrgica, el tratamiento y manejo de las eventuales complicaciones que presente el trasplante.
3. Disponer del personal idóneo con acreditación en extracción y trasplante, médicos, enfermeras y técnicos en enfermería.
4. Mantener en buenas condiciones las instalaciones físicas, los medios técnicos, los materiales necesarios y los servicios sanitarios que garanticen el proceso de trasplante.
5. Disponer de un servicio de patología con los medios técnicos y recurso humano idóneo para los estudios asociados al trasplante.
6. Disponer de un laboratorio clínico y de histocompatibilidad autorizado por el Ministerio de Salud, que cuente con los recursos técnicos y humanos necesarios para garantizar la realización de los estudios inmunológicos.
7. Establecer una Comisión de Trasplante Hospitalaria que asegure la selección de los receptores y el seguimiento de todo el proceso terapéutico.
8. Mantener registro de acceso restringido y confidencial de los trasplantes realizados en el que consten los datos precisos para la identificación del donante y del receptor, de forma que permita el seguimiento de los componentes anatómicos trasplantados en el centro, así como los resultados obtenidos.
9. Presentar informe periódico y detallado al Ministerio de Salud relacionado con las actividades para las cuales hayan sido autorizados.

Los centros médicos y quirúrgicos involucrados en los diferentes tipos de trasplantes se adecuarán, en todo momento, a los progresos científicos existentes en la materia y seguirán protocolos diagnósticos y terapéuticos actualizados, de acuerdo con la práctica médica generalmente aceptada.

Artículo 77. Cualquier tipo de modificación que se produzca en las instalaciones hospitalarias o en el funcionamiento del centro extractor y trasplantador de componentes anatómicos debe ser notificado al Ministerio de Salud para que, luego de su revisión, se proceda a mantener la autorización o a su revocación considerando la trascendencia de la modificación, aun cuando no hubiera vencido el periodo de vigencia.

Título VI
Organización

Capítulo I
Organización Panameña de Trasplantes

Artículo 78. Se crea la Organización Panameña de Trasplantes, adscrita al Ministerio de Salud, como la unidad técnica operativa que, siguiendo los principios de cooperación, eficacia, equidad, calidad y solidaridad, tiene como finalidad trabajar con el sistema de salud panameño, a fin de coordinar las actividades de promoción, donación, extracción, preservación, distribución, intercambio y trasplante de componentes anatómicos.

Artículo 79. La Organización Panameña de Trasplantes reemplazará a cualquiera otra organización creada previamente con fines similares.

Artículo 80. La Organización Panameña de Trasplantes tendrá las siguientes funciones:

1. Crear las coordinaciones hospitalarias de trasplantes a nivel nacional donde no las hubiera y desarrollar las existentes, las cuales conformarán una red nacional de donación de componentes anatómicos.
2. Seleccionar, designar y supervisar la labor de los coordinadores de trasplantes y del coordinador hospitalario de trasplantes.
3. Velar por la adecuada organización, funcionamiento y desarrollo de todos los programas de trasplantes de componentes anatómicos, cada uno de los cuales será dirigido por un médico especialista acreditado en trasplantes.
4. Coordinar la distribución de componentes anatómicos para trasplantes a nivel nacional.
5. Llevar el Registro Nacional de Donantes.
6. Actualizar el Registro Nacional de Trasplantes, que mantendrá los datos de origen y destino de componentes anatómicos a nivel nacional en las instituciones de salud públicas y privadas, así como la de los organismos internacionales.
7. Actualizar la Lista de Espera Nacional de trasplantes de componentes anatómicos en coordinación con los diferentes programas de trasplante.
8. Coordinar la logística del transporte de personal, equipo y de componentes anatómicos para trasplante, por lo que gestionará la ayuda de las entidades del Estado respectivamente.
9. Establecer los controles de seguridad y calidad de los componentes anatómicos obtenidos para trasplante.
10. Informar y promover las actividades relacionadas con la donación de componentes anatómicos en las entidades sanitarias a los profesionales y técnicos de la salud, a los agentes sociales y a la población en general.
11. Establecer y mantener relación y comunicación con organismos y organizaciones nacionales e internacionales relacionadas con trasplante.
12. Recomendar al Ministerio de Salud las políticas sobre las actividades de trasplante de componentes anatómicos que se consideren convenientes.

13. Gestionar ante las autoridades respectivas los recursos para que permanentemente se cuente con el equipo médico-quirúrgico y medicamentos necesarios para la adecuada implementación de los programas de trasplante.
14. Promover estudios e investigaciones que puedan hacer progresar los conocimientos y las tecnologías relacionadas con la obtención de órganos y tejidos y su trasplante.
15. Promover y desarrollar actividades orientadas a la formación continuada del personal sanitario que trabaje en la gestión de donación de componentes anatómicos o en los diferentes programas de trasplantes.
16. Ejercer cualquier otra función que le asigne el Ministerio de Salud.

Artículo 81. La Organización Panameña de Trasplantes estará dirigida por un Director General y un Subdirector General, quienes serán seleccionados, a través de concurso de oposición y sistema de méritos por el Ministerio de Salud, para un periodo de seis años y contará con las secciones administrativas necesarias para el desarrollo de su labor y con un consejo asesor de las organizaciones de pacientes y familiares.

Artículo 82. Los requisitos para ser Director General y Subdirector General son los siguientes:

1. Ser de nacionalidad panameña.
2. Ser médico idóneo acreditado en trasplante.
3. Tener experiencia en programas de trasplantes en las que haya participado activamente.
4. Tener conocimiento en procura de órganos y organización de programas de trasplante.

Artículo 83. El Director General de la Organización Panameña de Trasplantes tendrá las siguientes funciones:

1. Coordinar con las instituciones y organizaciones las actividades necesarias para el buen funcionamiento de programas de trasplantes.
2. Presentar las propuestas que reciba la Organización Panameña de Trasplantes.
3. Llevar las actas, los archivos, la correspondencia y demás documentos de la Organización Panameña de Trasplantes.
4. Generar propuestas tendientes a resolver los problemas técnicos y administrativos que se detecten para que sean consideradas e incluidas en el anteproyecto de presupuesto.
5. Llevar el Registro Nacional de Trasplantes, el Registro Nacional de Donantes y la Lista de Espera Nacional.
6. Rendir un informe mensual al Ministerio de Salud sobre las actividades que se desarrollen en materia de trasplantes.
7. Ejercer cualquiera otra que le sea asignada por el Ministerio de Salud.

Artículo 84. El Subdirector General de la Organización Panameña de Trasplantes tendrá las siguientes funciones:

1. Reemplazar al Director General en todas las ausencias temporales y absolutas.
2. Realizar cualquier otra función que le asigne el Director General o que establezca el Ministerio de Salud.

Artículo 85. Son causales de destitución del Director General o del Subdirector General de la Organización Panameña de Trasplantes las siguientes:

1. La comisión de delito doloso o delito contra la Administración Pública, previa sentencia judicial condenatoria.
2. La incapacidad manifiesta en el ejercicio de sus funciones, decretada por resolución ejecutiva del Ministerio de Salud.

Artículo 86. El Ministerio de Salud gestionará oportunamente ante el Ministerio de Economía y Finanzas las asignaciones presupuestarias para el funcionamiento de la Organización Panameña de Trasplantes y de los programas de trasplantes de componentes anatómicos que se desarrollen en los centros hospitalarios públicos autorizados.

Capítulo II
Comité Nacional de Trasplantes

Artículo 87. El Comité Nacional de Trasplantes es un organismo técnico consultivo y asesor del Ministerio de Salud en materia de trasplantes y estará integrado por:

1. Un médico idóneo acreditado en trasplante designado por el Ministerio de Salud, quien lo presidirá.
2. Un médico idóneo acreditado en trasplantes en representación de la Caja de Seguro Social.
3. Un médico idóneo acreditado en trasplante en representación de cada asociación médica, según las especialidades que efectúen trasplantes.
4. Un representante de la Asociación de Hospitales Privados que efectúan trasplantes.
5. Un representante de la Asociación de Enfermeras acreditadas en trasplante.
6. Un representante de la Asociación de Laboratoristas acreditados en trasplantes.
7. Un representante de la Asociación de Técnicos en Enfermería acreditados en trasplantes.

Las asociaciones mencionadas designarán a su representante principal y a un suplente, que lo reemplazará en sus ausencias. En caso de ausencia definitiva de ambos las asociaciones designarán nuevos representantes.

Artículo 88. El Comité Nacional de Trasplantes se reunirá por lo menos una vez al mes. El Director General de la Organización Panameña de Trasplantes asistirá a todas las reuniones con derecho a voz.

Artículo 89. El Comité Nacional de Trasplantes tendrá las siguientes funciones:

1. Elaborar su reglamento interno.
2. Asesorar en materia de trasplantes al Ministerio de Salud conforme al programa de trasplantes que se desarrolle a nivel nacional.
3. Vigilar que las actividades de trasplantes en general, tanto institucionales como privadas, cumplan con el contenido de esta Ley.

4. Promover con otras instituciones oficiales y privadas de salud, junto con entidades cívicas, campañas de divulgación y orientación educativa sobre el profundo sentido de solidaridad humana involucrada en la donación de componentes anatómicos.
5. Revisar y evaluar, en primera instancia, la documentación requerida por el Consejo Técnico de Salud para la acreditación de los profesionales y técnicos de la salud, en materia de trasplantes.
6. Vigilar que los miembros de los diferentes equipos de trasplantes sean profesionales y técnicos acreditados.
7. Verificar que en los centros hospitalarios se cuente con el equipo médico-quirúrgico y con los medicamentos necesarios para la adecuada ejecución del programa de trasplantes.
8. Establecer parámetros para la acreditación de los profesionales y técnicos en materia de trasplantes según los requisitos de las diferentes sociedades médicas y profesionales de la salud.

Artículo 90. En cada centro hospitalario o institución pública o privada en donde se practiquen procedimientos de trasplantes funcionará un Comité Hospitalario de Trasplantes integrado por:

1. El director de la entidad o su delegado.
2. Un representante de cada uno de los servicios involucrados en el programa o los programas de trasplantes.
3. Un representante del banco de componentes anatómicos y del banco de sangre.
4. Un representante del laboratorio de trasplantes.
5. Un representante de las enfermeras de la institución que trabajen en programas de trasplantes.
6. Un representante de los técnicos en enfermería acreditados en trasplantes.

Artículo 91. Los Comités Hospitalarios de Trasplantes tendrán las siguientes funciones:

1. Elaborar su propio reglamento interno, que necesariamente debe establecer lo relativo al seguimiento adecuado de los pacientes a quienes se les haya realizado trasplantes.
2. Coordinar y supervisar la actividad hospitalaria de trasplante con los servicios médicos y quirúrgicos, el laboratorio de trasplante, el departamento de enfermería y con el personal idóneo que compone los equipos de trasplantes.
3. Las demás que le señale el Ministerio de Salud y la presente Ley.

Título VII
Contravenciones, Sanciones y Procedimiento

Capítulo I
Faltas

Artículo 92. Se consideran faltas las contravenciones a esta Ley y a sus reglamentos complementarios.

Artículo 93. El Ministerio de Salud es la autoridad con derecho a establecer y conocer la existencia de faltas y aplicar las sanciones.

Artículo 94. Las faltas pueden ser:

1. Leves:
   a. Publicitar la donación no autorizada de componentes anatómicos en beneficio de personas o instituciones determinadas.
   b. Publicitar la necesidad de un componente anatómico o sobre su disponibilidad con la finalidad de una gratificación o remuneración.
   c. Extraer componentes anatómicos sin el consentimiento escrito.
   d. Ofrecer o conferir compensaciones económicas directas o indirectas, totales o parciales para lograr la donación de componentes anatómicos.
2. Graves:
   a. Poseer ilegítimamente un fallecido no reclamado.
   b. Extraer componentes anatómicos fuera de un centro hospitalario autorizado.
   c. Operar un centro hospitalario para la extracción de componentes anatómicos sin la debida licencia.
   d. Exportar, importar o reexportar sin la autorización del Ministerio de Salud componentes anatómicos con la finalidad de una gratificación o remuneración.
   e. Realizar la extracción de componentes anatómicos cuando medie coacción e intimidación.

Artículo 95. Se consideran circunstancias agravantes de una falta las siguientes:

1. La reincidencia.
2. Cometer la falta con pleno conocimiento de sus efectos perjudiciales o con la complicidad de subalternos o su participación bajo indebida presión.
3. Cometer una falta para ocultar otra.
4. Rehuir la responsabilidad o atribuírsela a otro u otros.
5. Incumplir varias obligaciones con la misma conducta.
6. Premeditar la ejecución de una infracción y sus modalidades.

Capítulo II
Sanciones

Artículo 96. Las sanciones deberán imponerse mediante resolución motivada, expedida por el Ministerio de Salud, y deberán notificarse personalmente al afectado dentro de los cinco días hábiles siguientes a la fecha de expedición.

Si no pudiera hacerse la notificación personal, se hará por edicto, de conformidad con lo dispuesto por el Procedimiento Administrativo General.

Artículo 97. La violación de las disposiciones de la presente Ley será sancionada por el Ministerio de Salud, con alguna o algunas de las siguientes sanciones:

1. Amonestación.
2. Multa hasta de cincuenta mil balboas (B/.50,000.00).
3. Decomiso de componentes anatómicos.
4. Suspensión o cancelación de la licencia.
5. Cierre temporal o definitivo del establecimiento o servicio respectivo.

Artículo 98. La amonestación consiste en la llamada de atención, por escrito, a quien ha violado cualquiera de las disposiciones de la presente Ley, aunque esa violación no implique peligro para la salud o la vida de las personas. Su propósito es denotar las consecuencias del hecho, de la actividad o de la omisión y advertir que se impondrá una sanción mayor si se reincide en la falta.

En el escrito de amonestación se precisará el plazo que se da al infractor para que cumpla las disposiciones violadas, si es el caso.

Artículo 99. La amonestación podrá ser impuesta por cualquiera de las autoridades del Ministerio de Salud o por un superior jerárquico.

Artículo 100. La multa consiste en la sanción pecuniaria que se impone a una persona, natural o jurídica, por la violación de las faltas señaladas, mediante la ejecución de una actividad o la omisión de una conducta.

Artículo 101. Las multas deberán pagarse teniendo en cuenta las disposiciones legales sobre la materia, dentro de los cinco días hábiles siguientes a la ejecutoria de la resolución que las impone. El no pago, en los términos y cuantías señaladas, podrá dar lugar a la cancelación de la licencia sanitaria o al cierre del establecimiento respectivo. La multa podrá hacerse efectiva por jurisdicción coactiva.

Artículo 102. El decomiso de componentes anatómicos consiste en su incautación cuando no se ajusten a las disposiciones de la presente Ley y con ello se atente contra la salud individual o colectiva.

Artículo 103. El decomiso será impuesto mediante resolución motivada expedida por el Ministro de Salud.

Artículo 104. El decomiso será realizado por el funcionario designado al efecto. De la diligencia se levantará un acta por triplicado, la cual suscribirán los funcionarios y las personas que intervengan en esta. Una copia se entregará a la persona en cuyo poder se hayan encontrado los bienes decomisados.

Artículo 105. La suspensión de una licencia sanitaria consiste en la privación temporal del derecho que confiere su otorgamiento, por haber incurrido en conductas contrarias a las

disposiciones de la presente Ley. La sanción de suspensión podrá tener una duración hasta de seis meses.

Artículo 106. La cancelación de una licencia sanitaria consiste en la privación definitiva de la autorización o el derecho que se había conferido por haber incurrido en conductas contrarias a las disposiciones de la presente Ley.

Artículo 107. La suspensión o la cancelación de las licencias sanitarias de funcionamiento, relacionadas con los establecimientos establecidos en esta Ley, comporta el cierre de estos.

Artículo 108. Se impondrá sanción de suspensión o cancelación de una licencia con base en la persistencia de la situación sanitaria objeto de sanciones, ya sea de amonestación, multa o decomiso, así como por no pagar las multas en los términos y las cuantías señalados.

Artículo 109. La persona o institución sancionada con la cancelación de una licencia no podrá solicitar durante un año una nueva licencia para el desarrollo de la misma actividad.

Artículo 110. La suspensión o cancelación de una licencia será impuesta mediante resolución motivada dictada por el funcionario que la haya otorgado.

Artículo 111. El cierre temporal o definitivo de establecimientos, edificaciones o servicios consiste en poner fin a las tareas que en ellos se desarrollan, por la existencia de hechos o conductas contrarias a las disposiciones de la presente Ley.

El cierre es temporal si se impone por un periodo de tiempo precisamente determinado por la autoridad sanitaria competente y es definitivo cuando no se fija un límite de tiempo.

El cierre podrá ordenarse para todo o parte del establecimiento, edificaciones o servicio.

Artículo 112. Se impondrá sanción de cierre temporal total o parcial, según sea el caso, cuando se presenten riesgos para la salud de las personas, cuya causa puede ser controlada en un tiempo determinado o determinable por la autoridad sanitaria que imponga la sanción.

Artículo 113. El cierre parcial o total, según sea el caso, será definitivo cuando se presenten riesgos para la salud humana y cuyas causas no puedan ser controladas en un tiempo determinado o determinable.

Artículo 114. El cierre definitivo total significa la clausura del establecimiento o servicio respectivo.

El cierre definitivo parcial ocasiona que la licencia no ampare la parte del establecimiento o servicio afectados.

Artículo 115. La sanción de cierre será impuesta mediante resolución motivada expedida por el Ministerio de Salud.

Artículo 116. A partir de la ejecutoria de la resolución por medio de la cual se imponga la sanción de cierre total, no podrá desarrollarse actividad alguna en el establecimiento, salvo la necesaria para evitar el deterioro de los equipos o para la conservación del inmueble y los componentes anatómicos. Si la sanción fuera cierre parcial, no podrá desarrollarse actividad alguna en la zona o el servicio afectados, salvo la necesaria para evitar el deterioro de los equipos o para la conservación del inmueble.

Artículo 117. Las sanciones que se impongan de conformidad con las disposiciones de la presente Ley no eximen de la responsabilidad civil, penal o de otro orden.

Artículo 118. Cuando una sanción se imponga por determinado periodo de tiempo, este empezará a contarse a partir de la ejecutoría de la resolución que la imponga, y se computará, para los efectos, el tiempo transcurrido bajo medidas de seguridad.

Capítulo III
Procedimiento

Artículo 119. El procedimiento administrativo para sancionar cualquier acción u omisión contraria a la presente Ley se iniciará de oficio o mediante información de funcionarios. También podrá iniciarse por denuncia o queja debidamente fundamentada presentada por cualquier persona.

Artículo 120. Si durante el procedimiento sancionatorio surgen hechos constitutivos de delitos, estos se pondrán en conocimiento de la autoridad competente y se acompañarán con copia de los documentos que correspondan.

Artículo 121. La existencia de un proceso penal o de otra índole no dará lugar a la suspensión del procedimiento administrativo previsto en esta Ley.

Artículo 122. Conocido el hecho o recibida la denuncia o el aviso, la autoridad competente ordenará la correspondiente investigación para verificar los hechos o las omisiones constitutivas de infracción a las disposiciones de la presente Ley.

Artículo 123. Para la verificación de los hechos o las omisiones podrán realizarse todas las diligencias que se consideren conducentes, como visitas, inspecciones o toma de muestras.

Artículo 124. Cuando la autoridad competente encuentre plenamente comprobado que el hecho investigado no ha existido, que el presunto infractor no lo cometió, que las disposiciones legales de carácter sanitario no lo consideran como violación o que el procedimiento de sanciones no podía iniciarse o proseguirse, procederá a declararlo así y ordenará cesar todo procedimiento contra el inculpado notificándole en forma personal sobre tal decisión.

Artículo 125. Realizadas las anteriores diligencias, mediante notificación personal al efecto, se pondrá en conocimiento al presunto infractor de los cargos que se le formulan.

El inculpado podrá conocer, fotocopiar y examinar el expediente administrativo personalmente o acompañado de un abogado.

Artículo 126. Si no fuera posible hacer la notificación por no encontrarse el representante legal del establecimiento, la persona responsable o la persona natural inculpada, se dejará una citación escrita para que la persona allí indicada concurra a notificarse, dentro de los cinco días hábiles. Si así no lo hiciera, se fijará un edicto, en lugar público visible de la secretaría de la oficina de la autoridad sanitaria competente, durante los cinco días hábiles, al vencimiento de los cuales se entenderá surtida la notificación.

Artículo 127. Dentro de los diez días hábiles siguientes al de la notificación, el presunto infractor, directamente o por medio de apoderado, podrá presentar sus descargos en forma escrita y aportar o solicitar la práctica de las pruebas que considere pertinentes.

Artículo 128. El Ministerio de Salud decretará la práctica de las pruebas que considere conducentes, señalando, para los efectos, un término que no podrá ser superior a diez días.

Artículo 129. Vencido el término de que trata el artículo anterior y dentro de los cinco días hábiles posteriores, la autoridad competente procederá a calificar la falta y a imponer la sanción correspondiente, de acuerdo con dicha calificación.

Artículo 130. Si se encontrara que no se ha incurrido en violación de alguna de las disposiciones de la presente Ley, se expedirá una resolución por medio de la cual se declara exonerado de responsabilidades al presunto infractor y se ordenará archivar el expediente.

Artículo 131. El recurso de reconsideración podrá ser interpuesto dentro de los cinco días hábiles, contados a partir de la notificación de la resolución de primera instancia. Una vez interpuesto el recurso, la autoridad dará en traslado del escrito a la contraparte si la hubiera, por el término de tres días hábiles para que objete o se pronuncie sobre el escrito.

La autoridad tendrá quince días para practicar las pruebas que resulten indispensables y tendrá treinta días para resolver el recurso señalado.

Artículo 132. El recurso de apelación será interpuesto ante la autoridad de primera o segunda instancia en el acto de notificación o por escrito, a través de apoderado judicial, dentro del término de cinco días hábiles, contado a partir de la fecha de la notificación de la resolución.

Si el apelante anuncia la presentación de nuevas pruebas en segunda instancia, se señalará un término de quince días hábiles para la práctica de estas.

La autoridad tendrá treinta días para resolver.

Artículo 133. Cuando, como resultado de una investigación adelantada por una autoridad sanitaria, se encontrara que la sanción a imponer es de competencia de otra autoridad, deberán remitirse a ella las diligencias adelantadas para lo que sea pertinente.

Artículo 134. Toda persona o entidad oficial distinta de las que integran el Sistema Nacional de Salud que tenga pruebas o indicios de conductas o hechos que se estén investigando deberán ponerlos a disposición del Ministerio de Salud, de oficio o a solicitud de este para lo que estime procedente.

Artículo 135. La Policía Nacional prestará toda su colaboración al Ministerio de Salud para que cumpla a cabalidad sus funciones.

Título VIII
Disposiciones Finales

Artículo 136. Quedan excluidos del ámbito de la presente Ley la sangre y los derivados sanguíneos, así como los procedimientos de investigación in vitro con células que no incluyan una aplicación en el cuerpo humano.

Artículo 137. El Ministerio de Salud establecerá los mecanismos de coordinación e integración de los servicios y equipos de trasplantes con la Caja de Seguro Social.

Artículo 138. La presente Ley será reglamentada por el Órgano Ejecutivo.

Artículo 139. Esta Ley deroga la Ley 52 de 12 de diciembre de 1995.

Artículo 140. Esta Ley empezará a regir el día siguiente al de su promulgación.

COMUNÍQUESE Y CÚMPLASE.

Proyecto 14 de 2009 aprobado en tercer debate en el Palacio Justo Arosemena, ciudad de Panamá, a los 26 días del mes de enero del año dos mil diez.

El Presidente,

José Luis Varela R.

El Secretario General,

Wigberto E. Quintero G.

DECRETO EJECUTIVO N.° 40
De 3 de Febrero de 2015

Que reglamenta el procedimiento de revisión de ajustes de precios y la Comisión de Ajustes de Precios

EL PRESIDENTE DE LA REPÚBLICA
en uso de sus facultades constitucionales y legales,

CONSIDERANDO:

Que los artículos 199 y 200 de la Ley 45 del 31 de octubre del 2007, facultan excepcionalmente al Órgano Ejecutivo para formular y reglamentar las políticas de regulación de precios;

Que en virtud de lo anterior, se emite el Decreto Ejecutivo N.°165 de 1 de julio de 2014, que fija temporalmente los precios máximos de venta al por menor de veintidós (22) productos de la canasta básica familiar de alimentos en la República de Panamá y se adoptan otras disposiciones;

Que el artículo 5 del precitado Decreto Ejecutivo, crea la Comisión de Ajustes de Precios conformada por el Ministerio de Comercio e Industrias quien la presidirá, el Ministerio de Desarrollo Agropecuario y el Ministerio de Economía y Finanzas;

Que la Comisión de Ajustes de Precios podrá realizar ajustes a los precios establecidos en el Decreto Ejecutivo N.°165 de 1 de julio de 2014, en la medida que las condiciones de los mercados así lo requiera;

Que con el propósito de atender eficazmente las solicitudes de revisión de ajuste de precios, se hace necesario establecer los procedimientos de solicitudes de revisión de control de precios y disposiciones relativas al funcionamiento de la Comisión de Ajustes de Precios, atendiendo la naturaleza especial que ostenta el referido régimen de control de precios,

DECRETA:

Artículo 1. Objetivo. Este Decreto Ejecutivo reglamenta los procedimientos de ajustes de precios que deberá realizar la Comisión de Ajuste de Precios, en adelante CAP, con el fin de establecer reglas claras para evaluar las solicitudes de revisión de control de precios ya sea por incremento de costos de producción o importación, por caso fortuito o fuerza mayor.

Artículo 2. Integrantes de la Comisión. La CAP está conformada por los siguientes miembros con derecho a voz y voto:

1. El Ministro de Comercio e Industrias, o quien éste designe, quien la presidirá.

2. El Ministro de Desarrollo Agropecuario, o quien éste designe.

3. El Ministro de Economía y Finanzas o quien éste designe.

Con el fin de atender eficientemente las solicitudes de revisión de control de precio, los comisionados podrán ser cubiertos por un suplente designado por el principal para suplirlo en sus ausencias.

Artículo 3. Convocatoria y quórum. La CAP se reunirá a requerimiento de alguno de sus integrantes. La solicitud de reunión se realizará por escrito y explicando el motivo de la convocatoria, la cual deberá hacerse al menos con tres (3) días hábiles de antelación a la fecha de la reunión.

El quórum reglamentario para iniciar las reuniones así como las decisiones tomadas será por mayoría simple.

Artículo 4. Funciones de la Comisión de Ajustes de Precios. La CAP tendrá las siguientes funciones:

1. Diligenciar las solicitudes de revisión de control de precios ya sea por fuerza mayor o caso fortuito, o por revisión de incremento de los costos de producción o importación de los productos.

2. Emitir criterio al Órgano Ejecutivo de las solicitudes de revisión de control de precio, ya sea por solicitud de revisión ordinaria: por incremento de costos de producción o importación; o revisión excepcional: por caso fortuito o fuerza mayor.

3. Asesorar al Órgano Ejecutivo sobre cualquier acción relacionada con la política de control de precios establecida.

Artículo 5. Facultados a requerir solicitudes de ajustes. Las solicitudes de revisión de precios, productos o especificaciones de los productos objeto de regulación en el Decreto N.°165 de 1 de julio de 2014, serán presentadas ante la CAP, por conducto del Ministerio de Comercio e Industrias y podrán requerirla los productores o importadores, ya sea de empresas individuales, asociaciones empresariales o gremios.

Artículo 6. Solicitudes de revisión. Las solicitudes de revisión podrán ser:

PRESIDENCIA DE LA REPÚBLICA DE PANAMÁ
MINISTERIO DE LA PRESIDENCIA
REGISTRADO

1. Solicitud de revisión de ajuste ordinario: Es aquella solicitud efectuada con sustento a las condiciones del mercado, ya sea por incremento de costos de producción, importación o distribución.

2. Solicitud de revisión de ajuste excepcional: Es aquella efectuada con sustento a condiciones de incremento en los costos por causas de fuerza mayor o caso fortuito.

Artículo 7. Solicitudes de revisión de ajuste ordinario. Deberán ser presentadas por medio escrito ante la CAP, por conducto de la persona natural o jurídica debidamente legitimada y con los aportes de una Estructura de Costos, del o los producto(s) que requieran revisión de ajustes, bajo el formulario de Solicitud de Ajuste de Precio especificado para tal fin.

Artículo 8. Procedimiento. Podrá darse curso a la solicitud de revisión de ajuste ordinario una vez se haya provisto a la CAP, de toda la información y documentos que sustentan la misma, en caso que haya sido requerida.

La CAP realizará convocatoria a reunión acorde a los procedimientos establecidos y circulará a los comisionados los documentos aportados por los solicitantes para las revisiones pertinentes.

En caso que la CAP lo estime necesario, solicitará la creación de sub-comisiones técnicas para solventar eficazmente la revisión y convocará cuantas reuniones sean necesarias para la toma de decisiones dentro del término establecido.

La CAP sesionará realizando la evaluación, una vez haya recibo oportunamente toda la información requerida con los documentos pertinentes, y adoptará su criterio por mayoría simple de todos los comisionados; para lo cual tendrá un término no mayor a treinta (30) días calendario para emitir criterio. Si en dicho término no ha resuelto la solicitud, se entenderá que la misma ha sido aprobada.

Artículo 9. Solicitudes de revisión de ajuste excepcional. En la eventualidad que surja un hecho de fuerza mayor o caso fortuito; se deberá comunicar el mismo en un término no mayor a diez (10) días hábiles luego de ocurrido el mismo, por conducto de la persona natural o jurídica de los importadores o productores afectados y debidamente legitimados.

Dicha solicitud se realizará por escrito a la CAP, evidenciando la revisión de ajuste excepcional con el debido aporte de las pruebas pertinentes, a menos que se traten de hechos notorios.

PROCURADURÍA DE LA REPÚBLICA DE PANAMÁ
MINISTERIO DE LA PRESIDENCIA
REGISTRADO

A partir de la solicitud de revisión de ajuste excepcional en debida forma, la CAP sesionará y adoptará su criterio por mayoría simple en un término no mayor a quince (15) días calendario, e igualmente, en caso de requerirlo se creará subcomisión técnica para tal fin.

En caso de no resolver la solicitud excepcional en el término descrito, se entenderá que la misma ha sido aprobada.

Artículo 10. Correspondencia. Se faculta al Presidente de la CAP, la firma de correspondencia y respuesta de notas que versen sobre aclaraciones al Decreto Ejecutivo N.°165 de 1 de julio del 2014, previa anuencia de los comisionados de la CAP.

Artículo 11. Vigencia. Este Decreto Ejecutivo comenzará a regir el día siguiente a partir de su promulgación.

FUNDAMENTO DE DERECHO: Decreto Ejecutivo N.°165 de 1 de julio de 2014, modificado por el Decreto Ejecutivo N.°303 de 24 de diciembre de 2014.

COMUNÍQUESE Y CÚMPLASE.

Dado en la ciudad de Panamá, a los 3 días del mes de Febrero de 2015.

REPÚBLICA DE PANAMÁ
MINISTERIO DE EDUCACIÓN

DECRETO EJECUTIVO N.° 7
De 3 de Febrero de 2015

Que concede autorización de funcionamiento provisional por seis (6) años a la universidad particular denominada Universidad Euroamericana UEA

EL PRESIDENTE DE LA REPÚBLICA,
en uso de sus facultades constitucionales y legales;

CONSIDERANDO:

Que la sociedad GRUPO EDUCATIVO EUROAMERICANO, S.A., inscrita a la Ficha 595565, Documento 1261221, de la sección de Personas Mercantil del Registro Público de Panamá, mediante memorial suscrito por la señora MARTHA ZALIME MOSTAFFA DURAN, mujer, venezolana, mayor de edad, portadora de la cédula de identidad personal N.°E-8-120915, presidenta y representante legal de la Sociedad, solicitó autorización de funcionamiento para la institución universitaria particular denominada Universidad Euroamericana UEA;

Que GRUPO EDUCATIVO EUROAMERICANO, S.A. aportó la propuesta educativa para la creación de la Universidad Euroamericana UEA, la cual está integrada por la certificación de Registro Público que acredita la existencia de su personería jurídica, copia del pacto social protocolizado a través de Escritura N.°20,658 de 11 de diciembre de 2007, proyecto institucional de la institución universitaria particular, proyecto de estatuto y reglamento universitario, oferta académica con las carreras de licenciatura en Administración de Empresa, licenciatura en Gerencia de Recursos Humanos, licenciatura en Gestión Ambiental, licenciatura en Administración en Turismo, licenciatura en Salud Ocupacional y licenciatura en Educación con énfasis en Estudios Virtuales, perfiles de formación de las autoridades académicas y sus docentes, evidencias de la infraestructura y el correspondiente presupuesto institucional y estudio económico;

Que el Consejo Nacional de Evaluación y Acreditación Universitaria de Panamá emitió concepto favorable a la creación de la Universidad Euroamericana UEA, a través del Informe Ejecutivo N.°10-2014 de 16 de junio de 2014, el cual, a su vez, está fundamentado en el Informe Favorable de la Comisión Técnica de Fiscalización N.°CTF-IT-0023-2014 de 11 de junio de 2014;

Que el informe favorable del Consejo Nacional de Evaluación y Acreditación Universitaria de Panamá expresa que el proyecto educativo Universidad Euroamericana UEA cuenta con los documentos que exige el artículo 32 de la Ley 30 de 20 de julio de 2006 y la Resolución N.°5 de 20 de junio de 2011, que aprueba la guía que dicho Consejo utiliza para evaluar las solicitudes de autorización para la creación y funcionamiento de las universidades;

Que el proyecto educativo Universidad Euroamericana UEA tiene la aprobación para impartir, en la sede principal de la ciudad de Panamá, las carreras de licenciatura en Administración de Empresa, licenciatura en Gerencia de Recursos Humanos, licenciatura en Gestión Ambiental, licenciatura en Administración en Turismo, licenciatura en Salud Ocupacional y licenciatura en Educación con énfasis en Estudios Virtuales;

Que las autoridades académicas y el personal docente del proyecto educativo Universidad Euroamericana UEA está integrado por profesionales idóneos, los cuales, deberán cumplir, como mínimo, los requisitos establecidos en el estatuto orgánico de la Universidad Euroamericana UEA;

Que el proyecto educativo Universidad Euroamericana UEA cuenta con recursos propios y con la infraestructura e instalaciones que ofrecen las condiciones físicas, técnicas y tecnológicas apropiadas para la misión que propone desarrollar;

Que la Universidad Euroamericana UEA realizará la promoción de grados académicos y la expedición de títulos profesionales de acuerdo con las regulaciones contenidas en su Estatuto Universitario;

Que en virtud de lo anterior, este Órgano considera viable otorgar la autorización de funcionamiento solicitada, toda vez que, el proyecto educativo Universidad Euroamericana UEA cumple con las exigencias establecidas en el artículo 32 de la Ley 30 de 20 de julio de 2006;

Que el artículo 33 de la Ley 30 de 20 de julio de 2006 y el artículo 107 del Decreto Ejecutivo N.°511 de 5 de julio de 2010, este último en orden reglamentario, establecen que le corresponde al Órgano Ejecutivo otorgar la autorización de funcionamiento de manera provisional por el período de seis (6) años, a las universidades particulares que reúnan lo establecido en el artículo 32 de la Ley 30 de 20 de julio de 2006 y que cuenten con el concepto favorable del Consejo Nacional de Evaluación y Acreditación Universitaria de Panamá, que se fundamentará en el informe favorable de la Comisión Técnica de Fiscalización;

Que es deber del Estado, por conducto del Ministerio de Educación, atender el servicio de la educación nacional en su aspecto intelectual, moral, cívico y físico, además de fijar las bases para el reconocimiento de títulos académicos y profesionales y otorgar autorización de funcionamiento a las universidades particulares en la República de Panamá, por lo tanto,

DECRETA:

Artículo 1. Autorizar el funcionamiento provisional, por seis (6) años, a la universidad particular denominada Universidad Euroamericana, identificada con la sigla UEA, bajo el amparo de GRUPO EDUCATIVO EUROAMERICANO, S.A., inscrita a la Ficha 595565, Documento 1261221, de la sección de Personas Mercantil del Registro Público de Panamá, la cual funcionará en la urbanización El Carmen, calle Ramón Arias con calle David de Castro, planta baja, pisos 1 y 2 del edificio ABSA, corregimiento de Bella Vista, ciudad y provincia de Panamá.

Artículo 2. En caso de apertura de una nueva sede la Universidad Euroamericana UEA deberá solicitar al Ministerio de Educación la correspondiente autorización de funcionamiento. Esta autorización de funcionamiento también estará sujeta a lo establecido en los artículos 32 y 33 de la Ley 30 de 20 de julio de 2006, así como a lo dispuesto en el artículo 107 del Decreto Ejecutivo 511 de 5 de julio de 2010 o a las regulaciones vigentes al momento de la respectiva solicitud.

Artículo 3. Cualquier modificación a los estatutos, planes de estudio y creación de nuevas carreras, requerirá autorización del Ministerio de Educación, previa aprobación del Consejo Nacional de Evaluación y Acreditación Universitaria de Panamá y de la Comisión Técnica de Fiscalización.

Artículo 4. Reconocer los títulos profesionales de pregrado, grado y postgrado que expida la Universidad Euroamericana UEA, siempre que hayan sido evaluados y aprobados por la Comisión Técnica de Fiscalización.

Artículo 5. La Universidad Euroamericana UEA podrá solicitar la exoneración del pago de impuestos fiscales, así como las tasas de correo y telégrafos en la República de Panamá, conforme lo establece el artículo 43 de la Ley 30 de 20 de julio de 2006.

Artículo 6. En caso que la Universidad Euroamericana UEA cese sus funciones, deberá comunicarlo oficialmente al Órgano Ejecutivo y deberá entregar al Ministerio de Educación

REPÚBLICA DE PANAMÁ
MINISTERIO DE SALUD

DECRETO EJECUTIVO N.° 6
De 3 de Febrero de 2015

Que modifica el Decreto Ejecutivo N.°1843 de 16 de diciembre de 2014, Que reglamenta el Comité Nacional de Bioética de la Investigación de Panamá

EL PRESIDENTE DE LA REPÚBLICA
en uso de sus facultades constitucionales y legales,

CONSIDERANDO:

Que el artículo 83 de la Constitución Política de la República de Panamá, señala que el Estado formulará la política científica nacional destinada a promover el desarrollo de la ciencia y la tecnología y su artículo 109 establece que es función esencial del Estado velar por la salud de la población de la República;

Que el Decreto Ejecutivo N.°1843 de 16 de diciembre de 2014, Que reglamenta el Comité Nacional de Bioética de la Investigación de Panamá, (CNBI), establece en el numeral 5 del artículo 9 que el CNBI se encargará de revisar y aprobar, de acuerdo a las Buenas Prácticas Clínicas, los protocolos de investigación multicéntricos;

Que igualmente, el artículo 30 del Decreto Ejecutivo N.°1843 de 16 de diciembre de 2014, establece que los protocolos multicéntricos deberán ser aprobados por el CNBI;

Que es necesario fortalecer la especialización del Comité Nacional de Bioética de la Investigación en sus funciones de acreditación de comités de bioética de la investigación clínica, con la finalidad de promover la creación de los mismos e impulsar la investigación clínica de excelencia;

Que así mismo, es necesario fortalecer la especialización del CNBI en la evaluación de protocolos complejos en células madre y potenciar su función de garantía que ejerce en la protección de los intereses de los pueblos originarios relacionados con la investigación clínica;

Que en aras de organizar el Sistema Nacional de Investigación Clínica a fin de procurar su eficiencia y el acercamiento a los centros en los cuales evaluará la investigación clínica, esta institución ha considerado necesario la modificación del Decreto Ejecutivo N.°1843 de 16 de diciembre de 2014, con la finalidad de que los protocolos multicéntricos sean aprobados por los Comités Institucionales de Bioética que estén acreditados por el CNBI;

Que el artículo 66 del Decreto Ejecutivo N.°1843 de 16 de diciembre de 2014, establece que puede ser modificado parcial o totalmente por el Ministerio de Salud,

DECRETA:

Artículo 1. El artículo 9 del Decreto Ejecutivo N.º1843 de 16 de diciembre de 2014, queda así:

Artículo 9. El CNBI tendrá funciones consultivas, respecto de toda persona natural o jurídica con intereses en la investigación clínica nacional, incluyendo a los sujetos reclutados para la investigación clínica, en lo concerniente a todas las actividades inherentes a la investigación clínica nacional. En virtud de dichas funciones, el CNBI se encargará de:

1. Acreditar, supervisar y auditar los comités institucionales de bioética de la investigación.
2. Certificar y aprobar la puesta en funcionamiento de los nuevos comités de bioética de la investigación que se conformen a nivel nacional.
3. Revisar y aprobar, de acuerdo con las Buenas Prácticas Clínicas, los protocolos de investigación en los cuales los sujetos participantes pertenezcan a las comunidades indígenas que habitan en el territorio nacional, siendo dicha pertenencia uno de los criterios de inclusión en el estudio. En todo caso, el CNBI oirá el parecer de las autoridades tradicionales de los grupos indígenas incluidos en el estudio.
4. Revisar y aprobar, de acuerdo con las Buenas Prácticas Clínicas, los estudios referidos a la investigación clínica de células madre.
5. Fomentar la sistematización y el manejo virtual de los comités de bioética de la investigación para promover la transparencia en el ejercicio de sus funciones.
6. Crear y administrar el Sistema Nacional de Información de la Investigación Clínica que se realiza en el país; dicho sistema promoverá, entre otras las siguientes actividades, iniciativas y políticas:

   a. Páginas web de cada uno de los comités, a través de las cuales se pueda hacer un seguimiento pormenorizado del estado y de la evolución de cada uno de los protocolos de investigación hasta su terminación. Dichas páginas separarán la información de acceso general, de la de acceso restringido.
   b. Sitio web general del CNBI en la cual se separarán la información de acceso público, y aquella de acceso restringido.
   c. Creación de un programa de anticorrupción y transparencia de la investigación clínica, equivalente al programa norteamericano FCPA (Foreing Corrupt Practices Act).
   d. Política del "cero papel", de acuerdo con los lineamientos nacionales en la materia. En dicha política se incluyen los textos de los protocolos de investigación, los cuales se presentarán a la evaluación de los comités en formato digital exclusivamente, y se exceptúan los siguientes documentos:

d.1 Formulario del consentimiento informado.

d.2 Materiales con destino a los sujetos o pacientes.

d.3 Cartas de comunicación entre los Comités y los investigadores.

d.4 Carta para la Dirección Nacional de Farmacia y Drogas.

d.5 Formulario de declaración de confidencialidad de los investigadores respecto a los sujetos reclutados en la investigación clínica.

7. Recomendar políticas públicas que puedan contribuir a un mejor desarrollo de la investigación clínica nacional, armonizando la excelencia científica con el rigor y las exigencias de naturaleza ética.
8. Promover la formación y capacitación permanente de todos los actores involucrados en la investigación clínica nacional.

Artículo 2. El artículo 30 del Decreto Ejecutivo N.°1843 de 16 de diciembre de 2014, queda así:

Artículo 30. En el caso de los protocolos multicéntricos, estos podrán ser aprobados por un solo comité, que se encuentre acreditado por el CNBI, salvo que una de las instituciones públicas en que hubiere de realizarse, indicase la competencia de un comité en especial; en dicho caso, tal protocolo podrá presentarse para su evaluación en más de un comité.

Artículo 3. El presente Decreto Ejecutivo comenzará a regir el día siguiente de su promulgación.

FUNDAMENTO DE DERECHO: Decreto Ejecutivo N.°1843 de 16 de diciembre de 2014.

COMUNÍQUESE Y CÚMPLASE.

REPÚBLICA DE PANAMÁ
MINISTERIO DE SEGURIDAD

DECRETO EJECUTIVO N.º 2
De 3 de Febrero de 2015

Que establece la Comisión de Seguimiento para la revisión de las solicitudes presentadas por los ex miembros de la Fuerza Pública destituidos en aplicación del artículo 184 de la Constitución Política y de las jubilaciones ordenadas durante el periodo comprendido entre el 1 de julio de 2009 al 30 de junio de 2014

EL PRESIDENTE DE LA REPÚBLICA,
en uso de sus facultades constitucionales y legales,

CONSIDERANDO:

Que durante el mes de octubre de 2014, se recibió por parte de ex miembros de distintos componentes de la Fuerza Pública y el Servicio de Protección Institucional, sendas solicitudes de revisión de destituciones hechas conforme al artículo 184 de la Constitución Política y las jubilaciones ordenadas en el periodo 2009-2014;

Que el artículo 42 de la Constitución Política de la República de Panamá, establece que toda persona tiene derecho a acceder a la información personal contenida en bases de datos o registros públicos y privados y a requerir su rectificación y protección, así como su supresión de conformidad con lo previsto en la Ley;

Que se considera procedente establecer una comisión para dar seguimiento a la atención de dichas solicitudes y revisar cada caso individualmente,

RESUELVE:

Artículo 1. Se establece la Comisión de Seguimiento para la revisión de las destituciones efectuadas en aplicación del artículo 184 de la Constitución Política y de las jubilaciones ordenadas, ambas durante el período comprendido entre el 1ero de julio de 2004 al 30 de junio de 2014, e incluidas en la lista entregada a las autoridades en octubre de 2014 por los afectados.

Artículo 2. La Comisión de Seguimiento estará integrada así:

1. Cuatro representantes por el Ministerio de Seguridad Pública.
2. Dos representantes por el Ministerio de la Presidencia.
3. Tres representantes por parte de los afectados.

Artículo 3. Los representantes del Ministerio de Seguridad Pública serán designados por el ministro respectivo y estará integrada por:

1. Un representante del Ministro de Seguridad Pública, quien presidirá la Comisión de Seguimiento.
2. Un miembro de la Policía Nacional
3. Un miembro del Servicio Nacional de Fronteras
4. Un miembro del Servicio Nacional Aeronaval

Artículo 4. Los representantes del Ministerio de la Presidencia serán designados por el ministro respectivo y estará integrada por:

1. Un representante del Ministro de la Presidencia.
2. Un miembro del Servicio de Protección Institucional (SPI).

Artículo 5. Los representantes de los afectados serán designados por ellos.

Artículo 6. La Comisión de Seguimiento tendrá las siguientes funciones:

1. Revisar todos los casos presentados en la lista proporcionada en el mes de octubre de 2014.
2. Diseñar un cuadro explicativo de cada unidad y su recomendación en un plazo no mayor a 60 días a partir de la promulgación de este decreto.
3. Presentar el Presidente de la República, una explicación y recomendación legal para cada caso en particular.

Artículo 7. La Comisión de Seguimiento estará adscrita al Ministerio de Seguridad Pública, que designará lo necesario para que puedan reunirse y cumplir sus funciones.

Artículo 8. La actividad de la Comisión de Seguimiento debe entenderse sin colisión con las atribuciones constitucionales y legales de los entes responsables de administrar justicia, en relación a los procesos resueltos o en curso relacionados con los temas objeto de atención por la Comisión de Seguimiento.

Artículo 9. El presente Decreto Ejecutivo comenzará a regir a partir de su promulgación.

FUNDAMENTO LEGAL: Artículo 42 de la Constitución Política de la República de Panamá.

COMUNÍQUESE Y CÚMPLASE.

Dada en la ciudad de Panamá, a los 3 días del mes de Febrero del año dos mil quince (2015).

REPÚBLICA DE PANAMÁ

ÓRGANO JUDICIAL

CORTE SUPREMA DE JUSTICIA

SALA TERCERA DE LO CONTENCIOSO ADMINISTRATIVO Y LABORAL

Panamá, veintiuno (21) de noviembre de dos mil catorce (2014).

VISTOS:

En la secretaría de esta Sala *(de lo Contencioso Administrativo y Laboral)* de la Corte Suprema de Justicia, se recibió, el ***martes trece (13) de enero de 2010***, por parte del Licenciado LUIS ANTONIO CHIFUNDO AYALA, con cédula de identidad personal Nº3-79-1716 e idoneidad Nº7,046, apoderado judicial especial del señor **VIRGILIO CERRUD ANDRADE**, con cédula de identidad personal **Nº3-64-2619**; formal escrito de **DEMANDA CONTENCIOSO ADMINISTRATIVA DE NULIDAD**, contra el **ACUERDO Nº101-40-55 de 24 de noviembre de 2009** *"Por medio del cual, se disuelve y elimina de la estructura del Municipio de Colón a la Comisión de Educación del Distrito de Colón"*, dictado por el **CONCEJO MUNICIPAL DE COLÓN**, a efectos de lograr que esta Sala declare que es **Nulo** por **Ilegal** el mismo y, para que se hagan otras declaraciones *(véase las fojas 1, 2 y 15 a 34 del Exp. Cont. Admtivo.)*.

Concluidas *-a la fecha-* todas las fases procesales y procedimentales predispuestas en nuestra legislación para casos de la naturaleza del que nos ocupa, la Secretaría de esta Sala procedió a remitir el presente expediente y sus antecedentes a quien ha correspondido, hasta entonces, la sustanciación de tal proceso para la elaboración del proyecto y consecuente veredicto *(véase la foja 64 del Exp. Cont. Admtivo.)*.

En razón de lo anterior, partiremos realizando precisas anotaciones dimanantes de lo medular de las argumentaciones expuestas para defender sus respectivas posturas, en tal sentido, nos referimos a las realizadas por la parte hoy demandante, como a las de la Procuraduría de la Administración, propiamente, ello a efectos de entender y a su vez, compartir con nuestros lectores, como y/o en qué radica el acierto o desacierto en la emisión del acto administrativo demandado, mismo que en su parte resolutiva dice así:

/...

67

ACUERDA:

Artículo N°1: Disolver y eliminar de la estructura Orgánica del Municipio de Colón la Comisión Municipal de Educación del Distrito en razón de lo expuesto
Artículo N°2: Dejar sin efecto legal alguno el Acuerdo N°101-40-2 del 4 de octubre de 1983.
Artículo N°3: Corresponderá a este Honorable Concejo instituir los mecanismo a través de las Juntas Comunales que se encargarán de cumplir a cabalidad con las funciones que debió realizar este ente.
Artículo N°4: Este Acuerdo empezará a regir a partir de su promulgación y sanción.
Dado en la Ciudad de Colón, a los veinticuatro (24) días del mes de noviembre del año Dos Mil Nueve (2009).
.../.

Asimismo, transcribiremos la parte resolutiva del Acuerdo N°101-40-56 de 1 de diciembre de 2009 *"Por medio del cual, se hace corrección en el Primer Considerando y en el Artículo Segundo del Acuerdo N°101-40-55, del 24 de noviembre de 2009"*, mismo que a la letra dice:

/...

ACUERDA:

Artículo Único: Corríjase como en efecto se hace, el Primer Considerando y el Artículo Segundo del Acuerdo N°101-40-55 del 24 de noviembre de 2009.
Dado en la Ciudad de Colón, al primer (1) día del mes de diciembre del año Dos Mil Nueve (2009).
.../.

Dado lo anterior, es preciso exponer lo siguiente:

I. ARGUMENTOS DE LA PARTE DEMANDANTE:

Se tiene que el señor **VIRGILIO CERRUD ANDRADE** *(parte hoy demandante)*, por conducto de su apoderado especial, sostiene *-en lo medular de su escrito de demanda-* que el **ACUERDO N°101-40-55 de 24 de noviembre de 2009**, al igual que el Acuerdo que lo corrige *(N°101-40-56 de 1 de diciembre de 2009)*, ambos dictados por el Concejo Municipal de Colón, son violatorios de diversas normas legales, en tal sentido se refiere al contenido de los artículos 34, 35, 36, 37 y 52 de la Ley N°38 de 31 de julio de 2000 y, el de los artículos 17 numerales 5, 6 y 9, 18 numeral 5 y 39 de la Ley N°106 de 8 de octubre de 1973; por cuanto que, en este caso, dicho Concejo carece de competencia para dictar actos, a través de los cuales se desconozcan leyes nacionales, como viene a ser la Ley N°47 de 27 de septiembre de 1946 *"Ley Orgánica de Educación"*. De allí entonces, que considera y pide se declare el referido Acuerdo y su enmienda es **Ilegal** y, por ende, **Nulo** por contravenir claras disposiciones legales vigentes.

De hecho, como complemento y elemento histórico, manifiesta que el Municipio de Colón, en cumplimiento de lo predispuesto en el artículo 18 de la Ley N°47 de 27 de septiembre de 1946, dictó el Acuerdo N°101-40-21 de 24 de noviembre de 1983, a través del cual, creó e implementó la Junta Municipal de Educación, denominándola *"Comisión Municipal de Educación del Distrito de Colón"*, misma que desde entonces se constituyó en un organismo estatal. De allí que no puede ser disuelta ni eliminada por virtud de un Acuerdo Municipal, como ha pretendido el Concejo Municipal de Colón.

68

II. INFORME DE CONDUCTA:

Vale anotar que, si bien, consta que esta Sala requirió por conducto del Juzgado Segundo Municipal del Distrito de Colón, en este caso, al Presidente del Concejo Municipal de Colón *(véase las fojas 36, 41 y 43 del Exp. Cont. Admtivo.)*, el Informe Explicativo de Conducta de que trata el artículo 33 de la Ley Nº33 de 11 de septiembre de 1946, dicho funcionario, a pesar de haberse notificado *(el 13 de abril de 2010)*, no presentó el mismo.

III. CRITERIO DE LA PROCURADURÍA DE LA ADMINISTRACIÓN:

Por su parte, el señor Procurador de la Administración, en lo medular de su opinión, expone en su Vista Nº951 de 30 de agosto de 2010 *(visible de fojas 45 a 49 del exp. Cont. Admtivo.)*, que:

/...

Para los fines del presente concepto, este despacho considera pertinente aclarar que las denominaciones "Comisión Municipal de Educación", aprobada por el Concejo Municipal de Colón, y Junta Municipal de Educación, contemplada en la Ley Nº47 de 1946, se refieren al mismo organismo, toda vez que tienen igual finalidad. (Cfr. foja 10 del expediente judicial).

En relación a lo anterior, esta Procuraduría observa que la referida Comisión o Junta Municipal de Educación tiene su origen en los artículos 34 y 35 del decreto Ejecutivo 305 de 30 de abril de 2004, por el cual se aprueba el texto único de la Ley 47 de 24 de septiembre de 1946, .../ Conforme puede leerse en el numeral 5 del artículo 18 de la Ley 106 de 8 de octubre de 1973, sobre Régimen municipal, esta norma faculta a los Concejos Municipales a colaborar con los centros educativos ubicados en su respectiva área, en la labor cultural y educativa, al señalar lo siguiente:

"Artículo 18: Los Concejos Municipales tendrán además las siguientes funciones:

...

5. Difundir la cultura y cooperar en la gestión administrativa de escuelas primarias, industriales, vocacionales de bellas artes y especiales, bibliotecas, músicas y academias de enseñanza especiales..."

De acuerdo con lo dispuesto por las citadas disposiciones legales, esta Procuraduría es de opinión que la "Comisión Municipal de Educación" o Junta Municipal de Educación, es un ente de carácter administrativo y educativo, establecido por ley, el cual debe existir en cada Municipio, y actuar coordinadamente con las dependencias del ramo respectivo; por tanto, el hecho que dicho organismo maneje un porcentaje de los fondos municipales destinados a la enseñanza del nivel primario y educación física, en las escuelas primarias oficiales del distrito, tal como lo prevé el artículo 35 de la citada Ley 47 de 1946, denota que no está sujeto a las directrices aprobadas por los Concejos Municipales, puesto que, de acuerdo a lo que se infiere del artículo 34 de la comentada Ley 47 de 1946 y lo que indica claramente el Decreto 585 de 2 de diciembre de 1992, por el cual se reglamenta el funcionamiento de las Juntas Municipales de Educación, la representación de los miembros del Concejo dentro del seno de la junta es mínima. (Cfr. fojas 8 y 9 del expediente judicial).

En este contexto, este Despacho estima que los actos expedidos por el Concejo Municipal de Colón, son contrarios a derecho, debido a que esa corporación desconoció lo previsto en el artículo 36 de la Ley 38 de 2000, en virtud del cual ninguna autoridad podrá celebrar o emitir un acto para lo cual carezca de competencia de acuerdo a la ley y los reglamentos; circunstancia de hecho que claramente se presenta en esta ocasión, al haber el Concejo Municipal de Colón procedido a eliminar, a través de la emisión del acuerdo cuya declaratoria de nulidad se demanda, un organismo creado mediante una ley formal, en este caso, la Ley 47 de 1946.

.../.

69

En fin, manifiesta el señor Procurador que con la emisión del acuerdo 101-40-55 de 24 de noviembre de 2009, corregido mediante el acuerdo 101-40-56 de 1 de diciembre de 2009, por parte del Concejo Municipal de Colón, sin gozar de competencia para ello, se configuró también, la causal de nulidad absoluta de los actos administrativos que contempla el numeral 2 del artículo 52 de la Ley 38 de 2000, por lo que, efectivamente, también se ha producido las infracciones que plantea el actor en relación con la Ley 47 de 24 de septiembre de 1946 y la Ley 106 de 8 de octubre de 1973; por lo que solicita a esta Sala se sirva declarar que es ilegal el referido acuerdo y su enmienda.

IV. COMPENDIO, RAZONAMIENTO, CRITERIO SOBRE LA SUPUESTA INFRACCIÓN DE NORMAS Y EL CONCEPTO DE LA VIOLACIÓN Y DECISIÓN DE LA SALA:

***Compendio*:**

Luego del recorrido procedimental y procesal, realizado sobre cada uno de los elementos y actuaciones de todos cuantos han intervenido dentro del presente caso, consideramos los integrantes de esta Sala que es oportuno externar algunas consideraciones que servirán de perspectiva a cada lector de este Fallo y, por surtidas cada una de las fases del proceso y en atención a cada uno de los hechos que conforman la demanda en cuestión, dictar el veredicto de lugar.

Como se ha anotado en párrafos precedentes, la Demanda Contencioso Administrativa de Nulidad que nos ocupa, deviene de la inconformidad planteada por el hoy demandante en su libelo de demanda, misma que *-a su juicio-* escora en una violación directa al contenido de los artículos 34, 35, 36, 37 y 52 de la Ley Nº38 de 31 de julio de 2000 y, el de los artículos 17 numerales 5, 6 y 9, 18 numeral 5 y 39 de la Ley Nº106 de 8 de octubre de 1973, mismos que en el orden citado dicen:

De la Ley Nº38 de 31 de julio de 2000:

Artículo 34. Las actuaciones administrativas en todas las entidades públicas se efectuarán con arreglo a normas de informalidad, imparcialidad, uniformidad, economía, celeridad y eficacia, garantizando la realización oportuna de la función administrativa, sin menoscabo del debido proceso legal, con objetividad y con apego al principio de estricta legalidad. Los Ministros y las Ministras de Estado, los Directores y las Directoras de entidades descentralizadas, Gobernadores y Gobernadoras, Alcaldes y Alcaldesas y demás Jefes y Jefas de Despacho velarán, respecto de las dependencias que dirijan, por el cumplimiento de esta disposición.

Las actuaciones de los servidores públicos deberán estar presididas por los principios de lealtad al Estado, honestidad y eficiencia, y estarán obligados a dedicar el máximo de sus capacidades a la labor asignada.

Artículo 35. En las decisiones y demás actos que profieran, celebren o adopten las entidades públicas, el orden jerárquico de las disposiciones que deben ser aplicadas será: la Constitución Política, las leyes o decretos con valor de ley y los reglamentos.

En el ámbito municipal, el orden de prioridad de las disposiciones jurídicas será: la Constitución Política, las leyes, decretos leyes, los decretos de gabinete, los decretos ejecutivos, las resoluciones de gabinete, los acuerdos municipales y los decretos alcaldicios.

70

A nivel de las juntas comunales y las juntas locales debe aplicarse el siguiente orden jerárquico: la Constitución Política, leyes, decretos leyes, decretos de Gabinete, los decretos ejecutivos, las resoluciones de gabinete, los acuerdos municipales, decretos alcaldicios y los reglamentos que dicten las juntas comunales.

Artículo 36 . Ningún acto podrá emitirse o celebrarse con infracción de una norma jurídica vigente, aunque éste provenga de la misma autoridad que dicte o celebre el acto respectivo. Ninguna autoridad podrá celebrar o emitir un acto para el cual carezca de competencia de acuerdo con la ley o los reglamentos.

Artículo 37 . Esta Ley se aplica a todos los procesos administrativos que se surtan en cualquier dependencia estatal, sea de la administración central, descentralizada o local, incluyendo las empresas estatales, salvo que exista una norma o ley especial que regule un procedimiento para casos o materias específicas. En este último supuesto, si tales leyes especiales contienen lagunas sobre aspectos básicos o trámites importantes contemplados en la presente Ley, tales vacíos deberán superarse mediante la aplicación de las normas de esta Ley.

Artículo 52. Se incurre en vicio de nulidad absoluta en los actos administrativos dictados, en los siguientes casos:

1. Cuando así esté expresamente determinado por una norma constitucional o legal;
2. Si se dictan por autoridades incompetentes;
3. Cuando su contenido sea imposible o sea constitutivo de delito;
4. Si se dictan con prescindencia u omisión absoluta de trámites fundamentales que impliquen violación del debido proceso legal;
5. Cuando se graven, condenen o sancionen por un tributo fiscal, un cargo o causa distintos de aquellos que fueron formulados al interesado.

De la Ley N°106 de 8 de octubre de 1973:

ARTÍCULO 17.- Los Concejos Municipales tendrán competencia exclusiva, para el cumplimiento de las siguientes funciones:

/...

5. Promover la celebración de contratos con entidades públicas o privadas, para la creación de empresas municipales o mixtas, cuya finalidad sea la explotación de bienes y servicios;
6. Crear juntas, Comisiones o departamentos para la prestación de servicios públicos municipales, reglamentar las funciones, nombrar sus miembros y aprobar los presupuestos de rentas y gastos que éstos les presenten;

.../

9. Establecer impuestos, contribuciones, rentas, derechos y tasas, de conformidad con las leyes, para atender a los gastos de la administración, servicios e inversiones municipales;

ARTÍCULO 18.- Los Concejos Municipales tendrán además las siguientes funciones:

/...

5. Difundir la cultura y cooperar en los gastos de administración de escuelas primarias, industriales, vocacionales de bellas artes y especiales, bibliotecas, museos y academias de enseñanzas especiales.

.../.

ARTICULO 39 - Los acuerdos se promulgarán por medio de su fijación en tablillas ubicadas en la Secretaría del Concejo, en las de la Alcaldía y en las Corregidurías. Estos acuerdos serán fijados por el término de diez (10) días calendarios a fin de que surtan sus efectos legales.

71

Los acuerdos referentes a impuestos, contribuciones, derechos, tasas y adjudicación de bienes municipales deben ser publicados en la Gaceta Oficial.

Como se ha anotado, arguye el demandante que se ha emitido un acto administrativo con carencia de competencia para lo que en el mismo se ha resuelto, es decir, que se expone que el Concejo Municipal, en este caso, de Colón, no ostenta facultades, ni competencia o capacidad legalmente conferida para dictar un acto en los términos contenidos, particularmente, en el Acuerdo 101-40-55 de 24 de noviembre de 2009, corregido mediante el Acuerdo 101-40-56 de 1 de diciembre de 2009. De hecho, es posible colegir que la inconformidad planteada por la parte actora, derivada de las violaciones anotadas, es compartida por el señor Procurador de la Administración, quien ha manifestado en su **Vista Nº951 de 30 de agosto de 2010** *(visible de fojas 45 a 49 del Exp. Cont. Admtivo.)*, que:

> /...
> De acuerdo con lo dispuesto por las citadas disposiciones legales, esta Procuraduría es de opinión que la "Comisión Municipal de Educación" o Junta Municipal de Educación, es un ente de carácter administrativo y educativo, establecido por ley, el cual debe existir en cada Municipio, y actuar coordinadamente con las dependencias del ramo respectivo; por tanto, el hecho que dicho organismo maneje un porcentaje de los fondos municipales destinados a la enseñanza del nivel primario y educación física, en las escuelas primarias oficiales del distrito, tal como lo prevé el artículo 35 de la citada Ley 47 de 1946, denota que no está sujeto a las directrices aprobadas por los Concejos Municipales, puesto que, de acuerdo a lo que se infiere del artículo 34 de la comentada Ley 47 de 1946 y lo que indica claramente el Decreto 585 de 2 de diciembre de 1992, por el cual se reglamenta el funcionamiento de las Juntas Municipales de Educación, la representación de los miembros del Concejo dentro del seno de la junta es mínima. (Cfr. fojas 8 y 9 del expediente judicial).
> En este contexto, este Despacho estima que los actos expedidos por el Concejo Municipal de Colón, son contrarios a derecho, debido a que esa corporación desconoció lo previsto en el artículo 36 de la Ley 38 de 2000, en virtud del cual ninguna autoridad podrá celebrar o emitir un acto para lo cual carezca de competencia de acuerdo a la ley y los reglamentos; circunstancia de hecho que claramente se presenta en esta ocasión, al haber el Concejo Municipal de Colón procedido a eliminar, a través de la emisión del acuerdo cuya declaratoria de nulidad se demanda, un organismo creado mediante una ley formal, en este caso, la Ley 47 de 1946.
> .../.

Razonamiento:

Estima *prima facie* esta Magistratura, ante las exposiciones vertidas por quienes constituyen el elenco cuyas actuaciones han sido admitidas y reconocidas dentro del presente proceso, aunado al contenido del caudal documental probatorio que forma parte integral del presente expediente; que, ciertamente, les asiste la razón a quienes se tiene en juicio *(Virgilio Cerrud Andrade y Procuraduría de la Administración)*, esto es, que han sido violadas en forma directa las disposiciones legales invocadas; pues ha quedado claro que el Concejo Municipal de Colón carece de competencia para dictar un acto administrativo en los términos que de él se desprenden, lo cual sólo lo puede llevar a una evidente ilegalidad y, en consecuencia, que se tenga que declarar nulo el mismo, como en efecto lo hará esta Sala.

Pues bien, atendiendo el caudal probatorio puesto a nuestra disposición y aquel que reposa en los anales de nuestra legislación, la demanda incoada contra el tantas veces referido Acuerdo y su enmienda, tiene lugar, pues a juicio de esta Sala, los miembros del Concejo Municipal de Colón, antes de proferir el

72

acto en comento, en los términos resueltos; han debido tener presente *-esencialmente-* el contenido del artículo 17 de la Ley Nº106 de 8 de octubre de 1973 "Sobre Régimen Municipal" *(Publicada en la G.O. Nº17,458 de 24 de octubre de 1973) -sin perjuicio de las modificaciones o derogaciones de que haya sido objeto a la fecha de esta resolución-*, mismo que se refiere a ***la "Competencia del Concejo"***, en tal sentido tenemos que el mismo a la letra dice *-originariamente-*:

> ARTÍCULO 17.- Los Concejos Municipales tendrán competencia exclusiva, para el cumplimiento de las siguientes funciones:
>
> 6. Formular, con la colaboración y asesoría del Ministerio de Planificación y Política Económica, la política de desarrollo del distrito y de los Corregimientos;
> 7. Preparar, evaluar y ejecutar los programas y proyectos de desarrollo del distrito y de los corregimientos respectivos; con la colaboración y asesoría del Ministerio de Planificación y Politica Económica.
> 8. Estudiar, evaluar y aprobar el programa de inversiones públicas municipales y aprobar el plan de obras públicas que para cada ejercicio fiscal presente el Alcalde de Distrito, previa consulta con la Junta Comunal respectiva, y aprobar el presupuesto de rentas y gastos;
> 9. Crear empresas municipales o mixtas para la explotación de bienes y servicios, en especial, las que tiendan al desarrollo industrial, agrícola y pecuario; y fomentar la creación de empresas privadas, industriales y agrícolas;
> 10. Promover la celebración de contratos con entidades públicas o privadas, para la creación de empresas municipales o mixtas, cuya finalidad sea la explotación de bienes y servicios;
> 11. Crear juntas, Comisiones o departamentos para la prestación de servicios públicos municipales, reglamentar las funciones, nombrar sus miembros y aprobar los presupuestos de rentas y gastos que éstos les presenten;
> 12. Crear o suprimir empleos y determinar sus funciones, períodos, asignaciones y viáticos, de conformidad con lo que dispongan la Constitución y leyes vigentes;
> 13. Disponer de los bienes y derechos del Municipio y adquirir lo que sea necesario para la suficiente prestación de los servicios públicos municipales, con las limitaciones que establezca la Ley;
> 14. Establecer impuestos, contribuciones, rentas, derechos y tasas, de conformidad con las leyes, para atender a los gastos de la administración, servicios e inversiones municipales;
> 15. Reglamentar el uso, arrendamiento, ventas y adjudicación de solares o lotes y demás bienes municipales que se encuentren dentro de las áreas y ejidos de las poblaciones, y de los demás terrenos municipales;
> 16. Crear y mantener empresas y servicios de utilidad pública en especial, agua, luz, teléfonos, gas, transporte, alcantarillado y drenaje; prestar éstos, ya sea directamente o en forma de concesión y en este último caso preferentemente mediante licitación pública o mediante acuerdos con otras entidades estatales.
> También podrá municipalizar los servicios públicos para prestarlos directamente;
> 17. Autorizar y aprobar la celebración de contratos sobre concesiones de. Servicios públicos municipales y lo relativo a la construcción y ejecución de obras públicas municipales;
> 18. Construir mataderos, mercados, crematorios, cementerios públicos y reglamentar sus servicios.
> La construcción de mataderos estará sujeta a la reglamentación que dicte el Órgano Ejecutivo;
> 19. Construir, conservar y mejorar las plazas, parques, paseos y vías públicas municipales ***(Derogado parcialmente)***;
> 20. Efectuar la recolección, destrucción o aprovechamiento de basuras y residuos;

73

21. Reglamentar lo relativo a las construcciones y servicios públicos municipales, teniendo en cuenta las disposiciones generales sobre salubridad, urbanismo y otras ***(Modificado parcialmente)***;
22. Ejercer los acciones constitucionales y legales a que haya lugar, en nombre del Municipio y en defensa de sus derechos ***(Declarado parcialmente inconstitucional)***;
23. Seleccionar al Alcalde de la terna que le remito el Gobernador y elegir al Vicepresidente y nombrar al Secretario del Consejo Municipal; al Tesorero, al Ingeniero, Agrimensor, Inspector de Obras Municipales y Abogado Consultor del Municipio, así como su respectivo representante ante organismos municipales, nacionales e internacionales, seg6n el coso ***(Modificado parcialmente)***;
24. Examinar la memoria e informe anuales que deben presentar los Alcaldes y demás jefes de dependencias municipales, para adoptar las medidas más convenientes en beneficio del Distrito y los Corregimientos ***(Modificado parcialmente)***;
25. Deslindar las tierras que formen porte de los ejidos del Municipio y del Corregimiento con la cooperación de la Junta Comunal respectiva;
26. Dar copia de sus actos, y demás documentos autenticados de su archivo, mediante el pago de la tasa correspondiente, cuando éstos sean pedidos por particulares;
27. Dictar medidas a fin de proteger a las personas y las cosas; y
28. Todas las demás señaladas por la Constitución y las Leyes.

(Lo que está entre paréntesis es de esta Sala).

Luego, ha debido considerar *-sin titubeos-*, el contenido del artículo 18 de la Ley Nº47 de 24 de septiembre de 1946 "Ley Orgánica de Educación" *(Publicada en la G. O. Nº10,113 de 2 de octubre de 1946)*, artículo este que consta reglamentado, a través del Decreto Nº314 de 5 de julio de 1961 *(G.O. Nº14,633 de 17 de mayo de 1962)*, mismo que fue modificado por el Decreto Nº320 de 10 de julio de 1961 *(G.O. Nº14,634 de 18 de mayo de 1962)*, en concomitancia con lo resuelto en el Decreto Nº585 de 2 de diciembre de 1992; para así evitar incurrir en las infracciones anotadas.

Lo anterior, responde al hecho que consta vigente un artículo (18) de una Ley (Nº47 de 1946), cuyo rango, según la pirámide de Hans Kelsen y por disposición de lo dispuesto en el artículo 35 de la Ley Nº38 de 31 de julio de 2000, modificada por la Ley Nº45 de 27 de noviembre de 2000; es superior a un Acuerdo, de allí que no podría *-legalmente hablando-* dictarse una decisión como la adoptada en dicho Acuerdo y más aún, cuando se carece de competencia para ello, en tal sentido, nos referimos al Concejo Municipal de Colón.

Dicho en otras palabras, ciertamente *-según lo expuesto en el artículo 242 de nuestra Constitución Política-*, "*... Es función del Concejo Municipal, sin perjuicio de otras que la Ley señale, expedir, modificar, reformar y derogar acuerdos y resoluciones municipales, .../*", y de hecho, así consta reconocido, particularmente, a través del contenido de los artículos 9, 14 y 38 de Ley 106 de 1973, del régimen municipal que establecen lo siguiente:

Artículo 9: La jurisdicción del municipio se extiende al respectivo distrito, el cual será denominado y delimitado por la Ley.

Artículo 14: Los Consejos Municipales regularán la vida jurídica de los Municipios por medio de Acuerdos que tienen fuerza de Ley dentro del respectivo Distrito.

74

> Artículo 38: Los Concejos dictarán sus disposiciones por medio de acuerdos o resoluciones que serán de forzoso cumplimiento en el distrito respectivo tan pronto sean promulgadas, salvo que ellos mismos señalen otra fecha para su vigencia.

Sin embargo, estima esta Sala que ello no es razón para que, en este caso, el Concejo Municipal de Colón, disponga en los términos anotados en el Acuerdo *-hoy-* objeto de impugnación, una decisión de la cual carece de competencia *-como se ha venido anotando-*; pues es claro, desde la vigencia de la precitada Ley Nº106 de 1973 y de lo aludido en el referido artículo Constitucional, que el rango que sus decisiones *-adoptadas mediante acuerdo-* tienen, están subordinadas a la Constitución y a las leyes, por tanto, debe respetarse la jerarquía normativa y no excederse lo estipulado en una Ley, como vemos ha ocurrido. De allí entonces, que es oportuno recordar que las autoridades públicas deben aplicar en sus actuaciones el principio de legalidad *-desarrollado del contenido del art. 18 de la C.P.-* consistente en que "*los funcionarios solo pueden hacer lo que la Ley expresamente le permite*".

En concomitancia con lo anterior, anotamos que se ha podido colegir que el artículo 18 de la precitada Ley Nº47 de 24 de septiembre de 1946, dispone que:

> Artículo 18. En cada distrito municipal existirá una Junta Municipal de Educación compuesta de cinco (5) miembros nombrados así: uno (1) por el Ministerio de Educación, dos (2) elegidos por los Clubes de Padres de Familia y dos (2) por los maestros del Distrito. El Ministerio de Educación reglamentará estas elecciones.

Como apreciamos, se trata de una disposición que es parte integral de una Ley, que además de estar vigente, tiene rango superior a un Acuerdo, así entonces, ***lo resuelto*** a través del **ACUERDO Nº101-40-55 de 24 de noviembre de 2009** *"Por medio del cual, se disuelve y elimina de la estructura del Municipio de Colón a la Comisión de Educación del Distrito de Colón"* y el Acuerdo Nº101-40-56 de 1 de diciembre de 2009, ambos dictados por el **CONCEJO MUNICIPAL DE COLÓN**, ***viola de manera directa por comisión*** el contenido del artículo 18 de la precitada Ley Nº47 de 1946, artículo éste, que dicho sea de paso, ha sido reglamentado a través del Decreto Nº314 de 5 de julio de 1961, mismo que fue modificado por el Decreto Nº320 de 10 de julio de 1961. Es más, observamos que tal violación por vías de un Acuerdo Municipal, también ha alcanzado o mejor dicho, violó por comisión, lo resuelto por el entonces Presidente de la República y su Ministro del Ramo, Licdo. Guillermo Endara Galimany (q.e.p.d.) y Prof. Marco A. Alarcón Palomino (q.e.p.d.), a través del Decreto Nº585 de 2 de diciembre de 1992 *(véase de fojas 8 a 9 del Exp. Cont. Admtivo.)*.

Para un mejor entendimiento conceptual, encontramos preciso citar lo que se tiene doctrinal y jurisprudencialmente hablando, como ***"Violación Directa, por Comisión"***, en tal sentido tenemos que: *"Es una de las formas más comunes de violación de la Ley. Se da como se ha visto, cuando el acto impugnado dispone alguna cosa contraria a lo que establece la ley o una norma jerárquicamente superior al acto acusado. Al aplicar la ley, se desconoce un derecho, consagrado en forma clara en la disposición aplicada."*.

75

Bien, se ha expuesto que la infracción o *violación*, en este caso, *directa por comisión*, ha girado en el presente caso o mejor dicho, ha tenido lugar, respecto al contenido de los artículos 34, 35, 36, 37 y 52 de la Ley Nº38 de 31 de julio de 2000 y, el de los artículos 17 numerales 5, 6 y 9, 18 numeral 5 y 39 de la Ley Nº106 de 8 de octubre de 1973, violación que el efecto estima esta Magistratura, ha tenido lugar; sin embargo, considera que vasta es la explicación dada en los párrafos precedentes, por lo que resulta innecesario para los suscritos, entrar a analizar en el fondo los cargos de ilegalidad endilgados al resto de las disposiciones legales anotadas. Ahora bien, lo que sí es de lugar es el tener presente lo que al respecto a casos como el que nos ocupa, esto es, a la competencia o incompetencia de emisión de actos; ha proferido esta Corporación de Justicia, en tal sentido tenemos que esta Sala de lo Contenciosos Administrativo y Laboral, expuso *-el 16 de julio de 2010, bajo la Ponencia del Ex–Magistrado Winston Spadafora Franco-* al tiempo de resolver la Demanda Contencioso Administrativa de Plena Jurisdicción – *entrada Nº783-2007-*, interpuesta por la Licda. **NADIA YARLENY MORENO GARCÍA**, en representación del **Banco Nacional de Panamá**, para que se declarase Nula por Ilegal, la **Resolución S.B.P. Nº22-2007 de 15 de marzo de 2007**, emitida por la **Superintendencia de Bancos**; que:

> /...
>
> Agotada la vía gubernativa, la Licda. Nadia Moreno acudió ante la Sala Tercera de la Corte, mediante demanda contenciosa-administrativa de plena jurisdicción, contra el citado acto administrativo. En ese sentido la letrada considera que el acto vulnera los artículos 34 y 52 de la Ley 38 de 2000 y los artículos 54 y 137 del Decreto Ley 9 de 1998.
>
> Como quiera que los artículos 34 y 52 de la Ley 38 de 2000, guardan estricta relación, conviene hacer su análisis en conjunto, ello por cuanto ambos hacen referencia al principio del debido proceso que deben llevarse en toda actuación administrativa.
>
> En ese orden de ideas los artículos 34 y 52 de la Ley 38 de 31 de julio de 2000, señalan lo siguiente:
>
> > "Artículo 34. Las actuaciones administrativas en todas las entidades públicas se efectuarán con arreglo a normas de informalidad, imparcialidad, uniformidad, economía, celeridad y eficacia, garantizando la realización oportuna de la función administrativa, sin menoscabo del debido proceso legal, con objetividad y con apego al principio de estricta legalidad. Los Ministros y las Ministras de Estado, los Directores y las Directoras de entidades descentralizadas, Gobernadores y Gobernadoras, Alcaldes y Alcaldesas y demás Jefes y Jefas de Despacho velarán, respecto de las dependencias que dirijan, por el cumplimiento de esta disposición.
> >
> > Las actuaciones de los servidores públicos deberán estar presididas por los principios de lealtad al Estado, honestidad y eficiencia, y estarán obligados a dedicar el máximo de sus capacidades a la labor asignada".
> >
> > Artículo 52. Se incurre en vicio de nulidad absoluta en los actos administrativos dictados, en los siguientes casos:
> >
> > 1. Cuando así esté expresamente determinado por una norma constitucional o legal;
> >
> > 2. Si se dictan por autoridades incompetentes;
> >
> > 3. Cuando su contenido sea imposible o sea constitutivo de delito;

76

4. Si se dictan con prescindencia u omisión absoluta de trámites fundamentales que impliquen violación del debido proceso legal;

5. Cuando se graven, condenen o sancionen por un tributo fiscal, un cargo o causa distintos de aquellos que fueron formulados al interesado.

Sobre el particular es preciso indicar que si bien la Superintendencia de Bancos cuenta con una regulación propia o especial, y específicamente el procedimiento de las quejas presentadas ante el Departamento de Protección al Usuario de los Servicios Bancarios, está regulado por el Acuerdo N° 10-2002 de 2 de octubre de 2002, lo cierto es que la Ley 38 de 2000, constituye la normativa marco para el procedimiento administrativo general y que de manera supletoria resulta aplicable ante los vacíos en el procedimiento sobre materias específicas, en atención a lo dispuesto en los artículos 37 y 202 de la citada ley.

Este principio del debido proceso constituye el cimiento jurídico sobre el cual debe descansar todo proceso administrativo general y especial, del cual no escapa el procedimiento sobre las quejas que interponen los usuarios del servicio bancario ante la Superintendencia de Bancos, a fin que ésta absuelva las peticiones, reclamos o quejas ante las actuaciones de las entidades bancarias al realizar sus operaciones.

Adecuando los planteamientos anteriores al proceso que nos ocupa nuestra atención, esta Superioridad advierte que en la tramitación de las quejas presentadas por Steven Beraha contra el Banco Nacional de Panamá, la autoridad demandada ha incurrido en violación del debido proceso al emitir la resolución S.B.P., N° 22-2007 de 15 de marzo de 2007, así como en sus actos confirmatorios, que sancionó al Banco Nacional de Panamá, sin tomar en consideración el error incurrido por ella misma en la tramitación de la queja presentada por Steven Beraha.

Veamos en que consiste el error enunciado en el párrafo anterior. El señor Steven Behara, presentó dos quejas ante el Departamento de Protección al Usuario de los Servicios de la Superintendencia de Bancos contra el Banco Nacional, cuyas pretensiones son las siguientes:

1. Queja presentada el 24 de octubre de 2006, acogida mediante Acta 158-06, en donde el usuario solicita que el Banco Nacional de Panamá le informe por qué se procedió a secuestrar la cuenta N° 21055074 a nombre de la empresa King Kong International, S.A., ya que el oficio N° 2941 emitido por el Juzgado Cuarto Municipal Civil del Distrito de Panamá ordenó la retención de los fondos hasta la suma de B/. 1,187.50 a nombre de Steven Beraha con cádula N° PE-6-242.
2. Queja presentada el 1 de noviembre de 2006, acogida mediante Acta 158-06 adición, donde solicita que el Banco Nacional acredite los intereses que le corresponde a la cuenta N° 21055074 a nombre de King Kong International, S.A., de la cual es su representante legal.

Sobre el particular la Superintendencia de Bancos argumenta que luego de recibir las quejas de parte de Steven Beraha los días 24 de octubre y 1 de noviembre de 2006, procedió a girar la Nota SBP-DJ-PR-N1061-2006 de 8 de noviembre de 2006, al Banco Nacional de Panamá para que diera explicación sobre ambas quejas.

No obstante lo anterior, de la lectura de la Nota SBP-DJ-PR-N1061-2006 de 8 de noviembre de 2006, que corre traslado al Banco Nacional, se aprecia con claridad meridiana que sólo se hace mención a la queja presentada el 24 de octubre de 2006, acogida mediante Acta 158-06, además que se indica que se adjunta la documentación aportada por el quejoso, la cual únicamente guarda relación con respecto a la queja presentada el 24 de octubre de 2006.

Esto evidencia que en la citada nota nada se menciona sobre la queja presentada el 1 de noviembre de 2006, ni se le pone en conocimiento al Banco Nacional que esta queja se adicionó a la presentada el 24 de octubre de 2006. así las cosas el Banco Nacional de Panamá actuó correctamente al contestar sólo lo atinente a lo reclamado por Beraha

77

en la queja presentada el 24 de octubre de 2006, pues desconocía la adición presentada el 1 de noviembre de 2006.

Teniéndose presente que el Banco Nacional de Panamá, no era sabedor de la queja interpuesta el 1 de noviembre de 2006, lo que procedía entonces era que la Superintendencia de Bancos le corriera un nuevo traslado con respecto a esta queja, en vez de concederle al Banco Nacional un término adicional de 8 días para que proporcionara la información, que según la autoridad demandada había sido requerida en la Nota SBP-DJ-PR-N1061-2006 de 8 de noviembre de 2006. No obstante, tal como se ha dicho en párrafos anteriores esta información no fue requerida en dicha nota.

Esto evidencia que la Nota reiterativa SBP-DJ-PR-N1220-2006 de 26 de diciembre de 2006, carece de sustento, pues no tiene razón de ser ni lógica reiterar una información que no se pidió previamente, en este caso en la Nota SBP-DJ-PR-N1061-2006 de 8 de noviembre de 2006.

Luego de este análisis la Sala colige que el Banco Nacional de Panamá, no ha incurrido en mora en la presentación de la información requerida por la Superintendecia de Bancos, por tanto no ha incumplido la normativa que regula el régimen bancario, específicamente el Decreto Ley 9 de 1998 y el Acuerdo 10-2002 de 2 de octubre de 2002.

Por otra parte el Superintendente de Bancos manifestó que el señor Beraha se presentó en dos ocasiones a presentar quejas contra el Banco Nacional sobre el mismo tema, por lo que procedieron a darle trámite en una sola queja. No obstante, es importante resaltar el hecho que si bien Steven Beraha presentó dos quejas, lo cierto es que cada una de ella llevaban pretensiones distintas. Ello es así puesto que la primera tenía como propósito se le explicara el porqué el Banco Nacional secuestró la cuenta de la empresa King Kong, S.A., si la nota enviada por el Juzgado Cuarto Municipal del Distrito de Panamá indicaba que el secuestro recaía sobre las cuentas de su persona y no sobre las de la empresa; en tanto que la segunda queja consistió en que el señor Beraha solicitaba se le explicara el por qué la cuenta 21055074 no generó intereses en ciertos meses.

Esto nos lleva a advertir que por tratarse de peticiones distintas, la Superintendencia de Bancos debió levantar dos expedientes a fin que cada reclamo se tramitara por separado, garantizándose a las partes todos los derechos y medios de defensa en cada caso en particular y con ello se evitaría la tramitación deficiente que se aprecia en el caso en análisis.

Siendo así las cosas, resulta innecesario analizar los demás cargos de ilegalidad expuesto por el demandante, pues ha quedado debidamente comprobado que el acto impugnado vulnera los artículos 34 y 52 de la Ley 38 de 2000, toda que por el mal procedimiento de la Superintendencia de Bancos en la tramitación de las quejas presentadas por Steven Beraha, se le impuso una multa a la entidad bancaria, sin que esta incurriera en mora en proporcionar la información requerida.

PARTE RESOLUTIVA

Por consiguiente, la Corte Suprema de Justicia, Sala Tercera de lo Contencioso Administrativo, administrando justicia en nombre de la República y por autoridad de la Ley, **DECLARA QUE ES ILEGAL** la Resolución S.B.P. N° 22-2007 de 15 de marzo de 2007, emitida por la Superintendencia de Bancos, así como sus actos confirmatorios; en consecuencia se declara que el Banco Nacional no ha incurrido en mora alguna en cuanto a información requerida, por lo que no es objeto de sanción pecuniaria alguna.

Notifíquese.

.../.

Ahora bien, no podemos concluir sin anotar que a la fecha de emisión del presente acto jurisdiccional consta que se han modificado y hasta derogado algunos numerales del aludido artículo 17 de

78

la Ley N°106 de 8 de octubre de 1973, pero ello no es óbice para que se hagan las anotaciones y exponga el criterio que tiene esta Sala, sobre lo actuado por el Concejo Municipal, en este caso, de Colón, por cuanto que, aún con tales derogaciones o modificaciones, no subsiste o se establece facultad alguna para que el Concejo pueda actuar como lo ha hecho y, lo que es más grave aún, a través de un Acuerdo, respecto de una Ley.

Así las cosas, lo propio viene a ser que, por declarado Nulo lo resuelto a través del tantas veces citado Acuerdo y su enmienda, se reestablezca dentro de la estructura del Municipio de Colón, la Comisión de Educación del Distrito de Colón, como en efecto se declarará y ordenará seguidamente, dado el hecho que, es evidente la carencia de competencia para proferirse un acto como el acusado de ilegalidad, cuyo resultado infiere con lo resuelto mediante Ley, esto es, traspasándose los límites que se tienen, en este caso, como Concejo Municipal.

***Decisión de la Sala*:**

Por lo expuesto, la ***Sala Tercera de lo Contencioso Administrativo y Laboral de la Corte Suprema de Justicia***, administrando justicia en nombre de la República y por autoridad de la Ley, declara que **ES ILEGAL** y, por ende, **NULO** lo ***resuelto*** en el **ACUERDO N°101-40-55 de 24 de noviembre de 2009** *"Por medio del cual, se disuelve y elimina de la estructura del Municipio de Colón a la Comisión de educación del Distrito de Colón"* y su corrección, realizada, a través del ACUERDO N°101-40-56 de 1 de diciembre de 2009 *"Por medio del cual, se hace corrección en el Primer Considerando y en el Artículo Segundo del Acuerdo N°101-40-55, del 24 de noviembre de 2009"*, ambos dictados por el **CONCEJO MUNICIPAL DE COLÓN** y; en consecuencia, **ORDENA** que una vez en firme y debidamente ejecutoriada esta resolución, no sólo se **ARCHIVE** el presente expediente, luego de la anotación de salida en el libro de lugar; sino que se **ORDENA** comunicar lo aquí resuelto al Concejo Municipal de Colón, a efectos que proceda con el reestablecimiento de la Comisión de Educación del Distrito de Colón, dentro de la estructura funcional del Municipio de Colón.

Montevideo, 2 JUN 2006

VISTO: la Ley N° 17.668 de 15 de julio 2003 modificativa de la Ley N° 14.005 de 17 de agosto de 1971;----------

RESULTANDO: que dichas disposiciones legales hacen referencia al marco jurídico de trasplantes de órganos y tejidos, a cargo del Instituto Nacional de Donación y Trasplante de Células, Tejidos y

Órganos – que funciona en el Hospital de Clínicas "Dr. Manuel Quintela" - Facultad de Medicina - Universidad de la República;------

CONSIDERANDO : I) el avance de la ciencia y la tecnología en la materia;----------

II) que se ha tomado como base científica, la Directiva 2004/23/CE del Parlamento Europeo y del Consejo Europeo de fecha 31 de marzo de 2004 relativa al establecimiento de normas de calidad y de seguridad para la donación, la obtención, la evaluación, el procesamiento, la preservación, el almacenamiento y la distribución de células y tejidos humanos, contemplándose los conceptos de bioética y bioseguridad, así como las pautas socio culturales vigentes;----------

III) que el trasplante de células y tejidos humanos es un sector de la medicina que registra un fuerte crecimiento y entraña grandes oportunidades para el tratamiento de enfermedades hasta ahora incurables. Debe garantizarse la calidad y seguridad de estas sustancias, en particular a fin de evitar la transmisión de enfermedades. El Estado debe fomentar adecuados niveles de protección de la salud pública;----------

IV) que, la disponibilidad de células y tejidos humanos utilizados con fines terapéuticos depende de la disposición de las personas a realizar donaciones;----------

V) que, para proteger la salud pública, disminuir los efectos adversos y evitar la transmisión de enfermedades

infecciosas a través de estos tejidos y células, deben tomarse todas las medidas de seguridad durante su donación, obtención, evaluación, procesamiento, preservación, almacenamiento, distribución, uso y desecho;----------

VI) que dada la necesidad de prohibir el comercio de células y tejidos humanos, es necesario promover campañas de información y educación, tanto a escala nacional como regional, sobre la donación de células y tejidos humanos. El Estado debe promover la donación altruista de células y tejidos humanos, procurando satisfacer las necesidades asistenciales (Ley 17.668 de 15 de julio de 2003);----------

VII) que es menester disponer de un marco regulatorio a fin de garantizar normas de calidad y seguridad en cuanto a la obtención, evaluación, procesamiento, almacenamiento, distribución y desecho de células y tejidos humanos. Por consiguiente, es esencial que disposiciones nacionales aseguren las células y tejidos humanos de calidad y seguridad equivalentes con las exigidas regional e internacionalmente;----------

VIII) que las células y los tejidos destinados a la producción industrial, incluidos los productos sanitarios, deben ser regulados por la presente norma en lo que se refiere a la donación, obtención, procesamiento, evaluación y distribución;----------

IX) que el presente Decreto incluye todas las células y tejidos humanos. Se aplica, por lo tanto, a las células

madre, progenitoras hematopoyéticas de sangre periférica, células del cordón umbilical (sangre), células de la médula ósea y células troncales adultas y embrionarias;----------

X) que esta reglamentación se aplicará a las células y los tejidos utilizados únicamente como injerto autólogo dentro de un mismo procedimiento quirúrgico en lo que refiere al consentimiento y comunicación al Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos. Excluye la sangre y los productos sanguíneos Ley N° 12.072 de 4 de diciembre de 1953 y Decreto N° 385/00 de 26 de diciembre de 2000 (excepto las células progenitoras hematopoyéticas) y los órganos humanos Ley N° 14.005 de 17 de agosto de 1971;----------

XI) La utilización clínica de células y tejidos humanos para su uso con seres humanos podría verse restringida por una disponibilidad limitada. Es necesario que existan criterios para el acceso y adjudicación de estas células y tejidos humanos de manera transparente, sobre la base de una evaluación objetiva de las necesidades médicas;----------

XII) que es preciso incrementar la confianza en cuanto a la calidad y la seguridad de células y tejidos humanos donados, la protección de la salud de los donantes vivos y el respeto de los donantes fallecidos (Ley N° 14.005 de 17 de agosto de 1971 y Ley N° 17.668 de 15 de julio de 2003), y la seguridad del proceso de aplicación;----------

XIII) que las células y tejidos humanos utilizados para terapias alogénicas pueden proceder de donantes vivos y de donantes fallecidos. A fin de garantizar que el estado de salud de un donante vivo no se verá afectado por la donación es preciso realizar un reconocimiento médico previo. Asimismo, debe respetarse la dignidad de los donantes fallecidos (Ley N° 14005 de 17 agosto de 1971 y Ley N° 17.668 de 15 de julio de 2003);----------

XIV) que la utilización de células y tejidos humanos para su aplicación en el cuerpo humano puede provocar enfermedades y efectos no deseados. La mayor parte de éstos pueden evitarse con una evaluación detallada del donante y con la evaluación de cada donación de acuerdo con las normas establecidas y actualizadas de conformidad con los mejores conocimientos científicos disponibles;----------

XV) que los programas de aplicación de células y tejidos humanos deben basarse en el principio de la voluntariedad de las donaciones y la no remuneración, el anonimato del donante y el receptor, el altruismo del donante y la solidaridad entre donante y receptor (Ley N° 14.005 de 17 de agosto de 1971 y Ley N° 17.668 de 15 de julio de 2003);----------

XVI) que deben tomarse todas las medidas necesarias para garantizar a los posibles donantes de células y tejidos humanos la confidencialidad de cualquier información relacionada con su salud que se haya transmitido al personal

autorizado, de los resultados de las pruebas de sus donaciones y de la trazabilidad futura de su donación (Ley N° 17.668 de 15 de julio de 2003). Los datos personales procesados en aplicación de la presente norma quedan bajo la Ley de Protección de Datos de la República Oriental del Uruguay, de 24 de setiembre de 2004;------

XVII) que deben crearse los mecanismos de acreditación de centros de obtención y trasplante de células y tejidos humanos. El Ministerio de Salud Pública deberá organizar medidas de inspección y control, para garantizar que los centros cumplan con lo dispuesto en la presente normativa;----------

XVIII) que el personal que participe directamente en la donación, la obtención, la verificación y/o evaluación el procesamiento, la preservación, el almacenamiento, la distribución y el desecho de células y tejidos humanos debe poseer las calificaciones apropiadas y recibir una formación oportuna y adecuada;----------

XIX) que debería instaurarse un sistema adecuado que permita determinar el origen de las células y tejidos humanos. La trazabilidad debe reforzarse mediante procedimientos precisos de identificación de la sustancia, el donante, el receptor, el centro de obtención, el banco (cuando corresponda) y el laboratorio, así como con el mantenimiento de registros y un sistema apropiado de etiquetado;----------

XX) que las comisiones asesoras del Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos deben tener acceso a la mejor orientación científica posible en relación con el trasplante de células y tejidos humanos, en especial, para asistir a las autoridades en la adaptación de las disposiciones de la presente norma al progreso científico y técnico;----------

XXI) que las pruebas exigidas a los donantes deberán ser efectuadas por un laboratorio habilitado, acreditado, autorizado o designado por el Ministerio de Salud Pública;----------

XXII) que no debe revelarse la identidad del receptor o receptores al donante o a su familia, ni viceversa. A fin de incrementar la efectividad de la aplicación de las disposiciones adoptadas en el marco de la presente norma, se prevén sanciones (Ley N° 17.668 de 15 de julio de 2003);----------

XXIII) que la población debe tener acceso a la mejor orientación científica posible en relación con la seguridad de células y tejidos humanos;----------

XXIV) que la presente norma respeta los derechos fundamentales del Hombre y cumple los principios reflejados en la Declaración Universal de los Derechos Humanos (1948);----------

XXV) que, se hace necesario la reglamentación específica para el transplante de células y tejidos humanos, por lo que de acuerdo a lo previsto en la Constitución de la República en su Sección IX, Capítulo III, artículo 168 numeral 4°); y en las leyes Nos.

14.005 de 17 de agosto de 1971, 17.668 de 15 de julio de 2003 y 9.902 "Orgánica de Salud Pública" de 12 de enero de 1934;----------

ATENTO: a lo precedentemente expuesto;----------

EL PRESIDENTE DE LA REPÚBLICA

actuando en Consejo de Ministros

DECRETA:

CAPÍTULO I

DISPOSICIONES GENERALES

Artículo 1°.- Objetivo:----------

El presente Decreto establece normas de control, calidad y seguridad para el transplante de las células y tejidos humanos, con el objetivo de garantizar un adecuado nivel de protección de la salud humana e impedir la comercialización.---------

Artículo 2°.- Ámbito de aplicación:----------

1. Se aplicará a la donación, la obtención, la evaluación, el procesamiento, la preservación, el almacenamiento, la distribución, el trasplante, el uso terapéutico, la investigación y el desecho de células y tejidos humanos, así como de productos elaborados derivados de estas células y tejidos. Cuando estos productos elaborados estén regulados por otras normas, la presente solamente se aplicará a la donación, obtención, trazabilidad y evaluación.-

2. La presente norma no se aplicará a:----------

a) la sangre (excepto las células progenitoras hematopoyéticas) y los componentes sanguíneos contemplados en Decreto Nº 385/000 de 20 de diciembre de 2000.----------

b) los órganos, o partes de órganos, contemplados en Ley N° 14005 de 17 de agosto de 1971 y Ley N° 17668 de 15 de julio de 2003.----------

Artículo 3°- Definiciones:----------

A efectos de la presente norma, se entenderá por:----

a) «células»: las células individuales de origen humano o una colección de células de origen humano cuando no estén unidas por ninguna forma de tejido conjuntivo; ----------

b) «tejido»: todas las partes constituyentes del cuerpo humano formadas por células;----------

c) «órgano»: una parte diferenciada y vital del cuerpo humano, formada por diferentes tejidos, que mantiene su estructura, vascularización y capacidad para desarrollar funciones fisiológicas con un nivel de autonomía importante;----------

d) «donante»: toda fuente humana, viva o muerta, de células, tejidos y órganos humanos;----------

e) «donación»: el hecho de donar células, tejidos y órganos humanos destinados a su aplicación en el ser humano;----------

f) «obtención»: un proceso por el que se pueden obtener las células y ablacionar los tejidos;---------

g) «procesamiento»: todas las operaciones que implica la preparación, manipulación, preservación y acondicionamiento de los tejidos y las células destinados a su aplicación en el ser humano;--------

h) «preservación»: la utilización de agentes químicos, alteraciones de las condiciones medioambientales u otros medios durante el procesamiento a fin de impedir o retrasar el deterioro biológico o físico de las células o los tejidos;----------

i) «cuarentena»: la situación del tejido o células extraídos o del tejido aislado físicamente o por otros medios efectivos, mientras se espera una decisión sobre su aceptación o rechazo;----------

j) «almacenamiento»: el mantenimiento del producto bajo condiciones controladas y apropiadas hasta su distribución;----------

k) «distribución»: el transporte y la entrega de tejidos o células;----------

l) «aplicación en el ser humano»: el uso de tejidos y células en un receptor humano y en aplicaciones extracorporales;----------

m) «efecto adverso grave»: cualquier hecho desfavorable vinculado con la obtención, evaluación, procesamiento, almacenamiento y distribución de tejidos y células que pueda conducir a la transmisión de una enfermedad transmisible o la muerte del paciente, o a estados que hagan peligrar su vida, a minusvalías o incapacidades, o que pueda dar lugar a hospitalización o enfermedad, o las pueda prolongar;----------

n) «reacción adversa grave»: una respuesta inesperada del donante o del receptor, incluida una enfermedad transmisible, asociada a la obtención o la aplicación en el ser humano de tejidos y células que resulte mortal, potencialmente mortal, discapacitante, que produzca invalidez o incapacidad o que dé lugar a hospitalización o enfermedad, o las prolongue;----------

o) centro de obtención, procesamiento, preservación, almacenamiento, distribución, uso terapéutico y desecho de células y tejidos humanos:

organización radicada en un establecimiento con identidad institucional habilitada;----------

p) «uso alogénico»: las células o los tejidos extraídos de una persona y aplicados a otra;----------

q) «uso autólogo»: las células o los tejidos extraídos y aplicados a la misma persona;----------

Células madre: sinonimia: células madre progenitoras, células troncales, células "stem", "stem cells".----------

Células madre: aquellas capaces de dividirse para producir células iguales a ellas mismas, de dar lugar a uno o más tipos de células diferenciadas específicas y de reconstituir uno o varios tipos de tejidos.----------

Tipos de células madre (terminología discutida): se clasifican de acuerdo al potencial de diferenciación.

Artículo 4°.- Aplicación:----------

1. El Ministerio de Salud Pública, a través del Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos serán responsables de aplicar las disposiciones de la presente norma.-------

2. Las donaciones serán voluntarias y no remuneradas y deberán respetar las condiciones de

la presente norma y de las Leyes Nos. 14.005 de 17 de agosto de 1971 y 17.668 de 15 de julio de 2003.--

3.Para la realización de las actividades a que se refiere la presente norma, el Ministerio de Salud Pública - Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos - podrán solicitar asistencia técnica o administrativa y gastos de apoyo a la identificación, preparación, gestión, seguimiento y control.----------

CAPÍTULO II

OBLIGACIONES DE LAS AUTORIDADES

Artículo 5°.- Supervisión de la obtención de células y tejidos humanos:----------

1. El Ministerio de Salud Pública a través del Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos tomará todas las medidas necesarias para garantizar que la obtención y la evaluación de células y tejidos humanos sean efectuadas por personal con la formación y experiencia adecuadas y que se realicen en las condiciones habilitadas, acreditadas, o autorizadas a tal fin.----------

2. El Ministerio de Salud Pública a través del Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos adoptará las medidas

necesarias para garantizar que la obtención de células y tejidos humanos sea notificada al dicho Instituto y que se cumplan los requisitos contemplados en el Anexo I del presente Decreto.----

Artículo 6°.- Habilitación o autorización de los centros de trasplante de células y tejidos:----------

1. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos garantizarán que solo los centros y programas de trasplante que hayan sido habilitados con ese fin, lleven a cabo las actividades relacionadas con la obtención, el procesamiento, preservación, almacenamiento, distribución y desecho de células humanas.----------

2. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos y el Ministerio de Salud Pública, establecerán los requisitos y condiciones que deban cumplirse.----------

3. Los equipos no podrán efectuar cambios sustanciales en sus actividades, sin el consentimiento previo por escrito de la autoridad competente : Ministerio de Salud Pública e Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos.----------

4. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos podrán suspender o retirar la habilitación o autorización a un centro de trasplante de células y tejidos humanos o a un método de preparación de tejidos o células si una inspección o una medida de control demuestra que no se cumplen los requisitos de la presente norma.---------

Artículo 7°.- Inspecciones y medidas de control:----------

1. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos podrán aplicar las medidas de control apropiadas para que los programas de trasplante de células y tejidos humanos cumplan los requisitos de la presente norma.----------

2. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos velarán también por que se apliquen las medidas de control apropiadas para la obtención y el trasplante de células y tejidos humanos.----------

3. El Ministerio de Salud Pública o quien este designe organizará inspecciones y aplicará medidas

de control periódicamente. El intervalo entre dos inspecciones no podrá ser superior a tres años.------

4. Se establecerán directrices relativas a las condiciones de las inspecciones y las medidas de control, así como sobre la formación y la calificación de los funcionarios encargados de ellas, con el fin de lograr un nivel uniforme de competencia y de resultados.----------

Artículo 8°.- Trazabilidad:----------

1. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos a través del Ministerio de Salud Pública exigirá la aplicación de todas las medidas necesarias para garantizar la trazabilidad del donante al receptor, y viceversa, de todas las células y tejidos obtenidos, tratados, almacenados o distribuidos en nuestro país.----------

Esta trazabilidad también se aplicará a todos los datos pertinentes sobre los productos y materiales que entren en contacto con dichas células y tejidos.-

2. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos garantizará la puesta en práctica de un sistema de identificación de donantes que asigne un código único a cada donación y a cada uno de los productos asociados con ella.--------

3. Todas las células y tejidos deberán estar identificados con una etiqueta que contenga la información o las referencias que permitan establecer un vínculo con la información contemplada en el Anexo II del presente Decreto.----

4. Para garantizar la trazabilidad íntegra de las células y los tejidos en todas sus fases, los datos se conservarán durante 20 años. Los datos también se podrán almacenar de forma electrónica.----------

5. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos establecerán los requisitos de trazabilidad para las células y los tejidos humanos, así como para los productos y materiales que entren en contacto con ellos y que tengan efectos sobre su calidad y su seguridad.----------

Artículo 9°.- Importación y exportación de células y tejidos humanos:----------

1. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos controlarán todas las importaciones de células y tejidos procedentes de terceros países y garantizarán que dichas células y tejidos cumplan con exigencias de calidad y

seguridad equivalentes a las establecidas en esta norma. ----------

2. El Ministerio de Salud Pública - Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos - tomarán todas las medidas necesarias para garantizar que todas las exportaciones de células y tejidos destinados a terceros países que cumplan con lo establecido en la presente norma.----------

3. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos podrán en caso de emergencia autorizar directamente la importación o la exportación de determinados tejidos y células.--------

4. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos verificará la equivalencia de las normas de calidad y seguridad.----------

Artículo 10°.- Registro de programas y obligaciones en materia de información:----------

1. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos mantendrán un registro accesible al público, de centros de trasplantes de células y

tejidos humanos, en el que se especificarán las actividades para las que están habilitados.----------

2. EL Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos mantendrá el registro de estas actividades. ----------

3. Los centros mantendrán un registro de sus actividades, incluidos los tipos y cantidades de células obtenidas, evaluadas, preservadas, procesadas, almacenadas, distribuidas, desechadas, o utilizadas de cualquier otra forma, y del origen y destino de las células y los tejidos humanos.----------

4. Los centros deberán comunicar al Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos en forma obligatoria la actividad referida a células y tejidos.----------

Artículo 11°.- Notificación de los efectos y reacciones adversos graves:----------

1. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos garantizará la existencia de un sistema para notificar, registrar y transmitir información sobre reacciones y acontecimientos adversos graves relacionados con la obtención, verificación, procesamiento, almacenamiento,

distribución, desecho y trasplante de células y tejidos humanos.----------

2. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos establecerá el procedimiento para notificar las reacciones y acontecimientos adversos.----------

3. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos notificará al Ministerio de Salud Pública la información referida a reacciones y acontecimientos adversos graves.--------

CAPÍTULO III

SELECCIÓN Y EVALUACIÓN DE LOS DONANTES

Artículo 12°.- Principios de la donación de células y tejidos:--------

1. Las leyes de trasplante vigentes en el país – Nº 14.005 del 17 de agosto de 1971 y Nº 17.668 del 15 de julio de 2003 - exige que la donación sea de carácter voluntario y no remunerado.----------

2. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos tomarán todas las medidas necesarias para garantizar que cualquier actividad de promoción y publicidad en apoyo de la donación de células y tejidos cuente con la autorización previa, en aras de velar por la precisión y seriedad

del mensaje a difundir. Estará prohibida la publicidad de la necesidad de células y tejidos o la posesión de los mismos con el objetivo de ofrecer o de tratar de obtener un beneficio económico o una ventaja comparable. ----------

3. El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos se esforzarán por garantizar que la obtención de células y tejidos se efectúe sin ánimo de lucro.----------

Artículo 13°.- Consentimiento:----------

1. El consentimiento deberá concederse libremente y de forma expresa, por escrito, antes de la donación.-

2. Solamente se autorizará la obtención de células y tejidos humanos cuando se hayan cumplido todos los requisitos sobre consentimiento informado obligatorio.----------

3.El Ministerio de Salud Pública y el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos tomarán las medidas necesarias para garantizar que los receptores, los donantes o sus familias reciban la información necesaria de acuerdo a lo mencionado en el Anexo III del presente Decreto.----------

4. El documento de consentimiento informado será archivado en el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos. El centro conservará un duplicado del mismo.----------

Artículo 14°.- Protección de datos y confidencialidad:----------

1. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos tomará las medidas necesarias para exigir y garantizar que todos los datos recogidos dentro del ámbito de aplicación de la presente normativa, incluida la información genética, a los que terceros tengan acceso, se hayan convertido en anónimos, a fin de que el donante y el receptor ya no sean identificables.----------

2. A tal fin, velarán por que:----------

a) se adopten medidas de protección de los datos y medidas de seguridad para evitar adiciones, supresiones o modificaciones no autorizadas de las fichas de los receptores y donantes, así como cualquier transferencia de información;----------

b) se establezcan procedimientos para solucionar las divergencias de datos; ----------

c) se impida la revelación no autorizada de dicha información, garantizando al mismo tiempo la

trazabilidad de las donaciones de acuerdo a Ley N° 17668 de 15 de julio de 2003;----------

3. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos tomará todas las medidas necesarias para garantizar que no se revele la identidad del receptor o receptores al donante o a su familia y viceversa, sin perjuicio de la comunicación de la información en caso de que el donante esté relacionado biológicamente con el receptor (Ley N° 17.668 de 15 de julio de 2003).------

Artículo 15°.- Selección, evaluación y obtención:----------

1. Se documentarán los resultados de la evaluación del donante y de los procedimientos de verificación y se comunicará al donante cualquier resultado anómalo pertinente.----------

2. En caso de donación autóloga, el médico responsable del paciente establecerá y documentará los criterios de adecuación, según la historia y las indicaciones terapéuticas de conformidad a las pautas establecidas.----------

3. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos velará por que todas las actividades relacionadas con la obtención de células

y tejidos se efectúen de conformidad con los requisitos mencionados en la presente norma.--------

CAPÍTULO IV

DISPOSICIONES RELATIVAS A LA CALIDAD Y LA SEGURIDAD DE LAS CÉLULAS Y TEJIDOS

Artículo 16°.- Gestión de la calidad:----------

1. Cada centro de obtención, procesamiento y trasplante de células y tejidos implantará un sistema de gestión de calidad.----------

2. Los centros tomarán todas las medidas necesarias a fin de garantizar que el sistema de gestión de calidad incluya como mínimo la documentación siguiente:----------

- Procedimientos de trabajo normalizados.----------
- Directivas.----------
- Manuales de formación.----------
- Formularios de transmisión de información.--------
- Registro de procedimientos.----------

3. Los equipos tomarán todas las medidas necesarias para garantizar que esta documentación esté accesible para inspecciones oficiales.----------

4. Los centros deberán mantener registros de los donantes durante 20 años. Los datos también se podrán almacenar de forma electrónica.----------

Artículo 17°.- Persona responsable:----------

1. Los centros deben designar a un responsable. Esta persona deberá poseer las calificaciones básicas:----------

- Poseer el título de Médico.----------
- Poseer una experiencia práctica de un mínimo de dos años en los ámbitos pertinentes.----------

2. La persona designada será responsable de lo siguiente:----------

a) Garantizar que cada unidad de células y/o tejidos sea procesada de conformidad con la legislación vigente.----------

b) Trasmitir al Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos la información pertinente a la obtención, procesado, almacenado, utilizado de células y/o tejidos.----------

c) Aplicar los requisitos establecidos en los artículos 15 al 22 inclusive del presente Decreto.----------

3. Los centros de obtención, procesamiento y trasplante de células y tejidos notificarán a las autoridades competentes el nombre del responsable mencionado en el numeral 1. Cuando se sustituya de forma permanente o temporal a esta persona, el centro comunicará inmediatamente a las

autoridades competente el nombre del nuevo responsable y la fecha en que asumirá sus funciones.----------

Artículo 18°.- Personal:----------

El personal de los centros directamente implicado en las actividades relacionadas con la obtención, el procesamiento, la preservación, el almacenamiento y la distribución de células y tejidos deberá disponer de la calificación necesaria para efectuar estas tareas y deberá recibir la formación pertinente.

Artículo 19°.- Recepción de células y tejidos:----------

1. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos velará por que todas las donaciones de células y tejidos humanos sean sometidas a pruebas de laboratorio conforme a los requisitos establecidos en la presente norma y por que la selección y aceptación de las células y tejidos cumplan los requisitos establecidos en ésta.---------

2. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos velará por que la documentación relacionada a las células y tejidos humanos cumplan los requisitos mencionados en la presente norma.----------

3. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos verificará que las condiciones de acondicionamiento de las células y tejidos humanos recibidos de centros nacionales e internacionales se ajustan a los requisitos establecidos y registrará este hecho. Todas las células y tejidos que no cumplan estas disposiciones deberán rechazarse.----------

4. Deberá documentarse la aceptación o el rechazo de las células y tejidos recibidos.----------

5. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos velará por que las células y tejidos humanos estén correctamente identificados en todo momento. Deberá asignarse un código de identificación a cada entrega o partida de células o tejidos.----------

6. Algunas células y los tejidos se mantendrán en cuarentena hasta que se cumplan los requisitos en materia de examen y de información del donante.----

Artículo 20°.- Procesamiento de células y tejidos:----------

1. El centro incluirá en sus manuales de procedimiento todo proceso que afecte a la calidad y la seguridad, y velará por que se lleve a cabo bajo condiciones controladas. Verificará que el equipo

utilizado, el entorno de trabajo y la concepción, la validación y las condiciones de control de los procesos se ajusten a los requisitos contemplados en Anexo IV del presente Decreto.----------

2. Cualquier modificación de los procesos utilizados en la preparación de las células y tejidos también deberá cumplir los criterios establecidos en el numeral 1.----------

3. El centro deberá incluir disposiciones especiales en sus manuales de procedimiento relativos a la manipulación de las células y tejidos que vayan a desecharse a fin de evitar la contaminación de otras células y tejidos, del entorno del procesamiento y del personal.----------

Artículo 21°.- Condiciones de almacenamiento de las células y los tejidos:----------

1. Los centros velarán por que todos los procedimientos asociados con el almacenamiento de células y tejidos estén documentados en los manuales de procedimientos y por que las condiciones de dicho almacenamiento, se ajusten a los requisitos contemplados en esta norma.----------

2. Los centros velarán por que todos los procesos de almacenamiento se desarrollen en condiciones controladas.----------

3. Los centros establecerán y aplicarán procedimientos de control de las áreas de acondicionamiento y almacenamiento a fin de evitar cualquier situación que pudiera afectar negativamente a la funcionalidad o la integridad de las células y tejidos.----------

4. Las células o tejidos tratados no serán distribuidos mientras no se cumplan todos los requisitos establecidos por la presente norma.--------

5. El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos garantizará que los centros de almacenamiento de células y tejidos dispongan de acuerdos y procedimientos que garanticen que, en caso de cese de actividad por cualquier razón, las células y los tejidos almacenados sean transferidos, previa autorización correspondiente, a otros centros habilitados, designados, autorizados y/o acreditados.----------

Artículo 22°- Etiquetado, documentación y acondicionamiento:----

Los centros velarán por que el etiquetado, la documentación y el acondicionamiento se ajusten a los requisitos contemplados en la presente norma.--

Artículo 23°.- Distribución:----------

El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos velará por la calidad de las células y tejidos durante la distribución. Las condiciones de distribución deberán ajustarse a los requisitos contemplados en esta norma.----------

Artículo 24°.- Relaciones entre centros y terceros:----------

1. Los centros celebrarán contratos por escrito con terceros cada vez que tenga lugar una actividad exterior que influya en la calidad y en la seguridad de células y tejidos procesados en cooperación con terceros. En particular, esto será de aplicación en los casos siguientes:----------

a) cuando el centro confíe a un tercero la responsabilidad de una fase de la obtención, y/o procesamiento de las células o tejidos;----------

b) cuando un tercero suministre bienes y preste servicios que afecten a la garantía de la calidad y a la seguridad de las células o tejidos, incluida su distribución;----------

c) cuando un centro preste servicios a otro que no esté autorizado y acreditado;----------

2. Los centros evaluarán y seleccionarán a terceros en función de su capacidad para cumplir las normas establecidas en la presente norma.----------

3. Los centros elaborarán una lista exhaustiva de los acuerdos contemplados en el numeral 1 que hayan celebrado con terceros.----------

4. En los acuerdos entre el centro y terceros deberán especificarse las responsabilidades que corresponden al tercero y detallarse los procedimientos.----------

5. Los centros transmitirán copias de sus acuerdos con terceros cuando lo exija el Ministerio de Salud Pública o el Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos.----------

CAPÍTULO V

INTERCAMBIO DE INFORMACIÓN, INFORMES Y SANCIONES

Artículo 25°.- Codificación de la información:----------

El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos establecerá un sistema para la identificación de las células y tejidos humanos, con el fin de garantizar su trazabilidad.

Artículo 26°.- Sanciones:----------

El Ministerio de Salud Pública aplicará sanciones por concepto de infracciones a las disposiciones adoptadas en la presente norma, entre un mínimo de U.R. 30 (treinta unidades reajustables) y un máximo de 1.000 (mil unidades reajustables), de acuerdo a lo dispuesto en el Decreto del Poder Ejecutivo N° 137/006 de 15 de mayo de 2006.--------

Estas sanciones serán eficaces, proporcionadas y disuasorias. ----------

CAPÍTULO VI

CONSULTA DE LOS COMITÉS

Artículo 27°.- Requisitos técnicos y su adaptación al progreso técnico y científico:----------

Los requisitos técnicos que se enumeran a continuación y su adaptación al progreso técnico y científico se decidirán de conformidad con la Ley N° 14.005, la Ley N° 17.668, el presente Decreto y el procedimiento descripto en el artículo 28:----------

a) requisitos para la habilitación, acreditación, designación o autorización del centro y del programa

b) requisitos para la obtención de células y tejidos humanos;----------

c) sistema de calidad, incluida la formación;----------

d) criterios para la selección del donante de células o tejidos;----------

e) pruebas de laboratorio general requeridas para los donantes;----------

f) pruebas de histotipificación requerida para donantes y receptores.----------

g) procedimientos de obtención de células y tejidos y recepción en el centro;----------

h) procedimiento de obtención de residuos quirúrgicos y recepción en el centro de procesamiento.----------

i) requisitos del método de preparación de células y tejidos;----------

j) procesamiento, almacenamiento y distribución de células y tejidos;----------

k) requisitos para la asignación y distribución al receptor de células y tejidos específicos.----------

Artículo 28°.- Consulta de uno o varios comités científicos:----------

El Instituto Nacional de Donación y Trasplante de Células, Tejidos y Órganos podrá consultar al comité o comités científicos competentes al definir o adaptar al progreso científico y técnico los requisitos técnicos contemplados en la presente norma.---------

Artículo 29°.- Intégrase al presente Decreto los Anexos I, II, III y IV que se adjuntan y forma parte del mismo.----------

Artículo 30°.- Comuníquese. Publíquese.----------

Decreto N°

Decreto Diario Oficial N°

Ref. N°

Dr. Tabaré Vázquez
Presidente de la República

ANEXO I

REQUISITOS PARA LA OBTENCIÓN DE CELULAS Y TEJIDOS

El centro encargado de la obtención de celulas y tejidos deberá garantizar ciertos requisitos mínimos y otras condiciones.

a) tener un equipo médico especializado en la obtención de células y tejidos y disponer del personal con la formación y experiencia necesarias para realizar este trabajo.

b) disponer de los documentos que especificarán las condiciones de la actividad y los protocolos que deberán seguirse.

c) contar con procedimientos de trabajo normalizados para la extracción, el empaquetado, la conservación y el desecho de las células o los tejidos.

d) instalar un sistema de gestión de la calidad.

e) garantizar que se lleven a cabo los estudios apropiados para evitar la presencia de enfermedades transmisibles.

f) disponer de las instalaciones y los recursos materiales necesarios para la extracción, el empaquetado, la conservación , y el desecho de las células.

g) garantizar que los procedimientos para la extracción, el empaquetado, la conservación , y el desecho de las células o tejidos se lleven a cabo conforme a lo establecido en el Programa correspondiente .

i) garantizar la trazabilidad adecuada de las células o tejidos extraídos, trasplantados , entregados o desechados, mediante un documento único por donante.

ANEXO II

REQUISITOS DE IDENTIFICACIÓN PARA LAS CÉLULAS Y TEJIDOS

ETIQUETADO DE LAS CÉLULAS O LOS TEJIDOS

El etiquetado de cada envase de células o tejidos deberá contener al menos la siguiente información:

a) número o código de identificación del donante.

b) tipo de células o tejido.

c) fecha de obtención.

d) centro de obtención

e) lote y cantidad

ETIQUETADO DEL CONTENEDOR DE ENVÍO

Cuando se envíen células o tejidos, cada contenedor deberá llevar una etiqueta en la que figuren al menos los siguientes datos:

a) identificación de las células o los tejidos;

b) identificación del centro de obtención (dirección y número de teléfono), y de la persona encargada de la entrega;
c) identificación del centro de destino (dirección y número de teléfono) y de la persona encargada de la recepción en el punto de destino.

DATOS QUE DEBERÁN REGISTRARSE EN EL CENTRO DE OBTENCION

Los datos que deberán quedar registrados en el centro de obtención son los siguientes:

a) duplicado del consentimiento;
b) identificación y características del donante: tipo de donante, edad, sexo y presencia de factores de riesgo;
c) revisión de los datos clínicos conforme a los criterios de selección de donantes;
d) resultados del examen clínico, de las pruebas de laboratorio y de otras pruebas
e) fecha y hora de la obtención y centro en el que se lleva a cabo;
f) equipo que la realiza y persona encargada de ella.
g) información sobre las soluciones de conservación utilizadas durante la obtención, incluida la composición, el lote, la fecha de

expiración, la temperatura, la cantidad, la concentración y el método de preparación;

h) material obtenido y características pertinentes;

i) incidentes notables ocurridos antes, durante y después de la obtención;

j) destino de las células;

k) método de conservación de las células y 3 años de conservación obligatorio.

ANEXO III

INFORMACIÓN QUE SE HA DE FACILITAR SOBRE LA DONACIÓN DE CÉLULAS Y TEJIDOS

A. DONANTES VIVOS

1. La persona encargada del proceso de donación garantizará que se haya informado adecuadamente al donante de, como mínimo, aquellos aspectos relacionados con la donación y el proceso de obtención. La información deberá facilitarse antes de la obtención.

2. La información deberá ser facilitada por una persona competente, capaz de transmitirla de manera adecuada y clara, utilizando términos fácilmente comprensibles por el donante.

3. La información deberá cubrir: el objetivo y la naturaleza de la obtención, sus consecuencias y riesgos, pruebas analíticas, si se realizan; registro y protección de los datos del donante, confidencialidad médica, fines terapéuticos y beneficios potenciales, así como información sobre las salvaguardas aplicadas para proteger al donante.

4. El donante deberá ser informado de que tiene derecho a recibir los resultados confirmados de las pruebas de laboratorio, explicados claramente.

5. Deberá informarse sobre la necesidad de exigir el consentimiento y la autorización obligatorios aplicables para que pueda llevarse a cabo el procesamiento de células y/o tejidos.

B. DONANTES FALLECIDOS

1. Toda la información deberá facilitarse y todos los consentimientos y autorizaciones deberán obtenerse de conformidad con la Ley 14005 de 17 de agosto de 1971 y la Ley 17668 de 15 de julio de 2003.

2. Los resultados confirmados de la evaluación del donante deberán comunicarse y explicarse claramente a las personas interesadas, de conformidad con la legislación vigente.

ANEXO IV

PROCESAMIENTO, ALMACENAMIENTO Y DISTRIBUCIÓN DE CÉLULAS Y TEJIDOS.

PROCESAMIENTO

Cada instalación de procesamiento de células o tejidos deberá tener un sistema adecuado de control de procesos.

Cuando los procedimientos técnicos no puedan verificarse en cualquier momento concreto durante el proceso, deberán ser controlados continuamente para garantizar que se cumplan los procedimientos de trabajo normalizados establecidos.

Cuando se aplique un procedimiento de inactivación microbiana a las células o tejidos, este deberá ser especificado, documentado y validado.

Cuando un tercero lleve a cabo cualquier paso del proceso, deberán recogerse en un acuerdo por escrito las especificaciones requeridas en lo que se refiere a la ejecución y la validación.

Los procesos deberán ser sometidos a una evaluación periódica crítica para garantizar que siguen alcanzando los resultados previstos.

Antes de introducir nuevos procesos estos deberán ser validados para demostrar que darán como resultado, células o tejidos que cumplan los procedimientos de trabajo normalizados del Programa.

Cuando en el procesamiento intervenga cualquier cambio importante, que implique equipo nuevo o modificado, reajustes importantes o cambios de localización, dichas etapas de validación deberán repetirse y documentarse.

Los entornos en los que se procesen las células o tejidos deberán ser adecuadamente controlados para minimizar o evitar las posibilidades de contaminación.

ALMACENAMIENTO

Deberán definirse las condiciones de almacenamiento necesarias (incluidos parámetros importantes como la temperatura) para mantener las propiedades requeridas de las células o los tejidos.

Los parámetros deberán ser controlados, vigilados y registrados para demostrar el cumplimiento de las condiciones especificadas.

Para cada tipo de condición de almacenamiento deberá especificarse el tiempo mínimo de almacenamiento de acuerdo a las pautas establecidas por los Comité de expertos correspondientes.

El periodo seleccionado deberá tener en cuenta el posible deterioro de las propiedades requeridas de las células o los tejidos, la evolución de los criterios de selección y examen del donante a lo largo del tiempo y la disponibilidad de otros tratamientos.

DISTRIBUCIÓN

1. Deberán definirse las condiciones de transporte necesarias (incluidos parámetros importantes como la temperatura) para mantener las propiedades requeridas de las células o los tejidos.

2. El empaquetado deberá garantizar que las células o los tejidos se mantienen en las condiciones establecidas en los procedimientos de trabajo normalizados.

3. Si se encargara de la distribución un tercero mediante contrato, deberá contarse con un acuerdo por escrito para garantizar que se mantengan las condiciones requeridas.

REPUBLIQUE DU BENIN

Loi N° 2010-40 DU 08 DECEMBRE 2010

portant code d'éthique et de déontologie pour la recherche en santé en République du Bénin.

L'Assemblée Nationale a délibéré et adopté en sa séance du 14 octobre 2010,

Suite à la Décision de conformité à la Constitution DCC 10-141 du 23 novembre 2010 de la Cour Constitutionnelle,

Le Président de la République promulgue la loi dont la teneur suit :

TITRE PREMIER :

DES DISPOSITIONS GENERALES

CHAPITRE PREMIER

DE L'OBJET, DU CHAMP D'APPLICATION ET DES PERSONNES CHARGEES DE LA RECHERCHE EN SANTE

Article 1er : Toute recherche entreprise en République du Bénin en vue du développement des connaissances en santé est régie par les dispositions de la présente loi.

Article 2 : La recherche en santé a pour objet de :

- Mettre au point des outils pour prévenir et soigner la maladie ou en atténuer les effets ;
- concevoir des approches plus efficaces pour la prestation des soins de santé tant à l'individu qu'à la communauté ;
- contribuer à mieux outiller les professionnels de la santé à des fins de prévention de la maladie, de restauration de la santé et de réadaptation.

Article 3 : Toute personne physique ou morale qui prend l'initiative d'une recherche en santé à la qualité de promoteur.

Lorsque plusieurs personnes physiques ou morales prennent l'initiative d'une même recherche, elles désignent en leur sein une personne qui fait office de promoteur et assume les obligations correspondantes.

Article 4 : Toute personne physique ou morale qui prend l'initiative d'une recherche en santé a la qualité de promoteur

Article 5 : Lorsque le promoteur confie la mise en oeuvre d'une recherche à une équipe de chercheurs, il désigne parmi eux un chercheur principal.

Lorsque la recherche est entreprise par plusieurs équipes, celles-ci désignent en leur sein un coordonnateur.

CHAPITRE II

DES PRINCIPES D'ETHIQUE DE LA RECHERCHE EN SANTE

Article 6 : Toute recherche impliquant des sujets humains doit être exécutée dans le respect des principes ci-après :

- la dignité humaine et les droits de l'homme ;
- la vulnérabilité humaine et l'intégrité personnelle ;
- l'anonymat ;
- la confidentialité ;
- les croyances et les pratiques socio-culturelles ;
- l'innocuité ;
- l'action bénéfique de la recherche ;
- l'équité de la recherche ;
- la restitution des résultats aux personnes concernées ;
- les règles de diffusion et d'utilisation des résultats ;
- le partage des bienfaits de la recherche.

Article 7 : L'implication d'êtres humains, en tant qu'objets de recherche, doit être subordonnée à la possibilité pour eux d'y consentir librement et en toute connaissance de cause.

Ces personnes ont la latitude de se soustraire du programme de recherche à n'importe quel moment sans crainte ni menace.

Article 8 : La recherche clinique et/ou la recherche biomédicale ne peut s'effectuer sur une personne en état de mort cérébrale qu'avec son consentement ou celui de sa famille, préalablement exprimé par écrit.

Article 9 : L'utilisation des cadavres humains à des fins de recherche doit se faire conformément aux textes en vigueur.

Article 10 : L'utilisation d'animaux à des fins de recherche doit se faire dans le respect des textes en vigueur.

TITRE II

DU DOMAINE DE LA RECHERCHE EN SANTE

CHAPITRE PREMIER

DU CHAMP D'APPLICATION ET DES COMPOSANTES DE LA RECHERCHE EN SANTE

Article 11 : La recherche épidémiologique, la recherche clinique, la recherche biomédicale, la recherche en médecine traditionnelle et la recherche sur les systèmes de santé sont les différentes composantes régies par la présente loi.

Article 12 : La recherche épidémiologique est toute étude qui vise à mesurer les facteurs déterminant ou influençant la survenue ou la persistance d'un problème de santé dans une population donnée.

Article 13 : La recherche clinique et la recherche biomédicale désignent les diagnostics, les essais ou expérimentations organisés et pratiqués directement sur l'être humain et/ou l'animal en vue du développement des connaissances médicales et pharmaceutiques.

Article 14 : La recherche en médecine traditionnelle est celle qui s'intéresse aux pratiques de soins de santé employées par des individus, des groupes et par une communauté, selon des traditions le plus souvent orales.

Article 15 : La recherche sur les systèmes de santé est celle qui porte sur les dispositions législatives et réglementaires relatives à la prévention des maladies et aux soins aux malades ainsi que sur les administrations, les personnes et les équipements qui y contribuent.

CHAPITRE II

DES MODALITES DE LA RECHERCHE EN SANTE

Article 16 : La recherche épidémiologique s'intéresse à l'état de santé des populations et à ses variations dans le temps et dans l'espace.

Elle peut être descriptive, analytique, évaluative, expérimentale, prospective, rétrospective et/ou théorique.

Article 17 : La recherche clinique et la recherche biomédicale sont avec ou sans bénéfice individuel direct.

Elles sont dénommées recherches clinique et biomédicale avec bénéfice individuel direct, lorsqu'il en est attendu un bénéfice direct pour la personne qui s'y prête.

Toutes les autres recherches clinique et biomédicale, qu'elles portent sur des personnes malades ou non, sont dénommées sans bénéfice individuel direct.

Article 18 : La recherche en médecine traditionnelle vise à :

- valider les propriétés thérapeutiques des plantes médicinales et extraits d'animaux et minéraux ainsi que leurs utilisations dans le traitement des différentes affections ;
- œuvrer efficacement pour la mise au point des produits de la médecine traditionnelle qui ont déjà fait leurs preuves thérapeutiques, tout en veillant à leur conditionnement hygiénique et à leur bonne conservation, en vue d'une utilisation à l'échelle nationale, régionale et internationale.

Article 19 : La recherche sur les systèmes de santé a pour but de favoriser la prise de décision rationnelle pour la gestion optimale des établissements et structures du système de santé.

Cette gestion vise à assurer, à moindre coût et avec une qualité meilleure de service, la promotion de la santé et la prestation de soins préventifs, curatifs, réadaptatifs et promotionnels aux différents niveaux du système.

TITRE III

DES CONDITIONS D'EXECUTION DE LA RECHERCHE EN SANTE

CHAPITRE PREMIER

DE LA RECHERCHE EPIDEMIOLOGIQUE

Article 20 : Toute recherche épidémiologique appliquée à un groupe d'individus ou à une communauté doit requérir l'accord préalable de ses représentants légaux.

Lorsqu'un groupe d'individus ou une communauté sur lequel porte l'étude doit être représenté par une personne mandatée, le chercheur doit s'assurer de l'authenticité de son mandat.

Article 21 : Le consentement éclairé à titre individuel des personnes participant à toute recherche épidémiologique est obligatoire.

Le consentement est dit éclairé lorsque la personne sollicitée comprend le but et la nature de la recherche, les obligations qu'implique sa participation à celle-ci ainsi que les risques et les avantages qui peuvent en découler.

Le refus d'une participation individuelle à une telle recherche doit être libre et respecté.

Article 22 : Lorsque des groupes d'individus sont constitués à des fins d'une recherche épidémiologique et qu'il n'est pas possible d'identifier leur représentant, le chercheur doit obtenir le consentement éclairé et libre de chacune des personnes appelées à participer à cette recherche.

Article 23 : Le consentement éclairé n'est pas exigé dans le cas où :

- il est impossible de localiser des personnes participant à toute recherche dont les dossiers seront examinés ;

- il existe un risque de biais dans les résultats de certaines recherches où les personnes participant à une recherche sont susceptibles de modifier leurs comportements.

CHAPITRE II

DES RECHERCHES CLINIQUE ET BIOMEDICALE

Article 24 : Les recherches clinique et biomédicale doivent être effectuées :

- sous la direction d'un chercheur qualifié, au cas où il n'est pas médecin, il doit être assisté d'un médecin justifiant d'une expérience d'au moins cinq (05) ans dans le domaine concerné ;
- dans des conditions matérielles et techniques adaptées à l'étude et compatibles avec les impératifs de rigueur scientifique et de sécurité des personnes qui se prêtent à ces recherches.

Article 25 : Toute recherche clinique et/ou biomédicale sur l'être humain doit :

- se fonder sur le dernier état des connaissances scientifiques et sur une expérimentation pré-clinique suffisante ;
- procurer aux personnes concernées un bénéfice largement supérieur au risque prévisible encouru ;
- viser à étendre les connaissances scientifiques sur l'être humain et les moyens susceptibles de maintenir ou d'améliorer son état de santé.

Article 26 : Préalablement à la réalisation d'une recherche clinique et/ou biomédicale sur une personne, le consentement libre, éclairé et exprès de celle-ci doit être recueilli après que le chercheur lui a fait connaître :

- l'objectif de la recherche, sa méthodologie et sa durée ;

- les résultats attendus, les contraintes et les risques prévisibles, même en cas d'arrêt de la recherche avant son terme ;

- l'avis du Comité national d'éthique pour la recherche en santé (CNERS) prévu aux articles 43 et suivants de la présente loi.

Le chercheur informe la personne dont le consentement est sollicité de son droit de refuser de participer à la recherche ou de retirer son adhésion à tout moment sans encourir aucune menace.

Le consentement est donné par écrit ou, en cas d'impossibilité, attesté par un tiers. Ce dernier doit être totalement indépendant du chercheur et du promoteur.

Article 27 : Les mineurs et les majeurs protégés par la loi admis dans un établissement sanitaire ou social ne peuvent être sollicités pour une recherche clinique et/ou biomédicale que si l'on peut en attendre un bénéfice direct pour leur santé et après avis du père et/ou de la mère, du tuteur ou du curateur.

Toutefois, ils peuvent être l'objet de recherches sans bénéfice individuel direct au cas où celles-ci remplissent les conditions suivantes :

- ne présenter aucun risque sérieux prévisible pour leur santé ;

- être utiles à des personnes présentant les mêmes caractéristiques d'âge, de sexe et d'état de santé ;

- ne pas pouvoir être réalisées autrement.

Article 28 : Lorsqu'une recherche clinique et/ou biomédicale est effectuée sur des mineurs ou des majeurs protégés par la loi, le consentement doit être donné par :

- les titulaires de l'exercice de l'autorité parentale, pour les mineurs non émancipés ;
- le représentant légal, pour les recherches avec bénéfice individuel direct ne présentant pas de risque prévisible sérieux, pour les mineurs ou les majeurs protégés par la loi ;
- le tuteur autorisé par le conseil de famille ou le juge des tutelles, dans les autres cas.

Article 29 : La recherche clinique et/ou biomédicale exige la souscription préalable par son promoteur, d'une assurance garantissant sa responsabilité civile et celle de tout intervenant, indépendamment de la nature des liens existant entre les intervenants et le promoteur.

Article 30 : La recherche clinique et/ou biomédicale ne donne lieu à aucune contrepartie financière directe ou indirecte pour les personnes qui s'y prêtent, hormis le remboursement des frais auxquels elles sont exposées et sous réserve de dispositions particulières prises par le Comité national d'éthique pour la recherche en santé.

Article 31 : La recherche clinique et/ou biomédicale avec ou sans bénéfice individuel direct ne doit comporter aucun risque prévisible sérieux pour la santé des personnes qui s'y prêtent.

Elle doit être précédée d'un examen médical des personnes concernées, effectué par un médecin désigné par le chercheur principal ou

le coordonnateur parmi les médecins agréés par le Comité national d'éthique pour la recherche en santé. Les résultats de cet examen leur sont communiqués par l'intermédiaire du médecin de leur choix, avant l'expression de leur consentement éclairé.

Article 32 : Nul ne peut se prêter simultanément à plusieurs recherches cliniques ou biomédicales sans bénéfice individuel direct.

Avant de soumettre une personne à une recherche clinique et/ou biomédicale, le chercheur a l'obligation de vérifier si elle n'est déjà impliquée dans une autre recherche en cours.

Pour chaque recherche sans bénéfice individuel direct, le protocole soumis à l'avis du Comité national d'éthique pour la recherche en santé détermine une période d'exclusion au cours de laquelle la personne qui s'y prête ne peut participer à une autre recherche sans finalité thérapeutique directe. La durée de cette période varie en fonction de la nature de la recherche.

Article 33 : La recherche clinique et/ou biomédicale sans bénéfice individuel direct doit être réalisée dans un lieu équipé de moyens matériels et techniques appropriés à la recherche et compatibles avec les impératifs de sécurité des personnes qui s'y prêtent. Le site de recherche ainsi défini doit être validé par le ministre en charge de la santé, après avis du Comité national d'éthique pour la recherche en santé.

Article 34 : Toute recherche clinique et/ou biomédicale avec ou sans bénéfice individuel direct sur les femmes enceintes, les parturientes et les mères qui allaitent doit remplir les conditions suivantes :

- être dénuée de tout risque sérieux prévisible pour la santé de la mère et/ou de l'enfant ;
- être utile à la connaissance des phénomènes de la grossesse, de l'accouchement ou de l'allaitement ;
- ne pouvoir être réalisée autrement.

Article 35 : L'utilisation à des fins thérapeutiques d'organes, de tissus ou de cellules d'origine animale qui ne sont ni des dispositifs médicaux, ni destinés à des thérapies géniques ou cellulaires, n'est possible que dans le cadre de recherches clinique et/ou biomédicale soumises aux dispositions de la présente loi.

Article 36 : Par dérogation aux dispositions de la présente loi, les recherches cliniques et/ou biomédicales portant sur l'utilisation thérapeutique de tels organes, tissus ou cellules chez l'être humain ne peuvent être mises en œuvre qu'après autorisation du ministre en charge de la santé, sur avis conforme du Comité national d'éthique pour la recherche en santé.

L'autorisation peut être assortie de conditions particulières portant notamment sur la surveillance à long terme des patients.

Article 37 : Des règles de bonnes pratiques relatives au prélèvement, à la conservation, à la transformation, au transport et à l'utilisation des organes, tissus et cellules des animaux, sont fixées conjointement par les ministres en charge de la santé et de l'élevage, sur proposition du Comité national d'éthique pour la recherche en santé.

Article 38 : Des arrêtés conjoints des ministres en charge de la santé et de l'élevage fixent :

- les règles de bonnes pratiques relatives à la sélection, à la production et à l'élevage des animaux ;

- les conditions sanitaires auxquelles doivent répondre les animaux desquels proviennent les organes, tissus et cellules utilisés ;

- les règles d'identification de ces animaux, organes, tissus et cellules permettant d'assurer la traçabilité des produits obtenus.

Article 39 : En cas de recherche clinique et/ou biomédicale à mettre en œuvre dans des situations d'urgence qui ne permettent pas de recueillir le consentement préalable de la personne qui y sera soumise, le protocole présenté à l'avis du Comité national d'éthique pour la recherche en santé peut prévoir que le consentement de cette personne ne sera pas recherché et que seul sera sollicité, celui des membres de sa famille dans les conditions prévues à l'article 26 de la présente loi. L'intéressé en sera informé, dès que possible, et son consentement lui sera demandé pour la poursuite éventuelle de la recherche.

CHAPITRE III

DE LA RECHERCHE EN MEDECINE TRADITIONNELLE

Article 40 : La recherche en médecine traditionnelle doit être effectuée :

- sous la direction d'un chercheur qualifié et, au cas où il n'est pas médecin, assisté d'un médecin et/ou d'un pharmacien justifiant d'une expérience d'au moins cinq (05) ans dans le domaine concerné et d'un praticien de la médecine traditionnelle, sur la base d'une collaboration préalable matérialisée par un accord écrit ;

- dans des conditions matérielles et techniques adaptées à la recherche et compatibles avec les impératifs de rigueur scientifique et de sécurité des personnes qui se prêtent à cette recherche.

Article 41 : Toute recherche en médecine traditionnelle sur l'être humain doit :

- se fonder sur une étude ethnomédicale ;

- se fonder sur la confirmation par le médecin du diagnostic et du résultat thérapeutique ;

- procurer aux personnes concernées un bénéfice largement supérieur au risque prévisible encouru ;

- viser à étendre les connaissances scientifiques sur l'être humain et les moyens susceptibles de maintenir ou d'améliorer son état de santé ;

- requérir l'accord préalable du Comité national d'éthique pour la recherche en santé.

CHAPITRE IV

DE LA RECHERCHE SUR LES SYSTEMES DE SANTE

Article 42 : Toute recherche sur les systèmes de santé doit requérir :

- la participation active des professionnels de la santé et des gestionnaires du système de santé ;

- l'accord et la participation des individus, des groupes et des communautés concernés ;

- l'accord préalable du Comité national d'éthique pour la recherche en santé.

TITRE IV

DU CONTROLE DE LA RECHERCHE EN SANTE

CHAPITRE PREMIER

DE L'ORGANE DE CONTROLE

Article 43 : Il est créé le Comité national d'éthique pour la recherche en santé (CNERS) ci-après dénommé : **" le Comité "**.

Le Comité est l'organe de contrôle de la recherche en santé en République du Bénin.

Il est chargé d'examiner les protocoles de recherche et de valider les compétences d'un chercheur qualifié.

Article 44 : Un décret pris en conseil des ministres, sur proposition du ministre en charge de la santé, détermine la composition, les attributions et les modalités de fonctionnement du Comité.

Article 45 : Le Comité est placé sous la tutelle du ministre en charge de la santé.

CHAPITRE II

DE LA MISE EN ŒUVRE DU CONTROLE

Article 46 : L'examen de tout protocole de recherche épidémiologique exigeant la présence de groupes témoins doit s'assurer que :

- les avantages, les risques, les contraintes et l'efficacité de la nouvelle méthode sont évalués par comparaison avec les meilleures méthodes diagnostiques, thérapeutiques ou de prévention en usage ;

- le groupe témoin ne reçoit de placebo que lorsqu'il n'existe pas de traitement éprouvé contre la maladie visée ; toutefois, même s'il existe un traitement éprouvé, les essais avec témoins sous placebo peuvent être éthiquement acceptables dans les conditions suivantes :

* lorsque, pour des raisons méthodologiques impérieuses et scientifiquement solides, il n'existe pas d'autres moyens qui permettent de déterminer l'efficacité ou l'innocuité de la nouvelle méthode prophylactique, diagnostique ou thérapeutique ;

* lorsqu'une méthode prophylactique, diagnostique ou thérapeutique est mise à l'essai pour une affection bénigne et que la participation à l'essai n'expose pas à des risques supplémentaires de dommages significatifs ou durables.

- si l'efficacité du traitement testé sur le groupe expérimental est supérieure à celle du traitement habituellement utilisé, tous les participants à l'essai en bénéficient immédiatement.

Article 47 : Lorsque la proposition de recherche est initiée de l'extérieur du Bénin par une personne physique ou morale, elle doit être accompagnée de l'avis du Comité d'éthique du pays initiateur ou de toute autre structure en tenant lieu, avant son examen par le Comité.

TITRE V

DES INFRACTIONS ET DES SANCTIONS

Article 48 : Le fait de pratiquer ou de faire pratiquer sur une personne une recherche clinique et/ou biomédicale ou une recherche en médecine traditionnelle sans avoir recueilli le consentement libre, éclairé et exprès de l'intéressé, des titulaires de l'autorité parentale ou du tuteur dans les cas prévus par les dispositions de la présente loi, est puni d'un emprisonnement de six (06) mois à douze (12)) mois et d'une amende de un million (1 000 000) à cinq millions (5 000 000) de francs ou de l'une de ces deux peines seulement.

Les mêmes peines sont applicables lorsque le consentement a été retiré avant qu'il ne soit procédé à la recherche.

La peine encourue lorsqu'il s'agit d'une personne morale est une amende de cinq millions (5 000 000) à quinze millions (15 000 000) de francs.

Article 49 : Le fait de pratiquer ou de faire pratiquer une recherche clinique et/ou biomédicale ou en médecine traditionnelle en infraction aux dispositions des articles 26 à 28 de la présente loi, est puni d'un emprisonnement de six (06) mois à un (01) an et d'une amende de un million

(1 000 000) à cinq millions (5 000 000) de francs lorsque le coupable est une personne physique.

Article 50 : Outre les peines prévues à l'article 49 ci-dessus, le coupable encourt les sanctions suivantes :

- l'interdiction à temps des droits civiques, civils et de famille suivant les dispositions du code pénal ;

- l'interdiction pour une durée de deux (02) ans à cinq (05) ans, d'exercer l'activité professionnelle ou sociale à l'occasion de laquelle ou dans l'exercice de laquelle l'infraction a été commise ;

- la confiscation du corps du délit ;

- l'exclusion de la soumission aux appels d'offres pour l'attribution des marchés publics pour une durée de cinq (05) ans à dix (10) ans.

La peine encourue lorsqu'il s'agit d'une personne morale est une amende de cinq millions (5 000 000) à quinze millions (15 000 000) de francs. Elle est également passible des sanctions prévues aux 2ème, 3ème et 4ème tirets de l'alinéa précédent.

Article 51 : Est puni d'un emprisonnement de six (06) mois à douze (12) mois et d'une amende de un million (1 000 000) à cinq millions (5 000 000) de francs ou de l'une de ces deux peines seulement :

- quiconque aura pratiqué ou fait pratiquer une recherche clinique et/ou biomédicale et une recherche en médecine traditionnelle en violation du respect de la confidentialité prévu à l'article 6 de la présente loi ;

- quiconque aura pratiqué ou fait pratiquer une recherche clinique et/ou biomédicale et une recherche en médecine traditionnelle sans avoir obtenu l'avis préalable prévu par les articles 26, 41 et 42 de la présente loi ;

- quiconque aura pratiqué ou fait pratiquer, continué de pratiquer ou de faire pratiquer une recherche clinique et/ou biomédicale et ou une recherche en médecine traditionnelle dont la réalisation a été interdite ou suspendue par le ministre en charge de la santé.

Article 52 : Le promoteur dont la responsabilité civile n'est pas garantie par l'assurance prévue à l'article 29 de la présente loi est puni d'un emprisonnement de six (06) mois à douze (12) mois et d'une amende de un million (1 000 000) à cinq millions (5 000 000) de francs ou de l'une de ces deux peines seulement.

Article 53 : Le fait de pratiquer ou de faire pratiquer sur une personne une recherche clinique et/ou biomédicale et une recherche en médecine traditionnelle autorisées mais ayant entraîné un homicide involontaire par maladresse, imprudence, inattention, négligence ou inobservation des règlements est puni d'un emprisonnement de six (06) mois à deux (02) ans et d'une amende de cinq cent mille (500 000) francs à un million (1 000 000) de francs ou de l'une de ces deux peines seulement.

Article 54 : Le fait de pratiquer ou de faire pratiquer sur une personne une recherche clinique et biomédicale et/ou une recherche en médecine traditionnelle autorisée mais ayant causé des blessures involontaires ou une maladie ayant entraîné par défaut d'adresse ou de précaution une incapacité temporaire de travail pour le sujet est puni d'un emprisonnement d'un (01) mois à douze (12) mois et d'une amende de cinquante mille (50 000) francs à deux cent cinquante mille (250 000) francs ou de l'une de ces deux peines seulement.

Article 55 : Quiconque aura pratiqué ou fait pratiquer sans le consentement du sujet ou sans l'avis du Comité une recherche clinique et/ou biomédicale et une recherche en médecine traditionnelle ayant entraîné la mort du sujet sera puni d'une réclusion criminelle à temps de cinq (05) ans à dix (10) ans.

S'il y a une incapacité de travail de vingt et-un (21) jours, la peine sera un emprisonnement de six (06) mois à deux (02) ans et une amende de cinq cent mille (500 000) francs à un million (1 000 000) francs.

Si l'incapacité temporaire de travail est de moins de vingt et un (21) jours, la peine sera un emprisonnement de six (06) mois à dix huit (18) mois et une amende de cinq cent mille (500 000) francs à un million (1 000.000) francs ou l'une de ces deux peines seulement.

TITRE VI

DES DISPOSITIONS FINALES

Article 56 : La présente loi qui abroge toutes dispositions antérieures contraires, sera exécutée comme loi de l'Etat.

Fait à Cotonou, le 08 décembre 2010.

Par le Président de la République,
Chef de l'Etat, Chef du Gouvernement,

Dr BONI YAYI.-

Le Ministre d'Etat Chargé de la Prospective, du Développement, de l'Evaluation des Politiques Publiques et de la Coordination de l'Action Gouvernementale,

Pascal Irénée KOUPAKI

Le Ministre de la Santé,

Issifou TAKPARA .-

Le Garde des Sceaux, Ministre de la de la Législation et des Droits de l'Homme,

REPUBLIQUE DE GUINEE

Travail - Justice - Solidarité

CODE DE LA SANTE PUBLIQUE

L'ASSEMBLEE NATIONALE DE LA REPUBLIQUE DE GUINEE.

VU LES DISPOSITIONS DE LA LOI FONDAMENTALE NOTAMMENT EN SES ARTICLES 59 ET 77.

APRES EN AVOIR DELIBERE, ADOPTE :

LE PRESIDENT DE LA REPUBLIQUE PROMULGUE LA LOI DONT LA TENEUR SUIT :

LIVRE PREMIER : DE LA NATION GENERALE DE SANTE PUBLIQUE

CHAPITRE I : DES PRINCIPES ET DISPOSITIONS FONDAMENTAUX

Article 1er : La présente Loi assure la protection et la promotion de la Santé, les droits et les obligations de l'individu, de la famille et de la Collectivité sur l'ensemble du Territoire de la République de Guinée.

Les objectifs essentiels qui concourent à l'amélioration de la Santé visent à procurer à l'individu, la famille et à la Collectivité les conditions sanitaires minimales leur permettant de mener une vie sociale et économiquement productive.

La mise en œuvre de ces objectifs est subordonnée à l'élaboration d'une carte sanitaire nationale définissant la sphère de compétence territoriale ou devra s 'appliquer le système médico-sanitaire guinéen.

Article 2 : La carte sanitaire nationale sera réglementée par un acte pris par le Ministre chargé de la Santé publique qui en assure l'application.

Article 3 : L'individu, la famille et la Collectivité jouissent de la protection médico-sanitaire contre les maladies endémo-épidémiques par l'amélioration constante et suivie des conditions de vie et de travail essentiellement par :

- La vaccination obligatoire pour l'ensemble de la Collectivité ;
- L'établissement des services de santé adéquats ;
- La lutte contre les endémies ;
- La protection des conditions alimentaires et nutritionnelles ;
- La formation des personnels de Santé ;
- La promotion et l'émulation de la recherche biomédicale, la recherche bioéthique, en génie génétique et en d'autres technologies médicales nouvelles.

Article 4 : La politique nationale de Santé de la République en Guinée se définit comme la totalité des activités inhérentes à la promotion et à la protection médico-sanitaire de l'individu, de la famille et de la collectivité en conformité avec les dispositions de l'article 3 de la présente Loi.

Cette politique nationale de Santé se caractérise par la prise en charge des soins conformément à l'aliéna 2 de l'article 1er de la présente Loi en assurant l'émulation des soins de Santé primaires.

Cette politique nationale de santé devra prendre en compte le développement du secteur privé.

ARTICLE 5 : Toutefois la Politique Nationale de Santé se base essentiellement sur les considérations normatives suivants :

- Le développement du secteur public et sa prévalence sur le secteur privé qui en est un complément ;
- Le renforcement de la complémentarité entre différents secteurs concourant à l'émulation de la Santé ;
- La planification, la recherche qui s'intègrent dans le cadre général de développement socio-économique ;
- La collaboration intersectorielle et multidisciplinaire dans la mise en œuvre des programmes de Santé ;
- La mobilisation des ressources humaines, matérielles, financières, budgétaires et extrabudgétaire en vue d'appuyer les programmes élaborés ;
- L'intégration des activités de prévention, de réhabilitation et de réadaptation ;
- La décentralisation et la hiérarchisation des Services de Santé ;
- L'auto-responsabilité de l'individu, de la famille et de la Collectivité, leur participation effective à la planification, à l'organisation, à l'application et à l'évaluation idoine des Services et programmes de Santé.

LIVRE DEUXIEME : DE LA SANTE PUBLIQUE

CHAPITRE I : DES MESURES APPLICABLES EN MATIERES DE GENIE SANITAIRE ET D'HYGIENNE PUBLIQUE

SECTION 1 : DES EAUX DESTINEES A LA CONSOMMATION HUMAIN

Article 6 : Par eau potable destinée à la consommation humaine, on entend une eau qui ne rend pas malade et qui est bonne à boire.

Article 7 : On distingue en principe les eaux préparées provenant des stations de traitement, des eaux naturelles souterraines provenant des captages, des eaux superficielles qui sont celles des rivières, fleuves, lacs, étangs et les eaux atmosphériques constituées par les eaux de pluies.

Article 8 : Les récipients de collecte, de stockage, de relevage, de distribution doivent être conçus dans des matériaux ne pouvant altérer la qualité de l'eau de l'industrie et de l'Energie avant leur mise en œuvre.

Article 9 : Les matériaux utilisables, au terme de l'article 8 susvisé doivent requérir l'avis favorable et compétent des Ministères chargés de la Santé publique, de l'Industrie et de l'Energie avant leur mise en œuvre.

Article 10 : Les matériaux à l'article 8 ne devront recevoir aucun revêtement susceptible de se désagréger, de réagir au contact de l'eau et altérer ainsi la qualité de l'eau destinée à la consommation.
Article 11 : Les matériaux utilisés conçus de telle sorte qu'ils ne doivent favoriser le retournement d'eau en cours afin qu'elles soient exemptes de toute contamination.

Ces équipements ne doivent pas entraîner une élévation permanente ou intermittente de l'eau.

Article 12 : Les ouvrages de captage, de traitement, de stockage, de distribution doivent être munis de dispositifs de protection ; ceux-ci doivent être approuvés par le service de Prévention du Ministère chargé de la Santé Publique.

Article 13 : Les ouvrages : puits, sources de captage, citerne, reconnus non conformes à la Réglementation relative à l'eau de consommation humaine devront subir un réaménagement de conformité ;

Article 14 : Les ouvrages de traitement e l'eau destinée à la consommation humaine ne doivent être conçus que dans des matériaux prévus par les dispositions de l'article 8 de la présente loi.

La conception doit permettre:

- Un échantillonnage en amont et en aval au niveau des équipements utilisés ;
- Un arrêt de tout traitement qui s'aère non conforme à la Réglementation relative au traitement des eaux ;
- Une dépollution active ou une déviation des eaux ;
- Une dépollution active ou une déviation des eaux polluées en cas d'accidents ou à des moments saisonniers de fortes pollutions.

Article 15 : Les produits utilisés pour le traitement des eaux doivent recevoir obligatoirement l'avis favorable du Service de Prévention du Ministère chargé de la Santé publique.

Article 16 : L'eau distribuée en tout point d'un immeuble ou dans un lieu public doit être une eau potable.

Article 17 : Afin d'éviter la dis-connexion de retour d'eau dans le réseau, l'on peut avoir recours à un autre procédé techniquement valable pour l'installation d'un tel dispositif idoine.

Article 18 : Une pression convenable fixé par les autorités chargées de la Santé publique doit être assurée à tous les points élevés des immeubles et lieux publics.

Article 19 : Dans les ouvrages de production d'eau chaude et d'eau froide, il ne doit jamais se produire un mélange entre l'eau du réseau et le fluide du vecteur utilisé.

Article 20 : Les appareils et ménagers, les équipements d'arrosage et lavage doivent être installés de manière à éviter toute contamination de l'eau du réseau et comporter de ce fait dispositifs de protection.

SECTION 2 : DES EAUX DE BAIGNADE

Article 21 : Les eaux de baignade doivent répondre à des critères de qualité caractérisés par des paramètres dont les valeurs admissibles sont fixées par les normes en vigueur.

Article 22 : Les eaux de piscine doivent obligatoirement être traitées à l'aide des produits autorisés par les Services chargés de l'hygiène publique, hormis les piscines alimentées en continue sans recyclage.

Article 23 : Toute piscine ouverte au public doit disposer de pédicures dont le nombre est fonction de la capacité d'accueil.

Article 24 : Les eaux de pédicule doivent être traitées d'une manière permanente.

Article 25 : Les abords des piscines doivent être régulièrement entretenus, lavés et désinfectés.

Article 26 : Les produits utilisés pour les traitements spéciaux de piscine doivent être soumis à l'avis préalable des services compétents du Ministère chargé de la Santé publique.

Article 27 : Tout lieu de baignade doit faire l'objet d'un contrôle périodique de qualité par les Services compétents du Ministère chargé de la Santé publique.

En conséquence les structures destinées aux eaux récréatives doivent être conformes aux normes des conceptions.

Article 28 : Aucune structure destinée à la baignade ne saurait communiquer d'une manière ou d'une autre, directement avec le réseau d'eau potable.

SECTION 3 : DE LA POLLUTION DES EAUX

Article 29 : Au terme de la présente Loi, la pollution des eaux peut se définir comme pollution chimique, organique ou nucléaire ou celle déterminée par la Réglementation internationale.

Cette pollution chimique suppose un apport des éléments susceptibles d'affecter la qualité de l'eau en modifiant le taux organique et biologique de celle-ci.

Tandis que la pollution nucléaire sous entend un apport d'éléments radioactifs nucléaires toxiques.

Article 30 : Autour des ouvrages de captage d'eau destinée à la consommation humaine doivent être aménagés un périmètre immédiat et un périmètre approché de protection.

Article 31 : Il est fait interdiction de mener toute activité susceptible d'induire la pollution des eaux dans le périmètre approché.

Article 32 : Tout déversement ou enfouissement des produits toxiques des déchets organiques, chimiques ou nucléaires sous quelque forme que ce soit dans le périmètre approché est formellement interdit sous peine de sanctions prévues par la loi en vigueur.

Article 33 : Tout déversement ou enfouissement des produits toxiques des déchets organiques, chimiques ou radioactifs dans le lit d'un cours d'eau (rivière, lac, étang, fleuve) et dans la mer, est prohibé sous peine des sanctions prévues par la Loi en vigueur.

Article 34 : Toute eau de surface est considérée comme eau polluée.

Article 35 : Une enquête devra être diligentée dans la société dans le cas d'utilisation de l'eau de surface par les services compétents du Ministère chargé de la Santé Publique, pour déterminer :

- Si le niveau et la nature de pollution seraient susceptibles d'être corrigés par les traitements à proposer ;

- S'il n'existe pas une cause de pollution permanente en amont de la prise d'eau ; l'enquête requiert par conséquent l'avis des autorités compétentes pour la réalisation ou non de l'ouvrage.

SECTION 4 : DE LA SURVEILLANCE HYGIENIQUE DES EAUX DESTINEES A LA CONSOMMATION HUMAINE

Article 36 : Il est procédé à une surveillance sanitaire de la qualité des eaux afin de suivre les variations de qualité à des moments donnés et en des points choisis pour prévenir toute altération de leur qualité. Les normes définies étant celles des Règlements sanitaires en vigueur.

Article 37 : Tout ouvrage, canalisation neuve ou ancienne doit subir, soit avant la mise en service, soit périodiquement, un rinçage et une désinfection.

La mise en service d'un réseau, collectif public ou privé ne peut effectuée qu'après délivrance d'un Certificat de conformité par les Services compétents du Ministère chargé de la Santé Publique.

Article 38 : La surveillance et le contrôle de la qualité des eaux destinées à la consommation humaine sont assurés par la Division Prévention et le Laboratoire National de Santé publique du Ministère chargé de la Santé Publique.

SECTION 5 : DU LABORATOIRE DE CONTROLE DE L'EAU

Article 39 : Le laboratoire de contrôle de l'eau fait partie de l'unité hydrologie - bromatologie du Département Chimie Pharmaceutique et Alimentaire de l'Institut National de Santé Publique.

Il est le laboratoire de référence pour le contrôle des eaux sur toute l'étendue du Territoire National.

Article 40 : Ce laboratoire a pour mission essentielle :

- Le contrôle de l'eau de boisson et destinée à d'autres usages pour le compte du Ministère chargé de la Santé dans l'intérêt de la Santé publique ;

- Vérifier le respect des normes OMS relatives à la qualité de l'eau en Guinée ;

- Recueillir auprès des services compétents les données de base (hydrogéologie, physique) des points d'eau en Guinée ;

- Proposer des normes de qualité concernant la production, l'importation et la commercialisation de l'eau en Guinée.

Article 41 : Le laboratoire est dirigé par un cadre pharmacien ou un ingénieur sanitaire ou un médecin ayant une compétence complémentaire dans les analyses bactériologiques et chimiques de l'eau.

SECTION 6 : DE L'EVACUATION DES EXCRETA ET DES EAUX USEE DOMESTIQUES ET INDUSTRIELLES

Article 42 : Sont considérées comme eaux usées au titre du présent Chapitre :

- Les eaux usées domestiques ;
- Des eaux ménagères (eaux de lavage de linge, cuisine, douche) ;
- Des eaux vannes (eaux industrielles constituées de tous les rejets liquides provenant des industries).

Article 43 : L'écoulement ou le développement des eaux usées domestiques dans le milieu naturel ou sur les voies publiques est formellement interdit aux termes de la présente Loi.

Article 44 : Toute concession doit être dotée d'ouvrages sanitaires destinés à la collecte et au traitement des fèces.

A cet effet:

- Toute défécation en plein air est interdite ;
- Tout enfouissement d'excréta dans le milieu naturel est formellement proscrit.

Article 45 : Les eaux usées domestiques doivent subir un traitement préalable dans des ouvrages sanitaires avant tout rejet.

Le rejet des effluents d'ouvrages ne peut s'effectuer que sur l'autorisation des Services compétents du Ministère chargé de la Santé publique, après avoir constaté q'une telle opération est techniquement admise.

Article 46 : Le Ministère chargé de la Santé Publique définit les modalités d'implantation et de conception des ouvrages sanitaires.

Article 47 : Les eaux d'égout doivent obligatoirement subir un traitement préalable dans une station d'épuration avant tout rejet. Cependant le rejet des effluents de station d'épuration dans le milieu naturel ne peut être admis d'après avis des Ministères chargés de la Santé publique et de l'Environnement.

Article 48 : Tout rejet des eaux usées industrielles brutes dans la mer, les cours d'eau, les étangs, les lacs, les caniveaux ou les égout publics est formellement interdit.

Article 49 : Les eaux usées industrielles, avant tout rejet, doivent obligatoirement subir un ou des traitements conformément à la Réglementation en vigueur.

Article 50 : Avant tout rejet, les eaux usées traitées doivent répondre à des critères de qualité physique, chimique, et bactériologique garantissant l'équilibre du milieu récepteur.

Article 51 : Les critères de qualité des effluents traités en fonction des milieux récepteurs sont généralement consignés dans les directives techniques conçues par les Services techniques compétents du Ministère chargé de la Santé publique et du Ministère chargé de l'Environnement.

SECTION 7 : DE L'ELIMINATION DES DECHETS SOLIDES MENAGERS ET INDUSTRIELS

Article 52 : Les déchets toxiques d'industrie et les déchets spéciaux d'hôpitaux sont éliminés impérativement conformément aux dispositions réglementaires.

Article 53 : Les déchets toxiques d'industrie et les déchets spéciaux d'hôpitaux sont éliminés impérativement conformément aux dispositions réglementaires.

Article 54 : Toute décharge brute de déchets et de quelque nature que ce soit est strictement interdite.

Article 55 : Toute production de déchets solides, soit au niveau des autorités publiques, soit des responsables privés, la mise en place de systèmes adéquats de traitement de déchets soumis à l'approbation des Services compétents du Ministère chargé de la Santé publique.

Article 56 : Les boues de vidange d'ouvrages sanitaires et les boues de stations d'épandage doivent obligatoirement subir un ou plusieurs traitements autorisés par les Services compétents des Ministères chargés de la Santé publique et de l'Environnement avant la mise en décharge ou une éventuelle réutilisation.

SECTION 8 : L'USAGE DES PESTICIDES DANS LA LUTTE ANTIECTORIELLE

Article 57 : Les secteurs public et privé devront concourir à l'établissement régulier des normes réglementant la distribution et l'utilisation des pesticides conformément aux dispositions des Conventions internationales.

Article 58 : Par pesticides on entend toute substance ou association de substances qui est destinée à repousser, détruire ou combattre les ravageurs y compris les vecteurs des maladies humaines ou animales et espèces indésirables de plantes ou d'animaux causant des maladies humaines ou animales et espèces indésirables durant la production, la transformation, le stockage, le transport ou la commercialisation des denrées alimentaires, des produits agricoles, du bois et des produits ligneux ou des aliments pour animaux, ou qui peut être administrée aux produits ligneux ou des aliments pour animaux, ou qui peut être administrée aux animaux pour combattre les insectes, les arachnides et les autres endo ou hecto parasites.

Le terme comprend des substances destinées à être utilisées comme régulateurs de croissance des plantes comme défoliants, comme agents de dessiccation comme agents d'éclaircissage des fruits ou pour empêcher la chute prématurées des fruits ainsi que les substances appliquées sur la culture soit avant, soit après la récolte, pour protéger les produits contre la détérioration durant d'entreposage et le transport.

Article 59 : Par industrie de pesticides, on entend tos les organismes et toutes les personnes s'occupant de la fabrication, de la formulation ou de la commercialisation des pesticides et des produits pesticides.

Article 60 : Par poison provenant des pesticides, on entend toute substance qui, absorbée en quantité relativement minime par les êtres humains, les plantes

ou les animaux, peut causer des troubles organiques ou fonctionnels, générateurs de lésions même mortelles.

Article 61 : Par homologation des pesticides, on entend le processus par lequel les autorités compétentes approuvent la vente et l'utilisation de d'un pesticide après examen des données scientifiques complètes montrant que le produit en cause est efficace pour les usages prévus et ne présente pas de risque excessifs pour la santé humaine ou animale ou pour l'environnement.

Article 62 : Il est interdit en République de Guinée tout pesticide pour lequel toutes les utilisations homologuées sont prohibées par les Services de Santé et de l'Environnement ou les demandes d'homologation ou autres actions équivalentes pour toute utilisation, lorsque celles-ci ont été rejetées pour des motifs touchant la Santé publique ou à la protection de l'environnement.

Article 63 : Toute infraction aux présentes dispositions en l'usage des pesticides sera punie d'un emprisonnement de 2 à 5 ans et d'une amende de 100.000 à 2 millions de francs guinéens sans préjudice de l'application des dispositions du Code pénal.

CHAPITRE II: DE L'HYGIENE ALIMENTAIRE

Article 64 : On entend par hygiène alimentaire, l'hygiène des établissements alimentation et de l'hygiène des denrées alimentaires.

Article 65 : Aux termes de la présente Loi, les magasins de vente de denrées alimentaires doivent être obligatoirement aérés, pourvus de ventilateurs, suffisamment éclairés et le sol en matériaux durs et lavables.

Article 66 : Les comptoirs de vente et les matériels en contact avec les denrées alimentaires ne doivent entraîner aucune contamination de celles-ci. En conformité avec l'article 65, des mesures énoncées par voie réglementaire détermineront les conditions d'aménagement et d'exploitation desdits comptoirs de vente, en vue de placer ces denrées alimentaires à l'abri de toute contamination, soit pendant la manipulation, soit pendant stockage.

Article 67 : Les magasins d'entreposage destinés à stocker de telles denrées sont également soumis aux dispositions des articles 69 et 70 ci-dessous.

Article 68 : Tout lieu de vente de denrées alimentaires devra être maintenu dans un état de salubrité constant.

Article 69 : Les moyens de transport utilisés pour les denrées alimentaires ne devront pas servir également au transport des hommes, des animaux ou des marchandises pouvant altérer ou contaminer ces denrées.

Article 70 : Les conditions d'aménagement et de fonctionnement des abattoirs publics et privés doivent être définies selon les directives techniques et sanitaires requises.

Article 71 : Les fabriques et laboratoires de préparation des aliments doivent être conformes aux normes de construction d'entretien et d'hygiène prescrites par la Réglementation en vigueur.

SECTION 1 : DES BOISSONS AUTRES QUE LE LAIT

Article 72 : Toute eau destinée à la préparation des boissons, l'entretien ou d'autres opérations doit résulter de l'eau distribuée par le réseau public, hormis les mesures formelles édictées par les directives de l'autorité compétente justifiant de sa potabilité.

Article 73 : Les matériaux utilisés en vue du conditionnement, du bouchage tels que : capsules, rondelles, lièges doivent être neufs et dans un état de propreté susceptibles d'empêcher toute contamination du liquide.

Les machines, les appareils et récipients utilisés devront être constamment nettoyés, rincés et désinfectés.

Les emballages utilisés telles que bouteilles en verre, doivent être abandonnés dès que le niveau d'usure est assez avancé.

SECTION 2 : DE LA GLACE ALIMENTAIRE

Article 74 : Toute fabrication de glace alimentaire n'excluant pas le contact avec le fluide réfrigérant est formellement interdite.

Section 75 : Le lait et les produits laitiers destinés à la consommation humaine doivent être maintenus à l'abri de toute altération température élevée, de même que leurs emballages d'origine doivent être conformes aux normes en vigueur.

Article 76 : Il est formellement interdit l'usage des additifs alimentaires, en l'occurrence, stabilisants, colorants, parfumants et conservateurs. Les aliments qui dispositions du Codex alimentarus de l'OMS/FAO.

SECTION 4 : DES VIANDES – DES VOLAILLES ET DES Œufs

Article 77 : Conformément aux Ordonnances n° 075/PRG/SGG/89 et n° 022/PRG/SGG/90 relatives à la Police sanitaire des animaux en République de Guinée, à la Réglementation de l'Inspection et de l'Hygiène des denrées alimentaires d'origine animale fixant des règles applicables à la vente, au stockage des denrées alimentaires sur les marchés, les normes suivantes seront obligatoirement observées :

- L'animal destiné à l'abattage doit faire l'objet d'un examen sur pied avec présentation d'un Certificat sanitaire dans les 24 heures qui précèdent d'opération ;
- Tout animal suspect ou présentant des signes évidents de maladie ne peut être abattu, que conformément aux mesures qu'énonceront le Ministre chargé de l'Elevage définissant les modalités et les conséquences de l'examen anté-mortem :
- L'abattage doit être effectué dans de bonnes conditions d'hygiène, évitant toute souillure et toute contamination de carcasse tout en limitant la souffrance de l'animal.

D'une manière générale, les mesures prévues par l'Ordonnance n° 022/PRG /SGG/90 précitée et dont les normes régissent l'abattage d'animal y seront appliquées.

Article 78 : Les dépilage et le déplumage seront effectués de manière à éviter toute contamination du gibier ou de la volaille.

Par conséquent, le gibier dépilé ou la volaille déplumée sera placé dans un emballage conformément aux normes du codex alimentarus de l'OMS/FAO.

Article 79 : Il es formellement interdit d'utiliser des produits chimiques, exceptés les conservateurs et stabilisants dûment autorisés par la Réglementation du codex alimentarus de l'OMS/FAO.

Article 80 : Les œufs destinés à la consommation seront entreposés à l'abri de tout contact susceptible de les altérer. Ils seront placés dans des plateaux vendus. Les coquilles doivent être indemnes de tout traumatisme.

Article 81 : Les qualités comestibles des denrées destinées à la consommation humaine devront être conformes aux normes du codex alimentarus de l'OMS/FAO et aux mesures énoncées par les autorités compétentes chargés de l'Hygiène publique.

SECTION 5 : DES PRODUITS DE MER ET D'EAU DOUCE

Article 82 : Les produits de mer et d'eau douce fraîchement péchés seront étendus sur des étagères recouvertes de matériaux inaltérables facilement lavables et désinfectables.

Toutefois, la conservation desdits produits se fera au moyen de fumage, de la congélation ou de la surcongélation.

L'utilisation de produits chimiques à cet effet est formellement interdite.

Sont également interdits:

- L'arrosage et le trempage des huîtres n eau de mer ;
- Le rafraîchissement avec la glace non alimentaire ou au moyen des feuillages, d'herbes ou de tissus imbibés d'eau non potable, la vente de lots non munis de l'étiquette de salubrité délivrée par l'autorité compétente ;
- L'ouverture des huîtres et coquillages non destinés à la consommation immédiate.

Article 83 : Il sera assuré un contrôle du traitement, du stockage, de la manutention et de la distribution du poisson, des cuirassés, des conserves et denrées alimentaires congelées par les Services compétents.

SECTION 6 : DE L'ALIMENTATION ANIMALE OU VAGETALE

Article 84 : L'enfouissement, le dépôt ou le déversement des déchets solides, industriels, de boues des stations, d'épuration non traitées sur des terrains cultivés de fruits et légumes pouvant être consommés crus sont formellement interdits

Article 85 : Les autorités compétentes procéderont à une enquête préalable avant toute implantation d'une aire de culture maraîchère. L'on prendra en considération, le périmètre de protection immédiat et la nature de protection, la qualité de l'eau utilisée.

Il est formellement interdit l'arrosage des jardins potagers par des eaux polluées.

Article 86 : Toute importation d'aliments d'origine animale ou végétale requiert l'autorisation e le contrôle des autorités compétentes.

Article 87 : Les aliments non traditionnels obtenus à partir de matières animales ou végétales ou des produits alimentaires comme les farines, la levure, les isolats de protéines, ne peuvent être vendus qu'après avis des Ministres chargés de la Santé Publique, de l'Elevage et de l'Agriculture.

Article 88 : Toute infraction commise en violation des dispositions des articles 84, 85, 86, 87 ci-dessus, sera condamnée à un emprisonnement de
6 mois à 1 an et d'une amende de 200.000 à 500.000 francs guinéens ou de l'une de ces deux peines seulement sans préjudice de l'application des dispositions du Code pénal.

SECTION 7 : DE LA RESTAURATION COLLECIVE

Article 89 : Un restaurant doit obligatoirement répondre aux normes et critères suivants :

- Les mûrs, parois, et sols seront maintenus dans un état de propreté ;
- L'établissement devra disposer d'installations sanitaires conformes aux normes d'hygiène ;
- L'établissement doit être suffisamment aéré et éclairé ;
- Les tables doivent être constamment propres, les couverts, carafes d'eau et matériels utilisés à l'usage de la cuisine doivent être tenus dans un constant état de propriété.

Article 90 : Les grillages de la restauration collective devront répondre obligatoirement aux normes et critères ci-après :

- Le stockage de denrées à préparer sera assuré à l'aide de congélateur ;
- La congélation des denrées à préparer sera assurée à l'aide de congélateur ;
- La congélation des denrées devra se faire dans des récipients propres recouverts pour les poissons et sur des tringles en parfait état de propriété pour la viande qui sera emballée dans un sac en plastique réglementaire dans lequel s'écoulera le jus et qui en assure la protection ;
- Le découpage sera effectué sur une surface lisse, lavable et facilement désinfectable, l'aide de matériels constamment nettoyés et maintenus propres ;
- Les grilles doivent être nettoyées et lavées après chaque usage ;
- L'établissement doit être desservi en eau par le réseau public ou être alimenté en eau reconnue potable par le Laboratoire National de Santé publique.

Article 91 : Toute infraction aux dispositions des articles 89 et 90 de la présente Loi sera punie d'un emprisonnement de 6 mois à 1 an et d'une amende de 50.000 à 500.000 francs guinéens ou de l'une de ces deux peines seulement, sans préjudice de l'application des dispositions su code de l'Environnement.

SECTION 8 : DE L'HYGIENE DES PLATS ET DES CUISINES

Article 92 : Les plats chauds doivent être apportés directement de la cuisine au consommateur.

- Les plats chauds cuisinés, pour être consommé chauds ou non, doivent répondre aux dispositions du Codex-alimentarus de l'OMS/FAO ;
- Les plats préparés le jour même de leur consommation, doivent être entreposés dans une enceinte réfrigérée à plus de 3° C dans l'attente du service ;
- Dans les établissements dits « libre service », le service individuel doit être contrôlé et les plats présentés protégés pour éviter toute souillure ou contamination des denrées.

SECTION 9 : DE L'HYGIENE DU PERSONNEL

Article 93 : Le personnel des restaurants doit subir régulièrement une visite médicale.

Chaque employé doit disposer de trois blouses ou tabliers.

Tout employé atteint d'une maladie contagieuse doit être libéré pour subir des soins médicaux. Il ne pourra retrouver son emploi qu'après guérison complète, et ce, conformément aux dispositions du Code du Travail.

CHAPITRE III : DE LA SOLUBRITE DES EDIFICES, BATIMENTS D'HABITATION ET DES PROJETS D'AMENAGEMENT

SECTION 1 : DE LA SALUBRITE DES EDIFICES ET BATIMENTS

Article 94 : Tous projets d'aménagement des édifices et de bâtiments d'habitation doivent être conformes aux dispositions du Décret n° 199/PRG /SGG/89.

L'on devra également tenir obligatoirement compte de la liste des travaux et ouvrages conformément à l'annexe dudit Décret.

Article 95 : Toutefois ces édifices et bâtiments seront dotés de poubelles servant à la collecte des ordures produites par les bureaux et les habitations.

Ces ordures seront ensuite transportées en bordure de route pour être ramassées par les Agents des Voiries.

Article 96 : Le déversement d'eaux résiduelles dans les caniveaux conçus à usage des eaux de ruissellement, conformément à l'article 30 du Code de l'Environnement, est formellement interdit.

Article 97 : Toute infraction aux dispositions des articles 95 et 96 de la présente Loi sera punie d'un emprisonnement de 6 mois à 1 an et d'une amende de 50.000 à 1.000.000 de francs guinéens ou de l'une de ces deux peines seulement sans préjudice de l'application des dispositions du Code de l'Environnement.

SECTION 2 : DES PROJETS D'AMENAGEMENT

Article 98 : Une concertation préalable des Ministères chargés de l'industrie, de la Santé publique, de l'Environnement et des Travaux Publics est obligatoire en vue de l'élaboration de tout projet d'aménagement. Auquel cas, des avis techniques seront nécessairement requis avant toute exécution des travaux de génies. Une autorisation officielle sera alors délivrée avant les travaux.

Article 99 : La décision définitive en matière d'aménagement est du ressort du Comité interministériel pour l'action sanitaire et sociale.

Article 100 : La décision prise devra nécessairement comporter une étude de faisabilité faisant mention des effets nuisibles du projet sur la santé des populations concernées et des mêmes effets sur l'équilibre du milieu naturel.

Article 101 : Toute infraction aux dispositions des articles 98, 99 et 100 de la présente Loi entraîne la démolition de ces ouvrages aménagés et l'auteur sera puni d'une amende de 300.000 à 1.000.000 de francs guinéens et d'un emprisonnement de 3 mois à 1 an ou de l'une de ces deux peines seulement sans préjudice de l'application des dispositions du Code pénal.

Article 102 : Par aménagement aux termes des dispositions des articles 98, 99 et 100 de la présente Loi, on entend les travaux infrastructurels, susceptibles de causer des préjudices à l'environnement et les activités utilitaires pouvant générer des déchets susceptibles d'affecter la Santé publique.

SECTION 3 : DES DECHETS SOLIDES, LIQUIDES ET INDUSTRIELS

Article 103 : Conformément aux normes prescrites par le Code de l'Environnement, les Services des Voiries de chaque localité détermineront les conditions de collecte et d'élimination des déchets solides, liquides et industriels.

Article 104 : Les particuliers de chaque localité prévue à l'article 103 se conformeront aux conditions et aux modalités fixées par les Services des Voiries quant à la fréquence des collectes d'élimination des déchets liquides et solides.

Les Ministères chargés de la Santé Publique et de l'Environnement déterminent par voie réglementaire les normes relatives à l'élimination de ces déchets, soit par incinération ou par enfouissement.

Article 105 : Il est obligatoire d'aménager dans chaque localité une ou plusieurs décharges destinées à la collecte des déchets solides.

Ces décharges aménagées dans les lieux convenablement choisis en tenant compte de la géologie, seront entretenus par les Services des Voiries.

Ces décharges devront être gérés selon les normes techniques d'élimination des déchets et de la protection du milieu naturel des nuisances susceptibles d'être préjudiciables à la Santé publique et à l'environnement.

Article 106 : Tous les établissements industriels doivent obligatoirement déclarer la nature des déchets résultant de l'exploitation de leurs industries et envisager avec les Services des Voiries les conditions de leur élimination.

SECTION 4 : DU BRUIT

Article 107 : Les nuisances résultant du bruit sont préjudiciables à la Santé publique. Les normes techniques appropriées seront obligatoirement appliquées pour l'élimination du bruit.

Ces normes doivent être observées tant dans les locaux à usage d'habitation, sur les lieux de travail que des artères des localités.

Des dispositions réglementaires seront prises en tant que de besoin en vue de déterminer les conditions d'élimination du bruit dans les ateliers, les locaux à usage d'habitation et commercial.

SECTION 5 : DES SUBSTANCES RADIOACTIVES, TOXIQUE ET NUCLEAIRES

Article 108 : La manipulation des substances radioactives et toxiques peut comporter les risques préjudiciables à la Santé publique.

Ainsi, le transport, le stockage et l'enfouissement desdites substances nécessitent certaines précautions techniques qui seront fixées par voie réglementaire en ayant recours à un cahier de charge.

Article 109 : Les risques et l'intérêt que procurent les rayonnements ionisants aux plans diagnostique et thérapeutique nécessitent une réglementation visant à déterminer formellement le recours au procédé de métier nucléaire.

Article 110 : Lorsqu'il sera établi que les substances radioactives ou toute source de rayonnement ionisant sont susceptibles de mettre en danger la Santé publique, le Ministère chargé de la Santé publique en collaboration avec les Ministères concernés pourraient prendre des dispositions préventives destinées à écarter tous risque de contamination.

Article 111 : Sera punie d'une amende de 20.000.000 à 100.000.000 de francs guinéens et d'une emprisonnement de 5 à 20 ans ou de l'une de ces deux peines seulement sans préjudice de l'application du Code de l'Environnement, toute personne qui aura manipulé, déposé, stocké et enfoui des substances radioactives, toxiques et nucléaires sur le milieu naturel.

CHAPITRE IV : DES MORGUES, OPERATIONS MORTUAIRES ET CIMETIERES

Article 112 : Tout projet d'aménagement de cimetière requiert nécessairement l'autorisation préalable du Ministère chargé de la Santé publique, lequel examinera si la demande formulée est conforme aux exigences concernant la distance entre le cimetière et les localités à usage d'habitation et les sources d'approvisionnement en eau, aux conditions d'inhumation, d'exhumation, du transport et d'embaumement du corps humain.

Article 113 : Toute incinération de corps ne saurait avoir lieu sans l'autorisation de l'Officier de l'état civil.

Les conditions d'incinération seront fixées par le Ministère chargé de la Santé publique.

SECTION 1 : DES MORGUES HOSPITALIERES

Article 114 : Il doit être créé dans chaque Hôpital, après avis préalable des Ministères chargés de la Santé Publique, de l'Intérieur, de l'Equipement, une morgue hospitalière.

Article 115 : le corps d'une personne décédée ne sera admis dans une morgue qu sous conditions résolutoires en l'occurrence d'un Certificat de décès ou sur réquisition de la Police.

Article 116 : L'admission dans une morgue hospitalière a lieu dans un délai de 24 heures après le décès, conformément aux dispositions de l'article 115 de la présente Loi.

Toutefois elle sera subordonnée le cas échéant à la déclaration des nom, prénoms, âge, sexe, profession et domicile du défunt.

SECTION 2 : DE L'INHUMATION

Article 117 : Sur le territoire d'une localité où existe une autorité d'état-civil, l'inhumation dans le cimetière local d'une personne décédée est autorisée par la personnalité administrative compétente, selon le cas après avoir rempli la procédure habituelle conformément à la Loi.

Article 118 : Toute inhumation hors d'un cimetière est formellement interdite hormis l'autorisation expresse du Ministère chargé de la Santé publique déterminant le lieu de sépulture qui devra nécessairement se situer à une distance minimum de 500 mètres de l'habitation la plus proche.

Cette autorisation est individuelle.

Article 119 : Quelque soit le lieu d'inhumation, les autorités administratives compétentes seront responsables de la bonne exécution des opérations funéraires du territoire de leurs localités.

Article 120 : Le permis d'inhumation prévu par les textes en vigueur tient lieu d'autorisation de transfert de corps du lieu de décès jusqu'à celui de l'inhumation qui a lieu en dehors de la localité où le décès est survenu.

Article 121 : Par dérogation aux dispositions du précédent article, en cas de décès survenu en un endroit ouvert au public, le défunt sera transféré immédiatement, sur simple réquisition de la Police soit à son domicile, soit au dépositoire public agrée le plus proche selon le cas, à condition que ce domicile ou ce dépositoire soit situé à la limite de la localité considérée.

Article 122 : Hormis le cas visé à l'article 125, le transfert d'une dépouille mortuaire de la République de Guinée à l'étranger ne pourrait se faire qu'après avoir été au préalable placée dans un cercueil approprié.

Article 123 : Est formellement interdit tout transfert de corps dans les véhicules de transport en commun notamment autocar, autobus, taxi, ambulance ou véhicules destinés aux transports des denrées alimentaires.

Des véhicules spéciaux seront aménagés à cet effet de manière à soustraire le corps de la vue du public.

Article 124 : Tout transfert d'un corps en transit ou vers une localité en vue d'inhumation en dehors des limites de la localité où le décès est survenu peut être autorisé :

- Par les personnalités administratives compétentes dès lors que le décès et l'inhumation ont lieu dans des localités autres que celles de la Préfecture ;
- Par des personnalités administratives au lieu du décès avec l'accord préalable de l'autorité administrative du lieu d'inhumation, selon les circonstances lorsque le décès et l'inhumation ont lieu dans des localités différentes.

Article 125 : Dans l'hypothèse d'un transfert de corps à l'étranger, l'autorité compétente du pays de réintégration et sous réserve que soit observée la Réglementation fixée par la Convention Internationale de Berlin du 10 février 1937 à laquelle la République de Guinée a souscrit.

Article 126 : Les dossiers de demande de transfert de corps seront déposés auprès des autorités administratives compétentes.

Les demandes seront formulées par les plus proches parents du défunt et doivent comporter les nom et prénoms du défunt et accompagnées des pièces ci-après :

- Un permis d'inhumer délivré par les autorités administratives compétentes ;
- Un Certificat médical attestant la cause du décès résultant si possible de l'une des maladies suivantes : choléra, charbon, lèpre, peste, fièvre jaune, méningite cérébro-spinale, infection typho-paratyphoïdique, dysenterie, trypanosomiase ;
- Un Certificat de mise en bière en conformité avec les stipulations conventionnelles, l'engagement de supporter les frais qu'entraînera la translation de l'inhumation du corps.

Article 127 : Tout transfert de corps humain hors des limites territoriales d'un pays où le décès est survenu à un autre subordonné aux exigences suivantes sous réserve de l'application des articles 124, 125, 126 ci-dessus :

1. Le corps devra être déposé dans un cercueil hermétique muni d'un dispositif filtrant :
   a) - Si la distance à parcourir excède 200 km quelle que soit la durée prévue du transfert ;
   b) - Si la date du transfert est évaluée à plus de 24h quelle que soit la distance à parcourir ;

c) - Si le décès est consécutif à l'une des maladies énumérée à l'article 126 alinéa 2 ;
d) - Si le transfert est effectué par voie aérienne ferroviaire ou maritime, quelles que soient la distance et la durée du trajet ;
e) - Dans tous les cas, on devra quérir la décision du Ministère chargé de la Santé ;
f) - S'il s'agit du transfert de restes mortels provenant d'un corps inhumé même depuis plus de 5 ans à moins qu'il s'agisse de restes réduits à l'état d'ossements ; ainsi donc le cercueil hermétique peut, par décision de l'autorité administrative compétente, après avis motivé du Médecin, ne pas être exigé ;
g) - Si le corps est embaumé dans les conditions prévues par la Réglementation en vigueur, le cercueil hermétique ne sera pas obligatoire si la distance est inférieure à 300 km et la durée du transport évaluée à moins de 24h ;

2. Dans tous les autres cas, le corps sera placé dans un cercueil en bois dur ou tout autre appareil similaire offrant une résistance au moins équivalente, doublée, d'une garniture étanche d'un modèle accepté par le Ministère chargé de la Santé publique.

Quel que soit le modèle accepté, le cercueil hermétique sera ajusté, de manière à ne pouvoir se mouvoir, dans une bière en bois dur on tout autre matériel ayant une résistance au moins équivalente dont les parois doivent avoir 0,020 m au maximum.

Il sera muni d'un appareil filtrant accepté par le Ministère chargé de la Santé publique, susceptible d'assurer la réduction des gaz de putréfaction de même que l'épuration.

Article 128 : L'autorité administrative compétente assurera la surveillance des mesures d'hygiène, de salubrité fixées dans l'article 127.

Article 129 : Tout corps humain arrivant dans une localité conformément à l'article 127 inhumé, doit être présenté à l'autorité administrative de la localité. Celles-ci vérifie les scellés du cercueil en s'assurant que le corps est accompagné de l'autorisation régulière de circulation et celle-ci assiste à son inhumation. Ensuite elle dresse le procès-verbal de ces opérations et le transmet à l'autorité hiérarchique compétente.

SECTION 3 : DE L'EXHUMATION

Article 130 : Toute exhumation d'un corps humain devra obligatoirement résulter de l'une des deux conditions suivantes :

- Du Procureur de la République : Lorsqu'il s'agit de la manifestation de la vérité ;
- D'un proche parent de la personne décédée : Dans cette dernière hypothèse, le demandeur devra nécessairement indiquer les motifs, la destination prévue pour les restes à exhumer avec mention du lieu et de la date de ré - inhumation. C'est alors que la signature sera légalisée après la justification de la demande formulée.

Article 131 : Toute exhumation de personne décédée à la suite de l'une des maladies énumérées à l'article 126, ne pourra être autorisée qu'après un délai de trois ans, malgré les précautions d'usage observées lors de l'inhumation.

Ce délai sera réduit lorsque la personne est décédée à la suite de l'une des maladies ci-après : Coqueluche, diphtérie, rougeole, infections puerpérales.

Article 132 : S'il apparaît qu'au moment de l'exhumation, le cercueil est en parfait état, on ne pourrait l'ouvrir que si un délai de cinq ans s'est écoulé après l'inhumation.

Mais si le cercueil est détérioré, le corps sera alors placé dans un autre cercueil, le cas échéant, dans une boite à ossements.

Avant toute manipulation usuelle, les cercueils extraits de la fosse seront abondamment arrosés d'un liquide désinfectant notamment, la solution d'hypochlorite de chaux ou l'eau de Javel.

Article 133 : Les personnes chargées de procéder aux opérations d'exhumation doivent obligatoirement porter des gants spéciaux qui seront ensuite désinfectés de même que leurs chaussures. Elles subiront un nettoyage antiseptique de la paume des mains et les parties du corps non protégées.

Article 134 : En vue d'assurer la bonne pratique d'exhumation, la présence d'un Officier de Police Judiciaire chargé de faire le constat des opérations exhumatoires s'avère obligatoires.

SECTION 4 : DE L'EMBAUMEMENT ET DE LA THANATOPRAXIE

Article 135 : Toute opération visant la conservation des corps par action directe sur les tissus, par injection sous cutanée ou intramusculaire, par perfusion artérielle ou veineuse de même que par des inventions de nature anatomique ne pourrait être pratiquée moins de 6 heures à la suite du décès que sous autorisation de l'autorité compétente.

L'on devra nécessairement produire les documents suivants :

1. Une demande d'un membre de la famille ou d'un ayant droit ou ayant cause ;
2. Une déclaration spécifiant le procédé que l'on se propose d'employer ainsi que l'endroit et l'heure de l'opération ;
3. Un Certificat délivré par le Médecin traitant indiquant que la mort est survenue d'une cause naturelle et autorisant l'embaumement.

Dans l'hypothèse d'une mort suspecte ou survenue par suite d'un accident, le dossier à produire sera subordonné à une déclaration expresse de l'autorité judiciaire compétente attestant que l'opération n'est pas de nature à faire obstacle à la manifestation de la vérité.

Article 136 : Seuls les produits solides ou fluides dont la composition est acceptée par le Ministère chargé de la Santé publique seront utilisés pour la réalisation des opérations prévues à l'article 135.

Article 137 : Etant donné le niveau technologique élevé des opérations, celles-ci ne seront pratiquées que par un Médecin ou un membre de l'Association de la Thanatopraxie officiellement agréé ou toute personne dûment habilitée.

Seuls les Médecins et diplômés en thanatopraxie sont autorisés à délivrer des pièces ou Certificats relatifs à ces opérations.

L'opération sera accompagnée d'un Certificat de Médecin établissant que les signes de décomposition rendent l'opération nécessaire avec l'expiration des 6 heures, l'autorité administrative compétente pourrait alors autoriser l'opération sans attendre l'expiration du délai prescrit.

Toutefois le Ministère chargé de la Santé publique peut autoriser après avis du Médecin Chef de Service que pour des objectifs scientifiques ou thérapeutiques l'autopsie ou les prélèvements à défaut de l'accord de la famille peuvent être pratiqués sans délai.

A ce sujet, le décès fera l'objet d'un constat par deux Médecins assermentés pour s'assurer de la validité de la mort. Ils signeront le procès-verbal du constat de décès en mentionnant l'heure et la date de la survenance.

En conséquence, le Médecin-Chef dresse un procès-verbal énumérant les motifs et les circonstances de l'opération et notification sera faite à la famille du défunt.

SECTION 5 : DE L'AUTOPSIE ET DU MOULAGE

Article 138 : Toute demande de moulage ou d'autopsie d'un cadavre peut provenir de l'autorité judiciaire en accord avec l'autorité compétente du lieu de la survenance du décès.

L'autorisation en cause ne sera demandée qu'après un délai de six heures suivant la déclaration du décès auprès de l'autorité compétente. Par ailleurs, cette demande sera accompagnée d'un Certificat du Médecin légiste attestant que les signes de décomposition rendent l'opération nécessaire avant l'expiration du délai réglementaire.

Article 139 : Le corps d'une personne décédée dans un établissement hospitalier qui n'a pas été réclamé pendant le délai de quarante cinq jours, pourrait être mis à la disposition de la Faculté de Médecine ou d'un laboratoire de dissection à condition que la mort résulte d'une cause naturelle et non de l'une des maladies énumérées à l'article 126 de la présente Loi.

L'organisme dépositaire est chargé d'en assurer la conservation ou l'inhumation.

SECTION 6 : DES POMPES FUNEBRES ET DE LA THANATOPRAXIE

Article 140 : Les pompes funèbres et la thanatopraxie s'attellent aux tâches funéraires ainsi qu'il suit :

- Assurer le transport des corps d'un point à un autre, d'une localité à l'exception des transits ordinaires sans cérémonie ni inhumation sur un lieu de la localité considérée ;
- Vendre des linceuls, des cercueils et des couronnes ;
- Fournir et poser toute teinture ou décoration à caractère funéraire dans des lieux ouverts au public ou en bordure de la voie publique ;
- Assurer les prestations et la fourniture des soins d'hygiène, de toilette et la conservation des corps en conformité avec les normes de la présente Loi et les coutumes de la République de Guinée.

Article 141 : Le Service des pompes funèbres et de la thanatopraxie sera assuré par des Collectivité locales chargées d'organiser de telles activités ou d'octroyer la concession à un particulier.

Les prestations prévues par l'article 136 pourront générer de taxes dont le montant fera l'objet d'une décision réglementaire de l'autorité compétente.

Le matériel fourni par les localités devra être constitué pour répondre aux besoins des Collectivités.

Article 142 : Dans les localités où le Service prévu dans l'article 136 est laissé à l'initiative privée, l'autorité administrative compétente est habilitée à édicter les règles d'hygiènes régissant les opérations mortuaires de même qu'elle fera respecter les prescriptions énoncées par la présente Loi en matière funèbre.

SECTION 7 : DES CIMETIERE ET DES LIEUX DE SEPULTURE

Article 143 : Tout projet d'aménagement d'un cimetière requiert nécessairement l'autorisation du Ministère chargé de la Santé publique, lequel déterminera en collaboration avec les autres Départements Ministériels compétents, la distance entre le cimetière et les habitations, entre le cimetière et les sources d'approvisionnement en eau, les conditions d'inhumation, les règles régissant l'exhumation, le transport des corps et l'embaumement.

Article 144 : Toutefois, lorsque les localités sont pourvues d'une adduction d'eau potable, la distance entre le cimetière et les habitations pourra, à titre exceptionnel, être réduite ou supprimée par voie réglementaire.

Dans le cas contraire, la distance entre le cimetière et les habitations d'une part, entre le cimetière et les sources d'eau d'autres part, sera de 500 mètres au minimum.

Article 145 : Lorsqu'un cimetière ne répond plus aux critères définis pour recevoir les inhumations, l'autorité administrative compétente pourra alors procéder à la fermeture définitive de celui-ci. Dès lors qu'il est devenu un lieu sacré, de culte, l'autorité administrative compétente pourvoira à son entretien et à son aménagement.

A ce titre, le cimetière doit être protégé par une clôture empêchant ainsi la divagation des animaux domestiques et sauvages en conformité avec les règles de la domanialité publique.

Ainsi donc, l'eau provenant des points d'eau (puits, sources, rivières) situés à moins de 100 mètres de cette clôture sera formellement interdite à la consommation.

Article 146 : La sépulture dans le cimetière d'une localité est obligatoire pour :

- Les personnes décédées ou dont les cadavres auront été trouvés sur le territoire quel que soit leur domicile ;
- Les personnes domiciliées sur le territoire alors même qu'elles seraient décédées dans une autre localité ;
- Les personnes non domiciliées dans la localité mais ayant droit à une sépulture de famille ou rituelle.

Article 147 : Les inhumations en terrain gratuit auront lieu, soit en fosse individuelle, soit en tranchée, les corps étant, dans ce dernier cas, placés côte à côte et à une distance de 20 cm les uns des autres.
Quelque soit le genre de fosses utilisées, elle devront être établies de telle sorte que la hauteur de comblement comprise entre le corps et la surface de sol soit égale au moins à 1,5 m.

Article 148 : Au risque d'entraîner leurs renouvellements plus ou moins rapprochés, exception faite d'une exhumation aux fins de ré-inhumation définitive dans une sépulture autre que la première conformément à la Loi, l'ouverture des fosses destinées aux nouvelles sépultures ne pourrait se produire qu'après 5 ans au minimum des précédentes inhumations.

L'autorité administrative d'une localité pourrait alors augmenter ce délai en tenant compte de la nature propre du terrain de chaque cimetière.

En effet, les terrains affectés aux sépultures, constitueront au minimum au tant de fois nécessaire, en vue d'y enterrer le nombre annuel présumé de morts, en tenant dûment compte du délai de renouvellement fixé par Loi en vigueur.

Article 149 : Dans l'hypothèse où l'espace du terrain le permettra les localités destinées à l'inhumation des personnes désireuses de posséder une place distincte et séparée pour y fonder leurs sépultures et celles de leurs parents ou de toute autre personne, une décision de l'autorité administrative compétente pourrait fixer les modalités d'acquisition d'une telle sépulture.

Article 150 : A cet effet, les terrains destinés aux inhumations seront concédés à titre onéreux : tarifs desdits terrains seront fixés par une fourchette globale déterminée dans un acte réglementaire.

Article 151 : Chaque personne peut indistinctement placer sur la fosse d'un proche parent une pierre sépulture ou tout autre signe caractéristique à condition que ces stèles démonstratives ne portent nullement préjudice à la superficie du terrain octroyé ou non destiné à chacune des fosses.

Article 152 : Dans l'hypothèse de la création des concessions destinées à y fonder des sépultures familiales aucun ayant droit du concessionnaire ne saurait se prévaloir de renouvellement fait par lui pour revendiquer la pleine et entière jouissance des droits inhérents à la concession.

Article 153 : Toute décision de l 'autorité administrative compétente ayant pour objet la suppression des droits antérieurement concédés à une personne ou à

une famille fera l'objet d'une publication par voie d'affiche ou de notification individuelle.

En effet, ces actes de publication seront obligatoirement inscrits sur le registre de la localité où la décision a été prise.

Article 154 : Une décision prise par l'autorité administrative locale pourrait affecter définitivement dans un cimetière un ossuaire convenablement aménagé ou seraient ré-inhumées gratuitement les personnes dont les concessions ont été reprises.

Article 155 : Les terrains des cimetières ne sauraient faire l'objet d'une transaction commerciale.

Article 156 : Les infractions commises en violation des dispositions du Chapitre IV de la présente Loi seront punies d'une amende de 200.000 à 1.000.000 de francs guinéens et d'un emprisonnement de 6 mois à 5 ans, ou de l'une de ces deux peines seulement sans préjudice de l'application des dispositions du Code pénal et des autres normes en vigueur.

CHAPITRE V : DE LA PREVENTION ET DE LA LUTTE CONTRE LES MALADIES TRANSMISSIBLES

Article 157 : La liste des maladies transmissibles susceptibles de constituer un danger pour la santé des populations de la République de Guinée est établie par le Ministère chargé de la Santé publique et fixée par voie réglementaire.

Cette liste est renouvelable lorsque les circonstances l'exigent.

Article 158 : Tout Médecin ayant constaté l'existence d'une maladie transmissible pouvant se propager rapidement est obligatoirement tenu d'en aviser sans délai les autorités supérieures dont il dépend sous peine de sanctions disciplinaire ou pénale.

A ce titre, tout Médecin de nationalité Guinéenne ou étrangère exerçant dans le cadre de la coopération qui serait au courant de l'apparition d'une maladie transmissible, doit en informer exclusivement et à titre confidentiel les autorités hiérarchiques directes.

Il ne peut en aucun cas transmettre ces informations en dehors de la structure administrative où il exerce ses fonctions.

A cet égard, tout retard ou négligence constatés dans la transmission de l'information reçue est possible de sanctions disciplinaires ou pénales prévues à l'alinéa 1er du présent article.

Article 159 : Toute personne atteinte d'une maladie transmissible susceptible de propagation, recevra impérativement un traitement hospitalier ou ambulatoire. Cependant, les sujets contacts feront l'objet d'un contrôle médico-sanitaire conformément à la Loi.

Toutefois, un plan d'action d'urgence sera établi aux fins de lutter contre les épidémies. A cet effet, le Ministère chargé de la santé publique soumettra les populations de toute localité atteinte aux mesures préventives appropriées.

Seront obligatoires, la vaccination et la revaccination contre les maladies transmissibles que le Ministère chargé de la Santé aura spécifiées.

SECTION 1 : DES CONDITIONS D'HYGIENE

Article 160 : Conformément aux mesures fixées dans le cadre de l'environnement, des mesures d'évacuation des ordures et excrété seront prises par l'autorité administrative de la localité.

Article 161 : Les Services chargés de l'hygiène et de la protection de l'environnement assureront la surveillance et le contrôle de la qualité des eaux utilisées pour la boisson et les usages domestiques et industriels, de l'air ambiant, de même que les denrées alimentaires sur toute l'étendue du Territoire de la République de Guinée.

SECTION 2 : DES CAS D'EPIDEMIE

Article 162 : Seul le Ministère chargé de la Santé Publique est habilité à faire la déclaration relative à l'existence d'une épidémie et prescrire des mesures de quarantaine en conformité avec les dispositions des articles 21 et 22 de la constitution de l'Organisation Mondiale de la Santé (OMS).

Dans ces conditions, les mesures exceptionnelles seront prises :

- Restriction de la circulation des personnes et des biens ;
- Fermeture des lieux publics et privés ;
- Interdiction de la vente des denrées alimentaires et des boissons ;
- Destruction des objets souillés susceptibles de contagion.

Article 163 : Les Services chargés des maladies transmissibles prendront toutes les mesures nécessaires de contrôle afin d'éviter la propagation de la maladie d'une localité à l'autre.

Article 164 : Toute infraction aux dispositions des articles 158 à 163 de la présente Loi sera punie d'une amende de 50.000 à 1.000.000 de francs guinéens et d'un emprisonnement de 6 mois à 5 ans ou de l'une de ces deux peines seulement sans préjudice de l'application des dispositions du Code pénal et du Code de l'Environnement.

CHAPITRE VI : DU CONTROLE SANITAIRE DES FRONTIERES

Article 165 : Le contrôle sanitaire aux frontière a pour objet de prévenir conformément aux dispositions de la présente Loi, l'introduction en République de Guinée ou la propagation à l'étranger des maladies au moyen de transports aériens, fluviaux, maritimes ou terrestres, des personnes, des animaux, des marchandises infectées ou présumées infectées, susceptibles de véhiculer la contagion.

Article 166 : Le contrôle sanitaire de routine aux frontières sera effectué à des endroits déterminés par le Ministère chargé de la Santé publique.

Ces postes de contrôle relèvent de la compétence exclusive de ce Département.

Article 167 : Les Médecins et les agents assermentés des services de contrôle sanitaire aux frontières établiront un procès-verbal des faits ou maladies constatés susceptibles d'entraîner la contagion, et en informeront immédiatement les autorités sanitaires du pays.

Article 168 : Les Médecins et les Agents assermentés des Services de contrôle sanitaire aux frontières doivent obligatoirement soumettre à un examen, les personnes et les moyens de transport en provenance d'une zone infectée par une maladie transmissible, et prendre le cas échéant, toute les mesures qui s'imposent aux fins d'en prévenir la propagation et d'assurer la destruction des substances et objets souillés. Il va de soi que de telles mesures ne donnent lieu à aucune indemnisation.

Article 169 : Toute infraction aux dispositions des articles 165 à 168 sera punie d'une amende de 50.000 à 1.000.000 de francs guinéens et d'un emprisonnement de 6 mois à 2 ans ou de l'une de ces deux peines seulement sans préjudice de l'application des dispositions du Code pénal et des dispositions conventionnelles souscrites par la République de Guinée.

CHAPITRE VII : DE LA PREVENTION ET DE LA LUTTE CONTRE LES LEAUX SOCIAUX

Article 170 : Conformément à la présente Loi, des mesures efficaces et efficientes doivent être prises par toute la Société Guinéenne en vue d'enrayer constamment les maladies non transmissibles en l'occurrence l'alcoolisme, le tabagisme et la toxicomanie.

La lutte sera menée efficacement et principalement contre les stupéfiants conformément aux dispositions des conventions internationales souscrites par la République de Guinée.

Article 171 : Les Ministères chargés de la Santé Publique et des Affaires Sociales procéderont au recensement des maladies non transmissibles au niveau national et prendront toutes les mesures adéquates en vue du traitement approprié, l'adaptation et la réinsertion sociale des personnes atteintes.

Article 172 : Dans le but de protéger la société contre les risques inhérents à certains fléaux sociaux, les personnes atteintes seront astreintes à un traitement approprié.

Article 173 : La vente du tabac et de ses produits dérivés sera subordonnée à l'apposition sur l'emballage d'une étiquette portant la mention « La consommation du tabac est nocive pour la Santé ».

D'autres mesures ultérieures seront énoncées par voie réglementaire, destinées à mettre en garde certains groupes de la population notamment les femmes enceintes, les adolescents, les personnes atteintes d'affections cardio-vasculaires ou respiratoires contre les risques encourus par la consommation du tabac.

Article 174 : Les mesures et les exigences relatives à la délimitation des normes applications à la publicité en faveur des boissons alcooliques et du tabac feront l'objet d'une réglementation ultérieure.

article 175 : La production, la transformation ou l'extraction, la préparation, la détention, l'offre, la distribution, l'achat, la vente, l'importation, l'exportation, la consommation des substances considérées comme stupéfiantes notamment l'opium brut ou officinal , l'extrait d'opium, la morphine et les autres alcaloïdes de l'opium à l'exception de la codéine, leurs sels dérivés, le chanvre indien, le kat ou la participation de quelque manière que ce soit à l'une de ces opérations seront punis conformément aux dispositions de la Législation en vigueur.

CHAPITRE VIII : DELA SAN TE BUCCO-DENTAIRE

Article 176 : Le Ministère chargé de la Santé Publique garantit la promotion et la préservation des soins bucco-dentaires, prendra des mesures curatives et préventives par le truchement de programmes élaborés en la matière dans l'intérêt de la population selon l es priorités qu'il aura fixées.

CHAPITRE IX : DE LA SANTE MATERNELLE ET INFANTILE

Article 177 : Le concept de Santé Maternelle et Infantile (SMI) est étroitement lié aux soins de Santé, la prévention et le traitement des maladies ainsi que les soins de réadaptations dispensés à la mère et à l'enfant.

Article 178 : A ce titre, les soins de santé maternelle et infantile visent à réduire la mortalité et la morbidité maternelles, péri natales et à promouvoir l'hygiène en matière de reproduction ainsi que le développement physique et psychosocial de l'enfant et de l'adolescent au sein de la famille.

Article 179 : La santé maternelle et infantile est étroitement liée à la Santé générale de la société et directement influencée par les conditions socio-économiques. A ce titre, son amélioration nécessite l'établissement d'un programme multi - sectoriel.

Article 180 : Toutes prestations des soins de Santé en matière de Santé Maternelle et Infantile seront dispensées conformément aux lignes directrices suivantes :

- Elaboration des stratégies nationales et locales destinées à assurer à chaque groupe de population un module de SMI correspondant à ses desiderata ;
- Utilisation souple et rationnelle des ressources humaines, matérielles et financières concourant à l'amélioration de la couverture de soins de SMI dans le cadre des soins de santé primaires de même que le recours à la participation active de la Société ;
- Approche intersectorielle reliant les activités sanitaires en faveur de la mère et de l'enfant aux activités connexes menées dans d'autres secteurs, cela à tous les échelons depuis le groupe familial jusqu'au niveau de planification ;
- Réorientation de toutes les autres activités socio-sanitaires au bénéfice des soins de Santé intégrés mettant l'accent sur les besoins spécifiques de la mère et de l'enfant.

Article 181 : Toute femme enceinte subira des examens médicaux nécessités par son état dans une formation sanitaire de son choix.

En conséquence les autorités sanitaires locales mettront en places des moyens appropriés en vue de procéder à l'éducation de la future mère.

En effet, toute femme occupant un emploi salarié ou travaillant dans la Fonction Publique, sera soumise au Statut de la Fonction Publique, au Code du Travail en ce qui concerne la fixation de la durée et de la période de congé de maternité.

Article 182 : La Planification Familiale revêt un caractère prioritaire. Ainsi les services offerts dans ce domaine permettront à toute personne d'exercer son droit de décider librement, de façon responsable et informée du nombre et de l'espacement de ses enfants sans qu'il soit porté la moindre atteinte à sa dignité.

Article 183 : Conformément aux dispositions du Code pénal, l'avortement thérapeutique a uniquement pour but de sauver la vie de la femme gravement menacée.

Il sera autorisé par un Collège de Médecins spécialistes, lequel consignera sa décision dans un procès-verbal justifiant les raisons de celui-ci.

Article 184 : La surveillance médicale, la prévention, la vaccination, l'éducation pour la Santé et les soins dispensés aux enfants dès leur naissance jusqu'à l'âge de 6 ans seront fixés par une Décision du Ministère chargé de la Santé publique.

Article 185 : L'alimentation des jeunes enfants fera l'objet d'une surveillance particulière à la charge de l'autorité sanitaire locale, laquelle élaborera un programme d'éducation sanitaire de la mère.

Article 186 : Le Ministère chargé de la Santé Publique déterminera les vaccinations obligatoires et en fixera le calendrier.

Article 187 : Tout nouveau-né doit bénéficier de l'allaitement maternel exclusif de la naissance à 6 mois au moins.

A cet égard l'usage des biberons et des substituts du lait maternel fera l'objet d'une décision du Ministère chargé de la Santé Publique.

Il est formellement interdit de faire la publicité des substituts du lait maternel à travers les médias et d'utiliser les affiches promotionnelles sur toutes l'étendue du territoire national.

Il est fait obligation de respecter scrupuleusement les dispositions du Code International sur la Commercialisation des substituts du lait maternel approuvé par l'Assemblée Mondiale de la Santé en 1981.

La surveillance de la croissance et du développement psychomoteur de l'enfant se fera dans les centres de Santé Maternelle et Infantile (SMI) et tous les événements survenus de la naissance à l'âge de 3 ans seront rigoureusement portés dans le dossier de l'enfant.

Toute vaccination contre les maladies infantiles infectieuses demeure obligatoire conformément à la réglementation en vigueur.

A chaque consultation du nourrisson, il sera fait mention du tracé de la courbe du poids de l'enfant jusqu'à l'âge de 5 ans en présence des parents.

Article 188 : Il est obligatoire d'établir la surveillance des enfants à risque notamment les enfants drépanocytaires, prématurés, malnutris, les enfants issus de mères diabétiques, sidéennes, syphilitiques, cardiopathes graves, cancéreuses, par des consultations périodiques.

Article 189 : Seuls les documents sanitaires délivrés par les Services sanitaires sont valables sur toute l'étendue du territoire.

Quant aux établissements en mission éducative, ils devront nécessairement avoir un pédiatre ou un médecin autorisé et un psychologue.

Article 190 : Il est obligatoire de nommer un personnel compétent chargé des crèches, haltes-garderies, jardins d'enfants et de les doter d'un matériel de travail adéquat.

Article 191 : Les produits locaux seront nécessaires à la fabrication des aliments destinés aux jeunes enfants. On devra familiariser les mères à leur meilleure utilisation.

Article 192 : La pratique de l'hygiène doit être effectuée par tous les établissements scolaires du pays et les moyens appropriés doivent être dégagés à cet effet.

SECTION 2 : DE LA PROTECTION DE LA SANTE DES ENFANTS D'AGE SCOLAIRE ET DES ADOLESCENTS

Article 193 : Les autorités sanitaires locales chargées d'organiser la protection des enfants d'âge scolaire se conformeront aux modalités programmatiques élaborées par le Ministère chargé de la Santé Publique.

Elles devront élaborer un programme de la surveillance médicale des élèves et des étudiants selon les modalités définies par le Ministère chargé de la Santé Publique.

Les formations sanitaires devront mettre à la disposition des enfants et des adolescents les moyens de prévention, d'immunisation et de surveillance médicale appropriées.

Article 194 : Le programme de la surveillance sanitaire des adolescents est du ressort des Ministères chargés de la Santé Publique, de l'Education Nationale, de la Jeunesse et sera mis en œuvre dans chaque établissement.

Article 195 : Une visite médicale annuelle sera systématiquement organisée dans tous les établissements primaires et secondaires pour chaque enfant à qui sera délivré un Certificat qu'il présentera à ses parents :

- L'enseignement de l'éducation sexuelle, de l'éducation à la vie familiale, des notions de nutrition et d'hygiène sera dispensé ;
- L'éducation pour la santé sera orientée vers la conscientisation des enfants et des adolescents sur les méfaits du tabac, de l'alcool et de la drogue.

SECTION 3 : DES VISITES ET EXAMENS PRENUPTIAUX

ARTICLE 196 : Avant le mariage, des examens de laboratoires et une visite systématique des futurs conjoints doivent être obligatoires.

L'Officier de l'état-civil doit exiger les pièces les attestant.

Article 197 : Les visites et examens prénuptiaux sont destinés à ceux qui ont l'intention de fonder un foyer.

Article 198 : Les visites et examens prénuptiaux sont faits dans un délai d'un mois avant le mariage et leur validité n'excède pas trois mois à compter de la date de délivrance du Certificat qui les atteste.

Article 199 : Les visites et examens prénuptiaux portent sur la recherche d'anomalies ou de maladies pouvant compromettre la procréation. Il s'agit notamment de :

- Certaines malformations congénitales ou non qui rendent impossible l'accouplement ;
- Les maladies sexuellement transmissibles y compris le SIDA ;
- L'incompatibilité des groupes sanguins.

Article 200 : Les Certificats sont délivrés par les Services de Santé compétents du Ministère chargé de la Santé Publique et permettront aux futurs conjoints de connaître leur état de santé.

CHAPITRE X : DE LA MEDECINE DU TRAVAIL

Article 201 : En conformité avec les dispositions du Code de Travail de la République de Guinée relatives à la protection de la Santé des travailleurs, des mesures préventives doivent être prises en vue de protéger la Santé des travailleurs dans les entreprises, les industries, l'agriculture et dans tous les secteurs d'activités professionnelles et artisanales.

Article 203 : Le Ministère chargé de la Santé Publique agissant conjointement avec le Ministère chargé du Travail détermineront les normes d'hygiène et de sécurité nécessaires applicables dans les établissements, en vue d'assurer la protection de la Santé des travailleurs contre les dangers et les nuisances pouvant résulter des déchets liquides, solides et gazeux.

Section 1 : Des visites médicales systématiques

Article 204 : Des mesures sanitaires adéquates seront énoncées en vue d'assurer la protection de la Santé au travail dans les entreprises et secteurs d'activités économiques, chez les travailleurs indépendants, dans le secteur informel et chez les artisans.

Ces mesures seront matérialisées par des visites médicales d'embauche, périodiques, spontanées, de reprise de travail après une longue absence des travailleurs, la dotation en médicaments de première nécessité, en personnel médical compétent et en matériel médicochirurgical, les mesures générales d'hygiène, de sécurité de travail.

Article 205 : Tous les Services de santé installés ou devant être installés dans une entreprise, une industrie, secteur informel ne peuvent avoir l'autorisation de mise en exploitation qu'en vertu d'une Décision du Ministère chargé de la Santé Publique après avis de l'Inspection Générale de la Santé Publique.

Un contrôle périodique sera effectué par l'Inspection Générale de la Santé Publique dans tous les Services de santé ayant obtenu l'autorisation de mise en exploitation.

Un procès-verbal sera alors dressé à l'occasion de chaque mission d'inspection à l'intention du Ministre chargé de la Santé Publique.

Article 206 : En conformité avec les dispositions du Titre III du Livre II du Code de Travail de la République de Guinée toutes les mesures de portée sanitaire concernant les entreprises, les industries, les secteurs informels relèveront de la compétence exclusive du Ministère chargé de la Santé Publique qui, en prenant toutes décisions de nature médico-sanitaire pourrait quérir les avis des secteurs concernés.

Section 2 : De la salubrité et de l'hygiène des lieux de travail

Article 207 : Les établissements industriels seront regroupés en différentes catégories selon la nature des risques qu'ils peuvent faire encourir à la Société et à l'environnement.

Dans ces conditions le Ministère chargé de la Santé Publique de concert avec les Départements concernés s'assurera de toutes mesures techniques appropriées, destinées à autoriser l'exploitation de tels établissements ou leur fermeture pure et simple.

Dans l'hypothèse ou un établissement offrant toutes les garanties de commodité et de salubrité est répertorié, un Certificat de conformité lui sera alors délivré en conséquence.

Article 208 : Toute infraction aux dispositions de l'article 207 de la présente Loi sera punie d'une amende de 500.000 à 2.000.000 de francs guinéens et d'un emprisonnement de 1 à 5 ans ou l'une de ces peines seulement sans préjudice de l'application des dispositions du Code de l'Environnement.

CHAPITRE XL : DE LA SANTE MENTALE

Article 209 : Le Ministère chargé de la Santé Publique édictera des mesures permettant d'assurer :

- Des Services préventifs dans le domaine de la Santé mentale aux différentes étapes de la croissance du citoyen de la naissance jusqu'à la vieillesse ;

- La protection nécessaire et le traitement approprié en cas d'aliénation mentale et d'épilepsie.

Les autres départements ministériels concourent également à la réalisation des objectifs ci-dessus énumérés.

Article 210 : La prévention des maladies mentales revêt un caractère prioritaire, en ce qu'elle est fondée sur la connaissance des facteurs ayant une incidence sur la santé mentale, des causes diverses découlant de modifications comportementales et des méthodes de prévention idoines.

De ce point de vue, le Ministère chargé de la Santé Publique en coordination avec les Départements concernés encouragera et soutiendra :

- Le développement des activités éducatives, socioculturelles et récréatives contribuant au renforcement de la santé mentale en faveur des enfants et des adolescents ;

- La réalisation des programmes de prévention et de l'utilisation des substances psychotropes, des différents stupéfiants et autres substances pouvant provoquer des troubles mentaux.

Article 211 : Les mesures visant à assurer le placement de personnes atteintes de maladies mentales dans des établissements conçus à cet effet obéiront nécessairement et obligatoirement aux principes d'éthique sociaux ainsi qu'aux conditions scientifiques et juridiques que déterminera le Ministère chargé de la Santé Publique.

Article 212 : Le Ministère chargé de la Santé Publique établira de concert avec les autorités judiciaires, administratives, etc. ; de la République de Guinée des normes techniques applicables au régime de dispensation des soins destinés aux malades mentaux incarcérés ou détenus dans des établissements qui ne sont pas spécialisés en Santé mentale.

Article 213 :L'admission dans un établissement psychiatrique d'une personne présumée atteinte d'une maladie mentale ne pourra se faire que sur une base volontaire conformément à la réglementation en vigueur.

Article 214 : Toute personne atteinte de troubles mentaux qui constitue une menace ou un danger pour elle-même ou pour autrui sera hospitalisée d'office même si le consentement de sa famille ou de son représentant légal n'a pas été requis.

Article 215 : Toute demande de placement volontaire sera établie :

- Par le malade lui-même ;

- Par sa famille ou son représentant dûment mandaté, lorsqu'il est mineur ou incapable ;

- Par toute personne désignée pour exercer les fonctions de curateur ou de tuteur du malade.

Article 216 : La sortie à la suite d'une hospitalisation ne pourra avoir lieu que sur instruction d'un Médecin ainsi qu'à la demande du malade.

Dans ces conditions, le Directeur de l'Hôpital doit avoir la conviction que celui-ci pourra vivre en dehors de l'hôpital sans risque grave pour lui-même et pour autrui.

Article 217 : La décision d'hospitalisation d'office sur une base administrative ou judiciaire est prise sur requête dûment motivée lorsque le danger estimé imminent est encouru du fait de la maladie par le malade lui-même ou pour autrui.

Article 218 : Nul ne pourra prendre la décision d'hospitalisation d'office d'un parent ascendant ou descendant, d'un conjoint, d'un collatéral frère ou sœur, d'un oncle, d'une tante ou de leurs conjoints respectifs.

Toutefois, l'hospitalisation d'office peut à tout moment, sur requête du Médecin de l'hôpital psychiatrique, être transformée en internement volontaire. En outre la sortie d'une personne hospitalisée sur une base administrative ne pourrait être autorisée que par une décision du Directeur de l'Hôpital à la suite d'une demande des parents ou des représentants légaux du malade lorsque ceux-ci assument la responsabilité de son comportement à son domicile.

Article 219 : La sortie à la suite d'une hospitalisation sur une base judiciaire ne pourrait être autorisée que par le Tribunal ayant ordonné l'hospitalisation.

Toutefois, dans chaque établissement où sera créé un Service d'examen psychiatrique d'office, de mise en observation, d'internement volontaire et d'hospitalisation d'office, il sera ouvert un registre dans lequel doivent être consignées toutes les indications nécessaires.

Article 220 : Les enfants et adolescents, âgés de moins de 16 ans pourront faire l'objet d'examen psychiatrique d'office.

Ils ne feront l'objet ni d'internement volontaire, ni d'hospitalisation d'office.

Quant aux personnes âgées dont l'affaiblissement des facultés mentales constitue l'essentiel de la maladie, elles ne seront pas assujetties à un examen psychiatrique d'office ni à un examen volontaire, ni à l'hospitalisation d'office.

Dans tous les cas, les dossiers des malades mentaux seront confidentiels hormis les renseignements recherchés par les autorités judiciaires.

Article 221 : Seul le Directeur de l'Hôpital est autorisé à faire délivrer un Certificat de séjour des malades mentaux mentionnant la nature de leurs maladies et toutes les autres questions liées à leur hospitalisation.

Cependant, seul le malade, son représentant légal et l'autorité judiciaire peuvent prendre connaissance dudit Certificat.

Toutes les décisions prévues au présent Chapitre pourront faire l'objet de recours devant les Tribunaux ou devant les autorités sanitaires compétentes en l'occurrence le Médecin légiste ou tout spécialiste assermenté.

CHAPITRE XII : DES SOINS AUX PERSONNES AGEES ET AUX HANDICAPES

Article 222 : Le Ministère chargé de la Santé Publique s'occupe de la promotion des personnes âgées en élaborant un système de prestations, de prévention des maladies, de traitement et d'entretien fonctionnel permettant aux personnes âgées d'avoir accès aux soins ambulatoires et hospitaliers destinés à protéger leur santé adaptés à leurs âges de même qu'à leur état mental et physique.

Article 223 : Est considérée comme handicapée, toute personne physique dont les possibilités de réinsertion éducative, professionnelle ou sociale sont déficientes, congénitales ou non à caractère permanent, affectant ses capacités physiques, mentales ou sensorielles.

Article 224 : La prévention des incapacités constitue un droit et une obligation de la société dans son ensemble en ce qu'elle est partie intégrante de l'une des obligations prioritaires de la République de Guinée en matière de Santé publique et de la protection sociale.

Article 225 : Le régime de soins, de réadaptation et de réinsertion socioprofessionnelle est fixé par des textes connexes des Départements ministériels obéissant au droit commun en matière de protection sanitaire et sociale.

Quant aux personnes âgées, leur régime de soins médicaux sera fixé par un acte réglementaire.

Article 226 : La Médecine traditionnelle guinéenne est l'ensemble des connaissances techniques de préparation et l'utilisation des substances, mesures et pratiques en usage, explicables ou non à l'état actuel de la science, résultant des fondements socioculturel et religieux des collectivités guinéenne, qui s'appuient sur les expériences vécues et les traditions transmises à la postérité, oralement ou par écrit et qui servent à diagnostique, prévenir ou éliminer un déséquilibre du bien être physique, mental, social ou spirituel.

Article 227 : l'exercice de la médecine traditionnelle est juridiquement autorisé. Cet exercice est reconnu à toute personnes physique ou morale, à titre

individuel ou en association, dans les conditions fixées par les dispositions en vigueur.

Article 228 : Est tradi-praticien de Santé, toute personne reconnue compétente par la collectivité dans laquelle elle vit pour diagnostiquer, pratiquer les soins ou activités selon les techniques et méthodes se référant aux fondements socioculturels et concourant à la santé, au bien-être physique, mental, social et spirituel des membres de ladite localité.

Article 229 : Le terme de tradi-praticien de santé au sens de la présente Loi s'applique notamment aux catégories professionnelles suivantes :

- Tradi-thérapeute;
- Accoucheuses traditionnelles;
- Médico-droguistes.

Un tradi-thérapeute est celui qui est reconnu par sa localité comme compétent pour diagnostiquer et dispenser des soins de Santé basée sur les concepts de la maladie et des invalidités prévalant dans ladite localité.

Est accoucheuse traditionnelle, la personne reconnue compétente pour prodiguer à une femme et à un nouveau - né, avant, pendant et après l'accouchement des soins de santé basée sur des concepts prévalant dans sa localité.

Est médecin-droguiste, celui qui a les connaissances des usages et vend les substances médicales, autres que les plantes, d'origine animale ou minérale.

Article 230 : La pratique de la Médecine traditionnelle s'étend aux actes de consultations, de diagnostic et de soins utilisant exclusivement les méthodes traditionnelles.

CHAPITRE XIV. DES SECOURS D'URGENCE

Article 231 : En vue de pallier aux problèmes médico-sanitaires posés ou que pourront soulever les catastrophes naturelles et les désastres d'origine humaine, il est créé un Service de gestion des urgences rattaché à la Direction chargée de la Prévention.

Ce Service devra collaborer étroitement et efficacement avec tous les secteurs du Ministère chargé de la Santé Publique dans le processus de la gestion des urgences.

Il devra entreprendre des études et élaborer un programme ayant pour objectifs de :

- Planifier, organiser et développer le secours d'urgence sur l'ensemble du Territoire de la République de Guinée en coordination avec l'ensemble des autres services concernés ;

- Assurer le ramassage, le transport et l'évacuation sur les formations sanitaires des victimes du sinistre ou de toutes les personnes dont l'état nécessite des soins urgents indispensables à leur survie ;

- Dispenser aux personnes visées ci-dessus les premiers soins nécessaires à leur état ;

- Définir les modalités d'enseignement en matière de prévention et de recherche.

Article 232 : Des mesures doivent être prises pour doter tous les hôpitaux sur l'ensemble du territoire de la République de Guinée des équipements susceptibles de concourir à la bonne gestion des urgences.

La capacité opérationnelle optimale de l'hôpital sera renforcée en équipements et autres ressources destinées à dispenser des soins intensifs.

Article 233 :L'on devra élaborer des mesures de coordination régionale chargées d'assurer des soins intensifs et des soins intermédiaires, tandis que les Centres de Santé, dispensaires et les cliniques privées seront responsables des traitements légers et ambulatoires.

Article 234 :L'étude de planification des urgences devra nécessairement tenir compte de certains facteurs contingents comme l'étendue, la gravité, l'extension et éventuellement la dimension des problèmes devant nécessiter une gestion efficace et efficiente d'une situation spécifique.

Article 235 : Une étude intersectorielle de la gestion des urgences devra comporter des éléments de coordination étroite avec les études épidémiologiques des activités médico-sanitaires de la République de Guinée notamment l'évaluation, la planification et les données prévisionnelles en matière de situations d'urgences y compris les épidémies.

Article 236 : La situation des urgences est susceptible d'affecter plusieurs secteurs organisationnels en matière de secours.

Le Comité interministériel pour la concertation sanitaire et sociale pourra élaborer un mécanisme harmonieux et uniformisé dont l'objectif consistera à équiper outre les secteurs de secours, l'équipe médico-sanitaire en matériels techniques indispensables à la dispensation des soins.

LIVRE TROISIEME : DE L'ETHIQUE POUR LA RECHERCHE EN SANTE

CHAPITRE 1 : DISPOSITIONS GENERALES

Section 1 : Des principes

Article 237 : Toute recherche impliquant des sujets humains doit être exécutée en conformité avec les principes essentiels d'éthique :

- Le principe du respect de la personne ;
- Le principe de bienfaisance sous ses deux aspects : éviter de nuire et promouvoir un bien ;
- Le principe de Justice ;
- Le principe de la qualité de la recherche.

Article 238 : Le principe du respect de la personne implique :

- Que les personnes autonomes c'est-à-dire capables du choix de leurs propres objectifs soient traitées avec le respect dû à leur capacité d'autodétermination ;
- Que les personnes dépendantes ou vulnérables c'est-à-dire dont l'autonomie est atteinte ou diminuée soient protégées de tout abus ou préjudice.

Article 239 : Le principe de bienfaisance implique :

- L'évaluation des avantages escomptés et des risques possibles de la recherche ;
- L'obligation de maximiser les avantages éventuels en minimisant les possibilités de nuisance ou ;
- La préservation des sujets étudiés de tout mal évitable lié au sujet.

Article 240 : Le principe de justice implique :

- La non-discrimination à l'endroit d'individus ou de groupes ;
- La non exploitation en particulier de personnes vulnérables.

Article 241 : Le principe de qualité de la recherche implique :

- La qualification du chercheur ;

- La validité scientifique du projet ;

- Un protocole détaillé comportant : les pré requis justifiant le passage à la recherche sur l'homme, l'objectif de la recherche, la méthodologie, la population cible, les contraintes et les risques éventuels pour les sujets étudiés, les modalités de leur consentement, les modalités d'analyse des données, les modalités de publication des résultats, le suivi des personnes à leur sortie de l'essai.

Section 2 : Du consentement

Article 242 : En règle générale, toute recherche en santé impliquant la participation d'êtres humains en tant que sujets est subordonnée à leur consentement. Le consentement doit être éclairé, libre et matérialisé par un document.

Article 243 : Le consentement est dit éclairé lorsque la personne consentante comprend le but et la nature de l'enquête, les obligations qu'implique sa participation à celle-ci ainsi que les risques et les avantages qui peuvent en découler.

Pour ce faire, le chercheur a l'obligation d'informer honnêtement le sujet, de s'assurer qu'il a bien compris et de répondre aux questions.

Article 244 : Le consentement est dit libre lorsque le sujet est en possession de toutes ses facultés mentales et qu'il ne subit ni pression, ni coercition.

De plus, il doit savoir qu'il est libre de s'abstenir ou de revenir sur sa décision.

Article 245 : Le consentement est matérialisé par un document qui résume les objectifs de l'étude et qu'elle implique pour le sujet. S'il est d'accord, le sujet signe ce document devant un témoin indépendant du chercheur.

Article 246 : Des exceptions à la règle du consentement sont admissibles dans le cas où :

- La recherche est faite sur dossiers ou sur échantillons biologiques et qu'il est impossible de localiser les sujets ;

- Il existe un risque de dénaturer les objectifs de certaines enquêtes par exemple lorsque les sujets choisis sont susceptibles de modifier leur comportement que l'on se propose d'étudier.

- Dans les deux cas, l'accord du Comité National d'Éthique pour la Recherche en santé est indispensable.

Section 3 : De la protection des personnes particulièrement vulnérables

Article 247 : Par personne particulièrement vulnérable, on entend une personne qui, du fait de sa situation ou de son état mental, ne peut pas donner un consentement entièrement libre ou éclairé.

C'est le cas notamment pour :

- Les enfants mineurs ;
- Les prisonniers ;
- Les malades et déficients mentaux ;
- Les personnes dont l'état nécessite des soins d'urgence ou de réanimation ;
- Les femmes enceintes ou allaitantes du fait de leurs états sont considérées comme faisant partie des personnes particulièrement vulnérables.

Article 248 : La recherche sur les personnes particulièrement vulnérables nécessite des mesures de protection et leur consentement, s'il est possible, doit obéir à des règles particulières.

Article 249 : Le consentement personnel de l'enfant doit être demandé lorsque son âge lui permet de comprendre l'objectif de la recherche, les risques et inconvénients liés à cette recherche ainsi que ce qu'on attend de sa participation.

Dans tous les cas, le consentement de l'enfant doit être complété par le consentement éclairé du parent ou du tuteur légal.

En cas de désaccord entre la volonté des parents et celle de l'enfant, c'est le refus qui prévaut.

Article 250 : Il ne peut être proposé à l'enfant et à ses parents que des recherches portant sur des maladies de l'enfance ou des pathologies auxquelles les enfants sont particulièrement vulnérables, et à condition que les mêmes recherches ne puissent pas être effectuées sur d'autres adultes.

Article 251 : Le consentement éclairé de la femme enceinte ou de la mère allaitante est, dans tous les cas, requis.

Il ne peut leur être proposé que des recherches visant à :

- Améliorer la santé de la mère sans préjudice pour le fœtus ou le nourrisson ;
- Augmenter la viabilité du fœtus ;
- Favoriser le bon développement du nourrisson ou l'aptitude de la mère à le nourrir.

Article 252 : Toute recherche favorisant l'interruption de la grossesse tel que prévu à l'article 269 du Code pénal est interdite.

Article 253 : Il ne peut être proposé aucune participation à des recherches biomédicales à des personnes détenues en prison ou privées de toute leur liberté.

Article 254 : Dans le cas où un sujet malade est placé sous la responsabilité de l'autorité judiciaire, l'accord de celle-ci est requis en complément du consentement éclairé du sujet.

Article 255 : Dans la mesure du possible, le malade doit être informé des recherches pour lesquelles sa participation est envisagée et son consentement doit être sollicité.

Article 256 : Le déficient mental doit être informé des recherches pour lesquelles sa participation est envisagée. Le refus du déficient mental doit toujours être respecté.

En outre est requis le consentement éclairé du parent ou du tuteur. Le refus du malade mental doit toujours être respecté.

Article 257 : On ne peut se proposer d'entreprendre sur des malades ou déficients mentaux que des recherches intéressant la pathologie dont ils sont atteints et ne pouvant être conduites sur des sujets sains.

Article 258 : Dans les situations d'urgences, lorsque la personne n'est pas en état de donner un consentement éclairé pour une recherche, on sollicite le consentement d'un proche.

Section 4 : De la non nuisance

Article 259 : Le chercheur est responsable de la sécurité des personnes soumises à la recherche.

En particulier, il doit prévoir les risques auxquels elles sont exposées et les protéger de ces risques.

Article 260 : L'évaluation d'un risque comporte une appréciation de sa probabilité et de sa gravité.

Article 261 : Les risques encourus du fait de la recherche peuvent être des risques non mineurs. Les personnes particulièrement vulnérables ne peuvent être exposées dans le cadre d'une recherche qu'à des risques mineurs.

Article 262 : Un risque est dit mineur si, du fait de sa probabilité ou de sa faible gravité, il est d'un niveau comparable aux risques quotidiennement encourus par les personnes concernées.

Article 263 : Des risques un peu plus élevés que des risques mineurs ne sont pas admissibles dans le cadre de la recherche que pour les personnes capables de donner un consentement entièrement libre et éclairé.

Article 264 : Tout préjudice lié à la recherche doit être indemnisé.

Article 265 : En aucun cas, le consentement des sujets ne décharge de leurs responsabilités, le promoteur et l'investigateur de la recherche.

Article 266 : Le promoteur est la personne ou l'institution commanditaire de la recherche. Le promoteur est responsable des accidents liés à l'application du protocole.

Article 267 : L'investigateur est la personne qui conduit la recherche. Il est responsable en cas d'accident dû à une faute qu'il a commise personnellement.

CHAPITRE II : DISPOSITIONS APPLICABLES A LA RECHERCHE EPIDEMIOLOGIQUE

Article 268 : On entend par recherche épidémiologique, des enquêtes ou des essais d'intervention effectués sur des populations dans le but d'acquérir des connaissances sur les facteurs qui influencent leur état de santé.

Section 2 : De la pression injustifiée et de l'incitation à participer

Article 269 : Il est interdit à toute personne d'exercer une contrainte sur un sujet pour l'amener à participer à une enquête épidémiologique.

Article 270 : Le chercheur ne doit pas rester anonyme ; il est tenu de s'identifier auprès des sujets invités à participer à l'enquête.

Article 271 : Il appartient au chercheur de s'assurer que l'individu qui participe à une enquête ne subit pas des influences indues.

Article 272 : Des avantages individuels ou collectifs peuvent être attribués en compensation de la participation de la collectivité à la recherche.

Ces avantages sont négociés avec le représentant de la collectivité et en aucun cas, ils ne peuvent constituer pour le représentant une source d'enrichissement personnel.

En cas de violation de cette prescription, l'article 339 du Code pénal s'applique.

Article 273 : L'accord individuel ou collectif doit être indépendant des avantages que l'individu ou la collectivité peuvent tirer de la recherche.

Article 274 : Le remboursement des frais encourus comme les voyages, l'hébergement, la nourriture ainsi que la compensation des dommages ne sont pas considérés comme étant des avantages tels que stipulés à l'article 272.

Section 3 : Du respect des valeurs et habitudes sociales

Article 275 ; Le chercheur est tenu, avant d'appliquer toute enquête épidémiologique sur une collectivité ou un groupe d'individus, de recueillir tous les renseignements utiles sur leur composition et mode de vie et de respecter leurs droits, leurs croyances et leurs habitudes.

Article 276 : Des enquêtes peuvent contribuer au changement de certaines habitudes ou de certains comportements de façon à modifier les attitudes en faveur de la santé. Sur le plan de l'éthique, sans vouloir imposer un bienfait que la collectivité n'a pas sollicité, de telles enquêtes doivent être considérées comme acceptables et exemptes de préjudice. Toutefois, le chercheur ne doit pas surévaluer leurs avantages.

Article 277 : Tout chercheur étranger menant des enquêtes en Guinée est tenu de se conformer aux normes éthiques de son propre pays ainsi que celles de la Guinée et de respecter les valeurs culturelles des collectivités faisant l'objet de ces enquêtes.

De même, le chercheur guinéen appelé à mener des enquêtes à l'extérieur du pays, doit respecter les normes éthiques guinéennes tout en respectant les valeurs culturelles du pays hôte.

Section 4 : De la diffusion de l'information et de la confidentialité des résultats

Article 278 : Il est formellement interdit de procéder à la divulgation d'informations identifiantes liées à des enquêtes épidémiologiques. Une

information est dite identifiante si elle permet d'identifier la ou les personnes ayant fait l'objet de ces enquêtes.

Article 279 : Les communautés, les groupes et les individus ayant participer à une enquête doivent être correctement informés des résultats de ces enquêtes. L'information doit tenir compte du niveau d'instruction et de compréhension des communautés concernées.

Toutefois, si la connaissance de ces résultats peut avoir des conséquences défavorables pour cette communauté, leur divulgation n'est pas requise.

Article 280 : Au cas où les résultats de l'enquête peuvent améliorer la santé communautaire, le chercheur est tenu d'en informer les autorités sanitaires compétentes.

Article 281 : Lorsque, au cours d'une enquête, le chercheur découvre qu'un sujet est atteint d'une maladie ou d'un état pathologique et qu'il ne peut informer le sujet, il est tenu de faire comprendre au sujet que cette absence d'information ne signifie pas qu'il est exempt de la maladie ou de l'état pathologique. Le chercheur doit aviser /p. 57/ le sujet des moyens d'obtenir un diagnostic personnel en vue d'un traitement adéquat.

Article 282 : Lorsqu'il n'est pas possible d'aviser individuellement les sujets enquêtés de la nécessité de recevoir des soins, le chercheur devra néanmoins communiquer à la communauté les avis appropriés sur les soins de santé à appliquer.

Article 283 : Le chercheur est dans l'obligation de publier les renseignements d'intérêt général résultant de ses enquêtes même si cela est contraire à l'avis des services publics ou de tous autres organismes.

Article 284 : Le chercheur ne doit pas publier des résultats de recherche dans le but de tirer des conclusions favorables à des intérêts particuliers.

Article 285 ; Le chercheur ne doit pas présenter comme des faits reconnus de simples interprétations, suggestions, théories ou hypothèses.

Article 286 : Lorsque le chercheur estime que la divulgation d'informations sensibles risque d'exposer un groupe à des critiques ou à un traitement indésirable, il doit faire preuve de retenue dans la communication et l'interprétation de ses conclusions. Une information est dite sensible lorsqu'elle risque d'entraîner pour la personne ou le groupe concerné, une discrimination sociale.

Article 287 : Toutefois lorsque la compréhension des résultats exige que soient connus les circonstances et les lieux de l'enquête, le chercheur doit envisager des mesures de protection pour éviter au groupe concerné tout préjudice ou inconvénient.

Article 288 : Lorsqu'un antagonisme apparaît entre d'une part, l'obligation de ne causer aucun tort, et d'autre part le fait de dire la vérité et de présenter publiquement des conclusions scientifiques, le chercheur doit atténuer ces inconvénients en interprétant les données de manière à protéger les intérêts des personnes à risque sans pour autant nuire à l'intégrité scientifique.

CHAPITRE III : DISPOSITIONS APPLICABLES A LA RECHERCHE CLINIQUE ET BIOLOGIQUE

Article 289 : On entend par Recherche Clinique et Biologique, la recherche portant sur des individus humains dans le but d'acquérir des connaissances sur le fonctionnement de l'organisme et le traitement des maladies.

Section 1 : De la recherche clinique et biologique associée avec des soins médicaux

Article 290 : Lorsqu'une recherche est associée avec des soins médicaux, le malade doit être clairement informé de ce qui relève du traitement de sa maladie.

Article 291 : La recherche associée avec des soins médicaux doit se faire dans le respect de la dignité de la personne malade.

Article 292 : L'association de la recherche biomédicale avec des soins médicaux en vue de l'acquisition des connaissances médicales nouvelles ne peut se faire que si cette recherche est justifiée par une utilité diagnostique et thérapeutique relative à la maladie dont la personne est atteinte.

Article 293 : Lorsqu'un protocole de recherche est appliqué à un malade hospitalisé et que le promoteur de la recherche n'est pas l'institution d'accueil, une convention doit être passée entre cette institution et le promoteur.

Article 294 : Lorsqu'un malade hospitalisé participe à une recherche, cette participation peut lui donner un avantage financier sur le coût du traitement ou de la prise en charge.

Section 2 : De la recherche clinique et biologique non associée avec des soins médicaux

Article 295 : Dans toute recherche biomédicale non associée avec des soins médicaux, le bien être du sujet doit toujours prévaloir sur les intérêts de la science et de la société.

Le chercheur est tenu de protéger la vie et la santé du sujet lors d'expériences entreprises à des fins purement scientifiques. L'expérience doit être arrêtée si sa poursuite s'avère dangereuse pour le sujet.

Article 296 : La recherche biomédicale à visée non thérapeutique ne peut être entreprise que sur des sujets volontaires en bonne santé, ou exceptionnellement sur des malades volontaires atteints d'une affection étrangère à l'étude, si on est assuré que leur consentement est entièrement libre et éclairé.

Section 3 : De la recherche en médecine traditionnelle

Article 297 : Les recherches traditionnelles en santé font partie du patrimoine culturel guinéen. Le patrimoine culturel doit être protégé aussi bien que le patrimoine national (environnement). Il n'est pas éthique de laisser se perdre le secret d'une recette. Celui qui connaît une recette doit veiller à ce qu'elle soit recueillie.

Article 298 : Lorsqu'un chercheur recueille une recette traditionnelle il doit mentionner sa source.

Si le chercheur tire de la recette un profit, ce profit doit être partagé avec celui auprès de qui la recette a été recueillie.

Article 299 : Lorsqu'un médecin chercheur participe à une recherche préclassique ou clinique sur la médecine traditionnelle, il est légitime qu'il ne modifie pas les recettes de celles-ci sauf s'il juge que le malade est en danger et qu'il a les moyens d'intervenir efficacement dans le cadre du système de soins de santé moderne.

Article 300 : Les dispositions qui s'appliquent à la recherche clinique et biologique s'appliquent aussi à l'évaluation d'une recette traditionnelle par les méthodes modernes.

Section 4 : De l'indemnisation en cas de préjudice accidentel

Article 301 : Toute personne soumise à des recherches biomédicales, qui par la suite présenterait de ce fait une lésion, a droit à une indemnisation entière de toute incapacité temporaire ou permanente.

En cas de décès, les personnes en charge ont droit à une indemnisation appropriée.

Article 302 : En aucun cas le chercheur ne doit exiger des sujets de l'expérimentation qu'ils renoncent à leur droit d'indemnisation en cas d'accident ou qu'ils soient tenus de faire la preuve qu'il y a eu négligence ou incompétence de la part du chercheur.

CHAPITRE IV : DE L'EXAMEN ETHIQUE

Article 303 : Tout projet de recherche en santé impliquant des sujets humains doit être soumis avant son exécution à l'appréciation du Comité National d'Éthique pour la Recherche en Santé (CNERS) qui se prononce en toute indépendance. En aucun cas, l'avis du CNERS ne décharge le promoteur ou l'investigateur de ses responsabilités éthiques et scientifiques.

Article 304 ; L'examen éthique vise à :

- Assurer que la valeur scientifique du projet de recherche a été approuvée par le Comité Consultatif comme stipulé à l'article 241 du présent Code ;

- Vérifier que toutes les expériences et enquêtes proposées ont été préalablement évaluées et jugées suffisamment sûres pour être menées sur des sujets humains ;

- S'assurer que les modalités prévues dans les dispositions du présent Livre pour le consentement des sujets sont respectées (Chapitre I, Section 2 ; Chapitre II, Section 1) ;

- S'assurer que tout autre problème éthique découlant du projet a reçu une solution satisfaisante au plan des principes comme de la pratique.

Article 305 : Lorsque les recherches portent sur une épidémie ou une calamité, il est impératif que le CNERS soit informé dès le début des travaux. Le protocole de recherche doit lui être soumis dans un délai n'excédant pas trente jours.

Malgré le caractère d'urgence, le chercheur est tenu de respecter les droits des sujets à savoir leur liberté, leur vie privée et la confidentialité des opérations.

Article 306 : Tout protocole de recherche doit comporter les éléments suivants :

- L'identité du promoteur de la recherche ;

- L'identité du ou des investigateurs ;

- Un exposé précis des objectifs et hypothèses de recherche ainsi que de leur justification eu égard à l'état actuel des connaissances ;

- Une présentation précise de la méthodologie et de son adéquation aux objectifs. Cette présentation doit inclure entre autres une description précise de toutes les interventions pratiquées sur le sujet ;

- Le calcul du nombre de sujets nécessaires à l'étude et la méthode d'analyse des données ;

- Les critères choisis pour décider du terme de l'enquête ;

- Les critères déterminant l'inclusion ou l'exclusion de sujets individuels ;

- Les risques encourus par les sujets soumis à la recherche ;

- Les modalités de recueil du consentement des sujets en indiquant quels sont les moyens et la documentation que l'on se propose d'utiliser pour obtenir le consentement éclairé ou lorsque cela n'est pas possible en indiquant les autres moyens retenus pour obtenir une autorisation, ainsi que les moyens de protection des droits, et de sauvegarde du confort, des sujets enquêtés.

Le protocole doit également :

- Comprendre des informations permettant d'établir la sécurité de chaque projet de procédure et d'intervention et également de tout médicament, vaccin ou dispositif qui doit être à l'essai en se fondant notamment sur les résultats des travaux pertinents de recherche en laboratoire et sur l'animal ;

- Apporter la preuve que le chercheur possède les qualifications nécessaires ou dans le cas contraire qu'il travaille sous la surveillance d'une personne compétente ;

- Apporter la preuve que le chercheur dispose de moyens appropriés lui permettant de conduire ses recherches de manière sûre et efficace ;

- Décrire les moyens proposés pour protéger la vie et préserver la confidentialité des données identifiantes pendant l'enquête et lors de la publication des résultats ;

- Mentionner toutes considérations d'ordre éthique qui pourraient être retenues.

Article 307 : L'examen éthique d'un protocole qui prévoit la nécessité d'un groupe témoin ou d'un groupe recevant un placebo doit s'assurer :

- Que le groupe témoin choisi dans le cas de l'étude d'un état morbide susceptible d'entraîner une issue fatale, une incapacité ou d'autres inconvénients sérieux, recevra des soins conformes à la thérapie en usage et

- Que s'il s'avère que le mode de traitement à l'essai est supérieur à celui habituellement utilisé, tous les membres du groupe témoin en bénéficieront dès la fin de l'essai.

De telles enquêtes doivent prévoir un dispositif d'arrêt, et être arrêtées avant la date prévue si on observe dans le groupe traité une toxicité inacceptable du produit à l'essai.

Article 308 : Lorsque le protocole prévoit une randomisation (tirage au sort), l'examen éthique doit veiller à ce que cette randomisation soit justifiée par l'incertitude qui subsiste quant à la différence de résultats entre les deux stratégies thérapeutiques comparées dans l'essai.

Tous les sujets doivent êtres informés à la fois sur l'incertitude qui subsiste quant à la différence de valeur entre les deux stratégies thérapeutiques et sur le fait que l'objectif de l'essai est de déterminer quelle est la stratégie thérapeutique la meilleure.

Article 309 : Lorsque le chercheur est convaincu que la recherche comporte des risques pour les individus ou les groupes cibles, il est tenu d'informer le CNERS ainsi que les sujets retenus des groupes avérés et des possibilités de prévenir ou d'atténuer ces risques.

Article 310 : Le CNERS doit donner son avis sur tout projet de recherche qui lui est soumis dans un délai maximum ne dépassant pas soixante jours à compter de la date de dépôt du projet.

Article 311 : Le chercheur est tenu de soumettre son projet de recherche au CNERS au moins quatre-vingt-dix jours avant la date prévue pour la mise en œuvre du projet.

Article 312 : Lorsqu'un membre du CNERS est directement concerné par un projet de recherche, sa participation aux séances d'examen de ce projet est interdite.

Article 313 : Le chercheur est tenu d'informer le CNERS des problèmes rencontrés lors du déroulement de la recherche.

Le CNERS peut demander à tout moment l'interruption d'une recherche lorsqu'il se rend compte de l'existence de problèmes éthiques nouveaux ou ayant échappé à son appréciation antérieure.

Article 314 : Le rejet définitif d'un projet de recherche pour des raisons liées à l'éthique ne peut avoir lieu que dans la mesure où le chercheur n'est pas arrivé à résoudre les problèmes éthiques qui lui sont signalés par le comité.

Article 315 : Le CNERS peut faire appel à des experts sur des points particuliers pour apprécier la qualité du protocole sur les plans scientifique et éthique.

En aucun cas le protocole ne peut être communiqué à des personnes extérieures au CNERS.

Dans tous les cas, il n'appartient qu'au seul CNERS de prendre une décision.

Article 316 : Les membres du CNERS sont tenus à une stricte confidentialité sur le contenu des protocoles et sur leurs délibérations

CHAPITRE V : DES DISPOSITIONS DIVERSES

Article 317 : Des dispositions réglementaires seront prises en tant que besoin pour la mise en application effective des différentes mesures fixées par la présente Loi.

Article 318 : La présente Loi sera enregistrée, publiée au Journal Officiel de la République et exécutée comme Loi de l'État.

Conakry, le 19 juin 1997

- GENERAL LANSANA CONTE -

LIBERIA MEDICINES & HEALTH PRODUCTS REGULATORY AUTHORITY (LMHRA)

GUIDELINE FOR APPLICATION TO CONDUCT OF CLINICAL TRIALS IN LIBERIA

Date: February 2014

THIS GUIDELINE WAS PROMULGATED UNDER PART IV SECTION 2 (1 j & n) OF THE LIBERIA MEDICINES AND HEALTH PRODUCTS REGULATORY AUTHORITY ACT OF 2010

First Edition

February 2014

GUIDELINE FOR APPLICATION TO CONDUCT CLINICAL TRIALS IN LIBERIA

Foreword

This is the first edition of the guideline for application to conduct clinical trials in Liberia which has been drafted by a committee constituted by the Liberia Medicines and Health Products Regulatory Authority (LMHRA). The guideline has been made under Part IV Section 2(1 j & n) of the Liberia Medicines and Health Products Regulatory Authority Act, 2010. The edition is the first on the process of Clinical Trials in Liberia to have been drafted and to be implemented under the LMHRA's Act of 2010. The Authority has a legal responsibility of ensuring that all clinical trials obtain a written authorization from the LMHRA prior to commencement of study of any kind in Liberia.

It is therefore anticipated that all those who will be intending to conduct clinical trials in Liberia will herein oblige themselves with the aforementioned legal provisions and follow the procedures and requirements as set out in this guideline. The review process had evolved through drafting the guideline and consultation with stakeholders from various institutions before final approval by the LMHRA Management. The guideline therefore provides an up-to-date guidance on application requirements and standards of Good Clinical Practices (GCP) to be followed by all those who have interests in clinical trials in the country, to include research institutions, Medicines and Health Products Ethics Committee (MHEC), researchers, Contract Research Organizations (CROs), trial participants, trial applicants, Principal Investigators (PIs) and Sponsors alike.

It is the expectation of the LMHRA that the guideline will enable consistent and uniform documentation of applications and make it easier for the Authority to evaluate all clinical trials and make decisions on approval/non-approval based on clear and transparent outlined criteria. The Authority has also adopted for use the International Conference on Harmonization (ICH) of Technical requirements for Registration of Pharmaceuticals for Human Use - Tripartite Guideline for Good Clinical Practice (GCP). Applicants are therefore required to follow the LMHRA guideline along with the current GCP guideline when generating clinical trials data. As clinical trials are complex in nature and since review of technical guidelines in any scientific spectrum is unavoidable in order to keep pace and benefit from developments in science and technology, the LMHRA shall always welcome new ideas, opinions, and suggestions in this context that will assist in improvement of this guideline.

David Sumo (Pharm.)

MANAGING DIRECTOR

LMHRA

Acknowledgements

I am grateful to the hard working committee for their tireless effort in the draft of this policy document to guide all medicines and health products related clinical trials in the Republic of Liberia. This guideline has been drafted to outline application requirements and procedures for clinical trials.

The process to draft the guideline started in August, 2013 with a seven-man committee that worked along with the Department of Pharmacovigilance and Medicines Information of the Liberia Medicines and Health Products Regulatory Authority (LMHRA) to produce the first draft. The drafting team relied on their experiences, knowledge on clinical trials and available literatures (WHO, ICH-GCP, NIH, School of Pharmacy-University of Liberia, etc.).

I would like to express my profound gratitude to the Drafting Committee members, Pharm. Ezekiel F. Hallie, Pharm. Joseph N. Somwarbi, Pharm. Nathaniel Borley Comehn, Pharm. James D. K. Goteh, Pharm. Juwe D. Kercula and Mr. Theophilus Ndorbor, for the level of hard work and resources exerted in a timely development of this first draft. I would also like to express my sincere thanks and appreciation to all persons and institutions for their support.

David Sumo, Pharm.

1.0 Introduction

Clinical trials are organized research studies directed on prospective human participants expected to determine the safety and effectiveness of new or unverified treatments. They are specifically designed to find better ways to treat, cure, prevent or diagnose diseases and/or conditions and to answer scientific questions.

The Liberia Medicines and Health Products Regulatory Authority Act of 2010, provides for the regulation and control of clinical trials in the country. **Part V Section 5(1)** of the Act prohibits any person/organization to conduct a clinical trial on any medicines and health products without a written authorization from the Authority. **Section 5(2)** provides that the conditions for authorization of such Clinical Trial shall be stipulated in regulations promulgated by the Authority that shall provide for the issuance, renewal, suspension, cancellation and revocation of such authorizations. In this regard, any person wishing to conduct a clinical trial of a medicines and health products shall submit to the Authority an application in prescribed form signed by him/her and accompanied with prescribed fees, an Ethical Clearance Certificate issued by any approved institute for clinical research and any other relevant information as required by the LMHRA. This guideline has therefore been developed so as to provide guidance on current minimum standards required for authorization to conduct clinical trials involving medicines and health products in Liberia. It articulates among other things, including application procedures, good clinical practice (GCP) requirements and ethical principles for clinical research involving human participants. Ethics are as important as scientific considerations when reviewing clinical protocols for research, this is an important aspect emphasized in this document.

The LMHRA has requirements for qualifications and responsibilities of investigators and monitors. It also has requirements concerning informed consent and procedures for trial amendments. Other requirements include reporting of Serious Adverse Events (SAEs)/Suspected Unexpected Serious Adverse drug Reactions (SUSARs), requirements concerning Data Safety Monitoring Board (DSMB) or alternatively known as Data Monitoring Committee (DMC), as well as the regular submission of progress reports, procedures for termination of clinical trials and a snapshot on inspection of trial sites. Various forms and tools have also been attached as appendices to aid in the application process. These shall be filled in and submitted together with the documentation as specified in the guideline.

1.1 Relevance of this Guideline

The relevance of this guideline is to provide Liberia with clearly expressed standards of good clinical practice in clinical study that are also applicable to local realities and contexts and to

ascertain that clinical trial carried out on human participants are designed and conducted according to strict scientific and ethical principles within the basis of good clinical practice. Compliance with these standards provides the public with assurance that the rights, safety and well-being of trial participants are safeguarded and that clinical trial data are trustworthy.

1.2 Definition of terms

In the context of this guideline the following words/phrases are defined as adopted from WHO:

The Act - The Liberia Medicines and Health Products Regulatory Authority Act of 2010 and regulations relating to clinical trials made under the Act.
Adverse Drug Reactions - All noxious and unintended responses to a clinical trial medicinal product related to any dose or all unintended noxious responses to a registered medicinal product which occurs at doses normally used in humans for prophylaxis, diagnosis, or therapy of diseases or for modification of physiological function.
Adverse Event -Any untoward medical occurrence in a patient or clinical investigation study participant administered a pharmaceutical product and which does not necessarily have a usual relationship with the treatment. An adverse event (AE) can therefore beany unfavorable and unintended sign (including an abnormal laboratory finding), symptom, or disease temporarily associated with the use of an investigational medicinal product (IMP), whether or not related to the IMP.
Applicant - A person applying to conduct a clinical trial which may include a sponsor, contract research organization or in the case of investigator-initiated academic research studies, research institution or principal investigator.
Audit of a trial - A systematic examination, carried out independently of those directly involved in the trial, to determine whether the conduct of a trial complies with the agreed protocol and whether the data reported are consistent with the records on site, e.g. whether data reported or recorded in the case-report forms are consonant with those found in hospital files and other original records.
Audit Certificate - A declaration of confirmation by the auditor that an audit has taken place
Audit Report - A written evaluation by the sponsor's auditor of the results of the audit
Authority– Liberia Medicines and Health Products Regulatory Authority (LMHRA)
Blinding/Masking - A procedure in which one or more parties to the trial are kept unaware of the treatment assignment(s). Single-blinding usually refers to the study participant(s) being unaware and double-blinding usually refers to the study participant(s), investigator(s), monitor, and in some cases, data analyst(s) being unaware of the treatment assignment(s).
Case Report Form - A document that is used to record data on each trial subject during the course of the trial, as defined by the protocol. The data should be collected by procedures which guarantee preservation, retention and retrieval of information and allow easy access for verification, audit and inspection.

Clinical Trial/Study - A systematic study on medicinal product(s) in human participants (including patients and other volunteers) in order to discover or verify the effects of and/or identify any adverse reaction to investigational products, and/or to study the absorption, distribution, metabolism and excretion of the products with the objective of ascertaining their efficacy and safety. Clinical trials are generally classified into four phases.
A brief description of the individual phases, based on their purposes as related to clinical development of medicinal products, is given below:

Phase I - These are the first trials of a new active ingredient or new formulations in man, often carried out in healthy volunteers. Their purpose is to establish a preliminary evaluation of safety, and a first outline of the pharmacokinetic and, where possible, a pharmacodynamic profile of the active ingredient in humans.

Phase II - These trials are performed in a limited number of study participants and are often, at a later stage, of a comparative (e.g. placebo-controlled) design. Their purpose is to demonstrate therapeutic activity and to assess short-term safety of the active ingredient in patients suffering from a disease or condition for which the active ingredient is intended. This phase also aims at the determination of appropriate dose ranges or regimens and (if possible) clarification of dose-response relationships in order to provide an optimal background for the design of extensive therapeutic trials.

Phase III - Trials in larger (and possibly varied) patient groups with the purpose of determining the short and long-term safety/efficacy balance of formulation(s) of the active ingredient, and of assessing its overall and relative therapeutic value. The pattern and profile of any frequent adverse reactions must be investigated and special features of the product must be explored (e.g. clinically-relevant drug interactions, factors leading to differences in effect such as age). These trials should preferably be of a randomized double-blind design, but other designs may be acceptable, e.g. long-term safety studies. Generally, the conditions under which these trials are carried out should be as close as possible to normal conditions of use.

Phase IV - Studies performed after marketing of the medicinal product. Trials in phase IV are carried out on the basis of the product characteristics on which the marketing authorization was granted and are normally in the form of post marketing surveillance, or assessment of therapeutic value or treatment strategies.
Although methods may differ, these studies should use the same scientific and ethical standards as applied in premarketing studies. After a product has been placed on the market, clinical trials designed to explore new indications, new methods of administration or new combinations, etc. are normally considered as trials for new medicinal products.
Clinical Trial/Study Report - A clear and accurate written description of a trial/study of any therapeutic or prophylactic agent conducted in human study participants in which the clinical and statistical description, presentations and analyses are fully integrated into a single report.

Comparator Product - A medicinal or marketed product (i.e. active control), or placebo, used as a reference in a clinical trial.

Confidentiality -Maintenance of the privacy of trial participants including their personal identity and all personal medical information.

Contract- A written, dated and signed agreement between two or more involved parties that sets out any arrangements on delegation and distribution of tasks and obligations and, if appropriate, on financial matters. The protocol may serve as the basis of a contract.

Coordinating Committee - A committee that a sponsor may organize to coordinate the conduct of a multi-center trial.

Coordinating Investigator - An investigator assigned the responsibility for the coordination of investigators at the different centers participating in a multi-center trial.

Contract Research Organization - A person or an organization (commercial, academic or other) contracted by the sponsor to perform one or more of a sponsor's trial-related duties and functions.

Data and Safety Monitoring Board - An independent data monitoring committee that may be established by the sponsor to assess at intervals the progress of a clinical trial, the safety data and the critical efficacy endpoints and to recommend to the sponsor whether to continue, modify, or stop a trial.

Direct Access - Permission to examine, analyze, verify and reproduce any records and reports that are important to evaluation of a clinical trial. LMHRA inspectors with direct access should take all reasonable precautions to maintain the confidentiality of study participants' identities and sponsor’s proprietary information.

Documentation - All records, in any form (including, but not limited to, written, electronic, magnetic, and optical records, and scans, x-rays, and electrocardiograms) that describe or record the methods, conduct, and/or results of a trial, the factors affecting a trial, and the actions taken.

Essential Documents - Documents which individually and collectively permit evaluation of the conduct of a study and the quality of the data produced.

Ethical Clearance - An authorization to conduct a clinical trial issued by the Medicines and Health Products Ethics Committee based on ethical issues related to trials involving human participants in Liberia.

Good Clinical Practice - A standard for the design, conduct, performance, monitoring, auditing, recording, analyses and reporting of clinical trials that provide assurance that the data and reported results are credible and accurate and that the rights, integrity, and confidentiality of trial study participants are protected.

Good Manufacturing Practice - That part of quality assurance which ensures that investigational products are consistently produced and controlled to the quality standards appropriate to their intended use and as required by the marketing authorization. In these guidelines, GMP refers to the current LMHRA GMP Guideline.

Impartial Witness - A person, who is independent of the trial, who cannot be unfairly influenced by people involved with the trial, who attends the informed consent process if the

study participant or the study participant's legally acceptable representative cannot read, and who reads the informed consent form and any other written information supplied to the study participant.

Independent Ethics Committee - An independent body (a review board or a committee, institutional, regional or national), constituted of medical professionals and non-medical members, whose responsibility is to verify that the safety, integrity and human rights of participants in a particular trial are protected and to consider the general ethics of the trial, thereby providing public reassurance. Ethics committees should be constituted and operated so that their tasks can be executed free from bias and from any influence of those who are conducting the trial.

Informed Consent - A participant's voluntary confirmation of willingness to participate in a particular trial, and the documentation thereof. This consent should only be sought after all appropriate information has been given about the trial including an explanation of its status as research, its objectives, potential benefits, risks and inconveniences, alternative treatment that may be available, and of the subject's rights and responsibilities in accordance with the current revision of the Declaration of Helsinki (see Appendix 11).

Inspection - The act of conducting an official review of documents, facilities, records, and any other resources that are deemed necessary by LMHRA to be related to the clinical trial and that may be located at the site of the trial, at the sponsor's and/or CRO's facilities or at other establishments deemed appropriate by LMHRA.

Interim Clinical Trial/Study Report - A report of intermediate results and their evaluation based on analyses performed during the course of a trial.

Investigational medicinal Product - A pharmaceutical form of an active ingredient or placebo being tested or used as a reference in a clinical trial, including a product with a marketing authorization when used or assembled (formulated or packaged) in a way different from the approved form, or when used for an unapproved indication, or when used to gain further information about an approved use.

Investigator - A physician, dentist or other qualified person who conducts a clinical trial at a trial site. See also Sub-investigator.

Investigator's Brochure - A compilation of the clinical and non-clinical data on the investigational product(s) which is relevant to the study of the investigational product(s) in human study participants.

Legally Acceptable Representative - An individual or juridical or other body authorized under applicable law to consent, on behalf of a prospective study participant, to the study participant's participation in the clinical trial.

Material Transfer Agreement - A written agreement entered into by a provider and a recipient of research material. The purpose of the MTA is to protect the intellectual and other property rights of the provider while permitting research with the material to proceed.

Monitor- A person appointed by, and responsible to, the sponsor or Contract Research Organization (CRO) for the monitoring and reporting of progress of the trial and for verification of data.

Monitoring Report - A written report from the monitor to the sponsor after each site visit and/or other trial-related communication according to the sponsor's SOPs.

Multi-center Trial - A clinical trial conducted according to a single protocol but at more than one site, and therefore, carried out by more than one investigator.

Pre-clinical Studies - Biomedical studies not performed on human study participants.

Principle Investigator - A person responsible for the conduct of the clinical trial at a trial site who is a pharmacist, physician, dentist or other qualified person, and a member of good standing of a professional health association. If a trial is conducted by a team of individuals at a trial site, the principle investigator is the responsible leader of the team. See also Sub-investigator.

Protocol - A document which states the background, rationale and objectives of the trial and describes its design, methodology and organization, including statistical considerations, and the conditions under which it is to be performed and managed. The protocol should be dated and signed by the investigator, the institution involved and the sponsor. It can also function as a contract.

Protocol Amendment - A written description of change(s) to or formal clarification of a protocol.

Quality Assurance - All those planned and systematic actions that are established to ensure that the trial is performed and the credible data are generated, documented (recorded), and reported incompliance with LMHRA requirement(s).

Quality Control - The operational techniques and activities undertaken within the quality assurance system to verify that the requirements for quality of the trial-related activities have been fulfilled.

Randomization - The process of assigning trial study participants to treatment or control groups using an element of chance to determine the assignments in order to reduce bias.

Serious Adverse Event - or Serious Adverse Drug Reactions (Serious ADR)

Any untoward medical occurrence that at any dose: a) that results in death, b) that is life threatening, c) that requires hospitalization or prolongation of existing hospitalization, d) that results in persistent or significant disability/incapacity, or e) that is a congenital anomaly/birth defect.

Source Data - All information in original records and certified copies of original records of clinical findings, observations or other activities in a clinical trial necessary for the construction and evaluation of the trial. Source data are contained in source documents (original records or certified copies).

Source Documents - Original documents, data and records (e.g. hospital records, clinical and office charts, laboratory notes, memoranda, study participants' diaries or evaluation checklists, pharmacy dispensing records, recorded data from automated instruments, copies or transcriptions certified after verification as being accurate copies, microfiches, photographic negatives,

microfilm or magnetic media, x-rays, study participant files, and records kept at the pharmacy, at the laboratories and at medico-technical departments involved in the clinical trial).

Sponsor - An individual, company, institution or organization which takes responsibility for the initiation, management and/or financing of a clinical trial.

Sponsor-Investigator- An individual who both initiates and conducts, alone or with others, a clinical trial, and under whose immediate direction the investigational product is administered to, dispensed to, or used by a study participant. The term does not include any person other than an individual (e.g., it does not include a corporation or an agency). The obligations of a sponsor-investigator include both those of a sponsor and those of an investigator.

Standard Operating Procedures - Detailed written instructions to achieve uniformity of the performance of a specific function.

Sub-investigator - Any individual member of the clinical trial team designated and supervised by the investigator at a trial site to perform critical trial-related procedures and/or make important trial-related decisions (e.g. associates, residents, research fellows).

Trial participant- An individual who participates in a clinical trial either as a recipient of the investigational medicinal product(s) or as a control.

Study participant Identification Code - A unique identifier assigned by the investigator to each trial study participant to protect the study participant's identity and used in lieu of the study participant's name when the investigator reports adverse events and/or other trial related data.

Trial Site - The location(s) where trial-related activities are actually conducted.

Unexpected Adverse Drug Reaction - An adverse reaction, the nature or severity of which is not consistent with the applicable product information (e.g., Investigator's Brochure for an unapproved investigational product or package insert/summary of product characteristics for an approved product).

Vulnerable Study participants - Individuals whose willingness to volunteer in a clinical trial may be unduly influenced by the expectation, whether justified or not, of benefits associated with participation, or of a retaliatory response from senior members of a hierarchy in case of refusal to participate. Examples are members of a group with a hierarchical structure, such a medical, pharmacy, dental and nursing students, subordinate hospital and laboratory personnel, employees of the pharmaceutical industry, members of the armed forces, and persons kept in detention. Other vulnerable study participants include patients with incurable diseases, persons in nursing homes, unemployed or impoverished persons, and patients in emergency situations, ethnic minority groups, homeless persons, nomads, refugees, minors, and those incapable of giving consent.

2.0 Application Procedure

An application to conduct a clinical trial is required for the following categories of medicines:

1. Unregistered medicines
2. Registered medicines where the proposed clinical trials are outside the conditions of approval. These may include changes to:
   a. Indications and clinical use
   b. Target patient population(s)
   c. Routes of administration
   d. Dosage
3. An application must be made by completing an application form (Appendix 1) accompanied by a fee as prescribed in Appendix 11. Any application that will not be accompanied by proof of payment will not be accepted.
   a. Fees may be paid directly to the LMHRA's account or by bank transfer to:
      Liberia Medicines and Health Products Regulatory Authority (LMHRA)
      Bank: **ECOBANK, Liberia Ltd**
      Account number: **001-113472105440**

4. Approval by LMHRA to conduct post-marketing clinical trials of a registered medicine within the approved conditions of registration of such a medicine is not required.
5. 2.4.1 The application shall be submitted in the English Language, both electronic and hard copy. Processing of application shall only begin upon receipt of the hard copies. Four copies word formatted, Times New Roman, font size 12, shall be submitted in sealed envelope.

6. Applications should be submitted to the following address:
   Liberia Medicine and Health products Regulatory Authority (LMHRA)
   VP Road, Tubman Boulevard
   Old Road, Sinkor
   1000 Monrovia, 10 Liberia
   West Africa

7. An application to conduct a clinical trial shall include:
   Cover letter, duly filled in, signed and stamped application form (Appendix 1)
8. General investigational plan
9. Capacity building plans including training and updating of staff that will be involved in the clinical trial
10. Protocol (study protocol and investigators, copies or description of CRFs to be used, facilities and IEC data, informed consent forms and information given to participants)
11. Investigator's Brochure or prescribing information data sheet

12. Declarations by sponsor, investigators and monitor(s) in prescribed format (Appendices 2-4)
13. Financial declaration by Sponsor and/or Principal investigator in prescribed format (Appendix 5)
14. Certified copy of insurance of study participants
15. Ethical clearance or a copy of acknowledgement of submission of study protocol from the Medicines and Health Products Ethics Committee
16. Curriculum vitae (CV) of investigator(s) (see Appendix 6 for recommended format)
17. Investigational medicinal product dossier
18. An application to conduct a clinical trial may be made by a sponsor or the sponsor's agent who must also submit a power of attorney attesting that he is a duly appointed agent.
19. A statement by the applicant must be provided indicating that all information contained therein, or referenced by the application is complete, accurate and not misleading.
20. In the case of multi-center trials, a coordinating investigator must also sign the application form.
21. If the trial is part of an international study, information regarding the other Participating countries must be provided including the part of the trial that will be carried out locally.
22. LMHRA will only process an application upon receipt of a completed application together with the prescribed fees.
23. Processing of application shall take a period of five (5) months upon receipt of submission whereby the outcome of the application shall be communicated to the applicant within this period.

3.0 Qualifications and Responsibilities of Sponsors, Investigators and Monitors:

1. Sponsors, investigators and monitors should assume responsibilities as provided in the GCP guidelines.
2. The principal investigator (PI) engaged in clinical trials must have a university degree in pharmacy, pharmacology, toxicology, biochemistry or medicines and related fields and must be competent with practical experience within the relevant professional area. The principal investigator must have had previous experience as a co-investigator in at least two trials in the relevant professional area and shall be responsible for the conduct of the clinical trial at a clinical trial site.
3. In case of multi-center studies where the PI is not a resident of Liberia, the appointed national principal investigator must be the resident and shall assume full responsibilities for all local clinical trial sites.
4. All investigators in a clinical trial as well as the trial monitor must have had formal training in Good Clinical and Laboratory Practices (GCLP) within the last two years. Evidence of attending GCLP course should also be submitted.

4.0 Study Protocol

The clinical trial study protocol shall have at least the following:

4.1 General Information

1. Protocol title, identification number and date. Any amendment(s) shall also bear the amendment number(s) and date(s).
2. Name and address of the sponsor and monitor (if other than the sponsor).
3. Name, title and contact details of the sponsor's medical expert (or dentist when appropriate) for the trial.
4. Name, title and contact details of the investigator (s) who is (are) responsible for conducting the trial, and the contact details of the trial site (s).
5. Name, title and contact details of the qualified physician (or dentist, if applicable), who is responsible for all trial-site related medical (or dental) decisions (if other than investigator).
6. Name(s) and address (es) of the clinical laboratory (ies) and other medical and/or technical department(s) and/or institutions involved in the trial.

4.2 Background Information

1. Name and description of the investigational product (s).
2. A summary of findings from pre-clinical studies that potentially have clinical significance and from clinical trials (if investigated elsewhere) that are relevant to the trial.
3. Summary of the known and potential risks and benefits of the studied product as observed in both animal and human testing.
4. Description of and justification for the route of administration, dosage, dosage regimen, and duration of treatment period(s).
5. A statement that the trial shall be conducted in compliance with the study protocol, GCP and LMHRA requirement(s).
6. Description of the population to be studied (e.g. age group and sex).
7. Reference literatures and data that are relevant to the trial that provide background for the trial.

4.3 Trial Objectives and Purpose

A detailed description of the objectives and the purpose of the trial shall be provided as to convince the Authority.

4.4 Trial Design

The scientific integrity of the trial and the credibility of the data from the trial depend substantially on the trial design. A description of the trial design should include:

1. A specific statement of the primary endpoints and the secondary endpoints, if any, to be measured during the trial.
2. A description of the type/design of trial to be conducted (e.g. double-blind, placebo-controlled, parallel design) and a schematic diagram of trial design, procedures and stages.
3. A description of the measures taken to minimize/avoid bias, including:
    a. Randomization.
    b. Blinding.
4. A description of the trial treatment(s), dosage and dosage regimen of the investigational product(s). Also include a description of the dosage form, packaging, and labeling of the investigational product(s).
5. The expected duration of subject participation, a description of the sequence and duration of the trial periods, including follow-ups, if any.
6. A description of the "stopping rules" or "discontinuation criteria" for individual subjects, at any/all parts of the trial.
7. Accountability procedures for the investigational product(s), including the placebo(s) and comparator(s), if any.
8. Maintenance of trial treatment randomization codes and procedures for breaking codes.
9. The identification of any data to be recorded directly on the case report forms (CRFs) (i.e. no prior written or electronic record of data), and to be considered as source data.

4.5 Selection and withdrawal of study participants

1. Provide participants' inclusion criteria.
2. Provide participants' exclusion criteria.
3. Provide participants' withdrawal criteria (i.e. terminating investigational product trial treatment) and procedures specifying:
    a. When and how to withdraw participants from the trial/investigational product treatment.
    b. The type and timing of the data to be collected for withdrawn participants.
    c. Whether and how participants are to be replaced.

4.6 Treatment of study participants

During the participation of all subjects in the trial, the below documentations are required:

1. The treatment(s) to be administered, including the name(s) of all the product(s), the dose(s), the dosing schedule(s), the route/mode(s) of administration, and duration including follow-up period(s) for participants for each investigational product trial treatment.
2. Medication(s)/treatment(s) permitted (including rescue medications) and those not permitted before and/or during the trial.
3. Procedures for monitoring participants' compliance.

4.7 Assessment of Efficacy

The below required documentations should be provided:

1. Specifications of the efficacy parameters.
2. Methods and timing for assessing, recording, and analyzing of efficacy parameters.

4.8 Assessment of Safety

1. Specification of safety parameters.
2. The methods and timing for assessing, recording, and analyzing safety monitoring arameters.
3. Procedures for eliciting reports of and for recording and reporting adverse events and inter-current illnesses.
4. The type and duration of the follow-up of subjects after adverse events.

4.9 Statistics

1. A description of the statistical methods to be employed, including timing of any planned interim analysis(es).
2. The number of subjects planned to be enrolled. In multi-center trials, the numbers of enrolled subjects projected for each trial site should be specified. Reason for choice of sample size, including reflections on (or calculations of) the power of the trial and clinical justification.
3. The level of significance to be used.
4. Criteria for the termination of the trial.

5. Procedure for accounting for missing, unused and spurious data.
6. Procedures for reporting any deviation(s) from the original statistical plan (any deviation(s) from the original statistical plan should be described and justified in protocol and/or in the final report, as appropriate).
7. The selection of study participants to be included in the analyses (e.g. all randomized participants, all dosed participants, all eligible participants, evaluable participants).

4.10 Direct Access to Source Data/Documents

The sponsor shall ensure that it is specified in the protocol or other written agreement that the investigator(s)/institution(s) will permit LMHRA inspection(s), providing direct access to source data/documents.

4.11 Quality Control and Quality Assurance

There should be mechanism for good quality control and quality assurance.

4.12 Pharmaceutical and Health products Ethics

Description of ethical considerations relating to the trial shall include the following issues:

1. Choice of investigators
2. Monitors and monitoring plan
3. Indicate how additional staff (monitors, pharmacists, nursing staff, etc.) will maintain patient confidentiality, follow the protocol, and abide by ethical and LMHRA requirements
4. Indemnity measures for the participants
5. Patient Information leaflets and Informed Consent forms for any proposed archiving of biological specimens for later research or for genetics research.
6. Treatment and/or management of participants and their disease condition(s) after completion of trial
7. Institutional ethics committee capacity to monitor site and conduct of trial
8. Provide an explanation if minimum recommended compensation for a participant is not being provided.
9. Follow-up of trial study participants after the conclusion of the trial
10. In case of transfer of materials, provide Material Transfer Agreement
11. (MTA) highlighting among other things, the following:
    a. Identification of the provider and recipient
    b. Identification of the material and the volume of material

c. Definition of the trial and how the material will and will not be used.
d. Maintenance of confidentiality of background or supporting data or information, if any
e. Indemnification and warranties (where applicable)

12. Data handling and record keeping should be done in conformity with WHO guidelines

4.14 Publication Policy

Publication policy, if not addressed in a separate agreement.

5.0 The Investigator's Brochure

The investigator's brochure must contain at least the following information in respect to the investigational medicinal product:

1. The physical, chemical and pharmaceutical properties
2. The pharmacological aspects including its metabolites in all animal species tested
3. The pharmacokinetics and metabolism including its biological transformation in all animal species tested
4. Toxicological effects in any animal species tested under a single dose study, a repeated dose study or a special study
5. Results of clinical pharmacokinetic studies
6. Information regarding safety, pharmacodynamics, efficacy and dose responses that were obtained from previous clinical trials in humans if available. More details could be found in WHO-GCP guidelines and may be followed when compiling information on this part.

6.0 Requirements concerning Informed Consent

1. In obtaining and documenting informed consent, the investigator shall comply with Medicines and Health Products Ethics Committee (MHEC) requirement(s) and adhere to GCP and to the ethical principles that have their origin in the Declaration of Helsinki (Appendix 11).
   Prior to the beginning of the trial, the investigator should obtain Ethical Clearance from MHEC and LMHRA approval.
2. Informed consent to study participants shall be administered in English and all information to be given to study participants both oral and written must be in English. The consent form together with the accompanying information shall be in English.
3. The written informed consent form and any other written information to be provided to participants shall be revised whenever important new information becomes available that may be relevant to the participant's consent. Any revised written informed consent form, and written information should receive MHEC and LMHRA approval in advance of use. The participant or the participant's legally acceptable representative should be informed in a timely manner if new information becomes available that may be relevant to the participant's willingness to continue participation in the trial. The communication of this information shall be documented.
4. Neither the investigator, nor the trial staff, shall coerce or unduly influence a participant to participate or to continue to participate in a trial.
5. None of the oral and written information concerning the trial, including the written informed consent form, should contain any language that causes the participant or the participant's legally acceptable representative to waive or to appear to waive any legal rights, or that releases or appears to release the investigator, the institution, the sponsor, or their agents from liability for negligence.
6. The investigator, or a person designated by the investigator, shall fully inform the participant or, if the participant is unable to provide informed consent, the participant's legally acceptable representative, of all pertinent aspects of the trial including the written information and the MHEC and LMHRA approval.
7. The language used in the oral and written information about the trial, including the written informed consent form, should be as non-technical as practical and should be understandable to the participant or the participant's legally acceptable representative and the impartial witness, where applicable.
8. Before informed consent may be obtained, the investigator, or a person designated by the investigator, should provide the participant or the participant's legally acceptable representative ample time and opportunity to inquire about details of the trial and to decide whether or not to participate in the trial. All questions about the trial should be answered to the satisfaction of the participant or the participant's legally acceptable representative.

9. Prior to participation in the trial, the written informed consent form shall be signed and personally dated by the participant or by the participant's legally acceptable representative, and by the person who conducted the informed consent discussion.
10. If a participant is unable to read or if a legally acceptable representative is unable to read, an impartial witness shall be present during the entire informed consent discussion. After the written informed consent form and any other written information to be provided to participant, is read and explained to the participant or the participant's legally acceptable representative, and after the participant or the participant's legally acceptable representative has orally consented to participate in the trial and, if capable of doing so, has signed and personally dated the informed consent form, the witness shall sign and personally date the consent form. By signing the consent form, the witness attests that the information in the consent form and any other written information was accurately explained to, and apparently understood by, the participant or the participant's legally acceptable representative, and that informed consent was freely given by the participant or the participant's legally acceptable representative.
11. Both the informed consent discussion and the written informed consent form and any other written information to be provided to participants shall include explanations of the following:
    a. That the trial involves research.
    b. The purpose of the trial.
    c. The trial treatment(s) and the probability for random assignment to each treatment.
    d. The trial procedures to be followed, including all invasive procedures.
    e. The participant's responsibilities.
    f. Those aspects of the trial that are experimental.
    g. The reasonably foreseeable risks or inconveniences to the participant and, when applicable, to an embryo, fetus, or nursing infant.
    h. The reasonably expected benefits. When there is no intended clinical benefit to the participant, the participant should be made aware of this.
    i. The alternative procedure(s) or course(s) of treatment that may be available to the participant, and their important potential benefits and risks.
    j. The compensation and/or treatment available to the participant in the event of trial-related injury.
    k. The anticipated prorated payment, if any, to the participant for participating in the trial.
    l. The anticipated expenses, if any, to the participant for participating in the trial.
    m. That the participation in the trial is voluntary and that the participant may refuse to participate or withdraw from the trial, at any time, without penalty or loss of benefits to which the participant is otherwise entitled.

n. That the LMHRA will be granted direct access to the participant's original medical records for verification of clinical trial procedures and/or data, without violating the confidentiality of the participant, to the extent permitted by LMHRA and that, by signing a written informed consent form, the participant or the participant's legally acceptable representative is authorizing such access.

o. That records identifying the participant will be kept confidential and will not be made publicly available. If the results of the trial are published, the participant's identity will remain confidential.

p. That the participant or the participant's legally acceptable representative will be informed in a timely manner if information becomes available that may be relevant to the participant's willingness to continue participating in the trial.

q. The person(s) to contact for further information regarding the trial and the rights of trial participants, and whom to contact in the event of trial-related injury.

r. The foreseeable circumstances and/or reasons under which the participation in the trial may be terminated.

s. The expected duration of participating in the trial.

t. The approximate number of participants involved in the trial.

12. Prior to participation in the trial, the participant or the participant's legally acceptable representative should receive a copy of the signed and dated written informed consent form and any other written information provided to the participants. During participation in the trial, the participant or the participant's legally acceptable representative should receive a copy of the signed and dated consent form updates and a copy of any amendments to the written information provided to participants.
